**Dévai Nagy, Kamilla** (Budapest, 17 February 1950 - ) – Singer, performing artist, composer and teacher. Her higher studies were at the Béla Bartók Music School, Budapest, where she studied singing with Olga Sík (1975). Her career started in 1968, when she won a TV folksong competition. She became soloist of the *Rajkó Orchestra* (1970-1973), then became an itinerant singer and became well known worldwide: Berlin (1973); USA (1975), where she performed 97 concerts within 105 days; Montreal Olympics (1976); Cuba (1978); many places in Europe, Lebanon, Ecuador, Venezuela, China, Korea, Syria, North America and Australia (1971-1978). She sings in 34 languages. Between 1983 and 1995, she was a soloist at the *Honvéd Ensemble*. From 1991 to 1995, she gave monthly performances on the Hungarian Radio and taught guitar-artists at the Erzsébet Szőnyi Music School, at Törökbálint (1994-1996). In 1996, she opened her Chronicler Singer School that is the first singer-guitarist school in Europe. Her recordings include *I Lit a Candle (Gyújtottam gyertyát)* (1980); *Slow-Walking Seasons (Ballagó évszakok)* (1989); *Singing Waters (Daloló vizek)* (1995), and *Chronicler Song on Love (Krónikásének a szeretetről)* (1998). Her book's title is *Poem-Consolation (Versvígasz)*. Her name is in the Guinness Book of Records as one who can sing in 34 languages (1995). There is a *Chronicler's Life Foundation (Krónikásének Alapítvány)* in Budapest. Among others, she received the title Performer of the Year

(1980), the Ferenc (Franz) Liszt Prize (1987), the Small Cross of Merit of Republic of Hungary (1993), the Kazinczy Prize (2001), and she received the Chevalier of Hungarian Culture title. – B: 0874, 1505, T: 7103.→**Dance House Movement.**

**Devecseri, Gábor** (Gabriel) (Budapest, 27 February 1917 - Budapest, 31 July 1971) – Poet, literary translator. He graduated from the Reformed College of Budapest, and attended the University of Budapest, where he received a Degree as a teacher of Greek and Latin. He wrote his doctoral thesis on *The Artistic Awareness in the Poetry of Callimachus (A művészi tudatosság Kalimachos költészetében)*. His first volume of poetry, written jointly with Gábor Karinthy, was published at the age of 15. In 1938, he published, as part of the Officina Publishers, bilingual classics series, the translation of the complete works of Catullus, followed by the translations of the works of Plautus, Plato, Herodotus and Aristophanes. From 1946-1948, he was Director of the Greek Institute of the University of Budapest, and from 1949-1951 Secretary-General of the Hungarian Writers' Association (*Magyar Írók Szövetsége*). During these years he also published poems, studies, anthologies and translations in various journals. His translations of Homer's *Odyssey* (1947) and the *Iliad* (1952) are considered most noteworthy. He translated into Hungarian nearly 1,000 poems, dramas and novels of 89 writers. He also wrote numerous books, several volumes of poetry and bibliographies including *Spreading Light (Terjed a fény)*; *Future's Mirror (Jövendő tükre)* poems (1954); *The Naked Goddess and the Blind Future Teller (A meztelen istennő és a vak jövendőmondó)* novel (1972), and *Collected Poems (Összegyűjtött versek)* (1974). He was a recipient of the Baumgarten Award (1939), the Attila József Prize (1952) and the Kossuth Prize (1953). – B: 0883, 0878, 1257, T: 7617.

**Dévény Castle** (now Devin, Northern Hungary, *Felvidék*, Slovakia) – Castle built on an 80-meter high limestone cliff on the River Danube, across from Hainburg (originally called Hunvár). The Celts had a fort on the cliff that was later fortified by the Romans to guard the famous Amber Road from the Baltic region to Rome. The first wooden beam castle on this site was built by the Avars around 568 AD. There is a written reference to a fenced fortress in the Almanac of Fulda in 864 AD. A strong stone castle was built later in the Árpád era (896-1301). The besieging Turkish army in 1683 was unable to take it. First, it was the property of the Crown, later it was given to the Pálffy family. The castle was habitable until the beginning of the 19th century; but in 1809, the French army destroyed it; only some walls and the tower remained. In the former courtyard a monument was erected on 18 July 1896, in the year of the millennium, commemorating the Hungarian statehood, to honor Reigning Prince Árpád, leader of the Hungarians. There was a bronze statue of a soldier from the Árpád era on top of a pillar. The Czechs destroyed it in 1920, after the Versailles-Trianon Dictated Peace Treaty ceded Northern Hungary (*Felvidék*) to them. – B: 0942, T: 7663.→**Árpád; Trianon Peace Treaty.**

**Dezséri, László** (Ladislas) (Budapest, 18 February 1914 - Budapest, 8 November 1977) – Lutheran Bishop, writer, journalist. He earned a Ph.D. in Theology in 1936, at the Sopron-based Lutheran Theology Department of the University of Pécs. From 1950 to 1956, he served as Bishop of the Southern Lutheran District of Hungary. He published his first book in 1941. During the 1956 Revolution he resigned from his post in the Church and joined the staff of the domestic political broadcasting section of the Hungarian Radio. He did much for the development of broadcasting in Hungary and for

the improvement of documentary programming. He was also Member of Parliament (1958-1962) and Secretary-General of the National Peace Committee (1962-1966). As a member of the World Peace Committee he attended the meetings of the Committee, and those of the Inter-Parliamentarian World Union. He published writings on various subjects. During his ecclesiastical service he commenced the ideologization of his Church; later, as a broadcaster, he even criticized it. His works include *Spirit and Free People*, ed. (*Lélek és szabad nép, szerk.*), *Lutheran poems* (1941); *The Oslo Report (Oslói riport)* (1948); *Weekend Notes (Hétféligi jegyzetek)* (1977), and *In the Name of Reason (Az értelem nevében)* (1963). – B: 0883, 1506, T: 7617.→**Ordass, Lajos; Evangelical Lutheran Church in Hungary.**

**Dialects, Hungarian** – Historically evolved variations of the Hungarian language, restricted to certain smaller regions. Divisions of traditional language regions in the Carpathian Basin are: (1) Western, (2) Transdanubian (*Dunántúl*), (3) Central plains, (4) Tisza River region, (5) The Palóc or North-Western (6) North-Eastern, (7) Mezőség or beyond the Királyhágó, (8) Szekler. Separated from the last one is the Csángó dialect in Transcarpathian Moldavia, and the language of the diaspora in Bukovina. In these dialect regions there are several vernaculars, some of them disappearing as a consequence of general language-development. Between 1949 and 1969, the Hungarian Academy of Sciences compiled a work in six volumes entitled: *Atlas of the Hungarian Dialects (A Magyar Nyelvjárások Atlasza)*, complete with maps that give a comprehensive picture for examining this question. Zoltán Simon and his task force used the data of this Atlas to determine the separation of each dialect by computer examination. They chose 100 well-known ancient Hungarian words and scrutinized their pronunciation in 395 Hungarian villages. On the basis of the completed examination they prepared the world's first complex computer-made dialect map. – B: 1138, T: 7669.→**Hungarian Language; Finno-Ugrian Language Affinity; Finno-Ugric Language Relation; Hun-Hungarian Language; Etruscan-Hungarian Linguistic Relationship; Hungarian Language, Opinions on.**

**Dienes, Pál** (Paul) (Tokaj, 24 November 1882 - London, UK, 23 March 1952) – Mathematician, philosopher, poet. His secondary studies were at the Reformed College, Debrecen. He studied Mathematics and Physics at the University of Budapest and obtained a doctorate there in 1905, and then a second doctorate from the University of Paris (Sorbonne). There he became acquainted with Hadamard and Picard, representatives of French mathematics. In Budapest he taught at the High School of District X (*Tisztviselőtelep*); and in 1912 he became a close friend of poet, Mihály Babits. He was a member of the leftist Galilei Circle; and during the Council (Soviet) Republic of 1919, he was involved in politics; after its fall he had to escape to Vienna. With the help of his former professor, Hadamard, he received a teaching position at the University of Aberystwyth, Wales, UK, in 1921, and later at the University of Swansea, Wales. Since 1928, he was a professor at the Birbeck College, London. He retired in 1948. He wrote poems in his last years. He researched the theory of complex variables at the Budapest University of Science in 1917. He was also interested in geometry and infinite matrices. His new mathematical ideas were published in 47 papers. His works include a monograph on Taylor series, *An Introduction to the Theory of Functions of a Complex Variable* (1931, 1937); *Leçons sur les singularités des fonctions analytiques* (1913); *The logic of Algebra* (1938), and *Logical and Mathematical Ideas of Leibniz (Leibniz logikai*

*és matematikai eszméi*) (1917). His poems were published under the title *The Maiden and the Unicorn* (1954) representing his views on mathematics, philosophy and music. – B: 0872, 0883, T: 7103.→**Babits, Mihály**.

**Dienes, Valéria** (Geiger) (Szekszárd, 25 May 1879 - Budapest, 8 June 1978) – Dancing teacher, philosopher. Her higher studies were at the University of Budapest, where she studied Mathematics and Physics (1904-1905) and earned a doctoral degree in Philosophy, Esthetics and Mathematics. During her university years she studied Piano and Composition at the Ferenc (Franz) Liszt Academy of Music, Budapest. Her essays in psychology and philosophy appeared in the newspapers of Budapest. She went to Paris with her husband and was impressed by the philosophy of Henri Bergson. Under the influence of the famous dancer Isadora Duncan, she became interested in the art of dancing and formed her own system of eurythmics she named *Orchestrics* (*Orkesztrika*). In Budapest, she opened the Orchestric School in 1915. In 1919, she emigrated to Austria and taught in Vienna. After a while, she moved to Paris, and became a co-worker of Duncan. In 1923, she returned to Hungary and managed her school until 1944. Some of her dancing dramas were performed on stage. She was the sole translator of Bergson's works. She was elected member of the St. Thomas Aquinas Philosophical Society (1927). The Hungarian Television made a documentary film about her (1977). Her works include *On Psychology of Musical Work and its Impact* (*A zenei alkotás és hatás lélektanáról*) (1906); *Basic Thoughts of Bergson's Philosophy* (*Bergson filozófiájának alapgondolatai*) (1929), and *The Main Problems of Symbolics* (*A szimbolika fő problémái*) (1974). She translated from the works of *Hume, Descartes, Locke, Berkeley and Teilhard de Chardin*. She received the Baumgarten Prize (1934). A German School in Szekszárd bears her name. – B: 0883, 0878, 1257, T: 7103.

**Diesel Engine Railway Traction** – The first Diesel engines ready for service were made in 1897, bringing about international successes; but, because of their bulkiness and great weight, they were employed only in factories and electric power stations. Only later on were they built into ships. György (George) Jendrassik constructed a lightweight, fast running engine of which the first few pieces were made with single and double cylinders; the four- and six-cylinder four-stroke versions were developed later without compression and with mixing chamber. The first six-cylinder Jendrassik motor was installed into a rail-coach in 1928. Somewhat later, they were used in those motorized trains, which enjoyed great popularity worldwide. The Ganz Works, Budapest exported a whole series of these Diesel trains to Argentina, the Balkan countries, Egypt, India, Poland, Spain, the Soviet Union and Uruguay. The whole set of carriages is heated by the secondary heating water of the engine. Those sets delivered to the Soviet Union ran trouble-free for more than 40 years, despite the exceptionally adverse track conditions and unusually rough operational circumstances. With the use of the Jendrassik motors the Hungarian railway industry earned great merits on a world scale in the modernization of railway services. – B: 1226, 1020, T: 7456.→**Jendrassik, György**.

**Diesel Feeding Pump** – Diesel engines of high speed working with a new system involving a feeding pump. It was invented by the engineer Artur Kravits. Its novel aspect is the special shape of the camshaft and regulation by choke. This solution quickly spread all over the world and was in use for twenty-five years. – B: 1226, T: 7456.

**Di Francesco, Amedeo** (Naples, 1952 ? - ) – Italian linguist. He is the incumbent of the

Chair of Hungarian Studies of the Eastern European University Institute in Naples, director of the Italian Inter-University Centre for Hungarian Studies. He has been professor of the Institute of Oriental Studies at the University of Naples since 1978, as head of department of the Department of Hungarian Language and Culture. His main field of research is Hungarian Renaissance literature, especially the poetry of Bálint Balassi, but he has published pioneering studies on the works of Miklós Oláh, János Rimay, Miklós Zrínyi and the epic poets, too. He devotes special attention to the study of Italian-Hungarian relations, and many of his publications analyze modern Hungarian literary phenomena. Professor di Francesco has been a member of the International Association of Hungarian Philology since it was founded, and served as president of the Association between 1996 and 2006. He greatly contributed to the organization of the Hungarology World Congress in 1996 in Rome, and in 2006 in Debrecen. His works include *L'eredità classica in Italia e Ungheria fra trado Medioevo e primo Rinascimento (The classical heritage in Italy and Hungary traded between the Middle Ages and early Renaissance)* (2001), *Ungheria letteraria: un viago nella intertestualite danubiana (Hungarian literary intertextuality: a trip on the Danube)* (2004), and *Mitografia letteraria ungherese (Hungarian literary mythography)* (2008). He is editing the volumes on 19th-20th century Hungarian poetry in series published by Parnaso Publishers. – B: 7617, T: 7617.→**Oláh, Miklós; Rimay, János; Zrínyi, Count Miklós (2).**

**Dinnyés, József** (Joseph) (Szeged, 4 August 1948 - ) – Composer, singer-guitarist. He started his singing career in 1963. In 1966, he founded the short-lived *Angels (Angyalok)* orchestra in Szeged. Since 1966, he is an itinerant musician, visiting Hungarian communities, performing songs to lyrics by well- or lesser-known poets, as well as his own works, including psalms of the Reformed Church. He is also a recording artist. His works include *Without Limits (Határtalanul)* (1985); *Pain and Defiance (Kín és dac)* (1991); *This Was not Blown Away by the Wind (Ezt nem fújta el a szél)* (1992), and *With Unbroken Faith (Töretlen hittel)* (2000). His output is more than 16 CDs and 14 tapes with folk-ballads, psalms, and songs. He also published his *Book of My Songs (Dalaim könyve)* in 1988. He was made the Cavalier of Hungarian Culture (*A Magyar kultúra lovagja*) in 2001. – B: 0874, 1031, T: 7103.

**Dinnyés, Lajos** (Louis) (Alsódabas, 16 April 1901 - Budapest, 3 May 1961) – Politician. He studied at the Agricultural College, Keszthely, where he obtained a diploma in 1927. Then he went on a study trip. From 1930, he was a member of the Independent Smallholder's Party, and was a Member of Parliament from 1931 to 1939. He was against the ultra-right policies, the political approach to Germany, and the anti-Semitic laws. During World War II, he did not participate in politics but worked in a food company. He was conscripted into the army, went underground after the German occupation of Hungary, on 19 March 1944, and participated in the anti-German resistance movement. After 1945, he resumed his political activities. From 14 March to 4 September 1947, he served as Minister of Defense. When Prime Minister Ferenc (Francis) Nagy was forced into emigration, Dinnyés was nominated by the Communist Party and was appointed Prime Minister on 31 May 1947. He served until 10 December 1948. He was President of the National Council of Planning as well. During his mandate, the banks, major industries and ecclesiastical schools were nationalized; the severe Paris Peace Treaty (10 February 1947), was ratified; the first Five-Year-Plan was accepted, and a treaty of friendship and cooperation was signed with the Soviet Union, Yugoslavia, Bulgaria and Poland. From

1948, he was Director of the National Agricultural Library. In 1954, he became a member of the Peoples Front's Council. In 1958, he was the Vice-President of the Parliament. After 1945 as a politician he served the Communist's political designs. Once he bitterly remarked: "What kind of a country is that where I can be Prime Minister." – B: 0883, 1112, 1314, T: 7103.→**World War II; Nagy, Ferenc; Paris Peace Treaty; Five-Year Plan.**

**Diós, István** (Stephen) (Szombathely, 8 June 1943 - ) – Roman Catholic priest. He completed his high school studies at Pannonhalma in 1961, and studied Theology first at the Seminary of Győr (1961-1964), then at the Central Seminary, Budapest (1964-1967). He was ordained in 1966, earned a doctoral degree in Rome in 1967, and studied at the *Academia Alfonsiana*, specializing in Ethics. In 1969, he returned to teaching at the Seminary of Győr and worked at various ecclesiastical libraries while serving as auxiliary priest. From 1980, he served as Editor-in-Chief for the *Hungarian Catholic Lexicon* volumes (*Magyar Katolikus Lexikon*) (1993). He was director of the national office in the preparation for the visit of Pope John Paul II to Hungary in 1991. He edited the *Directory of the Hungarian Catholic Church (A Magyar Katolikus Egyház címtára)*. He was an official translator of papal documents (encyclical letters, bulls, instructions, etc.) and other theological works into Hungarian. – B: 0945, T: 7103.→**Roman Catholic Church in Hungary.**

**Diószegi, Sámuel** (Debrecen, 5 January 1761 - Debrecen, 2 August 1813) – Minister of the Reformed Church, botanist. He completed his theological studies at the Reformed College, Debrecen, and was a teacher at Hajdúböszörmény in 1784. After working as an assistant teacher in Kecskemét, he studied Natural Sciences at the University of Göttingen, Germany. He was Parish Minister in Hajdúnánás (1789), Hajdúböszörmény (1793), and in Debrecen (1803). He became Dean in 1809, and later was Chief Notary of the Church District. He popularized Linné's system of classification in the country and developed the medical nomenclature in Hungarian. His works include *The Hungarian Herbal Book (Magyar Fűvészkönyv)* (1807); *Medical Herbal Book (Orvosi Fűvészkönyv)* (1813), and *Alphabet (Ábécé)* (1810). He also wrote some theological books. – B: 0883, 1257, T: 7103.→**Reformed College of Debrecen; Reformed Church in Hungary.**

**Diószegi, Vilmos** (William) (Budapest, 2 May 1923 - Budapest, 22 July 1972) – Ethnographer, orientalist. His higher studies were completed at the University of Budapest (1946). He was an assistant professor at the Inner-Asian Institute (1944-1947); co-worker at the Ethnographic Museum till 1963. From 1963 until his death he was Scientific Chief Contributor to the Ethnographic Research Group of the Hungarian Academy of Sciences. His main field of research was the beliefs of the ancient Hungarians prior to their Carpathian settlement period. He paid great attention to Shamanism. He went on five study trips to Asia. He founded the unique *Shaman-belief Archive* in Budapest. He also researched the folk-belief characteristics of ethnic groups, such as the Palóc, Szeklers in Bukovina, and Hungarians in Moldavia. His studies appeared in Hungarian and foreign periodicals and books. His major works include *Memories of Shamanism in Hungarian Folk Culture (A sámánhit emlékei a magyar népi műveltségben)* (1958); *Shamanism* (1962), and *Beliefs of the Pagan Hungarians (A pogány magyarok hitvilága)* (1967). – B: 0883, 0878, 1257, T: 7103.

**Diploma Leopoldina** – The document issued by Emperor and King Lipót I (Leopold)

(1654-1705) for Transylvania (*Erdély*, now in Romania) in 1690, accepted by the Transylvanian National Assembly on 20 January 1691. In it, the Emperor guaranteed Transylvania certain liberties, especially the rights of the four recognized denominations and their freedom of worship (Roman Catholic, Reformed, Lutheran and Unitarian), as well as, enacted by law, the *Tripartitum* (the Hungarian Codex of Laws) in Transylvania. He assured that the formerly granted rights would be kept, native subjects would be appointed to civil service, and the Governor would reside in Transylvania and would not raise taxes. The diploma appeared to be a genuine document issued by the king, one that would assure Transylvania's independent development. However, history proved it that Transylvania's independence ceased; the affairs of Transylvania were managed by a court chancellery with a head office in Vienna, acting on the authority of the Emperor and completely separate from the affairs of Hungary. – B: 1078, 1244, T: 7668.→**Right to Resist; Bethlen, Count Miklós; Tripartitum.**

**Disciples, Dignity of the** – This Codex under the full title *Booklet Dealing with Dignity of the Saint Disciples* was written in 1521. The 32 letters contain sermon-like scholastically written teachings about the greater heavenly worthiness of the apostles or the saints. The first example of Hungarian hexameter is documented here and also contains the first references to Dante, Plato and Demosthenes. – B: 1150, 1020, T: 7666.→**Codex Literature.**

**Dispersed Hungarians, Number of** – The dispersion of Hungarians began with the Ottoman Turkish occupation of the middle one-third of the country, as early as 1526. It continued after the crushed freedom fights and lost wars, including Count Imre (Emeric) Thököly's uprising (1687); Prince Ferenc (Francis) Rákóczi II's Freedom Fight (1711); Lajos (Louis) Kossuth's War of Independence (1848); after World War I, after World War II, after the 1956 Revolution and Freedom Fight, and after the collapse of the Communist system in 1989. At the turn of the millenium the number of Hungarians was llows: (1) Estimates in the separated territories (separated in 1920 and in 1947) at the turn of the millenia: in the Southern Land (*Délvidék*: now Croatia, Serbia and Slovenia) 380,000; in Transylvania (*Erdély*, now Romania) 2,000,000; in the Northern Hungary (*Felvidék*, now Slovakia) 600,000; in Sub-Carpathia (*Kárpátalja* or Ruthenia, now Ukraine) 183,000; in Western Hungary (Austria) 5,000. In total: 3,168.000. (2) The number of Hungarians in the Western European countries, in the Americas and in the Transoceanic countries are: Argentina 40,000; Australia/New Zealand 50,000; Austria 39,000; Belgium 14,000; Brazil 70,000; Canada 270,000; Denmark 2,000; France 15,000; Germany 50,000; Great Britain 15,000; Holland 10,000; Italy 10,000; Israel 200,000; Norway 5,000; Sweden 20,000; Switzerland 15,000; United States of America 1,540,000; the smaller countries of South America 5,000; other countries in Europe 10,000. In diaspora the total are 2,350,000. (3) Based on the 2001 census and on conservative estimates, in 2003 the number of Hungarians is as follows: in Hungary 10,152,000; in the separated territories 3,168,000; in the diaspora 2,350,000; in total 15,670,000. – B: 7103, 1104, T: 7301.→**Hungarians; Freedom Fights; Trianon Peace Treaty; Paris Peace Treaty; Atrocities against Hungarians.**

**Dispossessed Goods** – They include confiscation, dispossession and expropriation of properties of the occupied country by the military or state personnel of the conquering state, during actual war or warlike military conflict and their forcible removal from its

territory. According to international legal practices the perpetrator is obligated to return the same. The Treaty of Paris of 1947 instructed the search and retrieval of goods taken by the German army from Hungary, during World War II. It similarly obligated Hungary to return valuables, seized by Hungarian army officials or private persons, from the territory of the Soviet Union. However, this Treaty made no mention of the need to return goods seized and looted by the victorious Allies during or after the war from Hungary. Between June and August of 1946, a governmental mission traveled to the USA and the United Kingdom. The US government agreed to the return of Hungarian industrial equipment, transport vehicles, art treasures and other valuables including the gold bullion of the Hungarian National Bank that had been transported to the West. On 6 August 1946, about 32 tons of the Hungarian National Bank's gold arrived in Budapest, followed by the rest of the valuables. However, the bulk of these valuables was not unloaded but was re-directed to the Soviet Union. – B: 1231, 1138, T: 7661. → **Gold Train**.

**Distaff** – A spinning tool used to lay the hemp and linen yarn. Distaffs were usually richly decorated; they were carved rather than painted. Most of these carved distaffs were presented as tokens of love to girls. The distaff is named *talpas* (for its foot) in the region between the Danube and Tisza Rivers, while in the territory east of the Tisza River it is called distaff on foot (*gyalogrokka*). – B: 1078, 1134, T: 3240.

**Divald, Kornél** (Cornel) (Eperjes, now Prešov, Slovakia, 21 May 1872 - Budapest, 23 March 1931) – Art historian, writer. He prepared to be a physician but instead he became an art critic and contributor to the *Hungarian Review* (*Magyar Szemle*); *Hungarian Industrial Art* (*Magyar Iparúvészet*) and other periodicals. Primarily he researched Northern Hungary (Felvidék, now Slovakia) and the medieval remnants of Buda. His first publications have important resource value. His literary works were written under the pen name György (George) Tarczai. His works include *The Architectural Memories of the Renaissance of Northern Hungary* (*A felső-magyarországi renaissance építészet emlékei*) (1900); *Sárospatak Castle* (*A sárospataki vár*) (1902); *Artistic Memories of Hungary* (*Magyarország művészeti emlékei*) (1927, also in English); *Old Hungarian Art* (1931), and *Hungarian Legends* (*Magyar legendák*) (1914). He was corresponding member of the Hungarian Academy of Sciences (1911). – B: 0883, 1257, T: 7103

**“Divide et Impera”** (Latin “divide and rule”) – A governing policy used even by the ancient Romans as one of the successful political methods to turn their enemies and oppressed peoples against each other. The Habsburg Monarchy adopted and used this idea in its multi-national empire to strengthen its power and rule over them. To the occupied Italian territories, they sent Hungarian military. At the same time, they stationed foreign soldiers in Hungary. Beginning with Emperor Lipót II (Leopold, 1790-1792), this principle became a governing tool of the emperors who continually instigated the different nationalities in Hungary to fight against each other, fueled their ambitions to become independent, and they enticed them against each other. They organized the Serbs, escaping from the Turks, to settle in southern Hungary and engaged them in a fight against the Rákóczi Freedom Fight (1703-1711). They even promised them an independent territory. In 1790, to counter the Hungarian Parliament, they organized a separate Serbian Congress in Temesvár (now Timișoara, Romania), where Schmidfeld, an Imperial Commissioner, forced the Serbs by threat to demand separate governing powers and territorial independence. At the 1790-1791 parliamentary session in

Transylvania (*Erdély*, now in Romania), Innocentius Klein, Bishop of Balázsfalva, disclosed the content of the *Supplex libellus Valachorum*, the demands for independence of Wallachians (Romanians) to the Austrian Government Commissioner, who fully agreed with the text of the petition addressed to the Monarch, and promised to support it. This eventually led to Romanian rule over Transylvania (*Erdély*) in 1920. – B: 1138, 1131, T: 7668.→**Daco-Roman Continuity, Theory of; Vlachs.**

**Dobai, István** (Stephen) (Nagyvárad, now Oradea, Romania, 1 May 1924 - ) – Lawyer. He studied Law and Political Economy at the University of Kolozsvár (now Cluj-Napoca, Romania), graduating in 1947. Later, he obtained a Ph.D. in International Law and worked as a demonstrator until the Communist system took full control. Thereafter, he worked as a laborer in the administrative field of various branches of economic life. During the 1956 Revolution and Freedom Fight he was asked by the leaders of the Hungarian minority of Transylvania (*Erdély*, in Romania), to draft a memorandum to submit to the United Nations, to solve the problem of Transylvania, alongside the issue of the Hungarian Revolution, waiting to be treated there. As a result, he was sentenced for treason and to forced labor for life; was captive for seven and a half years. He was freed in 1964, but was never rehabilitated. His friends were also severely punished. After 1990, he worked as the warden of the Reformed Church District of Transylvania. He is a founding member of the *Imitatio Christi Colloquium*. His research fields are: social theory and history of culture, in which he did some significant work. He is also carrying out valuable scientific work in the theory of law, in the field of national minorities and in canon law. A number of his studies were published in Transylvania and other countries, sometimes under a pseudonym. His books include *Gesta Hominum* (1993); *Reflections on History, vols. i, ii (Tünődések a történelemről, I, II)* (2005), and *Transitory Szilágyság*, part of the inner plateau of Transylvania (*Mulandó Szilágyság*) (2007). – B: 0875, 1613, T: 7456.

**Dobay, József** (Joseph) (Erzsébetváros, 16 April 1820 - Pétermező, 22 June 1898) – Military officer in the War of Independence (1848-1849). He took an active part in the siege of Szenttamás, and later in Transylvania (*Erdély*, now in Romania), under General Bem, who promoted him to colonel. He was the commander of all the *Honvéd* (Home Guard) regiments around Kőhalom. While badly outnumbered by the invading Russian forces, he fought with the remnants of the Szekler regiments at Bánffyhunad, on 16-17 August 1849, surrendering only at Zsibó on 24 August. The court martial at Arad sentenced him to death by hanging; but the pressure of European public opinion forced the Emperor to reduce the sentence, first to fourteen, later to seven, then to two years of prison that he spent in the fortress of Olmütz. Released from prison, he settled down at his farm in Pétermező. In 1860 he became a colonel of the *Honvéd* regiment and finally reached the rank of lieutenant general in 1880. – B: 1078, T: 7682.→**Freedom Fight of 1848-1849.**

**Dobay, Péter** (Pécs, 19 November 1948 - ) – Computer scientist, economist. His higher studies were at the Attila József University, Szeged where he studied Mathematics and Physics (1967-1972). He is one of the founders of the Department of Informatics at the University of Szeged, where he is Professor and Department Head. He went to the USA in 1990 and 1997 respectively, on a Soros and a Fulbright scholarship. He is President of the János (John) Neumann Computer Science Society of County Baranya. His field of

research is traffic-informatics, office and business management. His main works include *The Office (Az iroda)* (1997) and *Business Information Management (Vállalati információ-menedzsment)* (1998). He was named Educator of the Year in 1992 and Best Teacher of the Year in 1999. – B: 0874, 1498, T: 7103.

**Doberdo** – Located on the Slovenian-Italian border, it is an area of karstic plateau, the southeasternmost extension of the Alps, adjacent to the village of the same name, north of the Adriatic Sea and east of the River Isonzo. It was the site of twelve bitterly fought battles between Italian and Hungarian armies during World War I that demanded considerable sacrifices on both sides. In the 6th battle the Italians gained some territories; but in the 12th they gave up their previous gains. At the top of Monte St. Michele, they built a monument with an inscription. Its translation says: “*On this peak, Italians and Hungarians, heroically fighting, became brothers in death. July, 1915- August, 1916*”. In the area, there are more than 100 military cemeteries and tens of thousands of soldiers' graves, both in the Slovenian and Italian territories. There is a Doberdo Street in Budapest. – B: 1078, 1020, T: 7668.

**Dobi, István** (Stephen) (Ószöny, 31 December 1898 - Budapest, 24 November 1968) – Politician. His education amounted to six years of elementary school. During the short-lived Hungarian Council (Soviet) Republic (1919), he was a soldier, was captured and sent to internment camp. Upon return to his village, he was placed under police surveillance. From the early 1920s, he was a member of the National Union of Earthwork Laborers. In 1930 he was the founding President of the Szöny branch of the Hungarian Social Democratic Party, from 1943 president of the Earthwork Laborers' branch. In 1936 he became member of the Independent Smallholders' Party. In 1944, he participated in the Resistance Movement and was conscripted into the army, became a prisoner of war, and returned home in the summer of 1945. Prior to 1945, he already had close connections with left wing politicians. He was a Member of Parliament from July 1945 until his death. He was Minister of Agriculture from February to November 1946, and from April to December 1948. From 1 June 1947 he was President of the Independent Smallholders' Party and the Editor-in-Chief of the *Little Newspaper (Kisújság)*. Under his leadership, his party did not resist the complete Communist takeover and consequently it declined. After the removal of the Dinnyés Government he became Prime Minister of Hungary from 10 December 1948 until 14 August 1952. Between 14 August 1952 and 14 April 1967, he was President of the Presidium, i.e. Head of State and later on, until the end of his life, a member of the Presidium. On 7 November 1956, he unlawfully relieved the Imre Nagy Cabinet of its office and appointed the Kádár Government; joined the Hungarian Socialist Workers' Party (*Magyar Szocialista Munkáspárt – MSZMP*) and became a member of the Party and a member of its Central Committee (*Központi Bizottság – KB*). His books are: *The Future of Peasantry is the Cooperative (A parasztság jövője a szövetkezet)* (1955); *Socialist Agriculture – Rich Peasant Life (Szocialista mezőgazdaság - gazdag parasztlelet)* (1958), and *Confession and History, vols. i-ii (Vallomás és történelem, I, II)*, autobiography (1962). – B: 0883, 0879, 1112, T: 7456. → **Dinnyés, Lajos; Nagy, Imre; Kádár, János.**

**Dobó, István** (Stephen) (ca. 1500 - Szered, 1572) – Military officer. He came from an untitled noble family. He became a national hero as the heroic defender of Fort Eger against the Ottoman Turkish army in 1552. From 12 September to 18 October, he

successfully defended Fort Eger with only 2,000 soldiers and some peasants against the siege of the combined Turkish forces of the Grand Vizier Achmet and Pasha Ali of Buda. Dobó repelled the siege and saved the “key to the gate” to Northern Hungary (Upland, *Felvidék*, now Slovakia). His victory was significant for military as well as moral reasons. Emperor Ferdinand I awarded Dobó with the forts of Déva and Szamosújvár (now Deva and Gherla, Romania). In 1553, he became Voivode of Transylvania (*Erdély*, now in Romania). In 1556, when Transylvania became an independent principality, Queen Izabella arrested him but soon he regained his freedom. This time Emperor Ferdinand I gave him many large estates in Northern Hungary as compensation and appointed him Captain of Fort of Léva (now Levice, Slovakia). In 1566, when Sultan Suleiman and his army reached Vienna, he moved his forces to the city’s defense. He was accused of siding with Prince János Zsigmond (John Sigismund), ruler of Transylvania. Emperor Miksa I (Maximilian) arrested Dobó, together with his relative János (John) Balassi in 1569, but he was cleared and freed in 1572, the year of his death. His name was immortalized in the youth novel *Eclipse of the Crescent Moon* (*Egri csillagok*), by renowned novelist Géza Gárdonyi. The statue of Dobó stands on the main square of Eger, a High School and the Castle Museum bear his name, as well as some other schools and streets – B: 0883, 1122, T: 7670.→**Eger; Isabella, Queen; János I, King; Gárdonyi, Géza.**

**Dobos, C. József** (Joseph) (Pest, 18 January 1847 - Budapest, 10 October 1924) – Pastry chef, inventor of the famous Dobos layered cake (*Dobostorta*). According to family traditions, one of his ancestors was the chef of Reigning Prince Ferenc (Francis) Rákóczi II (1676-1735). He opened a delicatessen store in Budapest. There he sold 60 varieties of cheeses and a selection of imported delicacies. One of his inventions was a clock that projected its dialed face on the sidewalk in front of his store. In this store he made and started to sell the layered torte named after him. Among his published literary works are: *The Hungarian-French Cookbook* (*Magyar-francia szakácskönyv*) (1881), now considered a classic, also *Curiosa der Küche* (1909), *Geheimnis für Frauen* (1912). The Dobos cake and a High School bear his name. – B: 0883, 1499, T: 7680.

**Dobos, Károly** (Charles) (Szolnok, 8 December 1902 - Budapest, 16 January 2004) – Minister of the Reformed Church. He completed his high school studies in his hometown Szolnok (1921), studied Theology at the Reformed Theological Academy, Budapest (1921-1923), then continued it at Dayton, Ohio and Pittsburgh, Pennsylvania, USA, and obtained the BDiv and MTheol degrees. In the meantime, he served Hungarian Reformed Congregations in the neighborhood. He was Secretary of the YMCA (*Young Men’s Christian Association*; in Hungary: *Keresztyén Ifjúsági Egyesület – KIE*), Budapest, (1927-1933); Youth-Minister of the Reformed General Convent, Budapest (1933-1938); Minister of the Fásor Reformed Congregation, Budapest, (1938-1952). He rescued persecuted persons and Jews during World War II, among them Péter Veres, the renowned writer and politician. Due to his help to people deported by the Communist authorities from Budapest, he was posted to Szank, a remote congregation. In Móricgát, a diaspora of Szank, he built a church. Finally, he was allowed to be the minister of the Pesthidegkút congregation (1964-1978). As a retired minister, he organized the Hungarian Leprosy Mission (*Magyar Lepramisszió*), with some 200 volunteers. They sent aids and gifts to some 40 leper settlements and hospitals in 12 countries of Africa and Asia. He was the leader of the International Leprosy Mission in Hungary. His

writings from the years of his deportation were published in a book entitled: *On the Bread of Elijah (Illés kenyéré)*, edited by Miklya, L. Mónika (2006). He was awarded the Yad Vashem Prize and received an Honorary Doctorate from the Reformed Theological Academy, Budapest in 1989, and the András Fáy Prize. There was a thanksgiving service on his 100th birthday on 8 December 2002 in Budapest. – B: 0910, T: 7103. → **Christian Youth Association.**

**Dobos, László** (Ladislav) (Királyhelmec, now Kráľovský Chlmec, Slovakia, 28 October 1930 - ) – Hungarian writer, politician in Northern Hungary (*Felvidék*, now Slovakia). He studied at the Teacher Training College, Sárospatak and received a diploma in History and Hungarian Literature. He was Founder and Editor of the *Literary Review (Irodalmi Szemle)* in Pozsony (now Bratislava, Slovakia) (1968-1973); Director of the *Madách Publisher (Madách Könyvkiadó)* (1958-1967); President of the Czechoslovak-Hungarian Society (1968-1971); Minister without Portfolio of the Slovak Government (1960-1970); M.P. of the Co-existence Party (*Együttélés Párt*) from 1990; a member of Presidium of the World Federation of Hungarians (1992-2000). His main field of interest focuses on the difficult life of the Hungarian ethnic minority in the former Czechoslovakia. His major literary works include *The Stars were Far Away (Messze voltak a csillagok)* (1963); *Drifters (Földönfutók)* (1967, 1989); *Snow Blanket (Hólepedő)* (1979); *In the Current (Sodrásban)* (1984); *With Your Permission, (Engedelmével)*, stories (1994); *Our Truths (Igazságaink)* (2000), and *Creative Struggle (Teremtő küzdelem)* (2000). He received a number of prizes and awards, including the Star Order of Merit with Golden Wreath of the Republic of Hungary (1990), Gábor Bethlen Prize (1991), the Kossuth Prize (1994), the Pribina Cross (2003), and the Pro Probate Prize (2010). – B: 0874, 0878, 0879, 0877, 1257, 1551, T: 7103.

**Dobozy, Imre** (Emeric) (Vál, 30 October 1917 - Budapest, 23 September 1982) – Writer. Between 1936 and 1942, he worked as a clerk and was conscripted into the army during World War II. Later on, he was a partizan. After the War he became a Communist Party Secretary. From 1947 to 1959, he was a journalist at the dailies: *Free Land (Szabad Föld)*, the *Free Nation (Szabad Nép)* and the *Peoples' Liberty (Népszabadság)*. From 1961 to 1963, he was Editor-in-Chief of the literary review, *Life and Literature (Élet és Irodalom)*. Between 1959 and 1973, he worked at the Writers' Association as Secretary, then General Secretary, and finally as President. He published novels, stories and plays. His main works include *Two World Wars (Két világháború)* study (1947); *Túrkeve*, sociology (1951); *The Weapons Spoke (A fegyverek beszéltek)* novel (1955); *Yesterday (Tegnap)* filmscript (1959); *A Day in Paradise (Egy nap a paradicsomban)* TV film (1967), and *The Spring Has Arrived (Eljött a tavasz)* drama (1968). He received, among others, the Attila József Prize (1952, 1954) and the Kossuth Prize (1959). – B: 0883, 0878, 1257, T: 7103.

**Dobra Clan** – Well-known members of this ancient family were elevated to nobility in 1256 from serfdom, by the support and consent of King Mátyás I (Matthias Corvinus) in 1475. Presumably the Ipp, Érkeserű and Fráter de Bélmező families descended from this clan. – B: 0942, T: 7685.

**Döbrente Codex** – A valuable Hungarian literary record from 1508, containing psalms, the Song of Songs, the Book of Job, some evangelical pieces and epistles. It has 262 letters, copied by Gergely (Gregory) Halábori Dobos, a diocesan monk of Eger. Earlier, it

was kept in the library of the Bishop of Gyulafehérvár (now Alba Iulia, Romania), later it was transferred to the Library of the Hungarian Academy of Sciences. – B: 0942, 1150, T: 3240.→**Székelyudvarhely Codex; Codex Literature.**

**Döbrentei, Gábor** (*hőgyészi*) (Gabriel) (Somlósztölcs, 1 December 1785 - Buda, 29 March 1851) – Poet, literary translator. He studied at Pápa, Sopron and abroad. He was a member and clerk of the *Society of Hungarian Students (Magyar Diákok Társasága)*, (1808-1805). His first poems were published by the Society. He studied at various universities abroad, during which time he learned French, Italian and English. In 1806 he was a private tutor in Transylvania (*Erdély*, now in Romania), and became acquainted with some of the literary leaders of Transylvania. Between 1813 and 1818, he founded and edited the literary journal *Transylvanian Museum (Erdélyi Múzeum)*. In Marosvásárhely (now Targu Mures, Romania) he read Law and became a judge in the County of Hunyad. In 1820, he moved to Pest, where he became acquainted with Count István (Stephen) Széchenyi, and helped to organize the Hungarian Society of Scientists. His works include *Pali and Minka Learn to Read (Pali és Minka olvasni tanul)* (1829); *Masterpieces of Shakespeare (Shakespeare remekei)* translations (1830), and *Hussar Songs (Huszárdalok)* (1847). He was one of the founders of juvenile literature in Hungary. – B: 0883, 0932, 1257, T: 7103.→**Széchenyi, Count István.**

**Döbrentei, Kornél** (Cornel) (Pestszentimre, 3 November 1946 - ) – Writer, poet, journalist. After completing his high school studies, he became an unskilled worker, later a storekeeper. He was a sailor from 1966, and a journalist from 1971. In 1991, he became a literary columnist and editor for the periodical, *Credit (Hitel)*. His lyrics are emotional, and he follows Ferenc (Francis) Juhász and László (Ladislav) Nagy. His works include *In the Sign of Scorpio (A skorpió jegyében)* poems (1972); *Leap Year (Szökőév)* poems (1979); *Lakitelek* (1966), and *Bird Palace (Madárpalota)* (1999). He was awarded the Attila József Prize (1991), the Kölcsey Prize (1994), the Officer Cross of Merit of the Republic of Hungary (1994) and the Balassi Memorial Sword (1998). – B: 0878, 1257, T: 7103.→**Juhász, Ferenc; Nagy, László.**

**Döbrössy, Lajos** (Louis) (Komárom, 29 August 1906 - Miskolc, 5 January 1992) – Minister of the Reformed Church, missionary. He attended high school in his hometown and Győr. He studied Theology at the Reformed Theological Academy, Pápa (1924-1928), then in Vienna, Tübingen and Bethel. He was the National Secretary of the *Pro Christo Student Association*, Budapest (1929-1930); later he worked as a hospital chaplain, Budapest, (1930-1938). He was a missionary among the Turks and Muslims at Sumen, Bulgaria in 1938. He had to leave, due to the outbreak of World War II. He was an assistant minister in Budapest (1939-1940), Parish minister in Szombathely (1940-1955), then in Tata (1955-1975). He wrote some 80 articles in church papers, mainly on foreign missions. His *Job Commentary* is outstanding (1981). – B: 0910, T: 7103.

**Dobsina Coalition** – *Carolina Resolutio* (1731) of King Károly III (Charles) regulated the number of Lutheran Church superintendents empowered to exercise their mandate. Superintendent György (George) Ambrózy and his followers endeavored to incorporate the free royal towns in Northern Hungary (*Felvidék*, now in Slovakia) into the Lutheran District of Tisza. After a long struggle, an agreement was reached on 11 January 1743 at Dobsina, which, under the title *Coalition*, was signed during the first days of May. Later the deaneries of Kishont and Szepes were added. After electing Károly (Charles) Máday

Superintendent on 23 July 1863, at the meeting at Gölnicbánya (now Gelnica, Slovakia) the Coalition was dissolved. – B: 1078, 1020, T: 7682. → **Carolina Resolutio.**

**Dobsina Ice Caves** – One of the most beautiful natural formations in Northern Hungary (Upland, *Felvidék*, now Slovakia), at 463 m, near the northwestern outskirts of the town of Dobsina (Dobšiná) in the valley of the Stratena Range, on the northern side of Mount Ducsá. It is near the western edge of the Gömör-Szepes Ore Mountain (Spišskó-Gemerske Rudohorie), the innermost component of the Western Carpathians. It was discovered on 15 July 1870, when Jenő (Eugene) Ruffini mining engineer, Nándor (Ferdinand) Fehér, medical doctor, Gusztáv (Gus) Lang, army lieutenant, and Endre (Andrew) Méga, city councilor, entered what was called from the very earliest times ‘the ice hole’. The exploration was fast and professional and the world-famous ice caverns were discovered. In 1871, an ice festival was held in the great hall, and in 1886, electricity was installed. The cavern soon became famous; and since their discovery, many well-known specialists visited it. The names of the discoverers are displayed at the entrance on a plaque. In terms of size and beauty, the ice caverns of Dobsina occupy first place among the known ice caves in the world. In their interior, there are pit-like chambers and corridors containing huge amounts of permanent ice masses, frozen onto each other. These ice formations display several remarkably beautiful shapes, in a variety of color combinations. The great hall is 120 m long, 25-60 m wide and 12 m high. The extent of the caverns is almost 9,000 square meters of that 7,000 are covered with ice. The caverns originated about 5,000 to 7,500 years ago, by an interior collapse of rocks and the cold interior air did not allow the warmer air to flow in from the outside. The ice layers are 30-40 meters thick and weigh more than 1,000 million kilograms. The caverns favor the formation of ice, because their temperature falls to  $-8^{\circ}$  C in winter and reaches only  $+5^{\circ}$  C in summer. The water of the melting ice in the summer has an outlet through a deep-lying, narrow opening at the foot of Mount Duncsa. – B: 1068, 1078, 7456, T: 7680, 7456.

**Doctrine of the Holy Crown** → **Crown, Doctrine of the Holy.**

**Dóczy, József** (Joseph) (Miskolc, 11 May 1863 - Budapest, January 1913) – Songwriter. He studied Law in Debrecen and Budapest, was a self-taught musician who served as a secretary treasurer at Debrecen, Temesvár (now Timosoara, Romania), and Nagykaroly (now Carei, Romania). His many song compositions, such as *The Whooping Crane Flies Away* (*Darumadár útnak indul*); *There is Not One Pretty Girl in the Village* (*A faluban nincsen szép lány*); *The Rose Bush is Filled with Blooms* (*Tele van a csipkebokor virággal*), and *My Little Cottage with Thatched Roof* (*Nádfedeles kis házikóm*), some are still sung. – B: 0883, 1160, T: 7684.

**Dohnányi, Ernő** (Ernst von Dohnányi) (Pozsony, now Bratislava, Slovakia, 27 July 1877 - New York, NY, USA, 9 February 1960) – Piano virtuoso, composer, conductor and music educator. He studied at the Music Academy of Budapest. Early in his life he was noted as a composer, although he started his career as a piano performer in 1899. From 1905, he was a piano instructor at the Music Academy of Berlin, where he focused mainly on German classics – especially Brahms. Between 1916 and 1919, he was a professor of piano at the Ferenc (Franz) Liszt Academy of Music, Budapest, becoming its Director in 1919. Between 1919 and 1944, he was conductor of the Budapest Philharmonic Orchestra and conducted the orchestra on several European tours. From

1925 to 1927 he traveled to the USA, and performed as a pianist, educator, composer and conductor. In the 1940s and 1950s, he was mainly composing and conducting. After World War II, he moved to Vienna, then to Argentina in 1948, where he became President of the Academy of Music at Tucuman. In 1949, he settled in Florida and managed the Music Department of the University of Florida. His elegant compositional style and refined musical taste made him the leading post-Romantic composer, known Europe-wide. The peak of his piano recitals was pieces of Schubert, Schuman, and especially Brahms, his model, and even Bartók and Kodály. In addition, he also played Beethoven's 32 piano sonatas and the five piano concertos in a series of ten concerts. At the turn of the century, he emerged from the romantic generation

of artists as a composer. However, he followed the romantic inspirational approach in music and was not much influenced by the heritage of Hungarian folk music. He divided his career between composing, conducting, teaching and piano playing. His compositions include *Piano Concerto in E minor, Op.5*; *Passacaglia*; three *String Quartets*; three *Symphonies*; *Symphonic Minutes* (Op. 36)(1933); *Ruralia Hungarica* Op. 32 (1924); *Suite for Piano*, and later an *Orchestral Suite*; *Serenade for String Trio Op.10*; also operas: *Tante Simone (Simone néni)* (1912); *Voivode's Tower (A vajda tornya)* (1922); *The Tenor (A tenor)* (1929); *Sacred Torch (Szent fáklya)* pantomime (1934), and operettas such as *Der Schleier der Pierrette (The Veil of Pierette, Pieretta fátyola)* (1910); *Variations on a Nursery Song, Op.25*, for piano and orchestra; *Rhapsodies, Op. 11, No. 3 in C*, and *Grand Mass of Szeged (Szegedi nagymise)* (1930). – B: 0883, 1178, 1445, T: 7684. → **Bartók, Béla; Kodály Zoltán; Lajtha, László; Dohnányi, Kristóf; Cziffra, György; Nyíregyházi, Ervin.**

**Dohnányi, Kristóf** (Christoph von) (Berlin, 28 September 1929 - ) – Conductor. He began his studies of the piano at the age of 5. Though he studied Law in Munich, he decided after the War to devote himself entirely to music. His most important teacher was his grandfather, the composer Ernst von Dohnányi. He studied under him at the Florida State University. His career began when Sir George Solti called him to the Frankfurt Opera in 1953, where he finally became orchestral conductor. From 1978 to 1984, he served as Principal Conductor and General Manager of the Hamburg State Opera. He was a regular guest at the Salzburg Festival, and he led the Vienna Philharmonic in several new productions. He conducted such orchestras as the Berlin Philharmonic, Concertgebouw Amsterdam, New York Philharmonic and Israel Philharmonic Orchestras. He appeared in major international opera houses such as the Metropolitan Opera, New York, Royal Opera House, Covent Garden, La Scala, Milan and the Vienna State Opera. In 1984, he was appointed Music Director of the Cleveland Symphony Orchestra, and soon he and the Cleveland Orchestra became one of the great musical teams in the late 20th century and turned into the most recorded orchestra in the USA. Cleveland University gave him an honorary Doctorate of Humane Letters. His father, Dr. Hans von Dohnányi (1 January 1902 - 8 April 1945), played a leading role in the German resistance during World War II; he also played a major role in the planning of the September 1938 and October 1939 coup attempts and later the Gestapo hanged him. –

B: 1081, T: 7456.→**Dohnányi, Ernő; Solti, Sir George.**

**Domanovszky, Endre** (Andrew) (Budapest, 23 January 1907 - Budapest, 15 May 1974) – Painter. He was student of Oszkár (Oscar) Glatz at the Academy of Fine Arts, Budapest (1926-1932). He had a successful debut in 1929. He built his art on the heritage of the Italian Renaissance. The impressions of his Far East journey also influenced his art. He also painted still life. After World War II, he excelled with his murals. He was appointed Professor of the Academy of Applied Art, Budapest in 1945. He made some tapestries and mosaics as well. His works include *Daughter of Jairus (Jairus leánya): Furnacemen (Olvasztárok)*; *Lady in Yellow Dress (Sárgaruhás nő)*, *Nude (Akt)*; *Fruit-picking (Gyümölcszedés)* mosaic, and *Horses (Lovak)*, tapestry. He exhibited at the Venice Biennale (1958) and in Budapest (1959, 1971). He is regarded as a representative of the “Socialist Realism” trend that dominated the world of art in Eastern European countries, including Hungary, between 1948 and 1989. In a Communist country, painters were expected to depict the harmonious life of workers and peasants. His murals and frescos represented this new direction of art. He was recipient of the Munkácsy Prize (1952), the Kossuth Prize (1953, 1956), the title of Meritorious Artist (1960), and the title of Ourstanding Artist (1963). – B: 0872, 1105, T: 7103.→**Glatz, Oszkár.**

**Dominican Codex** – A manuscript about the life-story of Saint Dominic, written in 1517, known as the *Legend of Dominic*. It contains an important source of ancient Hungarian use of words, as well as other significant contributions. It mentions the name of Blessed Pál (Paul) Magyar, who settled the Dominicans in Hungary, and also refers to a miracle that happened in Székesfehérvár. A nun, Lea Ráskai, made a copy of the original manuscript. The whereabouts of some of the pages is still unknown. The 108 extant leaves are held in the Széchényi National Library in Budapest. – B: 1150, T: 3240.→**Codex Literature; Ráskai, Lea; Magyar, Pál, Blessed O.P.**

**Dominican Order** (Hungarian: *Domonkosok*; Latin: *Ordo Fratrum Praedicatorum, OP, Ordo Sancti Dominici, OSD*) – It was founded exclusively for preaching and teaching in a mendicant order of friars of apostolic work. Their founder, St Dominic (1170-1221) was drawn materially to simplicity and poverty, and spiritually to learning and knowledge. Evangelizing in poverty, walking on foot, he started by converting among the heretic Albigenses of Provençal in France, sent there by Pope Innocent III. He remained among them from 1205 to 1215, and in 1215 he was given premises in Toulouse. In 1218, Pope Honorius III gave permission to Dominic to transform his “holy preaching” mission into an Order, and this became the Dominican Order, also known as Black Friars, Preacher Friars, or Jacobins. Their rules were drawn up in 1220-1221. Their habit was black and white. Their convents were established all over Western Europe in the course of the 13th century. Their first house in Oxford, England was also established in the 13th century.

In 1221, *Paulus Hungarus* was sent from Bologna to evangelize in Eastern Europe. This became their Hungarian province with convents in a number of towns by 1241, among them in Pest, Győr, Esztergom, Patak (now Sárospatak), Pécs, Beszterce, Szeben, and Zágráb. There was also evangelizing among the Cumanians (*Kunok*). By 1277, there were 30 convents in Hungary, organized in 5 administrative districts: Pannonia, Slavonia, the area north of the Danube in present-time Slovakia, Transylvania and Dalmatia. In the 14th century, new convents were founded in Komárom, Szeged, Gara, Kolozsvár,

Temesvár, Szászsebes and Brassó (now Cluj-Napoca, Timisoara, Sebeş, Braşov respectively, in Romania). During the Ottoman Turkish occupation (1526-1690), and the Reformation period of the 16th century, the Dominican monasteries perished completely. The Order started to revive in the 18th century: in 1704 there were 20 convents in the Hungarian-Austrian province, and despite Joseph II's (1781-1790) abolition decree, four convents survived in Kassa (now Košice, Slovakia), Sopron, Szombathely and Vasvár. The Provincial's seat became Budapest early in the 20th century, and the independent Hungarian province was established in 1938, with five convents by 1950: Vasvár, Sopron, Szombathely, Kassa (now Kosice, Slovakia) and Budapest, with 85 members. In 1990, there were 6,749 member friars in 666 convents. In Hungary there were also the *Dominican Tertiaries* (Latin: *Tertius Ordo S. Dominici –TOSD; Ordo Sancti Dominici – OSD*). In 1940, they had, beside their cloisters, 1520 members. – B: 0945, 1871, 1926, T: 7456. → **Paulus Hungarus, Saint; Religious Orders, Roman Catholic; Pázmány Péter Catholic University; Catholic Church in Hungary.**

**Domján, Edit** (Budapest, 25 December 1932 - Budapest, 26 December 1972) – Actress. She completed her higher studies at the Academy of Dramatic Art (1954). She joined the National Theater (*Nemzeti Színház*) in Szeged, in 1954. From 1960, she worked at the Petőfi Theater (*Petőfi Színház*), Budapest. From 1963, she worked with the National Theater (*Nemzeti Színház*), Budapest, and from 1964 until her death, she was member of the Madách Theater (*Madách Színház*), Budapest. Her humor and lyrical personality made her excellent in both comedies and dramas. Her major roles include Anja in Chechov's *Cherry Garden* (*Cseresznyés kert*) (1956); Puck and Titania in Shakespeare's *A Midsummer-Night's Dream* (*Szentiványéji álom*) (1960, 1966); Natasha in Gorky's *Night Asylum* (*Éjjeli menedékhely*) (1968); Tóth Hermin in Szomory's *Hermelin* (1969), and Celiméne in Molière's *The Misanthrope*. From 1954 to 1972 she had more than 80 stage roles. Some of her feature film roles were: *New Gilgamesh* (*Új Gilgames*) (1963); *Man is Quite Different* (*Az ember egészen más*) (1966); *Professor of the Underworld* (*Az alvilág pofesszora*) (1969), and *Rascals* (*Imposztorok*) (1969). She had some 10 TV film roles, including *The Glass Slipper* (*Az üvegcipő*) (1963); *The Last Judgement* (*Az utolsó ítélet*) (1970), and *The Ball* (*A labda*) (1970), as well as countless Radio and TV roles. She received the Mari Jászai Prize in 1965. She committed suicide. A foundation and a street in Budapest bear her name. – B: 0883, 1105, 1445, T: 7103.

**Domján, János** (John) (Miskolc, 11 October 1905 - Dunavarsány, 13 November 1983) – Minister of the Reformed Church, theologian. He completed his high school studies in Miskolc. Between 1924 and 1928, he studied Theology at the Reformed Theological Academy of Budapest. He did his postgraduate studies in Berlin (1926-1927), in Edinburgh (1928-1929) and in Paris (1934-1935). In 1932, he obtained a Ph.D. from the Faculty of Arts of the University of Budapest. From 1929, he worked as an assistant minister in several parishes in Budapest. In 1933, as Honorary Lecturer of Theology, he taught at the Reformed Theological Academy of Pápa. From 1938 on, he was Parish Minister in the Outer Józsefváros suburb of Budapest. For a few years, he also did deputizing pastoral service at Caracas, Venezuela. On 1 July 1983, he went into retirement. He participated in a number of international social conferences. He published numerous studies, articles, church-sociological papers, and composed some church songs as well. His works include *The Cultic Laws of Deuteronomium* (*A deuteronomium kultuszi törvényei*) (1932); *The Hungarian Reformed Elder* (*A magyar református*

*presbiter*) (1941), and *On God's Plough-land (Isten szántóföldjén)* (1949). – B: 0883, 0910, T: 7456.

**Domján, József** (Joseph) (Budapest, 1907 - Tuxedo Park, USA, 1992) – Master of colored woodcuts. He was born into a poor family and had to work in a machine foundry at the age of 14. After the World War I depression, he wandered in western countries: Austria, Italy, France, Germany, and covered on foot some 10,000 miles. After returning home, he lived like a hermit in the Bakony Forest, creating pastels. In 1935 he studied on a scholarship at the Academy of Fine Arts, Budapest, and soon became one of its professors. He obtained worldwide fame with his color woodcuts. He was outstanding in using color in woodcutting, at times 21 shades of them. In 1956, after the crushed Revolution and Freedom Fight, he emigrated to the United States. In 1957, he built a studio in Tuxedo Park, New York. Hungarian native folk art inspired his style. He had more than 500 one-man exhibitions around the world. He illustrated 40 books and designed many tapestries. Some 175 museums and private collections own his works, among them the Metropolitan Museum of Art, New York. The Museum in Sárospatak, Hungary, bears his name. China awarded him the honored title: Master of the Colored Woodcut. – B: 0872, 1160, T: 7103, 7687.

**Domokos, Géza** (Brassó, now Braşov, Transylvania, in Romania, 18 May 1928 - Marosvásárhely, now Targu Mures, Romania, 26 June, 2007) – Writer, literary translator, politician in Transylvania (*Erdély*, now in Romania). He received his higher education in Philology at the University of Kolozsvár (now Cluj-Napoca, Romania), and at the Maxim Gorkij Literary Academy, Bucharest. He graduated in 1954. He worked as a journalist-reporter for the newspaper *Forward (Előre)*, then as Editor-in-Chief of the *Pioneer (Pionír)* youth newspaper (1954-1961). He was Editor-in-Chief, then Deputy Manager of the Literary Publishers (1961-1965), and Deputy Member of the Central Committee of the Romanian Communist Party (1969-1984). He was one of the founders of the Hungarian Democratic Alliance in Romania (*Romániai Magyar Demokrata Szövetség – RMDSZ*), its first President and MP. Some of his works are: *The Most Beautiful Message (A legszebb üzenet)* (1953); *The Fourth Memory. Notes on Békás (A negyedik emlékezés. Feljegyzések Békásról)* (1962), and *Chance, vols.i-iii (Esély, I-III)* (1996-1998). Some of his film scripts were made into feature films, such as: *Ways (Útak)* (1972) and *Without any Pressure (Minden kényszer nélkül)* (1974). He also specialized in literary translation from Russian. Among others, he received the Standard Prize of the European Publishers (1976), the Script Prize of the Romanian Film Association (1973) and the Pro Minority Prize (1997). – B: 1036, 0878, T: 7103.

**Domokos, Mátyás** (Matthias) (Gyula, 18 April 1928 - Budapest, 16 June 2006) – Writer, critic. His higher studies were at the University of Szeged (1946-1948) and the University of Budapest (1948-1950), where he studied Hungarian and German Literature, and Philosophy. In 1949 he was a member of the Eötvös College, University of Budapest, but was dismissed in connection with the Rajk mock trial. From 1951 to 1953, he was a librarian at the Museum of Natural Sciences, Budapest. Between 1953 and 1990 he was an Editor, then for a year Editor-in-Chief for the *Belletristic Publishers (Szépirodalmi Könyvkiadó)*. Since 1991 he has been an editor for the *Century's End (Századvég)*, and the *Osiris Publishers*. He was a presidium member of the Writers' Alliance (*Írószövetség*) (1981-1986). In 1992, he was one of the founding members of the *Széchenyi Literature*

and Art Academy (Széchenyi Irodalmi és Művészeti Akadémia), where he filled various leading positions. His essays of criticism appeared in literary reviews, such as the *New Moon (Újhold)*, *Contemporary (Kortárs)* and *Life and Literature (Élet és Irodalom)*. His works include *Of Poems with Poets (Versekről költőkkel)*, essays (with L. Lator, 1982); *I Told my Own (Mondtam a magamét)* (1993), and *Debenture, Essays, Studies on Gyula Illyés (Adósságlevél, esszék, tanulmányok Illyés Gyuláról)* (1998). He wrote the *In Memoriam* series on eminent writers and poets, such as Ágnes Nemes Nagy, Iván Mándy, Frigyes (Frederick) Karinthy, Lőrinc (Lawrence) Szabó, etc. He wrote a series entitled *Writer's Fate (Írórsorsok)*, including László (Ladislav) Németh, Sándor (Alexander) Weöres. He made portrait-films of Gyula Illyés, Sándor Weöres, Ferenc Karinthy and Sándor Márai. He was recipient of a number of prizes, among them the Attila József Prize (1980), the Széchenyi Prize (1994) and the Hungarian Heritage Prize (2001). – B: 0874, 0878, 1257, T: 7103. → **Nemes Nagy, Ágnes; Mándy, Iván; Karinthy, Frigyes; Szabó, Lőrinc; Németh, László; Weöres, Sándor; Illyés, Gyula; Márai, Sándor.**

**Domokos, Pál Péter** (Csíkvárdotfalva [part of Csíksomlyó, now Sumuleu, Romania] 28 June 1901 - Budapest, 18 February 1992) – Ethnographer, folk music researcher, music historian. He studied at the Catholic Teachers College at Csíksomlyó (now Sumuleu-Ciuc, Transylvania, in Romania) and obtained a teacher and church organist diploma. In the meantime Transylvania (*Erdély*) was ceded to Romania by the Versailles-Trianon Dictated Peace Treaty in 1920. As a beginner folk teacher he received a teaching position in Csíkkarcfalva (now Cârța, Romania). He studied at the Secondary Teachers College at Budapest and earned a diploma in Mathematics, Physics, Chemistry and Music in 1926. From 1933, he was a teacher and church-organist in Gyergyóújfalu (now Suseni, Romania). From 1936, he was the General Secretary of the *Transylvanian Catholic People Alliance (Erdélyi Katolikus Népszövetség)*. He worked as Principal at the State Teachers Training College, Kolozsvár (now Cluj-Napoca, Romania). In late 1944, he and his family were forced to leave Transylvania. From 1945, he worked at the *People's Welfare Ministry (Népjóléti Minisztérium)*, Budapest. For a while, he was unemployed, and from 1951 he worked as a high school teacher. He obtained a Ph.D. in Ethnography in 1988, Budapest. He retired in 1961. His major achievements were the reviving of the ancient Szekler folk costumes in Szeklerland (*Erdély*, now in Romania), organizing exhibitions of folk art and founded the Szekler Museum at Csíkszereda (now Miercurea Ciuc, Romania). Later he became acquainted with the most deprived folk group, the *Csángós*. In 1929, disguised as a pot-seller, he walked around in the Hungarian populated areas of Moldavia and prepared a map of the Csángó-Magyar (Hungarian) settlements. His book on the life of Hungarians in Moldavia is one of the first works of modern Hungarology. He wrote books on literary history, ethnography and folk music. His writings include *Hungarians in Moldavia (A moldvai magyarság)* (1931, five editions); *Csángó Folk Music, vols. i,ii (Csángó népzene, I,II)* (with B. Rajetzky, 1956-1961); *Steadfastly, Aaron Márton, Bishop of Transylvania (Erdély) (Rendületlenül, Márton Áron, Erdély püspöke)* (1989), and *Farewell to Youth (Búcsú az ifjúságtól)*, poems, letters (1992). He was a renowned researcher of the Csángós. He was awarded the Gábor Bethlen Prize (1991) and the Széchenyi Prize (1991). A female choir and a foundation bear his name in Transylvania. – B: 0878, 1031, 1257, T: 7669. → **Szeklers; Csángó.**

**Domokos, Sándor** (Alexander) (Szabadka, now Subotica in Serbia Montenegro, 14 July 1921 - ) – Writer, sculptor. After he had completed his studies at the Royal Ludovika

Military Academy, Budapest, he enlisted as a Royal Hungarian Gendarme officer in 1942. While on front service during the fall of 1944, he was captured by the Soviet army at the siege of Budapest. He returned home from captivity in 1951, and was placed under police surveillance. He worked as a mason; and after the Revolution and Freedom Fight of 1956, he emigrated to Canada, settled in Winnipeg, and worked at the University of Manitoba. He wrote several novels, and books of short stories, poems and plays, including five books in Hungarian and in English: *Masquerade*, *The Price of Freedom* (*A szabadság ára*); *The Centurion* (*A római százados*), and *Prometheus*. Many of his writings have appeared in journals, weeklies and collections. He wrote and published novels, plays and studies in two languages. As a sculptor he worked in stone, marble and bronze, and his statues can be seen in public places and buildings in Canada. Some of his sculptures are: *Freedom*, *Madonna*, *Greek*, and *St. Jude*. He received several awards for literature and amateur film production, including the Árpád medals (1965, 1966, 1990). – B: 0892, 1516, T: 4342, 7103. → **Ludovika Royal Hungarian Military Academy; Canadian Hungarian Literature.**

**Domonkos** – Painter from Transylvania. He lived in the first part of the 16th century in Brassó (now Braşov, Romania). In 1512 he painted the frescoes in the chapel of Töröcsvár. He was a member of the Painters and Stone Carvers Guild of Brassó, founded in 1523. His name is often found in conjunction with commissioned decorative works. – B: 1144, T: 7653.

**Domonkos, István** (Stephen) (pen-name Illés Diósi) (Ókér, now Zmajevó, Serbia, 7 August 1940 - ) – Poet, writer, publicist, literary translator. His higher studies were at the Teacher Training College, Szabadka (now Subotica, Serbia). He worked as a jazz musician and Editor of the periodical *New Symposium* (*Új Szimpózium*). In 1979, he moved to and settled in Sweden. Among his more than 20 works are: *Rátka*, poems (1963); *Stuffed Bird* (*Kitömött madár*), novel (1969, 1989); *Vita Italia*, juvenile novel (1970, 1984); *Self-portrait with a Short Story* (*Önarckép novellával*), short stories (1986), and *In Abolishing Government* (*Kormányeltörlésben*), selected poems (1998). He is a recipient of the Híd Literary Prize (1969), and the Critics' Prize (1973). – B: 0878, 1169, T: 7103.

**Dömötör, Tekla** (Mrs. Aladár Dobrovits) (Budapest, 13 January 1914 - Budapest, 15 November 1987) - Folklorist. Her higher studies were at the University of Budapest, where she received a teaching degree in 1936, and earned a doctoral degree in 1937. She spent a year at the University of Paris, Sorbonne. She was interested in the issues of folklore, classical philology and history of medieval literature. During World War II, she earned her living by translations. In 1945, she worked in the presidium of the *Hungarian National Museum* (*Magyar Nemzeti Múzeum*). From 1946 to 1953, she worked in the *Ervin Szabó Library* in the inner city of Budapest. In 1953, she worked in the Folklore Department of the University of Budapest, and taught there until her retirement in 1984. Between 1958 and 1966, she worked part-time as Department Head at the *Theater Science Institute* (*Színháztudományi Intézet*). She conducted research in folk-poetry, folk-customs, folk-beliefs and folk acting. She delivered lectures at universities in Europe and America, and her publications appeared at home as well as abroad. She was on the editorial board of the periodical, *Ethnographia*. Among her works are: *Passion Play* (*Passiójáték*) (1936); *Old Hungarian Comedies* (*Régi magyar vígjátékok*) (1954);

*Hungarian Folk Customs (Magyar népszokások)* (1972), and *Beliefs of the Hungarians (A magyar nép hiedelemvilága)* (1981). She received an Honorary Doctorate from the University of Bergen, Norway (1980), the Herder Prize (1985), and the Medal of the Hungarian Government. – B: 0883, 0878, 1257, T: 7103.

**Dömötör, Tibor** (Budapest, 29 May 1929 - Akron, Ohio, USA, 24 November 2000) – Bishop of the Free Reformed Church in America, writer, poet. He graduated from the Fazor Avenue Lutheran High School, Budapest, and studied Theology at the Evangelical-Lutheran Theological Faculty of the University of Pécs in Sopron. He was ordained in 1955 and became Parish Minister in Békés. In 1956 he left Hungary for the West, and settled in America, and from 1957 he served as a minister. He founded the Independent Alliance of Freedom Fighters in 1957, and organized several local branches in 1959. In 1960, he founded and edited the newspaper *We Are Fighting on (Tovább Harcolunk)*. In 1961, he became the Editor of *Akron Hungarian News (Akroni Magyar Hírlap)*. In 1962, he organized and supervised the István (Stephen) Serényi Walk for Liberty between San Francisco and New York. In 1966, the Akron Hungarian Reformed Church called him to become its minister. From 1964 on, he was the Editor of the paper *Hungarian Church (Magyar Egyház)*. In 1968, he united the two Hungarian Reformed Churches in Akron, Ohio; in 1969 he was elected to the Board of the Bethlen Home for Senior Hungarians in Akron. In 1970 he started a weekly one-hour Reformed radio program. In 1973 he organized a new Hungarian congregation in Phoenix, Arizona. In 1979 he initiated the construction of the largest nursing home for Hungarians in Akron, the Lorántffy Home, with one hundred beds and he became its director. In 1976, the Hungarian Reformed Church in America elected him to the directorship; and in 1977, he initiated the building of a Hungarian Reformed Church in Ontario, CA. In 1979, he organized the opening of the Gáspár Károli Theological College with its center in Akron. In 1980, the Lórántffy Memorial Park was opened at his initiative. In 1983, the newly founded *Free Hungarian Reformed Church (Szabad Magyar Református Egyház)* elected him as their bishop, and in the same year, the American Hungarian Alliance elected him President. The Bocskai Home for senior Hungarians in Akron was built under his guidance, followed by several other buildings. He wrote and published numerous poems and novels and contributed to several Hungarian language newspapers in America. He was also the author of numerous theological essays, articles, patriotic and religious poems, as well as occasional writings. He received numerous awards and honorary degrees. – B: 0906, T: 7682. → **Reformed Churches in America.**

**Donáth, Ferenc** (Francis) (Jászárokszállás, 5 September 1913 - Budapest, 15 July 1986) – Politician, historian. He read Law at the University of Budapest, and earned a Doctoral Degree in 1934. In the same year he joined the Hungarian Communist Party; in 1937, he was one of the organizers of the *March Front (Márctusi Front)*, and in 1939, that of the *National Peasant Party (Nemzeti Paraszt Párt)*, and the *Peace Party (Békepárt)* in 1943. He was Editor of the journal *Free Word (Szabad Szó)* (1939-1944). From 1940, he participated in organizing the illegal Communist Party. He filled various posts in the Communist Party and in the State administration until 1951, when he was arrested and sentenced to 15 years in prison, but was rehabilitated in 1954. In 1956, he belonged to the opposition group of Imre Nagy. With Géza Losonczy, he played a significant role, and after a few days' hesitation, Imre Nagy realized the revolutionary character of the events. On 4 November 1956, together with Imre Nagy, he drew up a proclamation condemning

the Soviet military action against the Hungarian Revolution. Thereafter, he received asylum at the Yugoslavian Embassy, Budapest. At the end of November, together with the refugees at the Yugoslavian Embassy, he was arrested and taken to Snagov, Romania. He was accused and sentenced to 12 years' imprisonment. He was freed by an amnesty in 1960. Until his retirement in 1976, he worked in a library, in a museum and finally he became a scientific contributor to the Institute of Economics of the Hungarian Academy of Sciences. In the 1970s, he was a member of the Democratic Opposition, and one of the signatories of the Charta 77. In 1980, he helped with the publishing of István (Stephen) Bibó's Memorial Book of the Samizdat literature. He helped a dialogue between various opposition groups in the 1980s. – B: 0883, 1112, T: 7103.→**Nagy, Imre; Losonczy, Géza; Bibó, István; Freedom Figh of 1956; Donáth, László.**

**Donáth, László** (Ladislás) (Budapest, 5 December 1955 - ) – Lutheran pastor, politician. His father was a leftist politician and resistance fighter; together with Prime Minister Imre Nagy, he and his family were deported to Snagov, Romania, then, during the Kádár regime he was sentenced to 12 years' imprisonment in 1958; he was granted amnesty in 1960. His son László Donáth studied at the Lutheran Theological Academy, Budapest, from 1974-1979. He was ordained pastor in 1979; thereafter, he was an assistant pastor in Budapest and Miskolc, later vicar in Ózd, Sajókaza and Kazincbarcika. He did pastoral work also in towns of neighboring counties. From 1985 to 1986, he carried out further studies on a scholarship at the University of Heidelberg and at the College of Jewish Studies. Back in Hungary, he worked as curate in Budapest, an assistant pastor of the congregation of Csillaghegy, where on 22 October 1988, he was elected pastor. Between 1990 and 1994 he taught Social Ethics and History of 20th Century Theology at the Arts Association of Miskolc. He lectured at the Department of Socio-politics at the University of Budapest, and also at the Károly Wesley Theological College. From 1989, he was a regular outside consultant of the Hungarian Radio. In 1989, he became a member of the Historical Committee of Administration of Justice and Committee of Reverence, and he was also an active participant in the reburial of Imre Nagy and his martyr colleagues. In 1989, he was founding member of the Hungarian-Jewish Cultural Association. At the 1994 parliamentary elections he became a Member of Parliament for the Hungarian Socialist Party through several cycles. He is working in the Human Rights, Minority and Religious Standing Committee. His publications have appeared in the religious and secular press since 1978, dealing mainly with theological, cultural and political issues. His books include *Studies on the History of Luther's Reformation (Tanulmányok a lutheri reformáció történetéből)*, co-author (1984), *The Ingenuity of Love (A szeretet leleménye)* (1994). – B: 0874, 1608, T: 7456.→**Donáth, Ferenc; Nagy, Imre.**

**Donáth, Leó** (Budapest, 7 February 1888 - Budapest, 1 February 1941) – Sports leader, businessman. He studied at the Universities of Budapest and Oxford, earned a Ph.D. in Philosophy and Political Science. While still studying, he was one of the best Hungarian sprint swimmers; in the 50 yards free-style event, he even set up a record. Prior to World War I, he organized the famous Swim Team of the Athletic and Football Club of Budapest Polytechnic (MAFC). Later, he took on the important role as Executive President of the Hungarian Swimming Association in the development of the Hungarian swimming sport, particularly that of the waterpolo. From 1920 until his death, he was Secretary and Treasurer of the International Amateur Swimmer Federation. In 1924, the European Swimming League was founded on his initiative as a result of his extensive

knowledge of languages, working capacity and organizing ability; he was Secretary of the League until his death. The European Championships were also established on his initiative, and in 1926, in course of this, the first series of competition was held in Budapest, with his collaboration. In 1929, he established a water-polo tournament. In 1932, he started the relay competitions between continents, held after the Summer Olympic Games. The International Swimming Federation, in recognition of his services, established a challenge cup, its guardian being the Olympic champion water-polo team. – B: 1768, 0883, 1031, T: 7456.

**Don Bend, Battle of the** (A Hungarian Military Tragedy) – In World War II, the heavy losses of the German Army on the Eastern Front forced the German High Command to increase the use of their allies' military participation in the war. During the conferences held in Budapest in January 1942, the Hungarian Government agreed to send the 2nd Hungarian Army, with 201,000 men and equipment, to the Eastern front between April and June 1942. The Germans promised to equip the Hungarian army with modern weaponry. This only happened on a very small scale. The 2nd Hungarian Army, after having arrived at the *Kursk* area, together with the German troops, broke through the Soviet defense line in about a 300-km wide area, and in a distance of about 150-170 km, they reached the River Don, where the Hungarian troops were placed to form a defense line. The 200-km-long line section, assigned to the Hungarian army, was too long to develop a deep enough defense. However, the Red Army kept two bridgeheads in the villages of *Uryv* and *Tsutsye (Scsucyje)*. In the fall and winter of 1942, the center of the war on the Eastern front was in *Stalingrad*. Meanwhile, in the Russian interior, the troops, who had escaped German pincers in previous years, were reorganized, retrained and re-equipped, with the help of the Lend-Lease Act of their western allies. During the Battle of Stalingrad, the Russians had already reinforced their troops along the Don, especially in the two major bridgeheads within the Hungarian 2nd army zone. On 12 January 1943, the Soviet Army launched its massive attack across the Don against the Hungarian Army. The Soviet High Command assembled four armies and two independent army corps to break through and encircle the 2nd Hungarian and 8th Italian armies. In the meantime, Italian General Italo Gariboldi managed to withdraw his Alpini II Division from the frontline, on 19 December 1942. As a result, a wide gap remained open on the frontline and Soviet units flooded through it. It was rightly expected that the brunt of the pending Soviet onslaught would fall upon the Hungarian Army. The Soviet army was numerically superior in ammunition, artilleries and tanks and had plenty of reserves. The Hungarian army had not been adequately re-supplied. Ammunition was in such short supply that the artillery was restricted to four shells per cannon a day. All of the weapons and arms of the Soviet soldiers had been designed with the Russian winter in mind, while the German, Hungarian and Italian-made machine-guns, rifles and tanks froze in the  $-30^{\circ}\text{C}$  temperatures. The Soviet Army was well fed (canned food made in Chicago IL, USA, was in their haversacks) and clad in fur hats and gloves. Winter clothing for the soldiers of the Hungarian 2nd army was not issued until just before the Soviet attack and only one warm but inadequate meal a day was allotted. That the Soviet armies were preparing an attack was common knowledge. Even at Christmas, their reconnaissance activities had been stepped up and more and more soldiers and tanks could be observed in the bridgehead at *Uryv*. While the German High Command expected only a smaller attack, Hungarian General Gusztáv Jány correctly judged that an

attack with superior Soviet forces was imminent. He urged, with little success that the German Army Group place stronger reserve forces at his disposal. Lastly, in the second week of January, the first Hungarian companies, inexperienced and unarmed, arrived. The Soviet mass attack began while the unarmed men were still disembarking, and had no reserves to reinforce their troops. Although the Hungarians were close to collapse under the pounding of Soviet artillery, they heroically withstood the first Soviet onslaught. Later, however, they were pushed back by the mass attacks of Soviet infantry and tanks. Even the commander of the army was frustrated: Hitler reserved the right to employ the army reserve, an entire German mechanized corps. Instead of ordering this corps to launch a counterattack, he ordered the front line troops to defend the perimeters "to the last man". Sometimes losing 70-80 per cent of their effective force, the units of the Hungarian 2nd army manifested a high sense of duty, courage and heroism by beginning to withdraw from the bank of the Don, only when the Soviet troops outflanked them, often encircling them to a depth of 80-100 km. The army suffered heavy losses in the great battle of the Don from 1 January to 3 April 1943: 41,972 dead and disappeared, 28,044 wounded, transported home, and 26,000 prisoners of war according to Soviet source; a total of 96,016 men. In April 1943 the official number of the 2nd Hungarian Army at the Rived Don consisted of 100,818 soldiers. Consequently not the whole 2nd Army perished, only the half of it, however it was a heavy loss. According to politically inflated numbers these figures were higher: 100,000 dead (including the loss of a labor service battalion) and 60,000 prisoners annihilated in a period of less than three weeks. Only 40,000 returned home after the Germans saw no further use for the badly beaten, demoralized Hungarian army. The material losses were heavy: about 5,000 dead horses, all the heavy weapons of the infantry, the bulk of the artillery pieces, heavy engineering equipment, the majority of tanks and trucks and an enormous amount of food, as well as uniforms, boots, ammunition, explosives and other materials stored in depots. General Jany, convinced that his troops had fought valiantly, was shocked to learn that he and his army were being blamed for the catastrophic defeat. Instead of rebuffing the unjustified German accusations, he turned against his own soldiers in his General Order of 24 January: "*The 2nd Hungarian army lost its honor... the allied German army and the Fatherland despise us.*" Regent Horthy, however, with Chief of Staff Szombathelyi, convinced that the army had fulfilled its duty, expressed his conviction to the German ambassador. They thought that the German High Command should publicly recognize the 2nd army's heroism. Hitler was unwilling to make even this small concession. The remnants of the 2nd army returned home on 24 May 1943. The Supreme Hungarian Defense Council decided at its meeting of 19 September 1943, to seek contact with the Allied Powers to negotiate the terms of a separate peace. The sacrifices of the 2nd army thus prompted a political decision, with the intent to save Hungary from the consequences of her participation in the war already lost. B: 1230, 1275, 1383, 1020, T: 7668.→**Hungary, History of; World War II; Kovács, Gyula (2); Horthy, Miklós; Jány, Gusztáv; Bárdossy, László.**

**Doráti, Antal** (Budapest, 18 April 1906 - Zürich, Switzerland, 15 November 1988) – Conductor, composer. He played the piano from the age of 5 and studied at the Ferenc (Franz) Liszt Music Academy of Budapest, where he was the student of Zoltán Kodály. Béla Bartók exercised great influence upon him. Later, he conducted all of Bartók's important works. At the age of 18, he excelled as a conductor at the State Opera House,

Budapest. In 1928, he worked in Dresden, Germany, and in 1929 he began his large-scale performing tours. In 1938, he lived and worked in Melbourne, Australia, then from 1939 in the USA, and was a leading conductor of several larger symphony orchestras there, such as the Symphony Orchestra of Dallas (1948-1949) and the Minneapolis Symphony Orchestra (1949-1960). He also assumed the leadership of the Philharmonia Hungarica Orchestra, formed in Vienna by musicians who escaped from Hungary after the 1956 Hungarian Revolution. Later, he was conductor of the London BBC and Stockholm Philharmonic Orchestras, and between 1970 and 1974, he was Musical Director of the National Symphony Orchestra in Washington. Between 1975 and 1978, he conducted the Royal English Philharmonic Orchestra. He made more than 500 recordings. As a conductor, Doráti was a unique individual, who both inspired the orchestra and maintained a persuasive force over them at the same time. He composed some 26 pieces of music, including *Symphony No. 1*, *Piano Concerto*, *Violin Concerto*, *Oboe Concerto* and *Mass of Peace (Békemise)*. He wrote his autobiography, *Notes of Seven Decades*. Queen Elizabeth II conferred on him the Honorary Knighthood of the British Empire. He was a recipient of the Bartók-Pásztory Prize in 1986. – B: 1091, 1230, T: 7684→**Kodály, Zoltán; Bartók, Béla; Philharmonia Hungarica.**

**Dorffmeister, István** (Stephen) (Vienna, Austria, ca. 1725 - Sopron, 29 May 1797) – Painter. He developed his professional skills at the Academy of Fine Arts in Vienna. From 1764, he lived in Sopron, painting mostly historical and biblical scenes, as well as portraits. In his art, he represented the late Baroque style. He and his son were popular painters, particularly in Transdanubia (*Dunántúl*). Countrywide some 150 of his paintings are known. Some of his famous works are the wall painting in the Castle of Sárvár (1769), and wall paintings in the parish church of Császárváros (1775). The painted ceiling of the Abbey of Szentgotthárd (1784) and the heroic death of Count Miklós (Nicholas) Zrinyi, painted on the ceiling of the church of Szigetvár are also well known works (1788), as well as the ceiling paintings of the Episcopal Seminary and the Dome painting in Szombathely (1791-1792). There are three large fresco compositions in Zala County, at the parish churches of Túrje, Nova and Kiskomárom. He painted altars in the church of Kismarton, in the Dome of Szombathely, and in the old parish church of Felsőőr (now Oberwart, Burgenland, Austria). Among his other paintings are *The Nativity (Krisztus születése)* (1772) and *Pentecost (A Szent Lélek eljövetele)* (1782), and *The Battle of Szentgotthárd (A Szentgotthárdi csata)* (1784). – B: 0883, 0934, T: 7653.

**Dörner, György** (George) (Budapest, 9 December 1953 - ) – Actor. He began his career on the University Stage in 1972, and thereafter he studied at the Academy of Dramatic Art, Budapest, where he obtained a diploma in 1979. In the same year he was contracted with the National Theater (*Nemzeti Színház*), Budapest, from where he moved to the József Katona Theater (*Katona József Színház*), Budapest in 1982. From 1987 to 1989, he was a member of the Miklós Radnóti Stage afterwards he became a freelance artist. From 1990, for a season, he was a member of the Petőfi Theater in Veszprém, then a freelance artist again, playing in the theaters of Veszprém, Tatabánya, Kecskemét and Budapest. His personality and ability for many-sided character-portrayal proved effective both on stage and in film. His greatest successes on stage include Griffiths' *Comedians (Komédiások)*, also directed by him; Sándor Bródy's *The Medical Student (A orvos)*; Chekhov's *The Inspector (A revizor)*; Milán Füst's *Catullus*, and Mrožek's *Merriment (Mulatság)*. There are more than 50 films and TV films are to his credit, including *The*

*Three Good-hearted Robbers (A három jószívű rabló)* (1979); *Good Lord (Uramisten)* (1984), and *Hunting for Englishmen (Vadászat angolokra)* (2006). In many synchronized films, he played the voice of his great actor colleagues, like Bruce Willis, Michael Douglas, Mel Gibson. He was the author of the play *Čapek: The Play of Fatal Love (A végzetes szerelem játéka)*. In October 2011 he was appointed Director of the New Theater (*Új Színház*), Budapest, together with playwright and politician István (Stephen) Csurka as Superintendent. He received the Dramatic Critic Prize and the Merited Artist title (1999). – B: 1031, 1105, 1445, T: 7456.

**Dorogi, István** (Stephen) (Hungary, 1885 - ?) – Chemical engineer, inventor. Between 1929 and 1934, he developed a process for the industrial mass production of inflatable forms and figures made of rubber. For this procedure, he obtained 52 Hungarian and 150 international patents. The solutions and methods he developed are widely used in the modern rubber industry to manufacture inflatable toys, boats and lifesaver equipments. He is regarded as the father of mass produced inflatable toys, forms and figures. – B&T: 1081.

**Dorosma Clan** – The first documentary evidence for the clan dates between 1269 and 1434. The first known member, Comes János (John) and his son István (Stephen) were sword-bearers for the King Béla IV (125-1270). In 1269, the King bestowed on them the village of Gara in the County of Valkó. Miklós (Nicholas), bán of Macsó, named himself Garay after the village. The famous clan's estates were situated in the present-day Southland (*Délvidék*) (Southern Hungary, now in Serbia). The clan separated into three branches: from the Garay branch originated the Harapkai family; from the Garay-Bánffy branch originated the similarly named family; and the Garay family descended from the Nádor Garay branch. – B: 1078, T: 7685.

**Dowry** (*hozomány*) – The valuable goods or real estate that comes with the bride into the household with the purpose of enhancing the living standard of her new family. The name varies from region to region, for example in Kalotaszeg (now Țara Călatei, Transylvania in Romania), it is called '*kelengye*'. The portable dowry used to be ceremonially transferred to the groom's house, or to the place where the newlyweds chose to live, where it was on display for a period of time. The husband had the right to use and manage the dowry; however, it remained the property of the wife. If the marriage broke up, either the husband or any relative of the wife was potentially eligible for the dowry. In case of divorce, or if the wife died, the case was usually referred to the courts. A woman was not eligible for a dowry if she married against her parents' wishes, or if she made no effort through her work to acquire one. – B: 1134, T: 3233.

**Dózsa, György** (George) (Dálnok, ca 1470 - 20 July 1514) – Leader of the Peasant Revolt of 1514. Because of his Szekler (*Székely*, Transylvanian) origin, he was also called György Székely. At Nándorfehérvár, Hungary (now Belgrade, Serbia), he served as a cavalry captain, and on 28 February 1514, he killed a Turkish knight in a duel, thus King Lajos II (Louis, 1516-1526) awarded him with a coat of arms. He was intended to become leader of the crusade announced by Archbishop Tamás (Thomas) Bakócz. At this time, the serfs gathered in camps abandoning their works, therefore their landlords attempted to force them to return by exposing their family members to certain cruel treatments. Hearing this, they rebelled, turned against their landlords, burned their holdings, looted the landlords' property then, murdered them. Dózsa became their leader,

and with his 40,000 men, only equipped with scythes and swords, looking for a safe

haven, went against the town of Szeged. Not succeeding in conquering it, he occupied the towns of Csanád, Nagylak, Lippa, then became over-confident and led his troops against Temesvár (now Timișoara, Romania). The parish priest of Cegléd, Lőrinc (Lawrence) Mészáros, became the fiery speaker of the rebels' army. In the meantime, thousands of aristocrats, noblemen and their families, as well as dignitaries of the church became their victims e.g., the royal treasurer, István (Stephen) Telegdi and Bishop Miklós (Nicholas) Csáky. János (John) Szapolyai, Voivode of Transylvania (*Erdély*, now in Romania), rescued the fort. He destroyed Dózsa's army in the middle of June 1514, routed the troops of Lőrinc Mészáros at Nagyvárad (now Oradea, Romania), then

captured him together with his brother Gergely (Gregory), and ordered his cruel execution, forcing Dózsa to sit on a red-hot iron-throne with a glowing crown on his head. After the retaliation, the condition of the peasantry considerably worsened. In fact, the constitutional lawyer, István (Stephen) Werbőczy, included the suppressive measures in his volume, the *Tripartitum*, rigidly fixing the downtrodden condition of the peasantry for centuries. The peasant uprising of Dózsa is a tragic part of Hungarian history. His story was remembered in several literary and fine art creations. A Street in Budapest, as well as in other towns, bear Dózsa's name. – B: 0883, 1078, 1085, T: 7668. → **Bakócz, Tamás; Werbőczy, István; János I, King; Mészáros, Lőrinc.**

**Dózsa, László** (Ladislás) (Budapest, 12 October 1942 - ) – Actor, freedom fighter of 1956. He spent his childhood largely in the People's Park (*Népliget*), Budapest), where his parents appeared as artists; at the age of three, he already appeared in front of the public. During the 1956 Revolution and Freedom Fight, as a teenager (aged 14), he took part in the street fighting. He and his comrades set up their position at the intersection of Szövetség Street and Rákóczi Avenue. On 5 November 1956, (when the revolution was collapsing and the Communist government with the Soviet military presence began vindictive action), Dózsa and his fellow fighters were arrested and, in the open, public street, they were lined up in front of an execution squad. His companions were all killed; Dózsa, with severe wounds and two splinters in his neck, survived the execution. The unconscious Dózsa was taken to the hospital on Szövetség Street; later the men of the secret police (AVH) took him to the prison infirmary on Mosonyi Street, which was known to be a place for interrogation. One of the henchmen kicked Dózsa's head so savagely, that a piece of his skull broke away, placing him in the condition of clinical death. Since he was considered dead, he was thrown in a mass grave, and lime was poured over him. A gravedigger saved László Dózsa, who, with the help of his fellow digger took Dózsa to the hospital in Szabolcs Street, where his life was saved in an eight-hour long operation. Dózsa fortunately escaped from the Communists' reprisal. He studied and was trained in the School of Dramatic Art run by Kálmán (Coloman) Rózsahegyi; then in 1967, he completed the College of Dramatic Art. Until 1970, he worked as an actor in the Csokonai Theater (*Csokonai Színház*) of Debrecen and, until

1980 he played in the Madách Theater (*Madách Színház*) of Budapest. He spent two seasons in the Folk's Theater (*Népszínház*) and, from 1982 to 1991, played at the National Theater (*Nemzeti Színház*), Budapest. Since 1991, he has been playing in the Madách Theater and in the Újpest Theater (*Újpesti Színház*). László Dózsa is an outstanding character actor. He has appeared in several films, and has also worked as a stage manager. His roles include Orin in O'Neill's *Mourning Becomes Electra* (*Amerikai Elektra*), Lennie in Steinbeck's *Of Mice and Men* (*Egerek és emberek*), and Professor Szilvai in Szigligeti's *Liliomfi*. He also played in a number of Hungarian feature films and TV-series, e.g. in: *These Young People* (*Ezek a fiatalok*) (1967); *Bartered Love* (*Elcserélt szerelem*) (1984); *Othello* (TV, 1975); *King Henry IV* (TV, 1980), and *Grand Visit* (*Nagyvizit*) (TV, 2006). He has often been synchronized, e.g. he was Jean-Paul Belmondo's Hungarian voice. He is the author of the book: *From the Footlights to the Scaffold and Afterwards (A rivaldától a vérpadig és utána)* (his volume of reports). In 2005, he received the Grand Cross of the Order of Faithfulness to the Fatherland. – B: 1445, 1704, 1742, T: 7456. → **State Security Police; Rózsahegyi, Kálmán.**

**Drábik, János** (John) (Budapest, 9 June 1938 - ) – Lawyer, economist, writer, journalist. His original field was music: he studied at the Special High School of Music in Budapest, completing it in 1956. At first he intended to become a cellist. Because of a fractured hand, he was forced to change his career. He completed his higher studies at the Faculty of Law (in Political Science and Jurisprudence), at the University of Budapest in 1960; in an evening course he studied Philosophy in 1968, and in 1971, he became qualified as a solicitor and legal adviser; he also completed a course in Journalism. Until the end of 1979, he worked in various legal, editorial and administrative fields. After emigrating to the USA, he furthered his studies at the University of New York and, in 1981, he became a legal adviser. In 1983 he settled in Munich, Germany, and worked for Radio Free Europe, writing and editing a number of programs under the pen-name of Pál Kézdi. He wrote serials on Stalinism, American Constitution, neo-conservatism, and on the history of the Soviet Union. He also took part in the activities of the *Széchenyi Circle* of Munich from 1983 on. He was a member of various other societies and political parties, and a founding member of the movement *Cooperation for Survival (Összefogás a fennmaradásért)* with the aim of preserving the Hungarian land and the creation of the condition for a "Garden-Hungary". His main objectives are: restoring Hungary's economic sovereignty, realization of a participating democracy, the widening of the sphere of authority of plebiscites, the managing of money, the fundamental public institution of the nation, as well as the relationships of the international monetary system and democracy. He writes regularly for the paper *National Guard (Nemzetőr)*, published in Munich, as well as for various papers in Hungary. He has been Deputy Editor of the journal *Exposer (Leleplező)*, launched in 1999. He often gives lectures and talks on his specialized topics. He is an internationally recognized theoretician. His published books include *Usurious Civilization, vols. i,ii,iii (Uzsoracivilizáció, I,II,III)* (2002-2003); *Dictatorship of Money (A pénz diktatúrája)* (2005), and *Human-centered World Order (Az emberközpontú világrend)* (2007). – B: 1031, 1091, T: 7456.

**Dráfi, Mátyás** (Matthew) (Galánta, now in Slovakia, 17 November 1942 - ) – Actor. After completing his secondary schooling in 1959, he joined the Slovakian Hungarian Regional Theater (*Szlovákiai Magyar Területi Színház – MATESZ*), Rév-Komárom (now Komarno, Slovakia) (1955-1960). He obtained an actor's diploma from the Theater

Department of the Academy of Fine Arts, Pozsony (now Bratislava, Slovakia) (1960-1965). From 1965 to 1980, he worked in Rév-Komárom. From 1982, he taught elocution and the art of presentation at the Theater Department of the Academy of Fine Art, Pozsony, and acted simultaneously as well. His major roles include Lucifer in Madách's *The Tragedy of Man* (*Az ember tragédiája*); title role in Shakespeare's *Othello*; Peachum in Brechts's *The Three-Penny Opera* (*Koldusopera*); Tiborc in J. Katona's *Bánk bán*; Ádám in A. Sütő's *Cain and Abel* (*Kain és Ábel*), and Kreon in Sophocles' *Oedipus the King* (*Oedipus rex – Oidipusz király*). He also worked as a stage-manager and gave solo performances as well, such as *An Evening of Poetry* (*A költészet estéje*). He is a recipient of the title of Merited Artist, the Egressy Prize, the Open Europe Prize, the Silver Plaque of the Republic of Slovakia, The Pribina Cross, Third Class, and the Life-achievement Prize. – B: 1083, 1890, T: 7103.

**Drágffy Family** – An originally a Wallachian (Romanian) family, important Boyars, who settled in Hungary approximately in the 14th century. The first Drágffy, Miklós (Nicholas), was mentioned in 1367; he was appointed Voivode of Transylvania (*Erdély*, now in Romania), in the same year by King Lajos I, (Louis the Great, 1342-1382). In 1371, Drágffy's army attacked the Wallachian Voivode, Layk, and defeated him; but while pursuing them, the Wlachs lured him to a treacherous place, impossible for self-defense, and almost his entire army perished there, together with him. He left three sons: János (John), Pál (Paul) and Drág; the latter two became voivodes of Transylvania. Several members of the family played important parts in Hungarian history. Mátyás (Matthias) Drágffy, was a famous orator of his time, and was President of the Royal Court of Appeal under King Mátyás I (Matthias Corvinus, 1458-1490). He was sent on a mission to Pope Sixtus IV. Tamás (Thomas) Drágffy was also President of the Royal Court under King Mátyás I, and János (John) Turóci recommended part of his Chronicle to Tamás Drágffy. Bonfini made mention of Tamás' scholarship and talent as an orator. Bertalan (Bartholomew) Drágffy was an aristocratic nobleman, famous for his valor; at first, he was Grand Cupbearer, later becoming the Voivode of Transylvania under King Mátyás I, and King Ulászló II, (Wladislas, 1490-1516). He accompanied King Mátyás in his campaigns against the treacherous Wallachian voivodes, and when Mátyás took Eggenburg, he was the leader of the cavalry. However, after the death of King Mátyás, Bertalan Drágffy did not side with the king's son, János (John) Korvin, but joined the Party of King Ulászló, who later made him Voivode of Transylvania. When the Ottoman Turks attacked Serbia, it was Bertalan Drágffy and Pál (Paul) Kinizsi, who chased them out, and who also suppressed an uprising incited by Lőrinc (Lawrence) Ujlaki. In 1500, he retired from the voivodeship. Under Emperor Ferdinand I, Gáspár (Gasper) Drágffy was Lord Lieutenant of Counties Kraszna and Middle-Szolnok; he was one of the most zealous followers and propagators of the Reformed faith. Gáspár's son was made to succeed the office of Lord Lieutenant by Emperor Ferdinand I. Bertalan Drágffy's son was made Royal Warden and Lord Chief Treasurer, and finally Lord Chief Justice. He participated in the Battle of Temesvár against György (George) Dózsa, the leader of the Peasant Uprising in 1514, where he almost lost his life. In 1526, at the Battle of Mohács against the invading Turks, he carried the King's flag, and it was in this fateful battle of Hungarian history, that he fell. The Drágffy family died out in 1555. – B: 0942, 1297; T: 7456. → **Lajos I, King; Mátyás I, King; Bonfini, Antonio; Ulászló II, King; Kinizsi, Pál; Dózsa, György.**

**Drági Compendium** – Its author is most probably Tamás (Thomas) Drági, Vice-Governor of Macsó, and later Chief Justice. It was written between 1459 and 1460, and discusses not only universal history but also Hungarian events from the beginning to 1459. – B: 1230, T: 3240.

**Dragon Order** (*Hungarian Sárkány Rend – Sárkányos Társaság*) – It was a Knightly Order in Medieval Hungary. King Zsigmond (Sigismund of Luxembourg, 1387-1437), and his wife initiated it after the victory over Bosnia on 12 December 1408; but the Order really came into existence during the last decades of the 14th century. It is mentioned in a last will in 1397, and in other documents as well. The Order had two grades. The 22 members of the Order, all carrying the title of Baron, supported the Royal House. In return they received more honors. The members of the Order had to foster the spirit of chivalry that they protected and favored. At the same time, they worked to avoid internal strifes and cliquish behavior. Its badge was a coiled dragon pierced by a cross. The Order ceased to exist after 1440. – B: 0942, 1153, T: 7676.

**Dráva Triangle** (*Drávasszög*) – A land area at the confluence of the Danube and Dráva rivers, southeast of the city of Pécs. It is part of County Baranya. After 1920, its major part was ceded to the Serb-Croat and Slavonic Kingdom that later became Yugoslavia. The region suffered greatly during the breakup of Croatia and Yugoslavia in the first half of the 1990s. – B: 1153, T: 7656.

**Draw-well** (*gémeskút*) – An ancient water-drawing device, mentioned in Egyptian records as an invention of the Hyksos invaders. It is mostly in use on the Great Hungarian Plain (*Nagyalföld*), where, with that ingenious contraption, the drawing of a pail of water from the well is managed with minimum effort. The use of this device is very popular in the Carpathian Basin. A forked pole is erected at a few meters distance from the well serving as fulcrum for the horizontal beam called *gémfa*. The horizontal beam is balanced across the ‘V’ of the vertical pole and joined with another vertical pole, called *ostorfa* (*swape*) that can be swung in and out of the well with the pail at the end. The cross beam is balanced with a contra-weight so that the full pail can be lifted out with minimal effort. The use of the draw-well is practical only where the level of the water table is not far from the surface. As the vertical post is visible from quite a distance, the herdsmen used them as signals to each other on the Great Plain. (1) If the beam was up and the pail was on the brim of the well it meant some trouble. (2) If the pail was swinging empty on the pole, it meant danger or mishap and help was needed. (3) If, on the top of the vertical beam a kerchief or any other female garment was displayed, it signaled the presence of a female companion. – B: 1138, T: 3233.

**Dreisziger, Nándor F.** (Csorna, 20 March 1940 - ) – Historian, educator. He emigrated to Canada in 1956, and completed his higher education at the University of Toronto (Ph.D., 1974). He taught History at the Royal Military College from 1970 to 2006. He is the founding editor of the *Hungarian Studies Review*. He has published extensively on modern Canadian, Hungarian and Hungarian-Canadian history. His papers have appeared in leading Canadian, American, British, Hungarian and other journals. His works include *The Hungarian Revolution Twenty Years After*, editor (1976); *Struggle and Hope: The Hungarian-Canadian Experience*, (1982); *The First War Between Socialist States: The Hungarian Revolution of 1956 and its Impact*, co-editor with B. K. Király and B. Lotze (1984); *Forgotten Minorities: Hungarians of East Central Europe*, co-editor with A.

Ludányi (1989); *Hungary in the Age of Total War, 1938-1948*, editor (1998), and *Hungary: 1001-2001 A Millennial Retrospection*, co-editor with George Bizstray (2001). He has served on the executive of several scholarly organizations and he is a recipient of the Officer Cross of Merit of the Republic of Hungary. – B: 0893, T: 4342.→**Hungarian Studies Association of Canada; Bizstray, György.**

**Dresch Dudás, Mihály** (Michael) (Dudás) (Budapest, 10 July, 1955 - ) – Musician, composer. He was studying to become an engineer, when he turned to jazz and studied jazz music at the Béla Bartók Music High School, Budapest (1975-1979). First he was influenced by jazz saxophonists such as John Coltrane; later he strove to fuse traditional Hungarian music with the improvisatory elements of jazz. He is primarily a saxophonist but also performs on clarinet and the traditional Hungarian flute. In 1993 he formed a Jazz Quartet under his name. He has performed at jazz festivals worldwide, such as the London Jazz Festival, and has recorded with artists such as the American saxophonist, Archie Seppand. The Quartet produced some popular CD-s, among them *Straight Music (Egyenes Zene)*; *Motionless Journey (Mozdulatlan utazás)* and *Beyond the Water (Túl a vízen)*. He is one of the contemporary trend-setting musicians. He won the Award For Hungarian Art in 1994. – B: 0874, 1031, T: 7103.→**Dance House Movement.**

**Drinápoly Peace Treaty** – The first Peace Treaty at Drinápoly (Adrianopole, now Edirne, Turkey) was an agreement between Miksa (Maximilian) Habsburg, King of Hungary and Szelim, Turkish Sultan, in March of 1568. This determined the Turkish rule over Hungary, the break-up between the Empire of the Habsburgs and the Principality of Transylvania (*Erdély*, now in Romania). The second Peace Treaty was concluded in September of 1829, ending the Russian-Turkish war. – B: 1138, T: 7668.

**Driving and Coaching** – The International Equestrian Association has held European competitions biannually since 1971, and international competitions since 1972. From the beginning, Hungarian contestants were placed at the forefront. The most successful Hungarian branch of the sport was the “Four-in-Hand” driving and coaching in the past decades. These Hungarian results are related to coach driving and are based on traditional values, the individualistic Hungarian driving style (good hand), the harnesses and the world-famous Junker equipage. Great names among the breakers going back to the 1800s, are: Count Móric (Maurice) Sándor, Baron Miklós (Nicholas) Wesselényi Jr, Count Dénes (Dennis) Széchenyi, Count László (Ladislav) Károlyi, József (Joseph) Döry, Elemér (Elmer) Jankovich and Tibor Pettko Szandtner. A total of 30 first prizes were won at European and World Championships in individual and team events. Ferenc (Francis) Abonyi and György (George) Bárdos competed with an outstanding record and won the first championship. B: 1138, 1020, T: 7675.→**Kincsem; Csikós; Coach; Sándor, Count Móric; Wesselényi, Baron Miklós Jr.**

**Drum** – One of the oldest musical instruments. In shamanistic belief, it is the symbol of the universe; it has also preserved its religious role in the ancient world. P. Benoit, a French chronicler, mentioned Hungarian drums in his description of the emissaries of the Hungarian King László V (Ladislav, 1453-1457), sent to the court of Charles VII, King of France in 1457. In the 18th century, its artistic playing was fashionable and popular, especially at drum-playing competitions, organized in princely courts. The most popular variations on the drum included the big drum, small drum, snare drum and the tambourine. The drum is the magic instrument of the magic steed of Hungarian folk

beliefs. – B: 1197, 1078, T: 7684.→**László V, King.**

**Dsida, Jenő** (Eugene) (Szatmárnémeti, now Satu-Mare, Romania, 17 May 1907 -

Kolozsvár, now Cluj-Napoca, Romania, 7 June 1938) – Hungarian poet in Transylvania (*Erdély*, now in Romania). He read Law at the University of Kolozsvár and worked as a lawyer in Szatmár and Kolozsvár. He was Editor of the journal, *Herdsman's Campfire* (*Pásztorúz*) (1927-1937) and the *Eastern Newspaper* (*Keleti Újság*) from 1935. He was secretary of the PEN Club's Hungarian section in Romania. He held great promise for Transylvanian Hungarian literature, but it died prematurely. His poetry, besides being *avant-garde*, is written in fine style and classical form. He stood by the scattered Hungarian nation caused by the Trianon Peace dictate (1920), appealing for national unity, high morals and Christian faith. His works

include *Peeking Solitude* (*Leselkedő magány*) (1928); *Hungarian Caravan Across Italy* (*Magyar Karaván Itálián keresztül*) (1933); *Maundy Thursday* (*Nagycsütörtök*) (1933); *On the Zither of Angels* (*Angyalok citeráján*) (1938); *Psalmus Hungaricus* (1940); *Selected Poems* (*Válogatott Versek*) (1958), and *Gold with the Blue Words* (*Arany a kék szavakkal*), selection (1965). He also made excellent translations of Latin, Italian, German, French and Romanian poetry. – B: 0883, 1257, T: 7103.→**Trianon Peace Treaty.**

**Dual Conquest** (of the Carpathian Basin) by the Magyars→**Dual, Successive, Hungarian Settlements; László, Gyula.**

**Dual kingship** – There were two forms of this. (1) A ruling system in which, beside the “sacred king”, the crown prince, i.e. the younger king exercises the executive power. Among the early Hungarians, this system developed out of the organization of the extended families, where it survived for a considerable time. (2) The situation that developed in Hungary after the death of King Lajos (Louis) II (1516-1526), at the disastrous defeat of Hungary by the Ottoman Turks at Mohács, after which, on 10 November 1526, at Székesfehérvár, the Hungarian Diet unanimously elected János (John) Szapolyai King of Hungary, while those nobles who supported the Austrian (Habsburg) connection, on 16 December 1526, at Pozsony (now Bratislava, Slovakia), chose Prince Ferdinand to be King of Hungary (1526-1564). This led to the division of the country into three parts: Ferdinand ruling over the Austrian (Habsburg) western part, Szapolyai as Voivode of Transylvania ruling over the eastern part, and the large middle part occupied by the Turks under Sultan Soliman. – B: 1188, 0883, T 7665.→**Mohács Battles; Lajos (Louis) II, King; János (John) I, King.**

**Dual Leadership** – A governing system, originating from the dual worship of the sun and the moon, was common among the equestrian cultures of the eastern steppes, especially among the Turkish Kazars and the Magyars. When the Magyars settled in the Carpathian Basin, beside the khagan (ruling prince), called *kende*, there was another khagan (leader), the *gyula*, who was responsible for military affairs. At the time of the Carpathian conquest, Kurszán was the main ruler; but when he died in 904, Árpád,

holding the position of the *gyula*, effectively abolished the system of dual leadership by claiming the powers of the reigning prince as well. – B: 1153, 1136, T: 7665.

**Dualism** – An agreement of two states to govern in union. It is also an alliance between two mutually independent, sovereign states to recognize a single monarch as their head of state and synchronize politics in foreign affairs. This was the relationship between Austria and Hungary from 1867 until 1918, known as the Austro-Hungarian Monarchy. The practical details were spelled out in the *Compromise (Kiegyezés)* in 1867. The internal affairs were separate, but the monarch was the same; and external affairs, the army and finances were subjects of common rule. – B: 1153, T: 3233.→**Ferenc József, Emperor and King; Károly IV, Emperor and King.**

**Dual, Successive Magyar Settlements in the Carpathian Basin** – Results of the latest research seem to indicate that the conquest and settlement by the Magyars in the Carpathian Basin did not only occur between 895-900, as it is currently accepted by Hungarian historians. It appears that there were several waves of earlier settlements. Around 670-680, groups related to the Magyars already appeared in the Carpathian Basin, according to archeologist, Gyula (Julius) László. On the basis of the belt buckles used by them, historians classified these groups as the “Griffin motif” people. These ethnic groups might also have spoken the Magyar language and could be identified with the late Khazars. According to several written sources, organized Hungarian life existed in northern Hungary (Upland, *Felvidék*, now Slovakia) before Árpád's arrival. For example, in 826, Pope Eugene II wrote a letter to the “Prince of the Christian Magyars”, calling upon him to build churches in his territory. (Eugene P. ad Chag. Ann. 826). In 863, the Christian chronicles stated that: “*all of the Huns have been converted*”. Between 872 and 882, Pope John VIII repeatedly wrote to the “Prince of the Christian Magyars”, exhorting him to build churches. According to latest research, it is likely that, prior to the dual settlements described above, there might have been two previous waves arriving in the Carpathian Basin. (i) Around 500 BC the Scythian-Agatirz wave could possibly have included some “proto-Magyar” tribes (Tárh-i Üngürüsz). (ii) The second wave is connected with the Várkonyis (Uar-Huns, Varchonites), who arrived with the Avars in 568 AD and occupied all of the Carpathian Basin. (iii) The third wave around 670 could have been made up by the “early Magyars” (late Avars) arriving from the Kama River region; (iv) and the Árpád-led settlement in 895-900 could be considered the fourth and final wave. However, due to the lack of sufficient proofs, the idea of the successive Hungarian settlements remains a theory. Similarly, the arrival of the first wave around 500 BC and that of the second around 568 AD remain only the combined theory of several researchers, based on inconclusive evidence. Moreover, even 896, officially regarded as the date for the last settlement, is not universally accepted, for the *Chronica Hungarorum*, a.k.a. *the Budai Krónika* (Chronicle of Buda, ca. 1472) and the *Annales Posoniensis*, i.e. *the Pozsonyi Évkönyv* (Yearbook of Pozsony, now Bratislava, Slovakia, ca. 14th century) place it to 888, while *Regino*, Abbot of Prüm of Lotharingia (893-899) puts it to 889, and *Anonymus* the chronicler in his *Gesta Hungarorum*, written between 1196 and 1203, dates it to 884, the departure from Scythia, though these dates may not be reliably accurate. In the British Museum, there is a “description of lands” called the *Orosin Document*, written in the 9th century in Old English and Celtic. In this document, two Norman sailors, *Othere* and *Wulfstan* gave an account of their travels on the River Ister (the River Danube) around 870. In their description, they state that “*Maegtis Lande*”

(Maegtja country) *is located north of Croatia and is surrounded by huge mountains.*” They also mention in their account the “Seacel” (Szeklers-Székelys), one of the original Magyar tribes settling in the Carpathian Basin. Recently, Professor *Mario Alieni* in his book *Etrusco: Una forma archaica di ungherese* (2003); in Hungarian: *Ósi kapocs – Az Eruszk-Magyar nyelvrokonság (An Ancient Connection – The Etruscan-Hungarian Linguistic Relationship)* (Budapest, 2005), with linguistic methods, he propounds a “continuity-theory”, whereby the Etruscans as well as the proto-Magyars migrated into the Carpathian Basin in the 3rd century B.C. during the so-called Kurgan-migration period, arriving in Europe from the Steppes north of the Black Sea. More and more Hungarian and foreign historians refer to the successive waves of Magyar settlements as the “re-settlement of the homeland”, thus suggesting an earlier movement of people from the East to the West, and proposing that the original homeland of the Hungarians was in the Carpathian Basin. – B: 1153, 1231, 1395, 7617, T: 7665.→**Anonymus; László, Gyula; Tárih-i-Üngürüsz; Etruscan-Hungarian Linguistic Relationship**

**Duba, Gyula** (Julius) (Hontfüzesgyarmat, now Hontianska Vrbica, Slovakia, 8 June 1930 - ) – Writer. Between 1940 and 1944, he studied at the State High School of Léva (now Levice, Slovakia), and then from 1950 to 1954 he continued and completed his studies in the special Mechanical Engineering High School of Kassa (now Košice, Slovakia). From 1954 to 1957, he was a student at the Technical College of Pozsony (now Bratislava, Slovakia). From 1957 to 1959, he was in compulsory military service. Between 1959 and 1968, he was Editor for the journal, *Week (Hét)*; from 1968 to 1983, he was Editor-in-Chief for *Literary Review (Irodalmi Szemle)*, then from 1983 to 1989, he was Head of the Literature Section of *Madách Publishers (Madách Kiadó)*. Since 1990, he is on sabbatical leave. Since 1960, he is a member of the Slovakian Writers’ Association. His main theme is the life and vicissitudes of Hungarians in Slovakia. He is well known for his prose writings, satires, essays, critiques, books, and newspaper articles in the journals: *Week (Hét)*, *Woman (Nő)*, and in the *Literary Review (Irodalmi Szemle)*. His works include *The Laughing Man (A nevető ember)* (1959); *Jump Into the Void (Ugrás a semmibe)* (1971); *Reality and Awareness of Life (Valóság és életérzés)* (1972); *Drought (Aszály)* novel (1989); *Dying Peasant World (Halódó parasztvilág)* novel (2001), and the *Bowing Branch of Life (Az élet lehajló ága)*, novel (2006). He was awarded a number of distinctions including the Madách Prize (fourth time in 1982), the Ethnic Prize (1972), the Merited Artist title (1983), the Order of the Star of the Republic of Hungary (1990), the Posonium Life-Achievement Prize (1991), the Zoltán Szabó Prize (2002), the Attila József Prize (2004), and the Alfonz Talamon Prize (2008). – B: 1083, 0878, 1257, 1890, T: 7456.

**Dubnic Chronicle** – A Chronicle prepared at Nagyvárad (now Oradea, Romania) in the 15th century, which was found later in Dubnic, County Trencsén in Northern Hungary (Upland, *Felvidék*, now Slovakia), hence its name. It was written from 1479 on, and follows mostly the Chronicle of Buda and the Hungarian Illuminated Chronicle (*Chronica de Gestis Hungarorum* – 1473). After having adopted the material of Márk Kálti’s Chronicle, it took over the life-story of King Lajos I (Louis the Great, 1342-1382) written by János (John) Apród Tótsolymosi; it ends with the reign of King Mátyás I (Matthias Corvinus, 1458-1490). – B: 0942, 1078, T: 3240.→**Buda Chronicle; Illuminated Chronicle.**

**Ducat** (*Dukát*) – Gold coin, a universal currency in the Middle Ages. Its name comes from the last word of the circular legend, minted since 1284, on the Venetian zecchino: “*Sit tibi Xte (Christe) datus quem tu regis iste ducatus*”. Following this example, almost all European countries minted ducats, but the weight varied. In Hungary, ducat minting started in the 13th century, depicting the image of King Szent László (St. Ladislav, 1077-1095). Its weight was 3.5 grams. Because of its good quality it was much sought after all over Europe. Austria stopped minting the gold coin at Körmöc in 1865 (now Kremnička, Slovakia). – B: 1138, T: 7680.

**Dudás, Antal** (Anthony) (Kupuszina, now Kupusina, former Yugoslavia, now Serbia, 26 January 1933 - ) – Painter, graphic artist, historian, living in Serbia. He completed his studies at the Teachers Training School, Újvidék (now Novi-Sad, then Yugoslavia) in 1958. He lived in several artist colonies such as Bácsstopolya, Becse and Zenta. (now Bačka Topola, Becej, Senta, in Serbia respectively). He visited a number of countries on study trips, among them Hungary, Austria, Germany, Belgium, Egypt, Greece and the Soviet Union. His works include *Nightfall at Kupuszina (Kupuszina alkonyat)*; *Village Icons (Falusi ikonok)*; *Flown Away Time (Elszállt idő)*; *Palics Icons (Palicsi ikonok)*, and *Hungarian Icons (Magyar ikonok)*. He had more than forty exhibitions. – B: 0936, 1138, T: 7103.

**Dugonics, András** (Andrew) (Szeged, 18 October 1740 - Szeged, 26 July 1818) – Piarist monk, writer. He entered the Piarist Order in 1756; studied and later taught in Nyitra (now Nitra, Slovakia), Nagyvárad (now Carei, Romania), Szeged, Vác and Medgyes (now Medias, Romania). His first work was published in 1774, and in the same year he was appointed university professor at Nagyszombat (now Trnava, Slovakia). Subsequently, he moved with the University at first to Buda, then to Pest. In 1784, reacting to Emperor József (Joseph) II's Germanization, he published an important work on Hungarian technical terms related to mathematics and physics. By teaching in Hungarian and Latin, he refused to recognize the Imperial Language Law. He wrote a number of novels and plays and was the favorite author of high society. He diligently studied the folk language, gathered many sayings, which was published posthumously. His works include *Ethel (Etelka)* (1788, 1791, 1805); *Stories of Rome (Római történetek)* (1800); *Famous Army Leaders (Nevezetes Hadi Vezérek)* (1817), and *Mária Báthori*, drama (was on the bill for several decades) (1881, 1887), – B: 0883, 1257, T: 3240.→**József II, King; Apáczai Csere, János; Geleji Katona, István; Language reform; Kazinczy, Ferenc.**

**Dugonics, Titusz** – National hero. He was a soldier in János (John) Hunyadi's army. He

fought in the battle of Várna in 1444. During the siege of Nándorfehérvár, Hungary (now Belgrade, Serbia) by the Turks, he was one of the defenders. When a Turkish soldier managed to climb the defense tower and was ready to pin his horsehair banner on top of it, he wrestled with him without success. Since there was no other way to prevent the Turkish sign of victory from being pinned on the tower, he grabbed the Turk and hurled himself with him into the abyss. In recognition of his heroism, his son received the village of Tejfalu (now Miliečno,

Slovakia) in the vicinity of Pozsony (now Bratislava, Slovakia) from King Mátyás I (Matthias Corvinus, 1458-1490). – B: 0883, 1031, T: 3233.→**Nándofehérvár, Battle of; Hunyadi, János; Mátyás I, King; Wagner, Sándor.**

**Dukai Takách, Judit** (Takács) (Duka, 9 August 1795 - Sopron, 16 April 1836) – Poetess. She came from an untitled noble family. She attended school in Sopron from 1811, studied languages, music. She became acquainted with a number of writers, among them Gábor (Gabriel) Döbrentei. She started writing poems under the pen name Matild. Her poems were copied by hand, and from 1815, appeared in a number of journals. Her relative, the poet Dániel Berzsenyi, influenced her. Her poem, *The Grieving Widow* (*A kesergő özvegy*) appeared in 1815, in Pest. Norbert Vadász published her works and biography (1909). – B: 0883, 1257, T: 7103.→**Döbrentei, Gábor; Berzsenyi, Dániel.**

**Dukas, Mihály** (Michael VII Doukas or Ducas) – Byzantine emperor, son of Emperor Constantin X. He reigned between 1071 and 1078 as Michael VII. He had good relations with Hungary and supported King Géza I against the rival King Salamon of Hungary and sent him a crown in 1074. – B: 0942, 1138 T: 7662.→**Géza I, King; Salamon, King.**

**Duka-Zólyomi, Árpád** (Pozsony, now Bratislava, Slovakia, 8 May 1941 - ) – Politician, nuclear physicist. His father was imprisoned for eight years for his activities among the Hungarian ethnic minority. His primary education was in his birthplace; he graduated at the High School of Galánta (now Galanta, Slovakia) in 1958. Then he worked as a laborer in 1959-1960. He was conscripted into the army in 1961-1962. His higher studies were at the University of Prague between 1962 and 1968. He was an assistant professor at the University of Pozsony from 1968 to 1976. From 1976 to 1989, he worked as Scientific Chief Contributor at the United Nuclear Research Institute of Dubna, Soviet Union. More than sixty of his papers appeared internationally. From 1965, he was involved in Hungarian cultural affairs. He was President of the Endre Ady Student Circle in Prague, and one of the prominent leaders of the *Czechoslovakian Hungarian Social and Cultural Alliance* (*Csehszlovákiai Magyarok Sociális és Kulturális Szövetsége* – *CSEMADOK*). In 1990, he was an initiator of the Living Together Movement. Since 1992, he has been a Member of Parliament, representing the Hungarian Coalition Party, and is also its fraction leader. In 1994, he was elected a Member of the European Parliament. – B: 1083, T: 7103.

**Dukedom** – A realm governed by a duke or a person of royal birth. The subdivision of the royal power was customary in Hungary during the reign of the Árpád Dynasty. The King entrusted approximately one third of his realm to his brother, son, or close relative, investing him (dux-prince) with royal power. István-Géza (Stephen-Geza) (991-997), prince/king, appointed Koppány. King András I (Andrew) (1046-1060) bestowed dukedom for the first time on Béla, followed by Géza and later by László (Ladislav) as princes. King Géza I (1074-1077) bestowed dukedom on László, who as King László I (St. Ladislav) (1077-1095) bestowed dukedom on Lampert, and for the last time, King Kálmán (Coloman) (1095-1116) bestowed a dukedom to Prince Álmos. The exercise of royal power by a prince came to an end after 1105. – B: 1153, T: 3233.→**András I, King; Géza I, King; László I (St Ladislav), King; Kálmán, King.**

**Dulcimer** (*cimbalom*) – A musical instrument, with strings of graduated length over a sounding board struck with delicate wood-hammers; the prototype of the piano. It originates from Asia. Its predecessor was the zither. The palmetto-decorated silver

bracelet of Riazan is decorated with a *vitéz* (hero) playing on a trapezoid-shaped zither. According to Hungarian sources, it first appeared in the 15th century. In the 16th century, the students used it extensively to accompany singing. By the 17th century, it was used for dance music as well. By the beginning of the 18th century, it was a favorite instrument of Gypsy bands. The old dulcimer was portable, played by placing it either on a table or on one's knees. Today it is generally known as a pedal dulcimer, standing on legs. Its sound can be toned down with muting, an invention of József (Joseph) Schunda (1818-1894) and his brother, Vencel József Schunda (1845-1923). Their worksop produced the first pedaled Hungarian Concert Cimbalom in 1874. This variety was able to compete with the best pianos. The cimbalom soon became popular in the Austro-Hungarian Monarchy and beyond. In Hungary its greatest master was Aladár Rác (1886-1987). – B: 1197, 0942, T: 7684. → **Rác, Aladár.**

**Dunántúl** (*Transdanubia*) – The western part of Trunkated Hungary, enclosed by the River Danube in the north and east, Austria in the west and the River Dráva and Croatia in the south. It has a variable, hilly terrain dominated by the Bakony Mountain and Lake Balaton at its center. The early Hungarians established their cultural and administrative centers in the towns of Székesfehérvár, Esztergom and Pannonhalma. During Roman times the region was known as *Pannonia*. After the Turkish occupation, its southern and central areas were devastated. Eventually, German farmers settled in many of its districts. After World War II, many Hungarians settled here when expelled from their ancestral land in the southern part of present day Slovakia, and some settlers came from Moldavia. – B: 1134, T: 7656. → **Benes Decrees; Atrocities against Hungarians.**

**Dupka, György** (George) (Tiszabökény, now Bobove, Sub-Carpathia, Ukraine, 11 April 1952 - ) – Writer, poet. His higher studies were at the State University of Ungvár (now Uzhgorod, Ukraine), where he read Hungarian Literature. For a while, he worked in a bakery in Tiszaújlak (now Vilok, Ukraine). From 1970, he was a conscript in the Soviet Army for three years. (From 1945 to 1993, Sub-Carpathia belonged to the Soviet Union by virtue of occupation. After its dissolution, this Hungarian region of 1000 years was simply inherited by the Ukraine. It had never belonged to her before). From 1979 to 1986, he was a contributor to the daily *Carpathian True Word* (*Kárpáti Igaz Szó*). From 1992, he was Manager of *Intermix Publishers*. From 1981 on, he participated in the work of a number of professional, learned and social societies. He was Editor for the *Carpathian Economic Review* (*Kárpáti Gazdasági Szemle*), and the *Carpathian Hungarian Chronicle* (*Kárpáti Magyar Krónika*). His main works include *Common Fate* (*Sorsközösség*) sociography, with others (1990); *I was Born for Spring* (*Tavasza születtem*) poems (1990); *This then, is the Homeland... Facts, Data, Documents from the Life of Hungarians of Sub-Carpathia 1918-1991* (*Ez hát a hon... tények, adatok, dokumentumok a kárpátaljai magyarság életéből 1918-1991*) with József Botlik (1991); *Praying to God... Verse-letters, Prayers from Stalin's Camps 1944-1957* (*Istenhez fohászokodva... Verses levelek, imák a sztálini lágerekből, 1944-1957*) (1992); *Their Only Sin Was: They Were Hungarians. Memorial Book on the Sub-Carpathian Victims of Stalinism 1944-1946* (*Egyetlen bűnük magyarságuk volt. Emlékkönyv a sztálinizmus kárpátaljai áldozatairól 1944-1946*) (1993); *The "malenykij robot" in Documents* (*A „málenkij robot” dokumentumokban*), with A. Korszun (1998), *Hungarian GULAG-Lexicon of Sub-Carpathia* (*Kárpátaljai magyar GULAG-lexikon*) (1999), and *Hungarians of Sub-Carpathia* (*Kárpátalja magyarsága*) (2000). He was awarded the Berzsényi Prize

(1993), the Imre Nagy memorial plaquette (1995), and is honorary citizen of Tiszabökény (2000). – B: 0874, 0878, 1257, T: 7103.→**Atrocities against Hungarians.**

**Duray, Miklós** (Nicholas) (Losonc, now Lučenec, Slovakia, 18 July 1945 - ) – Hungarian writer, geologist, politician of Northern Hungary (*Felvidék*, now Slovakia). He was educated in Fülek (now Fil’akovo, Slovakia). After his graduation he became a dockworker. In 1963 he entered the Comenius University in Pozsony (now Bratislava, Slovakia) and completed his studies in Natural Sciences in 1967. With a Degree in Geochemistry he found a position as a geologist. He soon became involved in the protection of ethnic Hungarian rights in Czechoslovakia. During his university years he organized the Attila József Youth Club; he was also its President between 1966 and 1969. In 1968-1969, he founded the Hungarian Youth Association, subsequently counting 20 thousand members. The Czechoslovak government officially banned this organization. Between 1966 and 1970, he was on the board of *CSEMADOK* (Czechoslovak Hungarian Workers’ Cultural Alliance – *Csehszlovák Magyar Dolgozók Kulturális Szövetsége*) but the Czechoslovak Government dismissed him. In 1977, he organized a club network for Hungarian intellectuals, while in 1978 he set up the Committee of Legal Protection for the Hungarian Minority of Czechoslovakia. On 3 June 1982 he was arrested, faced legal proceedings, but was freed on 23 February 1983, by pressure of the international Hungarian community. He was arrested again on 10 May 1984, and detained without sentence for 470 days; but was freed again on the pressure of the international community. He was invited for a year in 1988 to Indiana University of Pennsylvania. After the “velvet revolution” in Czechoslovakia in March 1990, he participated in its political life. He was a member of the Federal Parliament (1990-1992). From 1994 he has been Acting President of the *Hungarian Coalition Party* (*Magyar Koalíció Pártja – MKP*) and its representative in the Slovak Parliament. In the 2010 election the MKP failed to re-enter the Parliament and he resigned from politics and considered academic career in Hungary. He is founding president of the *Living Together* (*Együttélés*) political alliance. He was a presidium member of the *World Federation of Hungarians* (*Magyarok Világszövetsége*) (1992-2000). A portrait film of Duray was created by Gábor (Gabriel) Koltay in 2011. He wrote several books and his articles were published in numerous newspapers. First, he wrote juvenile books. His major works include *Slovakian Report on the Status of the Hungarian Minority* (*Szlovákiai jelentés a magyar kisebbség állapotáról*), (Paris, 1982); *Tight Corner* (*Kutyaszorító*) biography (1983, 1989); *Under Double Oppression* (*Kettős elnyomásban*), *Documents on the Situation of Hungarians in Czechoslovakia and their Legal Defense, 1978-1982*, (Samizdat, New York, 1988); *The Nation-State and its Democratic Remedy* (*A nemzetállam és demokratikus ellenszere*), co-author (1994); *Our Attempts for Autonomy* (*Önrendelkezési kísérleteink*) (1999), and *On the Threshold of Changes* (*Változások küszöbén*) (2000). He won a number of awards, among them the Prize of the Körösi Csoma Center, Tokyo (1986), the Ius Humana Prize, Munich-Buffalo (1992), the László Tőkés Prize, Kisvárdá (1996), the Hungarian Heritage Prize, Budapest, (2000), the Great Cross of Order of Merit of Republic of Hungary (2001), the Prize For Hungarian Art, Budapest (2002), and the Szent István Prize (2003). – B: 1246, 0878, 1020, 1031, 1890, T: 3240.→**Vienna Award I; Benes Decrees; Atrocities against Hungarians; Koltay, Gábor.**

**Durchpetzen** – A German surgical expression in use since 1921. This surgical technique is used during intestine and stomach suturing by application of a special mechanism. The

use of this technique was named after its Hungarian inventor Aladár Petz. – B: 1226, T: 3233.→**Petz, Aladár.**

**Dürer, Albrecht** (a.k.a. Ajtósi-Dürer) (Nuremberg, Germany, 21 May 1471 - Nuremberg 6 April 1528) – Most famous German painter of Hungarian descent. His father, Albert Száraz, a goldsmith, came from Ajtós near Gyula, the town that was ruined during the Turkish occupation. After traveling for a long time, he finally settled in Germany in the town of Nuremberg. He married his master's daughter, Barbara Holper, and at that time he changed his name to Thürer, meaning *Ajtós* (*Door*) in German, which became Dürer. Their second child, Albrecht at first worked in his father's goldsmith shop, and already at a very young age, he showed his remarkable talent. His father sent him to an art school in 1486, where he learned to paint. In 1490 he went on a journey and lived for a long time in Basel, Switzerland and in Italy. In 1495 he returned home and in 1497 he opened his own workshop. He went for two years to Venice and, after coming back, he worked hard to obtain a settlement of an annuity from Emperor Maximilian I in 1512, for whom he was working. He went to Antwerp to study more art and, after his return to Nuremberg he became interested in the newly started Reformation movement. He died at the peak of his career at the age of 57. Dürer was one of the most recognized artists in the universal history of art. He worked in various genres and painted portraits, a self-portrait, icons and altars. His numerous paintings include *Adoration of the Magi*, *Feast of Rose Garlands*, *Christ Crucified*, *Charles the Great*, *The Four Apostles*. He also did a series of woodcuts and copper engravings such as *Adam and Eve*, *Prodigal Son*, *Apocalypse*, *Erasmus* and *Melanchton*. In his signature the "A" does not stand for Albrecht, but for Ajtósi. (See: Marcel Brion, *Dürer – Der Mensch und Sein Werk* (*Dürer – The Man and his Work*, Paris, 1960). The great figures of the Reformation were among his friends. He also wrote professional and technical books. He united the Gothic traditions of the North with the achievements of the Italians. – B: 0942, 1153, T: 7653.

**Durkó, Zsolt** (Szeged, 10 April 1934 - Budapest 2 April 1997) – Composer. He studied at the Ferenc (Franz) Liszt Academy of Music, Budapest, and also in Rome. His music is both modern and Hungarian, traditional and new. He left behind a rich body of work including chamber and symphonic works, vocal and solo instrument pieces. His music was well received in Hungary and at international festivals in Rome, Montreal, Budapest, Paris and Salzburg. Some of his works are: *Moses*, music drama (1997); *Cantatas and Oratorios No. I-II* (1971, 1972); *Széchenyi* (1982); *To the Margin of the Book of Revelation* (*A Jelenések könyve margójára*) (1996); for orchestra: *Episodes on the Theme of B-A-C-H* (*Epizódok B-A-C-H témára*) (1963); *Piano Concerto* (*Zongora verseny*) (1981); *Violin Concerto* (*Hegedű verseny*) (1993); solo pieces *Assonanze* (for organ) (1972), and *The History of the Globe* (*A Föld története*) (60 pieces for piano) (1991). He was awarded the Kossuth Prize (1978), the Merited Artist title (1983), the Béla Bartók-Ditta Pásztory Prize, (1985, 1997), the Outstanding Artist title (1987) and the László Lajtha Prize (1997). – B: 1040, 1178, T: 7103.

**Duska, László** (Ladislav) *vitész* (Bártfa, 6 February 1912 – Cleveland, USA, 1 October 1987). Military officer, civil engineer and organizer of Hungarian communities. Graduated from the Ludovika Military Academy, and from 1934, served as an army officer, later as general staff captain. He took part in the take-over of the southern part of the Northern Hungary (*Felvidék*, Upland now Slovakia) and northern Transylvania (now

in Romania); he also participated in the Southland (*Délvidék*) campaign against Yugoslavia. Duska was also fighting on the Russian front in World War II. In 1943 he cut through an enemy encirclement with his unit, thereby saving a larger unit from encirclement. In the fighting he was wounded. After the war he emigrated to Canada and from 1949 he settled in Calgary, where in 1953 he joined the reorganization of the *Order of Vitéz* (title awarded for gallantry in World War II). In 1954 he was president of the Saint Emeric Roman Catholic Parish. In 1960 he started to organize the Saint László Society; in 1965 he established the Széchenyi Society and organized the Hungarian section of the Toronto University Library, and also launching the foundation chair of Hungarian Studies. In 1979 he started, and from 1982 he edited the illustrated paper *Fraternal News (Bajtársi Híradó)*, while in 1986 he re-published the book *Hungarian Helicon* by Watson Kirkconnel. He was an outstanding leader of western émigré Hungarian life. In Canada he obtained "P.F. engineering" training; in the field of oil he was engaged in scientific research work. His study dealing with gravitational problems was requisitioned by 18 research institutes. He was consultant to the *Encyclopedia Hungarica*. For his military exploits he was presented with the Hungarian Officer's Gold Bravery Medal with military decoration and swords, also other Hungarian and foreign honors. – B: 1031, 1020, T: 7456.→**Ludovika Royal Hungarian Military Academy; Vitéz, Order of; Veterans.**

**Dutka, Ákos** (Nagyvárad, now Oradea, Romania, 11 September 1881 - Máriaremete, 27 December 1972) – Poet, journalist. His first poems were published in the volume, *Confessions (Vallomások)*, in the city of Nagyvárad (1904), where his operetta, *The Airship Flyers (A léghajósok)* was produced. In 1905, he emigrated to the United States, and traveled throughout Europe. In 1906 he returned to Nagyvárad, befriended the poet Endre Ady, and together they took part in the activities of the *Tomorrow Society (Holnap Társaság)*. During this time, his writings appeared in the *Tomorrow (Holnap)* anthology. Through his writings, he joined the ranks of the radical thinkers, who were attempting to regenerate the style of writing Hungarian poetry. His poetry showed impressionistic and symbolistic influences. After World War I, he moved to Budapest, where he served as press spokesman for the Ministry of External Affairs from 1919 to 1940. In 1939 he became Editor-in-Chief for the newspaper *Recent News (Friss Újság)*. He moved to the countryside after 1945, and did not publish again until 1955. As one of the veterans of the Ady-generation, he told the romantic story of the *Holnap Circle* in *The City of Tomorrow (A holnap városa)*. In his other book, *The Great Adventure (A nagy kaland)*, he related his travels in the USA, and the life of the immigrant Hungarians in America *In the Storm of Half a Century (Félévszázad viharában)* poems (1957); *Ballad of Old Age (A vénség balladája)* poems (1965), and the *Neglected Tunes (Kallódó dallamok)*, poems (1970). – B: 0883, 0878, 1257, T: 6717.→**Ady, Endre; Miklós, Jutka.**

**Dynamo** – An electrical rotating machine that converts mechanical energy into electrical energy, introduced along its axle on its armature. The physicist and Benedictine monk, Ányos Jedlik invented it in 1861. – B: 1226, 1153, T: 7456.→**Jedlik, Ányos.**

## E

**Early Christian Apostolic Church** – A Protestant-type religious community, organized into a church under the influence of Pentecostal movements in the 1940's. They believe in the second coming of Christ and the thousand-year realm of peace. They emphasize apostolic succession by consecrating through the laying on hands. According to them the Holy Spirit leads the Church. A strict Puritanism characterizes their way of life. They number about 2000 members in Hungary. – B: 1042, T: 7390.

**Early Christian Church Buildings** – The oldest of these church buildings in Hungary date mostly from the era of the Árpád Dynasty (1000-1301). One hundred years after the Hungarians settled in the Carpathian Basin they were converted to Christianity by their

first King István I (St Stephen, 997-1038), who ordered the construction of churches. These churches are in Feldebrő (RC), Gerény (RC), Karcsa (Ref), Kiszombor (RC) and Tárnaszentmária (RC). The earliest of them were built in Romanesque style with specialized architectural features, such as in Csengersima (Ref) and Csaroda (Ref). There are the round churches with six-angled interior in Gerény (RC), Karcsa (Ref) and Kiszombor (RC). There is a Gothic church at Nyírbátor

(Ref) from a later period. Others have Gothic frescoes in Gerény (RC), Csaroda (Ref), Ófehértó (RC), Nyíracsad (Ref), Nyírbétek (RC). There are wooden bell towers for Reformed churches in Nyírbátor (Ref), Nagyszekeres (Ref) and Csetfalva (Ref). There are churches with coffered wooden ceilings with old Hungarian motifs in Csenger (Ref), Csengersima (Ref), Gyügye (Ref), Tákos (Ref), Gacsály (Ref) and Csetfalva (Ref). There are rich frescos in the churches of Siklós and Cserkút. A famous Madonna statue is in the church of Andocs (RC). There is a fresco with a tree of life motif in the church of Kiszombor (RC). Many of these churches are still in use today and are witnesses to early Hungarian culture. – B: 1294, T: 7103. → **Fortress Churches.**

**Earth Fortifications (Földvárak)** – The existence of earth fortifications goes back to earliest historic times. Ring (circular) earthen mounds, constructed by the Avars are the most noteworthy. These forts were in use during the rule of the Árpád Dynasty (1000-1301). Archeological excavations exposed the remains of many earthen fortifications. The one at Várhely by the town of Sopron, and the one at Óvár near the town of Tihany, both in Transdanubia (*Dunántúl*), are the best-known examples in Hungary. Earthen forts were called “pagan forts” in old Hungarian vernacular. – B: 1138, 1020, T:

7663.→**Avars; Árpád.**

**Easter** (*Húsvét*) – A Christian religious festival, commemorating the Resurrection of Jesus Christ, Son of God. Prior to A.D. 325, Easter was celebrated on different days of the year. The Council of Nicaea (325) issued the Easter Rule stating that Easter shall be celebrated on the first Sunday that occurs after the first full moon on or after the vernal equinox. This is always on March 21. Hence Easter became a “movable” feast that can occur as early as March 22 or as late as April 25. The observance of Easter became general in the Christian world by the 8th century. The Christian celebration of Easter embodies a number of converging traditions with emphasis on the relation of Easter to the Jewish festival of Passover or Pesach. The Eastern Churches observe Easter according to the date of the Passover festival. Apart from the Christian celebration of Easter, it has many customs and legends of pagan origin that have nothing to do with Christianity. It also signified spring and fertility, whose festival was celebrated on the day of the vernal equinox. Traditions associated with the festival survive in the Easter rabbit, a symbol of fertility, and in colored Easter eggs, originally painted with bright colors to represent the sunlight of spring. – B: 1291, T: 1248, 7103.→**Easter Egg; Easter Play; Easter Tradition in Hungary.**

**Easter Egg** – A painted, inscribed or dyed egg given as a present on Easter Monday, either as a reward or symbol of renewal of life. This custom originally was connected to the spring solstice and was the symbol of fertility and rebirth. From ancient times it was always part of the spring festivities. The Egyptians, Persians, Chinese, Turanians, the ancient German and Slavic peoples all used the egg as a gift. Eggs, as symbols of the Earth’s fertility, were found in the Avar graves and also in the burial sites of people from more southerly areas. This symbol was taken over by Christianity and it became an attribute of Jesus. The Easter egg, as a richly ornamented present, was dyed, etched or painted. Some of the decorative elements of the Easter egg were part of ancient findings. One of these is the isosceles cross, symbolizing the sun. The decorated Easter eggs were popular mostly in Eastern Europe. The batik technique is the preferred way of egg decoration in Hungary. The motives are drawn on the egg with warm wax by a hollow metal or feather instrument; then the egg is dipped into some dye. If several colors are needed, the area of the lighter ones is first covered with wax, then dyed repeatedly. When the hardened wax is removed, the colorless lines become visible. Until the arrival of the aniline dyes, natural dyes were used. In Hungary, red was the favorite color for eggs, extracted from the red dyewood. Nowadays Easter eggs are customary gifts for children all over Europe. – B: 1078, 1134, 1245, T: 3240.→**Easter; Easter Plays; Easter Traditions in Hungary.**

**Easter Plays** – Religious plays dating from the Middle Ages. They are the cores of modern dramas; their origins reach back to the 10th century. They had developed from church services, when it was fashionable for the priests to put on costumes and tell a relevant biblical story in Latin. Slowly this show moved out of the church into the churchyard and the spectators became more and more involved in them. In time they became lay plays. Instead of Latin they were staged in the vernacular. More and more comic elements were introduced and played out by “pomade merchants, beer drinking soldiers, Jews and the Devil”. The oldest texts of these plays are found in the Swiss monastery of Muri, and their language mirrors the court and poetry of the age. The

contemporary Hungarian Easter plays or Passion plays did not develop on their own but out of the translation of German originals. – B: 1078, 1020, T: 3240.→**Easter; Easter Traditions in Hungary; Easter Egg.**

**Easter Traditions in Hungary** – Preparations for Easter start with the season of Lent that Hungarians call the Great Fast (*nagyböjt*). In olden days it was forbidden to eat any meat during Lent. The name of Easter means the Festival of Meat in Hungarian, (*Húsvét*), because on Easter Sunday meat can be eaten again after the 40 days of fast.

The Holy Week starts with Palm Sunday. In Hungary it was customary to bless not only branches of the willow tree in the absence of palm trees in the country, but also the various flowers of the season. Thus the name for Palm Sunday: “Flower Sunday” (*Virágvasárnap* in Hungarian) was adopted for the Sunday before Easter Sunday. Good Friday (*Nagypéntek*) is the most solemn day of the Holy Week. Catholics used to spend it in a total fast. By the time Good Friday had arrived the houses were cleaned, the baking completed and the eggs decorated, although in some places the eggs were decorated only on Good Friday. In the past, during Lent, eggs were not allowed to be eaten. Therefore, people collected a lot of eggs in the villages, decorated them and gave them away as gifts at Easter. In the feudal society the serfs had an obligation to send eggs to the landlord for Easter. Since ancient times the egg has been a symbol of rebirth symbolizing springtime. The egg decoration goes back to ancient times. The geometrical and flower pattern is widely used in Central and Eastern Europe. In Hungary, people of different regions worked out beautiful colors and patterns to decorate their eggs. In the evening of Holy Saturday (*Nagyszombat*) people gather in the church to participate in the Resurrection ceremonies.

There are many local customs connected with the celebration of the Resurrection. In town of Leszped, after the evening church service people arriving home greet each other with “Christ is resurrected” and they answer with “let us believe him”. At the Holy Saturday procession, the priest blesses the kneeling people. During the blessing, the people of Szeged Alsóváros (a suburb of the city of Szeged) say: “Jesus, Jesus, Jesus, Maria, Maria, Maria.” In the region of Kárpátmagyarország (Sub-Carpathia, now Ukraine), there is a custom of Easter field walking. In the past, people took the good news of the Resurrection to the fields, to avoid the natural disasters with the help of Jesus.

At the turn of the 19th century, young men in *Székelyföld* (*Szeklerland* or Transylvania, now in Romania) used to gather after supper on Holy Saturday around the church and select a leader among them called: “*főkirálybíró*” or “*dúló*” or “*biró*” or “*pap*” who led them in psalm singing. The leader said prayers to avoid any disaster and said a blessing. After the blessing, they walked on the streets, singing, and at the end of the procession, they went to the fields. The men cleansed the field with spring water to have good water during the year and to readjust the field marks. In the early morning hours, they also gathered some fresh green branches and decorated the doorstep of their sweethearts.

In the town of Zalaegerszeg (in western Transdanubia) the people and their priest went with the fieldwalkers to the end of the town. In the village of Karancsalj the girls and young women wore white dresses. It was customary to wear new clothes on Easter Sunday.

On Easter Sunday morning, Hungarians Catholics prepare a basket of food and take it to church, where the priest blesses it, and after High Mass they start to eat meat dishes

again. Smoked ham, boiled eggs and sweet bread (*kalács*) are still the festive breakfast staples for the day. There are many variations of the Easter meals. In the Göcsej region, the Easter basket contains ham, sweet bread, eggs and horseradish. The bitterness of the horseradish is a reminder of Jesus' sufferings. Some people put the food basket in the window for the angel to bless it. In County Zala, in the 19th century, the servants of the landlord, who lived far from the church, put the food for blessing in a sack and hung it on a tree at dawn on Easter Sunday.

In the town of Keszthely, people used to believe that if they dropped some blessed meat on the floor their pigs would be less fat. Long ago, the pork fat was very important for the diet of the hardworking people of the countryside. In the town of Felsőberkifalu, when they went home with the blessed food, first they stopped at the beehives and made the sign of the cross with the basket over the hives. The people of the town of Városdomb, after the Easter Sunday service, hurried home with the basket and did not stop on their way to talk to other people. The Ipolyfelsővidék region, (now in Slovakia), had a tradition that the newly married brides had to embroider a tablecloth for Easter Sunday's dinner. In County Szabolcs the Greek Catholics rushed home from church on Easter Sunday morning and did not talk to anybody, otherwise they would die in the same year. The people of German origin at the town of Budaörs (northwest of Budapest) used to roast a whole lamb for the Easter feast. The egg was a very important food and a symbol of rebirth. As a new life comes from the egg and Christ was resurrected from his grave, so the godparents sent that symbol of resurrection to their godchildren as Easter gifts. In the town of Városdomb, it was customary for the godparents to visit their godchildren and their parents at Easter time. In the Protestant village of Konyár, it was customary to put eggs in the ground, as they would sow the seeds. Some other places the egg was put into the seeding sack with the seeds. There was also a game with Easter eggs. Two people hit two eggs together and the one, whose egg did not break, was the winner. In the town of Istensegits it was called "*kosolás*", at Magyarozd "*töröközés*", and in the Moldva Csángó region "*csokkanás*", (Csángóland, now in Romania). It was important to eat horseradish, onion and salt to drive away evil spirits. The housewives used blessed salt for the bread dough too. In the towns of Göcsej and Sióagárd a piece of ham was hung in the chimney to avert fire. They did the same in Lesenceújfalú, but it was hung on a poorly producing fruit tree. At the villages of Vámosmiske, Zalavég and Búcsúszentlászló, the people preserve one blessed red colored egg in a glass. In the town of Versed, the people take a blessed egg to the grave of their beloved. People even preserved the morsels of the Easter bread, dried them and used them as ointment for wounds. In the town of Csicskefalva sometimes the bread was burned so that the animals could not eat it.

On Easter Sunday morning the children received small gifts, chocolate eggs and rabbits. They were supposed to believe that the Easter Bunny brought the gifts.

On Easter Monday, many people carry on the tradition of "sprinkling" (*locsolkodás*). The day provides for plenty of mischief. While once young men used to pour buckets of water over young women's head, today they spray them with perfume or just plain water. They were expected to recite a "sprinkling poem". Boys received a painted or a chocolate egg from the girls and the older boys were invited in for some sweets and drinks. The sprinkling was the main reason for egg decoration in Hungary.. – B: 1178, 7673, T: 7673. → **Easter; Easter Egg; Easter Plays; Csángó.**

**‘Eb ura fakó!’** – A historical proverb dating from the Prince Rákóczi II era (1703-1711). According to legend, a member of the Hungarian Estates, Miklós (Nicholas) Bercsényi yelled it at the National Assembly in Ónod on 13 July 1707, when they declared Emperor József I (Joseph) of the House of Habsburg dethroned as king of Hungary. According to some, *fakó* means a wood stick, *eb* is dog, *úr* means master, so the meaning is “Dog’s master is a stick”. However, its precise meaning is still not known. – B: 1078, T: 7668.→**Rákóczi II, Prince Ferenc; Bercsényi, Miklós; Ónod Parliament.**

**Ebeczky, István** (Stephen) (Léva, now Levice, Slovakia, ca 1670 - Léva, 1719) – A legendary insurgent (*Kuruc*) leader, cavalry colonel in the army of Reigning Prince Ferenc (Francis) Rákóczi II. He joined the army of the War of Liberation (1703-1711) at the start, and with his contingent conquered many settlements on both slopes of the Little Carpathians. He crossed the River Morava and his mounted patrols harassed the area down to the bridges of Vienna. His activities created such a panic in the imperial capital that the Austrian court ordered the transportation of the Holy Crown of Hungary from Pozsony (now Bratislava, Slovakia) to Vienna. At the battle of Nagyszombat, (now Trnava, Slovakia), under the command of Miklós (Nicholas) Bercsényi, the contingent encircled the imperial forces with 6,000 horsemen and took possession of the enemy’s artillery; but due to the defeat of the insurgent infantry, the battle ended in favor of the Austrians. In the winter of 1705, Ebeczky crossed the frozen Danube River with his cavalry regiment and many successful raids won considerable fame for him. At the end of 1705, the defense of the border along the River Lajta was entrusted to him, and again his raiding parties reached the gates of Vienna. In 1710, he was in charge of the Fort of Ungvár (now Uzhhorod, Ukraine), and in 1711 he was promoted to brigadier-general. After the peace treaty of Szatmár in 1711, he turned over the fort to the imperial forces and retired to Léva, where he died in 1719. – B: 0942, 1020, T: 3233.→**Freedom Fight of Rákóczi II, Prince Ferenc; Bercsényi, Miklós; Kuruc.**

**Eberhardt, Károly** (Charles) (Gecse, 1824 - Gecse, 8 December 1906) – Soldier in the 1848-1849 Hungarian War of Independence, Italian general. Between 1840 and 1848, he served in the Austrian Army. During the War of Independence, he became a Second-Lieutenant in the Hungarian army. After the armistice at Világos, he emigrated and served in the Turkish army. He participated in the Crimean War, and following that, he went to Italy. In 1859, he fought with the guerrilla forces of General Garibaldi and later, he became an officer in the Royal Italian Army. He advanced to the rank of General. Following his retirement, he returned to Hungary. – B: 1138, T: 3233.→**Freedom Fight of 1848-1849.**

**Ébert, Tibor** (Pozsony, now Bratislava, Slovakia, 14 October 1926 - ) – Writer, poet, critic, musician. He is from Northern Hungary or Upland (*Felvidék*, now Slovakia) but lives in Budapest, Hungary. His higher studies were completed at the Ferenc (Franz) Liszt Academy of Music, Budapest (1945-1952), and in Pozsony, where he read Law and Philosophy (1944-1954). He worked with the Radio Orchestra (1949-1956) and with the State Concert Orchestra (*Állami Hangversenyzenekar*) (1958-1985), Budapest. In 1985 he became an artistic instructor at the Attila József Theatre (*József Attila Színház*), Budapest. His works include *Retrial (Perújrafelvétel)* drama (1985); *Book of Job (Jób könyve)* novel (1990); *Esterházy*, drama (1992); *Frozen Orpheus (Fagyott Orfeusz)* poems (1993), and *Ask the Rain (Kérdezd meg az esőt)* short stories (1996). He received

the Béla Bartók-Ditta Pásztor Prize (1987), the Pozsony Memorial Medal (1992), the Esterházy Prize (1993) and the Small Cross of Merit of the Republic of Hungary (1996). – B: 0874, 0878, 1257, T: 7103.

**Ebstorf Map** – A map found in the library of the Prussian town of Ebstorf in 1830. It consists of 30 sheets of parchment and was made in the second half of the 13th century. It was published in 1891, on 25 engraved connected sheets of metal. Hungary can be seen on tablets 10 and 11. A special value of these maps is that they also contain dates of natural history and demography. – B: 1078, T: 7680.

**Ecclesiastical (Church) Schools in Hungary, Nationalization of** – The National Assembly adopted Article XXXIII on 16 June 1948 to nationalize schools owned by Churches and religious organizations. Some 6505 ecclesiastical schools became the property of the State without any compensation. The 18 thousand instructors and teachers were taken over by the State. On 5 October 1948, the Reformed Church made an agreement with the State. The Church retained 4 Theological Academies and two High Schools. However, in 1952, the Church was left only with two Theological Academies and one High School. The Evangelical Lutheran Church was left with one Theological Academy and no High School at all. On 30 August 1950, the Communist Government and the Catholic Episcopacy made an agreement with some concessions that the Roman Catholic Church should have the right to keep up to four theological seminaries and eight High Schools. After the change in the political system in 1990, Churches could claim back their nationalized schools. – B: 1230, T: 7668.→**Catholic Church in Hungary; Reformed Church in Hungary; Evangelical Lutheran Church in Hungary.**

**Eckartsau, Letter from** – Letter written in the hunting castle at Eckartsau, Austria, by King Károly IV (Charles) (1916-1918), the last King of Hungary of the Habsburg Dynasty, announcing his temporary retirement from state affairs, on 13 November 1918, and acknowledging the decision that was going to establish Hungary's future form of government. In Hungary, after the publication of the letter on 16 November 1918, the Republic of Hungary was proclaimed. – B: 1138, 1020, T: 7668.→**World War I; Károly IV, King; Károlyi, Count Mihály.**

**Eckehart's Chronicle** – The chronicle *Sancti Galli* begun with the work of brother Radbert, in the Casus monastery and continued by Eckehart (ca 980-1060), the chronicler of St Gallen Monastery, Switzerland. It tells the history of the Monastery of St Gallen until 972. This chronicle also touches on Hungarian history, for Eckehart mentions in detail the raiding Magyars who, looking for treasures, paid a surprise visit to the monastery in 925. The main character of this part is Heribald, the eccentric friar, who stayed behind alone to face the Hungarians after the hurried escape of his brothers. He was later found eating, drinking and singing along with the merry-making Magyar warriors. This account is an interesting addendum to the habits of the Magyars during the Era of the Khagans. – B: 1078, 1020, T: 3240.→**Era of Hungarian Campaigns; Lechfeld, Battle of; Botond; Lehel, Horn of.**

**Eckhardt, Sándor** (Alexander) (Arad, Transylvania, now in Romania, 23 December 1890 - Budapest, 16 May 1969) – Literary historian, linguist. He completed his higher studies at the University of Budapest, as a student at the Eötvös College. Thereafter, he spent a year studying at the *École Normale Supérieure*, Paris. After he returned home, he taught at the Eötvös College. From 1923 to 1958, he was Professor of French Language and Literature

at the University of Budapest. Before World War II, he edited the *Études Hongroises* and *Fenno-Ougriennes* and other periodicals. He was a representative of the *Christian Democratic People's Party* (*Keresztény Demokrata Néppárt*) in Parliament from 1945 to 1949. His field of research was French literary history and the cultural history of Franco-Hungarian relations. He edited French-Hungarian and Hungarian-French dictionaries (1936, 1953, 1958), and translated into French the poems of the great lyric poet Endre Ady, as well as French novels into Hungarian. He was also an eminent Bálint Balassa researcher. His other works include *The Ideas of the French Revolution in Hungary* (*A francia forradalom eszméi Magyarországon*) (1941); *Hungarian Humanists in Paris* (*Magyar humanisták Párizsban*) (1929), and *Today's French Grammar* (*Mai francia nyelvtan*) (1965). He was a member of the Hungarian Academy of Sciences (1942-1949). – B: 0883, 1257, T: 7103. → **Ady, Endre; Balassi, Bálint; Hungarology.**

**Eckhardt, Tibor** (Makó, 26 October 1888 - New York, USA, 3 September 1972) – Politician, lawyer. He received his higher education in Berlin, Paris and at the University of Budapest, where he obtained a PhD in Political Science. His career began in the County of Aranyos-Torda, (Transylvania, now in Romania) in 1918. From 1918 to 1920, he worked for the National Government at Arad, then at Szeged. In 1922, he became a Member of Parliament on the ticket of the *Christian Smallholders' Party* (*Keresztény Kisgazdapárt*). In 1923, he was one of the founding presidents of the *Awakening Hungarians Society* (*Ébredő Magyarok Egyesülete*), and was leader of the *National Independent Party* (*Nemzeti Függetelen Párt*). From 1928, he was Acting President of the *Hungarian Revisionist League* (*Magyar Revíziós Liga*), and from 1930, he was a member of the *Independent Smallholders' Party* (*Független Kisgazda Párt*), later its President (1932-1940). From 1934 to 1945, he was the Hungarian representative at the *League of Nations* (*Népszövetség*). After 1935, he opposed the German orientation of Hungary, and was in favor of an Anglo-Saxon approach. In 1940, the Government sent him to the USA in order to establish contacts, but he never returned. He was a lecturer at the University of Georgetown and, after 1945, he became one of the leaders of the anti-Soviet and anti-Communist Hungarian émigrés; he was one of the organizers and leaders of the *Hungarian National Council* (*Magyar Nemzeti Tanács*). He participated in the foundation of the *Captive Nations' Council* (*Rab Nemzetek Tanácsa*). His major works include *An Attempt of Returning Károly IV (Charles) (IV Károly visszattérési kísérlete)* (1921); *Proposal for Carrying out the Hungarian Agrarian Reform* (*Javaslat a magyar földreform végrehajtására*) (1937); *Recollections on the Regicide at Marseille* (1964), and *Statesman in Exile* (*Államférfi a száműzetésben*) (1971). – B: 0883, 1160, T: 7103.

**Economy of Hungary** – The economic life of Hungary started to develop considerably after the 1867 Compromise with Austria; but the years of World War I, the subsequent defeat and large-scale dismemberment of the historic Kingdom of Hungary in 1920, as well as the world economic crisis arrested the economic development of the country for years. By the 1930s, the economy started to improve and so did agriculture, although the industry was not sufficiently modern. After World War II, with an enormous effort and loans from abroad, Hungary's economy began to improve along "socialist" lines. Early in 1949, with the assistance of the Soviet Union, the so-called Council of Mutual Economic Aid was formed; this, however, could not function effectively, and collapsed in 1991. The first Five-Year Plan of 1950 was aimed at laying the foundations of socialism. The main target was the development of a strong industry, in particular the fast development of the

heavy and engineering industries. Since Hungary did not have most of the necessary basic raw materials: iron-ore, oil and coal etc., they had to be acquired through imports from socialist countries, mainly from the Soviet Union, that started the indebtedness of the nation. After the first year of the five-year plan, grossly overestimating the results and ignoring the country's limited resources, the Communist Party drastically increased production quotas for the plan that resulted in a severe lowering of the living standard. Under the consistently executed five-year plans, Hungary has become an industrial-agrarian state. Exports amounted to 8,900 million US dollars in 1993. The more important export goods were: machinery, equipment and installation items, food and pharmaceutical products and synthetic raw materials. Export to the former socialist countries amounted to 29.5%, to other countries 70.5%. The imports have been valued at twelve-and-a-half-million US\$. The main imports items were: materials, parts, machinery, installations, consumer goods and energy generators. The main import came from the socialist countries. In 2000 the GDP was 12,900 billion HUF; GDP/person 4941 EUR; employees 3,849,000, unemployed 262,500, 6.4 %; gross debt on 31 December 2000, was 26.4 billion €, net debt was 6.3 billion €. Hungary's foreign debt was 32,2 billion € at the end of March 2006, which is an increase due to cruel privatizations, under mainly socialist-liberal Governments, and by 2010, the national debt was 100 billion US\$. – B: 1051, T: 7675.→**Compromise of 1867; Five-Year Plans.**

**Ecsed Swamp** – a large swamp area in northeast Hungary. It formed an important hiding area for the local population during the Turkish occupation, 1526-1686. At the end of the 18th century, draining was started, which progressed throughout the 19th century and concluded in 1895. 1500 hectares of swamp area was reserved as a bird sanctuary. In the reserve, a huge peat fire started in 1963, and burned for 7 months. – B: 1134, T: 7656.→**National Parks in Hungary.**

**Ecsedy, Aladár** (Krasznahorvát, now Horoatu Crasnei, Romania, 6 February 1902 - Leányfalu, 7 September 1990) – Minister of the Reformed Church, theologian, writer. He completed his high school studies in Kunszentmiklós (1920), and studied Theology at the Reformed Theological Academy, Budapest (1920-1924). He was a hospital chaplain, then a teacher of religion in Budapest (1924-1926) and an assistant minister at the Philadelphia Diaconess Association, Budapest (1928). He was Parish Minister in Tahitótfalu (1929-1962), and Dean of the North-Pest Deanery (1948-1952). He was one of the popular evangelists in the post-war awakening movement. He was sent to retirement for political reasons on 1 March 1962. From 1975, he was director-minister of the Reformed Senior Citizens' Home at Leányfalu. He wrote and published extensively articles, plays, songs, and some 33 books, among them: *The Greatest Apostle (A legnagyobb apostol)* (1935); *Christ at the Casket (Krisztus a koporsónál)*; *God's Word in Psalms (Isten szava a zsoltárookban)* (1934); *The Sunday School (A vasárnapi iskola)* (1941); *Isaiah (Ézsaiás)* commentary (1943); *One Year on the Pulpit (Egy év a szószéken)* (1947), and *In the Footsteps of Jesus (Jézus követése)*. – B: 0910, T: 7103.

**Ecsedy, Ildikó** (Ungvár, now Uzhhorod, Carpatho-Ukraine, 23 March 1938 - Budapest, 5 February 2004) – Historian, Sinologist. Her higher studies were completed at the University of Budapest (1956-1961), majoring in Chinese and Hungarian in her Degree course; she also obtained a diploma in Education. In 1962, she obtained her PhD. In 1980, she became qualified as a lecturer in linguistics, obtaining a PhD in Linguistics in

1985. From 1961 to 1971, she worked in the Chinese Section of the Library of the Hungarian Academy of Sciences, becoming a research worker in 1971. From 1972, she carried out orientalist research as a scientific counselor for the Orientalistic Group of the Institute of Linguistics of the Academy of Sciences. From 1990, she was a titular professor at the University of Budapest. In 1994 she became a member of the *Academi Europea* (Rome), and a member of societies in her field of specialization. From 2000, she was Professor at the College of Buddhism, Budapest. Her fields of research were Early Chinese History, also Chinese Social History, Chinese connections with central Asia, social and historical problems of nomadic peoples and their relations with China, based on Chinese translations of available documents; old Chinese astronomy and archeoastronomy. She had more than 260 published works in the form of papers and studies. Her books included *Nomads and Merchants at the Borders of China (Nomádok és kereskedők Kína határain)* (1979); *Beginnings of the Chinese State (A kínai állam kezdetei)* (1987), and *China and her neighbors (Kína és szomszédai)* (1997). She also did some translations from Chinese works. She was an internationally recognized scholar of Sinology, and an outstanding researcher of Central Asian nomadic peoples. In recognition of her work she was presented with the József Eötvös Coronal in 1995. – B: 0874, 1257, T: 7456.

**Ecumenical Council of Hungarian Churches** – An Inter-Church Organization, founded on 26 June 1943 between the Hungarian Reformed and the Evangelical Lutheran Churches under the name Hungarian Committee of the General Church Council (*Egyetemes Egyháztanács Magyarországi Bizottsága*). László (Ladislav) Ravasz, Bishop of the Reformed Church, Albert Radvánszky, Evangelical General Superintendent, and László Pap, Acting President, constituted its first Presidium. The Council's activity included furthering the approach between Christian denominations, distribution of western aid among churches, offering financial help for rebuilding war-damaged churches, providing building funds (Ecumenical Church Loan Fund – ECLOF) support and medical assistance. It also made possible the vacationing of church personnel in the Ecumenical Home in Davos, Switzerland. The Delegation of Hungarian Protestant Churches participated in the Amsterdam Assembly, where the World Council of Churches was founded in 1948. They participated in all assemblies of the World Council of Churches and its committee works as well. It also furthered the work of the Hungarian Bible Council in providing a new translation of the Bible. The Council developed its own Ecumenical Aid Service (*Ökumenikus Szeretetszolgálat*) and built a new Ecumenical Center in Budapest. On 1 October 2002, the Ecumenical Charter was signed by all the major Hungarian Churches in order to strengthen relations among them. The Council has 11 member Churches, among them the Reformed, Evangelical-Lutheran, Baptist, Methodist, Anglican, Hungarian Orthodox, Romanian Orthodox, Bulgarian Orthodox, and the Serbian Orthodox Churches, and the Orthodox Exarchat. There are 20 churches and societies; among them the Roman Catholic and Unitarian Churches enjoy observer status. In 2002, the Ecumenical Council moved to a new and modern Ecumenical Center in the Lágymányos suburb of Budapest. – B: 7103, 0947, T: 7103.→**Ravasz, László; Pap, László.**

**Edda Songs** – An ancient heroic poem, a mythological collection from Iceland. It has two parts: the “Text of Edda” and an older “Verses of Edda”. The major part was written in Iceland during the 10-13th centuries. Its 40 verses and 2 parts in prose have 12

thousand lines. Besides dealing with the German gods and mythology, it also deals with the epic happenings of the migration of peoples. It also contains references to the Hun Atli (Attila), who was no longer the gentle, chivalrous king of the German epic poems, but a cunning tyrant who trapped the proud Goth Burgundian heroes for their treasures. Tradition has it that Salmund Sigfusson (1056-1133) edited the Eddas. – B: 0942, T: 3240, 7103.→**Attila; Huns.**

**Éder, Xavér Ferenc S. J.** (Xaver Francis) (Selmecebánya, now Banská Štiavnica, Slovakia, 1 July 1727 - Besztercebánya, now Banská Bystrica, 17 April 1773) – Missionary, America-traveler. The Jesuits in Nagyszombat (now Trnava, Slovakia) trained him. After entering the Order, he was sent to South America as a missionary in 1749. His compatriot, Joseph Reiter, who worked for decades in the area, advised him to go to Peru. He moved there and worked among the Moxo Indians for twenty years, and succeeded converting many Indians. In 1767, as the leader of the St Martin Mission, he too was expelled from the country with the rest of the Jesuit missionaries. In 1769, he returned to Hungary with the old Joseph Reiter. Being also a scientist, he wrote a 400-page work in Latin, the *Descriptio provinciae Moxitarium in regno Peruan.* He was the first to present information in Spanish about the yet unknown geography and ethnographic situation of the area, including its inhabitants, their customs, as well as the flora and fauna (1883). After his return to Hungary, he was a parish priest at Besztercebánya, where he died. – B: 0883, 1420, T: 7103.→**Jesuits; South America, the Discovery of; Brentán, Károly S.J.**

**Édes, Gergely** (Gregory) (Madar, 24 January 1763 - Tiszatarján, 20 October 1847) – Poet, Minister of the Reformed Church. He completed his studies at the Reformed Colleges of Sárospatak and Debrecen. He was minister in several villages in the area of Veszprém, including Nagyvázsony and Litér. In 1833 he settled in Derecske. He was a friend of Ferenc (Francis) Kazinczy and Mihály (Michael) Csokonai Vitéz. He was involved in the language renewal movement and wrote poetry including odes, elegies and epigrams. His name became known through a mode of poetry that contained identical vowels only; therefore he was counted among the “language fabricators”. His main works include *É.G.'s Dalliances, or his Amusing Verses to Spend Time with* (*É. G. enyelgései, avagy időt töltő tréfás versei*) (1793); *É.G.'s Grievances and Sweet Words* (*É. G. keservei és nyájaskodásai*) (1803); *Poetry of Theosi Anacreon* (*Theosi Anacreon versei*) translation (1803), and *Quinti Horatii Flacci opera...* (*The works of Quintus Horatius Flaccus...vols. i, ii*), translation, I-II, 1819). Many of his works remained in manuscript form. – B: 0883, 0932, 1257, T: 7684.→**Kazinczy, Ferenc; Csokonai Vitéz, Mihály.**

**Edict of Tolerance** (*Edictum Tolerantiae*) – In 1781, Emperor and King József II (Joseph, 1780-1790) issued his Edict of Tolerance to regulate public religious practice of non-Roman Catholic believers, including Protestants, Greek Orthodox and Jews, thereby putting an end to hundred years of oppression. Protestant and Greek Orthodox congregations were allowed to organize in every settlement with at least 100 Protestant families. They were entitled to a pastor of their own and were not obliged to pay for the services of a Roman Catholic priest. They were also allowed to build churches but with no entrances from the street and with no tower or steeple. As to the Jews, the Edict allowed Jewish children to attend schools and universities. For the adults it allowed them to engage in jobs such as being merchants or to open factories. It also eliminated previous

humiliating restrictions, which had forced the Jews to wear gold stars or to pay an extra tax. The Edict was welcomed, though it was not a total freedom of religion. – B: 1031, 1841, T: 7103.→**József II, Emperor and King.**

**Education in Hungary** – Hungarian school education can be traced back to the time of the Árpád Dynasty (896-1301). The present school system was basically formed in the 19th century. Pre-school education, kindergarten for 3-6-year-old children, offers basic instruction, day-care, and provides mental preparedness for public school. A great proportion of children are supplied with meals on a regular basis. Children aged 6-14 go through the primary school in a system of uniform curriculum; its lower 4 years give general education, while the upper 4 provide more specialized education. The students can continue their studies in a high school, technical college, a trade or commercial school. Those aged 14-16, who do not wish to acquire a higher education, can enroll in a 2-year extension course at a special school to receive basic technical and agricultural instruction. The secondary educational institutions consist of (1) The high schools provide 4 years of higher general and art education (music, fine arts and ballet); and (2) the various 4-year programs at the so-called technical colleges. The general high school may either follow the humanities line or the “Reál” schools with an emphasis on modern languages and sciences. Passing a matriculation examination entitles one to continue higher studies. Similarly, the final examination of various technical colleges enables one to study on a higher level. In 1960, there were 43 higher institutions: 4 universities, 4 polytechnics, 1 University of Agricultural Sciences, 4 Medical Schools, and 1 University of Economics. Within the range of agricultural college education, there were 3 academies and 3 colleges, and within the sphere of higher education in the various arts, there were 4 colleges as well as 3 teachers’ colleges, 1 training college for teachers of handicapped children, 1 school of physical education, 11 three-year higher teacher training colleges, and 2 two-year training colleges for nurses and kindergarten teachers. All these higher institutions were in various towns and cities. Adult education first started after 1945. The so-called workers’ schools were opened, where adults could supplement their knowledge in a particular field. On the secondary or the tertiary, university level and on university level, it was possible to further one’s education in evening courses or by correspondence courses. With the basic political change in 1989, there were changes in education as well. Many of the nationalized church schools of all levels were returned to their original owners, including universities and a number of “academies” that were granted university status. At the turn of the millennium Hungary had around 77 higher educational institutes that include 10 universities, nine noted technical schools and colleges providing vocational and agricultural training. In 2006, a radical restructuring of the education was planned by the Gyurcsány Government, which was considered by many as controversial. In 2011, the 2nd Orbán Government started a thorough restructuring program of the educational system. – B: 1051, 1842, T: 7675.→**Universities.**

**Edvi Illés, Aladár** (Elias) (Pest, 25 May 1870 - Budapest, 1 June 1958) – Painter and graphic designer. Between 1888 and 1893, he studied at a drafting school with Bertalan (Bartholomew) Székely. Between 1893 and 1895, he studied at the Julian Academy of Fine Arts, Paris, and then went to London to study English watercolor painting. In 1897 he went on a study trip to Italy. From 1891, he held numerous exhibitions of his realistically painted watercolors at the Art Gallery (*Műcsarnok*) in Budapest. From 1903, he was a professor at the Academy of Fine Arts, Budapest. He went to Transylvania

(*Erdély*, now in Romania), to Turkey in 1905, and to the Netherlands in 1906, where he painted a large number of pictures. His works include *Late Fall (Őszutó)*; *Before a Storm (Vihar előtt)*; *Cow in the Stall (Tehén az istállóban)*, and *Resting (Pihenő)*. His artistic watercolors earned several national and international awards, and are treasured pieces in the National Gallery in Budapest, also in museums abroad. He was a recipient of the Munkácsy Prize (1952) and the title of Merited Artist, 1958. – B: 0883, 0932, 1122, T: 7653.→**Székely, Bertalan.**

**Eger** – Town in northern Hungary, seat of County Heves, situated on both banks of the Eger Creek, at the southern foot of the Bükk Mountain, referred to as the *Bükkalja* (Bükk-foot). There were human settlements in the area from ancient times, as shown by more recent excavations. Just west of Eger at Szépasszonyvölgy, Settlement-era graves have been excavated, which indicate that the Magyars settled in this area from the beginning of their appearance in the Carpathian Basin in the 9th century. The Aba clan settled a little west of Eger, in the environs of the neighboring town of Gyöngyös. Samuel Aba founded the monastery of Sár, where he was buried. The Bishopric of Eger was founded during the reign of the first King of Hungary, István I (St. Stephen, 1000-1038). Catapanus was its first bishop. King Imre (Emeric) died here and was buried in 1204. The town experienced some vicissitudes over the centuries: in 1241, during the Tartar (Mongol) invasion, the forces of Chief Sejbán ravaged the town; in 1442, the Hussites, and in 1514, the uprising serfs laid waste to it. After the defeat at the Battle of Mohács by the Turks in 1526, Eger's strategic significance was recognized and the castle of the town was fortified considerably. The Turkish Pasha Ali of Buda besieged the Eger fortress with a large army from 11 September to 14 October 1552, but he could not take the castle because of the heroic resistance of the captain, István (Stephen) Dobó and his barely 2,000 men, facing the vastly larger Turkish force (80,000 men); even the women of Eger took an active and heroic part in the defense. Pasha Ali and his large army were forced to abandon the siege and move away from the area. However, in 1596, Sultan Mohamed III's forces managed to take the fortress after a 3-week siege; unfortunately, at that time, the defense of the fort was left mainly to foreign mercenaries, under Captain Pál (Paul) Nyáry. Lala Mohamed was appointed the Pasha of Eger. After that, Eger was under Turkish occupation for 91 years. 17th century engravings show the town with mosques and minarets, creating an Oriental impression. Eger was freed from the Turkish occupation on 17 December 1687. Soon afterwards, from 1704 to 1710, Prince Ferenc Rákóczi II sojourned there several times and used the fortress in his fight against the Habsburgs, who had it razed in revenge. In 1804, Empress Maria Theresa raised the Bishopric of Eger to Archbishopric. The Church dignitaries of Eger played an important role in Hungary's history. Bishop Kilit of Eger played an important role in the wording of the Golden Bull of 1222. In the 15th century, Tamás (Thomas) Bakócz were prominent Bishops of Eger. In the following centuries there were several illustrious Archbishops of Eger whose generous spirit contributed considerably in raising Eger to one of the culturally most important country towns of Hungary. From the surrounding era, large numbers moved to and settled in Eger between 1725 and 1750, its population increased from 6,000 to 10,000, though the Reformed (Calvinist) inhabitants moved away. The people of Eger took active part in the War of Independence against the Habsburgs (1848-1849).

The most prominent building of the town is the cathedral, built in Greek style during

1831-1837. Other noteworthy buildings are the Archiepiscopal Palace (built in the 18th century); the County Hall; the girls' High School (*Lyceum*), was built from 1765-1785, as well as the famous Observatory, rising from the center of the building, which now houses an Academy. There are numerous other fine buildings in the Baroque and later styles, and many churches. Hence Eger earned the name "Rome of Hungary". The statue of the heroic defender of Eger, István Dobó stands in the Dobó Plaza (the Market Place). The ruins of the fortress stand on Castle Hill. More recent excavations uncovered a secret network of passageways (*kazamatás*) underneath it.

Eger also suffered some natural disasters, e.g. the plague early in the 18th century, the fire in 1800 and 1827, flood in 1874, and earthquakes in 1903 and again in 1925, causing considerable damage. Eger is the commercial center of a wine-producing region, with wines such as the red Bull's Blood of Eger. There are also mineral springs near the town. The history of the 1552 siege of Eger is well known from the popular novel by the noted writer Géza Gárdonyi, entitled *Eclipse of the Crescent Moon* (*Egri csillagok*). – B: 1031, 1068, 1789, 7456, T: 7456. → **István I, King; Eger, Siege of; Dobó, István; Rákóczi II, Prince Ferenc; Bakócz, Tamás; Gárdonyi, Géza; Mária Terézia, Empress and Queen.**

**Eger, Siege of** – While Sultan Suleiman, the victor in the Battle of Mohács (1526), occupied a large portion of the Great Hungarian Plain (*Nagyalföld*) and Transdanubia

(*Dunántúl*), between 1541 and 1552, the Hungarians lost their border forts one after the other. Their valiant defenders were in continuous combat with the advancing Turks. King Ferdinand I (1526-1564) was only nominal king of Hungary, and for him the country was only a war zone between the Imperial Habsburgs and the Turkish sultanate; therefore he did not provide help for its defense. Two victorious Turkish armies joined forces at the town of Eger to occupy its fortress and then press forward to the Carpathian Mountains and cut off Royal Hungary from Transylvania (*Erdély*, now in Romania). Against an army of 150 thousand men, well equipped with artillery, only 2,000 Hungarian soldiers defend the fort with one dozen small caliber cannons and 200 rifles. The siege lasted from 9

September to 17 October 1552. The defenders, under the leadership of Captain István (Stephen) Dobó, and other officers stood their ground against the repeated attacks of the Turks, accustomed to victory. When half of the defenders of the fort fell or became wounded during the long siege, women and young girls fought on the walls of the fort in replacement. They carried boiling oil and water in cauldrons tied to poles and poured these over the Turks attempting to climb the walls. After the last unsuccessful attack the Turks withdrew during the night, leaving their tents behind; Eger was liberated. After the disaster at

Mohács, this was the first time the Hungarians won a battle. This heroic struggle was later immortalized both in literature and fine arts. – B: 1288,1020, T: 7668.→**Eger; Dobó, István; Gárdonyi, Géza.**

**Eger's 'Bull's Blood' Wine** (*Egri bikavér*) – A world-renowned red wine. Usually it is a blend of Kadarka, Kékfrankos, Cabernet Sauvignon, Merlot and Kékoporto grapes. It is soft-bodied with a garnet red color and tastes moderately tart. Its scent and aroma are characteristic and fully harmonious. The story of this name originated from 1552, when the Eger fortress was under Turkish attack. The defenders were badly outnumbered. To fortify themselves and give themselves courage, they drank the local red wine in large quantity and the wine spilled on them while they did so. When the attackers saw their opponents with red liquid all down their chests, they thought the locals had been drinking bull's blood and they fled in terror. – B: 1259, T: 1259, 7103.→**Eger, Siege of.**

**Egerszegi, Krisztina** (Budapest, 16 August 1974 - ) – Swimmer. She was only 14 years old, when she competed at the 1988 Seoul Olympics and won Silver Medal in the 100 m backstroke. Encouraged by it, she competed again in 200m and won Gold Medal. In 1992, in the Barcelona Olympics she won three gold medals. At the 1996 Atlanta Olympic Games, she won a Bronze Medal in 400 m individual medley and won the 200 m backstroke. She is a former world record-holding swimmer, one of the greatest Hungarian Olympic champions of the modern era, and the most successful Hungarian female swimmer. She received the Saint István (Stephen) Prize in 2010. – B: 1051, 1031, T: 7103.

**Egervály Formula** – This is a mathematical operation in a research process named after the mathematician, Jenő (Eugene) Egervály (1891-1958). The American mathematician, H.W. Kuhn, published it in 1955, and by the rapid spread of computers, revealed the practical application of the Egervály formula, published in 1931, through its conclusive proof. Kuhn named this procedure as the “Hungarian method”. It is widely used for the solution of problems in transportation and economics tasks. – B: 0883, 1306, T: 7456.→**Egervály, Jenő.**

**Egervály, Jenő** (Eugene) (Debrecen, 16 April 1891 - Budapest, 30 November 1958) – Mathematician, mountaineer. After completing his higher education at the University of Budapest (1914-1917), he was employed as demonstrator in the earthquake observatory of Budapest. From 1918, he was a teacher at the Technical College, and was later a professor at the University of Szeged. From 1940, he was professor at the Polytechnic of Budapest. His field of research was geometry, application of differential equations and kinetic gas theory. During his nearly half-century research work, some 80 of his papers were published on independent research results. Particularly noteworthy is his generalization of Dénes (Dennis) König's Graf-theory, used in econometrics. His procedure is referred to in the international specialist literature as the “Hungarian method”. He was a member of the Hungarian Academy of Sciences, a recipient of the Gyula König Prize (1932) and the Kossuth Prize (1949, 1953). – B: 0883, 1306, T: 7456.→**Egervály Formula; König, Dénes.**

**Egg** – Life giving seed; with its characteristic shape it is regarded as the symbol of the Universe. One of the creation myths describes the origin of the world as breaking forth from an egg. According to one of the variations, the egg is the symbol of the very beginning of reality. An important factor in the creation myth is the egg breaking into two

parts. The two parts of the eggshell symbolize the upper and lower part of the sky, heaven or earth. The yolk is the sun, the white is the moon. The Christian Church regarded it as the symbol of Christ's Resurrection, and in that way it upheld the ancient system of symbol as regards to the egg. Hungarian parallels can be found in the totemistic tale of the Son of the White Horse, observing the annual rebirth of nature. Mankind imagined the origin and end of the world as a constant process; in Hungarian folklore, the egg is the symbol of rebirth. Well before the Christian era, carved, decorated eggs were placed in the graves next to the deceased to symbolize the belief in the resurrection. Its use during Easter is connected with the ancient Near East's early spring festival. – B: 1134, 1336 ,T: 7682.→**Easter Egg; Easter Tradition in Hungary.**

**Eggenhoffer, Teréz** (Theresa) (Budapest, January 1855 - Budapest, 1940) – Mountain climber, a pioneer of mountain climbing and of alpine winter skiing for women in the High Tatras of the Carpathian Mountain Chain in Historic Northern Hungary (Upland, *Felvidék*, now Slovakia). In the summer of 1905, she was the first to climb the 1,565-meter high Strapatáveza Peak, accompanied by János (John) Ferenc Sr., a mountain guide. The peak was later named after her, Eggenhoffer Peak. As an enthusiastic monarchist she proposed that the Peak of Gerlachfalva be renamed Franz Joseph Peak and a plaque be placed on the mountaintop to this fact. This peak had the name Stalin Peak during the years of communist personality cult. When that passed, it regained its original Gerlachfalva name. During the years of World War I, Eggenhoffer erected plaques at the peak at her own expense for commemorating the names of visitors, who died on the battlefields. On her 80th birthday, in January 1935, she walked from Pilisvörösvár, across the peak of Dobogókő, to Esztergom. On the Dobogókő, a plaque commemorated this feat but it disappeared later. Today, near Dobogókő, the Teréz Rest Stop is dedicated to her memory. – B: 1260, T: 7680.

**Egregy, Árpáadian Age Church** – A settlement near Héviz in Transdanubia (*Dunántúl*). The church is a good example of 13th century Romanesque style in village architecture. The octagonal tower is stone capped. The sanctuary is narrower and lower than the nave. There are old fresco fragments on the walls. – B: 1144, T: 7663.→**Fortress Churches.**

**Egressy, Béni** (Benny) (Egeresi) (Sajókazinc, 21 April 1814 - Pest, 17 July 1851) – Composer, writer, brother of Gábor Egressy. He was a teacher, who later became an actor, and from 1834, he played with the theatrical company of Kolozsvár (now Cluj-Napoca, Romania). He studied music theory and languages. In 1835, he walked on foot to Milan, Italy to train his voice. After his trip to Milan, he worked as a singer in a choir and taught conducting. In 1834, he entered into a contract with the National Theater and sang baritone roles. In 1843, he won a competition for setting the poem, *Szózat* ("Call to the Nation", a second Hungarian national anthem), to music. He participated as a lieutenant in the War of Independence of 1848-1849. He was wounded at Kápolna, and ended up in the town of Komárom. He composed Klapka's March in 1849; Kálmán (Coloman) Thaly wrote the lyrics for it later. After the capitulation of General György (George) Klapka, he was given safe conduct and returned to the theater. The best among songwriters of his time, he was the first to put Sándor (Alexander) Petőfi's verses to music, which became very popular in Hungary. He wrote several plays, also the librettos of the operas, *László Hunyadi* and *Bánk bán*, composed by Ferenc (Francis) Erkel, the foremost Hungarian opera-composer. He translated more than fifty plays and 19 opera libretti into Hungarian.

He cultivated Hungarian songs written in the style of folk music, especially the *csárdás* dance. – B: 0883, 1257, T: 7684.→**Egressy, Gábor; Thaly, Kálmán; Klapka, György; Petőfi, Sándor; Erkel, Ferenc.**

**Egressy, Gábor** (Gabriel) (Galambos) (Sajólászlófalva, 1 November 1808 - Pest, 30 July, 1866) – Actor. He was born into the family of a minister of the Reformed Church, and he is the brother of Béni Egressy. He ran away from home three times in order to become an actor. For two years he was a member of a strolling troupe, then became a member of the Theater Company of Kassa (now Kosiče, Slovakia). In 1833, he went to Kolozsvár (now Cluj-Napoca, Romania), and participated in the world première of József Katona's historical play *Bánk bán*. In 1837 he went to Vienna to learn acting. In 1837 he became a member of the Hungarian Theater of Pest (*Magyar Színház*). In 1838 he went on a country tour. He was on good terms with poet Mihály (Michael) Vörösmarty. He was a member of the Kisfaludy Society. In 1844, he befriended the poet, Sándor (Alexander) Petőfi. On 15 March 1848, he recited Petőfi's revolutionary poem, *National Song* (*Nemzeti dal*) on the steps of the National Museum (*Nemzeti Múzeum*) in Pest. During the 1848-49 War of Independence against the Habsburgs he was a member of the National Guard (*Nemzetőrség*), and accompanied Lajos (Louis) Kossuth on his popular uprising's organizing tour, and for two months he was the government's commissioner of Szeged. In 1849, after the collapse of the War, he emigrated to Turkey. He was condemned to death *in absentia*. He returned to Hungary in 1850, and received amnesty in 1851. Soon he was again on the stage of the National Theater, where he played until 1859. Some of his theater roles included Garrick in Deinhardstein's *Garrick in Bristol* (*Garrick Bristolban*); Bolingbroke in E. Scribe's *The Glass of Water* (*Le Verre d'eau; Egy pohár víz*), and Illés Krum in August von Kotzebue's *The Straight Path is the Best* (*Der gerade Weg ist der Beste; Legjobb az egyenes út*). From 1859, he was a teacher at the Actors' School (*Színitanoda*). He authored the *M.E.G.'s Turkish Diary* (*M.E.G. törökországi naplója*) (1851), and *The Book of Acting* (*A színészet könyve*) (1866). His sons edited the *Memory of E.G.G. (E.G.G. Emléke)* (1867). He was the most outstanding and most cultured member of the first ensemble of actors in the National Theater. He had an important role in popularizing Shakespeare's works in Hungary. In 1860, he founded and edited the first theatrical paper, the *Hungarian Theater Newspaper* (*Magyar Színházi Lap*). – B: 0883, 1031, 1427, 1445, T: 7103.→**Egressy, Béni; Katona, József; Vörösmarty, Mihály; Petőfi, Sándor; Kossuth, Lajos,**

**Egri, Péter** (Budapest, 27 January 1932 - ) – Literary historian. His higher studies were at the University of Budapest (1950-1954), where he studied Hungarian and English Literature. He was co-worker at the Petőfi Literary Museum, Budapest, (1958-1960). From 1960 to 1973, he worked in the English Department of the University of Debrecen, and from 1973 to 1978, in the World-Literature Department of the University of Budapest. Since 1978, he has been a professor in the English Department of the same University. In the meantime, he spent one year each at the Universities of London, Leeds, Harvard and California, and earned a PhD. His works include *Hemingway* (1967), *Avantgardism and Modernism* (1972); *Chechov and O'Neil* (1982); *Value and Imagination* (*Érték és képzelet*) (1994). He received the Academy Prize (1992), the László Országh Prize (1997), the Eötvös Medal (1999) and the Albert Szent-Györgyi Prize (2001). – B: 0874, 1257, T: 7103.

**Egri, Viktor** (Nagyszombat, now Trnava, Slovakia, 26 December 1898 – Pozsony, now Bratislava, Slovakia, 5 August 1982) – Hungarian writer, journalist in Czechoslovakia. His primary education was at his place of birth, the secondary at the Academy of Commerce of Pozsony, graduating in 1915. From 1916 on, he served in the Army in World War I on the Italian and French fronts. After the War, he returned to his hometown and worked as a clerk. From 1945, he lived in Pozsony and participated in Hungarian literary life. From 1949 to 1956, he was Editor of the cultural column of the newspaper, *New Word (Új Szó)*, and between 1957 and 1959, until his retirement he was Editor-in-Chief of the cultural publication, *The Week (A Hét)*. His works include *Sunrise (Napfelkelte)* novel (1928); *Burning Ground (Égő föld)* novel (1937), and *The Years of Silence (A hallgatás évei)*, memoirs (1980). – B: 0883, 1257, 1551, T: 7103.

**Egry, József** (Joseph) (Zalaújlak, 15 March 1883 - Badacsonytomaj, 19 June, 1951) – Painter. He studied under János (John) Korcsák, Budapest, then in Munich, Germany and Paris, France. On his return to Hungary, he became a student of Károly (Charles) Ferenczy and Pál (Paul) Szinyei Merse at the Art School, Budapest (1906-1908). After serving as a soldier in World War I, he settled in Badacsony, at Lake Balaton (1918), and established his name as a painter. He visited Berlin, Dresden, Hamburg, Belgium and Sicily. He started his career as an expressionist painter, but ultimately established his own style. Some of his more noted paintings are *In Front of the Night Asylum (Éjjeli menedékhely előtt)*; *Fisherman at Lake Balaton (Balatoni halász)*; *Echo (Visszhang)*; *Rainbow (Szivárvány)*; *Lovers (Szerelmesek)*, and *Christ Among the Henchmen (Krisztus a pribékek között)*. Many of his works are at the Hungarian National Gallery, Budapest, also in other museums, and in private possession. He was awarded the Ernst Prize, the Szinyei Landscape Painting Prize, and the Kossuth Prize. A museum bears his name in Badacsony. – B: 0932, 1124, T: 7103. → **Ferenczy, Károly; Szinyei Merse, Pál.**

**Egry, László** (Ladislás) (Sátoraljaújhely, 8 December 1916 - Woodbridge, USA, 19 March 1989) – Minister of the Reformed Church in the USA. He studied Theology at the Reformed Theological Academy of Sárospatak. After his ordination in 1929, for a short time he taught religion at elementary schools. In December of the same year, at the invitation of the Pittsburgh Church, he emigrated to the United States. Soon afterwards, he received a call from the Fairport Harbor Hungarian congregation, where he served until 1937. From there, he went to serve the Woodbridge Hungarian Reformed congregation, where he became instrumental in building a new church in 1941. In 1945, he moved to East Chicago and served the local Hungarian congregation until 1956. In the same year, he was called back to Woodbridge where, under his guidance, the congregation built a new church in 1962; in 1972, a modern congregational wing was added with Sunday school accommodation. He served in several church offices. – B: 0906, T: 7617. → **Reformed Churches in America.**

**Egyed, Ákos** (Bodos, Transylvania, *Erdély*, now in Romania, 25 November 1929 - ) – Historian, researcher in Transylvania. He completed his higher studies at the University of Kolozsvár (now Cluj-Napoca, Romania) graduating in 1952. He worked as an assistant at the same University (1951-1952). He was the leading researcher of the Historical Institution in Kolozsvár from 1952, until his retirement in 1998. He was guest lecturer at the University of Debrecen (1992, 1994), a titular university professor in 1992, and guest lecturer of the University of Budapest (1995-1997). A selection of his works includes

*Village on the Move (A megindult falu)* (1970); *Village, Town, Civilization (Falu, város, civilizáció)* (1981); *Kossuth and the Szeklers (Kossuth és a székelyek)* (1994), *Transylvania 1848-1849, vols. i-ii. (Erdély 1848-1849, I, II)* (1998-1999); *Széchenyi and Transylvania, Studies (Széchenyi és Erdély: Tanulmányok)*, and others (2002), *Metamorphosis of Transylvania in the Long 19th Century, vols. i,ii (Erdély metamorfózisa a hosszú 19. században I-II)* (2002); *A Short History of Szeklers from their Settlement to 1918 (A székelyek rövid története a megtelepedéstől 1918-ig)* (2006). *Count Imre Mikó – the Széchenyi of Transylvania (Gróf Mikó Imre - Erdély Széchenyije)* (2007). He established a Free University (1970-1980). Since 1993, he has been the President of the Hungarian Peoples' Academies in Romania, an external member of the Hungarian Academy of Sciences, and a member of the World Alliance of Hungarian Historians. He was given an Honorary Doctorate at the University of Debrecen, received the Romanian Academy Prize (1977), For the Freedom of Culture Prize (1999), the Bocskai Prize (2001), the Officer Cross of the Order of Merit of the Republic of Hungary) (2002), and the Bolyai Prize (2009). – B: 1036, 1257, 1031, T: 7103.

**Egyed, Zoltán** (Kolozsvár, now Cluj-Napoca, Romania, 19 April 1894 - Budapest, 8 June 1947) – Theatre reporter, writer. He completed his studies at the Law School of the University of Kolozsvár, and became a newspaper reporter after World War I. He was on the staff of the newspapers *Mid-Day News (Déli Hírlap)*, *Evening Courier (Esti Kurír)*, and the *Morning (A Reggel)*. At the beginning of the 1940s, he edited the magazine, *Film, Theatre Literature (Film, Színház Irodalom)*. His colorful, easy-flowing sketches were popular. At the end of 1944, he was arrested and dragged off to Sopronkőhida, a notorious political prison at the time. He was freed, an ill man, in 1945. His main works include *Rouge et noir*, play (1926); *The Buzas (Búzák)* novel (1931); *Adventure in Hollywood (Hollywoodi kaland)* novel (1942), and *Love Gets Tired (A szerelem elfárad)* (1943). – B: 0883, 1257, T: 7684.

**Egyedúti, Gergely** (Gregory) (16th century) – Calendar maker and caretaker of the Archdiocese of Nagyszombat (now Trnava, Slovakia). His three known calendars of 1571, 1572 and 1593 were published in Vienna. They were based on the observations of Polish astronomer Stanislas Curelonia of Krakow. The distichs in front of the months are the first appearances of the classical poetic measures in Hungary. – B: 1150, T: 3240.

**Egyptian Hieroglyphs, Similarities Between Hungarian Runic Symbols** – Tivadar (Theodore) Galánthay Glock was the first to point out the possibility that both the signs of the Hungarian runic script and the Phoenician writing developed from the Egyptian hieroglyphs. In his German language book, published in Dresden in 1916, he illustrated the connections with charts. In his essay on the origin of Hungarian runic writing he mentioned the 19<sup>th</sup> century English scholar, John Francis Campbell of Islay, who stated: “*In the territory of the Phoenician Empire around 1500 B.C.– in the time of Pharaoh Tothmes III – there lived also Maghars who fought together with the Hettitas*”. The English author definitely means the Magyars by the word “*Magha*”. Sándor (Alexander) Forrai, in his chart comparing the Szekler-Magyar runic writing with writings in antiquity, demonstrated that 19 Hungarian runic signs were derived from Egyptian writing, and 24 cryptograms are identical with Phoenician symbols. – B: 1287, 1020, T: 7669. → **Eifischthal, Hun Runic Writing at; Hungarian Runic Script; Forrai, Sándor.**

**Ehrenfeld Codex→Jókai Codex.**

**Eifischthal, Hun Runic Writing at**, Switzerland – Károly (Charles) Fischer in his book, *Die Hunnen im schweizerischen Eifischthale und ihre Nachkommen bis auf die heutige Zeit (The Huns in the Swiss Eifischthal and their Descendants to the Present Time)*, published in Zürich in 1896, treats the runic writing found at that time, although in the form of family notes, where only 9 runic signs are without doubt identical with Szekler-Magyar runic signs. These signs in turn are identical with the first letter of the *tamgas* of families still living today. (The *tagma* was the family or clan mark or sign, used in time of old among Turkish people). – B: 1174, 1020, T: 7669.→**Anniviars; Hungarian Runic Script; Muzsnay, Jenő.**

**Eight, The Group of** (*Nyolcak*) – It was an avant-garde art movement of Hungarian painters active from 1909 to 1918, mostly in Budapest. The members of the Eight were Róbert Berényi, Dezső (Desider) Czigány, Béla Czóbel, Károly (Charles) Kernstok, Ödön (Edmund) Márffy, Dezső (Desider), Bewretalan (Bartholomew) Pór, Lajos (Louis) Tihanyi were primarily inspired by Matisse and the *Fauvism*, and Cézanne's art. They opened their first exhibition on 30 December 1909, at the *Könyves Kálmán Salon* (Budapest), under the title *New Pictures*. Their second exhibition – already entitled “The Eight” – opened in April 1911 in the National Salon. While the Eight as a group had only three exhibitions, their activity was of immense significance, with an influence that went far beyond the visual arts. The exhibitions were accompanied by series of symposia, and by very fine events involving new Hungarian literature and contemporary music. With the hindsight of a century, we can say the greatest inventors of the various fields of Hungarian culture met in 1911. Ödön Márffy a year before his death he said: “It fills me with happiness to know that my youth coincided with that memorable period in intellectual development, when not only in Europe but also in Hungary, those seeking new, better things in literature, music, painting, science, politics and social life were carried by vibrant, seething currents. It was the time when the poet, Endre (Andrew) Ady broke in with his new songs, and Béla Bartók came with his new chords, when progressive intellectuals gathered round literary reviews like *Nyugat (Occident)* and *XX. Század (20th Century)*, when *Nyolcak – the Eight*, a group that sought new ways appeared ...”. – B&T: 1031.→**Persons in the article have their own entry.**

**Einstein's Letter** – Just before the outbreak of World War II in 1939, three Hungarian physicists in the USA, Leo Szilárd along with Edward Teller and Eugene Wigner, sought the support of Albert Einstein in order to warn US President Roosevelt of the threat of German progress in the manufacturing of an atomic weapon and its danger to the Allied war effort. Einstein understood the problem and wrote a letter in German, translated into English by Wigner, Szilárd and Teller. Einstein signed the letter, dated 2 August 1939, and forwarded it to the President in Washington. This was the origin of the Manhattan Project and of the team, under the leadership of Italian physicist Enrico Fermi that completed the first atom core fission and the atomic bomb. – B: 1290, T: 7661.→**Teller, Ede; Szilárd, Leó; Wigner, Jenő.**

**Eisemann, Mihály** (Michael) (Egresi) (Paripás, Hungary, now Parabut, Serbia 19 June 1898 - Budapest, 25 February 1966) – Composer. He studied at the Ferenc (Franz) Liszt Academy of Music in Budapest with Zoltán Kodály, Albert Siklós and Leó Weiner. To earn a living, he played the piano with bands, in bars. His first compositions appeared in

1927, at the Omnia Cabaret: *Does She Still Love Me? (Szeret-e még?)*; *You Will Be Mine In Spite of All (Lesz maga juszt is az enyém)*. He composed songs, film music and more than 30 operettas. Several of them reached the stages worldwide. Some of these were: *Miss America* (1929); *Cat in the Sack (Zsákbamacska)* (1932); *One Kiss and Nothing Else (Egy csók és más semmi)* (1933); *The Star of the Circus (A cirkusz csillaga)* (1934); *I and My Little Brother (Én és a kisöcsém)* (1934); *Peter Black (Fekete Péter)* (1943), and *Bastion Promenade 77 (Bástyasétány 77)*, (1958). – B: 0883, 1445, T: 7684.→**Kodály, Zoltán; Siklós, Albert; Weiner, Leó.**

**Ekebontó, Borbála** (Barbara) – She personifies beauty and total wickedness at the same time in Hungarian folk legends. She lived either in the castle of Diósgyőr or Ecseg. Many identify her with Borbála Cilley, the idolized fairy-tale beauty with an evil personality and a lewd lifestyle. Lőrinc (Lawrence) Tóth wrote a sad four-act play with the title of her name. In the book, the rich and aristocratic Borbála pursued her immoral and wicked ways in the court of King Lajos I (Louis the Great, 1342-1382) until the King's fury caught up with her and he declared: "*Take this beautiful but devilish Magdalena to the deepest prisons*". – B: 0942, T:3240.→**Lajos I, King.**

**Electric Car** – An automotive vehicle operating by means of an electro-motor, driven by batteries. The engineer Dezső (Desider) Korda (1864-1919), director of the French *Société de Fives Lilies* Electric Manufactures, Switzerland, built the first electric car.– B: 0883, 1427, T: 7456.→**Korda, Dezső.**

**Electric Condenser** – The operational principles of the so called current surge generator, used even at present for producing tension of several million volts, were laid down by Ányos Jedlik in 1863. With the tube condensers (so named by him), he was able to generate 90 cm long electric sparks of one and a half million Voltage tension or potential. With this novel circuit-breaking system the tension of the condensers switched regularly and was able to increase cumulatively, thereby producing the multiple of the condenser tension. With his novel system Jedlik caused a sensation at the Viennese World Fair in 1873. – B: 1226, T: 7456.→**Jedlik, Ányos.**

**Electric Locomotive with Phase Changing** – The Italian Val Tellina line was the first in the world to introduce electric traction in 1917, by using phase changing electric locomotives, Kálmán (Coloman) Kandó's invention. Here Kandó employed the novel idea of high voltage alternating current for electric haulage on an electrified main line. This phase-changing method enabled the direct use of the 50-period industrial alternating current. The electric motor-driven locomotive, invented and worked out by Kálmán Kandó, was able to slow down at the point of braking and actually feed current back into the overhead line network. It was a significant solution, both from a technical and from an energy-saving point of view. Outside Hungary, the manufacture of this type of electric locomotive has only been started relatively recently. The trial locomotive of this system, with about 2700 horse power, first ran along a section of a main line, temporarily fitted with electric wires on 31 October 1923. On the basis of these tests, the locomotive was rebuilt and then manufactured serially. The first public transportation on an electrified main railway line in Hungary, between Budapest and Komárom, started on 12 September 1932. The complete double-track electric line of 188 km, between Budapest and Hegyeshalom (at the Austrian border), was handed over for service on 23 October 1934, thus outstripping other countries of similar aspirations by two decades. – B: 1222, 1020,

T: 7456.→**Kandó, Kálmán; Electric Railway Engine.**

**Electric Motor** – A type of electric engine, transforming electric energy into mechanical energy of rotating motion. While in Pozsony (now Bratislava, Slovakia), Ányos Jedlik constructed an ‘electromagnetic contraption’ as he called it, which turned out to be the first electric motor. He solved the problem of the long suspected connection between electricity and magnetism by using an electro-magnet instead of the steel magnet of earlier experiments, and in order to maintain the direction of the current flow, he used a commutator with a mercury tray. The principles laid down by him form the basis for the functioning of all present-day electric motors worldwide. – B: 1222, T: 7456.→**Jedlik, Ányos; Electromagnetic Rotator.**

**Electric Railway Engine** – A railway engine, fed from a power line with a current collector, driven by electric motors. At the international level, Kálmán (Coloman) Kandó was the pioneer of the electrification of electric railways. Between 1898 and 1902, he built the first major railway line in Italy, operated by alternating current. For this railway line, he devised the locomotives. For their manufacture, Westinghouse built a factory in Italy. All axles of modern locomotives are driven by an electric motor. They are built mostly on two bogies, supported on four or six axles. Besides the motor, the essential parts are the equipment for speed control and the braking device. 50 Hz and 25 kV feed the electric locomotives of the Hungarian National Railways. For pulling passenger and freight trains, in largest numbers, V43 types, 2-2 axled silicon rectifier of 2200 kW performance locomotives are used. The V63 type 3-3 axled thyristor-equipped electric locomotive, with a 3600 kW performance, came lately into use, with a speed of 130 km/hour capacity and also the weaker, 800kW performance 80km/hour locomotive. – B: 1153, T: 7390.→**Kandó, Kálmán.**

**Electromagnetic Rotator** – Ancestor of the electric motors constructed by Ányos Jedlik, a Benedictine monk, professor at the University of Budapest and inventor, constructed the in Pozsony (now Bratislava, Slovakia) in 1828. Using electromagnets and a mercury commutator, he achieved continuous rotation with his experimental motor. He was the first to use electromagnets and mercury commutators to convert the repulsive magnetic force into continuous rotational movement. – B: 1226, T: 7662.→**Jedlik, Ányos, Electro Motor.**

**Electronic Scanner** – An ‘Iconoscope’, the cathode ray tube used in television, whereby the optical image is scanned with the cathode ray beam. Kálmán (Coloman) Tihanyi patented it independently of the inventors abroad towards the end of the 1920s. Tihanyi was the first to employ the lengthened tube in the iconoscope in his German patent of 1928, as well as in his English patent of 1929. This made possible the electronic scanning of the picture and it is a basic condition for any modern iconoscope. – B: 1226, T: 7456.→**Tihanyi, Kálmán.**

**Electrotypograph** – A typesetting machine, run electrically to set the individual types, i.e. letters in printing shops. Engineer and writer, Károly (Charles) Méray-Horváth together with Kálmán (Coloman) Rozár, invented it in 1885. It consisted of two parts: (1) A typewriter-like mechanism, in which the actual setting took place. (2) A caster to cast the letters. The keyboard action results in a typewritten print to move along on the top, while, on the side, a tape proceeds, perforated with square shaped holes. The caster casts the letters by scanning this tape. At the beginning of the 20th century it was regarded as

the caster of the future. – B: 1226, T: 7456.→**Méray-Horváth, Károly.**

**Elek, Artúr** (Budapest, 8 February 1876 - Budapest, 25 April 1944) – Writer, art historian, critic. He studied at the University of Budapest, and began his career in 1898, by writing travelogues and being engaged in literary translations. In 1908 he became a contributor to the journal, *The News (Az Újság)*. Several papers and journals published his interesting and substantial writings: *The Hungarian Genius (Magyar Génius)*; *The Observer (Figyelő)*; *Hungarian Art (Magyar Művészet)*, and *Patron of Arts (Műbarát)*, were established and edited by him in 1921. From the start he was the main contributor, fine arts critic and then a columnist of the literary review, *The West (Nyugat)*. Between 1916 and 1919, he was a professor at the Academy of Applied Art (*Iparművészeti Főiskola*). He committed suicide after the Germans had entered the country in March 1944. The bulk of his work was made up of essays in a fine style, containing serious analyses, as well as fine arts criticisms. Typical of his short stories are an impressionistic mood and a lyrical voice. Amongst his works are *Masked Procession (Álarcos menet)* (1913); *Three Generations of Artists (Három művésznemzedék)* (1925); *The Art of Painting in the Renaissance (A renaissance festőművészete)* (1927), and *Row of Plane Trees (A platánsor)*, selected stories (1959). He was trice recipient of the Baumgarten Prize (1929-1931). – B: 0883, 1257, T: 7684.

**Elek Legend** (5th-10th centuries) – This is the most frequently repeated ascetic legend in six Hungarian codices. The best version is in the Nándor, the Lobkovitz and the Tihany Codices. The legend is about a noble Roman youngster who was forced to marry despite his vow of chastity. He ran away, lived as a beggar, and finally returned home, not recognized until just after his death. Different versions of it spread all over Europe from the 10th century on and arrived to Hungary through the “Aurea Legend”. – B: 1150, 1257, T: 3240.→**Codex Literature.**

**Éliás, József** (Joseph) (Budapest, 5 October 1914 - Debrecen, 3 January 1995) – Minister of the Reformed Church, theologian, political scientist, poet and writer. He studied Theology at the Reformed Theological Academy of Pápa (1937-1941), and worked for the journal, *Reformed Future (Református Jövő)* (1941). While the *Good Shepherd Mission (Jó Pásztor Misszió)* was created for the conversion of the Jews, it actually rescued thousands of persecuted Jews during World War II. After the War, he continued to help those persecuted by the Communist regime, thus he was banned from all ministerial duties (1952-1954). He was partially rehabilitated in 1954, and was assigned a ministry in Szigetszentmiklós, then in Debrecen, for the Great Forest Congregation (*Nagyerdei Gyülekezet*) in 1958. In 1972, he was suspended from all ministerial works, was degraded to assistant minister, and soon sent to retirement because he strongly protested the transfer of his church building to the University of Debrecen, without the consent of the congregation. In his articles he discussed political events from a theological perspective. His writings include *The Samaritan Question (A samaritanus kérdés)* (1943); *Christianity and Politics (Kereszténység és politika)* (1947); *Falling Masks (Lehulló álarcok)* (1947, 1988); *A Theology of Service, or a Theology of Selling-out? (A szolgálat teológiája, vagy a kiszolgálás teológiája?)*; *Auschwitz as Golgotha, Golgotha as Auschwitz? (Auschwitz mint Golgotha, Golgotha mint Auschwitz?)* (1990), and *Message on the Boards (Üzenet a deszkákon)* (1994). He was honored by the International Hebrew Christian Alliance for his outstanding work. – B: 0910, T:

7103.→**Reformed Church in Hungary; Deportations; World War II.**

**Elizabeth, Saint, of Hungary**→**Erzsébet, Saint, of Hungary.**

**Ella, István** (Stephen) (Veresegyháza, 8 January 1947 – ) – Organist, chorus master. He studied organ at the Ferenc (Franz) Liszt Academy of Music, Budapest, with professors Ferenc (Francis) Gergely, and József (Joseph) Maklár, and choir and chorus conducting with Professor Zoltán Vásárhelyi. He obtained his diploma in 1971, and continued his studies in Weimar and Leipzig, then in East Germany of organ and improvisation under Professor Johannes Ernst Köhler, and choir and chorus conducting under Professor Olaf Koch. He obtained his diploma of chorus master in Wittenberg in 1974, where he conducted the Halle Philharmonic Orchestra. On the invitation of founding chorus master György (George) Gulyás in 1971, he already worked professionally as assistant chorus master of the Kodály Choir of Debrecen, later as its leading chorus master. During the years 1976-1986, he was artistic leader and soloist of the Corelli Chamber Orchestra, featuring the works of baroque and classical composers played on period instruments, introduced with historical notes. From 1979 to 1984 he was leading choirmaster of the Symphony Orchestra of Székesfehérvár. He was soloist of the National Philharmonic during 1975-1990. In 1989 he founded the Budapest Bach Choir, being its choirmaster ever since. He appeared successfully Europe-wide and also in Canada, Lebanon, India, USA and Israel. During his professional career, Ella won a number of outstanding international prizes: in 1972, 2nd prize at the Leipzig International Bach Competition, and in 1974 first prize at the International Anton Bruckner Competition in Linz, Austria. He was awarded the Franz Liszt Prize in 1999, and also the Knight's Cross of the Order of Merit of the Republic of Hungary in 2007. – B: 0874, 2116; T: 7456.→**Gergely, Ferenc; Vásárhelyi, Zoltán.**

**Ellák** (- 455) – A Hun prince, Attila's eldest son. During Attila's reign and after the death of Buda, he ruled the tribes settled in the area of the Don and Volga rivers. He was selected to be Attila's successor. After Attila's death he had to wage a war against his younger brothers Dengizik and Irnik. During the fratricidal war, the Gepid King Ardarik, together with the Goths and other subjugated tribes, rebelled against the Huns. In 455, a decisive battle was fought in southern Pannonia and Ellák lost his life. Jordanes, the historian wrote "*He fought and died so gallantly that his father, had he been alive, could not have wished for a more glorious end*". – B: 0942, 1153, T: 7669.→**Attila; Huns.**

**Előd** (Eleud) – (1) An old Hungarian male personal name. It also means "predecessor". (2) According to Anonymus, the 12th century Hungarian chronicler, this was the name of the co-leader of Álmos and was one of the seven Magyar leaders. He with his son, tribal leader Szabolcs, was among the leaders who led the Hungarians through the Carpathian mountain-passes into present day Hungary. He and his people received the area by the Vértes Hills, as their share of the Transdanubian region. Among his descendants is the Csák clan. – B: 0942, T: 7103.→**Anonymus, the Chronicler; Csák Clan.**

**Ember, Mária** (until 1950 Elsner) (Abádszalók, 19 April 1931 - ) – Writer, literary translator. Her higher studies were at the University of Budapest (1950-1954), where she studied Hungarian and German Literature and journalism. She was a reporter for the journal, *Hungarian Nation (Magyar Nemzet)*, Budapest (1951-1956). After 1956, she was banned from journalism and taught at a high school for four years. Between 1961 and 1974, she worked as a reporter for the newspaper *Neue Zeitung*. Between 1974 and 1976,

she was a text editor for the periodical, *Pest Program (Pesti Műsor)*. From 1976 to 1991, she worked as a copy-editor for the journal *Hungarian Nation (Magyar Nemzet)* but was fired between 1979 and 1983 because she signed a petition against the procedure carried out against Vaclav Havel and his associates (Prague, Czechoslovakia). From 1994 to 1998, she was Editor for the journal, *Friendship (Barátság)*. Her works include *Ridiculous (Nevetséges)* stories (1979); *A Happy Woman (Egy boldog nő)* novel (1986), and *Wallenberg in Budapest (Wallenberg Budapesten)* (2000). She also wrote travelogues. She was recipient of the Golden Pen (1994), and the Imre Nagy Memorial Plaque (1995). – B: 0874, 0878, 1257, T: 7103.

**Ember, Pál** (Paul) (Debreczeni Ember) (Debrecen, ca. 1660 - Liszka, 1710) – Minister of the Reformed Church, church historian, also minister in the town of Sárospatak (1683). He studied at the University of Franeker in the Netherlands, with the financial help of Count Imre (Emeric) Thököly (1684). After his return, he resumed pastoral work in Sárospatak; but he had to flee to Hotyka, when the zealous Jesuits seized the church building and the school in 1687, under the banner of the Counter Reformation. Between 1695 and 1701, he was Minister in Losonc (now Lucanec, Slovakia), then Szatmár, later in Debrecen. He moved to Liszka due to the situation created by Prince Rákóczi's Freedom Fight against Habsburg rule. Beside smaller treatises, his major work, the *Historia Ecclesiae Reformatae in Hungaria et Transylvania*, remained in manuscript form at the time of his death. It was later smuggled out to Fridericus Adolphus Lampe, a professor at the University of Utrecht, the Netherlands. He published it under his own name in 1728, presumably to protect Ember's family. It is about the origin and history of the Reformed Churches in Hungary and Transylvania (*Erdély*, now in Romania). The presence of the Anabaptists in Hungary between the years 1548 and 1646 is mentioned in it. – B: 0883, 1257, T: 7654. → **Reformed Church in Hungary; Anabaptists; Thököly, Count Imre.**

**Emese Legend** – A dynastic legend about the recurring spirit of an ancestor. At Emese's time the tribal animal was already reflecting the highest spirit of the sky, hence the ancestor of the Dynasty is the Son of God. Medieval Hungarian historians regarded the conception and the prince's name Álmos as being connected with the dream of his mother Emese (*Álmos* means "of a dream" in Hungarian). This is the Onogur genealogy from the Ancient Chronicle, and it was also used by Anonymus, while Simon Kézai, the 12th century chronicler kept to the Turul genealogy of Árpád. According to Anonymus, Ügek's wife got pregnant, and she had a dream. In her dream the bird Astrur (Astur), like a "vision of the divine" inseminated her. Then she felt, that from her loins, like a rich source of water, the line of glorious and heroic kings will come; but they will not multiply on their present land. The legend consists of two parts; the first part of the dream is a typical totemistic conception, when a bloodline (family or tribe) believe that their ancestor's spirit, in its totemistic animal form, comes back to ensure the survival of its bloodline. Here, the bird Astur symbolizes Attila. The second part of the dream is about the origin of a glorious kingdom. It also mentions the name Álmos, meaning prince. – B: 1134, 1138, T: 3240. → **Álmos; Árpád; Attila; Anonymus, the Chronicler; Kézai, Simon.**

**Emigration** – This phenomenon has been known since antiquity; but in recent times it gained significance after the victory of the French Revolution in France. During the 19th

century about 50 million Europeans emigrated overseas, and out of that number, about 33 million went to the United States. This was the largest movement of people in modern times and it is still continuing. The emigration fever in Europe, spreading from west to east, reached Hungary as well. Emigration from Hungary usually occurred in waves. The most significant waves in order of occurrence are as follows. (1) In the 13/14th centuries: Exclusively from Transylvania (*Erdély*, now in Romania) for economic reasons: Szeklers (Transylvanian Hungarians) and Hungarians went to the fertile lands of Moldavia and Wallachia (now Romania). The local Voivodes invited them who were in a feudal relationship with Hungary. In the mid-15th century, the Hussites were expelled from southern Hungary to Moldavia; after 1711: political and military refugees, and after the defeat of the Rákóczi Freedom Fight (1703-1711) to Moldavia, then on to Turkey, France, and finally to the United States. (2) 1763-1764: To escape the forced conscription in the border region, the Szeklers fled to Bukovina and Moldavia. (3) After 1849, following the defeat of the War of Independence against Austria, the political and military refugees escaped through Wallachia and Bulgaria to Turkey, and from there to some European countries and the United States of America and Canada. Increasing economic burdens forced many people to move from Transylvania to Bukovina, Moldavia and Wallachia. From the Transdanubian counties, Hungarian farm hands and poor peasants moved to large estates beyond the River Dráva to Croatia. After 1870: due to favorable economic opportunities, large-scale emigration began to the United States of America. The majority of the emigrants only intended to save money and return to their homeland. (4) Between 1871 and 1880: 16,448 Hungarians settled in the USA. (5) After 1880: the destination of emigration was almost exclusively to the United States of America. At this time most of the emigrants came from Transylvania and the southern and eastern counties of Hungary. (6) Between 1881 and 1890: 305,850 Hungarians settled in the USA. (7) Between 1890-1910: due to economic problems in Hungary and the demands of American economic expansion 1,512,147 Hungarians emigrated to the USA. (8) After World War I, when the Versailles-Trianon Distated Peace Treaty (1920) ceded two-thirds of Historic Hungary to neighboring states with one third of its Hungarian population, Hungarians in sizeable numbers emigrated to the West from these territories. Between 1920-1940: between the two World Wars the intelligentsia and the participants of the 1918-1919 Red Revolution made up significant portions of the emigrants. Their destination included some western European countries and the United States. Between 1911 and 1940: 344,009 Hungarians settled in the USA. (9) Between 1945 and 1948: about 200,000 left the country, the majority as political refugees. Due to the restrictions in US immigration policy between 1941 and 1947, only 1500 Hungarians arrived in the US, the rest of the refugees were scattered among the European countries, South America and Australia, as well as Canada. (10) After the crushed Revolution and Freedom Fight in 1956-1957 another 200,000 Hungarians left the country as political refugees. Of this number 50,000 eventually returned under amnesty, while the rest found refuge at first in Western Europe and later most of them scattered all over the world. (11) In the final years of the Communist regime a sizeable number of Hungarians emigrated to the western countries in 1988-1991. (12.) Between 1990 and 2000 some 100,000 ethnic Hungarians left the Carpathian Basin for political reasons, most of them from Transylvania (*Erdély*, now in Romania). The primary cause for mass migration from the Austro-Hungarian Monarchy was to escape poverty. After World War I, the main causes

for emigration from Hungary and its detached territories were political first, then economical. – B: 0942, 1134, T: 3233, 7665.

**Emőd, Tamás** (Thomas) (Ernö Fleischer) (Berekböszörmény, 11 August 1888 - Nagyvárad, now Oradea, Romania, 22 September 1938) – Newspaper reporter, poet. He studied Law at the University of Kolozsvár (now Cluj-Napoca, Romania). His first poems appeared in 1906 in the journal *The Week (A Hét)*. He was a newspaper reporter between 1906 and 1914 in Nagyvárad, and was a close friend of poet Endre Ady. He moved to Budapest in 1914 and, together with Endre Nagy, he put much effort into establishing the Hungarian cabaret. In 1917, he was dramaturgist secretary at the Inner City Theater (*Belvárosi Színház*), and from 1922 he was at the Andrassy Boulevard Theater (*Andrassy úti Színház*), then at the Blaha Lujza Theater (*Blaha Lujza Színház*). From 1925 to 1927, he was again engaged in the Andrassy Boulevard Theater as its artistic director. In 1927-1928, he was Director of the New Theater (*Új Színház*). He was a popular master of light-hearted, French style chansons. About 300 song lyrics and close to 80 one-act shows of his appeared on the cabaret stages in the Capital. Among his works are: *Poems (Versek)* (1911); *Praise-Glory (Dicséret-dicsőség)* poems (1915); *From the Coffer of Franz Joe (Ferenc Jóska ládájából)* scenes, melodies (1917); *Violin from Budapest (Pesti hegedű)* (1918); *Lace (Csipke)* three one-act plays, (1923), and *Poems (Versek)* (1939). – B: 0883, 1257, T: 7684. → **Ady, Endre**.

**Encyclopedia** – The first Hungarian encyclopedia was written by János (John) Apáczay Csere and was published in Amsterdam in 1655. By today's standards it is a clearly systematized body of knowledge of the times. His entries are in alphabetical or systematic order based on well-rounded knowledge on a specific subject. Compared to a lexicon, it has larger and more extensive essays and articles. At the end of the 19th century, as well as in the early 20th century and after the First World War, there was a boom of lexicon and encyclopedia publishing in Hungary and today, there is not one scientific area that does not have a high quality encyclopedia of its own. Since 1990, the publishing of lexicons and encyclopedias came again to the fore. – B: 1078, 1153, T: 3240. → **Apáczay Csere, János**.

**Endrei, Mihály** (Michael) (Budapest, 2 November 1905 - Vác, 4 July 1977) – Roman Catholic bishop. He completed his high school studies at Vác and Szentendre; studied Theology at Innsbruck, Austria, and was ordained in 1928. He earned a doctorate in Theology at Innsbruck in 1930, and was Professor of Dogmatics at the Seminary of Vác. Besides holding other offices he was Director of *Actio Catholica*, first for the diocese, then for the national office from 1948. He was appointed Auxiliary Bishop of Eger. Pope Pius XII consecrated him bishop in 1951. He became the Apostolic Administrator of the Archdiocese of Esztergom. He resigned in 1958, but directed the *Caritas Internationalis* activities. After years in Vámosmikola (1959-1964), he worked as an assistant parish priest at the Bakáts plaza (tér), Budapest; thereafter he served as an auxiliary bishop at Pécs and as Bishop of the Vác Diocese from 1975. – B: 0945, T: 7103. → **Actio Catholica; Catholic Church in Hungary**.

**Endresz, György** (George) (Perjámos, now Periam, Transylvania, Romania, 6 January 1893 - Littoria, Italy, 21 May 1932) – Pilot. He was an air force officer and an outstanding fighter pilot in the second half of World War I. After the War, he became a test pilot for the Hungarian Aero Express, then for the German Junker Works; later

training officer of the Hungarian Aero Association and Commander of the airport at Érd. He successfully completed the historic “Justice for Hungary” ocean crossing between America and Hungary, together with his navigator, Sándor (Alexander) Magyar. Rev. Jenő (Eugene) Molnár, a minister of the Hungarian Reformed Church in America initiated this flight. They flew non-stop over the Atlantic for 25 hours and 40 minutes in a Lockheed Sirius two-seater plane, from the American Grace Harbor to the Hungarian Bicske, on 16 July 1931. This transatlantic flight accomplishment had beaten all records up to that time and won a prize of 10,000 dollars, posted by Lord Rothermere. He flew with his navigator Gyula (Julius) Bitai to the Ocean Flyers’ Congress in Rome, on 21 May 1932; but their plane crashed 200 meters short of their planned landing spot at Littoria Airport. Both of them burned and lost their lives in the crash. – B: 0883, 1031, T: 7675.→**Trianon Peace Treaty; Molnár, Jenő; Rothermere, Lord; Gander Airport, Hungarian Mementos; ‘Justice for Hungary’.**

**Endródi, Sándor** (Alexander) (Until 1916 Kupricz) (Veszprém, 16 January 1850 - Budapest, 7 November 1920) – Poet, writer. During his study tour in Germany, he attended lectures in Esthetics and Literature. After returning to Hungary, he wrote for several newspapers. In 1877, he obtained his teacher's qualifications at the University of Kolozsvár (now Cluj-Napoca, Romania). Between 1880 and 1891, he taught at Nagyvárad (now Oradea, Romania). From 1902 to 1919, he was Editor of the Parliamentary Diary, Budapest. He traveled several times abroad to Italy and Northern Europe. In 1882, the Kisfaludy Society (*Kisfaludy Társaság*), elected him a member; and in 1907, the Petőfi Society (*Petőfi Társaság*), elected him as their lifetime Vice-President. He was an important writer of the second half of the 19th century. He opposed the epigone poetry and the fashionable folk-nationalistic trends. Among other works, he published a volume of *Hungarian Folksongs and Hungarian Folk Legends* (*Magyar Népdalok és Magyar Néballadák*) within the series of *Hungarian Classical Authors* (*Magyar Remekírók*), and a larger poetical anthology, called the *Treasury of Hungarian Poetry* (*A magyar költészet kincsesháza*) (1895). He also published the works of other poets, e.g. János (John) Vajda Among his major works were: the *Cricket Songs* (*Tücsökdalok*) poems (1876); *Kuruc Songs* (*Kuruc Nóták*) (1897); *Collected poems of E.S. 1867-1897 vols. i-iv* (*E.S. Összegyűjtött költeményei 1867-1897, I-IV*) (1898); *After the Autumn Dew* (*Őszi harmat után*) poems (1906), and *Playful Hours, Poems for Children* (*Játszi órák, gyermek versek*) (1920). The Hungarian Academy of Sciences bestowed on him the Marczibányi Award (1908) and he was a corresponding member of the Academy (1899). – B: 0883, 1257, T: 7684.→**Vajda, János.**

**Energy in Hungary** – As a result of the 1920 Trianon-Versailles Peace Dictate, truncated Hungary has been a relatively poor energy producer, especially in bituminous coal and hydroelectric power, though the reserves of brown coal, oil and natural gas ease the shortage. Even so, a considerable amount of energy resource has to be imported for the production of electricity, bituminous coal, natural gas, coke gas and petroleum. In Hungary, in earlier times, as in most other countries, the basis of energy generation was first and foremost coal. The coal resources of Hungary are estimated to be about 2500 million tons; of that in 1960, about 1% was extracted, while in 1992, only 0.6%. In later years the increasing production of petroleum and natural gas and their growing import decreased the proportion of coal used in the total energy production to 19%. The only bituminous coal deposit is at the southern slope of the Mecsek Mountain in the Trans-

Tisza region, where the level of the coal seam is at the relative depth of 600-800 meters. This important black coal possesses high calorific value. Good quality lignite is mined in Transdanubia, weaker quality in the northeastern central mountains. The exploitation of hydroelectric power is on a small scale. A relatively important plant is the Tiszalök power station, combined with the river system of the Eastern Main Canal. For this reason the production of electrical energy is almost exclusively obtained from thermal plants. The production of electrical energy is far from meeting the domestic requirements and it has to be imported from Ukraine and Slovakia. The largest oilfields (small on a world-scale) are situated in the southwestern part of Transdanubia. In 1937, the first oilfield was opened up at Lispe, 30 km northwest of Nagykanizsa. At Nagylengyel and its environs (10km southwest of Zalaegerszeg) more fields were opened in 1951. Near Eger, northeast of Budapest, crude oil is extracted on a smaller scale and also on the Great Plain at a number of sites, the largest being at Algyó, as well as at Pusztaföldvár and Battonya. The total production of these fields is slight compared with the large amount of imported petroleum, for almost 3 million tons arrive from the Ukraine and are transported to the oil refinery at Százhalombatta. Natural gas is obtained in the oilfields and at a number of sites on the Great Plain (e.g. at Hajdúszoboszló); part of it is used for supplying Budapest with gas. Gas fields were opened up at Babócsa, 50 km southwest of Kaposvár (Transdanubia) and at a number of sites in the Trans-Tisza region, and more recently in the Órség area, near the Austrian border. The extracted volume of natural gas does not meet domestic demand; therefore, Hungary has imported natural gas from Transylvania (now Romania) since 1957. The great increase in energy demand is partly satisfied by the energy production of the Paks nuclear power station. There is a plan for re-enhancing its capacity. According to the plan, each of the four blocks, output will be ca 500 MW by 2005. To increase the production of electricity, experts are studying gas turbine power station plants. They require considerably less investment than nuclear stations; their operating costs are economical and there is no radioactive waste material. Experts are also engaged in the study of wider use of other natural resources (wind, sun, water and bio-energy). The Falcon Oil and Gas Company of Canada in 2006 found earthgas in the large gas-fields in the vicinity of Makó. According to estimates it would supply domestic consumption of Hungary at least for the next 100 years. – B: 1020, 1051, T: 7665.→

**Trianon Peace Treaty.**

**England, Hungarians in** – The first mention of the very first Hungarian in England, Jakab Bogdán, is dated to the turn of the 17/18th centuries. He was known as James Bogdán, court painter of King William III. From the 1830s, there were a few craftsmen living in England, i.e. József (Joseph) Engel, sculptor, as well as József (Joseph) Szentpétery and Károly (Charles) Zehensdorf, goldsmiths. The first notable group of 150-200 Hungarian immigrants was the so-called Kossuth-emigrants after the collapse of Hungary's War of Independence against Austria, in 1849. They settled mostly on the Island of Jersey. Some of them lived as invited guests on country estates and in castles. They were former ministers, military engineers and field officers. The most well-known of them are Bertalan (Bartholomew) Szemere, Prime Minister, Lázár (Lazarus) Mészáros, Minister of Defense, Ferenc (Francis) Pulsky, Ambassador to England, Generals János (John) Czetzy and György (George) Klapka, Ede (Ed) Reményi, violinist and Ferenc (Francis) Salamon, historian. In 1851-1852, there was a military academy, called *Honvéd Tanoda*, in London, with 30 students of officer rank. The reason for this particular wave

of emigration was political. Most of them returned to Hungary after the Compromise with Austria in 1867.

After World War II, as a result of the Soviet military occupation and political changes, some 5-6,000 Hungarian refugees arrived to England. Some of them moved on to Canada, the USA or Australia in 1952-1953. There were some 21,000 new Hungarian refugees in England after the crushed Revolution and Freedom-fight of 1956. By the estimate of a Hungarian newspaper, the number of Hungarians living in England in 1961 was 32,990 and 450 in Ireland. By the estimates of the Hungarian State Statistical Office, they numbered 25,000 in 1969. According to the data provided by the *Office of Hungarians Beyond the Borders (Határon Túli Magyarok Hivatala-HTMH)*, the number of Hungarians living in England was 25-30,000, including 5,000 in the London area, in 2002. After Hungary joined the European Union in 2004, the number of Hungarians seeking jobs in England grows steadily, year by year. Hungarians can be found in every major city of the UK. In the organized life of Hungarians, the formation of the *National Alliance of Hungarians in England (Angliai Magyarok Országos Szövetsége-MAOSZ)* in 1992 was significant. Some 14 organizations joined in this super organization, including the *Freedom Fighters Organization (Szabadságharcos Szövetség)*; the *For Transylvania Alliance (Erdélyért Szövetség)*; the *Gendarmerie Veteran Community (Csendőrök Bajtársi Közössége)*, and the Churches. There are Hungarian cultural organizations scattered all over the country, including the *British-Hungarian Fellowship (Brit-Magyar Társaság)*; the *Hungarian Cultural Circle of London (Londoni Magyar Kulturkör)*; the *Kossuth Hungarian Society in Rochdale (Rochdalei Kossuth Magyar Egyesület)*; *Hungarian Cultural and Community Center in Bradford (Bradfordi Magyar Kulturális és Társadalmi Központ)*; the *Oxford Hungarian Club in Middlesborough (Middlesboroughi Oxford Magyar Club)*; the *Hungarian Circle in Tesside (Tessidei Magyar Kör)*; the *Hungarian Society in Kingston (Kingstoni Magyar Egyesület)*; the same is in *Kent, Sussex, Luton, Bristol*; the *Organization of Hungarian Jews (Magyar Zsidók Egyesülete)*; the *Hungarian Folk Dance Group (Magyar Népi Táncsoport)*; the *Kossuth Boy Scout Troop*; and the *Hungarian Children's Group (Magyar Gyermekcsoport)*. As for the Churches, there is a Hungarian Catholic Society in England with an archpriest, a Hungarian Reformed Church, as well as a Hungarian Lutheran Church. The MAOSZ publishes the quarterly *Tükör (Mirror)*. The Hungarian literary, artistic and scientific life in England is active and lively. – B: 1062, 1104, 1364, T: 3240, 7103.→**Szemere, Bertalan; Mészáros, Lázár; Pulszky, Ferenc; Czetz, János; Klapka, György; Reményi, Ede; Salamon, Ferenc.**

**English Ladies** (Hungarian: *Angolkisasszonyok*, Latin: *Institutum Beatae Mariae Virginis – IBMV*; since 2003: *Congregatio Jesu*) – Monastic Society (Congregation) for women's education. Its founder was Maria (Mary) Ward (1585-1645) of an ancient English noble family, who collected English women, fleeing to the continent as a result of religious persecution of Catholic women, of Catholic noble families, and assembled them into a social group, a congregation. From this assembly Mary Ward decided to form an order, whose mother superior is placed directly under the Pope and her model was the Jesuit Order. The first college was at St Omer in Holland, established in 1609. Its chief aim was young women's education. The dress of its members was the dress worn by English widows. The Society spread quickly, though in 1630 Pope Urban VIII suppressed it; however, it received definitive papal recognition in the 19th century by Pope Pius IX

in 1877. Its motherhouse and center became Rome. In 1990, 2623 nuns were living in 158 cloisters.

In Hungary, it was Cardinal Péter Pázmány (1570-1637) who first provided them with residence in Pozsony (now Bratislava, Slovakia), which did not last long. However, famous boarding schools were established by them, under Empress and Queen Maria Theresa (1740-1780) at Buda, Vác and Pest, in the 18th century. In 1877, the 4 cloisters housed 38 nuns. In 1930, 5 cloisters had 295 nuns; in 1950, 7 cloisters with 400 nuns. Other schools for women were established at Eger (1852), Eperjes (now Prešov, Slovakia, 1882), Veszprém (1860), Kecskemét (1917), Nyíregyháza (1929) and Zugliget (1926). In the night of 18/19 June 1950, the nuns from their cloisters in Budapest and Eger were carried off by Communist police to Máriabesnyő, east of Gödöllő. The nuns of Veszprém and Nyíregyháza fled, to avoid being dragged off. The cloister at Kecskemét became a concentration camp. They were forbidden to wear their nun's habit. This marked the beginning of the Communist persecution of the English Ladies Order under the Soviet military occupation of Hungary. The Order was revived in 1989, with 138 members, and grew after the Soviet forces had left Hungary in 1991. At present, the English Ladies function in three towns (Eger, Kecskemét and Veszprém) with a total membership of 2192. They taught in primary classes in Eger, in girls' high schools in Eger and Kecskemét, also colleges, and one University College. They gave religious instructions in teachers' colleges and pastoral work in their parishes. – B: 0945, 1068, 1582, 1924, T: 7456.→**Pázmány, Péter; Mária Terézia, Empress and Queen; Religious Orders, Roman Catholic; Catholic Church in Hungary.**

**Entente** – Short name for the *Entente Cordiale*, alliance between France and Britain from 1891 to 1893, and later applied to the Moroccan situation of 1904. In the years preceding World War I, the Entente already had a major impact on great power diplomacy, as demonstrated in the occupation of Bosnia and the resolution of the Moroccan crisis. By World War I, it had become an alliance of Great Britain, France and Russia, primarily against Germany, built on previous understandings. During the Great War, Belgium, Italy, Greece, Serbia and the USA joined; but Russia left the Entente in 1917. Due to rivalry in the 1920s between the United States, France and Britain, the Entente fell apart. Subsequently the term “Allies” came to be used. The so-called “Little Entente” was invented following the creation of Czechoslovakia after World War I, by E. Beneš, who allied his newly created state with similar creations, such as the kingdom of the Serbs-Croats and Slovenes, later called Yugoslavia, as well as Romania. As the *Entente* came to mean keeping Germany in its place from the West, the *Little Entente* was to do the same from the East, and to guarantee the new borders of Hungary, dismembered by the Versailles-Trianon Dictated Peace Treaty in 1920. However, these alliances failed to prevent the outbreak of World War II. The united Europe made them obsolete, although some of their deeds still burden certain countries, among them Hungary, and are yet to be rectified. – B: 1078, 1153, T: 7661.→**World War I; World War II; Trianon Peace Treaty; Paris Peace Treaty; Little Entente; Beneš, Eduard.**

**Entz, Géza (1)** (Mezőkomárom, 29 March 1842 - Budapest, 4 December 1919) – Zoologist. He completed his university education in Pest and earned a Doctoral Degree in Medicine in 1867. At first, he was an assistant professor at the Faculty of Biology and Physiology of the University of Pest, and finally a professor at the Academy of

Agriculture at Kolozsmonostor (outskirts of Kolozsvár, now Cluj-Napoca, Romania). Later, he became a university professor in Budapest. He discovered animal-plant symbiosis and occupied himself mostly with general zoological problems. At first, he taught Darwin's theory of evolution, but later he represented anti-Darwinist views. – B: 1122, T: 7675.→**Ponori Thewrewk, Aurél (1)**.

**Entz, Géza (2)** (Kolozsvár, now Cluj-Napoca, Romania, 30 March 1875 - Budapest, 21 February 1943) – Zoologist. He studied at the universities of Kolozsvár and Budapest and received a PhD in Philosophy in 1902. At first he taught at Budapest; later went to Utrecht, Holland, where he became a professor at the University. After returning to Hungary, first he was appointed Director of the Tihany Biological Research Institute, then a professor at the University of Budapest. He occupied himself with many problems of general biology and general zoology. The up-to-date examination of hydrobiology of Lake Balaton was his and his co-workers' main accomplishment. – B:1122, T: 7675.→**Balaton, Lake**.

**Enyedi, Andor** (Andrew) (Szirénfalva, now Ptruska, Slovakia, 5 October 1888 - Budapest, 11 July 1966) – Bishop of the Reformed Church, theologian. He completed his high school and his Theology studies at Sárospatak (1906-1910), and earned a Doctoral Degree in Practical Theology in Debrecen (1928). He was Assistant Minister in Sátoraljaújhely (1910-1913) and in Alsómihály (1913-1904). He was an army chaplain (1914-1915) and minister in Sátoraljaújhely (1915-1924), then in Miskolc (1924-1953). He was Bishop of the Cistibiscan Reformed Church District (*Tisszáninnen Református Egyházkerület*) (1942-1952). In 1952, at the request of the Communist state, his Church District was attached to the Transtibiscan Reformed Church District (*Tiszántúli Református Egyházkerület*). He retired from the bishopric, as well as from the ministry in 1953. Besides articles published in church papers, he edited the *Guidance for Home Mission (Belmissziói Útmutató)* (1931-1941) and the *Bulletin of the Reformed Church in Miskolc (A Miskolci Református Egyház Értesítője)* (1925-1944). His works include *Earthly Life of Jesus Christ (Jézus Krisztus földi élete)* (1937); *Prayerbook (Imakönyv)* (1946), and *On a Mission of the Great King (A nagy király követségében)*. He was one of the relevant theologians of the Reformed Church in the mid 20th century. – B: 0910, T: 7103.→**Reformed Church in Hungary**.

**Eörsi, István** (Stephen) (Budapest, 16 June 1931 - Budapest, 13 October 2005) – Writer, essayist, dramaturgist. During his university years, he was a student of the philosopher György (George) Lukács. His first poems appeared in 1952. He was a high-school teacher (1953-1954), and a contributor to the *Free Youth (Szabad Ifjúság)*, and the *University Newspaper (Egyetemi Lapok)* (1953-1956). He participated in the Revolution of 1956. After it was crushed, he was sentenced to eight years in prison and was freed by amnesty in 1960. From 1964, he was a free-lance writer, translator and a contributor for the literary review, *Life and Literature (Élet és Irodalom)*. From 1977 to 1982, he was a dramaturgist at the Gergely Csíky Theater (*Csiki Gergely Színház*), Kaposvár, but because of his political opposition, his contract was not renewed. He lived in West Berlin (1983-1986), where his drama *Interrogation (Kihallgatás)* was performed (1984). From 1989, he was a dramaturgist again at the Theater of Kaposvár; and in the same year became a founding member of the *Free Democratic Party (Szabad Demokrata Párt)*. His style was often sarcastic, even abrasive, and he passionately held his political views. He

was a popular playwright. His writings include *Lonci in Orange* (*Lonci narancssárgában*) stories, poems (1978); *Nine Dramas* (*Kilenc dráma*) (1988); *The Hat and the Streetcar* (*A kalap és a villamos*) juvenile poems (1992); *I and God* (*Én és az Isten*) poems (1994); *Travelers in No Man's Land* (*Utasok a senki földjén*) (1998), and *Nails* (*Szögek*) collected poems (2001). He translated several Shakespeare plays and modern American authors. He was awarded a number of prizes, among them the Attila József Prize (1952), the Prize of the *Frankfurter Autorenstiftung* (1983), the Austrian Translator Prize (1988), the Prize of the Theater Critics (1989, 1990), and the Kossuth Prize. – B: 0874, 0878, 1257, T: 7103.→**Lukács, György.**

**Eosin Glaze** – A glaze developed by the Zsolnay Porcelain Works of Pécs, Hungary. By analyzing the shine of the metallic glaze on the ornamental plates of 16th century Italian majolica of master Giorgio Andreoli, Professor Vince Wartha worked out its chemical composition in the 1890s, and thus developed the eosin glaze. When fired, a pearly green metallic shine is obtained. Wartha did not have his invention patented, thus it became public property. It was the Zsolnay Works that put the method into practice and established their fame in porcelain manufacturing. – B1138, 1226, T: 7456.→**Wartha, Vince; Zsolnay, Vilmos.**

**Eötvös (E)** – The scientific unit *Eötvös* is used in geophysics to measure the rate of change or gradient in the acceleration of gravity with horizontal distance. One *Eötvös* equals  $10^{-7}$  Gal per meter. The largest component is the vertical gravity gradient, being about 3000 *E* on Earth. The horizontal components are approximately half this size; mixed gradients are below 100 *E* for the normal field. Gravity-gradient anomalies can be much larger and reach 1000 *E* in a mountainous area. This unit is named after the Hungarian physicist Baron Loránd (Roland) Eötvös (1848-1919). – B: 1078, T: 7456.→**Eötvös, Baron Loránd.**

**Eötvös, Baron József** (Joseph) (Buda, 13 September 1813 - Pest, 2 February 1871) – Writer, poet, educator, politician. He completed his studies at Pest in 1831. He was vice-notary at County Fejér. Between 1832 and 1836, he was frequently in Pozsony (now Bratislava, Slovakia) in the distinguished company of Count István (Stephen) Széchenyi, Ferenc (Francis) Kölcsey and Ferenc Deák. He traveled in Germany, France, England, Switzerland and Holland. He was Minister of Education and Culture of the first Hungarian Government in 1848. He settled in Munich in 1851. He participated in the preparation of the Compromise between Hungary and Austria in 1867. He was Minister of Education and Culture of the Andrassy Government in 1867. He had a patient and enlightened view in regard to the ethnic minorities. He formulated, together with Ferenc Deák, the Equality Law of the minorities. He achieved an education reform; reorganized Church-State relationship, and built teachers' training colleges. His major literary works are: *The Critics* (*Kritikusok*) (1831), a play. His dramas include *The Engaged* (*A házasuló*) (1833); *Vivat Equality!* (*Éljen az egyenlőség!*) (1844); *The Carthusian* (*A karthausi*) (1833). *The Village Notary* (*A falu jegyzője*) (1845) was one of his satires. His political writings include *Hungary in 1414* (*Magyarország 1414-ben*) (1847) and *The Influence of 19th Century Main Ideas upon the State, vols. i-ii* (*A XIX század uralkodó eszméinek befolyása az álladalomra I-II*) (1851-1854). Twenty volumes of his collected works were published between 1900-1903. – B: 0883, 1257, T: 7103.→**Széchenyi, Count István; Kölcsey, Ferenc; Deák Ferenc; Ráth, Mór; Szalay, László.**

**Eötvös, Baron Loránd** (Roland) (Buda, 27 July 1848 - Budapest, 8 April 1919) –

Physicist. In 1870, he completed his Doctoral studies in Heidelberg, Germany. In the same year he was appointed Professor of Physics at the University of Pest and organized the Institute of Experimental Physics. Later, he became Rector of the University. Between 1889 and 1905, he was President of the Hungarian Academy of Sciences. Starting from the early 1870s, for two decades, he was preoccupied with the phenomena of capillary action. He worked out a new method for measuring the surface tension of liquids. He recognized along theoretical lines, the relationship between the surface tension of liquids, measured at different temperatures, and their molecular weights. Near the end of the 1880s he also turned his attention to

gravitational phenomena. His study of the Earth's gravitational field led to his development of the Eötvös Torsion Balance, together with Dezső (Desider) Pekár and Jenő (Eugene) Fekete. This development, long-surpassed in precision, resulted in the finding that inert mass and gravitational mass are equivalent and it became later a major principle of Albert Einstein's General Theory of Relativity. Eötvös published his scientific findings in 1905. R.H. Dicke stated, "*Without Eötvös's documentation, Albert Einstein would never have been able to formulate his relativity theory!*" Eötvös extended his studies to the magnetism of the Earth; and for its measurements he constructed appropriate instruments. He drew attention to the appearance of the Coriolis force, the existence of which he demonstrated with measurements, thus providing further proof for the rotation of the Earth. In 1891, he initiated the Mathematical and Physical Society, the precursor of the Physical Society. He served as Minister of Education and Religion during 1894-1895. In 1895, he established the Eötvös College, named after his father, and became its first curator. He even joined the tourist movement in Hungary, and was the first President of the Hungarian Tourist Association between 1891 and 1899. This organization named after him its first hostel on Dobogókő (mountain in the Visegrád area at the Danube River Bend) and it maintains his memory. His spare time was spent in the mountains and he became an excellent mountaineer; at the age of 18, he scaled the highest peak of the Swiss Alps. The University of Budapest was renamed in his honor; its full name now being Loránd Eötvös University of Sciences. – B: 0883, 1031, T: 7456.→**Eötvös Effect Eötvös (E); Eötvös Law; Eötvös Pendulum; Eötvös Lóránd University of Science; Krenner, József; Universities; Pekár, Dezső; Fekete, Jenő.**

**Eötvös Effect** – As a result of the Earth's rotational direction, the weight of the bodies moving eastward is less than when they are at rest in relation to the Earth. On the other hand, the weight of bodies moving westward increases. This peculiar behavior can be explained by the variation of the centrifugal force, as a result of the Coriolis Force, a phenomenon discovered by Baron Loránd (Roland) Eötvös. – B: 1138, 1153, T: 7456.→**Eötvös, Baron Loránd; Eötvös (E).**

**Eötvös, Károly** (Charles) (Mezőszentgyörgy, 11 March 1842 - Budapest, 13 April 1916) – Lawyer, politician, writer, journalist. He read Law at the Law Schools of Pápa, Kecskemét and Budapest, taking his judicial exams in 1866. In 1863, he participated in the Almásy conspiracy, and as a consequence, suffered several months' imprisonment. In 1865, he taught Law at the Academy of Pápa and, following the Compromise between

Austria and Hungary (1876), he became a provincial court judge. In 1872, he attracted attention with his very effective orations as a parliamentary representative of the *Deák Party* (*Deák Párt*). He retired for a short time to his estate; but from 1877 on, as a Leader of the Opposition, he actively participated in public life. He was a follower of liberalism in the Reform Age. In 1883, he took on the role of a defense lawyer in the anti-Semitic trial of Tiszaeszlár. Through this lawsuit, his name became known all over the country. In 1892, he filled the post of President of the Independent and the '48-ers Parties. Shortly thereafter, he formed another opposition party. He worked for several of the Budapest papers, such as *Diary of Pest* (*Pesti Napló*), *Concord* (*Egyetértés*), etc. In his literary works, such as his memoirs and travelogues, he depicted the Reform period, the Freedom Fights of 1848, and the liberalism of the untitled nobility as inspirational examples. His works are attractive because of his enjoyment in story-telling and anecdotal sense of humor. His works include *Works of M.E.K., I-XXIV, 1901-1909* (*M-E-K-munkái, I-XXIV, 1901-1909*); *Hungarian Figures*, (*Magyar alakok*) contemporary sketches (1904); *Fight for a National Army* (*Harc a nemzeti hadseregért*) (1906); *Fight for the Constitution* (*Harc az alkotmányért*) (1909), and *Ups and Downs of Married Life* (*Házassági viszontagságok*) (1956). – B: 0883, 1257, T: 7684.→**Deák, Ferenc; Reform Age; Tiszaeszlár Affair.**

**Eötvös Law** – Baron Loránd (Roland) Eötvös (1848-1919), in 1886 worked out a new method of determining the surface tension of liquids. He found that there was a relationship between the surface tension of liquids and their molecular weight. Based on this finding, the rule, later known as the Eötvös law, says that the rate of change of molecular surface energy with temperature is a constant for all liquids. It states that the molecular surface energy of liquids depends only on the temperature and varies proportionately with it and is independent of the material quality of the liquid. The law plays an important role in the field of physical chemistry in the determination of the molecular weight of liquids. – B: 1078, T 7456.→**Eötvös, Baron Loránd; Hungary, History of; Literature of Hungary.**

**Eötvös Loránd University of Budapest, Library of** – Named after Baron Loránd (Roland) Eötvös, the world-renowned physicist of the late 19th century. The university library was first established in 1561, and belonged to the Jesuit College of Nagyszombat (now Trnava, Slovakia). It became the library of the Péter Pázmány Science University in 1635. This University moved to Buda in 1777. At present, the library contains approximately 1.5 million volumes, 200 medieval codices, including 12 Corvinas, and about 1200 ancient documents. The library serves university research, and is also open to the public. – B: 1150, T: 7456.→**Eötvös, Baron Loránd; Universities.**

**Eötvös Pendulum** – A sensitive instrument designed for measuring minute spatial changes in gravity. It is the invention of Baron Loránd (Roland) Eötvös and was registered in 1896. It is a torsion balance, where, on the two ends of a pole, a wire of 0.02 mm. diameter is suspended, carrying two masses of equal weight. One of them is hanging 200 mm lower than the other. The unevenness of the gravity field causes the pendulum to swing out. From the direction and measure of the deflection, one is able to infer the nature of the gravity field. With the knowledge of the variations of gravity it is possible to determine the variations in density. In geological research for raw materials, one can locate the position of oil, metallic ores, salt or other formations. The crude oil deposits of

County Zala in Hungary were discovered with the Eötvös Pendulum, as were the oil fields of Texas and Venezuela. It was also used with great success in Argentina and elsewhere. – B: 1138, 1153, T: 7455.→**Eötvös, Baron Loránd, Eötvös Law; Eötvös (E).**

**Eötvös, Péter** (Székelyudvarhely, now Odorheiu Secuiesc, Romania, 2 January 1944 - ) – Composer, conductor. He studied at the Ferenc (Franz) Liszt Music Academy of Budapest (1958-1965), and in the Hochschule für Musik, Cologne (1966-1968). He was a musical director at the Comedy Theater (*Vígszínház*), Budapest (1962-1963) and, as a free-lance composer; he also wrote film and theater music (1963-1971). He was a music coach at the Opera of Cologne, Germany (1967-1968) and a member of the Stockhausen Ensemble (1968-1976). He was an electronic music producer at Radio Cologne (1971-1979); Music Director of the Inter-Contemporary Ensemble, Paris (1979-1991); Conductor of the BBC Symphony Orchestra, London (1985-1988); a guest conductor of the Festival Orchestra, Budapest (1992-1995). He worked for the Holland Radio from 1994. He was a professor at the Music Academy of Karlsruhe, Germany (1992-1998); and from 1998, Professor at the Music Academy of Cologne. He is the founder of the Eötvös International Institution of Young Conductors, and member of the Academy of Arts, Berlin, as well as of the Széchényi Literary and Arts Academy of Budapest. His works include operas: *Angels in America (Angyalok Amerikában)*, premiered in Los Angeles in January of 2013; and *Three Sisters (Három nővér)*; *Radames*, chamber opera; *3 Madrigal Comedies*, and *Endless Eight (Végtelen nyolc)* For orchestra: *Chinese Opera (Kínai opera)*; *Atlantisz Triangle*; *Shadows (Árnyékok)*; and two violin concertos; the second, *DoReMi*, commissioned jointly by the Los Angeles Philharmonic, the Leipzig Gewandhaus and the BBC Proms Orchestras, was premiered by violin virtuoso Midori in Los Angeles in January of 2013. He also composed numerous chamber works. His works were published by the Editio Musica, Budapest; the Salabert, Paris; the Ricordi, München, and the Schott Music, Mainz. His records have been published by the BMC, DGG, ECM, EMI, Gramophon AB BIS, Kairos, Vienna. He is a recipient of numerous prizes, among them the Béla Bartók-Ditta Pásztory Prize (1997), the Grand Prix de la Critique (1997-1998), the Prix Claude-Rostand (Paris), the Victoires de la Musique Classique et du Jazz (Paris) (1999), the Prix Caecilia (Brussels) Prizes, and the Gundel Prize (2001). – B: 0874, 1031, 1426, T: 7103.

**Eperjes Gradual** – (Eperjes, now Prešov, Slovakia) – An an important Codex of the 17th century for Hungarian polyphonic choir practices. It was written between 1635 and 1652 for the Hungarian Lutheran Church of Eperjes. – B: 1197, 1257, T: 3240.→**Evangelical Lutheran Church in Hungary; Codex Literature.**

**Eperjes, Károly** (Charles) (Hegykő, 17 February 1954 - ) – Actor. He graduated from the Academy of Theater and Cinematic Arts in 1980. He acted in the Csíky Gergely Theater (*Csíky Gergely Színház*), Kaposvár in 1981; the National Theater (*Nemzeti Színház*), Budapest in 1983; in provincial theaters, and with the Artists' Theater (*Művész Színház*), Budapest, the Thalia Theater (*Thália Színház*), Budapest, and the László Kelemen Theatrical Circle (*Kelemen László Színházi Kör*), Budapest. He is an artist who follows his own laws. His interpretations are filled with the spirit of his roles based on his own personal drive. Some of his more important theatrical roles are: Joey in Pintér's *Returning Home (Hazatérés)*; Róbert Fűrész in Brecht-Weill's *The Three Penny Opera*

(*Koldusopera*); Davies in Pintér's *The Caretaker* (*A gondnok*), and Hury in P. Claudel's *The Annunciation of Marie* (*L'annonce faite à Marie; Az angyali üdvözlés*). His film roles include *My God!* (*Uramisten*); *The Disciples* (*A tanítványok*); *Hungarian Requiem* (*Magyar gyászmise*); *Mr. Wallenberg* (*Wallenberg úr*); *Becoming Conscious* (*Eszmélés*), and *Bridge Man* (*Hidember*). He is recipient of a number of prizes and awards, among them, the Best Male Performer Award, Chicago (1985), the Mari Jászai Award (1986), best male performer and a special award of the World Theater Get-together, Cairo (1991), the Elizabeth Prize of the Piatra Meants French International Festival (1996), the Kossuth Prize (1999), Prima Prize (2006), Member of Society of Immortals (2009), and Freeman of Budapest (2011). – B: 0871, 1445, T: 7684.

**Epistola de Vita Tartarorum** – Title of the account of Julianus (Julian), a Dominican friar to Salvius de Salvis, Papal Legate and Bishop of Perugia about his second trip to the East, the expedition of his four Dominican brothers, and the danger of the Mongol hordes to Europe. The report was written in 1237-1238. – B: 1230, T: 3240. → **Julianus, Friar.**

**Era of the Hungarian Campaigns** (Between 862 and 970 AD) – In their new home, the Magyars continued their way of life, supplementing animal grazing with tilling of the land, while their warriors led campaigns into Central and Western Europe, not merely to recover the Avar treasures taken by Charlemagne, but mainly and primarily to carry out political objectives: (1) Defence of the newly established Magyar state in the Carpathian Basin (e.g. in 907, 949 and 950). These were deterrent campaigns. (2) Campaigns to keep the enemy fragmented. (3) Campaign to help their allies. (4) Larger-scale preventive wars. The Magyars considered the Avars as their kindred folk, and on this basis they claimed for themselves the lost Avar treasures, carried away as bounty by Charlemagne after he finally defeated the Avars. Contrary to the belief still held by many, looting and pillaging were not the primary objectives of these military campaigns, only incidental activities, as in any war. Many of them were carried out in alliance with some inviting German state. As in A.D. 955, Ludolf, when the son of the German King Otto the Great, and Otto's son-in-law, Conrad the Red, revolted against Otto and asked the Magyars for help. Finally, Otto defeated the Magyars at the battle of Lechfeld, near Augsburg on 10 August 955. This was a serious blow to the Magyars, but they were still strong enough to lead a campaign to Italy the following year. The campaign era came to an end toward the end of the 10th century. – B: 1230, 1286, 1525, 7456, T: 7103. → **Eckehart's Chronicle; Botond; Lehel's Horn; Lechfeld, Battle of.**

**Eraviskus People** (Araviskus) – A Pannonian ethnic group of Illyrian origin, who came under the heavy influence of the Celts. They lived in the north-eastern part of Transdanubia (*Dunántúl*) in the 1st century BC and survived the Roman rule. The Tabán and Békásmegyér excavations in and around Budapest give evidence of their highly advanced culture, relative to pre-Roman rule. The 1947 excavations revealed remnants of their settlements on the Gellért Hill of Budapest, including their mints. – B: 1138, T: 7676.

**Érd Clan** - According to a Hun legend version, found in the Kézai Chronicle, Etele (Attila) descended from this clan. The Chronicle of Pozsony (now Bratislava, Slovakia) calls the clan Ed and declares the brothers Ed (or Edu) and Edemen, who joined the Hungarians, and whom Anonymus, the Chronicle, calls Khabar leaders, as grandsons of Etele. The researchers suppose that the name Érd is the complete form of Ed, later called

Aba Clan, and connect its origin to Etele. This tradition is not provable, but not impossible. The clan's territory was the present-day County Fejér, southwest of Budapest, where the town Érd and Aba villages preserved their name. – B: 0942, T: 7685.→**Etele; Attila; Anonymus, the Chronicler; Khabars.**

**Erdei, Ferenc** (Francis) (Makó, 24 December 1910 - Budapest, 5 November 1971) – Economist, sociologist, writer, politician. He read Law at the University of Szeged and obtained his PhD in 1934. He joined in the “village-research movement”. He was MP of the National Smallholders' Party from 1944, and was in favor of working together with the Communists. He was Minister of Interior (1944-1945); Minister of State (1948-1949); and Minister of Agriculture (1949-1953). In 1956, he worked with Prime Minister Imre (Emeric) Nagy to create a multi-party political system. On 3 November 1956, he was arrested as a member of the Government Delegation negotiating the withdrawal of Soviet forces from Hungary; but was released a month later. He was Director of the Agrarian Research Institute in 1957, and General Secretary of the National People's Front (*Hazafias Népfront*) (1964-1967). He was a member, General Secretary, then Vice-President of the Hungarian Academy of Sciences (*Magyar Tudományos Akadémia*) (1967-1970). Toward the end of his life he was lay President of the General Synod of the Reformed Church in Hungary (*Magyarországi Református Egyház*). His major works are: *Quicksand (Futóhomok)* (1937); *Peasants (Parasztok)* (1938); *Hungarian Town (Magyar város)* (1939); *Hungarian Village (Magyar falu)* (1940); *Hungarian Peasant Society (Magyar paraszti társadalom)* (1941); *Agriculture and Cooperative (Mezőgazdaság és szövetkezet)* (1959); *Town and its Environment (Város és vidéke)* (1971), and *Collected Works (Összegyűjtött művek)* (1973-1988). There is a Ferenc Erdei Society in Makó (1987). He was a recipient of the Kossuth Prize (1948, 1962), the Cross of Merit of the Finn's Lion Knights, and the Hungarian Banner Order of Merit (1970). – B: 0878, 0879, 0877, 1257, T: 7103.→**Nagy, Imre; Smallholders' Party; Hungarian Academy of Science.**

**Erdei, Zsolt** (nickname *Madár*/Firebird,) (Budapest, 31 May 1974, Budapest - ) – Boxer. He is champion in the light heavyweight division. His record is 25-0 (15 KOs), and his trainer is Fritz Sdunek. He is the current WBO and linear World Light Heavyweight Champion. In 1997, he became World Champion in Budapest. In 1998, and again in 2000, he was European Champion. Erdei boxed at the 2000 Summer Olympics in Sydney, Australia. He won a Bronze Medal in the middleweight division. Erdei won the WBO Light Heavyweight Title from Julio Cesar Gonzalez by unanimous decision on 17 January 2004. Since then, Erdei has successfully defended the title six times. – B: 1031, 1641, T: 7456.

**Erdély**→**Transylvania** (now part of Romania).

**Erdélyi, Arthur** (Diamant) (Budapest, 2 October 1908 - Edinburgh, Scotland, 12 December 1977) – Mathematician. He was born into a Jewish family. He attended primary and secondary schools in Budapest (1914-1926). From an early age his interest was mathematics. For a university education he went to Brno, Czechoslovakia, to study electrical engineering. However, after winning prizes in a mathematics competition, he switched to mathematics. Between 1930 and 1937, he published some 30 papers in mathematics. He obtained a Ph.D. in 1938 from the University of Prague. To avoid internment he moved to Edinburgh, Scotland, on 26 January 1939, where he was

involved in research, later becoming a lecturer there. He received a PhD from the University of Edinburgh in 1940. Between 1949 and 1964, he was Professor at the California Institute of Technology, where he and his team produced three volumes of *Higher Transcendental Functions*, and *Tables of Integral Transforms* in two volumes. These works are the most widely cited mathematical works by applied mathematicians and physicists throughout the world. In 1964 he returned to Edinburgh, where he remained as professor of mathematics until his death. He wrote 178 papers and articles and two major texts: *Asymptotic expansions* (1955) and *Operational calculus and generalised functions* (1962). “Erdélyi was a mathematician of immense talent and had a wonderful ability to range over the fields of both pure and applied mathematics” (Obituary of The Times). Among other honors he was elected fellow of the Royal Society (1945), was also a fellow of the Royal Society of Edinburgh (1945), as well as a member of the Academy of Sciences of Turin, Italy (1953), and was awarded the Gunning Victoria Jubilee Prize (1977). – B: 1278, 1122, 1031, T: 7103.

**Erdélyi, Géza** (Abara, now Oborin, Slovakia, 2 April 1937 - ) – Bishop of the Christian Reformed Church in Slovakia, theologian, art historian. He completed high school in Komárom and studied Theology at the Komenský Department of Evangelical Theology at Charles University, Prague (1954-1958), Berlin (1967), at the Faculty of Theology of the University of Groningen, Holland (1987-1988), and in Wuppertal, Germany (1988). He acquired a Degree in Art History, (1976), and a Doctoral Degree in Theology, both from Prague (1988). He was press secretary of his Church (1960-1963); Parish Minister in Szalóc (1963-1966), in Rozsnyó (now Roznava, Slovakia 1966-1958), in Hanva (1985-1999), and in Rimaszombat from 1999. He has been professor at the John Calvin Reformed Theological Academy, Rév/Komárom (now Komarno, Slovakia) from 1994, and was elected Bishop of the Reformed Christian Church in Slovakia in 1996; he resigned in 2008. He is president of the Consultative Synod of Hungarian Reformed Churches. He published a book, entitled *Classicist Architecture of County Gömör (Gömör megye klasszikus építésze)* (1996), and many theological and art history studies and articles in Hungarian, Slovakian and German. He refused a Hungarians State Medal for political reasons in 2005. – B: 0910, T: 7103. → **Reformed Church in Slovakia.**

**Erdélyi, István** (Stephen) (Nagyvárad, now Oradea, Romania, 28 August 1931 - ) – Archaeologist, historian. He completed his higher studies in Medieval Archaeology and Museology at the University of Budapest in 1955. In 1959, he obtained a B.A. Degree in History of Archaeology from the University of Leningrad, and a PhD in History from University of Budapest in 1976. He was a lecturer there in 1996; he was a trainee and an assistant museologist at the Hungarian National Museum in 1954 and 1955; postgraduate student at the University of Leningrad from 1955 to 1959; a research associate of the Archaeological Institute of the Hungarian Academy of Sciences from 1959 to 1971, and an Associate of the Altaistic research-group of the Hungarian Academy of Sciences (1992-1994). He was a lecturer of the Philosophical Association of Miskolc (1990-1992); Head of the Department of History-Archaeology (1992-1994); Professor of History at the Károli Gáspár Reformed University, Budapest (1993-1998); Professor at the University of Pécs (1999-2000); a research associate of the Archaeological Institute of the Soviet Academy of Sciences (1968-1970, 1980-1982); and Professor at the University of Budapest from 1985. His chief area of specialization was ancient Hungarian history, Archaeology of the Avar-Slavic period, especially the bronze technology of the Avars.

He found important details in the excavations of the Asiatic Hun and Turkic monuments, similar to the material remains of the Avars in the Carpathian Basin; exploration of their eastern connections and in the study of their way of life. He was an associate leader of the Mongolian-Hungarian archaeological expeditions (1961-1990), and Editor-in-Chief of the journal, *Our Forebears (Eleink)* from 2002. His works include *Avar Art (Avar művészet)* (1966, also in English, French and Russian); *Asian Horse-riding Nomads (Ázsiai lovasnomádok)* (1982); *The Hungarian Conquest and its Preceding Events (A magyar honfoglalás és előzményei)* (1986, 2002); *Related to Sumerians? (Sumér rokonság?)* (1989); *Introduction to Hungarian Ancient History (Bevezetés a magyar őstörténetébe)* (1994); *From Lake Baikal to Lake Balaton (A Bajkáltól a Balatonig)* (1997), and *Archaeological Expeditions in Mongolia* (2000). He was awarded the Körösi Csoma Prize (1997). – B: 1078, T: 7456. → **Avars; Huns; Homeland Settlement.**

**Erdélyi, János** (John) (Kiskapos, now Kapusany, Slovakia, 1 April 1814 - Sárospatak, 23 January 1868) – Poet, critic, esthetician, philosopher. Beginning in 1824 he completed his studies at the Reformed College of Sárospatak; from 1835 he also read Law and obtained a Law Degree in 1841. In between, he accepted positions as an educator. From 1834, his poetry and critiques appeared regularly. He traveled to Italy, New York and Central-Europe (1844-1845). He told tales of his travels by way of interesting letters in the pages of *Story Teller (Regélő)* and the *Fashion Pages of Pest (Pesti Divatlap)*. By the 1840s, he had become a major figure in literary life. In 1841 he edited the *Regélő (The Storyteller)* and *Pesti Divatlap* (Fashion Journal of Pest) together with János (John) Garay; and from 1842 he was a member of the *Kisfaludy Society (Kisfaludy Társaság)*, then the secretary thereof (1843-1860). An undertaking of major importance was his collection of folksongs and legends. In 1847, as Editor of the *Literary Review (Szépirodalmi Szemle)*, he introduced esthetic criticism, and through his studies, he prepared the way for the great lyric poet Sándor (Alexander) Petőfi. In 1848-1849, he was Director of the National Theater (*Nemzeti Színház*), and in 1849 he became Editor of the journal *Republic*. After the lost 1848-1849 War of Independence, he was forced to flee. In 1851 he was invited to the Philosophy Faculty of the Reformed College of Sárospatak, where he participated in the editing of the *Newer National Library (Újabb Nemzeti Könyvtár)*, and in 1857, he established the *Sárospatak Notebooks (Sárospataki Füzetek)*. From 1863, he was the Librarian of the College and concurrently occupied the Chair of Hungarian Literature. His esthetical, literary, theoretical and critical activities are significant. During his time at Sárospatak he put Hegel's idealism to the forefront. Among his major works are: *Our National Industry (Nemzeti iparunk)* (1843); *Poetry of E.J. (E-J- költeményei)* (1844); *Collection of Hungarian Folk Poetry. Folk Songs and Legends, vols. i,ii,iii (Magyar népköltési gyűjtemény. Népdalok és mondák I-III)* (1846-1848); *Book of Hungarian Proverbs (Magyar közmondások könyve)* (1851), and *Philosophy in Hungary (A bölcsészet Magyarországon)* (1885). He was a member of the Hungarian Academy of Sciences (1858). – B: 0883, 1257, T: 7684. → **Reformed College of Sárospatak; Garay, János; Petőfi, Sándor.**

**Erdélyi, József** (Joseph) (Árgyelán) (Újbátorpuszta, 30 December 1896 - Budapest, 4 October 1978) – Poet. He went to school in Nagyszalonta, Déva (now Salonta and Deva in Romania) and Mezőtúr. He became a soldier in 1915, and fought in World War I, then lived in Budapest. His first poems were published in the literary review *West (Nyugat)* in 1921. His first book of poems, the *Violet Leaf (Ibolyalevél)* was published in 1922. He

was faithful to the traditions of folk poetry. His poetry was permeated with ancient pentatonics. He was able to express everything in the folk form. His poems approached the world with a mythological view. He showed clearly the aspirations and rebellions of the poor peasants, the bitterness of the people. He was forerunner of the folk movement. He was prosecuted on several occasions for his outspokenness. He lived in difficult circumstances, yet in a few years, he became the most popular member of the poets' circle and was staff member at several newspapers. In 1931 he visited Paris. Besides his poems, he was very much interested in linguistics (dictionary of etymology), in painting and wood sculpting. During World War II, he made enemies for himself and for his poetry. In 1944 he emigrated to the West. Later he was hiding in Romania. In 1947 he reported himself to the authorities and was condemned for war crimes. Freed in 1950, he returned to literary life in 1954 with his book of poems *Return (Visszatérés)*; but the political machinery was against more publications by him. His works include *Mirage and Rainbow (Délibáb és szivárvány)* poems (1927); *The Last Regal Eagle (Az utolsó királyság)* poems (1928); *The Sun has Risen (Felkelt a Nap)* poems (1933); *White Tower (Fehér torony)* selected poems (1938); *The Third Son (A harmadik fiú)* autobiography (1942); *Golden Stud (Arany ménés)*, poems (1959), and *Golden Wedding (Aranylakodalom)*, poems (1982). Some of his poems were included in English, French, Polish, German, Italian and Slovakian anthologies. – B: 0883, 0878, 1150, 1257, T: 3240.

**Erdey-Grúz, Tibor** (Budapest 27 October 1902 - Budapest, 16 August 1976) – Chemist. He completed his studies at the University of Budapest. A PhD Degree was conferred on him in 1924. He went on state scholarship to Munich and Berlin (1928-1931). He qualified as a pharmacist in 1938. From 1941 he was University Professor, and from 1949 he became Professor and Head of Faculty at the newly established Institute of Chemistry and Radiology in Budapest. His work in scientific research was outstanding in the field of electrochemistry. He was the author of more than 100 scholarly works, monographs and textbooks, including *On Atoms and on Material Structure (Az atomról és az anyag szerkezetéről)* (1930); *Introduction to Physical Chemistry (Bevezetés a fizikai kémiába)* (1943); *The Material Structure of the World (A világ anyagi szerkezete)* (1965); *Chemical Resources of Energy (Az energia kémiai forrásai)* (1967); *Kinetics of Electrtode-processes (Az elektródfolyamatok kinetikája)* (1969), and *Kinetik der Elektrodenprozessen (Kinetics of Electrtode-processes)* (1975). He filled various positions in the Hungarian Academy of Sciences from 1949, and finally became its President from 1970 to his death. He was a regular and/or honorary member of many foreign academies, and recipient of many awards, among them the Kossuth Prize (1950, 1956). – B: 0883, 1160, T: 7675.

**Érdi, Tamás** (Thomas) (Budapest, 23 November 1979 - ) – Pianist. He was born prematurely and blind as a result of incorrect incubator treatment. He began to play the piano at the age of five, his musical talent being evident at that early stage. His teachers, Erika Becht and Zsuzsa Kollar, used the so-called “structural” method, as a result of which he can play numerous piano pieces, among them 12 concertos despite the lack of eyesight. He was eight, when for the first time he appeared in the Vigadó of Pest. In 1993, in Moscow, he received second place in the Louis Braille International Piano Concerto Competition and, in 1995, he was awarded first place. He was 15 when, at the Budapest Spring Festival, conducted by Tamás Vásáry, he performed Mozart's Piano Concerto in A major, K.488 and, a little later, the D minor Piano Concerto, K.466, as

well as the Concert Rondo in D major, K.485. In 1994, he was accepted in the Music Academy of Vienna, and later continued his studies in Canada on a scholarship for the Royal Conservatory of Music Art Diploma Program of Toronto, where he became a pupil of Leon Fleisher, Jenny Regehr and Marc Durand; here, he obtained his artist's diploma in 2002. Since 2002, he has regularly taken part in the Parisian master-classes of the pianist Livia Rév. Besides his studies, he has regularly appeared in concerts in various places in the world over the years. He had solo evenings in Budapest, Kolozsvár (now Cluj-Napoca, Romania), Beirut, Kuwait, Bangkok, Buffalo, New York, Chicago and Toronto. He also appeared with the Symphony Orchestra of Iceland, with the Budapest Philharmonic under Rico Saccani, with piano concertos of Chopin, Mozart and Weber; he also played Mozart and Bach piano concertos with the Franz Liszt Chamber Orchestra (in Germany), with the Solti Orchestra, and with the Weiner Szász Chamber Symphony Orchestra, the Győr Symphony Orchestra, and the Vienna Mozart Orchestra. He had great success with his performances under conductor Manuel Hernandez-Silva of Venezuela at concerts in Florida and at Lincoln Center of New York, as well as in concerts with the Toronto Symphony Orchestra. Many of these Mozart concert performances have been released on recordings in Canada; in 2003 his CDs appeared featuring Schubert piano works; and in 2004, Chopin works both published by Hungaroton. – B: 2016, T: 7456.→**Vásáry, Tamás; Rév, Livia.**

**Erdő, Péter** (Budapest, 25 June 1952 - ) – Cardinal, primate, archbishop, theologian and canonist. He studied Theology at the Theological Seminary Budapest, where he earned a doctoral degree in 1976; continued his studies at the *Università Lateranense*, Rome, where he obtained a doctorate in Canonical Law in 1980. He was on scholarship at the University of California, Berkeley in 1995-1996. He was ordained in 1975, in Budapest; consecrated bishop in Rome in 2000, named and created cardinal in 2003. He was Chaplain in Dorog (1975-1977); Professor at the Theological Academy, Esztergom (1980-1986); Professor at the *Università Gregoriana, Rome*, (1986-1988); guest-professor there from 1988, and the same at *Pontificia Universidad Católica*, Buenos Aires, Argentina in 1996; *Pontificia Università Lateranense* in 1997, Rome; Professor at the Theological Academy, Budapest, from 1988, Péter Pázmány Catholic University, its Dean (1996-1998); President of the Postgraduate Canon-law Institution of the Catholic University; in the meantime Vicar of the Archbishopric Law Court of Esztergom (1994-1995); Vicar of the Bishop in the Archdiocese of Budapest-Esztergom (1994-1998); Deputy Bishop of the Székesfehérvár diocese from 2000. On 7 December 2002 Pope John-Paul II accepted the resignation of Primate Archbishop László (Ladislas) Paskai, and appointed Péter Erdő Archbishop of Esztergom and Primate of Hungary, in 2003 making him Cardinal. His fields of research are: Canon Law and History of Medieval Canon Law. He authored 200 studies and 16 books. A selection of his works is as follows: *Church Discipline in the Ancient Christian Age (Az ókeresztény kor egyház fegyelme)* (1983); *L'ufficio de primate nella canonistica da Graziano ad Ugucione da Pisa* (1986); *Book of Canon Law (Egyházi Törvénykönyv)* 4th ed. (2001); *Canon Law (Egyházjog)* (1994); *The Theology of Canon Law (Az egyházjog teológiája)* (1995), in Italian (1996), in German (1999), in Spanish (2000); *Introduction in historiam scientiae canonicae* (1990), in Spanish (1993); *Kanonistische Erträge einer Zusammenarbeit, ed.* (1997); *The Sources of Canon Law (Az egyházjog forrásai)*, (1998), in German (2002); *Storia della scienza del dritto canonico* (1999); *Canon Law in Medieval Hungary*

(*Egyházjog a középkori Magyarországon*) (2001), and *Only Mercy (Csak kegyelem)* (2003). He is Editor-in-Chief and a member of the editorial board of a number of periodicals and series: e.g. *Folia theologica*; *Canon Law (Kánonjog)* (1996-1998); *Studia Theologica Budapestiensia*; *Communio*, and *Hungarian Higher Education (Magyar Felsőoktatás)*. He is a member of many high-ranking and important committees. He participated in the preparatory works of state laws with regard to Church, and in preparing an agreement between Hungary and the Holy See. He is recipient of an Honorary Doctorate of the *Institut Catholique de Paris*, the Stephanus Prize, the Officer's Cross of Merit of the Republic of Hungary, the Galileo Galilei Prize and an Honorary Doctorate of the University of Kolozsvár (now Cluj-Napoca, Romania). He was elected member of the Hungarian Academy of Sciences in 2007; President of the Hungarian Bishops' Conference, and President of the European Catholic Bishops' Conference (2007). He is also the Great Chancellor of the Péter Pázmány Catholic University. – B: 0943, 1031, T: 7103. → **Catholic Church in Hungary.**

**Erdőalja**, Transylvania (*Erdély*, now Romania) – A small area East of Kolozsvár (now Cluj-Napoca) comprising six villages, which are populated by Romanians and Hungarians. The most significant are Györgyfalva and Kolozs, as these are still known by their Hungarian names. – B: 1134, T: 7656.

**Erdőd, Synods of** – The first Synod was convened on 20 September 1545, by Anna Somlyai Báthory, the widow of Gáspár (Gasper) Drágffy (?-1545) Prefect of the counties Kraszna and Central Szolnok, Seigneur of Erdőd. He was a supporter of the Reformation. The participants of the Synod expressed their views entirely in the Lutheran spirit in 12 articles. The Second Synod was called on 25 February 1555, and decreed in the spirit of Lutheran doctrine again. György (George) Báthori was the convener. There, the 20th article speaks not only against the Catholics, but also against the Calvinists. The decrees of both synods were believed to be lost until József (Joseph) Benő found them in 1795. Áron (Aaron) Kiss translated and published them under the title *The Decrees of Hungarian Reformed Synods of the 16th century (A 16. században tartott magyar református zsinatok végzései)*. – B: 1178, T: 7682. → **Evangelical Lutheran Church in Hungary; Reformed Church in Hungary.**

**Erdőelve** – The region east of the Bihar forest, east of Nagyvárad (now Oradea, Romania) it essentially corresponds to the present Transylvania (*Erdély*, under Romanian rule since 1920). The name is found in earlier chronicles. During the reign of the Árpád Dynasty its ruler was named Gyula of Erdőelve. In the Latin chronicles he was *Princeps Ultrasilvanus, Rex Julus*. – B: 1042, T: 7656.

**Erdőhát in Hungary** – Area lying between the Tisza and Szamos Rivers, including the drainages of the Sajó and Rima Rivers. Its central town is Fehérgyarmat. – B: 1134, T: 7656.

**Erdőhát in Transylvania** (*Erdély*, now in Romania) – (1) A hilly landscape between the Bega Canal and River Maros; its center is Temesvár (now Timișoara). During the Turkish occupation, its original Hungarian inhabitants of medieval times perished or escaped. Its present Hungarian inhabitants moved there from the Szeged area and from the southern part of the Trans-Tisza (Transtibiscan) region in the 19th century. (2) Also a hilly landscape in County Hunyad from the eastern slopes of the Poyana Ruska Mountain to the valley of the Cserna River. Mostly Romanians, with a Hungarian Diaspora, inhabit

this region. (3) A plain region between the Black and White Körös Rivers. Originally Hungarians populated the area. They suffered a lot under Turkish occupation after the fall of Gyula in 1566 and Várad (later Nagyvárad, now Oradea, Romania) in 1660. Part of the Hungarian population perished or escaped. Those who escaped into swampy areas survived in villages such as Ant, Agya, Bélzerind, Nagyzerind, Erdőhegy, Tamáshida, Vadász; and marketplaces such as Borosjenő, Gyula and Nagyszalonta. Currently the population is a mixture of Romanian and Hungarian. Most of these areas are parts of Romania since the Versailles-Trianon Dictated Peace Treaty (1920). – B: 1134, T: 7656. → **Trianon Peace Treaty.**

**Erdős, József** (Joseph) (Szatmárnémeti, now Satu Mare, Romania, 31 August 1856 - Debrecen, 12 December 1946) – Minister of the Reformed Church, theologian, writer. He completed his high school studies in his hometown and in Debrecen, where he studied Theology; then at the University of Vienna in 1878, and at Elberfeld, Germany. He earned a Doctoral Degree in Theology at the University of Vienna in 1891. He was Assistant Minister in Debrecen, then minister in Pancsova (now Pancevo, Serbia-Macedonia) in 1881, and in Újsóvé (now Ravno Selo, Serbia-Macedonia) in 1884. He was Professor of the New Testament Sciences at the Reformed Theological Academy, Debrecen from 1888 then, Professor at the University of Debrecen, from 1914 until his retirement in 1928. He published articles and studies in church papers and periodicals. He wrote some 20 works, including *Apostle Paul's Life, Character and Theology* (*Pál apostol élete, jelleme és teológiája*) (1889); *Major Problems of Religious Philosophy and the Bible* (*A vallásbölcsezet nagyobb problémái és a Biblia*) (1889); *The Synoptic Question* (*A szinoptikus kérdés*) (1910), and *Reformation and Science* (*A reformáció és a tudomány*). He translated the *Heidelberg Catechism* (*Heidelbergi Káté*) and the *Second Helvetic Confession* (*A második Helvét Hitvallás*). He was one of the influential Reformed theologians at the turn of the 20th century. He received an Honorary Doctorate from the University of Geneva, Switzerland. – B: 0910, T: 7103. → **Erdős, Károly.**

**Erdős, Károly** (Charles) (Újsóvé, now Ravno Selo, Serbia, 17 June 1887 - Debrecen, 6 June 1971) – Minister of the Reformed Church, theologian, writer. He completed high school at Debrecen in 1909, and from 1910 he studied Theology in Berlin, Cambridge and Zürich. He earned a PhD from the University of Vienna in 1919. He was an assistant minister for a short time, then became Lecturer on Church History at the Reformed College of Debrecen in 1913; filled the same position at the Minister Training Institute, Debrecen from 1914 to 1918, thereafter he was Professor there from 1919 to 1929, taught New Testament Sciences at the same University (1929-1950), then became Professor of the Reformed Theological Academy, Debrecen, from 1950 until his retirement in 1954. He wrote many articles, studies and books. He wrote some 30 major works, among them *Zwingli's 67 Theses* (*Zwingli 67 tétele*) (1907); *The Impact of Calvin's Reformation on our Country* (*A calvini reformáció hatása hazánkra*) (1909); *On God's Predestination* (*Isten eleve elvégzéséről*) (1909); *English Puritanism* (*Az angol puritánizmus*) (1912); *The Age of Didaché* (*A Didaché kora*) (1916); *My religion* (*Az én vallásom*) (1922); *Introduction to the New Testament* (*Újszövetségi bevezetés*) with J. Pongrácz (1934), and *The Human Jesus* (*Az emberi Jézus*) (1945). His contribution to educating new ministerial generations in the Reformed Church was significant. He was awarded a Golden Diploma of the University of Vienna. – B: 0910, T: 7103. → **Erdős, József.**

**Erdős, Pál** (Paul) (Budapest, 26 March 1913 - Warsaw, Poland, 20 September 1996) – Mathematician. He was born into a Jewish family. His parents were mathematicians and he was educated at home. At the age of three he could multiply three-digit numbers in his head and discovered negative numbers for himself. His higher studies were at the University of Budapest, where he received a Doctorate in Mathematics; then, in 1934, he

went to Manchester, England on a post-doctoral fellowship, where he worked with Louis Mordell. In 1938-1939, he was at the Institute of Advanced Study of Princeton, Mass., where he founded the Mathematical Theory of Probabilities with Mark Kac and Aurel Winter. In 1949, he and Atle Selberg surprised the world of mathematics with an elementary proof of the Prime Number Theorem. In 1954, he was denied his re-entry visa to the USA, thus he spent much of the 1950s in Israel. Later, he returned to the USA; but thereafter he was on the move between American and European universities. His main fields of research were theory of numbers, theory of sets and

calculus of probabilities. He threw himself into his work with even greater vigor by regularly working 19-hour days. He had a simple lifestyle; his income went to worthy causes, mainly helping able young mathematicians. He published over 1,000 articles. He died from a heart attack at a conference in Warsaw. Paul Erdős was one of the greatest mathematicians of the 20th century. He was an Honorary Doctor of fifteen universities, and an honorary member of many Academies of Science around the world. He was a recipient of the prestigious Wolf Prize in 1983 (considered equivalent to the Nobel Prize), the Kossuth Prize, and the State Prize. – B: 1261, T: 1261, 7103.

**Erdős, Renée** (Érseklél, now Arcibiskupský Lél, Slovakia, 1879 - Budapest, 9 July 1956) – Writer, poetess. Her education was in Győr and Budapest. She planned to become an actress, but did not complete her training. Her first poems appeared in the newspaper *The Week* (*A Hét*). In her poems and stories, written between 1899 and 1903, she appeared as one who boldly transgressed the conventions of the age, including those of love. From 1905, she resided in Italy and worked as a correspondent for Hungarian newspapers. In 1914, she returned home and converted to Catholicism. Her writings are characterized by mysticism mingled with the erotic. She became popular through her novels, including *Ancestors and Offsprings*, vols. *i-iv* (*Ősök és ivadékok, I-IV*) novel (1920-1929); *The Great Scream* (*A nagy sikoly*) novel, (1923), and *The Closed Garden* (*A csukott kert*), poems (1945). – B: 0883, 1257, T: 7103.

**Erdősi, Imre** (Emeric) (Poleszny) (Nyitra, now Nitra, Slovakia, 4 November 1814 - Nyitra, 9 February 1890) – Piarist priest, hero of Branyiszkó, Chaplain to General Richard Guyon. On 5 February 1849, he led the 33rd battalion of *Honvéd* (Hungarian soldier) regiment in the Battle of Branyiszkó. After the loss of the War of Independence (1848-1849), he was put under house arrest, and was forbidden to teach, and instead of his adopted Hungarian name he had to use his original Polish name *Poleszny*. Only after 1867, the year of the Compromise between Austria and Hungary, could he use again the name Erdősi. Between 1861 and 1878, he was Head of the Piarist Order at Kecskemét. – B: 0883, 1160, T: 7682. → **Honvéd; Freedom Figh of 1848-1849; Compromise of 1867.**

**Erdővidék**, Transylvania (*Erdély*, now in Romania) – The area of the Olt River valley,

southwest of the Hargita Mountains, inhabited by the Szeklers. Its significant settlements are Barót, Köpecz, Nagyajta and Vargyas (now Baraolt, Capeni, Aita Mare and Varghis respectively). – B: 1134, T: 7656.→**Szeklers.**

**Érdy Codex** (of early 16th century) – The most important Codex among the codices of Városlőd (Löväld or Leweld Monastery of County Veszprém). It is of folia shape, 28 x 21 cm in size, containing 675 folios, hand-written by a monk of unknown name who lived in Városlőd; he is referred to as the: “Anonymous of Carthaus”; he wrote the Codex between 1524 and 1527. The text contains Gospels and Epistles in Hungarian for every Sunday of the year and for the feasts of Saints, with explanations, examples, morals and parables. One of the sources of the work must have been the oration collection by Pelbárt Temesvári: *Pomerium de Tempore*; another source may have been a Dominican postilla-book in Hungarian (sermons and biblical meditations), based on popular Epistle and Gospel explanations entitled *Guillelmus Parisiensis*. Some of his translations of legends may be found in other codices, even in better versions. Their common sources are *Legenda aurea* and *Catalogus Sanctorum* from the turn of the 13th and 14th centuries. However, it is the Érdy Codex that provides the richest and most colorful legendary. His legends on the Hungarian saints are considered unique, including the Legend of King László I (St Ladislav, 1077-1095). Amongst his examples the most noteworthy is the story of the Fabled Youth who visited Paradise. It is the largest collection of Hungarian legends and sermons and an important testimonial of medieval Hungarian literature. Its aim was to protect Catholic Orders against Lutheranism. The Érdy Codex is regarded the beginning of Hungarian-language historical writing and short-story genre. The first reviewer of the text was János (John) Érdy, after whom the Codex is named. The manuscript was held in Nagyszombat (now Trnava, Slovakia) until 1814, when it was transferred to the National Széchényi Library, Budapest, where it has been kept ever since. – B: 0883, 0942, 0945, 1257, 2031, T: 7456.→**László I, King; Carthausian Nameless; Temesvári, Pelbárt; Érdy, János; Codex Literature.**

**Érdy, János** (John) (Luczenbacher) (Szob, 16 July 1786 - Budapest, 9 May 1871) – Historian, archeologist. He studied in Nagyszombat (now Trnava, Slovakia) and at the Academy of Győr. In 1815 he entered the Benedictine Order. Later, he left the Order and became a lawyer. His research was mainly in history and archeology. In recognition of his work, he was elected member of the Hungarian Academy of Sciences in 1832. He discovered and presented the Codex named after him. He was a prolific scientific writer. – B: 1078, 0883, T: 3240.→**Érdy Codex.**

**Érdy, Miklós** (Nicholas) (Hungary, 1931? - ) – Orientalist, researcher in Hun history, chemist and dentist. His earlier studies were in Hungary, in Bonyhád, and at the University of Veszprém. Since 1957, Érdy has lived in the United States, where he obtained two doctorates: Dentist – DDS from New York University, and Doctor of Chemistry from the Polytechnic University of Brooklyn. He was a research chemist. He has seven inventions and 50 USA and international patents. He completed six research trips to Asia from the 1980s until 1992. He researched the territories stretching from the Caucasus Mountain through the ancient Choresm, Bukhara and Samarkand, to Central Asia and Mongolia, Ordos and the Great Wall of China, the wide territory of the Gobi Desert, the periphery of the Taklamakan Desert, to Jarkand, which was the unfulfilled goal of the Hungarian researcher, Alexander Csoma de Kőrös. He discussed these

journeys in several studies, and on the radio in New York. The summation of his work is his book: *The "Map-layering" as a new Method in Hungarian Origin Research (A "térkép-rétegezés" új módszere a magyar eredetkutatásban)* (1999). Dr. Érdy gave a lecture at Harvard University concerning the Hun cauldrons and the great Hun gold find of Ordos, in 1990. After that, he took part annually in international conferences, analyzing the historical connections of the Eastern Huns (Xiongnu) and the European Huns, based upon the guidelines of archaeology. His outstanding study concerning the Hun sacrificial cauldrons was published in 1995, entitled *Hun and Xiong-nu Type Cauldron Finds throughout Eurasia (Hun típusú üstleletek Euráziában)*, which was translated into Turkish and Chinese, and was published in University publications. He received a second invitation in 1999 to Harvard University, where he analyzed the *Hun horse-burials*, and the structure of the equestrian graves and their Magyar connections. Furthermore, he also analyzed the gold diadems in the graves of Hun women. He published a book concerning these in 2001, under the title *The Hun Horse-burials As They Relate to the Magyars (A hun lovastemetkezések magyar vonatkozásokkal)*. In the 1990s, Dr. Érdy made several research trips to the territories of Alma-Ata and Semirechje. His more than thirty archaeological treatises were published in several scientific publications (USA, China, Italy, Korea, Turkey, Hungary and Russia), and he lectured at several international conferences. When, in 1998, he was again on the left bank of River Yenisey, he had a chance to study several petroglyphs *in situ*. He lectured about these Hun petroglyphs at the West Siberian National University of Kemerovo. He was able to finance his own archeological research and travels with the help of his dentistry. – B: 1935, T: 7690. → **Kőrösi Csoma, Sándor.**

**Ereky, Károly** (Charles) (Esztergom, 20 October 1878 - Vác, 17 June 1952) – Agriculturalist, politician. Although he acquired a Mechanical Engineering Degree from the Polytechnic of Budapest, he rather dealt with questions of industrial-type agricultural food production, especially meat production. In 1912, with state support, he established a hog farm at Nagytétény along the line of few similar farms elsewhere in Europe. As a politician, he opposed the Council (Soviet) Republic in 1919. After its fall he became Minister of National Food Supply in the interim cabinet of István (Stephen) Friedrich. In the 1930s and the 1940s, he was involved in financial issues and bank politics. In 1946, he was sentenced to 12 years in prison for political reasons, where he died. He published in German a number of books on the industrial type food production, its foundation and technical conditions. He was strongly convinced that the accomplishment of land reform, together with the conscious application of agricultural biotechnology, would benefit the food supply of mankind through reasonable use of the natural resources of the planet. To face this great and continuing challenge, he proposed a longer lasting solution, more than ninety years ago. He is regarded as the inventor of the concept of biotechnology and the pioneer of today's biotechnology. His work is part of the university textbooks in the USA. Some of his works are: *Nahrungsmittel-produktion und Landwirtschaft* (1917); *Biotechnologie der Fleisch-, Fett- und Milcherzeugung in Landwirtschaftliche Grossbetriebe* (1919), (*A zöldségtakarmányozgatás és a nagyistállóüzemek*) in Hungarian (1925), in English 1926. – B: 1028, 1048, T: 7103. → **Council (Soviet) Republic in Hungary; Friedrich, István; Hungary, History of.**

**Ergot** – A growth on rye, 1-3 cm in length, usually blackish-purple. Bunches of colonies are gathered for its curative effects. It contains several kinds of effective substances:

ergotin, histamine and others. It is an important basic material for the pharmaceutical industry, for it is helpful in the contraction of the uterus-musculature. Miklós (Nicholas) Békésy, in 1934, developed a process by mechanical manipulation (with pin-puncturing) that makes possible the artificial production of ergot. Based on this, ergot is produced today in a planned, systematic way in various countries. – B: 1138, T: 7675.→**Békésy, Miklós.**

**Erie Canal, USA** – Artificial waterway connecting Lake Erie and the River Hudson between Buffalo and Albany, NY. USA. Its length is 584 km, width 12 meters, depth 1.2 meters. It has 82 locks over 152 meters level difference. Constructed on the basis of the plan of the Hungarian Ferenc Canal, and it was opened in 1825. – B: 1153, T: 7680.

**Erkel, Ferenc** (Francis) (Gyula, 7 November 1810 - Budapest, 16 June 1893) –

Composer, conductor and pianist. He established the Hungarian National Opera. He studied in Nagyvárad (now Oradea, Romania) and later in Pozsony (now Bratislava, Slovakia). At the age of 17-18, he taught music in private homes in Kolozsvár (now Cluj-Napoca, Romania); that is how he made the acquaintance of György (George) Ruzitska, a leading figure of Transylvania's musical life. Erkel began his musical career as a piano performer. In 1834, he introduced himself in Pest, and settled there permanently the following year. For two years he worked as a conductor at the German Theater of the City of Pest, and then at the Hungarian Playhouse of Buda. In 1837 he started at the Hungarian Theater of Pest, later called the National Theater, where for three decades he was musical director.

His first opera, *Mária Bátor*, was completed in 1840. The author of the libretto was Béni (Benny) Egressy, who was his assistant until his death in 1851. His opera, *László Hunyadi*, was performed in 1844, also with a libretto by Egressy. He won the competition for the composition of the music for the *Himnusz* (the Hungarian National Anthem) to the poetic lines of Ferenc (Francis) Kölcsey. After the 1848-1849 War of Independence, he worked hard to revive the musical life of the Capital. In 1853, the Philharmonic Society was established under his leadership. He conducted the orchestra on numerous occasions. It was in that decade that he wrote his new opera, *Bánk bán*, the last opera composed for an Egressy libretto, first performed on 9 March 1861. The fiery and uplifting melodies traveled through the country. This work was the high point of Erkel's life, for his later operas were not so successful. In the atmosphere of the Compromise with Austria in 1867, his art gradually withered away. In 1875, he collaborated in the establishment of the Academy of Music, Budapest, and he became its Director and was Professor of piano during the following decade. In 1884, the Academy of Music honored him with the position of Chief Music Director. He last stood on the stage on his 80th birthday. Erkel was one of the greatest Hungarian composers. Except for Ferenc (Franz) Liszt, he was the most important representative of Hungarian musical romanticism. He was also a renowned chess player and President of the Chess Club of Pest. Several of his games appeared in the technical journals of Berlin. In 1952, the State established a prize in his memory. A Street in Budapest, a High School, and a Cultural Center bear his name. – B:

0883, 1031, 1078, 1192, T: 7684.→**Egressy, Béni; Liszt, Ferenc (Franz); Hunyadi, László; Kölcsey, Ferenc; Freedom Fight of 1848-1849; Hymnusz; Ferenc (Franz) Liszt Academy of Music; Compromise of 1867; Ruzitska, György.**

**Érsekújvár** (now *Nové Zámky* in Slovakian, Latin: *Novum Castrum*, Turkish: *Uyvar*) – Town in former County Nyitra, on the banks of the Nyitra (Nitra) River, about 25 km north of the Danube, in the northern part of the Little Hungarian Plain, in present-day Slovakia. In the Northern Hungary region of Historic Hungary (*Felvidék*), Érsekújvár is the fourth largest town (after Pozsony-Bratislava, Kassa-Košice and Nagyszombat-Trnava), with a population of 22,457 in 1930, and 42,262 (11,630 Hungarians) in 2001. Its inhabitants were almost purely Hungarian up to the end of the 16th century; but as a result of the wars in the following centuries, more and more Slovaks settled there: according to the 2001 census figures, there were 30,631 Slovaks. As early as the 16th century, the town possessed an important fortress, surrounded by the swampland of the Nyitra River, rendering the fort not easily accessible. During the centuries of the Turkish occupation of a large part of the Carpathian Basin, the town, as so many others, became a border fortress. In 1663, it was captured by Turkish forces; but in 1686, the combined Christian armies drove out the Turks from Érsekújvár. During the *kuruc* wars (1703-1711), the town played an important role as a faithful ally to Prince Ferenc Rákóczi II. When the fortress-complex of Komárom was completed, the Habsburg Emperor, Charles III, had the Érsekújvár fortress destroyed in 1725. Since the 19th century the town has developed as a typical market town. It is also an important railway junction. There is rich agricultural land in the region, gardening (strongly developing since 1932), several flour mills, paprika mills, leather factory, textile works, and an important meat processing trade. The town produces significant exports of grain, paprika, apricots and vegetables. Though in past centuries there were many Protestants, now the majority of the inhabitants are Roman Catholic. The town has a Franciscan monastery, Hungarian schools, and a variety of high schools; also a town museum since 1937. The Hungarian population of the town has been playing an important role in the political and cultural life in the Slovak environment. It had two weekly newspapers, one representing the Hungarian opposition: *Érsekújvár and its Environs (Érsekújvár és vidéke)* (from 1882), and the other for the Hungarian speaking Catholics: *Érsekújvár and Magyar Area (Érsekújvár és Magyar vidék)* (from 1932). – B: 1031, 1068, 7456, T: 7456.→**Érsekújvár Codex; Rákóczi II, Prince Ferenc; Codex Literature.**

**Érsekújvár Codex** – The largest Codex of the Dominican nuns of the “Island of Hares”, (*Nyúlak szigete*), today Margaret Island (*Margit Sziget*), in Budapest. This manuscript, written between 1529 and 1531, has a mixed content of religious thoughts, sermons and legends. It is the largest Hungarian linguistic record after the Érdy and Jordánszky codices. It contains in verse form the legend of St Catharine of Alexandria. The Dominican nun, Márta Sövényházi, copied more than 200 letters, or almost three quarters of the Codex. It was discovered by János (John) Czech in the Franciscan library of Érsekújvár (now Nové Zámky, Slovakia), hence its name. Today it is kept in the Library of the Hungarian Academy of Sciences. – B: 1150, 1153, T: 3240.→**Codex Literature; Érsekújvár.**

**Erzsébet Legends** – This is about the life of St. Elizabeth (Erzsébet of the House of Árpád, (1207-1231), who was the embodiment of charity and brotherly love. Her story

became part of the Érdy Codex through Pelbárt Temesvári. It contains valuable details relating to cultural history. – B: 1150, T: 3240.→**Érdy Codex, Temesvári, Pelbárt; Erzsébet, Saint of Hungary.**

**Erzsébet, Queen** (Elizabeth Amalia Eugenia) (Munich, Bavaria, Germany, 24 December

1837 - Geneva, Switzerland, 10 September 1898) – Empress of Austria and Queen of Hungary, crowned after the Compromise on 8 June 1867. She was the second daughter of the Bavarian Prince Miksa József (Maximilian Joseph). In August 1853, she met her cousin, Ferenc (Franz) Joseph then, aged 23, who quickly fell in love with the 15 year-old Elizabeth, regarded as the most beautiful princess in Europe. She became the wife of Emperor Ferenc József (Franz Joseph) of Austria on 24 April 1854. Soon after their wedding, she showed a neurotic restlessness that may have been inherited from her Wittelsbach ancestors. She was also aggravated by the domineering personality of her mother-in-law. Generally popular with her

subjects, she offended Viennese high society by her impatience with the rigid etiquette of the court. No wonder that she felt sympathy with the plight of the oppressed Hungarians. Her first visit to Hungary was in 1857. During the Prussian war she moved with her children (three daughters and one son) to the Hungarian Royal Castle in Buda. She learned Hungarian and became well versed in Hungarian history, poetry and literature. She advocated the cause of the Hungarians to her husband. Hungarians admired her especially for her endeavors in bringing about the Compromise of 1867 along with Ferenc (Francis) Deák and Count Gyula (Julius) Andrassy. She brought freedom to many Hungarian political prisoners. She loved to spend time in Hungary; spent much time at the summer residence of Gödöllő east of Budapest, at the Royal Castle of Buda, and later on the Island of Corfu. Her last child, Maria Valeria, was born in Buda, and she referred to her as her Hungarian daughter. Upon the tragic death of her son Rudolf, she turned inward and traveled more and more frequently, usually with Countess Irma Sztáray, who was the lady in waiting in the last five years of the queen. In 1898, as she was walking toward the ship on the Lake of Geneva, Switzerland, an Italian anarchist, Luigi Luccheni, stabbed her with a sharp file and she died within an hour. The Hungarian Parliament enacted her remembrance into law. The Capital and other cities erected statues in her memory. One of the bridges of Budapest bears her name. – B: 0942, 1031, 1078, 1287, T: 7103.→**Ferenc József (Franz Joseph), King and Emperor; Deák, Ferenc; Andrassy, Count Gyula (1).**

**Erzsébet Saint, of Hungary** (St Elizabeth of Thuringia, Elisabeth of Hungary) (?

Pozsony, now Bratislava, Slovakia, or Sárospatak, 1207 - Marburg, Hesse, 17 November 1231) – She was the daughter of King András II (Endre, Andrew) of Hungary (1205-1235) and his wife Gertrude, a member of the family of the Counts of Andechs-Meran. Elizabeth's brother succeeded his father on the Hungarian throne as Béla IV (1235-1270). Her mother, Gertrude's sister was St. Hedwig, wife of Duke Heinrich I the Bearded, of Silesia, while another saint, St. Elizabeth (Isabel) of Portugal (d. 1336), the wife of the tyrannical King Diniz of that

country, was her great-niece. In 1211, as it was customary in that era, a formal delegation was sent by Landgrave Hermann I of Thuringia to Hungary, to arrange a marriage between his eldest son, Hermann, and Elizabeth, then only four years old. This marriage plan was the result of political considerations. The little girl was taken to the Thuringian court of Castle Wartburg, near Eisenach, to be brought up with her future husband. Notwithstanding the turbulence and purely secular life of the court and the pomp of her surroundings, the little girl grew up as a very religious child with an evident inclination to prayer and pious observances and small acts of self-mortification. These religious impulses were undoubtedly strengthened by the sorrowful experiences of her life. Her mother, Gertrude, was murdered in Hungary in 1213. On 31 December 1216, the oldest son of the landgrave, Hermann, whom Elizabeth was to marry, died. After this she was betrothed to Ludwig, the second son. It was probably in these years that Elizabeth had to suffer the hostility of the more frivolous members of the Thuringian court, to whom the contemplative and pious child was a constant source for rebuke. Ludwig, however, must have soon come to her protection against any ill treatment. In 1221, Ludwig and Elizabeth were married and the marriage was a happy and exemplary one. Shortly after their marriage, they made a journey to Hungary. He gave his protection to her acts of charity, penance and her vigils. He was also a capable ruler and a brave soldier. To the Germans he is St. Ludwig. They had three children. In the spring of 1226, when floods, famine and pestilence wrought havoc in Thuringia, Ludwig was in Italy on behalf of the Emperor, hence Elizabeth assumed control of affairs, distributed alms, built a hospital and visited the sick, and aided nine hundred poor daily. This has preserved Elizabeth's fame to posterity as the gentle and charitable princess. On his return, Ludwig confirmed all she had done. In 1227, Ludwig, while on a crusade, died of pestilence at Otranto, Italy. Soon after her husband's death, Elizabeth left Warburg, either voluntarily or involuntarily, and temporarily settled at the Castle Marburg, Hesse, which was her property by dower right. In 1228, she renounced the world and became a tertiary of Saint Francis. In the same year, she built the Franciscan hospital at Marburg and devoted herself to the care of the sick. Elizabeth's strength was slowly consumed by her charitable works and she passed away at the young age of twenty-four. After her death many miracles took place at her grave, especially miracles of healing. Legends started spreading, and soon the process of her canonization began. At Pentecost of 1235, the edict of her canonization was proclaimed in the Cathedral of Erfurt. Her cult grew and spread worldwide: churches were erected in her memory, including the Cathedral of Marburg, the Cathedral of Kassa in Hungary (now Košice, Slovakia), and a chapel was annexed to the cathedral of Aachen, Germany. Painters and sculptors, e.g. Murillo, Holbein were inspired by her character and Ferenc (Franz) Liszt composed an Oratorio in her memory, *The Legend of Saint Elisabeth*. Pilgrimages to her grave soon started. According to legend, when her husband unexpectedly surprised her as she was on a mission of mercy to help the poor and needy, the bread she was trying to conceal suddenly turned into roses. – B: 0942, 1173, 1230, T: 1173, 7103. → **Liszt, Ferenc**.

**Esse Carburetor** – A new type of carburetor, where the depression caused by the carbureting process is permanent, and a pin valve regulates the quantity of gasoline added. In this way, it is possible to have at any given time the most suitable mixture (ratio of fuel and air), depending on the load. The inventor was Emil Schimanek, professor at the Budapest Polytechnic in 1923. – B: 0883, 1138, T: 7456. → **Schimanek, Emil**.

**Estates** – A political system common to European countries in the early Middle Ages, when social and economic classes obtained various degrees of privileges from the reigning monarch. The first recognized estate was the clergy followed by the nobility; and a third estate appeared with the development of towns. It represented the educated and wealthy citizens. The three estates had the right to participate in the Estates General. – B: 1138, T: 7665. → **Estates General**.

**Estates General** – A law-making institution of a state in past centuries, where certain social and economic classes gained special privileges *vis-à-vis* royal authority. The first Assembly of the Estates was convened in 1265 in England, and in France in 1302. In Hungary, mention of the Estates General first appears in a document from 1267. However, the *Altaic Yearbook* mentions the presence of a *commune concilium* as early as 1041. A regular meeting of the Estates only started in the mid 15th century. In 1447, they reserved the right to freely elect the kings of Hungary; but by 1667, they were forced to relinquish this right. At first, the nobility appeared in person; then, after 1526, they sent their representatives to the Assembly. The Law of 1608 divided the nobility into a Lower and an Upper House, and the meetings of the Assembly were conducted in this arrangement until 1848. In 1848, the Assembly of the Estates was dissolved and it was replaced by a civic parliament. – B: 1131, T: 7655.

**Esterhazy** (Southeastern Saskatchewan, Canada) – The oldest Hungarian colony in Canada, some 180 km from Regina. Both the planning and construction of this settlement were the work of Paul Oscar Esterházy, whose name and career are rather obscure. He emerged in the USA in the early 1870s as an employee of the Castle Garden Immigration Agency. In 1885, he won over the Canadian Government to the idea of donating land, where he could settle Hungarians and Czechs from Pennsylvania. The Government accepted this project because the Métis rebellion was raging on this territory, and the Government was planning to set up a civil militia. The settlement was named *Eszterhaza* by the Hungarian immigration agent, and it later changed to *Esterhaz*. Some time later the settlement was divided: a Czech part named *Kolin*, the Hungarian part *Kaposvár*. In 1902, the Canadian Pacific Railway built a station near Kolin and Kaposvár and named it *Esterhazy*, where a new village was built around the railway station. This gave an impulse to further development of the settlement. In 1903, a Post Office was opened and is still in service. In 1950, the world's biggest potash mine opened there. In the 1960s, due to its potash mine, Esterhazy, became known all over the country. In 1981 it became an agricultural and mining center and had 3065 inhabitants. It now has only a few Hungarian residents. – B: 1211, 1020, T: 7680.

**Esterházy Castle, Fertőd** – Prince Miklós József (Nicholas Joseph) Esterházy (1714-1790) built a hunting castle and some other buildings, modeling the castle after the Palace of Versailles, France. It became Hungary's largest Baroque style castle, containing an opera house, a concert hall, a puppet theater, a Chinese place of amusement, and a big waterfall in the French Baroque-style Park. The Prince employed his own orchestra, singers and actors. Joseph Haydn was his composer-conductor. Aristocrats, ministers, famous scientists and members of the art world attended his feasts. They were quite festive when he had opera, theater or military parades performed for his guests, as well as dances, concerts and fireworks. Royal bodyguard, György (George) Bessenyei wrote a poem about these festivities: *Merrymaking at Eszterháza (Eszterházy vigasságok)*. The

wealth of the Esterházy was legendary. The royal property was one million acres with 100 villages and 30 mansions. Later the family moved to Kismarton (now Eisenstadt, Austria). Today the castle is a museum with a concert hall, hotel and horticultural research station. The park is a protected natural reserve. – B: 1153, T: 7663.→**Esterházy, Prince Miklós József; Bessenyei, György.**

**Esterházy, Count Antal** (Anthony) (ca. 3 February 1676 - Rodostó, Turkey, 8 August 1722) – Military officer of the *Kuruc* Insurgent Army. In 1693 he became a Royal Counselor; and in 1697, he served as captain in the Hussar Regiment of Kollonics. In 1698, being wounded at the siege of Temesvár (now Timișoara, Romania), he fell into Turkish captivity. After the Peace Treaty of Karlóca, Hungary (1699) (now Karlovci, Serbia), he was released. He fought in 1701-1702 on the Rhine River front. From 1703 until 1709, he was Chief Administrator of County Komárom, and simultaneously, he had the rank of colonel and owner of the former Loos-Hussar Regiment. In 1704 he changed sides and joined the forces of Prince Ferenc (Francis) Rákóczi II, with the rank of general. In 1705 he became a senator and was promoted to fieldmarshal, and was appointed to be the Supreme Commander of the Transdanubian (*Dunántúl*) Forces. He was instrumental in the publication of the periodical, *Mercurius Veridicus*. The main theater of his military activities was Pannonia (*Dunántúl*, Transdanubia) and the Nyitra (now Nitra, Slovakia) district of Northern Hungary, from where he led many raids into Austria. After the Peace Treaty of Szatmár in 1711, the Austrian government refused his application for amnesty. For a while, he lived in Poland. In 1716, he moved to Kotin, Bessarabia. When a conflict broke out between Austria and Turkey in 1717, he organized a fighting contingent of Hungarian refugees and marched up to the Hungarian border but was too late for action. In 1721, he moved to Rodosto (now Tekirdağ) in Turkey, and joined the entourage of exiles around Prince Rákóczi II. He died there. His remains were returned to Hungary in 1906, and placed in the Cathedral of Kassa (now Košice in Slovakia). – B: 0883, 0942, T: 3233.→**Freedom Fight of Rákóczi II, Prince Ferenc; Rákóczi II, Prince Ferenc.**

**Esterházy, Count Bálint Miklós** (Valentine Nicholas) (1740 - Great Britain, 1806) – Military officer of France, grandson of the *kuruc* (insurgent) general Antal (Anthony) Esterházy. He was a confidant of King Charles X. After the start of the French Revolution, his regiment protected the escape route of the French princes. In 1780, he became a General of the French Army. In 1791, he went as envoy on behalf of the French emigrants to the court of the Russian Czar. Later he settled in Great Britain and died there. – B: 0883, 0942, T:3233.→**Esterházy, Count Antal; Kuruc.**

**Esterházy, Count Dániel** (ca 1665 - Nagycenk, 1 October 1714) – *Kuruc* insurgent military officer. He participated in the Turkish War (1683-1699), and in 1691 he became general of the Imperial Army. In 1704 he joined the force of Prince Ferenc (Francis) Rákóczi II, first as general, but was soon promoted to fieldmarshal. His theater of operation was chiefly the Transdanubian (*Dunántúl*) district, the western part of Northern Hungary (*Nyugati-Felvidék*, now in Slovakia) and the valley of the River Vág (now in Slovakia). His greatest achievement was during the winter campaign of 1705, when his forces drove out the Austrian General Heister from the cities of Bazin, Modor and Szentgyörgy. In 1708 he was Vice-Commander of the Transdanubian forces. In the fall of 1709, he was Commander-in-Chief of the district between the Danube and Tisza Rivers.

In 1710, he was Commandant of Kassa (now Košice, Slovakia) and defended the city against the Imperial Army in 1711. His defense force of 5-600 was vastly outnumbered by the Imperial Forces; but he surrendered the fort only after the Szatmár Peace Treaty was signed in 1711. – B: 0883, 0942, T: 3233.→ **Freedom Fight of Rákóczi II, Prince Ferenc; Szatmár Peace Treaty; Kuruc.**

**Esterházy, Count János** (John) (Nyitraújlak, now Chrenovec, Slovakia, 14 March 1901 - Mirov, now in the Czech Republic, 8 March 1957) – Landowner, politician and representative of the Hungarian minority in Czechoslovakia. In 1931, he was elected President of the Hungarian Ethnic Community League of Czechoslovakia, and his political career started at this time. From 1932 his columns were published in the *Hungarian Journal of Prague (Prágai Magyar Hírlap)*, and in other Hungarian opposition newspapers in Czechoslovakia. From 1935 to 1938, he was Member of Parliament and the Senate in Prague. Between 1939 and 1945, he was the President of the Hungarian Party of Slovakia. He was the only Hungarian member of Tiso's Slovakian Parliament. On 18 December 1941, the Slovakian National Assembly carried the bill of the Jewish deportation and among the 62 representatives he was the only one who voted against it. After 15 October 1944, the ultra right Hungarian Szálasi Government imprisoned him, for he rejected the demand of transforming the Hungarian Party of Slovakia into a National-Socialist organization. At the end of 1944, he resigned, returned to Pozsony (now Bratislava, Slovakia), and hid from the Gestapo in Slovakia. After the Soviet military occupation of Northern Hungary, Upland (*Felvidék*) he was carried off to the Soviet Union as a war criminal. On 16 September 1947, he was sentenced to death *in contumaciam* by the Slovakian National Court and was executed *in effigie*. After he returned home from the Soviet Union, his sentence was commuted to life imprisonment. He passed away in the Northern Moravian Mirov prison. A monument, backed by the World Federation of the Hungarian's Transylvanian Chapter, was erected in the prison cemetery on the grave of this martyr diplomat, on 4 June 1998. His daughter, Aliz (Alice) Eszterházy unveiled the monument. Miklós (Nicholas) Patrubby, then Vice-President of the World Federation of Hungarians, praised János Eszterházy's historical importance. – B: 0883, 1031, T: 7672.→**Patrubby, Miklós; Hungary Recovered; Czechoslovakia, Hungarians in.**

**Esterházy Family** (princes and counts of Galánta, now Galanta, Slovakia) – The Eszterházy's were one of Hungary's illustrious and very wealthy noble families. According to family tradition, their ancestor was Mihály (Michael) Estorás, who traced his origin to Attila in a 1095 document. The Esterházy family rose to prominence during the Turkish wars of the 16th and 17th centuries. Their absolute loyalty to the Habsburgs secured them a unique position in Austro-Hungarian affairs. It was the charismatic military leader and astute politician Miklós (Nicholas) Esterházy (1583-1645) who established the influence of the family. László (Ladislav), the elder son of Miklós, was killed at the Battle of Vezekény in 1652. Miklós József (Joseph) Esterházy (1714-1790), Pál (Paul) Esterházy's grandson, followed in the family military tradition and became Captain of Empress Maria Theresa's Bodyguards, although he is now best remembered for employing Joseph Haydn as his Kapellmeister and court composer for over 30 years. His great-grandson, Pál Antal (Paul Anthony) Esterházy (1786-1866), continued the family tradition of public service and played a prominent part in the Congress of Vienna of 1814-15 that brought the Napoleonic Wars to an end in 1815. He was later Austrian

ambassador to London. At the end of the First World War, the Fraknó and the Esterházy Castles passed to Austria. – B: 0942, 1262, T: 7685.→**Attila; Esterházy, Prince Pál; Mária Terézia (Maria Theresa), Empress and Queen.**

**Esterházy, Péter** (pen-name Csokonai Lili) (Budapest, 14 April 1950 - ) – Writer. He is descendant of the famous Esterházy family. He spent his early life in a small village but eventually moved to Budapest and studied Mathematics at the University of Budapest (1969-1974). He began to work as a computer scientist, but actually he was a freelance writer. Soon he became widely read and respected not only at home but abroad as well. Besides novels, he writes essays and short stories, and appears in, or is the subject of journal or newspaper interviews. His works include *Production Novel (Termelési regény)* (1979); *Pending (Függő)* (1981); *Who Guarantees the Security of the Lady? (Ki szavatolja a lady biztonságát?)* (1982); *Little Hungarian Pornography (Kis magyar pornográfia)* (1984), in English (1985); *Helping Auxiliary Verbs of the Heart (A szív segítő segédigéi)* (1985), in English (1996); *Introduction to Belles-Lettres (Bevezetés a szépirodalomba)* (1986); *The Book of Hrabal (Hrabal könyve)* (1990); *The Wonderful Life of the Little Fish (A halacska csodálatos élete)* (1991); *The Glance of Countess Hahn-Hahn (Hahn-Hahn grófnő pillantása)* (1991), in English (1994), and *Harmonia Caelestis* (2000). Some of his works appeared in German translation. He also wrote film scripts, among them *There is Time (Van idő)* (1984) and *Pure America (Tiszta Amerika)* (1986). He is a recipient of awards and prizes, among them the Attila József Prize (1986), the Soros Life Prize (1992), the Kossuth Prize (1996), the Pro Urbe Budapest (2000) and the Sándor Márai Prize (2001). – B: 0874, 0878, 1257, T: 7103.

**Esterházy, Prince Miklós József** (Nicholas Joseph) (Vienna, 12 September 1765 - Como, Italy, 25 November 1833) – Military officer, patron of music and art. In his youth he traveled in England, France and Italy, and developed a fine sense of art appreciation. In 1790, as a lieutenant colonel, he participated in Emperor Joseph II's campaign against the Turks. In 1791 he served as captain in the Royal Bodyguards of the Hungarian nobility. He was considered a great patron of music, as he was the primary sponsor of a series of Haydn symphonies. In 1794, he reorganized the orchestra at Kismarton with Joseph Haydn as conductor. In 1797 he was promoted to general, and he outfitted his contingent of 1000 against Napoleon at his own expense. He retired from military life soon afterwards and only on gala occasions, famous for their splendor, did he perform some diplomatic missions. The well-known Hungarian classical poet, Dániel Berzsenyi, composed a poem in his praise. In 1807 he commissioned Beethoven's *Mass in C major*. In 1817, he was promoted to the rank of field marshal of the Austrian Imperial Army. The Hungarian State purchased his famous collection of paintings in 1871, and it became the core of the National Gallery, housed in the building of the Hungarian Academy of Sciences. – B: 0883, 0942, T: 3233.→**József II (Joseph), Emperor and King; Haydn, Franz Joseph; Berzsenyi, Dániel; Gaál, György.**

**Esterházy, Prince Pál** (Paul) (Kismarton, now Eisenstadt, Austria, 7 September 1635 - Kismarton, 26 March 1713) – Palatine (highest state administrator before 1848), poet and composer. Already in 1652, he was Lord Lieutenant of County Sopron, royal counselor, and in 1661, Lord Steward. He participated in the war against the Turks, and in 1663, he fought on the side of Count Miklós (Nicholas) Zrínyi; in 1668 he became Captain-General of the mining districts. In 1681, the National Assembly of Sopron elected him

Palatine. He participated in the liberation of Vienna from the Turkish siege in 1683, and in 1686 in the reconquest of Buda. In 1687, he masterminded the acceptance of the law that declared the Habsburgs' eternal kingdom, and annulled the 31st point of the *Golden Bull* (*Aranybulla*, 1222); thereafter, he was rewarded with imperial rank and large estates. Although he often spoke in defense of the nobles' rights against the absolutism of Emperor and King Lipót I (Leopold) (1654-1705), on the whole he faithfully supported the politics of the Viennese Court. In 1695 he was the first to convert his enormous assets to estates in fee entailed. His manor house in Kismarton is one of the outstanding creations of Baroque architecture. He established the orchestra of Kismarton, which later became world famous. The collection of his religious musical work, called the *Harmonia Coelestis* (1711), is a singularly significant memorial of Hungarian musical culture. He also wrote poetry and religious works. – B: 0883, 0942, T: 7684.→**Zrinyi, Count Miklós; Golden Bull; Ónod Parliament; Harmonia Coelestis.**

**Estonia, Hungarians in** – Estonians are Finno-Ugrians and linguistically (but not ethnically) related to the Hungarians. The Estonian-Hungarian connection goes back to the 15th century. The first Hungarian in Estonia was probably Ivan (Yvan), the ambassador of King Mátyás I (Matthias Corvinus, 1458-1490), sent to Czar Ivan III to Moscow, to find out the fate of Hungarians who remained behind in Russia some 600 years earlier, and the possibility of their repatriation to Hungary. He returned home via Estonia. There is no more data about his mission. From 1572-1582, the army of István (Stephen) Báthory, Reigning Prince of Transylvania (*Erdély*, now in Romania) successfully fought against Ivan the Terrible and he annexed the territory of the Tartu bishopric to Estonia. During this campaign, many Hungarian Hussars fell in action, some probably settled there and established families. Between 1636 and 1710, some 11 Hungarian students read Theology at the University of Tartu. After World War I, when the Estonian Republic was established, there was a growing economical and scientific exchange with Hungary. Hungarian professors taught at the University of Tartu, where the Hungarian Institute had an excellent library. Estonia lost its independence to the Soviet Union in 1918, and regained it only in 1991. During Soviet occupation, contacts with Hungary were nonexistent. However, between 1950 and 1990, ethnic Hungarian students from the Soviet occupied Carpatho Ukraine (*Kárpátalja*, or Ruthenia) went to Estonia for university studies. The reason was that they, being Hungarians under Soviet authority, did not get admittance to the institutes of higher education in their birthplace, but in Estonia, they could acquire medical, engineering or veterinary diplomas. At times 40-50 Hungarian students lived and studied at the University of Tartu. Eventually, many of them settled in Estonia. Between 1991 and 1995, when the Republic of Estonia was again re-established, due to economic difficulties, many Hungarians returned to their country of origin or moved to western countries. The number of Hungarians in Estonia in 1988 was 241; their number in 2005 was about 150. In 1988, the *Mihály Munkácsy Culture Society of Hungarians in Estonia* (*Észtországi Magyarok Munkácsy Mihály Kultúregyesülete - Mihály Munkácsy nim. Eestimaa Ungarlaste Ühing*) was formed. Now it has two centers: one in Tartu and the other in Tallin. They play an important role in the life of Hungarians in Estonia. Their newsletter is the *Contact* (*Kapcsolat*). They also keep close contacts with Hungarian organizations in other Baltic states. There is a *Hungarian Congregation in Estonia* (*Esztoniai Magyar Gyülekezet*). Since Hungary and Estonia are members of the European Union, both refresh their traditional ties on diplomatic as well

as on cultural levels. – B: 1292, 1382, T: 7103.→**Mátyás I, King; Báthory, Prince István; Hungarian relations; Munkácsy, Mihály; Estonians.**

**Estonians** – Estonians are related to Hungarians, not genetically but linguistically. They belong to the Finno-Ugric language family. The Estonians racially are East Baltic and Nordic in character. Originally, they were from northern Asia. At present they are settled south of the Gulf of Finland, and speak a Finno-Ugric language, related to Finnish. The present Estonian vernacular and literary language is based on the northern central dialect group. From the beginning of the 13th century, Estonia was ruled and Christianized by the Germans (Bishop Albert I of Riga), and by the Danes (King Waldemar II). The Teutonic Knights from Germany took it over in 1346. In 1561, Sweden annexed it. The 18th century (from 1721) was the age of Russian oppression that gradually eased during the 19th century. The first Estonian-language newspaper, *Postimees* appeared, and by 1870 the literary and scientific life had developed considerably. Between the two World Wars, Estonia became an independent state. In 1928, it had 1408 primary schools, 84 high schools and the 300-year-old University of Tartu. Estonians consider their folk-poetry and folk epic, the *Kalevipoeg* most important. Following World War II, the Soviet Union annexed Estonia as a constituent republic. Estonia regained independence on August 20, 1991, following the collapse of the Soviet Union. Since 1 May 2004, Estonia has been a member of the European Union. – B: 1068, 1648, 1651, T: 7456. – **Estonia, Hungarians in.**

**Esze, Tamás (1)** (Thomas) (Tarpa, 1666 - Nyitra, now Nitra, Slovakia, 27 May 1708) – Military officer in the insurgent (*kuruc*) army. He came from a family of serfs in the Tarpa district and rose to the rank of brigadier-general in Reigning Prince Rákóczi's army. He was one of the most popular leaders of the *kuruc* forces. In September 1695, he hid with Lieutenant Albert Kis, another insurgent leader, in the forest of Nagybánya (now Baia Mare *Erdély*, in Romania) and there they started to instigate a peasant uprising and also pledged their oath of allegiance to Prince Imre (Emeric) Thököly. On 20 July 1695, Tamás Esze and Albert Kis, with no more than two hundred men, arrived in Barkaszó (now Barkasove, Ukraine), County Bereg, and continued their recruiting activity among the dissatisfied local peasantry. In 1697, Tamás Esze was instrumental in the preparation of the Foothills Uprising (*Hegyaljai Felkelés*). Their movement failed, and he was captured, but released shortly afterwards. For years he earned his living in the salt trade. After he had clashed with the Austrian salt trade clerks, he joined Albert Kis and his outlaws, guerillas and fugitive serfs, and continued to strengthen their organization. In December 1702, together with Albert Kis, voluntarily joined the Bagossy Hajdú Regiment, organized under the banner of County Bereg. They used their time of service for political activities but deserted this regiment to continue their outlaw's way of life in the forest of Bereg. In April 1703, Gál Barvinszky came from Poland as an envoy to Hungary, and got in touch with him. He returned with him to Prince Ferenc (Francis) Rákóczi II, residing at the Fort of Brezan, Poland, where the Prince promoted him to colonel and sent him back to Hungary with the Prince's

famous Declaration. The first episode of the Rákóczi Liberation War started with the Uprising of Tiszahát (*Tiszaháti Felkelés*), and while the poorly organized peasant forces were dispersed at Dolha by Sándor (Alexander) Károlyi's county contingent, the development of the uprising into a full-scale Liberation War could not be stopped. During the war in 1703-1704, Tamás Esze operated with his *Hajdú* regiment east of the River Tisza and in the district between the Danube and Tisza Rivers, in Upper Hungary (Upland, *Felvidék*, now Slovakia) between 1704 and 1705, and from 1705-1707, in Transylvania (*Erdély*, now in Romania). From 1707-1708, he was back again in the Upper Hungary (Upland) area. Reigning Prince Ferenc Rákóczi II promoted him to brigadier-general on 18 April 1707. In 1708, during the religious service on Whitsunday, an unprecedented event, a brawl broke out between the Catholics and the Protestants. Tamás Esze rushed into the melee to separate the two parties, unaware of the other commander's intention to restore order by prompting an artillery unit to open fire into the disturbance; among the fallen was Tamás Esze. To express his gratitude and to preserve the memory of his loyal follower, Reigning Prince Ferenc Rákóczi II, on 24 March 1708, elevated his family to nobility, and his birthplace Tarpa became a special town with all the privileges of the *Hajdú* cities. His heroic deed inspired many ballads and folk songs. Institutes, public places and works of art cherish his memory. – B: 0942, 1230, 0883, 1031, T: 3233. → **Freedom Fight of Rákóczi II, Prince Ferenc; Kuruc; Hajdú.**

**Esze, Tamás (2)** (Thomas) (Szekszárd, 1903 - Budapest, 1993) – Minister of the Reformed Church, historian. He studied Theology at the Reformed Theological Academy, Budapest, then finished it in Pápa. He also studied Literature and History at the University of Budapest. He earned a PhD at the University of Debrecen in 1945. He was an assistant minister from 1926 to 1931, Minister in Szank (1931-1938), then in Gyöngyös (1938-1941). He was Minister of the Zsuzsanna Lorántffy Deaconess Institute until its closing. In the army, he was the adjutant of Bishop Lajos (Louis) Simonidesz, in the rank of lieutenant-colonel. Between 1951 and 1956, he worked in the Archives of the Reformed Convent, Budapest, and was Professor of Church History at the Reformed Theological Academy, Budapest (1956-1958); Chief-Director of the Reformed Collection, and a scientific fellow of the General Synod (1957-1971). He resigned from the ministry and was elected Chief Curator of the Danubian Church District on 5 May 1958, a position he resigned from in 1989. His articles and essays were published in various newspapers, periodicals and books. He edited the review, *Church History (Egyháztörténet)* (1943-1945 and 1958-1959). – B: 0910, T: 7103. → **Simonidesz, Lajos.**

**Eszék** (now *Osijek*, Croatia; in German *Esseg*) – A town on the right bank of the Drava River, tributary of the Danube, situated in the one-time County Verőce of Historic Hungary; now it is in the East-Croatian region. In the past centuries it used to be a bridge-crossing town and an important fortress; now it is a busy railway junction and a lively industrial and commercial center; population (1931) 40,733; (2001) 114,616. In Roman times, its name was Mursa. Later, in all probability, it was destroyed by the Avars. After the 896-900 Magyar settlement in the Carpathian Basin, this place belonged to the Hungarian Kórógyi, Rozgonyi, Geréb noble families for centuries. Its modern Hungarian name, Eszék, is first mentioned in documents in 1196. In 1526, Eszék was occupied by the Ottoman Turks, who built a bridge across the Drava River and proceeded to Mohács to engage with the Hungarian army. After the end of Turkish rule (1686), the town was mainly populated by German settlers. Eszék present population is still mainly German. –

B: 1068, 7456; T: 7456.

**Esztergályos, Cecilia** (Budapest, 26 January 1943 - ) – Actress. She studied at the State Ballet Institute (1960). Thereafter, she attended the Academy of Dramatic Art, Budapest (1964-1968). She was a solo dancer at the *Ballet Pécs (Pécsi Balett)* (1960-1963). She worked at the *Thália Theater (Thália Színház)*, Budapest (1968-1984); *the National Theater (Nemzeti Színház)*, and the *Hungarian Theater (Magyar Színház)*, Budapest (1991-). She acted in many stage roles, including Maggie in Williams' *Cat on the Hot Tin Roof (Macska a forró háztetőn)*; Colette in Barilett-Grédy's *Big Love*, and Mici in Kellér-Zerkovitz's *The Sleeping Husband (Az alvó férj)*. Her feature film and TV roles include *The Lost Eden (Elveszett paradicsom)* (1962); *Golden Head (Aranyfej)* (Hungarian-American) (1963); *Boys from the Square (Fiúk a térről)* (1967); *The Pendragon Legend (A Pendragon legenda)* (1974); *Meteo* (1989), and *Dearest Anne (Édes Anna)* (TV 1991). Her major works are: *Give Us Peace, My Lord! (Adj békét, uram!)* (1987), and *For How Long Am I? (Meddig vagyok?)*. She was awarded the Mari Jászai Prize (1974), the San-Remo Festival Prize (1981), the Silver Hugo Prize (USA, 1981), the Merited Artist title (1982) and the Erzsébet Prize (1993). – B: 0874, 1445, T: 7103.

**Esztergom** (Latin: *Strigonium*, Turkish: *Estergon*, German: *Gran*) – The center of Hungarian Catholicism. It is situated on the southern right-hand bank of the Danube, a river port with a population of 17,000 in 1930; 31,000 in 1983. It is the seat of the Primate of Hungary, since 1198. The site of the town was already inhabited in prehistoric times; under Roman occupation, it was named *Salvio Mansio*. The town was the Royal Seat and capital of the Hungarian kings of the Árpád Dynasty, until King Béla IV (1235-1270) moved it to Visegrád, and later to Buda. In 1242, the Tartars destroyed the town, but could not take the fort. In the 16th and 17th centuries, the Turks held the town for several periods. It was finally freed in 1683. The anti-Habsburg *kuruc* forces, led by Prince Ferenc Rákóczi II, held the town for a few weeks in 1706. Esztergom is dominated by Castle Hill, the monumental Cathedral, Hungary's largest church. The frontage is supported by Corinthian columns. The main occupation of the town is agriculture, viticulture and industry (brick works, textile manufacture, pottery, machinery). Lignite is mined nearby. There are several high schools (one of them run by the Franciscans), a teachers' college, and a forestry school. Among the old social and cultural organizations, the *Széchenyi Casino*, founded in 1837, is prominent; there is also a literary and fine arts society and an archeological-historical society. Excavations unearthed the palace of King Béla III (1172-1196) with its chapel and a large part of the medieval fortification. At the foot of Castle Hill is the Primate's palace, which includes the Christian Museum (*Keresztény Múzeum*), housing the largest ecclesiastical collection in Hungary, and the archives (containing over 4000 bundles of documents and the oldest replica of the *Aranybulla (Golden Bull)*). The Diocesan Library of 120,000 volumes, houses also 3 Corvina codices, the Jordánszky Codex, and many incunabula. The local paper, *Esztergom News (Esztergomi Újság)*, was launched in 1863. The *Maria Valeria Bridge* over the Danube connects Esztergom to Párkány (now Sturovó, Slovakia). Here, the Danube is the border between Hungary and Slovakia since the Versailles-Trianon Dictated Treaty in 1920. The Bridge was ruined by Czech legionaries after World War I, and was rebuilt in 1927. During World War II, German troops destroyed it, but was finally rebuilt in 2001. The town is the seat of Etzel (Attila) in the *Nibelungenlied*. – B: 1031, 1068, 1789, 7456, T: 7456. → **Golden Bull; Esztergom Cathedral; Esztergom**

**Antifonale; Aquincum; Brigetium; Gorsium; Savaria; Sophianae; Pannonia.**

**Esztergom Antifonale** – This is a 15th century manuscript in two volumes, written in Gothic script. It contains several historical narrative poems related to Hungary. Only its second volume survived; it is in the Bibliotheca of Esztergom. – B:1197, T: 3240.→**Esztergom.**

**Esztergom Cathedral** – The largest cathedral in Hungary, located on the Castle Hill. It is the seat of the Catholic Primate of Hungary.

It was constructed on the same site where an old church was built by the first King István I (St Stephen, 997-1038), and destroyed at the end of the Turkish occupation (1526-1686). The Turks turned it into a mosque. Only the Bakócz chapel survived. The plan for the present cathedral was already finished in 1819, and after a lengthy modification by the architect József (Joseph) Hild, the construction was

finally completed in 1869. The building is 100 m high, 107 m long, 48 m wide, the inner height of the cathedral under the dome is 71.5 m. The Bakócz Chapel is a Renaissance gem and a world famous art museum. Its construction was started in 1506, and to save it, was taken apart and rebuilt within the new cathedral. The Hungarian archbishops, among them the martyred Cardinal Mindszenty, are buried in the crypt. At the main altar, there is a large one-piece painting on canvas, measuring 13x6.5 meters. Primate Kopácsy ordered it from the Italian painter, Grigoletti. In the crypt below are two statues: one represents Death, and the other Everlasting Life. Ferenc (Franz) Liszt conducted his Esztergom Mass at the consecration ceremonies of the cathedral. – B: 1293, 1020, T: 7663.→**Catholic Church in Hungary; Bakócz, Tamás; Liszt, Ferenc; Esztergom.**

**Eszterhás, Joe** (Joseph; József Antal) (Csákánydoroszló, southwest of Körmend, 23 November 1944 - ) – Writer, screenwriter. Near the end of World War II, his family fled Hungary before the Soviet military occupation and found refuge in Austria. He was raised there in a refugee camp, and in 1950, the family emigrated to the USA and settled in Cleveland Ohio, where he received his general education. His father was a writer, with 20 historical novels to his credit, and was also a journalist editing the weekly *Sunday of Roman Catholic Hungarians* (*Római Katolikus Magyarok Vasárnapja*). Eszterhás graduated from the Cleveland Cathedral Latin High School and attended Ohio University, but did not graduate. He appeared as an author with his book entitled *Charlie Simpson's Apocalypse* (1974), and as a result, he became a National Book Award nominee. He worked as a reporter for the paper *Cleveland Plain Dealer*; then he was a senior editor at the “*Rolling Stones*” ensemble from 1971 to 1975, and finally he changed to screenwriting. So far he has produced some 18 screenplays. Among them, the *Flashdance* (1983); *Big Shots* (1987); *Basic Instinct* (1992); *Sliver* (1993); *Showgirls* (1995) *Jade* (1995), and *One-Night Stand* (1997); the screenplay *Children of Glory* (Hungarian: *Szabadság, szerelem*) (2006), was released for the 50th anniversary of the 1956 Hungarian Revolution and Freedom Fight; its producer is the Hungarian-born Andy Vajna. He has become a legendary screenwriter. His other books include *An American*

*Rhapsody, The Devil's Guide to Hollywood, and the Hollywood Animal: A Memoir*. He successfully recovered from throat cancer and is now an anti-smoking campaigner. He received the "Fight the Good Fight" award in 2004. – B: 1031, 1439, 1719, T: 7103.→**Vajna, Andy; Freedom Fight of 1956.**

**Etele** – The Hungarian chronicles emphasize that Etele is the Hungarian version of the name Attila. It appears not only in sagas, but also as a personal name used during the Middle Ages. – B: 0942, T: 3312.→**Attila.**

**Etelköz** – The area between the Dnieper River and the Danube Delta, where the early Magyars, after leaving *Levedia*, were settled briefly (from 830 to ca. 895), immediately before the Settlement in the Carpathian Basin. It is the first Hungarian word extant in writing. It occurs in Byzantine Emperor Konstantinos Porphyrogenitos' (Konstantine VII, 913-959) writing: *De administrando imperio (On the Administration of the Empire)*, in the form of *Atelkuzu*. Its meaning is "an area between rivers". It was during their stay there (1) that 3 Khabar tribes, escaping from the infight in the Khazar Empire, joined the Hungarians; (2) that the Magyar tribal leaders made the *Blood Covenant*; (3) and that the seven tribal leaders chose *Álmos* as the Khagan, the leader of the whole tribal confederation. His father was *Ügyek* (of the Magor clan), his mother *Emese*. He was not Khagan for very long, because, although he was the one who prepared the *Homecoming*, he gave over the leadership to his son *Árpád*, who would lead the Magyars into their new and safe home protected by the Carpathian Mountains. – B: 0942, 1031, 1068, 7456; T: 7456.→**Levedia; Álmos; Khazars; Khabars; Blood Covenant.**

**Etelköz**→**Blood Covenant** (*Vérszerződés*).

**Eternal Friendship with Yugoslavia**→**Treaty of Eternal Friendship with Yugoslavia.**

**Eternal Matches** – Repeatedly ignitable wooden matchsticks. From among the many questionable solutions, these matches by two Hungarian inventors may be rated as the best ones: the one by Zoltán Földi (patent no.108.188) and the other by Rezső (Ralph) König (1900-1971) (patent no. 108.056); both were registered in 1933. – B: 1078, T: 7456.→**Földi, Zoltán.**

**"Éterorgan"** – An electronic organ. It was invented and licensed by Tihamér Nemes (1895-1960), in 1930. – B: 1226, T: 7684.→**Nemes, Tihamér.**

**Ethnography** (*Néprajz*) – A historical and social science dealing with folk culture and life style, folklore. The subject of its research is oral traditions that are not recorded in writing. Ethnographic research contributes also to the explorations of the culture of peoples, ethnic groups at present and in the past, reaching back into ancient and prehistoric times; the origin, geographic position and time or period of their formation or evolution; their primitive community forms – tribes and clans, and also their racial composition. Their spiritual, religious lives, marriage and burial customs are also studied. The beginnings of Hungarian ethnography (descriptive) and ethnology (scientific, biological) appeared in the first part of the 19th century, with a greater upswing from the 1880s on. Its best-known representatives are: Ottó Herman; Lajos (Louis) Katona; István (Stephen) Gyórfy; Sándor (Alexander) Solymossy; Béla Vikár; Károly (Charles) Viski; Lajos (Louis) Bartucz; János (John) Jankó; Béla Bartók and Zoltán Kodály. – B: 1068, 1138, T: 7684. →**Herman, Ottó; Gyórfy, István; Solymossy, Sándor; Jankó, János; Viski, Károly; Bartók Béla; Kodály, Zoltán; Vikár, Béla.**

**Etruscan-Hungarian Linguistic Relationship** – Research into the origins of the Etruscans, their language and their relationship to other cultures and languages has an extensive history in Italian, as well as in foreign linguistic and historical literature, and has been the subject of much heated debate that has never reached a consensus. Among the most notable authors on the subject are *Luciano Agostiniani, Mario Alieni, Hugh Hencken, P. Kretschmer, Jules Martha, Massimo Pallotino, Felix von Pogrinyi-Nagy, Helmut Rix* and *Alfredo Trombetti*.

According to earlier archeological findings and generally accepted theory, the Etruscans appeared in southern Italy around 1200-800 B.C., supposedly from somewhere in Asia Minor and, according to Thucydides, they predated the arrival of the Greeks by about 300 years. Their appearance in the region coincided with that of the Scythians in the Carpathian Basin.

The earliest extant Etruscan inscriptions date from the 7th century B.C. There are about 11 thousand inscriptions, 90 % of them mainly appear on tombstones and sarcophagi consisting mostly of genealogical references and personal names. The other 10% contains other types of texts that can be classified roughly into 3 categories: (1) personal names; (2) texts in the vernacular and (3) bilingual texts. The longest of these, the *Liber Linteus*, now in the Zagreb Museum (Croatia), dated to Greek and Italian-Roman times, consist of 200 lines, 1350 uninterrupted word sequences and 400 various word formats inscribed on linen. The inscriptions are easily decipherable, as the Etruscans adopted a version of the 26-letter Phoenician alphabet. However, by the 5th century B.C. this was reduced to 23, later to 20 letters. According to some linguists this was due to the diminishing number of consonants over the centuries.

The first to point out similarities between Etruscan and Hungarian was French historian *Jules Martha* of the Sorbonne, who stated in his massive work, *La langue Étrusque* (Paris, 1913), that Etruscan most resembles two related languages among all living languages: Hungarian and Finnish. At the time his findings were reported widely by the international press, but largely ignored by the scientific community.

Some Hungarian linguists came to the same conclusion, among them Gyula (Julius) Sebestyén in his work, *The Authentic Relics of the Hungarian Runic Script (A magyar rovásírás hiteles emlékei)* (Budapest, 1915), and more recently László (Ladislav) Götz in his 2-volume work, *Keleten kél a nap (The Sun Rises in the East)* (Budapest, Püski, 1994, II: 859-875). The latest addition to the list is a book by Mario Alinei, a widely published Italian linguist, Professor Emeritus of the University of Utrecht, under the title: *Etrusco: una forma arcaica di ungherese (Etruscan: an Archaic Form of Hungarian)* (Il Mulino, Bologna, 2003). Krisztián Puskár translated it into Hungarian in 2005, under the title: *Ősi kapocs – Az etruszk-magyar nyelvrokonság (An Ancient Connection – The Etruscan-Hungarian Linguistic Relationship)* (MVSZ, Budapest, Allprint Kft, 2005, 500 pp.). In it, Alinei refutes the hitherto held theory that the Etruscan language was an admixture of diverse ancient Semitic languages. Instead, he puts forward the unique and somewhat surprising theory that it was neither a Semitic nor an Indo-European, but an agglutinative tongue similar in construction to the Ural-Altaic, more specifically Finno-Ugric languages.

Alinei propounds a “continuity-theory”, whereby the Etruscans, as well as the proto-Hungarians, migrated into the Carpathian Basin in the 3rd millennium B.C. during the so-called Kurgan-migration period, arriving in Europe from the Steppes north of the Black

Sea. These were supposedly Turkic people – as proved by the many similarities that still exist between Hungarian and Turkish that differentiates it from the other so-called Finno-Ugric languages. He also points out the influence of the early Turkic language and culture on that of the Hungarian.

From Hungary, the Etruscans supposedly made their way to Italy and became founders of the later Roman Empire, where the Province of Tuscany still bears their name. That they arrived in present-day Italy from Hungary was already demonstrated by Hugh Hencken in *Tarquinius, Villanova and early Etruscans* (Cambridge, Mass., The Peabody Museum, 2 vols.) (1968). The work was not a great success and was greeted with skepticism by the experts.

Alinei demonstrates that the Etruscan language resembles Hungarian and other Uralic languages in the following ways: (1) it is an *agglutinative language*, where the *word-root never changes*; (2) the *accent is always on the first syllable*; (3) employs *vocal harmony*; (4) it uses exclusively *occlusive* (mute) consonants; and (5) it is characterized by *words always ending in a vowel* (open syllable construction). However, Alieni's real proof lies in the demonstrable similarities between Etruscan and old Hungarian (and other Finno-Ugric, as well as Turkic) functionary and settlement names, such as LUAS = *lovag, lovas, lovász* (knight, equestrian); ŠUNU = *zenész, zeng, zenebona, etc.* (musician, resounding), in early Hungarian texts: *szonog*; TANASA = *tanító* (teacher), TANSINA = *tanítani* (to teach); URU, URE = *úr* (lord), in early Hungarian texts: *uruság*; FELSINA = *felső* (upper), e.g. in settlement names, such as *Felsőnyék, Felsőőr, etc.* The Etruscan and ancient Hungarian runic script, the latter in use in some regions until the 17th century, also shows startling similarities. Emboldened by his findings, he embarked on the translation of Etruscan texts with the help of Hungarian that he deems a success.

Alieni devotes a full chapter to ancient Etruscan and Hungarian history. Unfortunately, the author based his expositions on the Finno-Ugric language and origin theory, using almost exclusively Hungarian Finno-Ugric author sources, though he considered the influence of early (now extinct) Turkic languages from the Altaic family of languages. – B&T: 7617. → **Dual Hungarian Settlement in the Carpathian Basin; László, Gyula; Alieni, Mario; Homeland Settlement in the Carpathian Basin; Hungarian Runic Script.**

**Etsel** – In the German language Etele became Azzilo, Etzal and Ezzilo. For the Scandinavians: Atli. One of the most famous heroic German sagas is about a figure whose name appears to be Attila, the Hun King. Legend says he had two wives; the first, Ereka (Réka) bore two sons, who were killed in the battle of Ravenna. The second was Kriemhilda of Burgundy. According to the Kaiser chronicles, Etsel suffocated in his own blood due to a nose-bleeding, and was buried in Buda. The Scandinavian chronicles portrayed him as a bloodthirsty ruler of the highest rank the Carpathian Basin, whose capital city was Etzelburg, present-day Buda. He was not only a powerful ruler, but also a magnanimous and good-hearted king. – B: 1078, T: 3312. → **Buda; Etele; Attila.**

**European Protestant Hungarian Free University** (*Európai Protestáns Magyar Szabadegyetem – EPMSZ*) – Established in 1969 in Basel, Switzerland with the help of the Swiss Alliance of Protestant Churches. The organization embraces the Western European Hungarian intellectuals irrespective of their political stand. They have yearly conferences that serve as a forum for invited lecturers and for democratic debate between the Western intellectuals and those of the Carpathian Basin. They are involved in

publishing books that, for political or other reasons, could not be published in the Communist era in Hungary, as well as in the neighboring states with important Hungarian population. The organization is registered in Switzerland; but since 1996 there is a branch in Budapest, Hungary. There is another one in Marosvásárhely (now Targu Mures, Transylvania, in Romania), established in 2000. – B: 1126, T: 7103.→**Bárczay, Gyula.**

**Evangelical-Lutheran Church in Hungary, History of** (*Magyarországi Evangélikus Egyház*) – The third largest historic Christian denomination in Hungary, 303,864 members (3%, 2001).

*Structure:* Presbyterian-synodal. The Constitution of the Evangelical Lutheran Church in Hungary was drawn up by the Synod of 1891-1894. At present there are 320 parishes with 300 pastors. The 16 deaneries, as well as the congregations are chaired by senior clergymen and lay superintendents. The Church has three church districts: the Northern District; the Southern District, and the Western District since 2000. The Southern District (*Déli Egyházkerület*, Budapest) consists of 65 congregations, 115,484 members; Western (Transdanubian) District (*Nyugati [Dunántúli] Egyházkerület*, Győr): 110 congregations, 96,061 members; Northern District, Budapest (*Északi Egyházkerület*, Budapest): 81 congregations, 92.319 members.

*History:* The first wave of the Reformation reached Hungary shortly after the beginning of the German Reformation (first laws against the Lutherans: 1523 *poena capitis*, 1525 *Lutherani omnes comburantur*). The Hungarian Reformation started at the time of the Mohács Disaster (1526), and the country's break-up into three parts. By the end of the 16th century, the majority of the population joined the Hungarian Reformation, first to the Lutheran, then to the Calvinist Church. From the beginning, the Lutheran Church was a multi-national and multi-lingual Church; besides its historical Hungarian commitment, it was enriched by German, and later by Slovak traditions. The first Hungarian reformer was Mátyás Dévai, the "Hungarian Luther", followed by outstanding people who joined in the evangelical religious reform: Mihály Sztárai, István Gálszécsi, Péter Bornemisza, Gál Huszár in Upper Hungary (now Slovakia), János Honterus and Gáspár Heltai in Transylvania (Erdély, now in Romania). Not only did their preaching and theological works help to serve this aim, but also their scientific and literary works. School teachings were also renewed by the influence of the German Reformation (Lénárd

Stöckel, *Praeceptor Hungariae*, Bártfa [now Bardejov, Slovakia]). The first Hungarian Lutheran confessions of faith, mostly as defenses, also originated from this period (1549 *Confessio Pentapolitana*, 1559 *Confessio Heptapolitana*, 1569 *Confessio Scepusiana*).

In the 17th and 18th centuries (mostly after the end of the Turkish occupation

**Deák Square Lutheran Church, Budapest**

in 1686), the Counter-Reformation emerged in Hungary. This was based on the principle of *cuius regio, eius religio*, with the direction of the Habsburg dynasty: by the re-Catholicization of the landowner nobility, they created a Catholic majority in the country. The Catholic Counter-Reformation reached its most intensive and violent period during its “decade of mourning” (1671-1681), and the Protestant preachers were forced to leave their faith and mission. Those who resisted - about forty preachers - were sold abroad as galley slaves, many of them dying before their release. Only the policy of the independent Princes of Transylvania meant some support for Protestantism. During the War of Independence against the Habsburgs (1703-11), besides Prince Ferenc Rákóczi II, the Lutheran Prince Imre Thököly played a historical role. The improvement and development of the newly organized Lutheran Church – on the basis of the Synod of Rózsashegy (1707) – was repeatedly hindered by the hostile measures of the Habsburgs, which was finally stopped in 1781 by the Edict of Tolerance. The oppression still could not seal the fate of the Lutheran Church. Pietism and Enlightenment generated outstanding contributions in the fields of the Church, literature and science [Mihály (Michael) Ács, György (George) Bárány, András (Andrew) Torkos, Mátyás (Matthias) Bél, Sámuel Tessedik]. The first Hungarian newspaper, the *Hungarian Courier (Magyar Hirmondó)* (1780), was established by Pastor Mátyás (Matthias) Ráth. The first Hungarian literary and debating Hungarian Society (*Magyar Társaság*) (1790), was established by the later bishop, János (John) Kis in a school in Sopron, where the Lutheran Dániel Berzsenyi studied.

The 19th century was a period of internal and external struggles. The state’s “tolerance” did not mean denominational equality between Protestants and Catholics. This also contributed to the Lutherans’ sensitivity to the ideas of freedom and equality. Both the lay Lutherans [Lajos (Louis) Kossuth, Sándor (Alexander) Petőfi, Artúr Görgey, Dániel Irányi, Arisztid Dessewffy, Károly (Charles) Leiningen, János (John) Jeszenék] and the denominational Lutherans [imprisonment of bishops Máté (Matthew) Haubner and Mihály (Michael) Pákh; execution of pastor (Paul) Pál Rázga] took part in the 1848-1849 War of Independence. As part of the reprisal an order appeared in 1850, which attacked the Synodal-Presbyterian system of the Protestant Churches, together with their independence. The “Protestant Letters-Patent” (1859) followed the same path, which attempted to force state constitution upon the Churches. After that, the pressure of power eased, and in 1894, the Lutheran confession became an accepted denomination.

A prominent person of this period was Bishop József (Joseph) Székács, who was highly respected in Church, as well as in scientific and public circles. However, in the struggles of the Church not only the external power and intellectual pressure had an important role, but conflicts between the nationalities, becoming conscious of themselves, left their mark on the life of the Hungarian Lutherans of the 19th century. This foreshadowed everything that the Treaty of Versailles-Trianon (1920) brought to Historic Hungary after the First World War.

The Dictates Treaty of Versailles-Trianon deeply affected the Lutheran Church, forcing each of its traditional districts to suffer a loss, both in their territory and their membership, which was only worsened by the wave of emigration following the worldwide economic crisis. Church-membership dropped from 1,259,000 in 1900, to 410,000 in 1956. After the Treaty of Trianon, Hungarian Lutherans had to organize their own Churches in the successor states: in Transylvania (*Erdély*, now in Romania); in

Voivodina (Southland, *Délvidék*, Southern Hungary, now Serbia); and in Czechoslovakia (Upland, *Felvidék*, Upper Hungary, now Slovakia). Hungarian Lutherans – in different organizations - could be found in all the countries neighboring Hungary. Bishops Béla Kapi and Sándor (Alexander) Raffay were prominent figures in the reorganization that occurred between the two World Wars. During World War II, numerous pastors took part in saving the Jews; the best known of them was Gábor Sztehlo.

During World War II, a great number of church buildings were seriously damaged or totally destroyed. During the first 10 years after the War, 190 churches and 140 parsonages were repaired and 20 new churches or congregational houses and 26 parsonages were built using donations by the congregations, with the help of the sister churches abroad, and with State support.

Parallel with this building activity great importance is attached to the spiritual edification in the congregations. The preaching of God's Word was placed first. The preparation of children and young people for life is also took place in the congregations, and nationally at the five Conference Centers (Gyenesdiás, Piliscsaba, Keszőhidegkút, etc.). The Church made great efforts to contribute to the raising of the nation's ethical level, e.g. by fighting against alcoholism and drug addiction. Special working teams were trained for these services.

After World War II, the expatriation and deportation of the German population, then the Slovak “population-exchange”, further decreased the number of Lutherans, quickly followed by even more loss due to the emigration that occurred after the 1956 Hungarian Revolution and Freedom Fight. The communist political change - completed in 1948-1950 - interrupted the *élan* of the religious revival and its organizational power. In 1948, Bishop Lajos Ordass was arrested and imprisoned, and the schools and public institutions of the Church were nationalized. In 1951, the *State Office for Church Affairs (Állami Egyházügyi Hivatal – ÁEH)* was established in order to strengthen the state-control over the Churches. In 1952, by fusing the four former church-districts into two, Bishops Zoltán Túróczy and József (Joseph) Szabó were removed from their offices. Amidst the atmosphere of the 1956 Revolution and Freedom Fight, Bishop Lajos (Louis) Ordass returned to his office, only to be officially removed in 1958, as part of wider sanctions imposed on the Church. Bishop Ordass' position was taken over by Zoltán Káldy, who was, until 1987, the most influential leader of the Church. The heritage of this period, so called “diaconal theology”, is still debated strongly.

After the death of Bishop Zoltán Káldy, Dr. Béla Harmati became his successor at the South Church District (1987-2003), followed by Péter Gáncs (2003 - ), which has 5 Deaneries, 65 Congregations and 33 Church Institutions. The North Church District has 6 Deaneries, 81 Congregations and 29 Church Institutions. Its bishops were Dr. Lajos (Louis) Vető (1952- 1956, 1957- 1967), Dr. Ernő (Ernest) Ottlyk (1967-1982), Dr. Gyula (Julius) Nagy (1982-1990), D. Imre (Emeric) Szebik (1990-2006) and now Dr. Tamás Fabiny (2006 - ). In 2000 the Western (Transdanubian) Church District was restored, with parts of the abolished Western Church District by the state authorities in 1952. Its bishops were Dr. János (John) Ittész (2000-2011) and now János (John) Szemerei (2011 - ). It has 6 Deaneries, 110 Congregations and 26 Church Institutions.

*Institutions:* After the change of the political system in 1990, the reorganization of the Lutheran Church started on several levels. Part of this was the establishment of the third district in 2000. The educational, cultural and social work, as well as the financial and

spiritual renewal of the Church, was started in numerous institutions. Schools of the Church: Lutheran Theological University (Budapest), 13 high schools, 5 elementary schools, 14 kindergartens. There was 1 medical institute (2004); 26 nursing homes, 2 homes for handicapped children and 21 homes for seniors. 1,000 people are attended to in these institutions. In addition, 5 conference centers were built. In the past years most of these buildings were renovated and modernized. The maintenance of these homes and the work performed in them are considerably helped with the aid of the sister churches abroad and by the state.

*The Press Department* of the Church publishes the weekly *Evangelical Life (Evangélikus Élet)* for the congregations, the monthly *Pastor (Lelkipásztor)* for clergymen, and the periodical *Intellectual Workshop (Értelmiségi Műhely)* for church members of high intellectual level; this appears twice a year. The *Evangelical Calendar* and the Hungarian translation of the *Losung (Guidepost, Útmutató)* are published annually. In 1983, a new *Hymnbook* was edited and has since been reprinted six times. Further publications include exegetical works for certain books of the Bible, as well as religious belles-lettres.

A *Lutheran Museum* opened in 1973 in Budapest. In addition to its regular collection, it also organizes periodical exhibitions, where treasures of church art and other important documents are displayed.

The Evangelical-Lutheran Church in Hungary is one of the founding members of the World Council of Churches, the Lutheran World Federation, and the Conference of European Churches. In appreciation of the Church's ministry, the 7th General Assembly of the Lutheran World Federation was held in Budapest in 1984, when Bishop Zoltán Káldy was elected its President.

*International Ecumenical Affairs:* The Evangelical-Lutheran Church in Hungary has been a member of the most important international church organizations since their establishment: Lutheran World Federation (LWF) (1947), World Council of Churches (WCC) (1948) and Conference of European Churches (CEC). The Church was represented at a high level by the work of these international organizations: Bishop Lajos Ordass, Professors Károly Hafenscher and Károly Pröhle, Bishops Gyula Nagy and Béla Harmati. There is a partnership contract with the Bavarian Lutheran Church (*Bayerische Lutherische Landeskirche*).

(1) *Evangelical Lutheran Church of the Augsburg Confession in Romania (Erdély – Transylvania) (Romániai Zsinatpresbiteri Ágostai Hitvallású Evangélikus-Lutheránus Egyház).*

*Structure:* Presbiterial – synodal; Center of the Church: Cluj-Napoca (Kolozsvár, now in Romania); 35,000 members, 38 congregations, 118 diaspora congregations. The Church is a member of the Lutheran World Federation – LWF, World Council of Churches – WCC, and Council of European Churches – CEC.

*History:* Just before the Treaty of Versailles-Trianon (1920), the Hungarian Lutherans belonged to and lived within the church structure of Hungary. In 1921, the establishment of the Lutheran District of the Augsburg Confession in Romania was declared by a synod. However, the state recognition of the District was delayed for decades, due in part to the ethnic policy of the Romanian State, and the counter measures of the Saxon Lutheran Church. In 1926, Superintendent Lajos (Louis) Frint was installed in his office, followed by György (George) Argay in 1941, with the title of bishop. At this time,

according to the Second Vienna Award (1940), one part of the territory of the Church was returned to Hungary, while the larger part remained in Romania. The earlier situation was re-established after the Second World War. A victim of the War was Professor Andor (Andrew) Járosi, a theology teacher and pastor, who played an important role in the life of the Church, who was taken away by the Soviet regime.

In 1947, the Romanian National Assembly finally acknowledged the establishment of the Church-District. However, the schools, land and properties of the Church were nationalized. Bishop Argay was investigated several times, and four pastors and four theologians were imprisoned or sent to forced labor camp in the marshes of the Danube Delta in 1958-1959. Until the collapse of the Communist regime, the State kept the Church under surveillance. After the political change in 1989-1990, the legal situation changed, but the issue of the nationalized church property has not been solved.

In 1950, the center of the Church District was moved from Arad to Kolozsvár (Cluj-Napoca). Subsequently, five Banate Slovakian congregations asked for admission to the District. In 1968, the Romanian Government combined the former three seniorates into two deaneries. The characteristic of the Church is still alive in the diaspora situation, fostering Lutheran traditions and national identity.

(2) *Evangelical Christian Church of the Augsburg Confession in Serbia-Voivodina (Ágostai Hitvallású Evangélikus Keresztyén Egyház Szerbiában-Vajdaságban).*

Structure: Superintendancy; its centers: Szabadka (Subotica), Újvidék (Novi Sad).

*History:* After establishing the new borders, according to the Treaty of Versailles-Trianon in 1920, Hungarian, German and Slovakian Lutheran congregations entered into the newly formed state, the Kingdom of Serbia-Croatia-Slovenia. The "Lutheran Community" was founded in 1918 (Belgrade), which had the task of forming a common church. The Slovakian Lutherans left the community in 1920 and established an independent Church in 1921. In 1930, a newly formed synod established the Evangelical German General Church of the Augsburg Confession, incorporating all the other Lutherans including two Hungarian deaneries: Szabadka (Subotica) and Nagyikinda (Kikinda).

After the deportation of the German population in 1945, the remaining small groups of German Lutherans joined the Hungarian deaneries. In the state records of 1949, it was already named as the Evangelical Christian Church of the Augsburg Confession in the Serbian Peoples' Republic, and in 1955, its church constitution was adjusted to these circumstances.

The Yugoslavian State did not allow Hungarian pastoral replacements until the end of the 1960s. As a result, congregations remained without pastors until 1972, and intensive church work could only begin again after 1978, once pastors who studied abroad, returned home. Following this, the relationship with the Evangelical-Lutheran Church in Hungary became closer. The 1998 synod renewed the constitution of the Church, and in the same year, the first superintendent was installed in office.

In 2001, the Serbian Republic declared the historical legal continuity of the Church since 1918, thereby including the Church among its historic denominations.

(3) *Austria. Hungarian Speaking Congregation of the Evangelical Church of the Augsburg Confession in Austria (Ausztiai Evangélikus Egyház Magyarajkú Gyülekezete).*

On 5 November 1956, the Evangelical Church of the Augsburg Confession in Austria

entrusted the Lutheran pastor, István (Stephen) Szépfalusi with giving support to the refugees, under the name of *Evangelische Flüchtlingshilfe*, an organization, which worked until 1962. After that, it functioned under the name of Hungarian Pastoral Care Service until February 2003, when it became the entirely self-supported Hungarian Speaking Congregation of the Evangelical Church of the Augsburg Confession in Austria. The new wave of refugees after 1985 greatly increased the responsibility of this organization. István Szépfalusi was the pastor of the congregation until his death in November 2000. Regular and occasional church services are held in *Vienna, Bregenz, Graz, Innsbruck, Klagenfurt, Salzburg, Traiskirchen* and *Wels*. For the Hungarian Pastoral Care Service, their ecumenical work was important from the very beginning, but in cooperation with the *Péter Bornemisza Society*, it also provided a high level of cultural work.

(4) *Slovakia*. After the establishment of the first Czechoslovakian Republic (1918), the Slovakian Lutherans in Upper Hungary (*Felvidék*), belonging to the *Lutheran Church* in the former territory of the Kingdom of Hungary, established the Evangelical Church of the Augsburg Confession in Slovakia, which included Hungarian and German speaking congregations. There were two exceptions: the congregations of *Somorja (Samorin)* and *Komárom (Komarno)*. They began to work independently and as such, they did not get any state support. After exhausting their financial resources, they finally became members of the Slovakian Church.

Between 1939 and 1945, the congregations of the returned territories (due to the First Vienna Award), were attached to the neighboring Hungarian deaneries. There was an attempt to establish a deanery in Pozsony (now Bratislava) of which Ödön (Edmund) Fizély, pastor of Somorja (now Somorin) would have been the Dean; but because of the Second World War, there was no time or opportunity to do so. Between the two World Wars, editor, Ödön Fizély, published the newspaper, *Evangelikus Lap (Evangelical Paper)*, for the Hungarian Lutherans in Slovakia. After the War the situation became difficult due to the so called “population exchange” (1946), which meant that greater part of the Hungarians from this region were settled in Hungary and because of the so called “Beneš Decrees”, which established the collective guilt of the Hungarians, and from a legal point of view – which is still in force – it discriminated against the Hungarians living there. Until 1954, no Hungarian speaking church service could be held. This was followed by the era of anti-church Communist dictatorship until 1989.

Nowadays, the number of the Hungarian Lutherans in Slovakia is estimated between 12,000 and 15,000. They do not have any organizational structure but belong to the Evangelical Church of the Augsburg Confession in Slovakia. Along the border, from *Pozsony* to *Ágcsernyő (now Ciema)*, there can be found Hungarian speaking Lutherans in varying numbers. Only *Sajógömör (now Gemer)* and *Balogpádár (now Padarovce)* have purely Hungarian speaking congregations. Hungarian services are in *Pozsony, Somorja, Dunaszerdahely (now Dunajská Streda), Alsó- and Felső Szeli (now Lower and Upper Salaby), Farnad (now Farnád), Losonc (now Luceneca), Rimaszombat (now Rimanovská Sobota)*, and its surrounding areas, *Sajógömör (now Gemer)* and its surrounding areas and *Rozsnyó (now Rožnava)* and its surrounding areas.

(5) *Croatia, Slovenia, Sub-Carpathia*. Hungarian Lutherans in the territories of *Croatia* and *Slovenia (Horvátország és Szlovénia)* were living within the structure of the Yugoslav Confederation since the Treaty of Versailles-Trianon (1920) until recently. The

Croatian centers were in Záhgráb (now Zagreb) and in Légrád (now Legrad). Three Hungarian congregations, working in Slovenia, have become bilingual and they are assimilating to a large extent due to the lack of replacements of Hungarian pastors.

Before the Second World War, in *Sub-Carpathia* or *Ruthenia (Kárpátalja)*, which today belongs to the Ukraine, there were Hungarian congregations in Munkács (now Mukacheve), Ungvár (now Uzhhorod) and Beregszász (now Berehovo) which supervised the scattered communities as far as Rahó (now Rahiv, Ukraine). After the Second World War their churches were nationalized and their pastors were expelled. Today the Hungarians have scattered and they mostly joined Hungarian Reformed congregations. Lutheran church services are only held occasionally with the help of visiting pastors from the mother country.

*Hungarian Lutheran Churches Worldwide.*

The scattering of the twentieth century Hungarian Lutherans occurred in five major waves: (1) in the period from immediately after the turn of the century until World War I, when an interest in better economic conditions arose (USA); (2) after the world-wide economic crisis; (3) after the World War II; (4) after the 1956 Revolution and War of Independence, and (5) in the 1980s, at the time of the disintegration of the socialist system.

These newly established church communities became centers in preserving national identity and Christian religion, even though they worked in scattered situations everywhere. According to the given situation, these communities were ecumenically open, were often established with the Reformed (Calvinist) denomination, and occasionally were open toward Catholics as well. Both the informal and the coordinated meetings of those giving pastoral care provided platforms for collaboration (Conference of Hungarian Lutheran Church Workers Abroad, chaired by Vilmos Vajta, with its secretariat in London). In 2001 – after considerable delay – The *Hungarian Lutheran Consultative Assembly* was established, together with the Evangelical-Lutheran Church in Hungary. In addition to the National Church, the Assembly includes members representing the Trianon (1920) successor states, as well as the scattered Hungarian Lutherans worldwide. In 2006, the Assembly expanded itself under the name of *Hungarian Lutheran Conference*. The aim of the Conference is to retain a strong relationship with Hungarian Lutherans worldwide, to improve support for the Hungarian Lutherans, and to maintain a good relationship with the local Churches. A theological journal has been published since 1958, with the title of *Koinonia* – its editor was Vilmos (William) Vajta.

(a) *North-America*. As representative of the Evangelical-Lutheran Church in Hungary, Pastor Sándor (Alexander) Raffay traveled to the USA in 1914, to assess the situation of the Hungarian Lutherans there, but his recommendation was swept aside by the First World War. In the 1920s, a lot of Hungarians arrived in the USA, mostly from the detached territories. This was followed by a new wave of refugees between 1944 and 1949, when, after a longer stay in Austria and Germany, a great number of people settled in North America. A new wave of refugees arrived to North America in 1956-1957, which established new Hungarian congregations. After the War – considering the mixed marriages – English-speaking church services were introduced.

The first Hungarian congregations in the USA were established at the beginning of the 20th century. In Cleveland, Bible-studies were held at the turn of the century, and in

1906, the First Hungarian Lutheran Church was established. The first pastor of the Church was István (Stephen) Ruzsa (1883-1940), who completed his theological studies in Eperjes (now Presov, Slovakia), and became pastor in 1907. He established other Lutheran communities as well: in Detroit (1907), in New Brunswick (1908), and in Buffalo (1914). There was a period of time, when 22 organized congregations worked in North America. A congregation was established in Chicago in 1959, which, like others, was completely self-supporting. A Youth Association was also founded under the name of *Lutheran League*. In the 1940s and 1950s, the Hungarian Lutheran congregations received significant financial help. Nowadays, they are members of the United Lutheran Church in America, and form a Hungarian Conference (seniorate), organized by pastor Ernő (Ernest) Stiegler; its leader is the Arch-Dean, who for forty years had been Gábor (Gabriel) Brachna, until his death in 1998. The monthly newspaper – *Mighty Fortress (Erős Vár)* – has been published since 1937. The Hungarian Lutheran communities partly merged into the Slovakian, Hungarian Reformed, and American congregations. In 1959, nine independent congregations existed with 2770 members.

In *Canada*, there were independent congregations with their own churches and pastors in *Montreal, Toronto, Vancouver*, and occasionally in *Windsor*. Nowadays the survival of the Hungarian congregations is threatened by the assimilation of the descendants.

(b) *South-America*. The first congregations were established at the time of the world-wide economic crisis, but the pastors working among the Hungarians – after initially getting support from abroad – were forced to take part in the work of the local congregation in order to support themselves.

In *Buenos Aires* (Argentina), a Hungarian Protestant congregation was established in 1928, by Pastor László (Ladislás) Tomonkó. The Lutheran congregation became independent in 1952, and built their own church in 1957. Tomonkó also organized a Protestant congregation in *Montevideo* (Uruguay) in 1937. In *Caracas* (Venezuela) a joint Reformed-Lutheran congregation was established in 1949, and a Hungarian song-book was published there in 1953. They established the Resurrection Lutheran Congregation, together with the local German and Latvian groups. They built their own church and community hall in 1957. In Sao Paulo (Brazil), the congregation was established in 1956, with its own church and pastor; in Santiago (Chile) in 1957, one was established as a branch-church of the Germans, which includes Peru, Columbia-Bogotá, Dominican Republic; in Asuncion (Paraguay) in 1957. They take pastoral care of the local Reformed people too, who do not have their own Church. The Lutheran World Federation founded a Theological College in 1954 in Buenos Aires, in order to provide a continuous supply of pastors to South-America. Its first President was Béla Leskó dr., the local Lutheran pastor. Among the 2,000 students, there were many Hungarians after 1956.

(c) *Australia*. The Lutheran church work began in 1952, followed by the establishment of the congregation in Sydney in 1952 with its own pastor. They belong to the United Lutheran Church. There are occasional church services in Melbourne and Perth (Protestant communities).

(d) *Western Europe*. Prior to World War II, there was no appreciable number of Hungarian Lutherans in Western Europe; however, after 1945, they settled mainly in Austria and Germany. Later on, the Lutheran World Federation, the World Council of Churches and the local affiliated churches assisted in the regular pastoral work. Since

1957, there has been a monthly journal, the *Útitárs (Travelling Companion)*, published by the Hungarian Lutherans of Western Europe.

In *Germany*, two centers of some significance were formed. (1) One in Stuttgart, where in 1948, the Hungarian Lutheran Congregation of Mission was formed and (2) in Münster, where in 1957, the Hungarian Evangelical Congregation was established. The general trend was that as far as possible, the pastoral positions established earlier received the reinforcement. The more recent ones were organized within the framework of the German Protestant Church, and for the church work, migrant pastors were trained. In Austria and in the Netherlands, similar to Germany, the congregational centers generally tended to form in the cities and sponsored by the local churches.

In *Switzerland*, prior to 1957, there were only occasional church services, but later on, congregation centers were set up in Basel, Bern, Genf, Neuchatel and Zürich, where the pastoral work is carried out partly by theological trainees with Swiss scholarships and partly by volunteers.

Full-time and permanent pastors were working with seats in *Paris, Stockholm* and *London*. In *Sweden* during 1948-1952, the Swedish Lutheran Church secured pastoral care for 600 agricultural contract-laborers; later this work was taken over by László (Ladislás) Terray, up to 1957. After the 1956 wave of refugees, the Swedish Church again employed a parson, who was also asked by the Norwegians and Danes to carry out pastoral work on their territory. In England, there is a Hungarian Lutheran pastor, Bishop Róbert Pátkai since 1956, who also does work for Hungarians, besides English congregational services and other clerical tasks, such as the management of the Lutheran Council of Great Britain. The number of these mostly Protestant communities and among them the number of Lutherans may only be approximated. The present situation is determined by a number of factors: partly aging, the diminishing numbers and the loss of the second generation. On the other hand, while in America, the church is typically self-supporting, in Europe, the exhaustion of external aid causes serious difficulties. It will be necessary to find ways of close cooperation that could be maintained with the Mother Church in Hungary. – B: 1050, T: 7456. → **Most of the persons and events in the article have their own entry.**

**Evliya Çelebi** (Constantinople, now Istanbul, 25 March 1611 – Constantinople or Cairo, after 1682) – Great Turkish world traveler, also known as *İbn Derviş Mehmed Zilli*. He was born into a wealthy family from Kütahya. His father was Derviş Mehmed Zilli, a jeweler for the Ottoman court. His mother was a tribeswoman, a relative of the later Grand Vizier Melek Ahmed Pasha. He received an excellent education, distinguishing himself in Arabic language and literature, the art of writing and the science of music. He began his travels in Constantinople, taking notes on buildings, markets, customs and culture. His descriptions are sometimes exaggerated or fictitious; but his notes are usually accepted as a reliable guide of the 17th Century Ottoman Empire. He started his first journey outside the city in 1640. His collection of notes from all of his travels formed a 10-volume work called the *Seyahatname* (Book of Travels). In them he gives an account of his journeys in Anatolia, Crete, Azerbaijan, Iraq, Iran, Egypt, Greece, Austria and Hungary, among others. The 6th volume is entitled *Military Campaigns in Hungary (1663-1664)*. He paints an interesting picture of 17th century Hungary; he describes the towns of Buda and Esztergom, and Lake Balaton, and gives an interesting account of the

1664 Battle of Szentgotthárd. The volume was first translated into Hungarian by Imre (Emeric) Karácson in 1904-1908; a second edition was published in 1985. In 2011, UNESCO included the 400th anniversary of Evliya Çelebi's birth to its timetable for celebration of anniversaries. – B: 1031, 1085, 7617, T: 3240, 7617.→**Buda Castle; Esztergom; Balaton, Lake; Szentgotthárd, Battle of.**

**Examples, Book of** – A Hungarian Codex dated to 1510. It consists of 43 pages, copied by three individuals. It is a collection of examples mainly from Johannes Herolt's *Promptuarium exemplorum*. One of the transcribers was Lea (Leah) Ráskai, who entered the year of carrying out her part in 1510, in words on page 28. Its aim: to prepare the novices for monastic life with contemplative material providing examples. In addition to the examples, it contains the complete text of the *Dance Death (Haláltánc)* and the *Life and Death (Élet és Halál)* dialogue. A notable part of it is the Ten Commandments in verse. It is in the University Library of Budapest. – B: 0942, T: 7659.→**Codex Literature; Ráskai, Lea.**

**Exhortations to Prince Imre (Intelmek)** – Important advice given by Hungary's first ruler King István I (St Stephen, 997-1038), written for his son and heir, Crown Prince Imre (St Emeric). Excerpts from this famous document are as follows. "Carry out your royal duties most peacefully, humbly, gently, without anger, haughtiness or hatred, always keeping in mind that ultimately all people are the same and that nothing uplifts you, but humility; and nothing humiliates you, but haughtiness and hatred. If you are peace loving, then you will be called a king and a king's son, and you will be loved by all the knights. If you are angry, arrogant, filled with hatred, turbulent, and you lift your head way above the bailiffs' and leading serfs', verily the power of the knights will weaken the royal dignity and the realm will be given away to foreigners. Fearing precisely this, you must rule over the life of the bailiffs by keeping good morals, so that they will always be faithfully loyal to the dignity of the kingship and thereby your reign will always be peaceful."

"If you want to maintain the respect of your royal realm, give just judgement. If you want to have the possession of your soul, be tolerant... a peace-loving king rules and the intolerant one commits atrocities. Whenever you have to administer justice in the spirit of your dignity, display patience and mercy, as well as compassion, so that your crown may be praiseworthy and ornamented."

"Therefore, my beloved son, sweetness of my heart, hope of future offspring, I ask you and command you to be gracious and merciful everywhere and in everything, supported by divine grace, not only to your kinsfolk and relatives, or to leaders and commanders, or to neighbors, but all inhabitants of the realm, at the same time also to foreigners and to everybody who comes to you, because graciousness leads to supreme happiness". – B: 1139, 1460, T: 7456.→**István I, King (St. Stephen); Imre (St. Emeric), Prince; Gellért, Bishop Saint.**

**Exploitation of Hungary** – (1) Before and during World War II, Hungary gradually came under the political and economic influence of Germany. Hungary not only participated in the war against the Soviet Union for various reasons, but its economy helped the German War effort. Hungarian bauxite, crude oil, industrial and agricultural

products flowed into Germany. At the end of the war Germany owed over one billion marks and about two million pengős (Hungarian currency) to Hungary. When the front-line reached Hungary, its livestock, industrial machinery, museum treasures and gold bullions of the National Bank were carried away to Germany by trains, in order to prevent them falling into enemy hands. There were two “Gold trains” destined to Germany, which ended up in American custody. After the end of the war only a trickle of this wealth was returned. In 1978, the US Government returned the Holy Crown with the crown regalia. (2) Hungary was “liberated” by the Soviet Army, which remained there “temporarily” for 45 years; in reality it was a permanent occupation. With it, the systematic exploitation of Hungary started. It had several distinct forms. Not only Hungarian Army personnel in the hundred-thousands were taken to Soviet POW camps, but hundreds of thousands of civilian men and women were rounded up for forced labor in the Soviet Union, most of them never to be seen again. The civil population was looted, valuables taken away and women raped, mistreated, even killed. In addition, Hungary suffered from a different type of large scale looting. Entire plants and factories were dismantled and carried off to the Soviet Union. Grains and other agricultural products were seized on a large scale. Almost half of the livestock was taken out of the country. Hungary was obliged to pay 200 million US\$ in 1938 value, to the Soviet Union, \$30 million to Czechoslovakia, and \$70 million to Yugoslavia, as war indemnity. In addition, Hungary had to furnish goods, facilities and services for the occupying army. Another means of exploitation was the Hungarian-Soviet Economic Cooperation Agreement. Joint Soviet–Hungarian companies were established for the exploitation of Hungarian bauxite deposits and oil fields. In the 1970s and 1980s, Hungary received Western loans and a large part of the money was channeled to the Soviet Union and never paid back. This significantly contributed to the collapse of the Soviet system in Hungary in 1989. In the 1980s, the Soviet Union secretly returned some paintings. In 1992, a commission was set up to plan the return of works of art, taken out of Hungary and held in Russia. A 40,000-item database of lost artworks has been set up in Budapest, where the first meeting of a joint Hungarian-Russian restitution group met in 1994. On 26 February 2006, Russian authorities returned to Hungary 136 valuable books, taken from the Reformed Library of Sárospatak at the end of World War II. – B: 1295, 1296, T: 7103.→**Gold Train; Hungary, History of; Paris Peace Treaty.**

## F

**Fa, Nándor** (Ferdinand) (Székesfehérvár, 7 September 1954 - ) – Sailor, sport boat builder. Upon completing his education, he was employed by the Light Metal Manufacturing firm in Székesfehérvár, where he achieved excellent records in the kayak and canoe classes of the sports division. He started sailing in 1980, reached first place in Hungarian sailing in 1984. He was the only one in the European racing field who sailed in a boat constructed by himself. He sailed around the world with József (Joseph) Gál in two years, from 26 September 1985, to 12 September 1987, in his *Saint Jupat (Szent Jupát)* sailboat that he built. – B: 1105, 1020, T: 7675.→**Gál, József.**

**Fabotka**→**Worthless Money.**

**Fábián, Pál** (Paul) (Szombathely, 21 December 1922 - Budapest, 14 September 2008) – Linguist. He did his higher studies at the Eötvös College of the University of Budapest (1941-1946). After some teaching experience at a high school in Pécs, he became a professor at the Academy of Pedagogy, Budapest (1950-1955). Between 1955 and 1990, he was a professor and department head at the University of Budapest. Between 1964 and 1969, he was visiting Professor of Hungarian Language and Literature at the University of Padua, Italy. From 1951 he was a member, then secretary, finally Co-President of the Orthography Committee (*Helyesírási Bizottság*) of the Hungarian Academy of Sciences, and from 1997 to 1999 President of its Language Committee (*Nyelvi Bizottság*), and in related organizations and institutions. He was Editorial Board President of the periodical, *Hungarian Language Guard (Magyar Nyelvőr)*. He was Editor of the *Hungarian Spelling Rules (Magyar Helyesírási Szabályzat)* (1954, 1984). His main field of interest was Hungarology, a stock of Hungarian words and stylistics. His works include *A Guide for Spelling (Helyesírási tanácsadó szótár)* (1961); *Medical Spelling Dictionary (Orvosi helyesírási szótár)* (co-editor, 1992), and *Hungarian Spelling Dictionary (Magyar helyesírási szótár)* (co-author, 1999). He is a recipient of a number of prizes, among them the Golden Memorial Medal of the People Republic of Hungary (1951), The Star Order of merit of the People Republic of Hungary (1986), Koránd Eötvös Memorial Medal (1990), the Kosztolányi Prize (1994), the Lajos Lőrincze Prize (1996), the Golden Diploma of the University of Budapest (1997), and the Miklós Révai Prize (1999). – B: 0874, 1257, T: 7103.→**Lőrincze, Lajos; Deme, László.**

**Fábián, Zoltán** (pen-name A. F. Bian) (Nyíregyháza, 30 January 1926 - Szentendre, 2 May 1983) – Writer. Originally, he studied at the Ferenc (Franz) Liszt Academy of Music in Budapest, but later he switched to journalism. His writings appeared in the newspapers *Star (Csillag)*, *New Voice (Új Hang)*, and the review *Literary Journal (Irodalmi Újság)*. Between 1950 and 1953, he worked as a bookkeeper and as a statistician at various firms; from 1970, he was Secretary of the Hungarian Writers Association. He died in a car accident. His works include *Roads (Utak)* short stories (1952); *The Voice of the Violin (Hegedűszó)* short stories (1956); *Judgment (Ítélet)* novel (1961); *Message from the Eighth Planet (Üzen a nyolcadik bolygó)* science fiction, with Gy. Kulin (1966), and *Aster*, science fiction (1971). He was a recipient of the Attila József Prize (1972), and the Literary Prize of the Art Foundation (1981) – B: 0883, 0878, 1257, T: 7103.

**Fabiny, Tamás** (Thomas) (Budapest, 5 February 1979 - ) – Lutheran Bishop. His higher studies were at the Evangelical Lutheran Theological Academy, Budapest (1979-1982), at the Friedrich Alexander University of Erlangen-Nürnberg, Germany, and at the Lutheran School of Theology in Chicago. He was Assistant Pastor in Siófok, Kötöcs, Balatonszárszó, and Budapest-Kőbánya, where he served as Pastor between 1987 and 1999. Since 1966, he has been editor-reporter at the Duna Television. He has been a professor at the Department of New Testament (*Újszövetségi Tanszék*) of the Evangelical University, Budapest, since 1999. He was elected Bishop of the Northern District of Hungary in 2006. He is the author of a number of articles, sermons and papers. His books include *Look up! (Nézz föl)* with Mrs. Tekus (1988), *That You Build Him a Strong House... (Hogy néki erős házat építs...)* (1990), and *Erzählte Dramen (Narrated Dramas)* (2000). – B: 1446, T: 7103.→**Fabiny, Tibor Sr.; Fabiny, Tibor Jr.**

**Fabiny, Tibor Jr.** (Budapest. 18 June, 1955 - ) – Literary historian, theologian, editor. His higher studies were at the University of Budapest (1974-1980) and at the Lutheran Theological Academy, Budapest (1983-1986). He was an assistant professor at the Department of English Language and Literature of the University of Szeged (1985-1993), then an adjunct professor in 1993-1994, and a professor (1993-1994). Between 1993 and 1998, he was a professor at the Institute of English and American Studies of the Péter Pázmány Roman Catholic University and the Reformed - as well as Lutheran Universities. He was a guest-professor in England (1984-1985), Belgium (1989-1990), and the United States (1993). He is a member of the Modern Philological Committee of the Hungarian Academy of Sciences, Secretary of the Hungarian Shakespeare Committee, and Lay President of the Hungarian Lutheran Association. Among his works are: *Theory of Hermeneutics (A Hermeneutika elmélete)* editor (1987); *The Lion and the Lamb* (1992); *The History of Christian Hermeneutics* (1998), and the *Symbol of Coming to a Halt (A megállás szimbóluma)* (2000). – B: 0874, T: 7103.→**Fabiny, Tibor Sr.; Fabiny, Tamás.**

**Fabiny, Tibor Sr.** (Budapest, 22 September 1924 - Budapest, 5 December 2007) – Lutheran theologian, church-historian. His higher studies were at the University of Budapest, where he studied Political Science (1942-1946); at the Faculty of Evangelical Theology of Sopron, and also at the University of Pécs (1949-1953). Between 1946 and 1949, he worked as a bank clerk. He was Pastor in Csögle (1954-1964) and in Miskolc (1964-1967). From 1967, he taught at the Evangelical-Lutheran Theological Academy of Budapest, and from 1968, he was Professor and Chair of Church History and Church Law Department at the same Academy. Since 1973, he was the organizer and Head of the Lutheran Museum, Budapest. His works include a number of articles and books such as: *The Last Will of Martin Luther (Luther Márton végrendelete)* (1982); *Hope Preserved* (1984); *Bewährte Hoffnung* (1984); *Geschichte der Evangelischen Kirche in Ungarn* (1995), and *A Magyarországi Evangélikus Egyház rövid története (A Short History of the Evangelical Church in Hungary)* (1997). He was awarded the Ferenc Móra Memorial Medal (1990) and the Péter Pázmány Prize (2003). – B: 0874, 0878, 1447, T: 7103.→**Fabiny, Tibor Jr.; Fabiny, Tamás.**

**Fábri, Zoltán** (Furtkovits) (Stósz, now Štós, Slovakia, 15 October 1917 - Budapest, 23 August 1994) - Film-director, screenwriter. Between the two World Wars he finished his primary and secondary schooling. He graduated in the Academy of Fine Arts, which

helped him later to be a production-designer. He liked to learn and joined the Academy of Dramatic Art. He became a director and actor. In the beginning of his career he was a production-designer, actor, and directed in theatres. He liked to draw and made many book illustrations. After World War II, he was director of the Hungarian Theater (*Magyar Theater*), Budapest, and in 1947 he was member of the National Theatre (*Nemzeti Színház*), Budapest. In 1950, he received a job in the Film Factory as an art director. Occasionally he wrote scripts. He continued directing and writing until the early 1980s. After his retirement from the film industry, Fábri taught at the Academy of Dramatic Arts. In his last years he painted and wrote screenplays. He was also President of the Hungarian Film Artist Union from 1959 to 1981. Among his stage-productions were: *Shakespeare's Henry IV*; Pirandello's *Henry IV*; Maugham's *The Theater* (*Színház*), and F. Molnár's *Play is the Thing* (*Játék a kastélyban*). His first film was the *Storm* (*Vihar*) (1951). At the height of his career he made the internationally renowned film *Carousel* (*Körhinta*) (1956). He directed more than 25 feature films including *Déryné* (1951); *Darkness in Daytime* (*Nappali sötétség*) (1963); *Twenty Hours* (*Húsz óra*) (1965); *The Fifth Seal* (*Az örökös pecsét*) (1976), and *Requiem* (1981). Fábri made almost all of his films based on literary material (novels or short stories) and wrote the screenplays himself. His constant theme was the question of humanity. Many of his films are set in or around World War II. He was a sharp critic of Nacism. Two of his frequent collaborators were actress Mari Törőcsik and cinematographer György (William) Illés. He was recipient of a number of distinction including the Kossuth Prize (1953, 1955, 1970), the Merited Artist title (1956) and the Outstanding Artist title (1965). – B: 1445, 1031, 1719, T: 7103.→**Törőcsik Mari; Tamássy, Zdenkó.**

**Fabriczy Kováts, Mihály** (Michael) (Karcag, August 1724 - Charleston, SC, USA, 11 May 1779) – Military officer of the Hussars. He was a hero of the American War of Independence (1776-1783). In Austria's War of Succession (1740-1748), he served as an ensign in the Jászku Hussar Regiment. In 1746, he entered the service of Prussia and in the Seven Years' War and he fought against Austria. In 1761 he resigned from Prussian service and tried to go to Poland through Hungary, but was captured and escorted by the Austrians to Vienna. Empress Maria Theresa set him free and promoted him to the rank of major. Between 1773 and 1775 he lived in the Kingdom of Saxony and sought contact again with the Polish émigrés, namely with Count Casimir Pulaski. In 1776, he landed in America. In 1778, George Washington appointed him as Commander of the Pulaski Hussar Legion. After numerous brilliant military successes against the British, he was ordered to break the siege of Charleston. There, leading a cavalry attack, he was killed by gunshot under the walls of the city. The British buried him with full military pomp, since they also acknowledged that his Hussars were the best among all the American cavalry units. On the 200th anniversary of his death in 1979, the city of Charleston remembered his heroic sacrifice with a celebration. The mayor of the city declared the week between May 6 and 12 as the Hungarian Week, and the Bercsényi Armored Regiment of France represented him at the celebration. There was a delegation from Hungary, as well as US senators and congressmen, diplomats among the dignitaries and the international media. Inside the citadel of Charleston, there is now a Kováts Memorial Museum and the parade ground in the Military Academy of South Carolina is named after Mihály Fabriczy Kováts. On 11 October 2003, his bronze equestrian statue was unveiled in Washington, D.C. – B: 0883, 1500, T: 3233.→**Faithful unto Death.**

**Fabró, Henrik** (Henry) (Borbátvíz, now Rau-Barkat, Romania, 21 February 1866 - Balatonfüred, 16 February 1924) – Stenographer. He entered the office of parliamentary stenographers in 1886, as the most qualified member, writing in several languages. He became its director in 1922. He initiated the formation of the Association of International Gabelsberger Stenographers that actually came into existence in Budapest in 1896. He founded the Association of Practicing Stenographers in 1905 and became its first director. Also, he was Editor at the stenographers' periodical, *Writing (Írás)*. First he launched the vowel-shortening method, then he revised the Gabelsberger-Markovits system of stenography. He was the Director of the Hungarian News Service. He influenced Béla Radnai to unify the Hungarian systems of stenography. It is to Fabró's merit that he included the latest psychological results into the modernization of higher degree stenography. He was one of the most important figures of Hungarian stenography. – B: 1078, 0883, T: 3240. → **Radnai, Béla (2)**.

**Fábry, Sándor** (Alexander) (Budapest, 20 November 1953 - ) – Journalist, humorist, designer. His higher studies were at the Teachers' Academy, Pécs (1972-1976), at the Loránd Eötvös University, Budapest, where he studied Hungarian and German Literature (1977-1978), and at the Film-script-writer School of the Hungarian Film Co. (*Mafilm Filmíró Iskola*) (1976-1978). Between 1978 and 1992, he worked as dramaturgist at the Mafilm Studio. From 1992 he freelanced and wrote feature film scripts, including *The Devil Take It (Az ördög vigye)*; *Video Blues*; *Hungarian Pizza (Magyar pizza)*. His feature films include *Dream Brigade (Álombrigád)* (1983); *No-man's Land (Senkiföldje)* (1993) and *Fairy Hill (Tündérdomb)*. Since 1989 he has been writing the main column of the magazine, *Snow Shoe Design (Hócipő Dizájn)*. He wrote film reviews as well and a gastronomy column for *Playboy* magazine. He is a standing member of the *Radio Cabaret (Rádiókabaré)*, the *Cabaret Thursday (Kabarécsütörtök)*, and the *New Year's Eve Programs (Szilveszteri programok)*. Since 2000, he has appeared monthly at the New Theater (*Új Színház*), Budapest. Since 1998, he has had his own program in the MTV1, then in the RTL with the title: *Evening Showder with Sándor Fábry (Esti Showder Fábry Sándorral)*. He publishes regularly in newspapers, and has written more than 40 filmscripts with co-writer Csaba Kardos. His books include *Blown by the Tiger (Elfújta a tigris)* with András Wahorn (1994). His original style, humor and improvising talent are greatly appreciated and have enhanced his popularity. He was a recipient of a number of prizes and awards, among them the Karinthy Ring (1996), the Déri Prize (1999) and the title of Merited Artist (2000). – B: 0874, 1178, 1776, T: 7103.

**Fábry, Zoltán** (Stósz, now Stós, Slovakia, 10 August 1897 - Stósz, 31 May 1970) – Writer, publicist, critic. He studied at the Lutheran High School of Rozsnyó (now Roznava, Slovakia). During World War I, he was in the army and fought at the fronts from 1916 to 1918. His higher studies, beginning in 1918, were at the University of Budapest, where he read History; but was unable to finish his studies due to an illness. In 1919, he returned to Stósz and worked as a contributor to newspapers. Between 1929 and 1939, he was the Slovakian editor for the Transylvanian periodical, *Our Age (Korunk)* and, from 1931 to 1936 he edited the newspaper, *The Way (Az Út)*. In 1932, he traveled through the Sub-Carpathian (*Kárpátalja*, then Czechoslovakia, now Ukraine) region and wrote about his experiences in the *Legend of Hunger* that was confiscated in Czechoslovakia. He was the first one in Central Europe to openly criticize fascism in his books and articles. For this, and other anti-war activities, he was imprisoned at Illava in

1939 and in 1941. In the Slovak State he was banned from publishing between 1939 and 1948, but became a respected literary figure after 1948. He published his articles in the newspaper, *New Word (Új Szó)*, and championed the rights of the Hungarian ethnic minority in Czechoslovakia. He was chief contributor for the periodical, *Literary Review (Irodalmi Szemle)* of Pozsony (now Bratislava, Slovakia) from 1958 until his death. He left his home base only for presentation tours. His works include *Against Weapon and Soldier (Fegyver és vitéz ellen)* (1937); *Bridges and Ditches (Hidak és árkok)* (1957); *Reality Literature (Valóságirodalom)* (1964), and *Stealing Europe (Európa elrablása)* (1966). He was one of the most important Hungarian writers of Upper Hungary (Upland, *Felvidék*, now Slovakia). His home in Stósz became a literary memorial and a creative haven for writers. He received Czechoslovakian and Hungarian government awards, among them the title of Merited Artist (1962), the Madách Prize (1967), and the Red Banner Order of Merit of the People of the Republic of Hungary (1967). A Girl's College in Budapest bears his name. – B: 1257, 1160, 0878, 1551, T: 7103.

**Fadrusz, János** (John) (Pozsony, now Bratislava, Slovakia, 2 September 1858 - Budapest 26 October 1903) – Sculptor. He came from a family of cottars. He completed four elementary and two high school years in Pozsony, then apprenticed as a locksmith. Upon becoming a journeyman, he won a gold medal with his design of an ornamental gate; his woodcarvings also earned general recognition. This brought him to the Woodcarving Institute at Zayugróc (now Uhrovec, Slovakia), in 1875, where he successfully experimented with faience painting as well as sculpting. He was accepted to the Viennese Tilgner Workshop with a scholarship. Later, he studied at the Academy there. His name became known countrywide in 1882 with the *Crucifix* he sculpted in Vienna. His first significant consignment was the creation of the equestrian statue of *Empress Maria Theresa* in Pozsony. This statue was destroyed by the Czechs after World War I. In 1894, he won first prize at a competition with a design for the equestrian statue of *King Mátyás I* (Matthias Corvinus, 1443-1490), unveiled in 1902 in Kolozsvár (now Cluj-Napoca, Romania). Several of his statues were erected in Budapest and in some cities of Transylvania (*Erdély*, now in Romania). His well-known works are: *Toldi with Wolves (Toldi a farkasokkal)* (1902); *Wesselényi statue (Wesselényi szobor)* (1902), and *Tuhutum Memorial (Tuhutum-émlék)* (1902). His creations are monumental, preserving the best traditions of classical sculpture. – B: 0883, 1124, T: 7675.

His first significant consignment was the creation of the equestrian statue of *Empress Maria Theresa* in Pozsony. This statue was destroyed by the Czechs after World War I. In 1894, he won first prize at a competition with a design for the equestrian statue of *King Mátyás I* (Matthias Corvinus, 1443-1490), unveiled in 1902 in Kolozsvár (now Cluj-Napoca, Romania). Several of his statues were erected in Budapest and in some cities of Transylvania (*Erdély*, now in Romania). His well-known works are: *Toldi with Wolves (Toldi a farkasokkal)* (1902); *Wesselényi statue (Wesselényi szobor)* (1902), and *Tuhutum Memorial (Tuhutum-émlék)* (1902). His creations are monumental, preserving the best traditions of classical sculpture. – B: 0883, 1124, T: 7675.

**Faience of Bélaház** (now Boleráz, Slovakia) – Bélaház is a village in the former Pozsony County (now Bratislava, Slovakia) that held privileges since the time of King Béla IV (1235-1270). The products of its faience workshop, made in the 18th century, became very rare. The basic color of its glaze is whitish green, decorated mostly with crimson flowers. These bellied vessels are fine relics of the Hungarian provincial late Rococo era. The workshop was closed probably in the middle of the 19th century. – B: 1144, 1020, T: 3240. → **Zsolnay, Vilmos; Eozin; Wartha, Vince.**

**Faith, Confession of** – The Association of the Hungarian Defense Leagues initiated a contest in June of 1920 for the composition of a prayer and slogan that would arouse the faith in the re-establishment of Hungary's old historical borders in the Carpathian Basin. The contest was won by Mrs. Elemér Papp-Váry with the following prayer: “*I believe in one God - I believe in one homeland - I believe in an eternal divine justice - I believe in the resurrection of Hungary - Amen*”. (*Hiszek egy Istenben, hiszek egy Hazában, hiszek egy Isteni örök igazságban, hiszek Magyarország feltámadásában. Ámen*). Following the Peace Treaty of Versailles-Trianon (4 June 1920) that dismembered Hungary, this confession of faith became the national prayer of Hungarians all over the world. – B: 1230, 1270, T: 7662. → **Trianon Peace Treaty**.

**Faith Congregation** – This is a religious community based on an Evangelical foundation with charismatic features. It grew out of a prayer group of seven people in 1979, and became an officially recognized denomination in 1989. Their articles of faith are based on the Bible. As their system of belief is still in formation, a high degree of creativity is expected from their members. In their practice of religion and forms of expression, they strive for a new style of religious music and art. They are active in political and public life and often operate successful businesses; they have and run a TV station. In their view, a believer's progress can be measured by his/her social and economical progress that reflects closeness to God. According to the leading minister, Rev. Sándor (Alexander) Németh, the movement has close ties with the Alliance of Free Democrats (*Szabad Demokraták Szövetsége – SZDSZ*). They denounce historical churches and criticize their ceremonies. Their newsletter is *HIT-Info*. – B: 1042, T: 7390.

**Falk, Peter Michael** (New York City, NY., 16 September - Los Angeles, California 23 June 2011) – Actor. One of his great-grandfathers was the Hungarian Miksa (Maximilia) Falk, writer and politician. At the age of three, his right eye was surgically removed due to cancer. He graduated from Ossining High School, where he was President of his class. His early career choices involved becoming a certified public accountant, and he worked as an efficiency expert for the Budget Bureau of the State of Connecticut before becoming an actor. On choosing to change careers, he studied the acting art with Eva Le Gallienne and Sanford Meisner. He is best known for his role as Lt. Frank Columbo in the television series *Columbo*. He appeared in numerous films such as *The Princess Bride*, *The Great Race* and *Next*, and television guest roles. His awards include Golden Laurel (1962), Emmy Award (1975, 1976), and Life Time Achievement (2003). He married twice and has two children. – B: 1719, 1031, T: 7103.

**Falka, Sámuel** (*bikfalvi*) (Fogaras, now Fagaras, Romania, 4 May 1766 - Buda, 20 January 1826) – Copperplate engraver. He was descendant of a Szekler Hungarian family in Transylvania (*Erdély*, now in Romania). He studied at the Reformed College of Székelyudvarhely (now Odorheiu Secuiesc, Romania) then trained in drawing under Neuhauser in Szeben (now Sibiu, Romania). Later, he moved to Kolozsvár (now Cluj-Napoca, Romania) to study wood and copper engraving. In 1791, with the support of Count Samuel Teleki, he settled in Vienna to complete his studies in Vienna, where he was mainly occupied with letter cutting. For his excellent work he received an academic award from the Academy of Fine Arts, although the famous letter cutter, Mansfeld, did not accept him as an apprentice. In 1798 he moved to Buda and joined the University Printer (*Egyetemi Nyomda*). After some experimenting, he succeeded in perfecting the

stereotype printing method. In addition to studying drawing privately, he studied and mastered steel engraving; and with the help of a Viennese master, he also mastered letter cutting and typesetting. For his first specimens he drew on a Dutch book from Utrecht. Falka's first major typographic work was the catalogue of the Teleki Library of Marosvásárhely (now Targu Mureş, Romania), using letters engraved by him and printed in Vienna in 1796. Belatedly, Mansfeld also recognized Falka's typographic mastery. Finally, in 1798, he became the technical head of the letter cutting and typesetting workshop of the University Printer in Buda, and was recognized as Hungary's typographic innovator. His well-known copper engravings include the portraits of Count Sándor (Alexander) Teleki, Marshal Suvarov and Daniel Cornides (ex libris). He also prepared the typography of maps and office seals. – B: 1068, 1160, 1635, T: 7456.  
→**Teleki, Count Sámuel (1)**

**Fallenbüchl, Zoltán** (Budapest, 19 July 1924 - Budapest, 12 January 2006) – Librarian, historian. His higher studies were at the University of Budapest (1942-1946), where he studied History, Latin and Geography. From 1947 to 1984, he worked at the *National Széchényi Library (Országos Széchényi Könyvtár)* in Budapest, first in the Department of Cartography, then in the Manuscript Department as a scientific contributor. His field of research is history of culture, cartographic history, and archontology. Since 1963, he has been a member of *Coronelli-Gesellschaft für Globen and Instrumentenkunde*, and a Hungarian contributor to the *Österreichisches Biographisches Lexikon*. He is the author of some 200 publications, including the *Correspondence of Zoltán Ambrus (Ambrus Zoltán levelezése)* (1963), *Clerks of Maria Theresa (Mária Terézia hivatalnokai)* (1989), and *Anthony Grassalkovich (Grassalkovich Antal)* (1996). He was made freeman of Gödöllő, and receive the Small Cross of the Order of Merit of the Republic of Hungary (2004). – B: 0874, 1257, T: 7103.

**Falu, Tamás** (Thomas) (until 1898 Lajos Markbreit, until 1910 Lajos Balassa) (Kiskúnfélegyháza, 10 November 1881 - Ócsa, 13 July 1977) – Writer, poet. He attended high school in Kecskemét (1899) and completed Law School in 1907. He was a vice notary public in Monor, notary public in Nagyrőce, then in Cegléd, and finally in Ócsa, until his retirement in 1943. In his university years, he started with humorous writings, working for the *Borsszem Jankó* comic paper. Between 1914 and 1941, he worked at the *New Times (Új Idők)* magazine and at the *West (Nyugat)* literary review. His first novel, *Pettiness (Kicsinyesség)* was published in 1926. The literary review *Life and Literature (Élet és Irodalom)* and the Roman Catholic periodical *Vigilia* published his poems from 1957. His output is 10 books of poetry, 8 novels, and 2 volumes of short stories. His collected poems were published under the title *Country Station (Vidéki állomás)* (1974), and his selected poems appeared in 1991. He was a member of the Petőfi Society (*Petőfi Társaság*) and the Kisfaludy Society (*Kisfaludy Társaság*). He received the Merit of Labor's Silver and Gold classes (1967, 1971) and was made an honorary citizen of Ócsa. – B: 0878, 0876, 0877, 0878, 1257, T: 7103.

**Faludi, Ferenc S.J.** (Francis) (Németújvár, now Güssing, Austria, 25 March 1704 - Rohonc, now Rechnitz, Burgenland, Austria, 18 December 1779) – Jesuit monk, scholar, translator. He was the first reformer of the Hungarian language. He entered the Jesuit Order in 1720. He studied at the Universities of Vienna and Graz, Austria. At first he was a high school teacher in Pozsony (now Bratislava, Slovakia) and Pécs; later he served as a

priest in Buda. After 1736, he became a university professor in Graz, then in Vienna, and subsequently he was Professor of Theology in Linz, Austria. He returned to Hungary in 1746, and became superior of a Seminary, then the Director of the Library of Pozsony. When his Order was dissolved, he moved to Rohonc. His prose works were published during his lifetime, his poems only after his death. Due to the declining tendencies of Hungarian literature following the Treaty of Szatmár (1711), he insisted on the purity and quality of the Hungarian language. To commemorate the 275th anniversary of his birth, and the 200th anniversary of his death in 1979, the provincial government of Burgenland (former Őrvidék, now Austria) organized a series of remembrance festivals and placed a commemorative plaque on the house of his birth in Németújvár and on the wall of the parish hall of Rohonc. – B: 0883, 1257, T: 3240.

**Faludy, György** (George) (Budapest, 22 September 1910 - Budapest, 1 September 2006) – Writer, poet, translator of literary works. He studied in Budapest, Vienna, Paris and Graz (1928-1934). His poetry appeared in the liberal *Hungarian News* (*Magyar Hírlap*), and in the social-democratic *Peoples' Word* (*Népszava*). In 1931, he joined the Hungarian Social Democratic Party (*Magyar Szociáldemokrata Párt – MSZDP*). His translation of Francois Villon's poetry in 1937 earned public attention; his first volume of poetry appeared in 1938. Between 1940 and 1941, he went to France, escaped the Germans, and moved to Morocco. Invited by President Roosevelt, he landed in New York and served as secretary of the *Free Hungarian Movement* (*Szabad Magyar Mozgalom*) from 1941 to 1945. He joined the US Army in 1943, and left it in 1945. In 1946, he returned to Hungary and, in 1947, published his poetry written in the USA *After the Autumn Dew* (*Őszi harmat után*). From 1946 he worked at the *Peoples' Voice* (*Népszava*) as literary editor until his arrest in 1950. Deprived of paper and pen in the internment camps of Kistarcsa and Recsk, he composed and memorized his poems, or were memorized by his inmates. Released in 1953, he refused rehabilitation; he worked as translator until 1956, then he emigrated to England, settled in London and became Chief Editor of the *Literary Journal* (*Irodalmi Újság*) until 1962. He served as secretary of the International Pen Club. Between 1962 and 1967, he lived in Florence, Italy, and on the island of Malta; he lectured at Columbia University in New York and at other American universities. In 1967, he moved to Toronto, Canada, and he returned to Hungary in 1989. He established the Faludy Foundation (*Faludy Alapítvány*) at the Attila József University of Szeged in 1990. He was an honorary citizen of Budapest from 1996, a permanent member of the *Hungarian Journalists' National Association* (*Magyar Ujságírók Szövetsége – MUOSZ*) from 1997, and a MP of the Free Democrats Party from 1998. His major works include *Heine's Germany, transposed by George Faludy*, (*Heine Németországa, Faludy György átköltésében*) (1937); *Laudate, Masterworks of Catholic Lyricism* (*Dicsértessék, A katolikus lira remekei*) (1938); *Kroton*, novel (1966); *Erasmus of Rotterdam* (1970); *My Happy Days in Hell*, (*Pokolbeli víg napjaim*) autobiography (1962), in Hungarian (1987); *Notes from the Rain Forest*, (*Jegyzetek az esőerdőből*), essays with Eric Johnson (1988); *The Ballads of Francois Villon*, translated – or rather reworked – by George Faludy; *Barbusse: The Fire* (*Barbusse: A tűz*) (1996). *The Poet György Faludy* (1987) is a documentary film about his life. He was a recipient of the Great Commemorative Medal (1993), the Soros Life Achievement Award (1993), the Kossuth Prize (1994), and the Pulitzer Commemorative Prize (1998). He was twice nominated for the Nobel Prize in Literature. He was the grand old man of Hungarian literature. – B: 0974, 1257, 0878, T:

7684, 7677.

**Falvai, Sándor** (Alexander) (Ózd, 3 August 1943 - ) – Concert pianist. He studied piano at the Ferenc (Franz) Liszt Music Academy, Budapest under Mihály (Michael) Bacher (1967-1972); then at the Tchaikovsky Conservatory of Music, Moscow (1972-1973). He taught at the Ferenc Liszt Academy of Music from 1973, became a university professor in 1994, and rector in 1997. He is a sought-after pianist at home and abroad. He recorded the music of Bach, Chopin, Brahms, Schubert, Schuman and Mozart. He was awarded the Ferenc (Franz) Liszt Prize (1975), the Meritorious Artist title (1997) and the Order of Rising Sun, Golden Rays with Neck Ribbon of the Japanese Government (2005) for the education of Japanese pianists. – B: 0874, 1501, T: 7103.

**Family Clans** – It is customary among many peoples to this day to traditionally place persons of common ancestry, bloodline and relations into a common extended family. Just as the nuclear family, this extended family with its common bloodline also followed the rule not to intermarry, for they knew the disadvantages of inbreeding. They would tattoo their bodies with their imaginary sacred animals to quickly identify each other in case of being scattered around; such tattoos would also bind them into a more cohesive group. As it was the case among the Scythians, the Hun peoples and the early Magyars too made the family clans responsible for being the foundation of constitutional and civil law. Only members of a family clan could take part in constitutional law affairs. When needed, a military organization came into existence. It was called “army” (*had*), and was organized into troops; its leader was called lieutenant. At the time of the settlement in the Carpathian Basin in the 9th century AD, the Magyar, Onogur and Khabar tribes formed a confederation that reportedly numbered 108 clans. Upon settling on the land, these clans lawfully established their estates. Their number probably increased after the Pusztaszer National Assembly, considered being the first National Assembly of Hungary, called together by their leader, Árpád. The extended families were made up of old inhabitants joined together with the recently settling families in the Carpathian Basin, and together they established a nation. Only about half of these family clans could be identified in official documents. Some ancient Hungarian tribes died out, or their documentation was lost when foreigners invaded and wreaked destruction. The following family clans are listed in the current Hungarian Encyclopaedia: Adorján, Ajtony, Ábrán, Ákos, Baar-Kalán, Bala, Baracska, Becse-Gergely, Bél, Bicske, Bikcsei, Borsa, Bó, Csanád, Csák, Csemelyi, Csobánka, Csupor, Divek, Dobra, Dorosma, Érd, Garázda, Geregye, Gutkeled, Gyovad, Győr, Gyula-Zombor, Halom, Hanva, Hont-Pázmány, Illés, Jenő, Kalán, Kalota, Kaplony, Kartal, Kata, Koppány, Kurszán, Loja, Lorente, Maglód, Medgyes, Mena, Miskócz, Monoszló, Nádasd, Negol, Oghuz, Olas, Osl, Orlec, Örs, Pók, Pór, Rátót, Szalók, Szemere, Szente-Magócs, Tahy, Tarján, Tétény, Torda, Turul, Ung, Vala, Vancsa, Vezékeny. – B: 0942, 1020, T: 7676.

**Family Unit** (Extended) – Three, four generations of the male bloodline living together. Following the disintegration of the matriarchal family, the most important economic force of the clans was achieved through patriarchy. The traditional great family unit was based on common aims and activities in a communal estate. The eldest male headed the family; upon his death he was replaced either by his oldest brother or by another able male relative. His power was limitless: he was absolute judge and jury over his family; he could even kill his unfaithful wife without consequences. The 13th century Nagyvárád

(now Oradea, Romania) records of the “ordeals by red-hot iron” show that his power was so great that he could even sell or pawn his children. Succession was based on male seniority in the great family unit. At the time of Settlement in the Carpathian Basin in the 9th century AD, the Hungarian family life, and to some extent clan organizations and state affairs were also based on the principles of the great family unit. Even today, vestiges of traditional functions are alive especially in the magical fertility act. At the holiday table, the food is still divided by the male head of the family. By touching it first, he gave the food its magical power of fertility and nourishing quality. The loss of one’s own fertility obligated the head of the family to step aside. – B: 1153, 1231, T: 3240.→**Scythians; Huns; Hungarians; Kabars.**

**Famous Hungarians and of Hungarian Origin** – Hungarians number about 15 million at the beginning of the 21st century; 10 million live in the truncated country of Hungary; 2.5 million live in its detached territories ceded to newly created neighbors by the Versailles-Trianon (1920) and the Paris (1947) Peace Dictates, consequently they lived under foreign rule; an addition 2.5 millions are scattered all over the world. Nevertheless, Hungary has produced more Nobel Prize winners (20), more important scientists, inventors, writers, poets and artists than any other nation *per capita*.

## **I. NOBEL PRIZE WINNERS**

### **1. Hungarian**

**Lenard, Philipp E. A. von (1862 -1947); 1905. Physics**

**Bárány, Robert (1876 - 1936); 1914. Medicine**

**Zsigmondy, Richard A. (1865 -1929); 1925. Chemistry**

**Szent-Györgyi, Albert von (1893 -1986); 1937. Medicine**

**Hevesy, George de (1885 - 1966); 1943. Chemistry**

**Békésy, Georg von (1899 - 1972); 1961. Medicine**

**Wigner, Eugene P. (1902 - 1995); 1963. Physics**

**Dennis Gábor (1900 - 1979); 1971. Physics**

**Polányi, John C. (1929 -); 1986. Chemistry**

**Oláh, George A. (1927 - ); 1994. Chemistry**

**Harsányi, John C. (1920 - 2000); 1994. Economics**

**Kertész, Imre (1929 - ); 2002. Literature**

### **2. Hungarian related**

**Ruziczka, Leopold (1887-1876)      1939 Chemistry**

**Rabi, Isidor (1898-1988)              1944 Physics**

**Gajdusek, Daniel Carlton (1923 - ) 1976 Medicine**

<b>Friedman, Milton (1912 -2006)</b>	<b>1976 Economics</b>
<b>Stigler, George (1911-1991)</b>	<b>1982 Economics</b>
<b>Ábrahám, Henry (1942 - )</b>	<b>1985 Peace</b>
<b>Wiesel, Elie (1928 - )</b>	<b>1986 Peace</b>
<b>Hershkó Avram (1937 - )</b>	<b>2004 Chemistry</b>

→Encyclopedia entry is under each name.

## II. INVENTORS

**Anonym** - Inventor of the carriage or “coach” with springs.

**Asbóth, Oscar** - Engineer, a helicopter pioneer.

**Bánki, Donát** - Co-inventor of the carburetor.

**Barényi, Béla** - Engineer, Auto Safety Pioneer - Father of the Volkswagen Beetle, Passive Safety, Occupant Safety Cell, Collapsible Steering System and the Seat Belt.

**Batthyány, Count Tódor** - Inventor. He designed a ship driven with horse-drawn paddlers (called *Bucentaurus*, 18th c).

**Bejczy, Antal** - Engineer, who developed the Mars Rover “Sojourner”, and the Pathfinder's Remote Control System.

**Beregszászy, Lajos** - Inventor of a new piano keyboard system.

**Béres, József** - Research chemist, who developed an anti-cancer drug, the “Béres Drops”.

**Bernáth, Gábor** - Inventor. At 15 he invented the commercially viable 3rd scanner, “Scan Guru” and won the 50th Intel ISEF.

**Besser, Les (László)** - Engineer, father of microwave computer-aided design.

**Biró, László József** - Inventor. He developed the ballpoint pen in 1938, and the automatic gearbox for automobiles.

**Bláthy, Ottó** - Co-inventor of the alternating current transformer (with Miksa Déri and Károly Zipernowsky, in 1889); inventor of the tension regulator; the watt meter; the alternating current motor; the turbo-generator, and the high performance turbo-generator.

**Born, Imre** - Metallurgist. He discovered the mineral bornite.

**Bródy, Imre** - Physicist. He invented the Krypton Electric Bulb.

**Cséti, Ottó** - Inventor of mine-survey instruments.

**Csonka, János** - Co-invented the carburetor.

**Csuri, Charles** – “Father of Digital Art”.

**Dallos, Joseph** - Physician, inventor of the molded contact lenses.

**Deák, Róbert** - Banker, financier, and father of the secure credit card.

**Dénes, Mihály** - Inventor. In 1922 he invented and patented the “Projectophon”, which received recognition in the field of sound-pictures.

**Déri, Miksa** - One in the “Great Triad” of electrical engineers at the Ganz Industries of Budapest. He developed A/C electric generator; and co-invented the alternating current transformer with Ottó Bláthy and Károly Zipernowsky in 1889.

**Detre, László** - Immunologist. He worked out the antigen theory.

**Domokos, Gábor** - Engineer, co-inventor of “Gömböc”, the first known homogenous object with one stable and one unstable equilibrium point.

**Dorogi, István** - Chemical engineer, inventor of mass-produced inflatable toys, forms and figures.

**Eötvös, Baron Loránt** – Physicist. He developed one of the first steps toward the Theory of Relativity. His inventions made it possible to explore natural resources like oil, coal and different ores.

**Fazola, Henrik** - Ironsmith, pioneer of Hungarian Iron Works (18th century).

**Fejes, Jenő** - Engineer, inventor of the Fejes plate-motor.

**Finkey, József** - Mining engineer, inventor of “Finkey’s ore flotation method” and “Finkey’s brown coal improver”.

**Fleischmann, Károly** - Inventor, founder of the famous Standard Brands Yeast Company, Fleischmanns.

**Földi, Zoltán** - Chemical engineer. He (with his colleagues) registered 80 pharmaceutical patents.

**Fonó, Albert** - Mechanical engineer. He received the first patent on airplane jet propulsion and enabled aircraft to fly faster than the speed of sound. He also developed an aerial torpedo and an air compressor for mines.

**Forgách, Count Béla** - Inventor of a sheet music writing machine coupled with a piano in 1884.

**Forgó, László** - Engineer. His inventions include the *Invert-Grid*, the *Sterilizer*, and the famous *Heller-Forgó* air condenser-cooler, applied in cooling towers, invented with László Heller in 1958.

**Frommer, Rudolf** - Engineer, inventor of Frommer pistol.

**Galamb, Joseph (József)** - Ford chief engineer, designed the Model ‘T’ and Model ‘A’ Ford, the Fordson Tractor; invented the ignition plug and the planetary gearbox, and prepared the production of the Liberty aircraft engines.

**Ganz, Ábrahám** - Invented the chill casting of railway car wheels (1854).

**Gergely, Péter** - Architect, structural engineer, founder of the National Center for Earthquake Engineering.

**Gestetner, Dávid** - Inventor of the stencil-duplicating machine.

**Goldmark, Péter Károly (Carl Peter)** - Engineer, CBS Chief Scientist. He invented the Color Television, the 33 1/3 LP Record, and the Electronic Video Recorder; recipient of the National Medal of Science.

**Goÿ, Andor** - Inventor of a widely recognized typesetting machine.

**Greguss, Pál** - Chemical engineer and physicist. He invented the Pál-Optic used in

NASA's Deep Space Program.

**Grossmann, Gusztáv József** - Engineer, inventor of the tomograph.

**Gyórfy, István** - Ophthalmologist. He was the first to make contact lenses from plastic material in 1939.

**Halász, Pál** - Engineer, invented the compressed-air mine-thrower.

**Haggenmacher, Károly** - Engineer, inventor of plain shifter for milling process.

**Hankóczy, Jenő** - Agricultural scientist, inventor of farinograph and farinometer.

**Heller, László** - Engineer, co-inventor of the Heller-Forgo air cooling system, which became known worldwide as the Heller-System, applied at thermal power stations.

**Horváth, Csaba** - Chemical engineer, father of high-pressure liquid chromatography (HPLC).

**Horváth, Ernő** - Teacher, pilot, inventor of the universal control stick (steering column) for aircrafts, in 1940.

**Irinyi, János** - Chemist, inventor of the safety match.

**Jedlik, Ányos** - Priest, engineer, physicist, inventor, father of the dynamo.

**Kálmán, Rudolf Emil** - Developed the “Kalman Filter”, the “greatest discovery in statistics in our century.” Kalman filtering is also the method used in GPS (Global Positioning Systems) for navigation.

**Kandó, Kálmán** - Inventor, engineer, developer of the triple phase high tension current for electric locomotion and industrial applications, father of modern electric trains.

**Kármán, Theodore, von** - Aeronautical engineer, mathematician. He was the father of the supersonic flight and a founder of the aeronautical and astronautical sciences. He designed the first rocket to reach interstellar space.

**Kempelen, Farkas, de Pázmánd** - Inventor of the first speaking machine, first experimental phonetician.

**Kliegl, József** - Mechanic, inventor of typesetting and sorting machines.

**Korda, Dezső** - Engineer, inventor of the electric car.

**Kós, Károly** - Writer, architect, used traditional Hungarian architecture for modern designs.

**Kőszegi Mártony, Károly** – Army Major, inventor of the mobile field kitchen.

**Kühne, Ede** - Inventor of the “Hungaria Drill” seeding machine (1874).

**Lánczos, Cornelius** - Renowned mathematician and physicist.

**Lechner, Ödön** - Architect, best representative of the Hungarian secessionist style of architecture.

**Losonczy, Áron** - Inventor of “glass-concrete”, the Light-Transmitting Concrete called LiTraCon (2001).

**Luppis, János** - Naval captain and engineer, he was co-inventor of the torpedo.

**Makovecz, Imre** - Architect, renowned representative of Hungarian organic architecture.

**Mechwart, Ádám** - Inventor of the steel-rolling cylinder for mills.

**Mihály, Dénes** - Mechanical engineer, father of sound film and television broadcasting. Inventor of the “Projectophon” for sound films and the “Telehor” device for TV broadcast. He produced the first television program in history.

**Mihályi, József** - Engineer, inventor, co-developer of automatic camera; chief designer at Kodak.

**Pavlics, Ferenc** - Engineer, developed NASA's Moon Rover and directed development of the Mars Rover.

**Pécsi, Eszter** - Structural engineer, designer of the first reinforced-concrete skyscraper; first woman to receive a degree in Engineering in Hungary in 1920.

**Petzvál, József** - Inventor, founder of photography. His work allowed for the designing of modern cameras and made practical portrait-photography possible. He invented photographic objective lens, darkroom, opera glasses, and perfected the telescope.

**Pfitzner, Sándor** - Engineer, designed the first American monoplane for Curtiss.

**Pollák, Antal and Virág, József** - Inventors of the express telegraph (1898).

**Puskás, Tivadar** - Inventor, Thomas Edison's colleague - Devised the idea of using telephone exchanges between subscribers, invented the switchboard, and built Europe's first telephone exchange.

**Rajkai, Pál** - Inventor of the grain-slicing machine.

**Rátai, Áron** - Computer wizard, inventor of the commercially viable three-dimensional computer picture.

**Richter, Gedeon** - Pharmacist, inventor of the Kalmopyrin tablet.

**Riszdorfer, Ödön** - Engineer, inventor, co-developed automatic camera and automatic shutter for movie cameras; father of the hand-held, battery-operated light meter.

**Rosenkrantz, George** - Chemist, businessman, founder of Syntex, number seventeen world-ranked drug firm, the developer of Aleve.

**Rubik, Ernő** - Mathematician, inventor of the Rubik Cube.

**Schwartz, David** - Inventor, father of the dirigible air ship or Zeppelin.

**Sebeok, Thomas A (Sebők)** - Father of modern semiotics (the study of signs and non-verbal communication).

**Segner, János András** - Father of the water turbine, first scientist to use reactive force. The inventor of the “Segner Wheel”. He made substantial contributions to the theory of dynamics.

**Spanyol, Count Zoltán** - Electric engineer, inventor of plasma-water motor fuel hydrogen (2005).

**Szakáts, Gábor** - Engineer, inventor of the flamethrower.

**Szebehelyi, Victor** - Aerospace engineer, pioneer of orbital mechanics and a key figure in the Apollo Space Program.

**Szilvay, Kornél** - Officer in a Hungarian Fire Brigade, father of the Dry Fire Extinguisher.

**Tarján, Ferenc** - Physicist, who invented the gramophone (phono) pickup device.

**Tihanyi, Kálmán** - Physicist, television pioneer, who invented picture tube (Iconoscope); infrared-sensitive (night vision) television and flat TV tube.

**Turchányi, Olivér** - Inventor of the "Filmatyp".

**Várkonyi, Péter** - Engineer, co-inventor of "Gömböc", the first known homogenous object with one stable and one unstable equilibrium point.

**Verancsis, Faustus, Bishop** - Invented the air turbine.

**Winter, Ernő** - Physicist-engineer, inventor of the converter tube with deflection control in the late 1930s.

**Zipernowsky, Károly** - Engineer, co-inventor of the alternating current transformer with Miksa Déri and Ottó Bláthy (1889).

**Zsélyi, Aladár** - Engineer, aeroplane and gas turbine pioneer.

### III. MATHEMATICIANS, SCIENTISTS

**Apáczai Csere, János** - Scholar, educator. He demanded the teaching of native language at schools and higher education that trained secular specialists (17th century).

**Balogh, Lord Thomas**, - Economist, chief economic advisor to the British Government.

**Bay, Zoltán** - Physicist, the first to use radar to take measurements of the moon.

**Békésy, George, von** - Nobel Prize winner in medicine (1961) for his study on "The discovery of the physical means of sound communication and analysis in the inner ear".

**Bolyai, Farkas** - Mathematician.

**Bolyai, János** - Mathematician, he created the non-Euclidian hyperbolic geometry.

**Csernák, László** (Chernák) – Mathematician, made research in dissolution of whole numbers by prime factors (18th century).

**Dienes, Paul** - Mathematician. His research in the Taylor series was significant.

**Erdélyi, Arthur** – Mathematician. His works are quoted as "the most widely cited mathematical works of all time and a basic reference source for generations of applied mathematicians and physicists throughout the world".

**Erdős, Paul** – Mathematician. Revered by colleagues and considered to be the "most brilliant mind in his field"; he collaborated with so many mathematicians that the phenomenon of the "Erdős Number" evolved.

**Farbaky, István** - Mining engineer, developer of mining and related disciplines and in evolving their Hungarian technical terminology. He has several mining, metallurgical and chemical patents.

**Farkas, Gyula** - Mathematician, physicist; his works on thermodynamics and the Fourier principles were significant; his Farkas theorem is notable.

**Fejér, Lipót** - Mathematician, laid the foundations for the modern theory of trigonometric series.

**Fejes, Jenő** - Engineer, inventor. He was first in the world to submit patents for

manufacturing automobile parts by cold forming, pressing, torch or spot-welding.

**Feketeháty, János** - Engineer, famous bridge-builder.

**Fényi, Gyula** - Physicist, first to prove that the frequency of solar protuberances varies according to the number of sunspots.

**Fischer, Gyula** - Inventor of Fischer-Laminar Collector Bow for electric railroad engines.

**Fonó, Albert** - Mechanical engineer, he received the first patent on airplane jet propulsion and enabled aircraft to fly faster than the speed of sound; and also developed an aerial torpedo and air compressor for mines.

**Francé, Rezső** – Biologist. He became world famous through his popular books.

**Gerster, Béla** – Engineer; participated in construction of the Panama and the Korinthos canals.

**Gombás, Pál** - Physicist; constructed the Thomas-Fermi-Dirac-Gombos atom-model.

**Gothard, Jenő** - Astronomer; discovered the central star in the Ring Nebula of the Lyre Constellation.

**Grossmann, Marcel** - Mathematician, Einstein's co-worker. He realized the relevance of the tensor calculus of Christoffel, Ricci-Curbastro and Levi-Civita to relativity.

**Gryneus, István** - Mathematician; developed differential geometry, differential equations and later the application of the calculus of Ricci in the Pfaff System.

**Gubányi, Károly** - Engineer; participated in railway construction in Siberia, China and Australia.

**Haar, Alfred** - Mathematician. He introduced a measure on groups, now called the "Haar measure", used by von Neumann and other notables.

**Halmos, Pál** – Mathematician. He dealt with finite dimensional vector spaces, measure theory, ergodic theory and Hilbert space.

**Harsányi, John** - Economist, Nobel Prize winner in 1994: "For his pioneering analysis of equilibrium in the theory of non-cooperative games."

**Hatvani, István** - Mathematician, physicist, polyhistor; the first to teach chemistry (18th century).

**Herman, Ottó** - Naturalist, founder of the Hungarian Ornithological Center, Budapest.

**Herskó, Ferenc** (Avram Hershko) - Physicist, biochemist, Nobel Prize winner in chemistry in 2004: "for the discovery of the ubiquitin system of intracellular protein degradation and its many functions in the cell".

**Horváth, Csaba** - Chemical engineer, father of high-pressure liquid chromatography (HPLC).

**Izsák, Imre Gyula** - Astronomer, the Hungarian-American expert in celestial mechanics of the Space Age.

**Kabay, János** - Chemist, first to isolate morphine directly from the plant.

**Káldor, Lord Miklós** - World-renowned economist, applications, the father of modern electric trains.

**Kármán, Theodore von** - Aeronautical engineer, mathematician, father of the supersonic flight and a founder of the aeronautical and astronautical sciences. He designed the first rocket to reach interstellar space.

**Kemény, János** - Mathematician, President of Dartmouth; "Father of Microcomputing," developed BASIC computer language.

**Kitaibel, Pál** - Natural scientist, discovered the naturally occurring semi metallic element *Tellurium*, independently from Baron Ferenc József Müller.

**Konkoly-Thege, Miklós** - Astronomer, who elevated Hungarian astrology to European level. An asteroid bears his name.

**Kövesligethy, Radó** - Astronomer, geophysicist. He gave theoretical foundation to astrophysics.

**Kulcsár, Gyula** - Biochemist, cancer researcher, who discovered a second immune system in the human body, consisting of 16 molecules, which destroy tumor cells. This is regarded as the beginning of the successful fight against cancer (2005).

**Lax, Benjamin** - Electrical engineer, physicist, Founder and Director of Francis Bitter National Magnetic Laboratories (MIT); Semiconductor and magneto-optics pioneer; Radar Pioneer; he developed the radar height and range finder and radar meteorology.

**Lax, Peter D.** - Mathematician, winner of the Abel Prize in 2005: "for his groundbreaking contributions to the theory and application of partial differential equations and to the computation of their solutions".

**Lovász, László** – Mathematician. His contribution is to the combinatorial problems and exercises.

**Makó, Pál** - Mathematician, outstanding mathematician in the 18th century.

**Müller, Ferenc József** - Minerologist, discovered tellurium in the mines of Transylvania (*Erdély*, now Romania).

**Neumann, John von** - legendary mathematician, physicist, logician and computing pioneer; co-developer of the atomic bomb. Father of the Binary Code and the Stored Program Computer; father of Game Theory; key in the development of ballistic missile program of the USA.

**Ortvay, Rudolf** - Physicist, founder of the of modern theoretical physics education in Hungary.

**Palágyi, Menyhért** - Mathematician, philosopher, devised a new theory of space and time.

**Pavlics, Ferenc** - Engineer, developed NASA's Moon Rover and directed development of the Mars Rover.

**Polányi, Mihály** - Chemist, who applied quantum mechanics in chemistry; excelled in chemical kinetics as well as transition-state theory.

**Polya, George** - Mathematician, called: "The Great Teacher". He gave to mathematics the Pólya Enumeration Theorem along with many other ideas.

**Rényi, Alfréd** - Mathematician, who created "one of the strongest methods of analytical number theory".

**Riesz, Frigyes** - Mathematician, founder of functional analysis; and his work has many important applications in physics.

**Sávoly, Pál** - Engineer, restorer of many great bridges in Hungary after World War II.

**Simonyi, Charles Jr.** - Computer scientist, chief architect of Microsoft Corporation; father of **WYSIWYG** and Hungarian notation.

**Simonyi, Károly Sr.** - Engineer, physicist, constructed the first Hungarian cyclotron.

**Somogyi, Michael** - Chemist, produced first child insulin treatment in US; developed the "Somogyi test" for the diagnosis of diabetes.

**Szalay, Alexander** - Astrophysicist, researched theoretical astrophysics and galaxy formation.

**Szebehelyi, Victor** - Aerospace engineer, pioneer of orbital mechanics and a key figure in the Apollo Space Program.

**Szegő, Gábor** - Mathematician, Head of Mathematics Department, University of Stanford, U.S.A.

**Szilárd, Leó** - Physicist, co-developed the atomic bomb. Conceived the nuclear chain reaction and campaigned for nuclear disarmament, though the first to consider the application of the atom to making bombs. Achieved first nuclear fission reaction with Enrico Fermi.

**Telkes, Mária** - Chemist, engineer, pioneer of solar energy.

**Teller, Edward** - Physicist, co-developer of the atomic bomb; created BET equation; father of the H-bomb.

**Turán, Paul** - Mathematician, number theorist, Erdős' closest friend and collaborator.

**Varga, Jenő** - Economist, leading economist of Soviet Russia.

**Wartha, Vince** - Chemist, he worked out the chemical composition of eosin glaze.

**Xantus, János** - Natural scientist, discovered several hundred animal and plant species in North America and South-East Asia; US Consul in Mexico (19th c.).

**Zách, Baron János Ferenc** - Astronomer, founder of the first Astronomy Journal the *Allgemeine geographische Ephemerident* in 1796.

**Zemplén, Győző** - Physicist, he gave a new explanation to Mickelson's experiment.

#### IV. PHYSICIANS

**Alexander, Franz** - Physician and Psychoanalyst, Psychoanalytic Pioneer, Father of Psychosomatic Medicine.

**Apáthy, István** - Physician, biologist, pioneer of nervous system research.

**Balassa, János** - Physician, first in Europe to apply general anaesthesia.

**Csikszentmihályi, Mihály** - Renowned psychologist, father of "Flow Theory".

**Dallos, Joseph** - Physician, inventor of molded contact lenses.

**Ferenczi, Sándor** - Psychoanalyst, friend and co-worker of Sigmund Freud.

**Fodor, József** - Hygienist, founder of a National Public Health and Epidemic Institute in Hungary.

**Forró Barnóthy, Madeleine** - Astrophysicist, pioneer in Cosmic Radiation, Bio-Magnetism and Magnetic Therapy.

**Hermann, Imre** - Neurologist. His findings were the Clambering Theory and the Congruent Models concept.

**Hógyes, Endre** - Physician, prominent medical researcher, perfected Pasteur's anti-rabbies vaccination.

**Jeszenszky, János** (Jessenius) - Physician, first to introduce human dissection in Germany (17th c.).

**Kaali, Stephen** - Medical pioneer, inventor, patented a Bio-Electrical Blood Cleansing Device for AIDS and other blood diseases.

**Kaposi, Móric** (Kohn) - Physician and dermatologist. He discovered "Kaposi's Sarcoma".

**Korányi, Baron Frigyes** - Physician, first to open an Internal Medicine Clinic in Budapest.

**László, Ernő** - Dermatologist and Cosmetics Tycoon, father of modern skincare products.

**Markusovszky, Lajos** - Physician, chief promoter of health reform in Hungary.

**Pápai Páriz, Ferenc** - Physician, his *Pax Corporis* book was influential upon medical science (17th c.).

**Schick, Béla** - Pediatrician, researcher, pioneer in immunology; devised the "Schick test" for determining susceptibility to diphtheria.

**Selye, Hans** (János) - Physician, endocrinologist, researcher, initiator of the concept of Stress; the "Einstein of Medicine".

**Semmelweis, Ignác** - Physician, "The Savior of Mothers".

**Szondy, Lipót** - Psychiatrist, inventor of the Szondy test.

**Zsámboki, János** (Sámboki) - Physician, humanist, polyhistor, court physician in Vienna (16th c.).

**Weszprémi, István** (Tsanádi, Csanády) - Physician, introduced vaccination against pestilence (18th c.).

## V. AGRARIANS, VETERINARIANS

**Baross, László** – Agriculturalist; in 1917 he produced the Bánkút Wheat (B1201), the renowned Hungarian wheat qualified as the world's best wheat; he was awarded a gold medal at the Regina World Fair, 1933, Canada.

**Haraszthy, Ágoston** - Colonel, agriculturalist. In the mid 1850's he planted grape vines of Tokay and Zinfandel vine-plants brought from Hungary in his 65 hectares land in the Sonoma Valley. "Father of California wine culture". (Ronald Reagan).

**Hutýra, Ferenc** - Veterinarian, developed vaccine against pig-pestilence; wrote a book

on domestic animals' diseases.

**Kocsis, Pál** - Grape cultivator. He produced some 2500 grape varieties especially suitable for the sandy soil of the Hungarian Great Plains.

**Marek, József** - Veterinarian. His book on animal diseases are published in many languages.

**Mathiász, János** - Grape cultivator. He produced some 1300 grape varieties for sandy soil, among them 180 favorites. Many of them are cultivated in many parts of the world.

**Manninger, Gusztáv Adolf** - Agriculturalist, perfected the Bánkút Wheat (B 1201).

**Manninger, Rezső** - Veterinarian, author of many books on animal health and diseases.

**Nagyváthy, János** - Author of the first Hungarian agricultural handbook.

**Pethe, Ferenc** - Agriculturalist, one of the founders of the Georgikon at Keszthely.

**Tessedik, Sámuel** - Lutheran pastor, agriculturalist, developer of Hungarian agriculture.

**Weber, Eduard** – Agriculturalist. He planted vines in the quicksand of his 2000 hectar estate near Kecskemét, in 1892. He is father of the quicksand vine culture.

## VI. DISCOVERERS, VOYAGERS, CARTOGRAPHERS

**Almássy, Count Ede László** - Explorer, led a Sahara expedition in 1933, double agent, immortalized in the feature film “The English Patient”.

**Bíró, Lajos** - Explorer of zoology in New Guinea.

**Böckh, Hugo** - Geologist, discovered Iranian oilfield.

**Brentán, Károly SJ** - Missionary, a discoverer, and cartographer in South America.

**Cholnoky, Jenő** - Traveled to China (19th c.).

**Diószegi, Vilmos** - Ethnographer, orientalist, made five field trips to Siberia.

**Éder Xavér Ferenc SJ** - Missionary, the first geographer and ethnographer of Peru.

**Endresz, György** – Ocean pilot. He completed a historic ocean flight in a plane named “Justice for Hungary” in 1931.

**Fenichel, Sámuel** - Papua land explorer, zoological and ethnographical collector (19th c.).

**Fuszek, Rudolf** - Physician, expert of tropical diseases; ethnographic collector in Africa.

**Galántha, Judit** - Writer, Asia traveler, the first woman to actively follow the footsteps of Alexander Csoma de Körös in Transylvania, India, Kinnawar, Ladakh and Sikkim.

**Gallus, Sándor** – Archeologist; discovered 30,000-year-old paintings in the Koonalda Cave, Australia.

**Gáspár, Ferenc** - Physician, traveler, studied tropical diseases, author of ethnographic, geographic and travel books.

**Gelei, József** - Zoologist, several newly discovered species named after him.

**Germanus, Gyula** - Traveler, writer, Arab scholar.

**Jelky, András** - Sailor, tribal chief, later businessman in Dutch East Indies; Dutch

Ambassador to Japan (18th c.).

**Jesuits in S. America** (Hungarians in 17-18th century) - Rátkay János; Koncság János; Rér János; Brentán Károly; Orosz László, Éder Xavér Ferenc.

**Julianus** - Dominican friar. Traveled to Bashkiria in the Upper Volga region of Russia in search of Hungarian relatives in “Magna Hungaria” (14th century).

**Kittenberg, Kálmán** - Africa explorer, hunter and collector.

**Kőrösi Csoma, Sándor** (Alexander) - Explorer. He was “Father of Tibetan Studies and Buddhist Culture”. He presented the first viable Tibetan dictionary and grammar in English. (19th century).

**Kubassek, János** - Geographer, Asia traveler and Kőrösi Csoma Sándor researcher.

**Lóczy, Lajos** - Geologist of fame, discoverer and first geological surveyor of the Trans-Himalaya mountain chain.

**Magyar, László** - Discovered the source of the Congo River in Africa, King of Bihe (Bie).

**Parmenius of Buda** - Naval officer in British service, the first Hungarian landing in North America (1585).

**Prinz, Gyula** - Geologist, traveled to Tien-San (early 20th century).

**Reguly, Antal** - Cartographer, drew maps on East-Ural Mountains (19th century).

**Roheim, Géza** - Psychoanalyst, ethnographic collector in French Somalia, Australia and Melanesia.

**Sáska, László** - Africa researcher, collector, physician.

**Stein, Márk Aurél, Sir** - Archaeologist, “The most prodigious combination of scholar, explorer, archaeologist and geographer of his generation” - The “Sven Hedin of England”; who pioneered the use of aerial photography in archaeology.

**Sajnovics, János SJ and Hell, Miksa** - Traveled to Lapland for scientific observation. They found a linguistic relationship between Lapp and Hungarian (18th century).

**Széchenyi, Count Zsigmond** - Globetrotter, East-Africa explorer, hunter and collector.

**Teleki, Count Sámuel** - Explorer, discoverer of Rudolf and Stefania Lakes and the Teleki Volcano in Kenya, East Africa.

**Tordai, Emil** - Africa traveler and explorer of the Congo Basin; anthropological and ethnographical collector.

**Vámbéry, Ármin** - Orientalist, explorer. He headed a famous expedition to Central Asia (1862-1864).

## VII. RULERS, POLITICIANS, SOLDIERS

**Anzelm, Albert, Lt. Colonel** - Civil War Hero, General Fremont's Chief-of-Staff.

**András II (Endre, Andrew), King** - Issuer of the “Golden Bull” (1222).

**Árpád** - Khagan, leader of Magyar tribal confederation into the Carpathian Basin (895).

**Asboth, Alexander, General** - US Chief-of-Staff, US Minister to Argentina.

**Báthori, Prince István** - Reigning Prince of Transylvania (Erdély, now Romania) and King of Poland.

**Béla IV, King** - Rebuilder of Hungary after the Mongol-Tartar devastation (1241-1242).

**Benyovszky, Count Móric** - He was elected Emperor of Madagascar.

**Bercsényi, Count László**, - Hussar, founder of the modern French Cavalry. He was a Marshal of France.

**Bethlen, Count István** - Prime Minister, successfully reorganized Hungary dismembered by Versailles-Trianon Peace Treaty (1920), when Hungary lost two-thirds of its territory and one-third of its ethnic Hungarian population.

**Bibó, István** - Politician, one of the most influential political writers in the latter part of the 20th century.

**Bocskay, Prince Gábor** - In a war against Austria, he secured Hungary's independence as well as that of Transylvania (Vienna Peace Treaty in 1606).

**Czege Wass, Huba de** - Brigadier General, US Army; founding director of the US Army's School of Advanced Military Studies and architect of air-land battle doctrine.

**Deák, Ferenc** - Politician, architect of the Compromise with Austria in 1867. It made possible Hungary's rapid economic development.

**Deák, Nicholas** - Banker, financier. He received the surrender of the Japanese in Burma in World War II. He was founder of Deak-Perera, the US oldest and largest foreign exchange and precious metals investment firm.

**Dohnányi, Hans von** - World War II hero of German resistance. He partook in the 1944 assassination plot against Hitler. He was executed by the Gestapo on April 9, 1945.

**Fabriczy Kováts, Mihály** - Colonel of the Hussars, hero of the United States War of Independence.

**Figyelmessy, Fülöp** - Military officer in the 1848-1849 War of Hungarian Independence, US Inspector General during Civil War, and envoy of the United States in British Guayana between 1865 and 1878.

**Haraszthy, Ágoston** - Colonel, "Father of California's Wine Culture" (President Ronald Reagan).

**Hedwig , St., Queen of Poland** (Jadwiga, 14th century) – Daughter of King Lajos I (Louis the Great); converted the Lithuanians to Christianity and united the two kingdoms.

**Herzl, Theodore** - Politician, founder of the Zionist Movement.

**Hollósi, Gergely** - Monk, converted and protected Indians in Mexico (16th c.).

**Horthy, Miklós, Regent** – Elected Regent of Hungary in 1920. Regained some previously lost parts of historic Hungary populated by Hungarians (1938, 1939, 1941), the only successful Hungarian head of state in the 20th century.

**Hungarian Officers in the U.S. Civil War** - Antal Wékely, Hugo Hellebrandt, Antal Gernster, Viktor Sándory, Ferenc Takács, Lajos Tenner, Antal Utassy, Ede Zerdahelyi and Frigyes György Utassy.

**Hunyadi, János, Regent** - Military leader and statesman. First to contain the of Ottoman

Turk expansion (15th century).

**Istook, Ernest** - US Congressman, Republican from Oklahoma, Chairman of the Appropriations Subcommittee, Co-Chair of the Hungarian Caucus in the US House of Representatives.

**István I, King** (St Stephen) - First Christian king and founder of Christian Hungary in the Carpathian Basin (11th century)

**Jelki, András** - Sailor, tribal chief, later businessman in the Dutch East Indies; Dutch Ambassador to Japan (18th century).

**Karpeles, Leopold. Sgt.** - Civil War Hero, recipient of the Congressional Medal of Honour.

**Knefler, Frederick** - Brigadier General, Civil War Hero, "Hungarian Patriot and American General" - highest rank attained in the Union army by a member of the Jewish faith.

**Kossuth, Lajos, Governor** - Leader of the War of Independence against Austria (1848-1849).

**Kováts, Michael, de, Colonel** - U.S.A. Military Hero, founder of the U.S.A. Cavalry.

**Kozlay, Eugene A., Brigadier General** – American Civil War Hero, Organized the 54th New York Infantry Regiment.

**Lantos, Tom, Hon.** - 11-term U.S. Congressman from California.

**Magyar, László** - Discovered the source of Congo River in Africa, King of Bihe (Bie).

**Mátyás I, King** (Matthias Corvinus) - The great 15<sup>th</sup> century Renaissance king of Hungary.

**Mihalóczy, Géza, Colonel**, - Civil War Hero of the U.S.A, he organized the famed "Lincoln Riflemen".

**Mindszenty, József, Cardinal** - his torture and show trial by the Communists in 1949 made him a Hungarian national hero, "a legend in his lifetime".

**Molnár, Frankie, S/Sgt** - Vietnam War Hero, recipient of the Congressional Medal of Honor, U.S.A.

**Nagy, Imre, Prime Minister** - Hero of the Hungarian Revolution and Freedom Fight of 1956, political martyr.

**Pataki, George, Governor** (György) – American-born Governor of New York State, U.S.A.

**Pongrátz, Gergely, Freedom Fighter** - Hero of Corvin Köz, Budapest, 1956.

**Pomutz, George, Colonel** – American Civil War Hero, appointed U.S. Consul General to St. Petersburg, Russia.

**Rabel, László, Sergeant** - US Military Hero, recipient of the Congressional Medal of Honor.

**Rákóczi II, Prince Ferenc** - Leader of the War of Independence against Austria (1703-1711).

**Stahel Számwald, Julius H. Major-General** - U.S.A. Military Hero, recipient of the

Congressional Medal of Honor.

**Tabor, L.S. William, Pvt.** - Civil War hero, recipient the Congressional Medal of Honor.

**Thököly, Count Imre** - Leader of an uprising and freedom fight against Austria (1678-1686).

**Türr, István, General** - Garibaldi's Chief of Staff.

**Utassy, George, Colonel** - US Civil War Hero, Organized the famed Garibaldi Guard.

**Vadas, Albert (Wadas)** - Spanish-American War Hero, recipient of the Congressional Medal of Honor.

**Váry, Gyula** – Major in the- Hungarian Air Force, acclaimed fighter pilot, first pilot to win consecutive titles at Fairford's Royal International Air Tattoo.

**Wiesel, Elie** - Writer, Nobel Prize winner for Peace in 1986: “For his dedication to peace, atonement and human dignity”.

**Zágonyi, Charles, Major** -.”The Union Forever” led the famous Civil War Zágonyi Death Ride.

## VIII. WRITERS, POETS, PHILOSOPHERS

**Ady, Endre** - Lyric poet, one of the greatest in the 20th century.

**Áprily, Lajos** - Poet, his poetry is among the best in Hungarian literature.

**Arany, János** - Poet laureate, one of the greatest in Hungarian literature.

**Babits, Mihály** - Poet, writer, a prominent leader of Hungarian literature in the first part of the 20th century.

**Bartók, György** - Well-known philosopher

**Bibó, István** - One of the most influential political writers in the second half of the 20th century.

**Böhm, Károly** - Foremost philosopher of Hungary, author of the first Hungarian philosophical system.

**Esterházy, Péter** - Famous contemporary writer.

**Faludy, György** – Internationally acclaimed contemporary poet.

**Fekete, István** - Famous writer about nature.

**Gárdonyi, Géza** - Writer, famed for Hungarian historical novels.

**Gárdos, Éva** - Screenwriter, director and editor.

**Hamvas, Béla** - Philosopher, author of an alternate Hungarian philosophy.

**Illyés, Gyula** - Poet, writer, a prominent figure in 20th century Hungarian literature.

**Jókai, Mór** - Writer, a great novelist with more than 100 books, 25 translated into foreign languages. The “Charles Dickens” of Hungarian literature.

**József, Attila** - Leading lyric poet in the 20th century after Ady's time.

**Karinthy, Frigyes** - Humorist, created a specific genre of humor in Hungarian literature.

**Lengyel, Menyhért** – Oscar-nominated writer, producer, Broadway and Film Director.

**Lukács, John (János)** - Acclaimed novelist.

**Lukács György (George)** - Internationally renowned philosopher.

**Márai, Sándor** - Internationally acclaimed writer in exile.

**Mécs, László** - Poet, parish priest, popular reciter, champion of the downtrodden.

**Mikszáth Kálmán** - Writer, famed master of critical realist prose.

Her book is entitled *My Birthplace - My Melodious Mother Tongue* (*Szülőföldem, zengő anyanyelvem*), interviews (2001). She was a recipient of the First Prize at the International Folk-song Competition, Middlesbrough, Canada (1971), First Prize at the *Röpülj Páva* Folk-song Competition (1970), the VIT Prize (1973), and the Kodály Diploma (1982). – B: 0874, 1438, T: 7103.→**Dance House Movement.**

**Faragó, Tamás** (Thomas) (Budapest, 5 August 1952 - ) – Water-polo player, trainer. In 1980, he obtained a Veterinary Degree at the University of Budapest; and a diploma in water-polo training from the School of Physical Education. He began to play his sport publicly in 1965. From 1969, he already played as a member of the *Vasas* team; from 1984, as a water-polo player in *Düsseldorf*; and from 1987, in the Italian *Arenzano* team. Between 1970 and 1985, he played 258 times in the Hungarian select team. As a water-polo player, he took part in three Summer Olympic Games. In the 1976 Summer Olympics in Montreal, he was a member of the Hungarian team, which won an Olympic Champion title. He retired from active sport in 1989. He was elected member of the Olympic Hall of Fame in 1993. His sporting results include Olympic 2nd place in 1972; World Champion in 1973; twice European Champion (1974, 1977); nine-times

Hungarian Champion; 4-times Hungarian Cup winner; and Italian Cup winner in 1988. After his retirement, he was active abroad as trainer in the 1990s. He returned to Hungary in 1993 and founded a water-polo school with Gábor (Gabriel) Csapó, and continued working as a trainer in Hungary. He was Association Captain of the women's select water-polo team from 2000 to 2005; under his guidance the team won the World Champion title. He received the Officer's Cross of Merit of the Republic of Hungary in 2001. – B: 1031, 1768, T: 7456.

**Farbaky, István** (Stephen) (Nyíregyháza, 15 August 1837 - Selmecbánya, now Banská Stiaavnica, Slovakia, 3 December 1928) – Mining engineer. He received his qualifications at the Mining and Forestry Academy of Selmecbánya in 1858. The following year he became demonstrator, then professor in 1867. He played a significant role in the development of mining and related disciplines, and in evolving their Hungarian technical terminology. Several of his mining, metallurgical and chemical patents are known. His professional publications are extensive. He was the first in Hungarian technical literature to deal with the computation of cogwheels. In 1885, together with his professor colleague István (Stephen) Schenek, he invented an apparatus with a high performance storage battery, generating illuminating gas. He was Director of the Hungarian Academy of Science between 1876 and 1892, then Member of Parliament representing Selmecbánya. He was Editor of the mining and metallurgical journal, *Newsletters of Mining and Metallurgy (Bányászati és Kohászati Lapok)* from 1881 until his retirement in 1892. – B: 0883, 1405, T: 7456.→**Schenek, István.**

**Farinograph and Farinometer** – Farinograph is a device for examining the quality of flour by measuring its water absorption capacity. It is also a kneading machine driven by a small-size electric motor of regular speed (with an even revolution per minute) and kept under a constant temperature. It is the first easily manageable device for measuring the elasticity of pastry. Jenő (Eugene) Hankóczy, a farmer, invented it. He also invented the *Farinometer*. This is an instrument to measure the expansibility of pastry and gluten. It was completed in 1905, and was the first instrument of its kind in the world. – B: 1138, 1226, 0883, 1020, T: 7456.→**Hankóczy, Jenő.**

**Farkas, András** (Andrew) (Esztergom? 16 century) – Preacher, songwriter, member of the first Hungarian Reformation generation. He was admitted into the University of Wittenberg on 18 October 1531. He was the first one to propagate the Biblical aspects of the Reformation's. He was the author of the very first historical song to survive together with its melody. It is called *Cronica de introductione Scyttarum in Ungariam et Judeorum de Aegypta*. It was published in Krakow in 1538. Its first edition disappeared; only the 18th century handwritten copy *Cornides* is known. The song was also published by György (George) Hoffgreff in the *Hoffgreff Songbook (Hoffgreff Énekeskönyv)*, printed in Kolozsvár (now Cluj-Napoca, Romania) in 1554-1555. It has the most characteristic melody of the 16th century and is also the longest. – B: 0883, 1257, T: 3240.→**Hoffgreff, György.**

**Farkas, Arpád** (Siménfalva, now Simonesti, Romania, 3 April 1944 - ) – Poet, writer, literary translator in Transylvania (*Erdély*, now in Romania). He graduated in Hungarian Language and Literature from the University of Kolozsvár (now Cluj-Napoca) in 1966. He taught at Vajnafalva until 1968; was a contributor to the journal *County Mirror (Megyei Tükör)* in Sepsiszentgyörgy (now Sfintu Gheorghe) until 1971, and was later an

editorial board member of the journal, *True Word (Igaz Szó)*. Between 1975 and 1989 he worked part-time for the periodical, *Viewer (Látó)* and was its Editor from 1990. He has been Editor-in-Chief of the *Háromszék Daily* of Covasna County since 1993. His poetry books are: *Hangover Song (Másnapos ének)* (1968); *Poplar-circle (Jegenyekör)* (1971); *Tunnels in the Snow (Alagutak a hóban)* (1979); *The Walled-in Pulpit (A befalazott szószék)* (1975), and *In Leakage (Szivárgásban)* (1991). His reports include *Along Broad Brooks (Bővizű patakok mentén)*, co-writer (1972). He translated into Hungarian the works of Romanian authors: Ana Blandiana, Marin Sorescu and Adrian Popescu. He is a recipient of the Writers Association of Marosvásárhely (now Tirgu Mures) Prize (1972, 1979), the Romanian Writers Association Prize (1985), the Foundation for Hungarian Art Prize (1991), the Attila József Prize (1993) and the Sándor Petőfi Press Freedom Prize (1995). – B: 1036, 1257, 0878, T: 7103.

**Farkas, Bertalan** (Bartholomew) (Gyulaháza, 2 August 1949 - ) – Aviation officer, cosmonaut. Following the completion of the cosmonaut section in the Technical College of Aviation, he graduated as an Air Force officer in 1972. Between 1972 and 1978 he served in a fighter contingent at Pápa, Hungary. In 1978, he was ordered to undertake the special cosmonaut training in the Soviet Union's star city, the Gagarin Cosmonaut Center. In 1980, within the framework of the fifth Inter-Cosmos Program, with Soviet cosmonauts V. Kubasov, L. Popov and V. Riumin, he carried out an 8-day space-mission, the first such collaboration in space travel. Between 26 May and 3 June 1980, together with V. Kubasov, he went into space, initially on the research spacecraft 'Sojuz-36'; then on 27 May, transferred onto the space station 'Saljut-6'; and on 3 June on board the 'Sojuz-35', he returned to Earth. In the course of his space travels, he carried out observations on medical-biological and metal technological research, as well as physical, remote sensing and energy resources research. – B 1090, 1486, T: 7456.

**Farkas, Endre** (Andrew) (Hajdunánás, March, 1948 - ) – Poet. He arrived in Canada in 1956; published several books of poetry, including *Servusz* (1976); *Romantic at Heart and Other Faults* (1979); *How to...* (1988), and edited three anthologies. He published poems in periodicals and gives readings and video performances. His motto is: "*I write to remember... I write to do something useless in a world obsessed with utility. And through the act, I exercise the most fundamental human right: the right of the private voice to speak out...*" – B: 0892, T: 4342.

**Farkas, Ferenc** (Francis) (Nagykanizsa, 15 December 1905 - Budapest, 11 October 2000) – Composer. He took his first music lessons when he was eight. At first he studied privately; later continued in the *National Music School (Nemzeti Zenede)* in Budapest. Between 1922 and 1927 he was a student of Albert Siklós and Leó Weiner in the Ferenc (Franz) Liszt Academy of Music in Budapest. In the next two years, he worked as the choirmaster and conductor of the City Theater (*Városi Színház*) in Budapest. In 1929, he went to Italy on a state scholarship, where he studied under Ottorino Respighi at the Santa Cecilia Academy (*Accademia di Santa Cecilia*) in Rome (1929-1931). On his return to Hungary in 1930, he organized an independent evening of his own compositions. He spent the year 1933 in Vienna; later composed film-music in Copenhagen. In 1935, he visited Paris and started teaching in the Metropolitan Higher School of Music. When Northern Transylvania was returned to Hungary in 1940 by the Second Vienna Award, he went to work in the Music Conservatory of Kolozsvár (now

Cluj-Napoca, Romania), where he became its director. During the years 1946-1948, he was Director of the Music Conservatory at Székesfehérvár, while from 1948 to 1975 he was Professor of Composition and Department Head at the Academy of Music, Budapest. His students included Zolt Durkó; György Kurtág, György Ligeti, Emil Petrovics; Sándor Szokolay and Tihamér Vuicsics. He composed operas and ballets, e.g. *The Magic Cupboard* (*A búvös szekrény*) (1938-1942) and *Tricky Students* (*Furfangos diákok*) (1949), also orchestral works like *Rhapsodia Carpathiana* (1940); *Lavotta Suite* (1951); *Symphony No. 1* (1951-1952), concertos, chamber works, vocal-orchestral works (e.g. *Cantus Pannonicus*, 1959; *Hymn of Szigetvár*, 1966) and piano pieces. He also composed numerous accompaniments, especially for Hungarian, Austrian and Danish films, such as *Hot Meadows* (*Forró mezők*) (1948); *Storm* (*Vihar*) (1952); *Bitter Truth* (*Keserű igazság*) (1956); *Lark* (*Pacsirta*) (1963), and *A Hungarian Nabob* (*Egy magyar nábob*) (1966). He was awarded the Liszt Prize (1933), the Francis Joseph Prize (1934), the Klebelsberg Prize (1943), the Kossuth Prize (1950, 1991), the Erkel Prize (1960); he also received the Merited Artist title (1965), the Outstanding Artist title (1970), and he was also a recipient of the Gottfried von Herder Prize (1979), the Cavaliere dell'Ordine della Repubblica Italiana Prize (1984), and the Bartók-Pásztory Prize (1986). In 1965, he became an honorary freeman of the town of Nagykanizsa, his birthplace. – B: 1031, 1426, T: 7456.→**Siklós, Albert; Weiner, Leó; Bozay, Attila; Durkó, Zolt; Kurtág, György; Ligeti, György; Petrovics, Emil; Szokolay, Sándor; Vuicsics, Tihamér.**

**Farkas, Gyula** (Julius) (Pusztasárosd, 28 March 1847 - Pestszentlőrinc, 26 December 1930) – Mathematician, physicist. His secondary education was at the Benedictine High School, Győr. He started his higher studies in Law and Music at the University of Pest. He soon left his studies and became a private tutor for a while; thereafter he returned to University to study Physics and Chemistry. Later he taught at the Modern School at Székesfehérvár, and was the private tutor of Count Géza Batthyány's children. This enabled him to have some time for research, both in mathematics and physics, and also had the opportunity to make study trips abroad. In the meantime, he published impressively and was appointed as privat docent in function theory at the University of Pest. In 1877, he was appointed Professor at the University of Kolozsvár (now Cluj-Napoca, Romania). He is noted for the Farkas-theorem used in linear programming, as well as for his work on linear inequalities. His research in thermodynamics and the Fourier principles was significant. His works include *A Simplified Deduction of Carnot-Clausius Thesis* (*A Carnot–Clausius tétel egyszerűsített levezetése*) (1895); *Beiträge zu den Grundlagen der analytischen Mechanik* (1906), and *From the Old Theory of Einstein's Gravitation* (*Einstein féle gravitáció régi elméletből*) (1921). He was a member of the Hungarian Academy of Sciences (1898, 1914) and Honorary Doctor of the University of Padua, Italy (1892). – B: 0883, 1417, T: 7103.

**Farkas, István** (Stephen) (Budapest, 20 October 1887 - Auschwitz, 1944) – Painter. He was a student of Károly (Charles) Ferenczy at the Academy of Applied Art, Budapest (1908-1909), then went to Munich and, in 1912 he was at the *Académie de la Palette*, Paris. After his POW period in Italy in World War I, he returned to Hungary in 1919. He exhibited his cubism style pictures at the Ernst Museum, Budapest in 1924. From 1925 on, he lived in Paris and exhibited there between 1928 and 1932. After his father's death, he moved back to Budapest and took over the management of Singer and Wolfner Publishers. He was involved in fresco painting as well, later he painted surrealistic

visions. His works include *Black Women (Fekete Nők)* (1931); *Self-Portrait (Önarckép)* (1933); *Fate (Végzet)*; (1934), *Divorced (Elváltak)* (1941), and *Did Something Happen? (Történt valami?)* (1941). He had a series of exhibitions in Hungary. – B: 0934, 1487, T: 7103.→**Ferenczy, Károly.**

**Farkas, József** (Joseph) (Budapest, 16 October 1914 - Budapest, 25 December 1999) – Minister of the Reformed Church. He completed his high school studies in 1932, and his Theological studies in Budapest (1932-1936). He continued his Theological studies in Halle, Germany (1934-1935) and Geneva, Switzerland (1937-1938). He received a teacher's diploma at Nagykőrös (1936-1937) and was an assistant minister in various places, mission minister of the General Convent of the Reformed Church (1942-1945), thereafter that of the Danubian Church District (1945-1949). He was Minister of the Klauzál Square Church (1948-1956). He was lecturer at the Reformed Theological Academy, Budapest (1954-1956) and, for a short time in 1956 he was Minister of the Calvin Square Congregation, Budapest; but he resigned during the Revolution of 1956. In his resignation letter he gave a characteristic picture of Church life in the first half of the 1950s. He was deputy Bishop from 1958-1960. He continued serving at the Klauzál Square Congregation well beyond his retirement, until his death. He was one of the theologians of the Reformed Church who shaped the theological thinking of his Church in the latter part of the 20th century. His articles and essays appeared regularly in the church press. Some of his main works are: *Reformation of the Church (Az egyház reformációja)* (1946); *Evangelization (Evangelizáció)* (1946); *In the Beginning (Kezdetben)* with Sándor (Alexander) Joó; *Life is More (Több az Élet)* (1988); *What Does the Bible Say? (Mit mond a Biblia?)* (1990); *Pneumatic Man (Pneumatikus ember)* (1995); *Break Up Your Fallow Ground, an Alternate Theology (Szántások magatoknak új szántást, alternatív teológia)* (1997), and *On the Way – An Account of the Walk (Menet közben – számadás a megtett útról)* (1999). – B: 0910, T: 7103.→**Reformed Church in Hungary.**

**Farkas, Ödön** (Edmund) (Jászmonostor, 27 January 1851 - Kolozsvár [now Cluj-Napoca, Romania], 11 September 1912) – Composer, music teacher. He was a pupil of Kornél (Cornel) Ábrányi and Sándor (Alexander) Nikolics. He worked in Kolozsvár all his life, where he was Director of the local Conservatory of Music. From 1882-1883, he was conductor at the Kolozsvár Theater (*Kolozsvári Színház*). He made his name as an opera composer. He was a noted singing teacher, taught such vocal luminaries as soprano Erzsi (Liz) Sándor, mezzo-soprano Mária Sándor, and baritone, Ferenc (Francis) Székelyhidy. With his Philharmonic Society he contributed much to the musical life of Kolozsvár. He wrote numerous orchestral, piano, operatic, vocal and choral compositions, among them *Fairy Fountain (Tündérforrás)* (1893); *Bálint Balassa* (1896), and *Kuruc World (Kurucvilág)* (1906). – B: 0883, 1160, T: 7617.→**Sándor, Erzsi; Sándor, Mária; Székelyhidy, Ferenc.**

**Farkas, Pál** (Paul) (Wolfner) (Budapest, 27 November 1878 - Budapest, 23 April 1921) – Writer, sociologist, politician. His family owned a publishing house. He read Law at the Faculty of Law, the University of Budapest; later became President of the Society of Young Lawyers. He was one of the founders and general secretary of the Society of Hungarian Sociological Science (1906) and was one of the editors at the literary magazine, *New Times (Új Idők)*. From 1910 he was a Member of Parliament and a

member of the Petőfi Society. His works include *Diary of a Volunteer (Egy önkéntes naplója)* (1912); *The Renegade (A renegát)* novel (1914); *History of the French Revolution (A francia forradalom története)* (1912); *Notes of a District Doctor (Egy körorvos feljegyzései)* (1914), and *Truth is Alive (Él az igazság)*, novel (1921). – B: 0883, 1257, T: 7103.

**Farkasházy, Tivadar** (Theodore) (Budapest, 15 December 1945 - ) – Journalist, writer, humorist. He obtained his Degree in mathematics in 1969, and worked as an economist for the Hungarian Investment Bank for ten years. Then he worked as a night watchman and a casual laborer until he enrolled in journalism, graduating in 1973. In 1972, he worked for the journal *Economist (Közgazdász)*. He decided to try humor in 1974, and won the radio's Humor Festival. In 1975 he became co-editor of the Radio Cabaret and, in 1985, he was appointed program editor. In 1989 he turned to writing and began to edit a newspaper, the *Snow Shoe (Hócipő)*. He is also the spokesperson of the *Democratic Charta*. Farkasházy became renowned with the liberal TV-program *Heti Hetes*, in which seven people sarcastically discuss the events of the week. His works include *22 Madmen from the Radio Cabaret (22 bolond a rádiócabaréból)* (1987); *Comedy of a TV Crew (Tévészek vígjátéka)* (1989); *I don't Understand (Nemértem)*, feuilletons, satires (1994), and *Jimmy's Ear (Fülig Jimmy)*, unpublished letters (1998). He was rewarded with the Karinthy Ring (1986), the Opus Award (1991), the Pulitzer Memorial Prize (1992), the Maecenas Prizes (1993), and the Collective Pulitzer Prize (2000). – B: 0878, 1039, 1257, T: 1039, 7103.

**Farmer Gentry, Yeoman** (*Hétszilvafás nemes*- “nobleman of seven plum-trees”) – This was the poorest branch of nobility with very small estates, or even without any land ownership, working as tenant farmers, although jealously keen of their privileges as noblemen. It is a belittling term in Hungary especially in Transylvania (*Erdély*, now in Romania). – B: 1231, 1020, T: 3233.

**Farmer of Larger Lands** – This is a member of the peasantry owning larger lands and wealth. The development of farmers of larger lands in Hungary began in the 14-15th centuries, as a result of changes in serf dependency. Their number was already significant in the 16th century, especially on the Great Hungarian Plain. Gradually, they took over the administrative positions in the villages and towns and were able to loosen the bonds of serfdom. After the serfs were freed in 1848, farmers cultivating lands of 25-100 hectares grew primarily cash crops (vegetables, fruit, grapes), or dealt with large-scale animal husbandry and grew wheat. They employed hired labor as well; but the majority did the work themselves. In their customs and lifestyles, they lived like peasants. They were receptive to new production methods and did their utmost in keeping themselves apart from the poor peasants, as large landowners. The land reform of 1945 affected them slightly. However after 1948, Rákosi's totalitarian communist system declared them “enemies of the classes” as “*kulaks*” (wealthy peasant farmers), and imposed a series of lawless orders, resulting in the confiscation of their land, houses, animals, tools and their internment or resettlement in forced labor camps. – B: 1231, 1020, T: 7684. → **Deportations.**

**Fasang, Árpád** (Krakow, 30 June 1912 - Budapest, 12 March 2001) – Choirmaster, music educator, composer. He studied composition at the Budapest Academy of Music from 1932 to 1938; received his music teacher and choirmaster qualification in 1939. He

worked as a primary school teacher at Orosháza (1931-1941), then taught at the Teachers' College of Szarvas (1941-1950), from 1950 to 1953 in Sopron. He was Principal of the Vocational High School of Music in Győr (1953-1954). From 1954 to 1955, he worked as Departmental Head at the Ministry of Education; then, between 1955 and 1958, he was Head of the Music Department there. From 1958 until his retirement in 1972, he was Principal of the Vocational High School of Music in Budapest and, between 1959 and 1963, he gave lectures at the University of Budapest. He was Choirmaster at Orosháza (1934 -1938) and Choirmaster of the mixed choir of the workers' residence in Csepel (1958-1969). He played an important role in popularizing music and culture in Hungary. He was the initiator of the *Fly Peacock* (*Röpülj páva*) music movement in Hungary. Zoltán Kodály, among others, acknowledged his work. In his retirement, he gave lectures on musical topics in various places in Hungary, especially to young audiences. He is the author of a number of musical compositions and books on music. He earned several distinctions, including the Officer's Cross of Merit of the Republic of Hungary. A music school in Csepel bears his name. – B: 1031, 1532, T: 7456.→ **Kodály, Zoltán.**

**Fatima Hungarian Stations of the Cross and Calvary**, Portugal – The Stations of the Cross along the *Via Sacra* (*The Sacred Way*), altogether 14 little chapels leading to a marble monument of Christ on the cross, along two miles of uphill walkways of stone, built by Hungarian refugees of the 1956 Freedom Fight. The way culminates in the Chapel of Calvary that overlooks all of Fatima. The idea was that of a retired Hungarian parish priest, Illés (Elijah) Kardos. The stations connect the places of appearances. After the completion of this project, two more were consecrated with the Golgotha. The 11 stained glass windows of the Chapel of St István (St Stephen) depict Hungarian saints. In the side chapel, there is a painting of the Madonna, Patroness of Hungary. There are also marble statues of the crucifixion and a three-meter high statue of King István I (St Stephen). The mosaics of Father Peter Prokop decorate the ceiling of the St István Chapel. The “Valinos” appearance chapel is also a Hungarian gift. – B: 1359, 1020, T: 7103.→**István I, King (St. Stephen).**

**Fátra Range, Great** (now in Slovakia. Hungarian: Nagy Fátra; Slovak: Velká Fatra) – Member of the inner crystalline belt of the Northern Carpathian Mountain Range, 130 km long, 30-40 km wide, encircled by the valleys of the Vág (Váh), Nyitra (Nitra), Zsitva, Garam and Revuca Rivers. The Range is covered by forests and alpine pastures and its core is granite, covered by strongly folded sedimentary deposits. Its western end is Mount Zobor near Nyitra (Tribecs peak, 829 m). Its continuation is Piacsnik or Madaras (1346 m). Between the valleys of the Nyitra and Túróc Rivers is the forest-covered Žiar Range, separated from the most massive Great Fatra *sensu stricto* (also called Krizsna) by the Túróc Basin; its highest point is the Krizsna (Križna) peak (1574 m). Another peak is the Ploska (1533 m). The Sturec Pass separates the Great Fátra Range from the Lower Tatra Range. The Great Fatra has a gentler outline than the Little Fatra and it is more densely populated, though touristically not much developed. – B: 1068, T: 7456

**Fátra Range, Little** (now in Slovakia, Hungarian: Kis Fátra; Slovak: Malá Fatra) – Member of the outer crystalline belt of the Northern Carpathian Mountain Range. Its length is 160 km, its width 10 to 40 km, mostly covered by forests, rich in scenic beauty, enclosed by the valleys of the Vág (Váh), Nyitra (Nitra), Túróc and Varanka Rivers. It

made up largely of granitic core, but its peripheral slopes are covered by Mesozoic and Tertiary deposits: dolomite, limestone and marl. One section of, the Inovec, steeply descends into the basin of the lower course of the Nyitra River. Its highest point is the Inovec summit (1042 m). It is separated from the other crystalline core, the Little Magura (Malá Magura) by the Bebrava Creek, descending to the upper-course Nyitra Basin; its highest peak is the Strázsó (1214 m). A third section of the Little Fáttra is the Krivan Fáttra, which is cut into two parts by the deep valley of the Vág River, the Sztrecsnó Gorge; strictly speaking, this is the Krivan Fatra. The crystalline mass of the Veterna Hola steeply ends at the margin of the Túróc Basin; its highest point is 1477 m. Beyond the Sztrecsnó Gorge ascends the romantically attractive mass of the Krivan Fatra to 1711 m height. This section of the Range already turns into E–W direction. The broad ridge, covered by pine forests and alpine pastures, has a number of peaks: Stoh (1608 m), Kleb (1644 m), Fatra-Krivan (1669 m). Fantastic groups of rock towers, ledges include Vratna, Mount Szulyó, and Suttó Valley. Only hardy tourist roads and tracks cross the sparsely populated Range. – B: 1068, T: 7456.

**Fauna of Hungary** – The fauna of the Carpathian Basin is remarkable in many ways and it changes according to its environment. The species that inhabit the woodlands, the large pastures and the depths of reedy marshes are different from those just a few thousand years ago. The giant stag (*Megaloceros giganteus*) became extinct 40,000-50,000 years ago, and the mammoth (*Mammuthus primigenius*) c. 30,000 years ago. The brown bears (*Ursus arctos*), the relative of the cave bear (*Ursus spelaeus*), still inhabits the Bakony Mountains of Western Hungary. Bisons died out in the 18th century. Other mammals include deer (with a stock of 30,000 in the southern part of Transdanubia), wild pig, fox, otter (Europe's only surviving stocks are in Hungary), badger, wildcat, and more recently, elk and lynx from more northerly parts of Europe; wolf packs roamed the Great Plain (*Nagyalföld*) until the end of the 19th century. Martens, rodents and bats are widespread. Moufflons were recently introduced. The marshes often form meeting places for migratory birds such as the popular white storks, sometimes nesting on hydro poles and chimney tops in the villages (though their numbers are decreasing: in 1958 only 8000 pairs, and in 1979 barely 5000 pairs were accounted for). They migrate to their winter abode on Tierra del Fuego, flying almost 10,000 kms. There are also spoonbills (in the fish ponds of the Hortobágy plain), herons, cranes and little egrets (in the forest groves of the River Tisza). Other birds include sparrows, bustards and bitterns among the reeds, water hens and varieties of wild fowls, as well as geese and turkeys on the Plains. Predatory birds (20 different species) include the common buzzard (*Buteo buteo*), hawk, falcon, the imperial eagle, the bald eagle, and the largest nesting stock of lannerets (*Falco cherrug*). The number of hazel grouse is diminishing, while the pheasant is bred for export. A great variety of fish abound in rivers and lakes, especially carp (*Cyprinus carpio*) and the famous pikeperch (*Lucioperca sandra*) in Lake Balaton. During prehistoric times, gradual environmental changes spanning millions of years affected plant and animal life. Now, however, as a result of human activities, the extinction of numerous species has alarmingly accelerated, often with tragic results. The National Nature Conservation Council succeeded in providing protected areas for the preservation of original faunal species. For example, the famous bird life of the Lesser Balaton (western end of Lake Balaton), of the Fehér Lake, north of Szeged, and Lake Baláta, near Somogyzomb, 40km west of Kaposvár, was investigated by the pioneer of the Hungarian

nature conservation, Miksa (Maximilian) Földvály (1940). Plant protection areas were also established: the unique bog rush flora of Lake Baláta was investigated by Ádám Boros (1900-1973), as well as mineral and fossil sites (e.g. Ipolytarnóc, Gánóc south of the High Tátras in Upper Hungary (now Slovakia), Baltavár, Kiscell, Eger, Borbolya, and natural geographic formations, worthy of protection and preservation, such as Mount Szársomlyó (442 m) west of Villány (became protected in 1944), and the volcanic Mount Badacsony, northwest of Lake Balaton, where the mining of basalt was successfully stopped in the 1970s, as a result of the urging by Miksa Földvály. Rush bogs and groves (e.g., Rigóc and the juniper grove of Barcs), suggested for protection as early as 1931, became a composite protected area (some 8400 acres) in 1974. – B: 1078, 7456, T: 7456.→**National Parks; Natural Protection Area; Földvály, Miksa.**

**Fáy, András** (Andrew) (Kohány, 30 May 1786 - Pest, 26 July 1864) – Poet, author, politician. He studied Law at the Reformed College of Sárospatak and at Pozsony (now Bratislava, Slovakia). As a young lawyer, he worked in Pest (1805-1808), and farmed on his estate at Jobbágyi. Afterward, he was Chief Magistrate of County Pest (1810-1818). His *F.A.'s Original Fables and Aphorisms* (*F.A. eredeti meséi és aforizmái*) (1818), and his *F.A.'s Newer Fables and Aphorisms* (*F. A. újabb eredeti meséi és aforizmái*) (1824) won him fame. These tales were translated into German (1825) and some into English (1877). He wrote numerous poems, most of them appearing in the collections *Bouquet* (*Bokréta*) (1807), and *Fresh Bouquet* (*Friss Bokreta*) (1818). He also wrote plays and romances. In 1835 he was elected to the Hungarian Diet and was for a time Leader of the Opposition party. He founded the First National Savings Bank (*Hazai Első Takarékpénztár*), and was one of the founders of the Hungarian National Theater (*Magyar Nemzeti Színház*). His other works include *The Two Báthorys* (*A két Báthory*) drama (1827); *The House of Bételeky* (*A Bételeky ház*), (1832), and *The Halmai Family* (*A Halmai-család*) (1858). His earlier works were collected in eight volumes (1843-1844). He was called *The general factotum of the nation* (*A haza mindenese*). – B: 0883, 0932, 1257, T: 7103.→**Kazinczy, Ferenc; Staud, Géza.**

**Fáy, Dezső** (Desider) (Budapest, 13 November 1888 - Budapest, 3 April 1954) – Painter and designer. He studied at the Academy of Applied Art in Budapest, then in the Julian Academy of Paris, later under Simon Hollósy in Munich; and finally in the artists' world of Nagybánya (now Baia Mare, Romania). He visited Italy with Lajos (Louis) Gulácsy several times, exhibited with him from 1909 on, working under his influence. He was particularly popular as an illustrator. Well-known are his illustrations for Dante's *Divina Commedia* (*Divine Comedy*) and the *Gypsies of Nagyida* (*Nagyidai cigányok*). His other works include *Italian Small Town in Springtime* (*Olasz kisváros tavasszal*); *Egyptian Girl* (*Egyiptomi lány*), and *Dancers* (*Táncolók*). In 1922 he received the Graphic Prize of the Szinyei Society. Later he was awarded a number of prizes in Hungary and abroad. – B: 0883, 1160, T: 7456.→**Hollósy, Simon; Gulácsy, Lajos.**

**Fáy, Ferenc** (Francis) (Pécel, 20 June 1921 - Toronto, 10 June 1981) - Poet, brother of István Fáy. After completing the Officer Training Course at the Ludovika Military Academy, Budapest, he graduated as a second lieutenant in 1944. He did military service on the Russian front in World War II, and became a prisoner of war. On returning to Hungary in 1947, he was sent to an internment camp, but escaped to Yugoslavia in the spring of 1948. From 1949, he lived in Italy for 2 years. In 1951 he settled in Canada.

Initially he worked in forest clearing, later worked in mines. In 1957, the School Board of Toronto employed him. His *Poems of Ten Years 1945-1955* (*Tíz év versei 1945-1955*) appeared in the anthology of the American Hungarian Publisher in Munich. His first volume of poems, *Lamentations of Jeremiah* (*Jeremiás siralmi*) appeared in 1956. Important western magazines regularly published his poems. In Hungary, first the journal *Vigilia* published his poems in 1974. His works include *Redeeming Song* (*Törlesztő ének*) poems (Toronto, 1963); *Self-lamenting* (*Magamsírató*) poems (1967); *Flood* (*Áradás*), poems (1972); *Fossil* (*Kövület*) poems (1977), and *His Collected Poems* (*Összegyűjtött versei*) (Toronto, 1981). He received the Sándor Sík Prize (1973). – B: 0883, 1257, T: 7456.→**Fáy, István; Canadian Hungarian Literature.**

**Fáy, István** (Stephen) (Pécel, 17 March 1918 – Welland, Ontario, Canada, 21 September 2003) – Writer, literary translator, educator. He studied at the Lutheran High School, Budapest, and at the University of Budapest, majoring in Comparative Literature and Musicology. He served as an officer in the Royal Hungarian Army during World War II, and moved to Canada in 1950 to work in the Northern Quebec gold mines. He contributed to the *Krónika*, the monthly periodical of the Hungarian Cultural Center in Toronto, served as a member of the editorial board of the journal *Road of Armies* (*Hadak Útja*) and for the Australian *Hungarian Life* paper. He published a series of essays on Hungarian poetry, and translated into Hungarian songs of Schubert, Schumann, Brahms, R. Strauss, and a number of Gothic hymns and sequences from Latin. – B: 0893, T: 3240, 4342.→**Fáy, Ferenc.**

**Fazekas, Mihály** (Michael) (Debrecen, 6 January 1766 - Debrecen, 23 February 1828) – Poet. He was the son of a blacksmith and farrier (*gyógykovács*). He studied at the Reformed College of Debrecen; and after studying Theology for one year in 1781, he chose a military career and became a Hussar. He served in Galicia, Poland and participated in the Moldova campaign, was wounded and posted to France. After the death of his father in 1796, he left the army in the rank of first lieutenant and settled in Debrecen, where he dedicated himself to literature and botany besides doing some administrative work mainly at the Reformed College. He was a close friend of Mihály (Michael) Csokonai Vitéz. His major work is entitled *Ludas Matyi* (*Crafty Matt, the Goose-herd*), a narrative poem in hexameters and in four chapters. In it he vividly depicted the antagonistic relationship between nobles and peasants, a major problem of his times. This popular work reached forty editions over time. He also authored, with two contributors, the *Hungarian Herbal Book* (*Magyar Fűvész Könyv*) and edited the *Hungarian Calendar of Debrecen* (*Debreceni Magyar Kalendárium*). – B: 1105, 1257, T: 7103.→**Csokonai, Vitéz, Mihály.**

**Fazola, Henrik** (Henry) (Würzburg, ca. 1730 - Diósgyőr, 18 April 1779) – Ironsmith. He established the Diósgyőr Iron Works. During his journeyman's years in 1758, he went to Hungary at the invitation of Ferenc (Francis) Barkóczy, Bishop and Lord Lieutenant of Eger, where he settled. He made iron ornaments and works of industrial arts, at first for the County Hall, later for a number of church buildings. His iron lattice works are good examples of Baroque iron work in Hungary. He prospected for minerals in the Mátra and Bükk Mountains, especially for iron ore. After prospecting for iron ore sites he started iron production. From 1765 on he established foundries in the valleys of the Garadna and Szinva Creeks. In 1771-1772, he built the blast furnace at Ómassa, and the iron works at

Hámor. After having founded the ironworks at Diósgyőr, he liquidated his workshop in Eger and abandoned his artistic activities. – B: 0883, 1031, 1020, T: 7680.

**Fédák, Mihály** (Michael) (Jászó, 1749 - Gyulafehérvár, now Alba Iulia, Romania, 7 June 1804) – Army colonel. He distinguished himself by his courage at the siege of Belgrade on 10 September 1789. When Napoleon advanced after the capture of Mantova, Italy, into Austria's Carinthian region in 1797, his vanguard, under the command of Massena, occupied Tarvis. Then the Austrian commander, Archduke Charles, ordered the Hussar Regiment of Erdőd to block the advancement of Massena and expel his vanguard from Tarvis. Mihály Fédák, only a lieutenant colonel at that time, volunteered for the task. In the early hours on 22 March 1797, his surprise attack forced the French to flee. Next day, Massena arrived with the bulk of his army in Tarvis but failed to recapture the town because of the Hussars' resistance. Only on 25 March were the French able to capture the town when, out of Fédák's 600 Hussars, 527 were dead. When the French surrounded Commander in Chief Archduke Charles, Fédák, whose horse was shot from under him, bleeding from numerous wounds protected the Archduke with his own body and the fierce resistance of his remaining 6 Hussars secured the Archduke's escape. By then, Fédák lost consciousness and the French captured him. He was freed by a prisoner exchange. Archduke Charles wrote a letter of thanks with his own hand and awarded him the Order of Maria Theresa. As a result of his injuries, Fédák retired to Gyulafehérvár and became the military commander of the city. – B: 0942, 1020, T: 3233.

**Fedák, Sári** (Sarah) (Sarolta Klára Mária) (Beregszász, now Berehove, Ukraine, 26 October 1879 - Budapest, 5 May 1955) – Actress. She was educated at the Szidi Rákosi Academy of Dramatic Arts. Her first performance was at the Hungarian Theater (*Magyar Színház*) in the opera, *The Geishas* (*Gésák*). She was a sought-after actress and a popular prima donna in Hungary, as well as abroad. Contrary to the previous sentimental and sugary operetta heroines, she personified new characters (bold and quick-witted girls and women) with her magnetic personality. Her major roles were: Huszka's *Prince Bob* (*Bob herceg*); Kacsóh's *John the Brave* (*János vitéz*), and Jacobi's *Sybil* (*Szibill*). She was successful in feature film roles such as in *Three Weeks* (*Három hét*) (1917); *The Lover* (*A szerető*) (1918); *Mámi* (1937), and *The Eternal Secret* (*Az örök titok*) (1938). Her Memoires, *On the Way*, vols. i,ii (*Útközben I, II*) were published in 1929. She was involved in rightist political propaganda and, at the end of World War II, she escaped to Vienna. The Americans extradited her and the People's Tribunal sentenced her to eight month of prison and banned her for three years from the stage at the age of 70. After her release, she lived in complete seclusion at Nyáregyháza. She was evicted from his home and lived in one room until the end of her life. Despite orders, more than a hundred-thousand people were present at her funeral. – B: 0883, 1445, 1031, T: 7685.

**Fehér, Ferenc** (Francis) (Nagyfény, now Zednik, Serbia, 3 August 1928 - Újvidék now Novi Sad, Serbia, 31 July 1989) – Poet, writer, journalist, literary translator. He was born into an impoverished farmer family that shaped his literary career. He studied at Topolya (now Backá Topola), Szabadka (now Subotica, Serbia) and Újvidék. He started as a journalist and later he joined the editorial board of the journal, *Bridge* (*Híd*) and *Radio Újvidék*. Among his more than 30 literary works are: *Grandchildren of Serfs* (*Jobbágyok unokái*) poems (1953); *Dream at the By-ways* (*Álom a dűlőutak szélén*) poems, (1956); *My Rabbit* (*Az én nyuszim*) juvenile poems (1961); *Devil's Mill* (*Ördögmalom*) radio-play

(1964); *Lodestars (Hazavezérlő csillagok)* diary-notes (1970); *Secret of the Stone Goat (A kőkecske titka)* juvenile novel (1972), and the *Shadow of the Bird (A madár árnyéka)*, translations (1978). He received seven prizes, among them the Híd Literary Prize (1966), the Kornél Szentlelky Prize (1975, 1985), the Üzenet Prize (1984), and the Order of Star of the Hungarian People's Democracy (1989). – B: 0878, 1169, T: 7103.

**Fehér, Ilona** (Helen) (Budapest, December 1 1901 - Holon, Israel, January 1988) – Violinist, pedagogue. She was one of the last representatives of the Central European Violin School whose greats included Joseph Joachim and Jenő Hubay. She was also a noted violin teacher. Fehér studied with Jenő Hubay for six years at the Franz Liszt Academy of Music in Budapest. Other violin teachers of her early years were Joseph Bloch and Imre Pogány. Between the two World Wars she performed all over Europe, in particular with Willem Mengelberg and the Royal Concertgebouw Orchestra in Amsterdam, the Netherlands. Fehér lived in Budapest until 1944, when she was interned with her daughter in a concentration camp. In 1949 she emigrated to Israel to begin a new life as a violin teacher. Within 25 years she had built herself a reputation as an inspired teacher. Her 250 pupils include some of the most outstanding violinists, such as Pinkass Zukerman, Shlomo Mintz, among others. In addition to teaching at the Rubin Academy in Tel Aviv, Fehér held master classes all over the world. She frequently served as jurist in international violin competitions in Munich and Freiburg, Germany, the Spohr competition.

There is an Ilona Feher Foundation in Israel established in 2003 as a nonprofit organization committed to nurturing the artistic development of exceptional young Israeli violinists. The Foundation has received collaboration from top organizations such as the Jerusalem Music Center, the American Israeli Cultural Foundation, The Israeli Consulate in New York, USA, the Julliard School, and the Royal College of Music in London, among others. She was a recipient of the Golden Medal and Diploma of the Franz Liszt Academy in Budapest. She was also made an Honorary Doctor of the Weizmann Institute of Science in Rehovot, Israel, and Honorary Citizen of the city of Holon, her home town in Israel. – B: 1031, T: 7617. → **Hubay, Jenő; Joachim, József.**

**Fehér, János** (John) (Kisbarát, 23 November 1932 - Budapest, 28 May 2010) – Physician, gastroenterologist, researcher. His secondary studies were at the High School of Győr. He obtained his MD from the Medical School of the University of Budapest in 1958. He was a lecturer at the Semmelweis University (1961-1979). In 1979, he became Associate Professor of Medicine and in 1983 Professor of Medicine. From 1983 to 1993, he was Director of the 2nd Department of Medicine, Semmelweis University, Budapest; between 1986 and 2002, he was Professor and Director of Medicine at the National Institute of Internal Medicine; since 2002 he has been Professor Emeritus. In the meantime he was President of the College of Internal Medicine of Hungary and Member of the College of Forensic Medicine. His field of research includes Glycoproteins in chronic liver diseases; diagnosis and treatment of chronic active hepatitis; free radicals and immune reaction. He was a visiting professor at the Department of Pathology, University of Bucharest; Dept. of Pathology, University of Newcastle-upon-Tyne, England, UK, and at the Tokai University, Japan. Some of his research achievements were accepted internationally and adopted in medical textbooks e.g. in the *Cecil Textbook of Medicine*. He was a member of a number of Medical Associations. He was Founder

and President of the Hungarian Liver Research Society (2004). Since 1998 he had been a member of the Hungarian representative body to the European Commission Program. He was a member of a number of editorial boards, including the *Journal of Hepatology*; the *Zeitschrift für Gastroenterologies*, and Editor-in Chief of the Hungarian *Physician Weekly (Orvosi Hetilap)*. He wrote 14 books and more than 375 papers. His works include *Free Radical Reactions in Medicine* (co-author, 1987); *Liver Diseases (Májbetegségek)* (with A. Vereckei, 1988); *Oxygen Stress and Tissue Damage* (with Blazovics, 1996), and the *Hepatology Textbook* (with G. Lengyel, 2001). He is recipient of fifteen awards and medals, including the Lajos Markusovszky Medal (1990), Man of the Year International Biograph Institute, USA (1990) and the Middle Cross of Merit of the Republic of Hungary (2003). – B: 0874, 1530, T: 7103.

**Fehér, Mátyás, Jenő O.P.** (Mathew, Eugene) (Surányi) (pen-name Fehér M. Jenő) (Vassurány, 27 October 1913 - Buenos-Aires, Argentina, 17 August 1978) – Historian. His secondary studies were in Szombathely and Sopron. He studied Theology in Graz, Austria, and Budapest, where he studied Archival and Library Sciences. In 1933 he joined the Dominican Order and was ordained in 1938. He was charged with the writing of the history of Hungary. Between 1938 and 1948, he taught religion in Budapest. In 1942, he was Archivist of the Kassa (now Košice, Slovakia) Bishopric. From 1949, he carried out research in Austria, France, Germany, Spain, Turkey, and at the Dominican History Institute of the Vatican. In 1968, he was a librarian at Rutgers University, USA. From 1971 to 1978, he lived and worked as a historiographer and publisher in Argentina. He published 17 books including the history of a number of Dominican monasteries: *Life of St Margaret of the House of Árpád (Árpádházi Szt Margit élete)* (1944), *Piroska, Daughter of St Ladislav (Piroska, Szt László lánya)* (1970), and *Empire of the Western Avars; I. On the Track of Avar Treasures, II Early Avar Khagans (A nyugati avarok birodalma; I Az avar kincsek nyomában, II A korai avar kagánok)* (1972). – B: 0945, T: 7103. →**Karnamag**.

**Féja, Géza** (Szentjánospuszta, County Bars, now in Slovakia, 19 December 1900 - Budapest, 14 August 1978) – Author, publicist, critic. His secondary education was completed in Léva (now Levice, Slovakia) in 1919. From 1920, he lived in Budapest as a refugee; as a member of the Eötvös College of University of Budapest, he studied Hungarian and German Literature, and obtained a Degree in Education. In 1923 he was given Hungarian citizenship and taught at the Esztergom Campus of the University. From 1924, he taught at Pesterzsébet, a suburb of the Capital. His first poem appeared in the literary review *West (Nyugat)*, in 1922. In 1923, he was attracted by the ideas of Dezső (Desider) Szabó. He became a contributor to another literary review, *Life and Literature (Élet és Irodalom)*. Between 1929 and 1933, he was in the inner circle of Endre (Andrew) Bajcsy-Zsilinszky. He was Editor of the newspapers *Vanguard (Előőr)*; *Smelter (Kohó)* (1931), and later the *Liberty (Szabadság)*. He became an organizer of the National Radical Party in 1931. He distanced himself from Endre Bajcsy-Zsilinszky, approached Lajos (Louis) Zilahy, and participated in the *New Spiritual Front (Új Szellemi Front)*. In 1937, he joined the March Front (*Márciusi Front*). In 1937 appeared his book *Stormy Corner (Viharsarok)*, a harsh social criticism and a staggering indictment about the hardship of people and life in the Lower-Tisza River region. As a result of this book, he not only lost his teaching position but was also indicted and convicted to a 2-month prison term. The book was confiscated. Between 1945 and 1956,

he was excluded from the literary life and worked as a librarian at Békéscsaba. On 1 November 1956, he returned to Budapest and became a member of the Petöfi Party leadership. From 1960, he worked at the Ervin Szabó Library of the Capital. He wrote studies in literary history and critiques about young writers. His works include *Kuruc (Kurucok)* (1939); *Sigismund Móric (Móric Zsigmond)* (1939); *Lullaby (Bölcsődal)* autobiography (1958); *Stars are Guarding (Csillagok vigyáznak)* historical novel (1968), and *Evenings at Visegrád (Visegrádi esték)* historical novel (1974). He received the Attila József Prize (1966) and the Gold Medal of the Order of Labour (1970). – 0883, 1257, T: 7103. → **Bajcsy Zsilinszky, Endre; Szabó, Dezső; Zilahy, Lajos.**

**Fejér, Lipót** (Leopold) (Pécs, 9 February 1880 - Budapest, 15 October 1959) – Mathematician. At first he studied at Pécs. During his high school years he won competitions in mathematics and became a correspondent of a French journal in the same field. In 1898, he registered in the Department of Mechanical Engineering of the University of Budapest but he soon changed his mind and decided to enroll in the Art Department. In 1899-1900 he was in Berlin where, under the influence of H.A. Schwarz, he became interested in the Fourier series. His first treatise, *Sur les fonctions bornées et Intégrables*, was published in Paris in 1900, although most of his work was published in Germany. He laid the foundations for the modern theory of trigonometric series. He taught mathematics at the University of Kolozsvár (now Cluj-Napoca, Romania), then at University of Budapest until his death. He was a friend of the great lyric poet, Endre (Andrew) Ady. Around him and Frigyes (Frederic) Riesz, the famous Hungarian mathematic school was formed. His further works include *Beispiele stetiger Funktionen mit divergenter Fourierreihe (Examples of constant functions with divergernt Fourier Series)*(1909), *Über trigonometrische Polynome (On trigonometric polynoms)*, in *Crelle Journal*, 146. (1915), *Über einige Funktionen theoretische Ungleichungen (About some functions of theoretical inequalities)*, with Frigyes (Frederick) Riesz, in *Mathem. Zeitschr.* (1921), *Mechanische Quadraturen mit positiven Cotesschen Zahlen (Mechanical Quadratures with positive Cotanian Numbers)*, in *Mathem. Zeitschr.* 37 (1933). He was a member of the Scientific Society of Göttingen, Germany, the Bavarian, Polish and Hungarian Academies of Sciences, and the Mathematic Society of Calcutta, India. He was a recipient of the Kossuth Prize (1948). He was one of the best-equipped mathematicians of the 20th century. – B: 0872, 0883, T: 7103. → **Riesz, Frigyes; Ady, Endre.**

**Fejérpataky, László** (Ladislav) (Eperjes now Presov, Slovakia, 17 August 1857 - Budapest, 6 March 1923) – Historiographer. He studied resource critique at the University of Vienna. He was Head of the National Széchényi Library and Professor of Documents and Heraldry at the University of Budapest from 1895 until his death. From 1915, he was Director of the National Museum and appointed as Deputy Undersecretary in the Ministry of Culture (1923). He published, among others, the 12th century chronicler, *Anonymus' Text in Facsimile (Anonymus szövege hasonmásban)* (1892); *The Charter of the Abbey of Pannonhalma (A pannonhalmi apátság alkapító oklevele)* (1878), and *The Royal Chancery in the Age of the Royal House of Árpád (A királyi kancellária az Árpádok korában)* (1885). He was member of the Hungarian Academy of Sciences (1884). – four elementary and two high school years in Pozsony, then apprenticed as a locksmith. Upon becoming a journeyman, he won a gold medal with his design of an ornamental gate; his woodcarvings also earned general recognition. This brought him to

the Woodcarving Institute at Zayugróc (now Uhrovec, Slovakia), in 1875, where he successfully experimented with faience painting as well as sculpting. He was accepted to the Viennese Tilgner Workshop with a scholarship. Later, he studied at the Academy there. His name became known countrywide in 1882 with the *Crucifix* he sculpted in Vienna. His first significant consignment was the creation of the equestrian statue of *Empress Maria Theresa* in Pozsony. This statue was destroyed by the Czechs after World War I. In 1894, he won first prize at a competition with a design for the equestrian statue of *King Mátyás I* (Matthias Corvinus, 1443-1490), unveiled in 1902 in Kolozsvár (now Cluj-Napoca, Romania). Several of his statues were erected in Budapest and in some cities of Transylvania (*Erdély*, now in Romania). His well-known works are: *Toldi with Wolves (Toldi a farkasokkal)* (1902); *Wesselényi statue* B: 0883, 1257, T: 7103.

**Fejes, Endre** (Andrew) (Budapest, 15 September 1923 - ) – Writer. From 1945-1949 he worked in the mines of Chaleroy, Belgium, and in the Renault Industry, France. He returned to Hungary in 1949 and worked as an iron-turner until 1956. He started writing in 1955. The breakthrough came with his novel entitled *Junkyard (Rozsdatemető)* (1962). In it, he related the story of several generations of the working family, Habetler. The novel was regarded as a literary milestone of the 1960s. His other important novel was *Good Evening Summer, Good Evening Love (Jó estét nyár, jó estét szerelem)* (1969); later it was turned into a successful play. His other works include *The Liar (A hazudós)* short novels (1958); *Cheerful Buddies (Vidám cimborák)* short stories (1966); *The Marriage of Margit Cserepes (Cserepes Margit házassága)* drama (1972); *Dramas (Drámák)* (1999), and *Free Again (Szabadlábbon)* selected stories (1995). Some of his works were translated into other languages, while others were turned into filmscripts. He was awarded the the Attila József Prize (1963), Kossuth Prize (1975), the Pro Urbe Budapest Prize (1999) and the Middle Cross of Merit with Star of the Republic of Hungary (2003). – B: 0874, 0878, 1257, T: 7103.

**Fejes, Jenő** (Eugene) (Fejess) (Budapest, 18 December 1877 - Budapest, 29 January 1952) – Engineer and inventor. After he completed his studies at a Technical College in 1896, he worked at the Arms and Machinery Factory (1897); between 1902 and 1909, he was design-engineer of the Westinghouse factory at Le Havre, France. Upon his return to Hungary, he was a technical designer of the Hungarian General Engineering Works between 1912 and 1917. From 1917, as Director of the Ganz-Fiat Airplane Motor Factory, he organized the car and plane manufacturing in Hungary. His invention was the so-called Fejes plate motor and car. He was the first in the world to submit patents for manufacturing automobile parts by cold-forming, pressing, torch- or spot-welding. From 1923, he was Head of the Joint Stock Company that manufactured them. He was a member of the Hungarian Chamber of Engineers. – B: 0883, 1122, T: 7456.→**Csonka, János.**

**Fejős, Pál** (Paul) (Budapest, 14 January 1897 - New York, NY, USA, 26 April 1963) – Film director, anthropologist. He started as an amateur student actor in Kecskemét. He served in the Hungarian army during World War I and piloted a plane in the Italian campaign. He attended medical school and received his M.D. in 1921. In 1923, he emigrated to Austria and worked with Max Reinhardt in Vienna and with Fritz Lang in Berlin. He moved to the United States and worked in a piano factory. Shortly thereafter, he was recommended to work in the Rockefeller Institute for Medical Research. He also

worked as a physician. In 1926 he was Assistant Director and set designer of the play *The Glass Slipper* by Ferenc (Francis) Molnár. In 1927, he made the movie, *The Last Moment* (*Az utolsó pillanat*). He was soon signed on with Universal Studio in Hollywood and produced the *Lonesome*, and some Broadway movies. In 1931 he returned to Europe and moved restlessly between production companies in Austria, France and Denmark. In Austria, he directed the movies, *Sunshine* (*Napsugár*), and *Sounds of Spring* (*Tavaszi hangok*). In France, he directed *Fantomas* in 1932, which turned into a popular French series. At home in the same year he directed *Spring Shower* (*Tavaszi Zápor*). After a stint in Madagascar, where he shot more than 100,000 feet of film, he turned his eye to anthropology. Over the rest of his career, he wrote several scholarly books on the subject. He worked as Director of Anthropological Research for the Wenner-Gren Foundation of New York, and sought to stimulate interest and make anthropologists aware of the various branches of anthropology. During World War II, he was invited to Stanford University. He suggested the idea of applying geophysical apparatus for researching the existence of the Pleistocene Epoch in Mexico City. This resulted in finding of the Tepexpan man. Later he emphatically pushed for the use of C14 dating, which has since changed the archeological dating procedure. – B: 1037, 1105, T: 7103.→**Molnár, Ferenc.**

**Fejtő, Ferenc** (Francis/François) (Nagykanizsa, 31 August 1909 - Páris, 2 June 2008) – Writer, historian, journalist. His higher studies were at the Universities of Pécs and Budapest, where he read Hungarian and German Literature. From the mid 1930s, he participated in the Social Democratic movement. With the great poet Attila József, he created the journal, *Fine Word* (*Szép Szó*). He fled to Paris, France to avoid his arrest on account of one of his articles. From 1938 to 1942, he was a reporter at a Parisian journal and sent reports in Hungarian to the paper *People's Word* (*Népszava*). From 1944 to 1947, he worked at the AFP – global news agency. In 1947-1949, he led the Hungarian Press Bureau in Paris. At the time of the László (Ladislav) Rajk show trial he dissociated himself from Hungarian political life, settled in France, and received French citizenship in 1955. From 1972 to 1982, he was Director of the Soviet and East European Seminary of the Academy of Political Sciences, Paris. From 1974-1978, he led the Paris Bureau of the journal, *Il Giorni*. His writings appeared in the journals, *Socialism; Contemporary* (*Kortárs*); *Progress* (*Haladás*); *Life and Literature* (*Élet és Irodalom*), and *Hungarian Pamphlets* (*Magyar Füzetek*). His main works are: *Sentimental Journey* (*Érzelmes utazás*) (1936); *Vie de Heine* (1946) (in Hungarian 1998); *La tragédie hongroise* (1956); *Dieu et son Juif* (1960) (*A zsidó és az Úristen*) (in Hungarian 1997); *Budapest, l'insurrection 1956* (1966); *L'héritage de Lénine* (1973); *Today's Hungarians on Hungarians of Old* (*Mai magyarok régi magyarokról*) (1990), and *Voyage sentimentale* (*Érzelmes hajóút*) (2001). He was member of the French PEN Club Committee from 2000; Honorary Doctor of the Janus Pannonius (of Pécs) and the Attila József (of Szeged) Universities, Hungary; was life member of the National Society of Hungarian Writers. He was given a number of prizes and medals, including the Literary Prize of the French National Assembly (1992), the Pulitzer Memorial Prize (1994), the Imre Nagy Memorial Plaque (1994), the Europe Prize (2001) and the Great Cross of Merit of the Republic of Hungary (2004). – B: 0874, 0878, 1257, T: 7103.→**József, Attila; Rajk, László.**

**Fekete, Gyula** (Julius) (Mezőkeresztes, 26 February 1922 - Budapest, 16 January 2009) – Writer, sociographer, journalist. He came from a peasant family and completed his high

school studies at Sárospatak. From 1942 he studied in the Economic Department of the Budapest Polytechnic. He worked as a journalist for the *Free Word* (*Szabad Szó*) (Miskolc), the *March Fifteenth* (*Március Tizenötödike*), and *Cultured People* (*Művelt Nép*). In 1956, he worked as a secretary in the prose department of the Writers' Association (*Írószövetség*). He was detained in December 1956 for his role in the Revolution, and released in 1957. He was Vice-President of the Writers' Association (*Írószövetség*) from 1981 to 1989. In 1965, he was Editor of the newspaper, *Budapest*. He was a Presidium member of the World Federation of Hungarians (*Magyarok Világszövetsége*) between 1992 and 2000. His major works include *Bulgarian Memories* (*Bulgáriai emlékek*) (1954); *Death of the Physician* (*Az orvos halála*) (1963), translated into 10 languages; *Should We Live for Ourselves?* (*Éljünk magunknak?*) (1972); *My Blood Brothers, Hungarian Cannibals* (*Véreim, magyar kannibálok*) (1992); *Silent Counter-Revolution* (*Csendes ellenforradalom*) (1994), and *Number One Public Affair* (*Első számú közügy*) (1997). He was presented with the Attila József Prize (1953, 1963, 1973), the Art Foundation Prize (1978), the Commemorative Medal of 1956 (1991), and the Middle Cross of Merit of the Republic of Hungary (1992). – B: 0878, 0877, 1257, T: 7103.→**Lakitelek, Consultation at; World Federation of Hungarians.**

**Fekete, István** (Stephen) (Gölle, 25 January 1900 - Budapest, 23 June 1970) – Writer. His schooling was at Kaposvár and Debrecen. Later on he attended the Agricultural Academy at Magyaróvár. He became a farm manager in Bakóca and later in Ajka. From 1941 on, he worked as a government administrator, as a scientific researcher, and as a teacher. His first success as a writer was with the *Testament of the Aga of Koppány* (*Koppányi aga testamentuma*), a youth novel in 1938, which became a movie later. Although his novel, *Cotters* (*Zsellérek*) won the first prize of the University Press, his real calling became evident in the animal story of *Csi*. His novels include *Kele*; *Lutra* (1955); *Fishery* (*Halászat*) (1956); *Thistle* (*Bogáncs*) (1957); *Vuk, Huk*, (both in 1975), and *The Life of Kálmán Kittenberg* (*Kittenberg Kálmán élete*) (1962). His animal novels and short stories are still the most popular ones. The magic of his writings lies in his closeness to nature. His books were translated into a number of foreign languages. He was a recipient of the Attila József Prize (1960) and the Gold Medal of the Order of Labor (1970). – B: 0883, 0878, 1257, T: 3240.→**Kittenberg, Kálmán.**

**Fekete, Jenő** (Eugene) (Veszprém, 5 March 1880 - Budapest, 17 March 1942) – Geophysicist. His higher studies were completed in the University of Budapest. He began work as a demonstrator and from 1905 he was on the scholarship of the Semsey foundation. For 15 years he worked with the famous physicist Lóránd Eötvös. In 1915 Fekete was an appointed geophysicist. From 1919 he was research fellow in the Loránd Eötvös Geophysical Institute (Eötvös Loránd Geofizikai Intézet). From 1923 he worked for the Royal Dutch Shell in Mexico, from 1931 have done land surveying with torsion pendulum. In 1934 he returned to Hungary and took over the leadership of the Geophysical Institute. He introduced new research methods (seismic, electric, etc.). Over the area of Hungary he investigated and interpreted large areas. From 1941 he was member of the Hungarian Academy of Sciences. – B: 2129, T: 7456.→**Eötvös, Baron Loránd; Pekár Dezső.**

**Fekete, Lajos (1)** (Louis) (Újnémet, now Unimat, Romania, 3 August 1900 - Budapest, 10 July 1973) – Poet, journalist, lawyer. He studied Law at the University of Budapest.

After the fall of the Hungarian Council (Soviet) Republic (*Magyar Tanács-Köztársaság*) in August 1919, he left the country and, in 1924, he settled in Yugoslavia. When expelled in 1929, he moved to Budapest and worked at the Institute of Political Sciences of the Hungarian Academy of Science until his retirement in 1961. His writings appeared in Hungarian journals, such as the *Diary (Napló)*, *Revue (Revü)*, and *South Bácska (Délbácska)* in *Voivodina (Délvidék)*, Yugoslavia. In Hungary, his writings were published in the literary review, *West (Nyugat)* and, after 1945, in the journals, *Star (Csillag)*, *Contemporary (Kortárs)*, *Present Age (Jelenkor)* and *Literary Journal (Irodalmi Újság)*. On the other hand, newspapers in Transylvania (now in Romania) and Upper Hungary (Upland, *Felvidék*, now Slovakia) published his poems. His works include *With Iron and Prayer (Vassal és fohással)* poems (1934); *Soaring Time (Szárnyaló Idő)*, selected poems, and *The Exile Looks Back (A bujdosó visszanéz)*, autobiographical notes (1971). He was presented with the Baumgarten Award (1934). – B: 0882, 0878, 1257, T: 7103. → **Hungarian Council (Soviet) Republic.**

**Fekete, Lajos (2)** (Louis) (Tardos, 12 June 1891 - Budapest, 16 May 1969) – Turkologist, historian, paleographer. He served in the army during World War I. Having been crowded together with Turkish prisoners of war he had the opportunity to learn Turkish. After he returned to Hungary, he studied Ottoman-Turkish philology under the eminent Turkologist Gyula (Julius) Németh at the University of Budapest, and also studied Ottoman-Turkish diplomatics under Friedrich Kraelitz at the University of Vienna. From 1929, he obtained honorary lecturer (*privatdozent*) qualification. Until 1938, he worked in the National Archives in Budapest. From 1938 until his retirement in 1966, he worked in the Department of Turkish Philology of the Faculty of Arts at the University of Budapest, from 1952, as professor. At the same time, in 1937, and again in 1939, he acted as an archival expert in Istanbul. He systematically collected and treated the documents of the period of Turkish occupation in Hungary. In the journal, *Archival Proceedings (Levéltári Közlemények)* during the years 1924-1936, he published abstracts from various Turkish documents related to Hungary from the archives of Dresden, Venice and Berlin, as well as from Hungarian archives. He compiled on photocopies and microfilms the one-time Turkish archival material of Buda, held in the Turkish department of the University of Budapest. His work on the siyaquat-script transcription provides a handbook for getting acquainted with this type of Turkish handwriting, the most difficult to read; it provides rich source material for both historians and linguists. He is the internationally recognized expert of Turkish diplomatics and paleography, and also one of the most outstanding researchers of documents from the period of the Turkish occupation of Hungary. He published some linguistic papers dealing with Turkish place names, personal names and Turkish loanwords from the occupation period, present in the Hungarian vocabulary. His works included *Einführung in die osmanisch-türkische Diplomatie der türkischen Botmässigkeit in Ungarn (Introduction to the Ottoman-Turkish diplomacy of the Turkish jurisdiction in Hungary)* (1926), *Budapest in the Turkish occupation period (Budapest a török korban)* (1944), *Sultan Suleyman* (1967), *Einführung in die persische Paläographie (Introduction to Persian Palaeography)* (1977). He was a member of the Hungarian Academy of Sciences (correspondent, 1937, ordinary, 1961); he was also a recipient of the Kossuth Prize (1956). – B: 0883, 1122, T: 7456. → **Németh, Gyula.**

**Fekete, Péter** (Hajdúböszörmény, 6 October 1925 - Jászberény, 2 August 1984) –

Minister of the Reformed Church. He studied Theology at the Reformed Theological Academy, Debrecen (1944-1949), and was Assistant Minister at various places. When he served at the Debrecen-Ispotály Congregation, he protested, together with colleague, Tibor Kovács, against political agitation from the church pulpit. On 3 April 1954, he was put into reserve status, and was under arrest for a while. He came back to ecclesiastical service on 1 July 1956. He worked as Assistant Minister in Szabadszállás, then as Parish Minister in Tiszavárkony (1958-1978) and in Jászberény (1978-1984). His literary work is significant. However, he was never allowed to publish in his lifetime. His areas of interest were practical theology, evangelization, awakening, and the question of sects. His book is: *The Church and the Sect (Az egyház és a szekta)* was published in 1993. He prepared a doctoral thesis but was not allowed to defend it. He received a posthumous doctorate from the Reformed Theological Academy, Budapest in 1993. – B: 0910, T: 7103.

**Fekete, Sándor** (Alexander) (pen-name: Hungaricus) (Miskolc, 11 February 1927 - Budapest, 11 June 2001) – Writer, journalist, literary historian. From 1945, he studied Hungarian and Italian Literature as a member of the Györfly College of University of Budapest. In 1947-1948, he was Secretary of the Vasvári Academy, and in 1948-1949, he taught at the Petőfi Military Academy, and at the Institution for the Education of Handicapped Children. From 1949, he studied at the Communist Party Academy. In 1952-1953 he was Editor of the periodical, *New Voice (Új Hang)*. Between 1951 and 1956, he was a contributor and columnist to the daily, *People's Freedom (Népszabadság)*. In 1956, he was co-worker of the Hungarian Literary Department of the University of Budapest. In 1957-1958, he worked at the Institute of Literary History of the Hungarian Academy of Sciences. He played a role in the rear-guard fight of the Revolution of 1956 and, as a result of his writings under the pen name *Hungaricus*, he was sentenced to nine years' imprisonment. He was freed by an amnesty in 1963. Until 1975, he worked at the Institute of Literary Science. From 1976 to 1989 he worked in various capacities for the periodical, *New Mirror (Új Tükör)*. In his writings, he criticized the Democratic Opposition. In 1988, he was one of the founding members of the *New March Front (Új Márciusi Front)*. He wrote satirical plays and comedies. In some of his books he dealt with the literature of the 19th century Reform Age, and the life of poet Sándor (Alexander) Petőfi. Among his books are *Pál Vasvári*, biography (1951); *István Széchenyi*, biographical novel (1968); *Lajos Kossuth*, novel (1970); *Biography of Sándor Petőfi* (1973); *On the Causes and Lessons of the Uprising of 1956 (Az 1956-os forradalom indítékjairól és leckéiről)* (with pen name Hungaricus) (1989), and *My Memories from the post-1956 Terror-Age (Emlékeim az 1956 utáni terrorkorszakból)* (1996). Among his distinctions are: the Bronze Medal of the Hungarian Merit of Freedom (1947), the Attila József Prize (1973), the State Prize (1985), the Golden Pen (1993), and the Lajos Magyar Prize (1994). – B: 1105, 0878, 1257, T: 7103.

**Fekete, Tibor** (Nagysalló, now Tekovské Luzany, Slovakia, 1934 - ) – Petroleum engineer. He moved with his family from Slovakia to Hungary in 1947, and studied at the Mining Engineering School of the University of Sopron, majoring in Petroleum Engineering. He emigrated to Canada after the 1956 Revolution, and settled in Alberta. He completed his university studies at the University of Alberta, Edmonton, obtained a BSc (1958) and an MSc in Petroleum Engineering (1960). He worked at Dome Petroleum Ltd., conducted reservoir development studies of producing and closed fields, tested

wells, utilizing properties, etc. He has also been involved in studies to determine Canadian gas reserves for export applications, and has testified as an expert witness at hearings at the Energy Board in Calgary. He was owner and President of the T. Fekete and Associate Consultants Ltd., (1973-1981) and Chairman of the Board of Erskine Resources Ltd., an oil and gas exploration and production company (1981-1988). He has been President of his private company, Synerg Resources Ltd. since 1973; he is currently Director of Richland Petroleum Corp., Scarlet Exploration Inc., Crown Joule Exploration Ltd. and Cal-Ranch Resources Ltd. He is a member of the Board of Directors of the Calgary Philharmonic Orchestra, former Director of the Calgary Stampeder Football Club and Hartwell Petroleum Ltd. He has been an active member of the Széchenyi Society Inc. since its establishment in 1966, first as Executive Secretary and now as President. He was a founding member of the Hungarian Research Institute and held the Hungarian Chair at the University of Toronto, 1985. – B: 0893, T: 4342.

**Feketeházy, János** (John) (Vágsellye, now Sala in Slovakia, 16 May 1842 - Vágsellye, 31 October 1927) – Engineer, bridge builder. He completed his higher studies at the Polytechnic of Vienna, and then in Zürich. In 1866, as a trainee engineer, he took part in the planning of the Danube River Bridge at Wien-Stadlau. After the Compromise of 1867 between Hungary and the House of Habsburg, he returned to Hungary and became a member of the Board of Directors of the Hungarian State Railways. He did some outstanding work especially in the planning of iron structures, thereby gaining international recognition. Up to 1912, all the railway bridges of the Kingdom of Hungary were built according to his specifications. Some of his outstanding achievements were the *Liberty Bridge* (*Szabadság Híd*, then called *Ferenc József Bridge*) in Budapest, the *Rotating Bridge* of Fiume (the port of the Kingdom of Hungary, now Rijeka, Croatia), the *Eastern Railway Station* (*Keleti Pályaudvar*), the *Opera House*, and the *University of Economics* (*Közgazdasági Egyetem*) (then the Customs House), all in Budapest and all of them covered with a trussed roof structure. The French *Eiffel Company* built the Bridge over the River Tisza at Szeged according to his plans. The use of his railway turntables and military bridge structures became adopted well outside the borders of Hungary. He retired as chief engineer of the State Railways in 1892. A Hungarian House and a memorial plaque on it bear his name at Vágsellye, Slovakia. – B: 0883, 1424, T: 7456.

**Feldebrő Parish Church** – On the slopes of the Mátra Mountain is a precious work of early Hungarian art. It was first mentioned in the early 13th century. Imre (Emeric) Henszlmann discovered the middle section of the undercroft in 1865. It was the burial site for the priests. Archeological excavations started in 1897. The recent Baroque building has a 20x20 m square base with round-arched apses on three sides. The first reconstruction was during the Romanesque period. The next excavation was in 1964, and experts agreed that the heart of the building was a tomb and everything else was built around it. Originally it was the chapel for a tomb. It was rebuilt and reconstructed a few times before it finally became a parish church. The altar was positioned above the relic pieces of the cross of Jesus, granted by first king of Hungary King István I (St Stephen) (997-1038). The church was dedicated to the Holy Cross. There were two altars at the ends of the tomb. The frescos show Biblical figures and were painted by a painter from Lombardy in the second half of the 12th century. It is one of the unique church buildings of Europe. Most likely it was King Aba Sámuel (1041-1044) who had it built. His burial site was in the monastery. The buildings burned down during the Turkish invasion in the

16th century. The currently standing Baroque church was built in 1744-1745. – B: 1340, T: 7663.→**István I, King (St. Stephen); Aba Sámuel, King.**

**Félegyházi, Tamás** (Thomas) (Debrecen ca. 1540 - Debrecen, 16 January 1586) – Theologian of the Reformed Church, Bible translator. He studied in the early 1560s at the Universities of Krakow, Boroszló, Frankfurt-an-der-Oder, and in 1564 enrolled at the University of Wittenberg. In 1567 he became rector at Mezötúr, and in 1568 he was called to Debrecen. From 1570, he taught at Kolozsvár (now Cluj-Napoca, Romania). In 1573 he returned to Debrecen and became Pastor and Dean in the Debrecen Deanery after the death of Péter Méliusz Juhász. In 1579, the work *Teaching on the Details of the True Christian Faith (A keresztyéni igaz hitnek részéről való tanítás)* was published, reaching four editions. He translated the *New Testament* from Greek, with his annotations. It was published posthumously. He was one of the most highly qualified theologians of the Reformed Church of his time. – B: 0883, 1257, T: 7617.→**Bible in Hungarian; Méliusz Juhász, Péter.**

**Feleki Ballstones** – Sandstone balls found in the brooks and slopes of the Feleki Mountain near the Házsongárd Hills outside Kolozsvár in Transylvania (now Cluj-Napoca, Romania). They were formed by grains of sand around a hard kernel rolled by the waves of the ancient ocean of Tertiary Period (65 million to 2.6 million years). The size of the sandstone balls varies from a few centimeters to 1.5-2 meters, weighing several tons. The great novelist Mór (Maurice) Jókai and, also Sámuel Brassai spoke of the beauty of the “ballstones”, which were considered geological rarities. The distinguished geographer Jenő (Eugene) Cholnoky and others studied them scientifically. The number of ballstones is rapidly decreasing because people are using them for building material, yard paving and gate-marker posts. – B: 1368, 1020, T: 7103.→**Brassai, Sámuel; Cholnoki, Jenő; Jókai, Mór.**

**Feleki, Kamill** (Camillo) (Törökbálint, 21 August 1908 - Budapest, 18 October 1993) – Actor, dancer, choreographer. At the age of 11 he already wanted to be an actor. From 1922 he received private coaching from an artiste in the City Park (*Városliget*) of Budapest. In 1926 he succeeded to gain admission to Szidi Rákosi's School of Dramatic Art and after one year he was already acting in the Király Theater (*Király Színház*) of Budapest. As the favorite of Ella Gombaszögi the actors' world also accepted him. 1929-1931 he was presenting abroad the clever dance-routine entitled *Camillo Feleky* and soon became a celebrated comic dancer. In Budapest he danced also in the Operetta Theater (*Operett Színház*) (1931-1935), in the Comics' Cabaret (*Komikusok Kabaréja*) (1931-1932), in the Royal Orfeum (1933-1934), the Royal Revue Theater (1935-1936), the Comedy Theater (*Vígyszínház*) (1939-1941), the Municipal Theater (*Városi Színház*) (1937-1939), and the Podium Writers' Cabaret (*Pódium Írók Kabaréja*) (1940-1941). He was regular guest on the summer stages in Budapest, such as the Erzsébetváros Theater, Markus Park Stage, etc. (*Erzsébetvárosi Színház, Márkus Parkszínpad* etc.). After World War II during 1945-1949 he played in the Comedy Theater, the Artists' Theater (*Művész Színház*), the Hungarian Theater (*Magyar Színház*), the Inner City Theater (*Belvárosi Színház*), later (1960-1964) in the Modern Theater (*Modern Színház*) and the Petőfi Theater (*Petőfi Színház*) of Budapest. Finally he returned to the Operetta Theater. In between he was also a guest-artist in the József Attila and Madách Theaters. In 1972 he said good-bye to the scene of his greatest successes, the Operetta Theater, though not

forever. He appeared on the stage for the last time on 9 June 1978, but continued playing in films until the end of the 1980s. He spent his last years in great poverty. Because of his small stature, his polished eurhythmics and his characteristic lisp he mainly played the simple, shy, average men. His stage roles included Argan in Molière's *The Imaginary Invalid* (*Le Malade imaginaire – A képzelt beteg*); Peacock in Brecht-Weil's *Beggars' Opera* (*Koldusopera*); Sir Basil Willner – Bodanszky's *Count of Luxemburg* (*Luxemburg grófja*); and Miska in Kálmán's *Csárdás Princess* (*Csárdáskirálynő*). His feature films include *Fairy-tale of Pest* (*Pesti mese*) (1937); *The Siege of Beszterce* (*Beszterce ostroma*) (1948, 1955); *State Department Store* (*Állami Áruház*) (1952), and *My God* (*Uramisten*) (1985). He played also in TV-films, e.g. in *Othello at Gyulaháza* (*Othelló Gyulaházán*) (1966); *Bözsi and the others* (*Bözsi és a többiek*) (1967-1970); *A Hundred-year-old Woman* (*Sázéves asszony*) (1976), and *Tales of Hoffmann* (*Hoffmann meséi*) (1984). Feleki's distinctions include the Merited Artist title (1952), the Kossuth Prize (1953), the Outstanding Artist title (1961), the Prize of the Chicago Film Festival (shared) (1986), and he was made life member of the Budapest Operetta Theater (1991). – B: 1031, T: 7456. → **Rákosi, Szidi; Gombaszögi, Ella.**

**Felkai, Ferenc** (Francis) (Kőrösmező, now Yasina, Carpatho-Ukraine, Ukraine, 1894 - Budapest, 8 December 1972) – Writer, journalist. He completed his secondary education at Nagyvárad (now Carei, Romania). His articles first appeared in Transylvania (*Erdély* now in Romania) and Upper Hungary (Upland, *Felvidék*, now Slovakia). In 1922 he became editor for the *Evening News* (*Esti Újság*) in Budapest. Until 1950 he worked for various newspapers; from 1945-1948, he was Editor-in-Chief of the paper, *Kossuth's People* (*Kossuth Népe*). Felkai first became known for his comedies and dramas in the 1920s, such as *Napoleon*, and *Dream Dragon* (*Álomsárkány*). His dramas were not only interesting stage plays but also politically brave productions during the Hitler years. The play, *Nero*, was a great hit in 1942 for its anti-Fascist stance. It also appeared in French in Jean-Paul Sartre's translation. His other works include *Potyemkin*, play (1943); *Pilatus*, drama (1947); *Three Nights of Cleopatra* (*Kleopátra három éjszakája*), play (1957); *Princess*, play (1959); *Mana*, novel (1939); *Wolf Blood* (*Farkasvér*) novel (1940), and *Before Dawn* (*Hajnal előtt*) novel (1943). A collection of his lighthearted scenes and one-act plays were published in 1957. He received the Medal of Merit of the Hungarian Republic (1946) and the Order of Labor (1964). – B: 0883, 0878, 1257, T: 7617.

**Fellegi, Iván Péter** (Szeged, 22 June 1935 - ) – Statistician. He was Chief Statistician of Canada. His higher studies were at the University of Budapest, majoring in Mathematics. He moved to Canada in 1956, and continued his education at Carleton University, Ottawa, where he earned an MSc (1958), and a Ph.D. (1961). He started his career as a statistician at Statistics Canada, spent 1978-1979 in the US on secondment to President Carter's Commission on the Reorganization of the U.S. Statistical System. In 1985 he was appointed Chief Statistician. He has published extensively on statistics as related to economics, census, surveys, banking systems, simulation and computing. He was President of the Statistical Society of Canada (1982); a member of the Board of Governors, Carleton University (1989-1992); Honorary Fellow of the Royal Statistical Society; Fellow of the American Association for the Advancement of Science. In 1992, he was created a Member of the Order of Canada and was promoted to Officer in 1999. His leadership and innovation have contributed to making Statistics Canada an agency valued for its independence and the quality of its work. He has received the *Médaille de*

*la ville de Paris (échelon vermeil)* and is the first Canadian to be elected President, as well as the first to be named an honorary member of the International Statistical Institute. He is the Fellow of the Royal Society of Canada (FRSC). – B: 0893, T: 4342.→**Fényes, Elek.**

**Fellner, Jakab** (Jacob) (Nikolsburg, Moravia, 25 July 1722 - Tata, 12 December 1780) – Architect. He studied in Germany, moved to Hungary, and settled in Tata. From 1750, he worked mainly for Count Esterházy Family. His first important building was the parish church in Tata. He designed the Lamberg mansion at Mór. Between 1768 and 1774, Fellner designed the Bishop's residence in Veszprém. His last work was the parish church of Pápa. He also did city planning for Eger, Pápa, Veszprém and Tata. He built some 200 buildings, 100 of which still exist. He was one of the masters of the classic late Baroque style in Hungary. Buildings for a School and a Cultural Society bear his name in Tata. – B: 0883, 1105, T: 7663.

**Felnémet, the Nameless of** (16th century) – Catholic priest and poet. He lived in County Heves and wrote *Cantio*, a satirical verse of the “Luther's priests” in 1565. This work is the very first manifestation of the Counter-Reformation movement. The unknown author cleverly retorts to the usual accusations against Catholics. – B: 1136, 1020, T: 3240

**Felső Őrség**, (Western Hungary) – Area forming part of the ancient Őrség region. It was a border-guard region for Western Hungary in Western Transdanubia (*Pannonia* or *Dunántúl*), a belt from north to south along the country's border. Its Magyars settled there during the Carpathian settlement times with the duty of guarding the western parts of the country. This region, called a “gyepű” (marshland), had three lines: (1) Felsőőrvidék gyepű (from Borostyánkő to the valley of the River Rába); (2) Alsóőrvidék gyepű (from the old Lug settlement to the River Mura), and (3) Göcsej, an inner defense line (from Zalalövő). Some of the western parts of the ancient Őrség region now *Burgenland* was ceded to Austria in 1921. Lake Fertő is the remains of an ancient wetland; still earlier in the geological past, it was part of an inland sea. – B: 1369, T: 7103.→**Gyepű; Fertő Lake.**

**Felsőszemeréd, Runic Inscription in the Church** – The entrance of the Late Gothic Catholic church was left without further alteration after its reconstruction in 1700, thus the year number “1482” remained legible on the gate. The contemporary runic writing inscription above the entrance was also saved. István (Stephen) Katona examined the inscription in 1802, then Flóris Rómer in 1864 and the historian of Northern Hungary (now Slovakia), Péter Püspöki-Nagy, in 1968; he and Dezső (Desider) Csallány, a runic script expert, gave two different readings but both agreed that the inscription is in the Hungarian language. – B: 1288, 1314, 1020, T: 7669.→**Hungarian Runic Script; Rómer, Flóris; Csallány, Dezső.**

**Felvidék**→**Northern Hungary** (Upper Hungary, Upland, now Slovakia).

**Felvinczi, György** (George) (cc 1650 - end of 1715) – Initiator of professional acting in Hungary. He studied at the Unitarian Academy of Kolozsvár (now Cluj-Napoca, Romania). In 1669, he was a school principal at Torockó (now Rimetea, Romania). From 1672, he taught at the Reformed College of Kolozsvár. While in Vienna, he applied for an acting permit from King-Emperor Lipót I (Leopold, 1654-1705). According to a Royal Decree, issued on 23 October 1693, he was allowed to hold theater performances in

Transylvania (*Erdély*, now in Romania). After returning to Hungary, he abandoned his acting plans and instead accepted an employment offer from the city of Kolozsvár. In 1693, he published a musical play for schools, the *Comico-Tragoedia*, regarded as the first Hungarian opera. – B: 0883, 1257, T: 7103.

**Fenákel, Judit** (Mrs. Pál Bárdos) (Budapest, 25 June 1936 - ) – Journalist, writer. She received her higher education at the Teacher Training Academy (1954-1957) and at the Attila József University of Szeged (1962). From 1957 to 1962, she taught at a high school. Between 1962 and 1969 she was a contributor to the *County Csongrád Newspaper (Csongrád Megyei Hírlap)*. From 1969 to 1972, she edited the *University of Szeged (Szegedi Egyetem)* newspaper. Between 1972 and 1988, she was chief contributor for the *Women's Magazine (Nők Lapja)*. From 1988 to 2001, she was copy-editor of the *Family Paper (Családi Lap)*. Her main themes are the people of country towns. Her works include *Ten Days in the Countryside (Tíz nap vidéken)* novel (1967); *The Truly Great Lady (Az igazi nagy nő)* novel (1976); *Shame (Szégyen)* novel (1987), and *Man of the Firm (A cég embere)*, novel (2001). – B: 0874, 0878, 1257, T: 7103.

**Fenichel, Sámuel** (Nagyenyed, now Aiud, Romania, 25 August 1868 - Stephansort, New Guinea, 12 March 1893) – Archeologist, ethnographer and naturalist. He studied at the Gábor Bethlen Reformed College, Nagyenyed. In 1888 he worked as trophy-maker at the Veterinary School of Bucharest, Romania. Then he worked at the Romanian Museum of Archeology. In 1891, he went with Albert Grubauer, an ornithologist from Munich, on a collecting expedition to German New Guinea. At the Astrolabe Inlet area he collected ethnographic and natural science material until his premature death, caused by tropical fever. He was buried in New Guinea. Most of his zoological and ethonographical collection, originally containing some 31-36,000 pieces, packed in 35 boxes, was lost after his death; but some 3000 items are preserved at the Hungarian Museum of Ethnography, a unique collection from that area. There are only 38 pieces at the College in Nagyenyed. A memorial plaque was placed in his honor on the wall of the Port Moresby University, Papua, New Guinea. – B: 0883, 1425, T: 7675.→**Herman, Ottó; Biró, Lajos; Madarász, Gyula.**

**Fényes, Adolf** (Kecskemét, 29 April 1867 - Budapest, 14 March 1945) – Painter. First he read Law, but switched to studying painting at the School of Decorative Art (*Mintarajziskola*), Budapest, under Bertalan (Bartholomew) Székely and János (John) Greguss (1884-1887). From 1887-1890, he was in Weimar, Germany for further studies in painting. In 1891, he went to Paris, France for studies at the Julian Academy. Then he returned to Weimar and studied for two years under Max Thedy. Between 1894 and 1898, he attended the Master School of Gyula (Julius) Benczúr, Budapest. After 1898, he spent the summers in Szolnok. Pictures of poor people characterize his early works. At the beginning of the 20th century, he painted genre and still life. Later on Biblical themes became dominant in his art. During and after WW II, he lived in seclusion and hardly worked at all. His first exhibition was in 1895, and the last one in 1949. His art in realism and *plain air* is one of the best. His works include *Day Laborer (Napszámos)* (1990); *Motherhood (Anyaság)* (1902); *Brother and Sister (Testvérek)* (1906); *The River (A folyó)* (1925), and *Restless Times (Nyugtalan idő)* (1929). – B: 0883, 0934, T: 7103.→**Székely, Bertalan; Benczúr, Gyula.**

**Fényes, Elek** (Alec) (Csokaly, now Ciocaia, Romania, 7 July 1807 - Újpest, 23 July

1876) – Statistician. His higher studies were at Nagyvárad (now Oradea, Romania), and Pozsony (now Bratislava, Slovakia), where he read Law. In 1828 he became a lawyer and represented absentee nobles at the Diet of Pozsony (now Bratislava, Slovakia). In 1836 he settled in Pest and studied statistics. He compared the material and spiritual values of the nation to those of foreign countries. His main aim was to win over followers of the reform policy. He held a number of important positions with the *Hungarian National Agricultural Society (Országos Magyar Gazdasági Egyesület)* (1843-1847) and the *Hungarian Industry Society (Magyar Iparegyesület)*. He was charged with organizing and managing the *National Office of Statistics*. For his services on the military court during the War of Independence (1848-1849), he was subsequently imprisoned. After his release, he worked as a statistician. He became the founder of Hungarian statistics. Among his published works are *Statistics of Hungary, vols. i-iii (Magyarország statisztikája, I-III)* (1841-1843); *Ungarn in Vormärz...*(1851); *The Statistics and Geography of the Austrian Empire (Az ausztriai birodalom statisztikája és földrajzi leírása)* (1857), and *Hungary from the Point of View of Statistics, Geography and History, vol i.: Transdanubia District (Magyarország ismertetése statisztikai, földirati és történelmi szempontból I. Dunántúli kerület)* (1866). He was a member of the Hungarian Academy of Sciences (1837). – B: 0883, 1257, T: 7103.→**Fellegi, Iván P.**

**Fényes, Szabolcs** (Nagyvárad now Oradea, Romania, 30 April 1912 - Budapest 11 October 1986) – A prolific composer, theater manager. He privately studied composition with Albert Siklós (1927-1931). In 1931, at the age of 19, he composed the operetta *Maya*, which was an instant success at home and abroad. He was regarded as the man who carries on the task of the great Hungarian operetta composers Lehár, Kálmán, Jacobi, Ábrahám and Huszka. In the thirties, he worked at the UFA Film Studio in Berlin. He was the theater manager of the Operetta House, Budapest, from 1941-1949, and 1957-1960. His body of work contains 45 theater works (operettas, musicals), some 150 film, radio and TV music scores, more than 500 operetta film- and light music scores published together with a number of recordings. He even composed light symphonic music. He was one of the most popular light-music composers of the country. His music is well accepted abroad as well. His works include operettas: *Manolita* (1932); *Mimi* (1935); *Much Ado About Nothing (Sok hűhó semmiért)* (1936); *The Kiss of the Queen (A királynő csókja)* (1943), and *The Old Walnut Tree (Vén diófa)* (1947). He was a recipient of the Erkel Prize (1964), the titles of Merited Artist and Outstanding Artist (1972, 1980). – B: 0883, 1090, T: 7103.→**Lehár, Ferenc; Kálmán, Imre; Jacobi, Victor; Ábrahám, Pál; Huszka, Jenő; Siklós, Albert.**

**Fényi, Gyula S.J.** (Julius) István (Stephen) (Finck) (Sopron, 9 January 1845 - Kalocsa, 21 December 1927) – Priest, astrophysicist, teacher. He graduated at the local Benedictine High School and entered the Jesuit Order in 1864; was ordained in 1877. He worked as a physics teacher at the Archbishopric High School of Kalocsa. In 1880 he was appointed assistant to the newly created Observatory of Kalocsa, where he initially worked with Carl von Braun. Having spent three years teaching at the Order's School in Pozsony (now Bratislava, Slovakia), he returned to the Kalocsa Observatory as its Director between 1885 and 1913. His main interest was solar research, especially solar activities, such as solar prominences, protuberances and sunspots. He made graphic figures and tables of solar co-ordinates. Before regular, high-quality solar photography, his work was regarded as the only database of regularly and visually observed and

recorded phenomena of solar activity. He worked until 1917. He published regularly in contemporary magazines, most often in the *Publicationen des Haynald-Observatoriums* (*Publication of Haynald Observatory*), Kalocsa (1888-1949). Some of his essays are: *Über die am 15 Juni und 30 September 1895 beobachteten Protuberanzerscheinungen* in: *Astronomische Nachrichten* (1896), *On the Solar protuberance phenomena observed on 15 June and 30 September 1895* in: *Astronomic News* (1896), and *Über schwebenden Protoberanzen* (*On floating Protuberances*) (*ibid.*). The new Catholic Jesuit High School, built in 1994 in Miskolc, bears his name. – B: 1008, T: 7103.

**Fenyő, István** (Stephen) (Budapest, 5 March 1917 - Budapest, 28 July 1987) – Mathematician. He studied Mathematics and Physics at the University of Budapest. He obtained a Degree in Chemistry (1942). From 1942 to 1945, he worked as a chemist at various chemical plants in Budapest. Thereafter, he taught in the Department of Mathematics of the Budapest Polytechnic and, until 1948, he was Principal at the Chemistry High School in Budapest. In 1951, he organized the Department of Mathematics at the Electro-Engineering Faculty of the then Technical University, Budapest, of which he became Chairman. (1960-1968). He was a contributor to the Mathematical Research Institution of the Hungarian Academy of Sciences (1952-1962) and counselor at the Kálmán Kandó Technical Academy. His main works include *Mathematics for Chemists* (*Matematika vegyészek számára*) (with Gy. Alexits, 1951); *Integral Equations* (*Integrálegyenletek*) (1957), and *Theorie und Praxis des linearen Integralgleichungen II-IV* (*Theory and use of Linear Integral Equations vols. ii-iv*), with H. W. Stolle (1983-1984) – B: 0883, 1160, T: 7103. → **Fejér, Lipót; Erdős, Pál; Haar, Alfréd.**

**Fenyő, Miksa** (Maximilian) (pen-name Menyhért Balassi) (Mélykút, 8 December 1877 - Vienna, 4 April 1972) – Essayist, critic, writer. He studied law and qualified as a lawyer. In 1904, he became secretary of the *National Association of Manufacturers* (*Gyáripárosok Országos Szövetsége – GYOSZ*). In 1908, he was one of the founders of the journal, *West* (*Nyugat*); later became its publishing director, working hard to get it published for the educated middle class. His literary endeavors made the unfolding of modern Hungarian literature possible; he was also an ardent supporter of the great poet Endre (Andrew) Ady. In the *West* he published impressionistic travelogues and literary essays. His essays appeared in the volume *Casanova*, in 1912. Under the pen name Menyhért Balassi, he wrote articles in the newspaper, *Separate Opinion* (*Különvélemény*). Following the German occupation of Hungary in March 1944, he was hiding in Budapest. He wrote about the last stages of the Second World War, under the title, *The Swept Away Country* (*Az elsodort ország*) (1946). In 1948, he left Hungary and lived in Rome, Paris, then moved to New York, NY, USA in 1953. In 1970, he relocated to Vienna and donated his entire library and manuscript collection to the Hungarian State. – B: 0883, 0878, 1257, T: 7617. → **Ady, Endre.**

**Fenyves, Loránd** (Budapest, 20 February 1918 - Switzerland, 23 March 2004) – Concert violinist, educator. He studied at the Ferenc (Franz) Liszt Academy of Music under Oscar Studer, Jenő (Eugene) Hubay, Leo Weiner and Zoltán Kodály. He earned an Artist's and Teacher's Degree. He emigrated to Palestine in 1936, and became concertmaster of the Palestine Symphony Orchestra, later the Israel Philharmonic. He was one of the founders of the Israel Conservatory of Music and Academy of Music (1940). He founded the

Fenyves Quartet in Tel-Aviv (1940-1956), renamed it the Israel String Quartet in 1948. In 1957, he was invited by conductor Ernest Ansermet to be concertmaster of the *L'Orchestre de la Suisse Romande* in Geneva, Switzerland. He also taught at the Geneva Conservatory of Music. He moved to Canada in 1963, and joined the Faculty of Music at the University of Toronto in 1966. He was coach and teacher of the Oxford String Quartet, and performed extensively as a soloist with major orchestras in Europe and North America. In 2003 he still taught at the University of Toronto and at the Glenn Gould School of the Royal Conservatory of Music, Toronto. He was an outstanding performer and gifted teacher, who turned out some excellent musicians. Fenyves taught for years at the Banff Centre of the Arts in their Chamber Music Summer Programmes, and also held Master Classes at the Academy of Music in Budapest. He was considered to be one of the greatest violin teachers in the world. He was a recipient of the Hubay Prize and the Knight's Cross of the Order of Merit of the Republic of Hungary in 1998. – B: 0893, 1403, T: 4342. → **Hubay, Jenő; Kodály, Zoltán; Weiner, Leó.**

**Ferdinándy, György** (Georges) (Budapest, 11 October 1935 - ) – Writer, critic. His higher studies were at the University of Budapest (1956), where he studied French Literature, and also at the Universities of Strasbourg and Dijon, France (1957-1969). He worked at the Bus Transport Co., Budapest (1954-1956). From 1956 to 1964, he worked as a mason, Russian translator and bookseller in France. From 1964, he was professor at the University of Puerto Rico. He published the literary review, *Sad Sunday* (*Szomorú Vasárnap*) (1964-1970). From 1976 to 1985, he was an external contributor to *Radio Free Europe* (*Szabad Europa Rádió*). He is member of the French Writers' Association and the International Hungarian Philology Society. In 1910, he returned to Hungary and settled in Budapest. His works include *L'île sous l'eau*, stories (1960); *On a Conveyor Belt* (*Futószalagon*) stories (1965); *Itinéraires*, stories (1973); *The Lost Child* (*Az elveszett gyermek*) stories (1964); *The French Groom* (*A francia vőlegény*) stories (1993); *An Old Place* (*Egy régi placc*) stories (1999), and *One plain, one inverse* (*Egy sima, egy fordított*) novel, (2010). He received a number of prizes, among them the Del Duca Prize (1961), Saint-Exupery Prize (1964), Attila József Prize (1995), the Sándor Máray Prize (1997), and the Gyula Krúdy Prize (2000). – B: 0874, 1878, 1257, T: 7103.

**Féregyháza Gold Find** (now Firiteaz, Romania) – Also known as the “Féregyháza-treasure”. It contains, among other items, 16 heavy gold bracelets, the largest weighing 330 grams. The bracelets belong to the oldest and longest-lasting period of the Bronze Age (3500 – 1200 BC), showing similarities even with the ones in the “Fokoru treasure” of the Hallstatt Period (8th - 6th century BC). Besides the bracelets, 13 torques, 2 fibulas, a pectoral breastplate, various size buttons, and an embossed metal plate-belt were added from this find to the collection of the Hungarian National Museum. – B: 1078, 1020, T: 7617.

**Ferenc József, Emperor and King** (Franz Joseph), (Schönbrunn, Austria, 18 August 1830 - Schönbrunn, 21 November 1916) – Emperor of Austria, and King of Hungary from 1867. He ascended the throne in 1848 as a strong-willed, eighteen-year-old son of Princess Sophia, after the Austrian Camarilla deposed the weak-minded Emperor Ferdinand V. The Hungarians at that time fought their War of Independence against Austria and did not acknowledge his accession. Only nineteen years later, after the *Compromise* (*Ausgleich*) of 1867 did Hungary acknowledge him as her crowned king.

His reign started with the brutal ending of the 1848-1849 War of Independence. In 1849, the Constitution of Olmütz terminated all nationalistic tendencies in Hungary. The Austrian defeat, suffered at the hands of the Italian army in 1859, forced the regime to ease up slightly and issue the “October Diploma” in 1860, which provided Hungary with a measure of internal autonomy. Further defeat from the Prussians in 1866 created a crisis, and forced Austria to initiate a conference with Hungary that resulted in the Compromise Treaty in 1867, which led to a dualistic monarchy. The Emperor of Austria, accompanied by his Empress, Elizabeth, was crowned King of Hungary on 6 August 1867. The dualism was regarded as final and the emperor-king fought hard to maintain it. He issued an order at Chlopy, Galicia in 1903, to keep the unified army and also wished to extend the Austro-Hungarian influence to the Balkans. He was

confronted by the expansionist tendencies of Russia. He forged a dual alliance with Germany earlier in 1879 and, when Italy joined in 1882, it became a triple alliance. This proved to be the prologue to World War I. In 1914, the King was pressed by the Austrian government (and opposed by Hungarian politicians) to declare war on Serbia for the assassination of the Archduke Franz Ferdinand, heir to the throne, and his wife, at Sarajevo. Ultimately, the war swept away the Habsburg realm along with King St István's (St Stephen) Hungary. There were great tragedies in his personal life. His son Rudolf allegedly committed suicide; his brothers died tragically; his wife, Elizabeth, was assassinated. Some romantic legends suggest he was being cursed for his role in the execution of 13 Hungarian generals at Arad (now Arad, Romania) along with others, and sending many participants to prison after the War of Independence in 1849. He was partly responsible for the outbreak of World War I. – B: 0883, 1288, T: 3312.→**Freedom Fight of 1848-1849; Arad, Martyrs of; October Diploma; Compromise of 1867; Erzsébet, Queen; Károly IV, Emperor and King; World War I.**

**Ferencsik, János** (John) (Budapest, 18 January 1907 - Budapest, 12 June 1984) – Conductor. He studied organ and harmony with a church organist, later composition with László (Ladislás) Lajtha, and organ playing at the National School of Music, Budapest. He was the repetiteur and conductor of the Opera House, Budapest (1927-1930); assistant to Toscanini at the Bayreuth Festivals (1930-1931), where he conducted Liszt's *Legend of St Elizabeth* on the 50th anniversary of the death of Ferenc (Franz) Liszt; and the farewell concert of Béla Bartók and Ditta Pásztory in 1940, in Budapest, before they emigrated to the United States. He introduced Bartók's opera, *The Miraculous Mandarin* (*A csodálatos mandarin*), in the La Scala Opera House, Milan in 1942, three years before it was debuted in Budapest. He was conductor at the Opera House, Vienna (1950-1953); of the Philharmonic Society of Budapest, later the State Concert Orchestra, from 1960 until his death in 1984. His recordings won international prizes. He was one of the outstanding personalities of Hungarian musical life and recipient of many awards in Hungary and abroad, including twice the Kossuth Prize (1951, 1961), the titles of Meritorious Artist (1952) and Outstanding Artist (1954) and the Bartók-Pásztory Prize (1986). A Memorial Prize bears his name. – B: 0883, 0938, T: 7103.→**Liszt, Ferenc;**

**Bartók, Béla; Lajtha, László.**

**Ferenczi, Sándor** (Alexander Fränkel) (Miskolc, 7 July 1873 - Budapest, 22 April 1933) – Psychoanalyst, physician, colleague and close friend of Sigmund Freud. He was the eighth son of a family of Polish Jews, immigrated to Hungary in 1830. He attended the Protestant School, Miskolc. Thereafter, he studied Medicine at the University of Vienna and obtained an M.D. degree in 1894. He entered military service in 1896 and, in 1897, worked at the hospital St. Roch, where he wrote his first pre-analytical articles. In 1898, he worked at a hospital in Budapest. He met Sigmund Freud in 1908, became his friend, and a member of Freud's inner circle, the Vienna Psychoanalytic Society. In 1913, he founded the Hungarian Psychoanalytic Society and began teaching psychoanalysis at the University of Budapest in 1919. First, he followed the Freudian method of psychoanalysis; however, later their ways diverged and Freud eventually criticized his method. Ferenczi argued that recovery of traumatic memories was not absolutely essential for altering the patient's behavior. He also emphasized the childhood trauma in personality development and the contribution of the analyst's personality to the treatment process. He insisted the need for therapists to create a loving, permissive atmosphere. His field of research included the study of the personality, the psychopathology of neurosis, therapeutic techniques and psychoanalytic theory. He was in contact with other leading psychoanalysts of his time, including Carl Gustav Jung, Michael (Mihály) Bálint. He was a longstanding President of the International Psychoanalytical Association (IPA). He wrote many articles and books, including *Thalassa. A Theory of Genitality* (1899); *The Development of Psychoanalysis* (with Otto Rank) (1924), and *The Correspondence of Sigmund Freud and Sándor Ferenczi, vols. i, ii* (1994, 1996). He was a pioneer in the development of the widening scope of psychoanalytic theory and technique, and belongs to the classical representatives of the psychoanalytic movement. He is regarded as the father of humanistic psychology. There is a Sándor Ferenczi Fellowship, successor to the Sándor Ferenczi Society, Budapest (1933). A minor planet the *Ferenczi* (1994 PP<sub>39</sub>) was named after him. – B: 0881, 1311, T: 7103.→**Hermann, Imre; Buda, Béla; Gyökössi, Endre; Bodrog, Miklós.**

**Ferenczy, Béni** (Benji) (Szentendre, 18 June 1890 - Budapest, 2 June 1967) - Sculptor and graphic artist, son of Károly (Charles) Ferenczy. He studied art in Munich and Paris. His art matured after his return from Germany and the Soviet Union. After his experiences with cubism first, and with expressionism later, his art evolved in sculptures with emphasis of forms. His black and white or colored illustrations made him one of the best Hungarian graphic artists. His works include *Dancer (Táncos)* (1916); *Sower (Magvető)* (1927); *Rearing Horse (Ágaskodó ló)* (1936); *Lovers (Szerelmespár)* (1936); *Prodigal Son (A tékozló fiú)* (1956) and *Standing Boy (Álló fiú)* (1963). He also illustrated a number of books. He was awarded the titles of Merited Artist, Outstanding Artist, and the Kossuth Prize. – B: 1445, 3240, T: 3240.→**Ferenczy, Károly; Ferenczy Noémi.**

**Ferenczy, István** (Stephen) (Rimaszombat, now Rimavská Sobota, Slovakia, 24 February 1792 - Rimaszobat, 4 July 1856) – Sculptor. He studied in Vienna and Rome, where he spent 6 years. Among his teachers were Antonio Canova and Bertel Thorwaldsen. His main field was bust of famous persons in marble or in stone. One of his outstanding works is the bust of poet Ferenc (Francis) Kazinczy. His works include

altarpieces and sepulchers as well as clay figures. He was a characteristic representative of classicism. – B: 0872, 0883, T: 7103.→**Kazinczy, Ferenc.**

**Ferenczy, Károly** (Charles) (Vienna, 2 August 1862 - Budapest, 18 March 1917) – Painter. In 1884 he gave up his law and agriculture studies and started studying art, first in Rome and Munich, then for two years he was a student at the Julian Academy, Paris, France. He painted his first work in Paris. In 1896, he went with other artists to Artist Colony of Nagybánya (now Baia Mare, Romania), where he settled for a longer period of time and created his unique style, typical of the local trend. In 1906, he became Professor of Art at the Academy of Fine Arts, Budapest, where he taught portrait painting. His work shows different stages and styles, dependent on the time and location where he painted them. In Munich he followed the descriptive method of Nagybánya, while *plein air* was his style; and later he was interested in Post-Impressionism. Some of his works are: *Sermon on the Mount (Hegyi beszéd)*; *2 variations* (1897-1897); *The Magi (Három királyok)* (1898); *Chestnut Trees (Gesztenyfák)* (1900); *Summer Morning (Nyári reggel)* (1902); *Church (Templom)* (1903), and *Removal from the Cross (Levétel a keresztről)*. He was one of the most prominent Hungarian impressionist painters, one of the 20th century's eminent personalities, and promoter of the Art School of Nagybánya. – B: 0883, 1124, T: 7653.→**Farkas, István; Ferenczy, Béni; Frenczy, Noémi; Iványi Grünwald, Béla; Hollósi, Simon; Nagybánya Artist Colony.**

**Ferenczy, Noémi** (Naomi) (Szentendre, 18 June 1890 - Budapest, 20 December 1957) – Painter, Gobelin and tapestry artist. She was the daughter of Károly (Charles) Ferenczy, painter, and sister of Béni (Benji) and Valér (Valerian) Ferenczy. She learned to draw from her father, but studied the technique of tapestry in the *Manufacture des Gobelins*, Paris in 1913. She completed her studies at Nagybánya, (now Baia Mare, Romania) 1913. Her first works of weaving were the *Creation (Teremtés)* (1913), and *Escape to Egypt (Menekülés Egyptomba)* (1917). She not only created her own designs but also wove them. She made experimentation with ceramics, glass-painting designs and embroidery. From 1920 on, her composition and forms became simpler yet larger. In 1945, she became teacher at the Academy of Applied Art, Budapest, and participated in numerous exhibitions in Hungary as well as abroad. Some of her other works are: *Rotten Tree (Korhadat fa)* gobelin tapestry (1923), and *Woman Gathering Brushwood (Rőzsészedő nő)* (1924). She established tapestry-work in Hungary and was an internationally renowned artist. – B: 0883, 1124, 1360, T: 7103.→**Ferenczy, Béni; Ferenczy, Károly.**

**Fertő-Hanság National Park** – A National Park of 23,600 hectares in northwest Hungary, officially established on 24 April 1994. The shallow alkaline Lake Fertő, ringed with reed-beds (*Phragmites australis*) and located on the Austrian-Hungarian border, is an aquatic habitat of European significance. At the same time, on the Austrian side, another new park was recognized under the name of *Neusiedlersee Seewinkel National Park*. The Hungarian portion has been protected as a nature reserve since 1977, recognized by the UNESCO as a “Biosphere Reserve”. Between the two countries, a working committee was established in 1988, and was sealed with a ministerial agreement in 1990. Both nations set up separate land management agencies to maintain the natural integrity of the delineated land unit. In addition to the protected and rare flora, it is also home to many endangered amphibian and reptilian species. It boasts a very rich stock of waterbirds. Early Hungarian domesticated animals - gray cattle (*Bos taurus taurus*)

*boianus vanetas hungaricus*), “Racka” sheep (*Ovis aries strepsiceros hungaricus*) - and herds of buffalo graze the Puszta grasslands around the lake. The *Madárvárta* Ornithological Station and Study Center, built on the lakeshore, has an important role in nurturing environmental and nature protection awareness among the younger generation. As a result of human intervention - draining, peat cutting - the majority of the formerly interconnected huge wetland of Lake Fertő has been modified (for human use), although the characteristic species of flora and fauna and the unique landscape itself have successfully been preserved. One of the tasks of the National Park is to preserve the ethnographic features of the one-time marshland. Animals grazed on the meadows as late as the first half of the 20th century; the fishermen, marsh dwellers and crab fishermen wove wicker fish-traps, baskets and fashioned footwear, wall protectors and bags from rushes and sedge. In short, this region provided them with a livelihood.

On the Hungarian side, the Park has five natural landscapes: (1) The largest of these, the open water surface of Lake Fertő, northeast of the city of Sopron, also includes some wetlands, dominated by reeds (*Typa spp.*) and sedges (*Carex spp.*). (2) The next unit is located north of the town of Kapuvár, containing alder (*Alnus spp.*), dominated by bog lands and some sedge- and grass-dominated lands, known in Hungarian as Csikós-Eger (*bog*) and Tétényi and Oslí-Hány (*fens*). (3) This area is south of the city of Moson-Magyaróvár and it has moist grasslands, fens and minor bogs with willows. (4) This is the eastern shore of Lake Fertő, close to the village of Győrsövényház and Lake Barbacsi beside the village of Kóny. These areas represent natural wetlands and in some parts these are land reserves to maintain areas where characteristic management systems have evolved culturally and historically. The third objective is to protect fragile lakeshores from uncontrolled human exploitation. Throughout this area, bird watching stations and nesting spots are common; and at its administrative center at *Kócsagvár*, there is a nature museum, Central Europe’s largest reed roofed building complex.

*Fertő Lake National Park (Neusiedler See National Park* – This is a part of the Fertő-Hanság Region and constitutes an Austrian and Hungarian common national park on the eastern and southern shores of the lake. It includes extensive wetlands and hay fields. This area is Central Europe’s largest bird sanctuary along major migratory bird flyways. – B: 1370, 1153, 1546, T: 7656, 1546.

**Fertő Lake** – A lake of approximately 335 km<sup>2</sup> surface area and 1-1.5m depth between Western Hungary and Austria. Its length is 36 km and width is 6 to 12 km. Reeds and bulrushes densely colonize its shores. The water level of this lake has shown great fluctuation in the last 200 years; in 1867 it became completely dry, then it filled up again. The northern 4/5 of the lake became part of Austria by the Dictated Peace Treaty of Versailles-Trianon (1920), while the rest belongs to Hungary. Due to its closeness to Vienna, its northern shores are well developed for tourism. Because of the existence of the Iron Curtain between 1948 and 1989, the Hungarian population was given limited access to the southern shores, thus the area remained undeveloped. More recently, about 10,000 tourists visit the lake on summer weekends. – B: 1105, 1153, 1372, T: 7656. → **Felső Órség.**

**Fessler, Ignác Aurél** (Ignatius Aurelius) (Zurány, now Zürndorf, Burgenland, Austria, 18 May 1756 - St Petersburg, 15 December 1839) – Church prelate, historian. His parents intended a monastic life for him. At the age 4, he already wore the habit of the Jesuit Order and, at 16, he wrote a prayer book in Latin. Following his education in Pozsony

(now Bratislava, Slovakia) and in Győr, he entered the Capuchin Order. He resided in the Order's monastery in Vienna, then in that of Mödling. One night, when he was sent to a secret cave to administer the last rite to a dying Hungarian monk, he found out that there were other fellow monks confined there for minor sins, some for as long as 50 years. Six of them had already gone mad. Next day, the shocked Fessler wrote an indignant letter to Emperor Joseph, who not only ordered the inspection of the Mödling monastery, but all other monasteries as well. Fessler was the first Capuchin monk to obtain a Ph.D. at the University of Vienna, where he worked. He later moved to Máriabesnyő. Here, he wrote the second book of his 10 volumes, *The History of Hungary and its Feudal Lords (Die Geschichte der Ungarn und ihrer Landsassen)*. Eventually he left the Order. His fellow monks tried to kill him the day before he left. He taught Oriental Languages at the University of Lemberg (now L'vov, Ukraine) in 1784, but eventually lost this position, having written a play of a liberalist nature. He switched religion and became a Protestant in 1791. He taught Oriental Languages and Philosophy in St. Petersburg, Russia. In 1810, he founded a Reformatory School in Saratov. In 1820, he became the Lutheran Superintendent of the Saratov area, followed by the position of Chief Superintendent of Russia in 1833, with a St Petersburg residence until his death. The scope of his main work was the Middle Ages in Hungarian history. It is an important work from the cultural historical standpoint. He wrote several historical, mystical and psychological novels, the most successful of them about King Mátyás I (Matthias Corvinus, 1458-1490). He contributed to the awakening of Hungarian national feelings at the turn of the 17-18th century. – B: 0883,1078, 1020, T: 3240.→**Mátyás I (Matthias Corvinus), King.**

**Festetics Codex** – A Codex written around 1403 on parchment in unique Gothic script. It is a 12-layered breviary and an invaluable Hungarian linguistic record. It was copied at the Monastery of the Paulist Order of Vázsony for Benigna Magyar, wife of Pál (Paul) Kinizsi, and was ornamented with illuminated initials and coats-of-arms. It is considered to be the most beautiful Hungarian manuscript. Among others, it contains the Hymns of Maria and the Seven Psalms of Penitence. The Festetics family kept it for a long time, hence the name. Now it is held in the Széchényi National Library, Budapest. – B: 1150, 1078, T: 3240.→**Czech Codex; Codex Literature, Festetics, Count György; Kinizsi, Pál.**

**Festetics, Count György (George)** (Ság, 1 January 1755 - Keszthely, 2 April 1819) – Landowner, magnate, founder of the Keszthely *Georgikon* and *Keszthely Helicon*. He studied at the *Theresianum* in Vienna until the age of 18. He served in the army as lieutenant-colonel of the Graeven Hussar Regiment. Together with a few of his fellow officers, he requested from the Parliament that the Hungarian regiments be kept at home in Hungary, together with the use of the Hungarian language in the army. King Lipót II (Leopold, 1790-1792) considered him dangerous and transferred him to Belgium as a punishment. In turn, he gave up his rank in 1791, and retired to his family estate at Keszthely. Because of his opposing role in County Zala, King Ferenc I (Francis) removed him from the Office of Chamberlain and banished him from the court. He supported national cultural endeavors generously. He observed the backwardness of Hungarian agriculture at his own 230-thousand acres. He invited János (John) Nagyváthy to be his estate manager in order to enhance production. He established model farming at Csurgó, and created Europe's first agricultural college, the *Georgikon* (at Keszthely, near the

western end of Lake Balaton) on the advice of Nagyváthy in 1797, adding 1278 acres of land as a gift for educational farming purposes. He brought to life the Helicon Festivals in 1814, with the assistance of the most eminent writers and scholars of his time. He was a great patron of the sciences and member of the Göttingen Science Association. – B: 1153, 0883, 1150, 1078, T: 7675.→**Nagyváthy, János.**

**Feszl, Frigyes** (Frederick) (Pest, 20 February 1821 - Budapest, 25 July 1884) – Architect. He was an outstanding master of European romantic architecture; began his studies in Budapest, then continued them in Munich between 1839 and 1841. Afterwards, he went to Italy to study Italian architecture. In 1845, Feszl settled in Budapest. The same year a competition was announced for a Parliament Building in Budapest. He sent in a romantic style design and won first prize, although his design was never used. His most important project was the *Vigadó*, built between 1859 and 1864, which was badly damaged during World War II, but later restored. – B: 0883, 1105, T: 7663.

**Feszt V. László** (Ladislav) (Kolozsvár, now Cluj-Napoca, Romania, 17 October 1930 - ) – Graphic artist in Transylvania (*Erdély*, now in Romania). He graduated from the Andreescu Academy of Fine Arts, Kolozsvár (1954). He was a lecturer, assistant professor, then leader of the same Academy from 1962 until his retirement in 1990. He was on scholarship in Hungary and on study trips to Russia, Poland, Czechoslovakia, Yugoslavia, Austria and Switzerland. Jenő (Eugene) Barcsay and the Szentendre artist colony influenced his collage art. He introduced calligraphy to Hungary around 1965. He works in a constructive surrealistic style. His works include *Spirit-ship (Lélekhajó)* (1969); *Meeting of Cultures (Kultúrák találkozása)* (1993); *Mecano Wall (Mecano fal)* (1998), and *The Fall (Bűnbeesés)* (1998). He had more than 50 exhibitions at home and 55 international ones, including Kolozsvár (1964, 1969), Bucharest, Romania (1966, 1969, 1970), Saint Laurent du Pont, France (1968), Budapest (1970), Grenchen, Switzerland (1972), Estense, Italy (Padova) (1973), Frederichshafen, Germany (1974), Vincenza, Italy (1974), Aalborg, Denmark (1974), Helsingor, Denmark (1974) and Pécs, Hungary (1991). He is a member of the 24 International Fine Arts Groups, among them the National Fine Arts Association of Romania; Hungarian Fine Arts and Applied Arts Association of Budapest, and the Hungarian Graphic Artists Association. He was a recipient of many prizes and awards, among them the Pro Culture Medal (1968), the Gold Medal of the Olympia of Arts, Padua (1966) and the Ex Aqueo Prize (1979). – B: 1036, 1090, T: 7103.→**Barcsay, Jenő; Szentendre Artist Colony.**

**Feszty, Árpád** (Ógyalla, now Urbánovo, Slovakia, 24 December 1856 - Lovrana, Italy, 1 June 1914) – Painter. He was only 16 years old when he joined a touring actors' group but was always attracted to painting. In 1874 he went to Munich, where he was more preoccupied with visiting the art galleries than with his own studies. The Hungarian Government granted him a two-year scholarship. In 1878, he took part in an international exhibition in Paris. After a short stay in Hungary, he went to Vienna on a scholarship for three years. His focus was oriented toward religious and historical subjects and he was often commissioned to do such decorative scenes. In 1880, his painting, *Golgotha*, caused a sensation. Of his genre paintings, the best known is *Accident in a Quarry (Bányászerezéltenség)*. In 1885, he was commissioned to paint the interior of the National Theater and the interior of the Opera House in Budapest. He and some other artists painted the monumental historical cyclorama, *The Entry of the Hungarians – A*

*Magyarok bejövetele*) (1892-1894), which made him famous. The painting was heavily damaged during World War II; it was restored and permanently exhibited in Ópusztaszer. He also lived in Florence, where he painted *The Burial of Christ* (*Krisztus temetése*). In Hungary, he did mostly genre painting. His works are in the Hungarian National Gallery, Budapest. – B: 0883, 0934, 1257, T: 7653.→**Feszty Cyclorama**.

**Feszty Cyclorama** – *The Entry of the Hungarians* (*A Magyarok bejövetele*; into the

**Detail from the Feszty Cyclorama: Entry of Árpád**

Carpathian Basin in 896) is Árpád Feszty's best-known work of art. Created between 1892 and 1894 for the Hungarian-Millennium celebration in 1896, and was exhibited at the Art Gallery, especially designed and built in a record time by his architect brother, Gyula (Julius) Feszty. Before he started the painting, Feszty

studied the circumstances of this important historic event, for he wanted to illustrate it as authentically as possible. He went to the library, looked into the Asian clothing and weaponry from that particular time; he corresponded with Russian historians and, in 1892, went to the Verecke Pass (in the Carpathian Mountains, now in Ukraine) to make some on-site sketches. With three partners, he then built a small, four-windowed cabin, one window on each wall, and from there he drew the surrounding scenery: the snowy mountains of Szolyva, the mountain at Munkács (now Mukacheve, Ukraine, with the river and the noted places), the valley of the River Latorca, and the slopes of Verecke Pass. When finished, he put the paintings together, and there he had the full picture of the area with almost 2000 figures. The total surface is 1760 m<sup>2</sup>, 120 m long and 15 m wide. The picture is on Belgian canvas, woven in one piece. Feszty needed two years to complete his work. The background, the sky and clouds alone took Feszty two months to paint. He painted the main figures (tribal leaders), standing on top of the hills, and he included his self-portrait as Árpád, the Leader of the Magyars. He also painted the wagons, the steers and oxen. More than 20 artists worked with him on several stories high scaffolds that moved on rails. From time to time, they had a music band for entertaining, conducted by Pista (Stevie) Dankó to help them not to fall asleep on the scaffolds. On this huge canvas they used 1000 kg of paint. The painting was unveiled on 12 May 1894, and for years afterwards, it was the main attraction in Budapest. Thousands of visitors admired it. The theme of the mural includes six major events: “the leaders”, “the attack on horseback”, “the sacrifice of the white horse”, “the leader of the camp”, “the abduction of women” and “the moving of the multitude paint. The painting was

unveiled on 12 May 1894, and for years afterwards, it was the main attraction in Budapest. Thousands of visitors admired it. The theme of the mural includes six major events: “the leaders”, “the attack on horseback”, “the sacrifice of the white horse”, “the leader of the camp”, “the abduction of women” and “the moving of the multitude of families”. Feszty blended these themes so well into each other that the viewer has a continuous, uninterrupted picture to follow the events. The painting was a great success, not only in Hungary, but at the London exhibition as well. In 1909, the work returned from its European tour and had a new permanent home in Budapest. In 1945, the host building was bombed and most of this famous work burned in the fire. The parts found later were stored away for years until finally, the National Gallery took care of it and started the conservation and restoration work in 1975. of families”. Feszty blended these themes so well into each other that the viewer has a continuous, uninterrupted picture to follow the events. The painting was a great success, not only in Hungary, but at the London exhibition as well. In 1909, the work returned from its European tour and had a new permanent home in Budapest. In 1945, the host building was bombed and most of this famous work burned in the fire. The parts found later were stored away for years until finally, the National Gallery took care of it and started the conservation and restoration work in 1975. Between 1991 and 1995, a group of Polish artists restored the entire painting. During the millecentenary celebrations commemorating 1100 years of occupation of the Carpathian Basin by the Hungarians, on 14 July 1995, the painting was unveiled again at its new place in Ópusztaszer, County Bács.– B: 1502, 1031, T: 7653.→**Feszty, Árpád; Mednyánszky, Baron László; Vágó, Pál; Millennium.**

**Fettich, Nándor** (Ferdinand) (Acsád, 7 January 1900 - Budapest, 17 May 1971) – Archeologist, goldsmith. He completed his education at the University of Budapest, where he received his Ph.D. in Art (1921). He studied flute at the Ferenc (Franz) Liszt Academy of Music, Budapest (1921-1923). Before World War II, he visited the largest Great Migration Period collections in Soviet Museums; then traveled to the Kama and Perm regions, important areas for Hungarian historical research. In 1941, he was appointed Director of the National Museum (*Nemzeti Múzeum*). On 14 August 1941, during World War II, together with Gyula (Julius) László, he transferred the archeological treasure collection of the Ukrainian National Museum in Kiev to a safe place, where it survived the War. Fettich lectured at foreign universities and international archeological conferences. During the siege of Budapest, he successfully protected the collection of the National Museum. Between 1950 and 1954, he worked as a laborer’s assistant. In order to keep abreast of the metal working techniques of the peoples of the Great Migration Period, and to improve his own situation at the same time, he learned the goldsmith’s trade. His artistic creations became sought-after items. With his collection, he took part in the Brussels World Fair, in 1957. He received decorations and prizes from the Hungarian Government for his unique creations; that made it possible for him to continue his archeological work. After 1954, he made a study of prehistoric wagon-models, and successfully clarified the development of the different prehistoric wagon types in the Carpathian Basin. As a last endeavor, he collected religious magic incantations, still present in Hungarian folk belief. He traveled through the River Rába region of Hungary, from Meszlen to Kondorfa, and finally, he had 114 ancient prayers in his collection. He published more than 100 essays and monographs. His main works are: *Avar Age Decorative Art in Hungary (Az Avarkori műipar Magyarországon)* (1926);

*Bronzeguss und Nomadenkunst (Bronze casting and nomadic art)* (1929), and *Hungarian Styles in Applied Art, vols. i,ii,iii (Magyar stílusok az iparművészetben, I,II,III)* (1943-1947). He was a member of the Hungarian Academy of Sciences and the Finno-Ugric Society, Helsinki. He was recipient of the Cavalier Cross of the Finnish Lion Order of Knights (1969).– B: 1404, 0883, T: 7617, 7103.→**László, Gyula.**

**Fiala, Ferenc** (Francis) (Kolozsvár, now Cluj-Napoca, Romania, 19 December 1904 - Saarbrücken, Germany, 14 September 1988) – Politician, journalist, swordsman. After obtaining a degree in Architecture from the Budapest Polytechnic, he went to Munich and Paris for further studies. From 1932-1934, he was a writer of political articles, and Associate Editor of the daily, *Hungarians (Magyarság)*; from 1934, the Associate Editor of *New Hungarians (Új Magyarság)*. He was the originator of the National Socialist Movement in Hungary; also Head of the press-service of the right-wing Arrow Cross Party. In 1944, he became Head of the Press Department of the Arrow Cross Party, Editor of the paper, *Solidarity (Összetartás)*, and political a principal contributor and writer of leading articles of the papers *Pest News (Pesti Újság)* and *Hungarians (Magyarság)*. When Hungary came under Soviet military occupation and Communist rule in 1946, the People's Tribunal sentenced him to death; then later it was commuted to life imprisonment. In the 1956 Revolution and Freedom Fight he was freed in October and emigrated to (then) West Germany, where he worked as the Editor of the papers *Hungarian Unity (Magyar Egység)*, *Collaboration (Összefogás)*, *Bridge-head (Hídfe)* and *New Bridge-Head (Új Hídfe)*. Fiala was also a successful fencer. From 1927 to 1944, he was a swordsman of the Hungarian Athletic Club (*Magyar Atlétikai Club – MAC*). In 1930, as a member of the Saber Team, he became College World Champion in individual competition gaining 2nd place. In 1932 and 1933, he was member of the Hungarian Champion Saber Team. His works include *Ungarn in Ketten* (1957), *Berkes and the Monk (Berkes és a szerzetes)* (1979). Remained in manuscript forms: *Biography of Ferenc Szálasi*, and *History of the Hungarian National Socialist Movement*. – B: 0883, 1160, T: 7456.→**Szálasi, Ferenc.**

**Fiala, János** (John) (Temesvár, now Timișoara, Romania, 26 January 1822 - San Francisco, 8 December 1911) – Engineer. He served as colonel in the Hungarian War of Independence of 1848-1849. In America, he fought on the Union side in the Civil War as a military engineer. His military training started in Graz, Austria and he served on the staff of General Antal (Anthony) Vetter. In the Hungarian War of Independence (1848-1849), he took part in the defense of Fehértemplom, and fought in many other military engagements. After the armistice of Világos he accompanied Governor Lajos (Louis) Kossuth to Turkey, where he continued serving as *aide-de-camp* to General Bem until Bem's death. Then he emigrated to France with many of his comrades to offer his services to the French Republic. Soon after the *coup d'état* of Napoleon III, he went to the United States. He worked there as a railroad engineer and the first accurate map of the state of Missouri was his achievement. He took part in the Civil War under the Union flag. He also prepared the fortification plan for St Louis. After the Civil War he wrote several articles in various American newspapers about the Hungarian War of Independence and about the last days of General Bem. In San Francisco, he established the Hungarian Society of Mutual Assistance. – B: 1078, 1153, T: 3233.→**Kossuth, Lajos; Bem, József.**

**Fiáth, János** (John) (1653 - 1724) – Hajdú (insurgent) major, deputy-lieutenant, one of the many heroes of the re-conquest of Buda from the Turks. On 2 September 1686, at the final attack on the fort of Buda, he headed 600 *Hajdús* of Győr, who broke into the fort and he became the first man to plant the Hungarian flag on the northwest tower of Buda. Later, he was appointed to serve as a county chief administrator, deputy-lieutenant and court advisor to the Chancellery of Transylvania (Erdély, now in Romania). – B: 0942, 0883, T: 3233.→**Hajdú; Bercsényi, Miklós, Bottyán, János; Budavár, Recapturing of.**

**Fiddlers** – Descendants of singing storytellers and minstrels of the royal courts of the 12-13th centuries. Later, King Béla IV (1235-1270) dissolved several minstrel colonies because of the miserable conditions of the country following the Mongol-Tartar invasion (1241-1242). The descendants of these songwriters, the fiddlers and lute players, pursued the telling of song chronicles (*chanson de geste*) as a profession (were called *regős*, i.e. story tellers by their 15th century contemporaries) They differed only on the basis of what instrument they used for accompaniment: lute or rolling lyre that changed into the fiddle, played with a bow. The performance of those lute-players appearing in lordly manor houses was more authentic and cultured than that of lute-players in taverns, who were mainly after the effect. The subject of the songs was always the ideal woman, the pomp of the courts, and heroic acts of the knights. Strict preachers and schoolmasters, book printing and the fast spreading of reading dealt a blow to the fiddlers and they never recovered. – B: 1138, 1141, T: 7684.→**Béla IV, King; Mongol-Tartar Invasion.**

**Fidesz**→**Alliance of Young Democrats, Hungarian Citizen's Alliance; Political Parties in Hungary.**

**Field Kitchen** – Army field equipment on wheels for cooking meals for the fighting soldiers, originally with two, later with three cauldrons. Its inventor is Károly (Charles) Kőszegi Mártony (1783-1848), Field Administrator and Chief Sergeant (now equivalent to major in rank), whose invention was introduced into the army of most countries. Originally it consisted of two horse-drawn carts with two wheels each. The front one, drawn by the horses, transported the kitchen vessels, utensils and appliances necessary for cooking, followed by the second unit, carrying the cauldrons and the hearth that could be operated while the units were in motion. Further developed, motor-driven versions were used in World War II. – B: 1126, T: 7456.

**Figuration** – An exclusive musical form of Hungarian Gypsy music. It may be used in the middle of a slow song or at the end of livelier one, only as the last bars. They are not dragged out, but finished quickly. In case of slow songs, it can take on many different versions and expand into all kinds of variations. János (John) Bihari and Károly (Charles) Bóka (1808-1860) were its great masters. – B: 1078, 1020, T: 7684.→**Bihari, János.**

**Figyelmessy, Fülöp** (Figyelmessy Merkl, Fülöp, Philip) (Pest, 1 January 1822 - Philadelphia, PA, USA, 27 July 1907) – Officer in the Hungarian War of Independence of 1848-1849, later Colonel in the US Army. He was a graduate of the Military Academy of Wiener-Neustadt, Austria, and officer of the Austrian Imperial Army. In the War of Independence he served first as captain, later as major in the Bocskay Hussar Regiment. He fought during the war and, even after the armistice he took part in the defense of Komárom Fortress. He received his letter of pardon and used it to travel widely around the country. He engineered the escape of some prisoners and, after that, he had to flee the

country. He escaped to Turkey and remained a confidant of Lajos (Louis) Kossuth. During the years of Austrian despotism, he illegally visited Hungary three times and participated in the underground conspiracy of József (Joseph) Makk. The Austrian Government organized a manhunt for his capture and a 20-thousand florin reward was set on his head. By mistake, Captain Thury was executed in his place. In Great Britain, he was a member of Kossuth's inner circle. In 1859 he fought in Italy as a volunteer in the Hungarian Legion and as Commander of a Hussar Regiment in Garibaldi's campaign at Palermo, and also in the battle of Volturno, to capture Naples. Even after the disbanding of the Garibaldi Legion, the Hungarian contingent remained and was called *Legione Ausiliaria Ungherese*. He was the commander of the cavalry. Garibaldi called him "hero of all heroes". In the army of King Victor Emanuel of Italy, he received the rank of colonel. Later, he chose to emigrate to the United States to participate in the Civil War on the Union side. President Lincoln appointed him Inspector-General and Assistant to General C. Fremont. For a while, he served together with Károly (Charles) Zágonyi and later with General Gyula (Julius) Stahel-Számwald. On one occasion, with 15 Hussars, he forced the Confederate cavalry, under the famous general Ashby, to retreat. He served as Envoy of the United States in British Guayana between 1865 and 1878. After retirement, he settled in Philadelphia and actively participated in Hungarian immigrant organizations. In 1891 he moved with his family to Switzerland and, in 1892, on Governor Kossuth's 90th birthday, he went to see him in Turin. When Kossuth died, he was at his side. After that, he returned to the United States. – B: 0883, 1020, 1031, T: 3233.→**Kossuth, Lajos; Stahel-Számald, Gyula; Freedom Fight of 1848-1849; Makk, József; Makk-Gál Conspiracy.**

**Filiczky, János** (John, de Ikefalva) (Farkasfalva, County Szepes, ca. 1580 - Sárospatak, 1622) – Poet, teacher. He came from an impoverished Slovak noble family. Count Imre Thököly sponsored his secondary studies. In 1602 he went on a study trip to western universities, including Prague, Marburg, Heidelberg, Basel and Altdorf. He mainly studied poetics. In 1617 he became a professor at the Reformed College, Sárospatak. His Latin and Greek works include *Primitiae Poetica* and *Poema variata* (1614). He has two existing poems in Hungarian. – B: 0883, 1257, T: 7103.→**Reformed College, Sárospatak; Thököly, Count Imre.**

**Filmatyp** – The trade name of a machine to print subtitles on foreign language films. Oliver Turchányi (ca. 1900-1956) invented it and patented it in 23 countries. A Soviet film agency bought the Filmatyp System and two machines in New York, for they did not trust the "politically correct" subtitles of the Americans. The subtitles were printed electrically, frame by frame. – B: 7654, 1020, T: 7103.→**Turchányi, Olivér.**

**Finánczy, Ernő** (Earnest) (Buda, 10 May 1860 - Budapest, 26 February 1935) – Educator, literary historian. He earned a Teacher's Degree in Classical Philology and a Ph.D. as well. He taught in Budapest and Pancsova, Hungary (now Pancevo, Serbia). Thereafter he worked at the Ministry of Education, Budapest (1885-1901). From 1901 to 1930, he was a professor at the Faculty of Philosophy, University of Budapest. He was Acting President for fifteen years of the National Education Council, and President of the Hungarian Educational Society. He was a member of the Hungarian Academy of Sciences (1900). Initially, he was involved in classical philology but, from the 1890s, education was his main field of research, particularly the history of education. His works

include *History of Hungarian Education in the Age of Maria Theresa, vols. i, ii.* (*A magyarországi közoktatás története Mária Terézia korában I–II*) (1899-1902); *History of Education in the New Age (Az újkori nevelés története)* (1927), and *History of Education in the Middle Ages (A középkori nevelés története)* (2nd. ed. 1926). He received the Grand Prix of the Hungarian Academy of Sciences (1919). – B: 0883, 1257, T: 7103.

**Finkey, József** (Joseph) (Sárospatak, 27 November 1889 - Sopron, 7 April 1941) – Mining engineer, inventor. He graduated from the Mining, Forestry and Metallurgy Academy of Selmechánya, (now Banská Stiavnica, Slovakia) (1907-1911). The Academy of Selmechánya moved to Sopron, Hungary, when Selmechánya became part of Czechoslovakia in 1920. In 1923, he became professor of the Academy in Sopron. His works include *Die wissenschaftlichen Grundlagen der nassen Erzaufbereitung (The scientific foundations of wet ore-preparation)* (1924), its American translation *The Scientific Fundamentals of Gravity Concentration* (1930). It was also translated into Russian. His most significant inventions were the “Finkey’s ore flotation method”, introduced at Recsk, Hungary, which increased 40-fold the recovery of gold, then the “Finkey’s brown coal improver”. He also developed an adhesive from Hungarian raw material for coal briquette production. He invented a mechanism for improving the quality of Hungarian brown coals. The inventor patented the procedure in 1931. He received worldwide recognition for his contribution to the development of the theories concerning ore and coal preparations. He was a member of the Hungarian Academy of Sciences (1934, 1940). – B: 0883, 1405, T: 7662, 7103. → **Trianon Peace Treaty.**

**Finland, Hungarians in** – Finland never was a major target of Hungarian emigration, despite the Finno-Ugrian linguistic relationship, mainly due to the strong Soviet influence on Finland until the mid 1990s. Apart from a small number of refugees in the 1980s, there were some musical artists in the previous decades, followed by job seekers, researchers, family members, as well as Hungarians from former Hungarian territories in the 1990s. In more recent years only a few Hungarian families settled in and around Helsinki. At the turn of the millennium some 600 Hungarians lived in Finland, mostly in Helsinki and the southern part of the country. In 1993, the *Association of Hungarians in Finland-FME (Suomen unkarilaisten yhdistys ry - Finnországi Magyarok Szövetsége)* was established. Its main task, apart from holding together the Hungarian community, is the cultivation of the Hungarian language, culture and heritage, the support of newcomers and the commemoration of national holidays. There is a *Hungarian Congregation in Finland* and, a *Hungarian Catholic Community*, as well as a Hungarian-language nursery and a school. They have a periodical, *Hungarian Street (Magyar utca)*. Protestant religious services are in Hungarian; Catholic Masses are held in Helsinki and Tampere. A *Bible Circle* is active in Otanienmi. The Hungarian Association established contacts with similar organizations, chiefly in the Baltic States. – B: 1364, 1382, T: 7103.

**Finnish-Hungarian Language Relationships** – The present Finnish and Hungarian languages still share some basic characteristics, being agglutinative, i.e. non-Indo-European and non-Semitic languages. Both belong to the Finno-Ugric language group. Closest to Finnish is Estonian. The present relationship between Finnish and Hungarian has been studied extensively. What can be stated safely, based on language research, is that there is a basic vocabulary of some 170 shared words between the two languages, but genetically no relationship can be detected between them. Here are some of the shared

words: (Finnish words are in italics): nyel: *niele* (swallow); tud: *tune* (know); ad: *anta* (give); ló: *lyö* (shoot); név: *nimi* (name); nyíl: *nuoli* (arrow); víz: *vesi* (water); szarv: *sarvi* (horn); vaj: *vajkala* (butter); tél: *talvi* (winter); kéz: *käsi* (hand); vér: *veri* (blood). The Finno-Ugric language research started with János (John) Sajnovics (1735-1785), a Jesuit monk and an astronomer during an astronomic observation in Vardö Island (Northern Norway), who recognized seemingly common features in the Lapp and the Hungarian languages. – B: 1361, T: 7103.→**Sajnovics, János; Finno-Ugric Language Group; Uralic Languages; Altaic Languages; Hungarian Language; Etruscan-Hungarian Linguistic Relation; Sumerian-Hungarian Linguistic Relation; Dialects, Hungarian.**

**Finno-Ugric Language Group** – A linguistic term for the family of languages comprising (1) the Ugric or Ugrian languages, such as the Magyar (Hungarian) and (2) the Finn-Permian languages, among them the Finnish and Estonian. The two groups, together with the Samoyed, constitute the Uralic family of languages, called Finno-Ugric languages. – B: 1068, 1553, 1582, 1789, 1871, 1816 (eds. 1907 & 1973), 7456, T: 7456.→**Uralitic Languages; Altaic Languages; Ural-Altaic Languages; Hungarian Language.**

**Finta, Sándor** (Alexander) (Túrkeve, 12 June 1880 - Los Angeles, CA, USA, 3 August 1958) – Sculptor, numismatical artist, writer, poet. Otto Herman discovered the talented 12-year-old boy at Ecseg, working as a horse-herdsman apprentice for his uncle. Otto Herman obtained a high school scholarship for him. Later, in Paris, Finta worked in Rodin's studio. He took part in World War I, and was wounded 17 times. His first work was the heroes' monument at Nyitra (now Nitra, Slovakia) followed by 16 other memorials, including the World War I memorial in Hatvan, County Heves. In 1920, he emigrated to Brazil, where he composed his most famous work: *Strength (Erő)*, symbolizing Brazil's original force of nature. This is a monumental creation, made of granite, standing on the main square of Rio de Janeiro. He made statues of Hungarian heroes, *Lehel* and *Botond*, in the same city and the *trptych* of the Rio Cathedral. For health reasons, he moved to New York in 1922. He opened an art school there, and his years in the US were the most productive ones. He participated in carving the faces of four great American presidents on the side of Mount Rushmore, called the *Presidents' Monument*. One of his unique works is a *Family Chest* with reliefs on all sides showing family and Biblical scenes. Another notable one is the *Emblem of the American Presbyterian Society* with an angel bearing good news. His *Kossuth Statue* is in a Los Angeles park. A number of his books were published in English, including *Herdboy of Hungary: The True Story of Mocskos (A kisbojtár: igaz történet Mocskosról)*, novel, translated by S. Daróczy (1990), short stories and approximately 1000 poems and essays on philosophical theories of the arts. His statues and numismatic works are in the New York Metropolitan Museum and also at the Finta Museum in Túrkeve, Hungary. – B: 0883, 1178, T: 7675, 7103.

**Fireing Control Equipment** (Juhász-Gamma anti-aircraft fire control equipment) – An analogue or digital calculator used for the production of the ballistic elements. A typical sphere of applicability is the control of the anti-aircraft firearms. The task of the anti-aircraft fire control equipment was to transform the continually changing coordinates of the airborne target into ballistic elements to determine the point, to which at a given time the barrel of the firearm or the rocket should be directed, to ensure explosive contact

between missile and target. It takes into consideration the dislocation of the firearms, the meteorological conditions and also the type of detonator in the shell. – B: 1138, T: 7456.

**Fischer, Ádám** (Budapest, September 9, 1949 - ) – Conductor. Elder brother of the conductor Ivan Fischer. The two belonged to the children's choir of Budapest National Opera house. He studied piano and composition at the Bartók Conservatory in Budapest, and conducting with Hans Swarowsky in Vienna. He won first prize in the Milan Guido Cantelli Competition. His career began with opera conducting in Munich, Freiburg, and other German cities. In 1982 he made his Paris Opéra debut, leading Richard Strauss's *Der Rosenkavalier*, and in 1986 he made his debut at La Scala, Milan. Between 1987 and 1992 he was the general music director in Kassel, Germany.

Currently he is the general music director of the Austro-Hungarian Haydn Orchestra, which he established in 1987, and with which he has recorded the complete Haydn symphonies for the Nimbus label, the first digital recording of the cycle. He is also Music Director of the Hungarian Radio Symphony Orchestra, and Chief Conductor of the Danish Radio Sinfonietta. He has led symphonic concerts since the mid-1970s with such orchestras as the Helsinki Philharmonic, the Vienna Philharmonic, Vienna Symphony Orchestra, Orchestre de Paris, the London Philharmonic, the Philharmonia, the Royal Philharmonic, the Dresden Philharmonic, the Bamberg Symphony Orchestra, the Tonhalle Orchestra of Zurich, the Boston Symphony Orchestra, and the Chicago Symphony Orchestra. He has appeared with the New York Mostly Mozart festival four times.

In 1987, Adam Fischer started the Haydn Festival in the Austrian Eisenstadt. In July 1989, Fischer started the first Gustav Mahler Festivals in Kassel, Germany. In 1998 Fischer was appointed chief conductor of the Danish National Chamber Orchestra. Adam Fischer has recorded for Nimbus, CBS, EMI, Hungaroton and Delta. In 1982 he won the Grand Prix du Disque.

At the end of 2010, Fischer resigned as Music Director of the Hungarian State Opera in protest against the allegedly repressive media laws introduced by new Hungarian Government. – B: 0874, 1031, T: 7617.→**Fischer, Iván.**

**Fischer, Annie** (Budapest, 5 July 1914 - Budapest, 10 April 1995) – Piano virtuoso. She first appeared before the public with a Beethoven piano concerto in Budapest in 1922, and had her first success abroad at the age of 12. She became a student of Arnold Székely and Ernő (Ernst von) Dohnányi, and became winner of the 1933 Liszt Competition. World War II broke her career; during the War she lived in Sweden. In 1946, she returned to Hungary and settled in Budapest. She was on concert tours in Canada, England, Holland, France and Switzerland. She was acknowledged all over the world as a recognized interpreter of the works of Mozart, Beethoven and Schumann. Her name became widely known through her deep involvement in her playing. She made only a few recordings. In the 1950s and 1960s, she was called Hungary's "traveling music-ambassador". She was a threefold recipient of the Kossuth Prize (1949, 1955 and 1965). – B: 1122, 1031, T: 7684.→**Dohnányi, Ernő; Székely, Arnold.**

**Fischer, Gyula** (Julius) (Budapest, 11 July 1873 - Budapest, 6 October 1954) – Mechanical engineer and inventor. Following his graduation from the Budapest Polytechnic in 1895, he worked in the electrical section of the Ganz factory. He directed the electrification of several railroads in Hungary and abroad. Later, he became chief engineer at the Local Railroad Company of Budapest (*Budapesti Helyiérdekű Vasutak-*

*BHÉV*) and supervised the electrification of the company's railroads. He developed and applied a chain suspension for the overhead contact system. His other significant invention is the internationally adopted *Fischer-Laminar Collector Bow* (*Fischer-lemezes áramszedő*). He was also a prolific technical writer. – B: 1160, 0883, 1020, T: 7662.

**Fischer, Iván** (Budapest, 20 January 1951 - ) – Conductor, brother of Ádám Fischer. He studied piano and violin, then violoncello and composition at the Ferenc (Franz) Liszt Academy of Music, Budapest; in Vienna, he graduated from Hans Swarowsky's famous conducting class and he also studied at the Mozarteum in Salzburg, Austria. He won a conducting competition in Florence, Italy in 1974, and in London in 1976. From 1975, he worked all over the world: as Music director of the Northern Sinfonia of England, Newcastle (1979-1982); Music director of the Opera of Kent, from 1984; guest conductor of the Symphony Orchestra, Cincinnati, USA (1990-1995). From 1980, he conducted the London Symphony Orchestra, the Concertgebouw of Amsterdam, and the Berlin Philharmonic. In 1983, Fischer and pianist, Zoltán Kocsis developed the Budapest Festival Orchestra with Fischer as its first concertmaster. He received a label contract with Philips Classics in 1995. In 2000-2001 he was Music Director of the Lyon National Opera, France. In 2002-2003, he worked with the Los Angeles Philharmonic, the Boston Symphony and the Montreal Symphony orchestras. He is founder of the Mahler Society and patron of the British Kodály Academy. He was presented with the Rupert Foundation Prize (1976), the Meritorious Artist title (1984), the Kristály Prize (1998), the Gramophone Prize (1998), the Golden Commemorative Medal of the President of the Republic of Hungary, and the Kossuth Prize (2006). – B: 0874, 1031, T: 7103.→**Fischer, Ádám; Kocsis, Zoltán.**

**Fischer, Mór** (Maurice) (ca 1800 - Tata, 1880) – Ceramist, founder of the Herend Porcelain Factory. He was a descendant of a craftsman family, manufacturing faience at Tata. The Herend Porcelain Factory became famous with the reproduction of old Chinese, the Sevres and Meissen porcelains. Hungary bestowed nobility on him after the Paris World Fair in 1867. A Porcelain Workers Training School bears his name at the Herend Plant near Veszprém. – B: 1160, 0883, T: 7662.→**Herend.**

**Fischer, Tibor** (Stockport, England, 15 November 1959 - ) – British novelist of Hungarian parents, both professional basketball players, who left Hungary after the crushed Revolution and Freedom Fight in 1956. He wrote his parents' story in his first novel entitled *Under the Frog* (*A béka feneke alatt*) (1992). The book won a Betty Trask Prize for literature, and was shortlisted for the prestigious Booker Prize for Fiction. His subsequent novels, which have often featured dysfunctional characters who eventually achieve some kind of redemption, include *The Collector Collector* (*A gyűjtő gyűjtése*) (1997) is about a weekend in South London, narrated by a 5000-year old Sumerian pot. *The Voyage to the End of the Room* (*Utazás a szoba végéhez*) (2003) is concerned an agoraphobic ex-dancer. *The Good to be God* (*Jó Istennek lenni*) (2008) is about a bankrupt individual's dream that the best way to make a fortune would be to become a deity. In 1993 he was selected by the literary magazine *Granta* as one of the 20 best young British writers. In 2009 Fischer became the Royal Literary Fund writing fellow at City and Guilds of London Art School. – B: 1031, T: 7103.

**Fitz, József** (Joseph) (Oravicabánya, now Oravita, Romania, 31 March, 1888 - Budapest, 12 September 1964) – Historian of typography. His higher studies were in

Budapest, München, Paris and Lausanne (1906-1911). Thereafter, he studied journalism at the *École du Journalism*, Paris and obtained a Ph.D. at the Law School of Budapest (1913). From 1914, he worked at the University Library, Budapest. In the 1920s, he compiled the incunabula of Hungarian libraries. He was Head of the University Library, Pécs and, from 1941, he also taught there. From 1930 to 1934, he was Chief Librarian of the National Széchényi Library, Budapest. After his retirement, he became a librarian at the Balkan Institute, Budapest. He reorganized the National Bibliographical Collection. His major works include *History of the Book (A könyv története)* (1930); *András Hess, the First Printer of Buda (Hess András, a budai ősnymodász)* (1931); *The Fate of Books in Transylvania (A könyv sorsa Erdélyben)* (1941), and *The History of Hungarian Book Until 1711 (A magyar könyv története 1711-ig)* (1959-1967). – B: 1160, T: 7103. → **Hess, András.**

**Fiume** (now Rijeka, Croatia) – This port-settlement was founded more than 3000 years ago, at the time when the Phoenicians were laying the foundation for the traffic between the Adriatic and the Mediterranean Seas. The Pelasgians, Greeks and Etruscans came later. During Roman times (in 28 BC), the Adriatic Sea and its region was called *Liburnia*. It was developed as divided small autonomous territories and kept in that state by the Romans, later to be left to the Civitates. One of these was named Civitas Flanates, later Tersatica, wasted by Charlemagne in 799. The city of Fiume was built on its ruins. Later, the Byzantine emperors ruled it. When Croatia became independent in 840, Fiume remained under Frank rule. Then, as a result of feudal fragmentation, the Bishop of Pola acquired power over it. In 1183, following the Peace of Constance, it had an autonomous government and began to flourish, only to burn down in 1409. In 1466 it became a Habsburg possession. In 1515 Emperor Maximilian granted the city the title of '*fidelissima*' (most faithful). In 1717 it became a free port; but Empress Maria Theresa annexed it temporarily to Croatia. Then, in 1779, it came under the direct authority of the Hungarian Crown, as a free royal city. In 1807 it was annexed to Hungary as a municipality and administrative district. From 1809-1813 Fiume was temporarily under French sovereignty; then, between 1822 and 1849, it belonged again to Hungary. After the end of the Hungarian War of Independence of 1848-1849, Croats occupied it until 1868, when it became again Hungarian, as a separate territory, which included the city, the port and the surrounding area. After this, the city saw a rapid development. In 1870, the Fiume Provisorium was enacted. From 1920 on, there was a bitter struggle between Italy and Yugoslavia for the possession of the city. The Treaty of Rome gave the city to Italy in 1924. After World War II it became part of Yugoslavia. Since 1991, it has belonged to independent Croatia. Today, part of Hungary's commerce passes through Fiume/Rijeka. It is the starting point of the Adria Oil Pipeline, delivering Middle Eastern oil to Hungary, the Czech Republic and Slovakia. – B: 0942, 1078, 1138, T: 7680.

**Five-Year Plans** – Soviet style planned economy, introduced by Stalin in 1928. Its aim was to augment agricultural and industrial output by designated quotas for a period of five years. All the Soviet bloc members, among them Hungary, had to adopt it. After a Three-Year Plan (1947-1950), the first five-year plan was introduced in 1950. This involved radical changes in the development of the Hungarian economy. As the Soviets claimed a rapid increase in the potential of the Hungarian Army and war costs, the plans had to be changed, especially in the field of heavy industry, and agriculture had to bear the costs. The plan's overall consequence was that the standard of living decreased by 20

percent between 1951 and 1953. In the Seventh Five-Year Plan period (1986-1990) the planners called for net material product to grow by 15 to 17 percent over the 1985 level. The plan also called for industrial production to rise by 14 to 16 percent over the 1981-1985 plan period; agricultural output to rise 7 to 10 percent; domestic consumption 13 to 16 percent; real per capita income 9 to 11 percent; and both imports and exports, 16 to 18 percent. In 1986, Hungary's national income grew by only 0.5 percent, far short of the planned 2.3 to 2.7 percent. Industrial production rose by 1.8 percent and agricultural production increased 1 percent, far short of planned levels. In the meantime, Hungary's foreign debt grew to some 20 billion US\$. The disastrous events finally led to a political turn in Hungary in 1989-1990, resulting in the abandonment of the socialist-type planned economy and the introduction of western market style economy. – B: 1397, 1020, T: 7103.→**Economy of Hungary.**

**Flamethrower** – invented by Gábor (Gabriel) Szakáts. It is a weapon equipped with ignitable incendiary fuel. The incendiary mixture, housed in a cylinder with compressed air, is shot at the target through a projector tube, where it bursts into flame. Those carried on the back could throw the flame (the ignited fuel) 20-30 m, whereas from a tank as far as 150-200 m. – B: 1053, 1126, T: 7456.→**Szakáts, Gábor.**

**Fleischmann, Károly** (Charles) (Budapest, 3 November 1834 - Cincinnati, Ohio, USA, 10 December 1897) – Inventor, politician, philanthropist. He was educated in Vienna and Prague, and emigrated to the US in 1866. He, his brother and a partner established the Fleischmann Manufacturing Company in Cincinnati, Ohio, in 1868, to produce and sell compressed yeast and other products such as vinegar, malt, syrup, gin and whiskey. By World War I, the company's yeast production was the greatest in the world, and its vinegar production the second largest. Active dry yeast was widely used in World War II, and afterwards, it was known as "*Fleischmanns*." He also had a number of inventions to his credit, such as an enhanced distilling apparatus, a new process for aging liquors, an improved cotton gin, and a process for extracting oil from cotton seed, as well as improvements to the sewing machine, machine cranks and motors. Among other business interests, he was one of the organizers of the Market National Bank of Cincinnati in 1887. In his later years, he entered public service and became an Ohio state senator. – B: 1279, T: 1279, 7103.

**Flesh, Károly** (Carl, Charles) (Moson, 9 October 1873 - Lucerne, Switzerland, 14 November 1944) – Violin virtuoso, music teacher. He played the violin from the age of 6, later studied in Vienna and Paris. Between 1897 and 1902, he was a professor of violin at the Conservatory of Music in Bucharest, Romania. From 1909 to 1934, he lived in Berlin, teaching in the Music Academy from 1921. His Trio Ensemble became renowned worldwide. He conducted violin courses in Philadelphia, USA (1924-1928), Baden and Berlin (1928-1929). He left Berlin in 1934, and moved to London. After living in Amsterdam he finally settled down in Lucerne, Switzerland (1943-1944). In 1943, he visited Leo Weiner in Budapest and they prepared a new edition of J. S. Bach's two Violin Concertos. He authored *Die Kunst des Violinspiels, vols. i-ii (The Art of Violin Playing, I, II)* (1923-1928), regarded as the basic work of modern violin teaching. He was one of the most cultured and skilled violinists of the 20th century. The Cultural Center of Mosonmagyaróvár and a street bear his name in Hungary. There is a Flesh International Violin Competition in London. – B: 0903, 0883, T: 7103.→**Weiner, Leó.**

**Flórián, Tibor** (Selmecebánya, now Banská Stiaavnica, Slovakia, 12 April 1908 - Punta Gorda, FL, USA, 6 March 1986) – Poet, writer, lawyer. His higher studies were at the University of Kolozsvár (now Cluj-Napoca, Romania) where he read Law. He began to write in 1928 and became a highly regarded member of the third generation after Áron Tamási. He belonged to the Literary Circle of Kolozsvár, an offshoot of the periodical *Shepherd's Fire (Pásztortűz)* of Sándor (Alexander) Reményik. He was a contributing editor to several Transylvanian, Upper-Hungarian (Upland, *Felvidék*, now Slovakia) and Hungarian periodicals. As a commander of a hospital train, he settled in Germany in 1945 and, in Munich, he became President of the Hungarian Cultural Association. He moved to the United States in 1949, and was President, and member of the presidium of several Hungarian immigrant associations. He was a contributor to the American editorial group of Radio Free Europe (1950-1973). For years, he was President of the Kossuth Publishing Co. Between 1978 and 1986 he was President of the Árpád Academy. He was also the Secretary of the PEN Center for Refugee Writers. In most of his writings he fought for the survival of the Hungarian identity in exile. His works include *Above the Clouds, under the Clouds (Felhők fölött, felhők alatt)* poems (1935); *Above the Abyss (Mélység fölött)* poems (1945); *Bitter Roots (Keserű gyökerek)*, poems (1975), and *Venezuelan Sketches (Venezuelai tollrajzok)* poems (1984). His poems were published in 14 anthologies. Many separate volumes of his poetry and prose were also published. Some of them were translated into Romanian, German, French, Dutch and English. – B: 0878, 1037, 1257, 1267, T: 7103. → **Tamási, Áron; Reményik, Sándor.**

**Florin** (Hungarian *Forint*) – A currency used since the 13th century. Its name derived from the gold coin minted for the first time by the city of Florence, Italy; it displayed a coat of arms with flowers. The coin spread all over Europe and its value was relatively steady. In Hungary kings from the House of Anjou started minting gold florins that became the currency in Europe and kept most its value. From the middle of the 17th century this was replaced by gold currencies minted in various European countries; but from this time on mostly silver florins were minted. Starting in 1892, in Austria-Hungary gold florins took the place of silver florins. Since 1946, the currency in Hungary is again the *Forint*. – B: 1138, T: 7680.

**Flower Songs** – The Age of Chivalry produced an art song form, the love song, sung by the *troubadours* of France, the *trovatori* of Italy and the *Minnesänger* of Germany. In Hungary it produced a specifically Hungarian idiom, the flower song (*virágének*), where the lover compared his beloved to a flower. Only a fragment of the oldest recorded flower song, the Sopron Flower Song (*Soproni virágének*) survived. It was written by an anonymous composer around 1490: “*Vyragh thudyad, theuled el kell mennem, És the yerthed kel gyazba ewelteznem*”; in modern Hungarian: „*Virág tudjad, tőled el kell mennem, és te érted kell gyászba öltöznöm*” (*Flower, I have to part from thee - And have to do mourning for thee*). It was written down by Jakab (Jacob) Gugelweit, the town clerk of Sopron, around 1490. The fragment was discovered by Jenő (Eugene) Házi in 1929 in an old manuscript book, where the rest of the song was deleted by some chemical substance. The moral code of the 16th century strongly condemned these songs; both the Catholic and Protestant clergy vigorously hunted them down. Consequently, even Bálint (Valentine) Balassi, the century's greatest poet was unable to publish his love poems. From the 17th century on, numerous flower songs survived in the Vásárhelyi Songbook. – B: 1078, 1134, 1136, T: 7617. → **Balassi, Bálint; Vásárhelyi Songbook.**

**Flute** (*Cákány*) – (1) A musical instrument of the woodwind family. A wooden flute or recorder, a version of the Western European flute, the *Blockflöte*. The first document of the *cákány* as a musical instrument comes from an advertisement of 13 August 1807. According to this, there was a musical instrument maker named Eberle, who invented it. According to Hombostel-Sachs the instrument produces high pitch notes through six openings with one or more stops. In Hungary, János (John) Keresztély Hunyady transcribed dance music for it. Count István (Stephen) Széchenyi in the Döbling Asylum, Austria, still played this instrument. (2) A musical instrument of simple construction similar to a shepherd's flute, used mainly in Hungary among the shepherds of the Great Hungarian Plain (*Nagyalföld*) as well as those of the mountains. The shepherd usually carved it out of a willow, elder or maple tree. Its length is 30-60 cm. It is usually fitted out with six or, on rarer occasions, eight holes; by leaving these open or covering them up, one can create an almost two eighths of a diatonic or chromatic scale. Its lower end is open. The upper end is cut horizontally to ensure that the air blown in would have a free passage. There are many variations of it. There is a long, 93 cm variety that has only 5 holes close to the bottom and one can only play it by raising one's head. This is still used in Transdanubian (*Dunántúl*) areas, though are slowly disappearing. The smaller one is also called piccolo, the smallest and simplest version is the so-called willow or elder pipe. In the spring, children can make this by peeling off the tender skin of the willow branch. Its sound is not refined but soft in quality. – B: 1197, 0942, 1134,T: 3233, 7684.→**Széchenyi, Count István.**

**'Flying Cloud'** – Name of a 75-ton schooner (sailing ship with two-masts) built in England. Prince Ödön (Edmund) Batthyány-Strattmann and crew won a sailing race with it, organized by the Royal Thames Yacht Club in Plymouth, on 23 June 1862, and later at Torquay, on 22 August of the same year. – B: 0883, 1339, T: 7675.→**Batthyány Strattman, Count Ödön.**

**Fock, Jenő** (Eugene) (Budapest-Kispest, 17 May 1916 - Budapest, 22 May 2001) – Politician. He came from a working class family. From 1930, he worked in the Marx-Merey, then at the Ganz-Wagon Industry, Budapest. He joined the Communist Party in 1932. In 1937, he was a member of the Party's National Youth Committee. In 1939, he was conscripted into the army. In 1940, he was sentenced to three years in a penitentiary. He was sent to the eastern front, but a year later he deserted. In January 1945, he became Party Secretary of the 10th municipal district of Budapest and, gradually, he filled important posts in the Communist Party and state administration, including Deputy Minister of the Foundry and Machine Ministry. In the meantime, he graduated from the Academy of Economics and Technics. In 1954, he was appointed Commercial Counselor of the Hungarian Embassy in the German Democratic Republic (East-Germany). He was a moderate Communist, who tried to institute economic reforms, while serving as Hungarian Deputy Prime Minister (1961-1967) and Prime Minister (1967-1975). His efforts were blocked by the Soviet Union. After he was pushed out of office, he continued to criticize General Secretary János (John) Kádár's hard line. – B: 1066, T: 7103.→**Kádár, János.**

**Fodi, John** (Nagyteval, 22 March 1944 - Toronto, 2 November 2009) – Composer. His family emigrated to Canada in 1951. He studied theory in Hamilton in 1964 with Lorne Betts, and composition at the University of Toronto with John Beckwith and John

Weinzweig, electronic music with Gustav Ciamagna (1966-1970), and composition at McGill University with István (Stephen) Anhalt (1970-1971). He was a founder and director in 1967-1970 of the Contemporary Music Group at the University of Toronto, and a founder of ARRAYMUSIC in 1971, under whose auspices many of his works have been performed. At McGill University he was co-founder with Mickey Cohen of the New Music Society. Fodi's compositions include works for orchestra, chamber ensemble, keyboard and voice. His major compositions are *Symphony* (1964-1966, 1975); *Symparanekromenoi* (1969-1971); *Concerto for Viola and Two Wind Ensembles* (1971-1972); *Dragon Days* (1976); *Concerto a Quattro for String Quartet* (1973); *Trio*, Op. 49 (1977), and *Variations III*, Op. 52, (1978). – B: 0893, 1403, T: 4342.→**Anhalt, István.**

**Fodó, Sándor** (Alexander) (Visk, now Vhiskove, Carpatho-Ukraine, Ukraine, 26 February 1940 - Ungvár, now Uzhhorod, Carpatho-Ukraine, Ukraine, 12 May 2005) – Politician. After he completed his primary and secondary education at his place of birth, he studied at the State University of Tartu, Estonia, Soviet Union (1962-1970). He read Finno-Ugric and Russian Literature. He was conscripted into the Soviet Navy (1959-1963). From 1962-1967 he was an assistant professor at the Hungarian Department of the University of Ungvár. However, he was dismissed because of his activities for the Hungarians in Sub-Carpathia (*Kárpátalja*). He was text-editor of the daily, *Carpathian True Word* (*Kárpáti Igaz Szó*) (1972-1976); later he worked as a boilerman. In 1976 he lectured again at the University of Ungvár. From 1989-1996, he was President of the Hungarian Cultural Society of Sub-Carpathia (*Kárpátaljai Magyar Kulturális Szövetség – KMSZK*), from 1996 he was its Honorary President. He was Chief Curator of the Hungarian Reformed Church of Sub-Carpathia (*Kárpátaljai Református Egyház*) (1992-1997). He was member of the presidium of the World Federation of Hungarians (*Magyarok Világszövetsége – MVSZ*) (1989-1998), and from 2000, he was Vice-President of the Protective Body (*Védnöki Testület*) of the World Federation of Hungarians. He was one of the outstanding leaders of the Hungarian ethnic minority in Carpatho Ukraine. – B: 0874, 1488, T: 7103.→**Carpatho-Ukraine; Reformed Church in Carpatho-Ukraine; World Federation of Hungarians.**

**Fodor, András** (Andrew) (until 1947 Andor Fodor) (Kaposmérő, west of Kaposvár, 27 February 1929 - Fonyód on Lake Balaton, 27 June 1997) – Poet, writer, translator of literary works. He was a descendant of a family of railway employees. In 1947, he completed his high school studies in Kaposvár; thereafter he studied at the Eötvös College of the University of Budapest, and in 1951, obtained a degree in Librarianship and in Russian Language. From 1951, he worked as a teacher in the central school of the Adult Education Department. From 1954, he was a contributor to the journal, *Star* (*Csillag*). From 1957 he freelanced. From 1959 he was a correspondent for the National Széchényi Library, and founding editor of the serial *New Books* (*Új Könyvek*). From 1973, he served as a columnist for the paper, *Somogy* of Kaposvár and, from 1983, Editor of the journal, *Our Age* (*Kortárs*). From 1981 to 1986, he was Vice-President of the Writers' Association. From 1946-1949, his poems appeared in the journals, *Our Fate* (*Sorsunk*), in *Transdanubia* (*Dunnántúl*), and *Response* (*Válasz*). After his silencing, he again came out with new poems in 1953. In the meantime, he also translated from Russian and English, and later from other languages as well, amounting to 13 volumes. His favorite masters were Attila József, Gyula (Julius) Takata, and Gyula (Julius) Illyés, while his fellow lecturer, Lajos (Louis) Fülep exerted strong influence on him. He caused

a sensation with his poem entitled *Bartók*, in 1949. His first volume, *Homewards (Hazafelé)* (1955) shows multi-directional ability: laying down everyday facts by simple means. His volume, *Sober morning (Józan reggel)* (1958), met with hostile reviews, motivated by political considerations; for years he was again forced out from literary life. He began writing again in the 1960s. He was the poet of community life. His works amount to 32 volumes, among them *The Calling of Silence (A csend szólítása)* (1969); *Confessions about Bartók (Vallomások Bartókról)* essays, poems (1978); *Thousand Evenings with Lajos Fülep (Ezer este Fülep Lajossal)* diary (1986), and *The Nineteen-seventies, 1-2 Diary 1970-1972, 1973-1974 (A hetvenes évek, 1-2 Napló 1970-1972, 1973-1974)* (1995). A selection of his literary translations was published in the *Sunflower (Napraforgó)* (1967), and in *Boundaries (Mesgyék)* (1980). – B: 0878, 1031, 1257, T: 7456. → **József, Attila; Illyés, Gyula; Fülep, Lajos.**

**Fodor, István** (Stephen) (Zenta, now Senta, Serbia, 9 September 1943 - ) – Archeologist, museologist. In 1967 he obtained an Arts Degree at the University of Moscow, majoring in History and Archeology. He became a contributor to the National Museum, Budapest; from 1976, its secretary; from 1978, Head of the Medieval Section, and from 1986, its Director. Concurrently, from 1974, he gave lectures in Archeology at the University of Szeged and, from 1978, he was reader there. He edited the journal, *Archeological Bulletin (Archeológiai Értesítő)*. He obtained his Masters Degree in History in 1982. His main research interests are: Hungarian and Finno-Ugric ancient history, and the archeology of the Carpathian settlement era and the Middle Ages. His works include *Outlines from the Archeology of the Finno-Ugrian Ancient History (Vázlatok a finnugor őstörténet régészetéből)* (1973); *Altungarn, Bulgarotürken und Ostslawen in Südrussland (Old Hungarians, Bulgaro-Turks and Old-Slavs in South-Russia)* (1977); *In Search of a New Homeland* (1982); *Die grose Wanderung der Ungarn vom Ural nach Pannonien* (1982); *The Birth of the Hungarians (A magyarság születése)* (1992), and *In the Footsteps of our Ancestors (Őseink nyomában)* (1996). – B: 0878, 1257, T: 7456.

**Fodor, J. George** (György) (Ungvár now Uzhhorod, Ukraine, 28 October 1927 - ) – Physician, medical scientist. His higher studies were at the Medical School of the Charles University, Prague, Czechoslovakia. He was trained in Cardiology at the Institute of Cardiovascular Research, Prague. He obtained his Ph.D. (CSc) from the Czech Academy of Sciences. In 1968, he left Czechoslovakia after the crushing of the “Prague Spring” (also known as the “Velvet Revolution”) by the Warsaw Pact armies. He spent three years at the University Clinic of Gothenburg in Sweden. In 1971, he was invited to join the newly established Medical School at the Memorial University of Newfoundland, Canada, as Professor of Medicine and Clinical Epidemiology. He became Chairman of the Division of Community Medicine and, for 10 years, he was the Associate Dean of the Medical School. Since 1994, he has been Professor of Medicine and Head of Research at the Prevention and Rehabilitation Center at the University of Ottawa Heart Institute. His areas of research are epidemiology of ischemic attacks, arterial hypertension, lipid metabolism and arteriosclerosis, and primary and secondary prevention of coronary heart disease. Fodor is the founding President of the Canadian Hypertension Society, and of the Canadian Coalition for High Blood Pressure Prevention and Control. He holds many appointments, including the World Health Organization, Geneva. He is an honorary member of the Slovak Cardiology Society and the Czech Hypertension Society. He speaks five languages and has 179 published works. He is a recipient of Canada’s

National Health Scientist Award, the Distinguished Scientist Award of the Canadian Hypertension Society, and the Segal Award. A George Fodor Award was established in Canada. – B: 1529, T: 7103.

**Fodor, József** (Joseph) (Lakócsa, 16 July 1843 - Budapest, 20 March 1901) – Hygienist. His medical studies were in Budapest and Vienna and he received his Medical Degree in 1865. From 1862, he was Assistant Professor at the Medical School, University of Budapest, and he was an anatomist from 1862. After a foreign study trip in 1872, he taught at the University of Kolozsvár (now Cluj-Napoca, Romania). He was the first teacher of public health in Hungary and one of its founders abroad. His research in bacteriology, as well as in the contamination of soil, air and water has great importance. With Lajos (Louis) Markusovszky, he established the National Public Health Society. He was the first who raised the idea of, and became the founder of a National Public Health and Epidemic Institute. A number of his studies appeared in medical journals. His books include *Public Health in England... (Közegészségügy Angolországban...)* (1873), *On Healthy House and Apartment (Egészséges házról és lakásról)* (1877). There is a József Fodor Memorial Medal, re-established in 1960. The National Public Health Center, Budapest and schools bear his name. – B: 0883, 1419, T: 7103.

**Fodor, Katalin** (Kathleen) (Losonc, now Lučenec, Slovakia, 28 March 1959 - ) – Graphic artist. She was educated at schools with Hungarian as the language of instruction, at her place of birth. After completing her high school studies at Fülek (now Filakovo, Slovakia) (1974-1978), she entered the School of Arts in Pozsony (now Bratislava, Slovakia), where she studied under the direction of Orest Dubay (1978-1984). She was on a Fuller scholarship (1987-1989). She worked at the Slovak Television; became a self-employed graphic artist in 1984. Her favorite techniques are engraving, drypoint, mezzotinto; she also does drawings, aquarelles and illustrations. She went on study trips to Tallinn, Estonia; Riga, Latvia; and Leningrad, then the USSR in 1981; Berlin, Germany in 1986; and Salgótarján, Hungary in 1987, and Szczecin, Poland in 1989. She exhibited at the Nógrád Gallery, Losonc in 1987. She had an independent exhibition at the Jókai Theater, Komárom (now Komárno, Slovakia) in 1990. – B: 1083, 1890, T: 7456.

**Fodor, Pál** (Paul) (Aszófő, 5 February 1955 - ) – Turkologist, historian. His higher studies were at the University of Budapest (1974-1979). From 1990 he worked as the administrative official on the Orientalistic team of the Hungarian Academy of Sciences, and later as its co-worker on a scholarship; from 1992 he became a scientific co-worker at the Historical Institute of the Academy, and also tackling a number of other important tasks there and elsewhere; additionally, he was Secretary of the Csoma de Körös Society. In 2000, he became a professor with a Széchenyi scholarship. In 2006, he obtained a Ph.D. from the Academy of Sciences. Concurrently, he was editor of several journals, among them that of the *Turkologischer Anzeiger* of Vienna from 1980, and a member of the editorial board of the journal, *Acta Orientalia*. His field of research entails the history of the Ottoman Empire, especially its rise, social and military organization, political mentality, the Turkish conquest of Hungary, and its organization of the administration of the occupied area. He is the author of more than fifty publications. His books include *Hungary and the Turkish Conquest (Magyarország és a török hódítás)* (1991); *Hungarian-Ottoman Military and Diplomatic Relations in the Age of Süleyman the*

*Magnificent*, edited by Géza Dávid and Pál Fodor (1994), and *In Quest of the Golden Apple* (2000). He was presented the Ferenc Deák Prize in 2001. – B: 0874, 1257, T: 7456.→**Fekete, Lajos (2); Németh, Gyula.**

**Fodor, Sándor** (Alexander) (Csíksomlyó, now Sumuleu Ciuc, Romania, 7 December 1927 - ) – Writer in Transylvania (*Erdély*, now in Romania). He studied Romanian and German Languages and Literature at the University of Kolozsvár (now Cluj-Napoca, Romania), graduating in 1950. He was a teacher at the Junior High School of Nagyszentmiklós (now Sinnicoleu Mare) in 1950. He was an editor of the Literary Publishers (1951-1956) and the same in the *Sunray* (*Napsugár*) children's magazine, from 1956 until his retirement in 1988. He was Editor of *Christian Word* (*Keresztyén Szó*) (1990-1991). His works include short stories: *White Pine Tree* (*Fehér fenyő*) (1954); *Music Band of the Fire Brigade* (*Tűzoltó zenekar*) (1983); *The First Snow* (*Az első hó*) (1991); novels: *The Promised Land* (*Az ígéret földje*) (1984), and *One Day, One Life* (*Egy nap - egy élet*), memoirs (1976). His novel series, *Csipike*, was translated into Romanian, Russian, German, Bulgarian and Lithuanian. He translated Romanian works into Hungarian. He is a member of the Hungarian and Romanian Writers' Associations, the International Pen Club, and President of the Hungarian PEN Center in Romania. He was a recipient of the Writers' Association Prize (1966), the Romanian Academy Prize (1983), prizes from England (1969), from the USA (1979), and was awarded the Officer's Cross of the Order of Merit of the Republic of Hungary (1998). – B: 1036, 1257, 0878, T: 7103.

**Fogaras, Runic Inscription in Church** – Péter Bod, Minister of the Reformed Church, made rhyming inscriptions on the wall of the Reformed Church in Fogaras (now Fagaras, Romania), which recorded the memory of Countess Kata (Kate) Bethlen. Under this inscription written in runic signs stands: “*Bod Péter készítette Igenben*” (Peter Bod made it in Igen). Péter Bod became Parish Minister in Magyar-Igen in 1759, where he drew this inscription. – B: 1174, 1020, T: 7669.→ **Hungarian Runic Script; Bod, Péter; Bethlen, Countess Kata Árva.**

**Fogarasi, János** (John) (Felsőkésmárk, now Kežmarok, Slovakia, 17 April 1801 - Budapest, 10 June 1878) – Linguist, lexicographer, lawyer. He studied at the Reformed College of Sárospatak during the years of 1814-1823, and obtained his Law Degree in 1829. He began his legal career at the Court of Bills of Exchange. In 1848 he worked at the Ministry of Finance of the Government of Lajos (Louis) Kossuth, where he was responsible for codifying several important Bills. Later he worked as a judge; however he did not follow the government to Debrecen. In 1869 he became High Judge of the Royal Court of Justice. His writings dealt with a variety of current problems; but he also published poems and short stories. His most important work by far was in the field of linguistics, where he produced some studies showing an altogether original approach. In 1838 it was Fogarasi, who first formulated the most important rule of the Hungarian word-order: *that the emphasized part of a sentence is always put in front of the verbal predicate*; this is referred to as the “Fogarasi-law”. From the point of view of the development of metrics, his early conclusions concerning the role choriambus (a foot consisting of four syllables) in Hungarian rhythm proved pioneering. He tended to follow the idea that Hungarian and Mongolian languages are related – now known to be erroneous. His lasting achievement is the editing with Gergely (Gregory) Czuczor from

1845, and after Czuczor's death in 1866 by himself, the famous *Dictionary of the Hungarian Language (A magyar nyelv szótára, vols. i-vi)* (1862-1874), briefly referred to as the "Czuczor-Fogarasi"; this work is still valuable regarding the explanation of words. He also did pioneering work as a folklorist. He was the author the *Popular Hungarian Grammar (Népszerű magyar nyelvtan)* (1843), to which he appended a music supplement containing 3 songs and 2 dance pieces. In 1847 he was commissioned by the Kisfaludy Society to publish with János (John) Travnyik two booklets of folk songs. Some of his other works regarding linguistic philosophy and history of language and words were already outdated in his lifetime. He also composed music, e.g. some songs and choral works. He was Member of the Hungarian Academy of Sciences (corresponding 1838, ordinary 1841). His other works include *The Mentality of the Hungarian Language (A magyar nyelv szelleme)* (1843); *On the Tenses of Hungarian Verbs (A magyar igeidőkről)* (1858), and *Word Emphasis in the Hungarian Language (Hangsúly a magyar nyelvben)* (1860-1861). – B: 0883, 1257, 1068; T: 7456.→**Czuczor-Fogarasi Dictionary.**

**Fogarassy, László** (Ladislav) (Pozsony, now Bratislava, Slovakia, 1 January 1920 - Pozsony, 3 September, 1994) – Historian, librarian. In 1939 he graduated from the Hungarian Commercial Academy of Pozsony, and in 1949 he obtained a Law Degree from the Law Faculty of the University of Slovakia. He earned a Ph.D. in 1950. In 1990, he obtained a Degree in Historical Studies from the University of Budapest. Between 1939 and 1945, and between 1948 and 1951, he was a postal clerk and, from 1952 until his retirement in 1984, he worked as a librarian at the Gumon Works in Pozsony. In 1990, he became a member of the World Federation of Hungarian Historians, and was awarded the commemorative medal, *Pro urbe Sopron*. His research fields are: military and diplomatic events in the years after World War I; Czechoslovakian- Hungarian youth movement and the history of Pozsony. His body of publications has about 200 works, including *Campfire (Tábortűz)* (1934, 1937); *Fountain (Forrás)*, (1938); *Aster Revolution in Pozsony (Őszirózsás forradalom Pozsonyban)* (1968); *The Unknown Szekler Division (Az ismeretlen székely hadosztály)* (1971); *The Plebiscite of Sopron (A soproni népszavazás)* (1974); *Die Volksabstimmung in Ödenburg (Sopron)(The Plebiscite in Sopron)* (1976); *The Eastern Campaign of the Hungarian Red Army: War and Society in East-Central Europe* (New York, 1988), and *Who Led the Hungarian Red Army of 1919? (Kik vezették az 1919-es magyar vörös hadsereget?)* in: *A Hungarian Army Officer (Magyar katonatiszt)* (1989). – B: 1083, T: 7456.

**Foky, Ottó** (Sárhida, 15 June 1927 - ) – Animated film producer, graphic artist. His higher studies were at the Teacher's Training College, Budapest, where he graduated in 1949, then completed his studies at the Theater and Film Department of the Academy of Applied Art, Budapest in 1956. From 1956 until his retirement in 1987, he was the animated film producer at the Pannonia Film Studio. He organized its puppet studio on Gyarmat Street, Budapest, and here he created a new genre called "subject animation". He made more than 100 TV tales and children's films, including the famous "TV-Maci". His most important films include *Clown School (Bohóciskola)* (1964); *My Vitamin was Stolen (Ellopták a vitaminomat)* (1966); *I, the Mouse (Én, az egér)* (1969); *Mirr-murr*, TV series (1973-1975); *Adventures of Miki the Squirrel (Miki mókus kalandjai)*, TV series (1980, 1983); *La Desodora* (1982), and *Süsüke, the Dragon Kid (Süsüke, a sárkánygyerek)*, TV series (2000). He still works on a juvenile film series. He has

exhibited in Budapest, Belgrade, Prague and Stockholm. He has received a number of prizes and medals, among them the Mihály Munkácsi Prize (1964), the Béla Balázs Prize (1970), the Festival Prizes in Vienna, Acapulco, Teheran, Lyon, Bilbao, Lausanne and Hollywood, etc. He also received the titles of Merited Artist (1977) and Outstanding Artist (1982). – B: 0874, 1489, T: 7103.

**Földényi, F. László** (Ladislav) (Debrecen, 19 April 1952 - ) – Esthete, critic, literary historian, literary translator. He earned a Degree in Hungarian and English Literature from the University of Budapest in 1975. Between 1975 and 1987, he was a contributor at the Hungarian Theater Institute (*Magyar Színházi Intézet*) (1975-1985). He became a freelance writer in 1987. On invitation by the *DAAD Berliner Künstlerprogramm*, he worked in West Berlin (1988-1989, 1990-1991). Since 1991 he has been a professor at the Department of Comparative and World Literature of the University of Budapest. His works include *Melancholy (Melankólia)* essay (1984), in German (1988); *Abgrund der Seele... (Abyss of the Soul...)* (1985); *On the Other Shore (A túlsó parton)* essays (1990), and *In the Net of Words (A szavak hálójában)* (1999). He translated English and German dramatic works into Hungarian. He was honored with the Kelemen Mikes Medal (1985), the Attila József and Kosztolányi Prizes (1996) and the Pro-Literatura Prize (1998). – B: 0874, 0878, 1257, T: 7103.

**Földes László** (Ladislav) (nickname: Hobo) (Budapest 13 February 1945 - ) – Blues-singer, composer and actor. His father was a leftist politician. He graduated from the Chemistry Technical School in Veszprém in 1963, and started to work at the United Incandescent Factory (*Egyesült Ízzó*) in Újpest. He was conscripted into the army in 1964. His higher studies were at the University of Budapest, where he read Hungarian Literature and History in 1964. In 1965, film director Félix Máriássy offered him an admission to the Academy of Dramatic Art and Cinematography; but Földes turned it down. In 1968 he wrote a lyric, *Butler-song (Lakájdal)*, which resulted in a procedure against him, for he left the University, and appeared in three feature and TV films, and also wrote lyrics for the Olympia Ensemble. In 1971, he founded the *Rum pum pumm* clown group. In 1972, his first short story, entitled *The Road (Az Út)*, appeared in the literary review *Life and Literature (Élet és Irodalom)*. He also translated the lyrics of the Sirius Ensemble (Australia) *The Devil's Masked Ball (Az ördög álarcosbálja)*. He appeared with the Sirius Ensemble in Budapest. In 1978 the *Hobo Blues Band* was founded, with Hobo as the vocalist, at a pub in Lajos Street, Budapest. Originally, it was a hobby group but, after the addition of Egon Póka, it became a professional one. They shot a film, entitled: *Bald Dog (Kopasz kutya)*, but its record was soon banned. In the meantime, Hobo received a leading role at the National Theater (*Nemzeti Színház*), Miskolc, where his first production was performed with works of the silenced writer István (Stephen) Eörsi. There was a concert in 1987 with Allen Ginsberg, an American poet. A concert with international artists was performed in Budapest, for Human Rights in 1988. The first Attila József evening was performed at the József Katona Theater, Budapest in 1991. Hobo's American experiences were portrayed in a performance in 1995. He had a contract with the New Theater (*Új Színház*) and staged a François Villon evening, as well as a György (George) Faludy event (2003 and 2004). At the 100th anniversary of Attila József's birth, a staged a new program under the direction of Attila Vidnyánszky. This program reached 147 performances in 7 countries with audiences of 30,000. From 2006, Hobo was a member of the Csokonai Theater (*Csokonai Színház*) in

Debrecen. The Hobo Blues Band made many CD records and albums, including *Esztrád; Hobo Blues of Middle Europe (Középeurópai Hobo Blues); Hunting (Vadászat); Üvöltés I-II (Howling i.ii); Wanderer on the the Road (Vándor az Úton); Book of Vagabonds (Csavargók könyve); Forbidden Fruit (Tiltott gyümölcs); Emigration (Kivándorlás) with Márta Sebestyén; Beside the Campfire (Tábortűz mellett); Pub-opera (Kocsmaopera); Hungary is Faraway (Magyarország messzire van); I Love you Budapest; Bold Dog (Kopaszkutya); American Prayer; Gamepark (Vadaskert); War of the Sexes (Nemek háborúja); Prayers and Mantras (Imák és mantrák); Pearl in the Mud (Gyöngy a sárban); Blues Jim Morrison I-II, and Alien Feathers (Idegen tollak), No-man's Village (Senkifala), and Circus Hungaricus. Hobo also wrote books, such as *Hobo sapiens* (1989) and *Vagabonds' Ten Commandments (Csavargók Tízparancsolata)* (1999), and appeared in feature films as well. The Band was dissolved in 2008, and gave a farewell concert in 2011. Földes is the recipient of a number of distinctions, including the János Déri Prize (1996), the For Budapest Prize (2000), the Life Achievement Prize (2010), and the Kossuth Prize (2011). The Hobo Blues Band is a milestone in the modern music of Hungary. – B: 1031, T: 7103.→**Eörsi, István; József, Attila; Faludy, György; Sebestyén, Márta; Vidnyánszky, Attila.***

**Földi, Imre** (Kecskemét, 8 May, 1938 - ) – Weight-lifter, coach. He learned mining, and became a locksmith at the Coal Mines Co. of Tatabánya (1955-1956). He obtained a diploma in coaching from the School of Physical Training, Budapest (1976). Between 1955 and 1978, he was a competitor in the Tatabánya-Miners' Sports Club (*Tatabányai Bányász S. E.*). From 1959 to 1977, he was a member of the National Team. He achieved 20 world records and 50 national records; he participated in five Olympic Games, and was among the medalists; in 1972 was Olympic Champion. In 1965, he was World Champion. In 1977 he withdrew from competition and worked as a coach for the Tatabánya-Miners' Sports Club. For 18 years, he was foremost in the world as a weight-lifter. He was one of the most successful Hungarian representatives of weight-lifting. He received the Hungarian Heritage Prize (1999) and was elected the Sportsman of the Nation in January 2007. – B: 0874, 1031, T: 7103.

**Földi, Zoltán** (Budapest, 3 May 1885 - Budapest, 5 March 1987) – Chemical engineer. His higher studies were at the Budapest Polytechnic, where he acquired a Degree in 1917. Soon he became an assistant professor there. From 1918 to 1945, he worked in leading positions at the Chinoin Pharmaceutical Chemical Industry, and was its General Manager between 1941 and 1945. From 1946 to 1978, he was Manager of the research laboratory at Chinoin. Later, he worked there as a technical-economic counselor. From 1948, he taught at the Polytechnic and wrote the textbook, *Basic Operations in Organic Chemistry (Szerves kémiai alapműveletek)* (1949). His name is connected to pharmaceutical products, such as *Papaverin synthesis* (1930), *Perparin* (1928-1930), *Novourit*, with Béla Issekutz (1930), *Insulin manufacturing in Hungary* (1924-1928), *Ultraseptyl, Deseptyl* and *B1-vitamin synthesis* (1937-1938). After World War II, he had an important role in starting *Penicillin* manufacturing in Hungary. With his co-workers, he registered some 80 patents. He was a member of a number of scientific societies abroad and at home, as well as a member of the Hungarian Academy of Sciences (1956, 1970). He was a recipient of the Vince Wartha Memorial Medal (1960) and the Kossuth Prize (1952). – B: 0883, 0878, 1406, T: 7103.→**Issekutz, Béla.**

**Földvár** (now Feldioara, Transylvania, *Erdély*, now in Romania) – A settlement built on the banks of the River Olt. It is one of the most ancient settlements of the Barcaság region. According to some historians, the Avars had built earthworks there, and the name of the settlement was derived from this “earth fortification – “*föld-vár*”. King András II (Endre, Andrew) (1205-1235), at first gave permission to the Teutonic Knights to build a wooden fortress; then, in 1222, to construct a stone fortress that was named *Castrum Sanctae Mariae*. King Béla IV (1235-1270), in a Charter dated 1240, gave the fortress with a number of villages in the Barcaság to the Cistercian Order. The Tartars ravaged the town and fortress in 1345. In 1427 King Zsigmond (Sigismund of Luxembourg) held a National Assembly within the walls of the fortress. In 1604, during the Basta reign of terror, the people of the town found refuge in the fortress. They were released for a ransom of 7000 florins. It was here, in 1690, that Count Imre (Emeric) Thököly called upon the country to join him against the Habsburgs, in a freedom fight for Hungary. The church of Földvár was probably built in the early Gothic period, and it still shows a strong Romanesque influence. Notably, there is a round, carved block of stone taken from the earlier church and walled up over the door of the northern aisle. In the middle of the stone block there are 7 six-pointed stars and a crescent moon. The new moon is the ancient heraldic emblem of the Szeklers and, in its semi-circle the seven stars symbolize the original seven fortresses of Transylvania. Later, seven bastions in the coat of arms of Transylvania replaced them. The circular writing on the stone reads: “*Anno Mini Millesimo Quadringen-Tesimo Septuagesimo Primo*” according to Antal (Anthony) Kurz. In the steeple of the church, there is an interesting church bell 110 cm in diameter with the bottom rim of 120 cm. On the bell’s upper rim there are two lines written in small letters in the following verse form: “*Hac cristi tuba pellatur grandinis turma - Turbinis conflictus, strengatur fulminis ictus*”. Although the year is not marked on the bell, one may ascertain from the inscription that it was cast at the end of the 15th century, thus rendering it as old as the church. Földvár’s church was for a long period the Cathedral of Barcaság, but was transferred to Brassó (now Brasov, Romania) in 1379. – B: 1336, 1020, T: 7680.→**András II (Endre, Andrew), King; Béla IV, King; Zsigmond King; Thököly, Count Imre; Basta, Giorgio; Szeklers.**

**Földváry, Gábor Zoltán** (Gabriel Zoltan) (Budapest, 7 February 1931 - ) – Geologist, paleontologist, writer. He completed his secondary education in Hungary and Germany; studied Geology and Biology major at the University of New South Wales (1957-1966 part-time), obtained a B.Sc. and a M.Sc. in 1969 (thesis title: *Stratigraphy and Palaeontology of the Bogan Gate – Trundle district of NSW*). He married Beryl Searle in 1956 and had four children family. He was Curator of the fossil collections of the Department of Geology and Geophysics, University of Sydney (1966-1991); since 1991, he has been a research associate at the School of Geosciences there. From 1989 he has also been curating in the fossil collection of the Australian Museum. His published works include (1) papers on invertebrate fossils, e.g. a new species of trilobite *Cheirurus (Crotalocephalus) regius* (1970); *Siluro-Devonian Invertebrates from Central New South Wales*, 2000); *Pseudoplasmopora in the Siluro-Devonian of Eastern Australia* (2006); (2) a book *Geology of the Carpathian Region (A Kárpáti Terület Földtana)* (World Scientific, Singapore, 1988), a comprehensive summary and synthesis; (3) a chapter on geology for the book *Quest for a New Central Europe*, ed. J. Varsányi, Australian Carpathian Federation Inc. Adelaide-Sydney (1976); (4) papers published in the *Geology*

*Yearbook of the University of Sydney*, e.g. *Generic and specific naming of fossils* (1971); *The Fossil Collection and Curating* (1973); *Man's ancestors in the Pliocene* (1974); *The Banat Mountains* (1976); *Loess in the Light of Recent Advances* (1977); *Geology of the Bihar Mountain Complex in Transylvania* (1978); *The Hungarian Opal* (1980); (5) "Catalogue of palaeontological type specimens in the Department of Geology and Geophysics" in: *Bureau of Mineral Resources, Report 224* (1981); (6) "On nature conservation in Australia" (in Hungarian) in: *Búvár (Naturalist)* (1977); (7) Papers on historical topics, e.g.: "Era of 'adventures' or deterrent campaigns?" in *Magyar Múlt (Hungarian Past)* (1974); "History – A brief survey of its characteristics", *ibidem* (1980); "The Serbian theater of war in World War I" (in Hung.) *ibidem* (1992); (8) papers on cultural themes, e.g.: "Thoughts on Islam" (*Gondolatok az iszlámról*) in: *Hunnia* (1996); "Reflections on the historic development of the race concept in anthropology" in *Magyar Múlt* (1994), and "Settlement of Magyar and related ethnic groups in Transylvania", *ibidem* (1989). He is winner of the second prize in a world wide competition held by the Rákóczi Foundation, Toronto, Canada (1982), entitled "Magyar Consciousness Abroad", published in *Lármafa* (1984). He has been President of the Hungarian Historical Society, Sydney since 1982, also Editor of its journal, *Hungarian Past (Magyar Múlt)*, for vols. xi-xxvi, and Géza Németh's interview held in the National Museum, Budapest, appeared in: *Természet Világa (World of Nature)* (1997). He was awarded the Gold Medal of the Árpád Academy, USA in 1988, the Cross of the Order of Merit of the Republic of Hungary, and presented with the Knightly Order of Vitéz, N.S.W. From 1982 to 1997 he was concert secretary for the Sydney Mozart Society for 10 years. Gábor Földváry is Editor and Chief Contributor of the *Hungarian World Encyclopedia (I, II, III)* – B: 0978, T: 7456.→**Földváry, Miksa.**

**Földváry, Károly** (Charles) (Gyergyószentmiklós, now Gheorgheni, Erdély, Romania, 26 November 1809 - Cegléd, 14 December 1883) – Colonel of the Hungarian National Defense Forces. He chose a military career but resigned from his rank in 1835. When the National Defense Force was established during the Hungarian War of Independence (1848-1849), he enlisted as a Captain in the famous 3rd battalion. He excelled in the fight against the Rác (Serb irregular) forces at Versec, where he was promoted to Major. He took part in the battles of Tapióbicske, Isaszeg, Nagysalló, Vác and Debrecen. At Tapióbicske, the battle started badly but his action succeeded in turning around the misfortune and, after the victory, he was promoted on the battlefield to Lieutenant-Colonel. During the Battle at Vác, within five minutes, two of his horses were shot from under him, and 75 bullets pierced his uniform, as well as the tricolor he carried, without wounding him. So grew his reputation that "no bullet can harm him". Again he was promoted to Colonel on the battlefield. He capitulated only after the Világos armistice and, at first, was sentenced to death by the Austrians; but the sentence was commuted to 18 years of incarceration. In 1850 he was pardoned; but in 1852 he was suspected of conspiracy in Transylvania (*Erdély*, now in Romania) and was imprisoned for another two years in Szeben (now Sibiu, Romania). He was released under the condition that he settle in Salzburg, Austria. Instead he went to Italy in 1862, and was commander of the Hungarian Legion until its disbanding. After the Compromise of 1867, (*Kiegyezés*) between Hungary and Austria, he returned to Hungary. – B: 0883, 0942, T: 3233.→**Freedom Fight of 1848-1849.**

**Földváry, Miksa** (Maximilian) (Siklós, 24 July 1877 - Balatonfenyves, 6 January 1945)

– Forestry engineer, naturalist. He was Gábor Földvály's grandfather. He completed his studies at the Mining and Forestry Academy of Selmecebánya (now Banská Stiaavnica, Slovakia) and received his qualifications there. He started his profession in the Civil Service in 1901, and became a teacher in a special school for forest rangers, forest overseers and forest wardens. In 1925 he was appointed Head of the Forest Directorate of Debrecen. As Secretary of State he headed the Forest Directorate of Kaposvár. In 1938 he became Executive Vice-President of the Nature Conservation Council. He is regarded as one of the pioneers of nature conservation in Hungary. He was the author of numerous articles on the subject, especially in the journal, *Bulletin of Natural Science (Természettudományi Közlöny)*. His publications include *The Natural Memorials of the Bakony Mountains and its Foothills (A Bakonyhegység és a Bakonyalja természeti emlékei)* (1934); *The National Nature Conservation in our Days (A hazai természetvédelem napjainkban)* (1934); *Northern Transdanubian Nature Memorials (Felsődunántúli természeti emlékek)* (1935), and *The White Lake of Szeged as a Protected Bird Sanctuary (A szegedi Fehértó, mint védett madármenedékhely)* (1940) - B: 0883, 1587, T: 7456. → **National Parks; Natural Protection Area; Földvály, Gábor Zoltán.**

**Folk Architecture** – Folk architecture flourished in rural areas and included permanent and semi-permanent buildings for the use of people or animals. The character of the buildings shows a continuous development from mud houses to the brick buildings fitted with firewalls. Houses built for habitation also reflect the changes in family structures. Researchers primarily classified dwellings according to their cooking and heating facilities; but they also studied the subdivisions within the house, like kitchen, living room, bedroom, cellar etc. The types of doors, windows, gates and fences were also subjects of the studies. There were stables, coach-houses and wells on the properties. As the architecture of the buildings developed, the exterior and interior decorations on the houses became more artistic. Studies of these decorations developed into the fields of folk art and folk-decorating art. New technology and new demands after World War II changed the rural architectural style and almost completely destroyed the traditional buildings in the Hungarian villages. Therefore, the restoration and protection of the remaining examples of traditional folk architecture became an urgent and important task. Some of the rural churches, bell towers and belfries are masterpieces of folk architecture. Old mills, also serving as dwellings, were classified according to their product or the type of energy used for their operation, i.e. wind or water mills. – B: 1134, 1020, T: 7663.

**Folk Art** – In wider sense the collective name for folk poetry, folk dance, folk costume, folk music and folk decorative art. In a narrower sense it is a collective name for the potter's art, woodcarving, weaving, embroidery, etc. Folk art incorporates a remarkable system of symbols. Much of it is an ancient inheritance and its origins can be traced back to the first awakening of humanity. Often identical and similar symbols expand over the world. Pictorial records are decorative elements of unspoiled folk art; they are suitable for expressing thought, similar to writing. All the peoples of the world made revelations by artistic expressions. The art of the Hungarians reaches back to the time before the settlement era; their folk art was already developed when they arrived in the Carpathian Basin. However, because of the fragility of utility objects decorated by carving or embroidery, are not time-resistant, these relics in archeological findings are not considered significant. Cosmetic powder horns of the 9th century, discovered around

Sopronkőhida and Tatabánya, are among the more significant finds. According to traditional demands and local taste, master potters, carpenters, furriers, blacksmiths, goldsmiths and tailors immortalized motives taken from ancient times and later centuries. Such are the tree of life, birds, flowers, the rosette motives and pottery shapes. Carvers also used ancient symbols, such as the sun, as well as flower motives to decorate doors and wooden grave-posts on tombs. Decorative elements of different origin appear in a harmonious unity in folk art of one or another area. Folk costumes, similarly to folk dances, folk music, and other branches of folk art, were richest in the second half of the 19th century. As differences between villages and cities were fading, folk art became increasingly impoverished. – B: 1078, 1153, T: 7684.→**Hungarian Folk Art; Folk Ensemble, Hungarian State.**

**Folk Ballads** – Originally, folk ballads were stories based on pagan ritualistic beliefs and heroic sagas. After the Hungarians converted to Christianity, the original pagan content was disguised and later termed as “balladic obscurity”. The folk ballad is a short, compact, lyric narrative poem, the action often unfolding in dialogue form. It tells of socio-psychological problems; but romantic motives also play a significant role. It was preserved by folk tradition and fashioned into a masterpiece by oral tradition. The dramatically tense, gay or sad stories are usually sung. Among European folk ballads the Transylvanian (*Erdély*, now in Romania) Hungarian folk ballads occupy a prominent place. Among the Hungarian Folk Ballads are *László Fehér*, *Sári*, *Mrs Biró*, *Madár Cinöge*, *Bandi Angyal*, while the Szekler ballads include *Mrs. Kelemen Kőműves*, *Kata Kádár* and *Iлона Budai*. – B: 1150, T: 7617.

**Folk Belief** – The ancestral belief of Hungarian peasantry. Based on the knowledge of nature, it is closely connected with folk religion. It contains thematically traditional fantasies concerning the universe (the changing of moon, sun, legends of stars, world tree), human life (birth, love, magic, marriage, death), magical practices concerning the soul, the world of the hereafter and activities of every day life, housework, farming. Traditional occasions, important dates, beliefs, special days are still practiced in the form of festivities. These forms of beliefs often preserve some ethnic characteristics as remnants of certain ancient religion. Such are the characters of the Hungarian *Blessed Lady*, *the Shaman* and the *Garabonciás*. The earliest written documents concerning the religious faith of Hungarians are in the decrees of King István I (St Stephen, 997-1038) and King László I (St Ladislav, 1077-1095), the references of chroniclers starting in the 15-16th centuries, sermons, references in religious disputes, actions by the church, laws and anti superstition declarations. – B: 1134, 1020, T: 7682.→**István I, King; László I, King; Garabonciás.**

**Folk Carving, Art** – Product of the creative work of a peasant: a carver, a carpenter, a joiner, a cooper, all pursuing this form of art either for others or for his own pleasure. The oldest of these relics are found in an area spared from the destruction of the Turkish wars (1526-1686). A few master beams, a pillar holding up the master beam, doors or doorposts preserved the oldest carved relics. The oldest decorative element of these is the rosette, a carved geometrical decoration. The most beautiful examples of doorposts decorated with rosettes are known from Kalotaszeg and Szeklerland (*Székelyföld*, Transylvania, *Erdély*, now in Romania). It was also the Szeklerland that preserved the most impressive relic, the *Szekler Gate* (*Székely kapu*), the entrance gate to a homestead.

The oldest known so far, with its clearly geometrical decorations, was prepared in 1673, to embellish the front of the Franciscan cloister at Mikeház (now Mica, Transylvania, Romania). From the second half of the 18th century, there were more decorated objects, originating in 1797 that preserved the old style woodcarving. Besides the geometrical decorations of the two ancient Sun-wheels, flower ornaments began to appear. The increase in the number of decorated objects and flower ornaments characterizes the continuing existence of folk carvings in the 19th century. Among the peasants, the demand for attractive objects grew, and also for special carvings created by a number of carvers. Often flowers took over those surfaces decorated earlier by the rosette, star, saw-tooth and the wavy line. – B: 1362, 1020, T: 7648.

**Folk Costume** – Specific style of costumes developed according to different regional needs. Areas of typical Hungarian dress are Galgamente, Lóc, (now in Slovakia), Csángó, Gyimes, Kalotaszeg, Torockó, Moldavia, Székelyföld (in Transylvania, *Erdély*, now in Romania), Hollókő, Hosszúhetény, Kalocsa and surrounding areas; Kozár, Matyóföld, Ormánság, Püspökbogád, Sárköz. National folk costumes were still used after the middle of the 20th century by the Palóc (inhabitants of north-eastern Hungary), in Transylvania, and around Kalocsa. The baggy pants and Szekler stockings were all made from material produced at home until the end of the 19th century. Old Hungarian pieces of clothing are the *suba* (wide sheepskin coat) made of leather; pelisse and the *ködmön* (sheepskin waistcoat), the *szűr* (long, embroidered felt mantle of the Hungarian shepherd) and the *guba* (Hungarian peasants' long, sleeveless frieze cape). The shepherd's *cifraszűr* of the Nagyalföld (Great Plain) was the most elaborately decorated. Mainly factory-produced materials are used to make more recent national costumes; the local taste prevails only in the cut and decoration. Now they are worn only on festive occasions. –B: 1138, 1020, T: 7684. →**Szűr Mantle**.

**Folk Decorative Art** – A branch of folk art appeared on decorations of cultic and utility objects and on small sculptures. In the initial stages of development, the decorative art appeared on wooden sculptures and on peasant dishes, later, on clothing and carvings. It was extended to religious sculptures, on figurines of magical powers regarding crops, crockery, bark, bone, wood, horn and clay objects, textile, body painting and tattooing. The elements of decoration are quite varied; geometrical patterns and natural phenomena in a simplified rendition were widespread everywhere. Some motives were indigenous to certain areas, peoples, or seasons of the year. – B: 1138, 1020, T: 7684.

**Folk Ensemble, Hungarian State** (*Magyar Állami Népi Együttes*) – A professional performing folk ensemble, founded in 1951 to promote and interpret Hungarian folk music and dance-folklore. The first (founding) artistic leaders were László (Ladislav) Gulyás (orchestra), Imre (Emeric) Csenki (choir) and Miklós (Nicholas) Rábai (dance group). In the first programs, the string orchestra, accompanied by the dance group, featured the transcriptions of peasant music and recruiting literature, while the mixed chorus performed choral works by Béla Bartók, Zoltán Kodály, Lajos (Louis) Bárdos, and works of the more recent generation of composers. The dance group performed some suites and genre pictures based on folk customs. Most of them were composed by Miklós Rábai; in addition, László (Ladislav) Náfrádi, later Tibor Vadasi and Dezső (Desider) Létai, prepared some dance pieces. In the 1970s, the aspects of the Ensemble were characterized by concert-like programs, the three performing component groups playing

in parity, though these groups often undertook independent, separate appearances as well. From the mid-1980s, the structure of the Ensemble underwent a change. The chorus withdrew from the Ensemble and the accompaniment of the dances was handled by a separate small orchestra, modeled on peasant orchestras. With the direction of the new artistic leader, Sándor Timár, since the 1980s, the Ensemble has powerfully conveyed the results of the latest dance-folklore studies, in the form of chamber-dances or large-scale suites. During its existence, the Ensemble has been making guest appearances in North and South America and in numerous Asian countries, as well as in the European Union. – B: 1445, T: 7456.→**Folk Art; Folk Dance; Rábai, Miklós; Bartók, Béla; Kodály, Zoltán; Bárdos, Lajos; Csenki, Imre; Timár, Sándor.**

**Folk Fiddling** – Aside from Gypsy musicians, there is a strong tradition of purely Hungarian folk fiddling. It is particularly important in the mountainous region of Transylvania (*Erdély*, now in Romania), famed for its music as well as for its legends. This area has a large Hungarian ethnic minority and they have successfully maintained their culture and way of life due to the region's isolation. Transylvania has a special place in the hearts of Hungarians, since it is a vital link to their past. It was largely a feeling of solidarity with their ethnic cousins across the border that led bands such as *Muzsikás* to start the "Dance House" (*táncház*) movement in the 1970's, recreating in packed venues the old peasant songs, dances and tunes. Until then, folk music in towns had been little more than a tool of control by the state, a hollow token of cultural diversity. – B&T: 1323.→**Gypsy Band; Muzsikás; Dance House Movement.**

**Folk Legend** – an anecdotal form of poetry, striving for historical correctness, usually linked to historically accurate time periods and figures. Although its subject is imaginary and at times prodigious, the raconteur as well as the audience took it more seriously than folk tales and attributed historical validity to it most of the time. The main types of folk legends are local, historical, epic and ethnographic. Local legends provide an explanation for a geographic location, endowed with extraordinary powers, or for a natural phenomenon. The historical legend preserves the memory of a historical figure or an event. The epic legend is about the history of the clan, the tribal society; however, in most cases it is the story of the founding ancestor blended with real and mythical features. Ethnographic legends usually tell the origins of the world, the heavenly bodies, peoples, animals and plants. Most of our folk legends originated among the Hungarians. According to the latest research, the Hungarian-Hun legend cycle is no exception. – B: 1178, 1153, 1020, T: 7617.

**Folk Music** – Hungarian folk music is the result of the musical creativity of Hungarians, developed through traditions and over time. In its most ancient form, the repetitive motives are made up of one or two sounds. Its higher form is the pentatonic system without half notes, and the repetition of the melody a fifth interval lower. The archaic Hungarian pentatonic system, as shown by the structure and rhythm of the songs, bears a noticeable similarity to the music of some Turkish cultures. The legend of Bishop St Gellért reports the existence of a Hungarian song at the beginning of the 11th century. From the new ethnographic collections, we find proof that ancient verse styles of ritual songs, wake-songs, religious and historical songs also existed in Hungary, while medieval folk songs disappeared. Chronicles mentioned them along with the disapproval of the activities of bards, minstrels, jesters, lutenists and gleeman. Flower songs

disappeared, as their practitioners were persecuted and threatened with fire by austere preachers of the 16-17th centuries. Only from the 18th century on are Hungarian folk songs found in larger number, recorded in manuscript form in song books. The basic form of Hungarian folk song is the ancient two-beat octet from where the three- and four-beat lines developed. *The Hungarian Courier (A Magyar Hírmondó)*, published in Pozsony (now Bratislava, Slovakia), encouraged the systematic collection of folk songs. The interest in Hungarian folk songs grew around 1900 because of the research work and collecting, based on the decision of the Hungarian Academy of Sciences in 1833. However, it remained without significant results. In 1896, the phonograph recording of Béla Vikár indicated the beginning of a new period. In 1905, Zoltán Kodály, and in 1906, Béla Bartók started their collecting work. The publishing of their collection of approximately 10,000 tunes was undertaken by the Hungarian Academy of Sciences. The international importance of the work of folk music researchers, trained by Kodály to create a systematic, monographical, historical and comparative work, was officially noted by the International Folk Music Council at its 1964 meeting in Budapest. The number of folk music instruments indicates a much stronger use than found today. In Transylvania (*Erdély*, now in Romania) there are only traces of them, except for the zither, which is still in use. Village people used to play folksong tunes arranged for musical instruments. There are still some undiscovered ancient songs yet to be collected. – B: 1058, 1197, 1134, 1138, 1020, T: 7684. → **Bartók, Béla; Kodály, Zoltán; Vikár, Béla; Dance House Movement; Folk Ensemble, Hungarian State.**

**Folk Music Instruments** – The zithern (*citera*), Jew's harp, bagpipe, recorder, swineherd's pipe and the shepherd's horn were used widely in Hungary for a long period of time. The jughorn or jugpipe (*köcsögduda*) that sounds like the cow's moo, was used by the minstrels and it is still around; but the bagpipe was the instrument of choice for dance music. – B: 1138, 1020, T: 7684. → **"Köcsögduda"; Jugpipe.**

**Folk Poetry** – a product of folk traditions. It represents the poetic creativity of Hungarians. A one or two-line naturalistic image often introduces the message. The pastorals, as well as the romantic or military songs are characterized by a sentiment-free realism. Hungarian folk ballads represent a high esthetic standard with their beauty of form and richness of content. The historical or local ballads usually have a realistic core. The majority of Hungarian folk poetry expresses the desires and grievances of the people. Like a subterranean stream, folk poetry preserved the Hungarian literary language unscathed. – B: 1138, 1020, T: 7617.

**Folk Relics** – any building or object significant in the ethnologic, historic, artistic, economic or sociologic development of agricultural or other rural societies. Law protects folk relics as scientific and cultural treasures. Larger groups of buildings are preserved and protected as heritage sites. – B: 1134, 1020, T: 7663.

**Folk Song** – (1) As used by the people, it is simply a song opposite to a melody. In the West, until the 16th century, and in Hungary until quite recent times, they live on as varied folk songs. Music researchers generally agree that folk customs, accompanied by music, are closely tied to folk music. (2) Church songs, congregational songs. According to initial suggestions, they are rooted in the Ancient and Medieval *Kyrie Eleison*, the repeated reply of the people to the invocation of the litany, on its own or expanded by the vernacular. Its use as a refrain was also customary among the verses of the *Te Deum* and

anthems. – B: 0886, 1031, 1020, T: 7684. → **Bartók, Béla; Kodály, Zoltán; Folk Music; Dance House Movement.**

**Folk Tale** – Folk poetry in prose, often closely related to myth. More than half of the Hungarian folk tales are stories of fairies carrying one into the world of myth. After the conversion to Christianity, the pagan faith was forced to live under the guise of tales. Much of the rich, imaginary world of the ancient faith was preserved in these fairy tales and thus became timeless. Other types of folk tales are amusing, mendacious, animalistic as well as legendary. The folk poetry character connects folk tales by innumerable threads to the formative, contemporary society, its worldviews and primitive religious beliefs. – B: 1153, 1020, T: 7617.

**Fonó, Albert** (Budapest, 2 July 1881 - Budapest, 22 November 1972) – Mechanical

engineer, inventor. He graduated from the Budapest Polytechnic in 1903, and continued his education in foreign universities on scholarships. In 1909 he received a Ph.D. in technical sciences. Between 1909 and 1950, he worked as an independent consultant and design engineer. He designed the power engineering for several Hungarian companies in this capacity. In 1915 he offered a design of an aerial torpedo, working with jet propulsion, to the Austro-Hungarian military. The military leaders could not comprehend the significance of this invention and refused the offer. In 1923 he invented a steam boiler working on new principles; and in 1928 he patented an air-pressure

equipment for mines. He was the first to suggest the use of jet propulsion for high-speed flying machines. It was patented in Germany in 1932, long before the practical use of the idea. He had several publications in the fields of power engineering, transportation technology, metallurgy and electro-techniques. He was advisor to the design offices of the Hungarian Ministry of Metallurgy and Machine Manufacturing from 1950 until his death. During the last decades of his life, he was working on problems related to the power engineering of industrial parks, metallurgical works and mines. He was a corresponding member of the International Academy of Astronautics; chaired the Hungarian National Committee at the Global Energy Conferences until 1970, and was corresponding member of the Hungarian Academy of Sciences (1954). He was awarded the Kossuth Prize (1956). – B: 0883, 1408, 1020, T: 7662, 7677.

**Fonyó, István Jr. (Steve)** (Montreal, PQ, Canada, 29 June 1965 - ) – Sportsman. He is a Canadian of Hungarian origin, who lost a leg to cancer at the age of 12, embarked on a cross-Canada marathon to raise funds for cancer research. In doing so, he followed in the footsteps of Terry Fox but, unlike Fox, who had to abandon his marathon when his cancer returned, Fonyó completed the coast-to-coast marathon. He began his quest on 31 March 1984 at age 18, and completed it on 29 May 1985, covering 7924 km and raising \$13 million Canadian dollars. The early part of his run was overshadowed by the memory of Fox, and some Canadians criticized him as a copycat. Despite this, he persevered and, as he progressed beyond Fox's stopping point he eventually won recognition in his own right for his efforts. This achievement was marred by grief in the same year when his father died of lung cancer. In later years, he suffered from depression and faced legal

difficulties, but eventually recovered. He later studied aircraft maintenance and, as of 2004, was working as head mechanic of a limousine company. There is a “Steve Fonyo Drive” (a road) in Kingston, Ontario, named after him, and also a “Steve Fonyo Beach” in Victoria, British Columbia, where he ended his run. He was awarded the Order of Canada in 1987. However, owing to a slew of criminal convictions – cocaine addiction, fraud, theft and impaired driving – among others – the 44-year-old was stripped of the award on December 10, 2009. – B&T: 1031.

**Fonyó, István Róbert** (Stephen Robert) (Óbuda, 11 May 1942 - Tihany, 18 March 1997) – Poet. He attended high school in Budapest. In 1967 he moved to Austria, and later he settled in Sweden and in 1990 he returned Hungary. He traveled in many parts of the world, mainly in Asia and the Far East and gathered a valuable collection of artifacts. He returned to Hungary in 1990 and settled in Tihany with the plan to open a museum for his collection. He produced eight volumes of poetry, among them *The Black Bird (A fekete madár)* (1984); *We Keep Watch by Night (Virrasztunk az éjszakában)* (1986); *I was Left Alone (Egyedül maradtam)* (1986), and *The Bell Tolls, poems 1990-1995 (Kondul a harang, versek, 1990-1995)*. He left behind some unpublished manuscripts. – B: 0878, 0932, T: 7103.

**Foothills Insurrection** – This was a *Kuruc* uprising against Habsburg rule. In September 1695, a former serf, Tamás (Thomas) Esze of Tarpa and the former Kuruc lieutenant, Albert Kis, led the uprising from the mountains of Nagybánya, when the peasants swore allegiance to Count Imre (Emeric) Thököly. In the following year, they continued to organize from County Bereg. On 1 July 1697, led by a judge in Végerdő, György (George) Szalontai, the insurgents surprised and slaughtered the German guards and took the forts of Tokaj and Sárospatak. The War Council of the Imperial Court dispatched three cavalry and one infantry regiments and 5000 cuirassiers to subdue the insurgents, then called the nobility to arms. In the two battles fought at Harangod in early July, the Kuruc were beaten and rewards were posted for capturing their leaders. The Imperial Army, marching against Tokaj, plundered the city of Tarcal. On 17 July, the insurgents abandoned Tokaj to the superior forces and withdrew into the Bereg woods. In 1699, the War Council disbanded certain Hungarian military units and the soldiery of the border fortresses. The disbanded soldiers joined the covert Kuruc forces, increasing their numbers. In mid January 1702, György Szalontai, one of the leaders of the failed uprising, went to Poland to visit the recently freed prisoner of the Bécsujhely (Wiener Neustadt, Austria) prison, Prince Ferenc Rákóczi II and begged him to lead the insurrection. – B: 1230, 1153, 1020, T: 7677. → **Esze, Tamás (1); Kis, Albert; Thököly, Count Imre; Freedom Fight of Rákóczi II, Prince Ferenc; Kuruc; Kuruc Age.**

**Forbát, Alfréd** (Pécs, 31 March 1897 - Vällingby, Sweden, 23 May 1972) – Architect and painter. He began his studies at the Budapest Polytechnic and continued in Munich, where he received an Engineering Degree in 1920. Between 1920 and 1922, he worked as a project engineer at constructions, for the office of W. Gropius in Weimar, Germany. In 1922, he became an independent architect in Weimar and supplemented his income with placard designing and other graphic advertisements. Later, he worked in Saloniki, Greece, then in Berlin, mainly designing residential developments. Next, he designed residential buildings in Athens, Greece and in Pécs, Hungary (1933-1938). He settled in Sweden in 1938. There he designed residential buildings and was a guest lecturer at the

Stockholm Technical University. He designed improvements for several cities in Sweden. His early paintings reflected the influence of *Bauhaus*, such as the *Abstract Composition* (1921), and his later pictures that of *Neue Sachlichkeit*. Some of his works are in the collection of the Hungarian National Gallery and at the Janus Pannonius Museum, Pécs. – B: 0883, 0934, 1409, T: 7663.

**Forbáth, Imre** (Emeric) (Fuchs) (Böhönye, 17 November 1898 - Teplice, Czechoslovakia, 16 May 1967) – Poet, journalist, physician. He started his medical studies in Budapest and completed them in Prague. He participated in the cultural life of the Hungarian Soviet (Council) Republic in 1919. After its fall in 1919, he settled in Prague. His first volume of poems appeared in Vienna and his poems were published by the journals *Way (Út)*, *Our Age (Korunk)*, and others. He edited the first Petőfi volume in the Czech language. He was physician of the miners at Ostrava, and contributed to the weekly *Hungarian Day (Magyar Nap)*. In 1939 he escaped from Czechoslovakia to London and joined the Anti-Fascist movement. After 1945 he served for a while in the Czechoslovak Foreign Service. Later, he retired to Teplice and continued his literary work. He was one of the prominent Hungarian literary figures in Czechoslovakia. His works include *Poems (Versek)* (1922); *Lumbermen (Favágók)* (1930); *Complaint and Hope (Panasz és Remény)* (1942); *Waiting for a Miracle (Csodaváró)* (1967), and *Collected Writings, vol. i* (1989). – B: 0883, 0878, 1257, 1890, T: 7103.

**Forced Labor Service** – In the autumn of 1950, the Ministry of Defense, on Soviet advice (rather “recommendation”), did not call up for regular military service those youths of military age, who had been declared unreliable for political reasons. With the consent of the Political Committee of the Hungarian Workers’ Party (Communist), by departmental instruction, ordered the directorate of the military supply service to organize battalions of forced labor and independent companies, and to summon those eligible for military service, but declared politically unreliable by the Class Background Commission. Forced labor service was the fate of the kulaks and other politically unreliable people, declared to be “class enemies” or “alien elements”. A list was compiled in 1953 that included *capitalists, businessmen, high-ranking state officials, army officers, priests, members of the Volksbund, the Arrow Cross Party and Jehovah Witnesses*. Their relatives were all registered as alien elements. The first call-up occurred on 28 July 1951, the last one on 16 November 1954. In the period 1951-1954, 15,300 persons were called for a service of 26 to 29 months’ duration. They were sent to forced labor in military building constructions, quarries; and from January 1954, in coalmines. Their national commander was Pál (Paul) Maléter (then a colonel). The forced labor service was dissolved on 23 October 1956, during the Revolution, later tacitly sanctioned by the government on 18 December 1956. – B: 1363, 1020, T: 7456.→**Maléter, Pál; Deportations.**

**Fordson Tractor** – Designed by József Galamb for the Ford motor vehicle factory in Detroit. Manufacturing of the device began between 1918 and 1920. Galamb’s design served as a model for tractor manufacturing in the US. – B: 1078, T: 7662.→**Galamb, József.**

**Forest Economy in Hungary** – By the terms of the Peace Treaty of Versailles-Trianon, on 4 June 1920, Hungary had to renounce 70% of its former land and, with it, lost 84% of its forests. Soon afterwards work began on reforestation and a more effective protection

of existing forests. After 1945, logging intensified and, by 1960, the exploitation of timber was conducted on such a large scale that, against the annual timber growth of 2,850,000 cubic meters, 3-3.5 million cubic meters were harvested annually, a disproportion that could only be overcome with the maturation of new forest plantations. In 1993, forests covered 17% of the country; 45 % is oak. At higher altitudes, and on the northern slopes, beech forests are dominant and, together with hornbeam they amount to 20% of all the forests. Pine forests make up only 6% of the total. In the more recently planted forests, poplars predominate because of their high cellulose-content that is in great demand. – B: 1051, 1020, T: 7456.→**Trianon Peace Treaty.**

**Forest Veneration** – The veneration of forests was carried on occasionally in select places, not only in prehistoric times among pagan nations, but also in the modern age. Such select places were mostly near waterfalls deep in the forests, around huge trees where, according to pagan beliefs, a god was dwelling. The sound given by waterfalls and trees was regarded as a message from the god; the interpretation was the duty of the priests, as well as carrying out the context of the message. In the days when architecture was still in a primitive stage, the forest was a more dignified place for a god than a primitive edifice built by humans. In Greece, people gathered in sacred forests to honor the goddess Cybele. There were 32 sacred sites in Rome, where the felling of trees was forbidden. The ancestors of the Hungarians occasionally chose sacred forests for the purpose of worship. While settling down in their present land, forests became permanent sites of sacred sacrifice, such as Tarcál, Sátorhalma and Pannonhalma. Every clan had its sacred forest. These forests were documented after the introduction of Christianity as *'foresta sanctorum regnum'*. The kings of the Árpád Dynasty (1000-1301), in order to stop lingering heathen religious practices, took over these places and built churches and convents on sites where sacrifices were held formerly. (Bél-Háromkút, Bakonybél, etc.) The cloisters established in sacred forests became the heirs to the gifts formerly given to the chieftain and the heathen priest and also the special tax offered on certain occasions to the god. – B: 0942, 1020, T: 7682.→**Árpád, House of.**

**Forgách, Count Béla** (Keszthely, Hungary, ca 1840 - ?) – Composer, inventor. In 1884, he invented a sheet music writing machine coupled with a piano. He published many Hungarian songs and dance music around 1894. These compositions are kept in the Hungarian National Music Library. – B: 1197, 1020, T: 7662.

**Forgó, László** (Ladislav) (Budapest, 5 May 1907 - Budapest, 24 June 1985) – Mechanical engineer, inventor. His higher studies were at the University in Zürich, Switzerland, where he received a Degree in Mechanical Engineering (1929). He was a developing engineer at the Radiator Works, Budapest (1930-1948). From 1951, he worked in various leading positions at the Thermal-Technical Research Institute (*Hőtechnikai Kutatóintézet*), Budapest. His inventions include the *Invert-Grid*, the *Sterilizer*, and the famous *Heller-Forgó* air condenser-cooler, applied in cooling towers, invented with László Heller in 1958. Among his works is *Erfahrungen mit einer luftgekühlten Kraftwerks-Kondensationsanlage (Experience with an air-cooled condensing unit power plant)* with others, (1958). He was a corresponding member of the Hungarian Academy of Sciences (1985) and a recipient of the Kossuth Prize (1952). – B: 1138, 1153, 1160, T: 7103.→**Heller-Forgó; Heller, László.**

**Forgon, Pál** (Paul) (Szernye, now Rivne, Carpatho-Ukraine, 7 January 1913 -

Nyíregyháza, 31 May 2004) – Reformed Bishop in Carpatho-Ukraine, writer. He attended high school at Beregszász (now Berehovo, Ukraine) (1923-1931); studied Theology at Losonc (now Lucenec, Slovakia) (1931-1935). He was Assistant Minister in Kassa (now Košice, Slovakia), a soldier in Ungvár (now Uzhhorod, Ukraine) (1936-1937); Assistant Minister in Beregszász (now Berehove, Ukraine) (1939-1943), in Tiszakeresztúr (1943-1951). He was Parish Minister in Visk (now Vishkove, Ukraine), where Soviet police arrested him in 1952, and was sentenced to 25 years in educational labor camp because of a false accusation against him of organizing armed resistance. He was released by an amnesty in 1956, and later rehabilitated. While he was Minister in Muzsaly, he simultaneously served the surrounding diaspora (1956-1964). He became Dean of the Reformed Diocese of Bereg in 1972, and Bishop of the Reformed Church of Carpatho-Ukraine (*Kárpátaljai Magyar Református Egyház*) (1978-1994). He retired and moved to Hungary. His memoir is: *I was there where the most Beautiful Flowers are Blooming* (*Ott voltam ahol a legszebb virágok nyílnak*) (1992). His other book is *From Abel to Antipas... (Ábeltől Antipásig...)* (1994). He received an Honorary Doctorate from the Reformed Theological Academy, Budapest. There is his memorial tablet in Beregszász. – B: 0910, 0878, T: 7103. → **Reformed Church in Carpatho-Ukraine.**

**Forrai, Sándor** (Alexander) (Munkács, now Mukacheve, Ukraine, 18 March 1913 - Budapest, 25 May 2007) – Historian of the Hungarian runic script (*rovásírás*). At home in his youth, he already became acquainted with Hungarian history, runic writing and patriotism. His family had to escape from Munkács due to the annexation of Carpatho-Ukraine to the newly created Czechoslovakia by the dictated Peace Treaty of Trianon in 1920. After studying at the Lutheran High School in Nyíregyháza, and graduating from the High School in Újpest, he served in the army. In 1935 he was employed as clerk by the Hungarian Royal Police Force. Here he learned shorthand writing and typewriting. From 1974 on, he published articles on ancient Hungarian runic writing. He organized a traveling exhibition of runic writing, consisting of 125 pictures and explanations. It was first exhibited at the Reformed Congregation of Frangepán Street, Budapest in 1935. In his book, *From Christmas to New Year's Eve (Küskarácsontól Sülvester estig)* (1985), he offers a review on the history of Hungarian runic writing and its related subjects. In his view, Hungarians were not the receivers but transmitters of runic writing, which was most suitable for recording the Hungarian language. His next book was *The Cradle of Writing and the Hungarian Runic Writing (Az írás bölcsője és a magyar rovásírás)* (1988). In 1994, a further book appeared, entitled: *The Ancient Hungarian Runic Writing from Ancient Times to the Present (Az ősi magyar rovásírás az ókortól napjainkig)* (1994). In it he summarized the results of his research and his theories. His last book was a textbook, published in 1996, entitled: *Learning Hungarian Runic Writing (A magyar rovásírás elsajátítása)*. In it, he sided with the view that the Magyar occupation of the Carpathian Basin in 896 did not occur because of a sudden Petcheneg attack, but actually it must have been a resettlement, since the Magyar presence there was much earlier, and it is proved by documentary findings and runic fragments found in Transylvania (*Erdély*, now in Romania). He also wrote the *Ten Commandments of Hungarian National Consciousness (A Magyar Nemzettudat Tízparancsolata)*. His writing and his teaching, his lifetime work gave an impetus to research and study of the ancient Hungarian writing system. – B: 1818, T: 7103. → **Hungarian Runic Script; Runic Writing Research; Forrai, Sándor; Sebestyén, Gyula (2); Linear Writing; New Trends in the Research**

### of Hungarian Ancient History.

**Forró Barnóthy, Madeleine** (Zsámbok, 1904 - Chicago, Illinois, USA, 1993) – Astrophysicist. Her higher studies were in Budapest and Göttingen, Germany. In 1928, she obtained her Ph.D. in Physics, the first woman in Hungary to achieve it. From 1928 to 1948, she was a physics professor at Budapest University. In 1948 she settled in the USA with Jenő (Eugene) Barnóthy, her husband and fellow scientist. First, she taught Physics at the Barat College in Lake Forest, Illinois. In 1955, both Barnóthys were asked to lead a Company, manufacturing radiological research instruments. From 1953 to 1959, she taught Physics at the University of Illinois. Barnóthy specialized in cosmic radiation, astro and nuclear physics and biomagnetism. She was the author of over 150 scientific papers, and editor of the two-volume book *Biological Effects of Magnetic Fields* (1964). Already in 1964, she predicted that the magnetic field would in due course develop into a powerful new analytic and therapeutic tool of medicine. Her last scientific article *What is Time?*, about astronomy, co-written with her husband, was published in 1991. She was a member of numerous American and international scientific associations. She was a pioneer in the research of the cosmic radiation phenomena, a prerequisite for conquering the universe, bio-magnetism and magnetic therapy. – B&T: 1081.

**Forró, Sándor** (Alexander) (Budapest, 23 August 1932 - ) – Bishop of the Reformed Church in the USA. He attended high school in Budapest; studied Theology at the Reformed Theological Academy, Budapest, (1950-1955), and was Assistant Minister in Salgótarján for one year. After the Revolution of 1956, he left for Vienna, where he read Theology at the Lutheran Theological Academy for one year, then emigrated to the USA in 1959, and served the Hungarian Reformed Congregation in Nanville, NJ, as an assistant minister. Upon receiving a one-year scholarship, he studied Theology at Andover Newton Congregationalist Seminary. Since 1960, he has been the Minister of three Hungarian congregations: Poughkeepsie, Peekskill and Roseton. He became Dean of the New York Diocese, and was Bishop of the Hungarian Reformed Church in America from 1994; he resigned in 2002. – B: 0915, T: 7103. → **Reformed Churches in America.**

**Fortress Churches** – From ancient times, suitable church buildings were fortified to

protect people in the event of war. The churches either stood in the center of the village or were built on hills, which made them easy to reach and protect. After the Mongol-Tartar invasion of Hungary (1241-1242), churches were reinforced almost everywhere. Later, massive towers were built with a sentry road and a precinct wall with a moat, an entrance tower and protected battlements with access paths. The first fortified churches were actually constructed in the pattern of medieval strongholds. In the age of the Anjou

kings, church fortresses were built with entrenched storages, flying buttresses between abutments; and they usually had catapults and battlements. The separately built bell tower was included in the precinct wall. The *Siebenbürger* (Saxon-German) towns in Transylvania (*Erdély*, now in Romania), e.g. Nagyszeben (now Sibiu), Segesvár (now

Sighisoara). Medgyes (now Medias), and Brasso (now Brasov) constructed large churches. After the Turkish invasion in 1491, construction of stronghold buildings, especially fortress churches, started in earnest. The walls were raised, often a second or third precinct was built and the gate was reinforced. Within the fortress there were storehouses divided into numerous compartments. There are many fortress churches on the territory of historic Hungary, e.g. Asszonyfalva, Csíkmenaság, Magyarvalkó, Marosvásárhely, Nagyajta, Vörösberény etc. Most of the fortress churches are on the UNESCO world heritage list. – B: 1358, T: 7103.→**Mongol-Tartar invasion.**

**Four Religions, Land of** – This is a Decree of the Diet of Torda (in *Erdély*, Transylvania, now Romania). On 9 June 1557, it declared that: “*Every one might hold the faith of his choice, together with the new rites or the former ones, without offence to any . . . and that the adherents of the new religion should do nothing to injure those of the old*”. This was the world’s first declaration of religious freedom. The Diet of Torda on 13 January 1568, renewed the decree of toleration, passed in 1557, declaring that “*in every place the preachers shall preach and explain the Gospel, each according to his understanding of it and, if the congregation likes it, it is well; if not, no one shall compel them, but they shall keep the preachers whose doctrine they approve. Therefore, none of the superintendents or others shall annoy or abuse the preachers on account of their religion according to the previous constitutions, or allow any to be imprisoned or be punished by removal from his post on account of this teaching, for faith is the gift of God; this comes from hearing the word of God*”. In Transylvania, religious freedom prevailed and Catholic, Lutheran, Reformed and Unitarian Churches lived in peace, while religious wars ravaged Europe in the 16-17th centuries. – B: 0954, 1364, T: 7103.→**Transylvania.**

**Fox, William** (Vilmos Friedmann) (Tolcsva, 1 January, 1879 - New York, NY, USA, 8 May 1952) – Film industrialist. He was an infant when his parents emigrated to the USA. He started work as a laundry-help, then tried the garment industry. He bought a nickelodeon and developed it into a chain of movie theaters. He then moved on to dominate the movie industry of the 1920s. He began a production company, and owned various movie theaters abroad as well. By 1915, Fox had a monopoly over silent film production; it was the beginning of his empire. He made the films and they were viewed in Fox-owned theaters. He was a visionary, seeing a place for sound in the movies when other producers and production companies did not. From 1925 to 1928, the Fox Film Corporation pioneered technology for recording and playing back sound on film. He installed sound equipment in over a thousand theaters. He invented and introduced the concept of the “movie star”. His domination of the movie industry attracted jealousy and a desire to make Fox and Fox Pictures tumble. Fox Pictures suffered an anti-trust litigation; and when the bankrupt William Fox tried bribing a judge, he was sentenced to six months in jail and lived an uneventful life thereafter. He continued to help Hungarian filmmakers in the U.S.A. – B: 1037, T: 7103.

**Fraknó Castle** (formerly Western Hungary, now Forchtenstein, Austria) – In its core, it dates back to the 14th century. Its original name was *Castrum Faruhno* in 1346. The Counts of Nagymarton (Mattersburg), for the protection of the country’s western border, built a new castle. It changed ownership several times. In 1440, it was in Habsburg hands; but in 1466, it became the possession of King Mátyás I (Matthias Corvinus) (1458-1490). Finally, the Princely House of Esterházy owned it. It played a role as an

unconquerable bulwark for the Habsburg Empire against the Turks. Miklós (Nicholas) and Pál (Paul) Esterházy remodeled it into a two-storey castle palace (1635-1660). The castle chapel was consecrated in 1642. As a family treasury for the Hungarian magnate line, the fortress contains not only the royal archives, but also the armory of the Esterházy troops, with valuable spoils from the Turkish Wars, historic hunting implements and trophies, as well as the picture gallery with monumental battle paintings and ancestral portraits. Europe's largest collection of standard flags is stored here. The castle is rich in Hungarian memorabilia. The Versailles-Trianon Peace Treaty ceded Castle Frakno, together with Burgenland to Austria in 1920. – B: 1031, 1365, T: 7103.→**Mátyás I, King; Esterházy Family; Trianon Peace Treaty.**

**Fraknói, Vilmos** (Frank until 1847) (Ürmény, 27 February 1843 - Budapest, 20 November 1924) – Historian, titular bishop. After studying Theology and Philosophy at Pest, he taught from 1864 at the highschool of Nagyszombat (now Trnava, Slovakia). From 1865, he taught at the Catholic Seminary, Esztergom, where he was ordained. From 1870, he lived in Pest. He was Canon at Nagyvárad (now Oradea, Romania, 1878); titular Bishop of Arbei (1892), and established a Hungarian History Institute for Hungarian research in Roman sources (1892), as well as a Hungarian Arts House in Rome. He supervised museums and libraries. His works, in connection with the search for Hungarian 'incunabula', the earliest specimens of printed documents, are of lasting value. His works include *A Sketch of the Cultural State of the Hungarian Nation in the Times of the first Reigning Princes...* (*A magyar nemzet műveltségi állásának vázolata az első fejedelmek korában...*) (1861); *King Lajos II (Louis) and his Court (II Lajos király és udvara)* (1878), and *Life of King Mátyás Hunyadi (Matthias Corvinus) (Hunyadi Mátyás király élete)* (1890). He was a member, later Director of the Hungarian Academy of Sciences (1870, 1873). In the Lateran Basilica, he sponsored a white marble relief that shows the bestowing of the Hungarian crown on King István I (St. Stephen). In Hungary, prizes bear his name. – B: 1150, 0883, T: 7675, 7103.→**Lajos II, King; Mátyás I, King (Mathias Corvinus); István I, King (St. Stephen).**

**France, Hungarians in** – In the Middle Ages, many Hungarian students went to France for higher studies at the Sorbonne (Niversity of Paris), and other universities. Hungarian political emigration to France began after the defeat of the Freedom Fight of Prince Ferenc (Francis) Rákóczi II in 1711, when mainly Hungarian Hussars migrated to France and were instrumental in organizing the French Hussars. Hungarian emigration to France continued after subsequent defeats of Hungarian fights for freedom in 1848-1849, 1956, and particularly after World War I and World War II, as well as during the Communist regimes in Hungary, up to and even after the political changes of 1990-1991. The various waves of Hungarian emigrants bore their leftist or rightist stands, still causing disunity among them. A Hungarian newspaper estimated the number of Hungarians in France in 1961 at 47,244. In 1969, the Hungarian Statistical Bureau's assessment put their number at 50,000. Gyula (Julius) Borbándi, writer and expert on Hungarian diaspora, considered the assessment accurate. French cities with a larger Hungarian population are Paris, Lyon, Strasbourg, Metz, Lille, Montpellier, Sens, Turcoing and Grenoble. Church institutions play an important role in holding the Hungarian communities together. The Hungarian Roman Catholics have Hungarian Catholic Missions in Paris, Lyon, Strasbourg, Metz and Lille. The Hungarian Protestants in France have two congregations, one in Paris and another in Sens. Hungarian organizations include the *Hungarian*

*Institute of Paris (Párizsi Magyar Intézet); the Hungarian Veterans' Association (Magyar Harcosok Bajtársi Szövetsége-MHBK); the Hungarian Freedom Fighters' Organization (Magyar Szabadságharcos Szövetség); the Friendly Circle of Hungarian Language and Culture in France (A Magyar Nyelv és Kultúra Franciaországi Baráti Köre); the Hungarian League of Human Rights (Emberi Jogok Magyar Ligája); the Hungarian Mutual Benefit Society in Paris (A Párizsi Kölcsönösen Segélyező Magyar Egylet); the Democrat Club (Demokrata Club); the Corvin Club; the Hungarian Women's Club; The National Council of Hungarian Organizations in France (A Franciaországi Magyar Szövetségek Országos Tanácsa).* There are Hungarian-French Cultural organizations in Lotharingia (Lorraine), and the *Order of Knights of Malta*, as well as the *Order of Vitéz (Vitézi Rend)*, are also present in France. As for the Hungarian Press: until the early 1990s, there were newspapers and periodicals, such as the *Literary News (Irodalmi Újság)* and the *Hungarian Workshop (Magyar Műhely)*. Today, only the *Kuti Outlook (Kuti Kilátó)* appears regularly. Significant are the works of Hungarian writers, artists, researchers and economic experts in France. – B: 1069, 1364, T: 3240.→**Hussars; Hussars, Corps of; Borbándi, Gyula.**

**Francé, Rezső** (Ralph/Raul) (Vienna, Austria, 20 May 1874 - Budapest, 3 October 1943) – Biologist, botanist. He studied at the Budapest Polytechnic. He was already researching the field of algology and microbiology in 1892. His first paper on this subject was published when he was only 19 years old. The Magyaróvár Academy of Agriculture employed him as an assistant professor, where he also researched plant diseases. He lived abroad from 1902, but always considered himself Hungarian and retained his Hungarian citizenship. In 1906, he organized his own biology research laboratory in Munich, where he worked on general biological problems, studying plankton and soil life forms. He coined the term “edaphon” (*edafon*). His books popularized his name worldwide. He authored many books including his eight-volume work, the *Life of the Plants (Leben der Pflanzen)*, the botanical equivalent of Brehm's. He wrote, among others, *Organism of Craspedomonadines (A Craspedomonadinák szervezete)* (1897); *Das Edaphon* (1922); *Comparative Biology (Összehasonlító biológia)* (1926); *Life of Plants (A növények élete)* (1924, 1945), and *The Secret of Life (Az élet titka)* (1942). Many of his books also appeared in Hungarian. – B: 0883, T: 7675, 7103.

**Francesco Di, Amedeo**→**Di Francesco.**

**Francis, Saint, Legend** – After the *Funeral Oration and Prayer (Halotti beszéd és könyörgés, ca. 1192-1195)* and the 14th century “Fragment of Königsberg and its Ribbons” (*Königsbergi töredék és szalagjai*), the St. Francis Legend (*Szent Ferenc Legendája*) is the oldest, continuous Hungarian language relic dating from the middle of the 14th century. Dr Ehrenfeld of Vienna found it during his college years in Nyitra, (now Nitra, Slovakia) hence it is known today as the *Ehrenfeld-Codex*. It is about St Francis and his companions, as the legend says “*certain writings of blessed Saint Francis and his companions' miraculous deeds*” (*Némi írások Bódog Ferencről és társairól; ő nekik csodálatos mívelkedetekről*). The language of this legend, being older than expected, indicates that it is a copy of a much older manuscript but it has lots of traces of the original version. – B: 0942, T: 3240.→**Funeral Oration and Prayer.**

**Franciscan Order** (Hungarian: *Ferencesek*; Latin: *Ordo Fratrum Minorum – OFM*, or Order of Lesser Brothers; Minorites or Grey Friars) – founded by St Francis of Assisi in

1209. The Order comprises three separate branches: the *Friars Minor*, the *Friars Minor Conventuals* and the *Friars Minor Capuchins*, generally referred to as the First, Second and Third Orders of St Francis.

*The First Order's* existence, the *Ordo Fratrum Minorum – OFM*, dates from 1209, when St. Francis obtained from Pope Innocent III an unwritten approbation of the simple rules of guidance for his companions. This was rewritten by the Saint and confirmed by Pope Honorius III in 1223. This Rule of Saint Francis is professed throughout the whole First Order of St. Francis.

*The Second Order's* foundation, the *Friars Minor Conventuals (OTF Conv)*, or *Poor Ladies* was probably laid down in 1212 when, at the request of St. Clare, St. Francis drew up a formal rule for her and several pious maidens. After several revisions, Pope Innocent IV approved the Rules in 1253.

*The Third Order's* date of origin, the *Friars Minor Conventuals (OFM Conv)*, or *Tertiaries*, or *Capuchins*, was 1221. This order was devised by St. Francis as a sort of middle state, between the cloisters and the world, for those who, wishing to follow in the Saint's footsteps, were debarred by marriage or other ties from entering either the First or Second Order.

They developed into these three distinct branches by process of addition, not by process of division. The members of the Franciscan Order follow the simple way of life of the early Franciscans, noted for their missionary work, wearing a pointed hood (French *capuche*). They are well known for their preaching and for their ministrations among the poor.

In Hungary, they appeared very early. In 1232, they already had a separate province and they proved successful in converting the Tartars. Great Franciscans in Hungarian history include St John Capistrano, Pelbárt Temesvári, Osvát Laskai and Pál Tomori. They played an important role in the codex literature; the oldest Codex in Hungary is a Franciscan work: the *Jókai Codex*, containing the legend of St. Francis of Assisi. Before World War II, there were two provinces in Hungary: the *Marianus* province, with 16 monasteries and 276 members; and the *Capistrano* province with 21 monasteries and 250 members, engaged in pastoral work, teaching and missionary activity. In Esztergom, they run a high school connected with a boarding school. There are famous Franciscan places of pilgrimage at Andocs (22 km south of Balatonföldvár), Csíksomlyó (in Transylvania, *Erdély*, now in Romania) and Máriagyűd (northwest of Siklós at the southern foot of the Villány Range). The Tertiaries were strong in Hungary. They were active everywhere around Franciscan parishes. In 1942, there were 245 groups, with 26,000 members. In 1949, their members were 25, 000. In 1950, the Communist state dissolved the Franciscan Order. It was reorganized on 3 February 1989.

There is a *Franciscan Missionary Sisters Congregation* (Hungarian: *Ferences Mária Misszinárius Nővérek Társasága*, Latin: *Franciscaines Missionaires de Marie, Institutum Franciscalium Missionarium a Maria, FMM*) – founded by Chappotin de Neuville in 1877, under the name *Missionaires de Marie*. The Minorites accepted them into the Franciscan family. They received papal endorsement in 1890. Since then, they have served many countries around the world, accomodating to the local need. Their work started in Hungary in 1899. Their center is on Hermina Street, Budapest. Their work includes visiting, helping and educating the poor, needy and destitute. During World War II, they sheltered and rescued Jews. In 1961, there were 167 Hungarian nuns serving in

62 countries, including Hungary. In 1987, they were reorganized; in 1995, there were 23 nuns. – B: 0945, 1031, 1068, 1173, 1871, T: 7456.→**Kapisztrán, Saint János; Temesvári, Pelbárt; Tomori, Pál; Religious Orders, Roman Catholic; Catholic Church in Hungary**

**Franciscan Order Bible** – The oldest known Hungarian Bible translation. Its fragments were found in the Codex of Vienna, the Codex of Munich, and in the Apoc-Codex. Franciscan monks translated it between 1416 and 1441. – B: 1078, T: 3240.→**Czeglédy, Sándor; Félegyházi, Tamás; Heltay, Gáspár; Jordánszky Codex; Károli Bible; Károly, Gáspár; Komjáthy, Benedek; Komáromi Csipkés, György; Masznyik, Endre; Ravasz, László; Sylvester, János.**

**Franciscan Psalter of the Havasalföld** (Wallachia, part of Romania) – According to a notation in the text referring to the year 1364, the Psalter (Book of Psalms) was already in use by the middle of the 14th century. However, it is highly probable that the work dates from the middle of the 13th century. It is a valuable Hungarian language relic. Baron Balázs (Blaise) Orbán discovered the Psalter in his parish church in Csíkkarcfalva. He reported its existence in his book: *Description of the Szeklerland (Székelyföld leírása)*. The psalms were written on parchment-paper and the pages were later numbered. The first verse of the psalms starts with a tune on four lines in Gregorian chant notation, followed by verses. The letters of the text are Gothic minuscules in two sizes with the first letters frequently illuminated. It is the work of a Hungarian. This is supported by the fact that four Hungarian saints: St István (St Stephen), St László (St Ladislav), St Erzsébet (St. Elizabeth) and St Imre (St. Emeric) are mentioned in its calendar fragments. The Psalm Book is in the National Széchényi Library, Budapest. – B: 1134, 1020, T: 3240, 7103.→**Franciscan Order; István I, King (St. Stephen); László I, King; Erzsébet, Saint, of Hungary; Imre, Saint Prince; Orbán, Baron Balázs.**

**Frangepán Family** – an aristocratic family of Croatian origin. The first known Frangepán lived at the turn of the 12-13th centuries. The family took part in Croatia's, and simultaneously in Hungary's, historical events. Several of them were Croatian, Slavonian and Dalmatian *báns* (viceroys). They were also landowners in Croatia and Southern Hungary. Many of them fought against the Turks in the 16-17th centuries. During these battles, Kristóf (Christoph) and Ferenc (Francis) Frangepán particularly distinguished themselves. The wife of Count Miklós (Nicholas) Zrinyi, the famous poet and general also had family ties with the Frangepán family. – B: 1138, T: 7685.→**Zrinyi, Count Miklós; Frangepán, Count Kristóf.**

**Frangepán, Count Kristóf** (Christoph) (after 1470 - Varasd, 22 September 1527) – Talented military leader and hero of his time. In the war against the Republic of Venice, he provided invaluable services to Emperor Maximilian. He captured Fort Marano by cunning, and Monte Falkone by force of arms. On 5 June 1514, he was captured by the Venetians but, in 1518, managed to escape. In 1525, he broke the Turkish siege at fort Jajca by his commendable bravery and was appointed *bán* of Croatia. Before the Mohács disaster in 1526, he was appointed Commander-in-Chief of the Army, but arrived late for the battle. After the partition of Hungary, he became an unwavering follower of János (John) Szapolyai, right until his death at the siege of Varasd. – B: 0883, 1031, T: 3233.→**János I (John), King.**

**Frank, Tibor** (Miskolc, 1955 - ) – Economist; studied Mathematics, Physics, Philosophy

and Music and received his Degree and Ph.D. from the University of Economics of Budapest. After spending a year in West Germany, he moved to Canada in 1986. He worked as Managing Director of a huge real estate company and became Vice-President of the Stamm Economic Research Institute in Toronto. He was the founder of the Office of International Programs of the Urbanistic Institute, and he is its International Program Director. He is a member of the Monetary Decentralization Committee of the World Bank. He is a recipient of the Gold Medal of the President of the Republic of Hungary (1999). – B: 0917, T: 7103.

**Franz Joseph Land**, Russia – An archipelago of some 85 uninhabited islands in the Barents Sea. An Austro-Hungarian Expedition, led by Karl Weyprecht, discovered it on 30 August 1873. In the course of the exploration, the following Hungarian names were given to geographic features: Cape Budapest, Deák Island, Cape Fiume, Simonyi Glacier and Zichy Land. Since the Monarchy did not persist in laying claim to the archipelago, Russia took possession of it in 1914; after 1928, it became the sovereign territory of the Soviet Union and its name changed to Lomonosov Land. Since 1992, it has belonged to Russia again. A number of polar expeditions used the archipelago as a base station. – B: 1078, 1153, T: 7456.→**Austrian-Hungarian North Pole Expedition.**

**Franyó, Zoltán** (pen-name Géza Lajta) (Kismargita, Hungary, now Margitica, Serbia, 30 July 1887 - Temesvár, now Timișoara, Romania, 29 December 1978) – Hungarian poet, writer, translator of literary works in Transylvania, Romania. He finished his higher studies at Arad (now Arad in Romania) and Temesvár (Timișoara, now in Romania), and at the Cadet School, Sopron; and finally at the Royal Hungarian Ludovika Military Academy, Budapest, where he graduated as a Lieutenant in 1907. In 1910, he left the army for the editorship of the newspaper *Independence (Függetlenség)* at Arad. His articles appeared, among others, in the literary review *West (Nyugat)*, the newspapers *Pest Diary (Pesti Napló)* and *Peoples' Voice (Népszava)*. He was a military reporter during World War I. His reports were published in the book *On the Battles in the Carpathians (A Kárpáti harcokról)* (1915). At the end of the war the Military Archives of Vienna employed him. In 1919 he became co-worker of the philosopher, György (George) Lukács. Then he emigrated to Austria and studied Eastern languages at the University in Vienna. His articles appeared in Vienna's Hungarian papers and his translations of Ady's poems into German were also published. He returned to Arad in 1923, and worked as an editor for the periodicals *Genius* and *New Genius (Genius, Új Genius)*, thereafter, he worked at the *5 O'clock Paper (5 Órai Újság)*. He translated quite a few literary works into Hungarian, including *Old Arabic Poets (Régi arab költők)* (1924); *Puskin's Selected Poems (Puskin válogatott versei)* (1949); *African Alarm (Afrikai riadó)* poems (1962); *Atlantic Wind (Atlanti szél)*, Western European poets (1978); *Chinesische Gedichte* (1940), and *Ady: Blut und Gold (Blood and Gold – Vér és Arany)* (1961). He was recipient of the Herder Prize (1969), the Order of Labor (1970) and the Order of the Banner with Laurels of the People's Republic of Hungary (1977). A Foundation and a Literary Circle bear his name at Temesvár (now Timisoara, Romania). – B: 0883, 0878, 1160, T: 7103.→**Lukács, György.**

**Fráter, György**→**Martrinuzzi, György.**

**Fráter, Lóránd** (Roland) (Érsemjén, now Simian, Romania, 1872 - Budapest, 13 March 1930) – Songwriter. After finishing the Ludovika Royal Hungarian Military Academy, he

was made a Hussar second lieutenant. Already as an officer, he started his literary and music studies. In 1906 he retired from the military with the rank of captain. As a talented violin player and singer, he gave concerts all around the country; he performed his own songs, and transcripts of other songs with great success. He even wrote the lyrics for most of his songs. As a popular songwriter, he was called “Captain of Songs”. He published a 30-volume collection of his songs popular mainly among the middle classes. In 1910 he was elected to Parliament as a representative of an independent platform. Some of his better-known songs are: *Autumn Rose (Őszi rózsza)*; *One Hundred Candles (Száz szál gyertya)*; *The City is full of Acacia Flowers (Tele van a város akácfa virággal)*. They are still popular in Hungary. There is Fráter Lóránd Society, a Street in Budapest bears his name, and his statue is at Érsemlyén. – B: 0883, 1160, T: 7684.→**Ludovika Royal Hungarian Military Academy.**

**Free Christian Congregation** – Formed in Debrecen in 1924 as a Bible study group. The two characteristic features of their doctrine is predestination and that salvation is offered to every person. This Protestant community's strong charismatic influence attracted many young people in the 1970s. They believe that rebirth is only possible through the Baptism by the Holy Spirit. They also believe in the imminent return of Jesus Christ, and in the realm of a thousand years of peace. The believers publicly give witness in front of the congregation and tell what kind of gifts they have received, such as healing, prophesying, or words of wisdom. Communion is given only to members. They do important charity work by helping those with limited physical ability. They have launched a mission among Gypsies. Their membership is about 2500. – B: 1042, T: 7390.

**Freedom Day in Hungary** – Toward the end of World War II, the Soviet Red Army “liberated”, that is, conquered Hungary. The hopeless defense of the country against the invading Soviet Army lasted from 23 September 1944 to 4 April 1945. The 4th of April became an official *Liberation Festival Day (Felszabadulási ünnepnap)*, observed yearly while the county was under Communist dictatorship. After the Paris Peace Treaty of 10 February 1947, the Soviet Army did not leave Hungary but remained there “temporarily” and managed to keep Hungary under occupation for 46 years. In their threatening presence, the Communist system was forced upon the Hungarian people. They also suppressed the Revolution and Freedom Fight in 1956. In the midst of the disintegration of the Soviet Bloc, finally an agreement was reached to end the Soviet occupation of Hungary, on 30 June 1991. For this historical occasion an ecumenical *Te Deum* and an impressive celebration were held at Gödöllő, accompanied by ringing of all the church bells. The celebrants were László (Ladislav) Tőkés, Reformed Bishop of Királyhágómellék, Partium now in Romania, and Gábor (Gabriel) Roszik, Lutheran Pastor. – B&T: 7103.→**Paris Peace Treaty; Liberation Day in Hungary; Tessedik, Sámuel, Tessedik Sámuel Foundation; Partium; Tőkés, László.**

**Freedom Fight of Bocskay, Prince István (Uprising and Freedom Fight) 1604-1606** – *Background.* At the time, the large territory of Hungary occupying the entire Carpathian Basin was torn into three pieces: in the West and the North (Upland, *Felvidék*, now Slovakia), Habsburg kings ruled. The Turks occupied the large central part from 1526, while Hungarian princes ruled Transylvania (*Erdély*, now in Romania) in the East. On 10

September 1600, Count Giorgio Basta, General of the Austrian Imperial Army and Captain-General of Kassa (now Košice, Slovakia), entered Transylvania with a force of 6,000 men. The Transylvanians issued orders for his capture but released him three days later. At Boroszló, the troops, led by Zsigmond (Sigismund) Báthori, suffered defeat at the hands of the army, led jointly by Basta and Voivode Mihal; but, two weeks later, Basta gave orders to kill voivode Mihal. In Erdély, as Transylvania was then known, Austrian Emperor Rudolf I (1576-1608) gathered the Imperial troops and named Basta their Commander-in-Chief. In the fall of 1602, Basta set an enormous ransom on the cities of Transylvania. To put an end to the uncontrollable devastation the troops were causing in the countryside, the Parliament of Gyulafehérvár (now Alba Iulia, Romania) agreed to pay Basta the money and provide food as well. In December 1602, István (Stephen) Bocskay returned home from his captivity in Prague and retired to his estate in Bihar. As the result of a bad crop and the Imperial Army's looting, hunger and bubonic plague ravaged Transylvania. In the cities, they made bread from acorns and, in place of the confiscated or perished domestic animals, people harnessed themselves to carts and plows. The Imperial treasury owed an average of 50 months pay to the Military. In the spring of 1603, Mózes (Moses) Székely received a Sultan's *athnâme* for the principality of Transylvania. He broke into Erdély and forced Basta's troops northward. Voivode Radul from Wallachia (*Havasalföld*) sent help to Basta and then, with the Szeklers to assist him, he destroyed Mózes Székely's army at Brassó (now Brasov, Romania), an army made up mostly of noblemen. At the sitting of the Transylvanian Parliament in Déva (now Deva, Romania) on 5 September 1603, Basta announced that if the nobility wished to redeem their properties, a quarter of the value must be paid in cash. The properties of those who had died or who did not appear at the meeting would be confiscated for treason. The cities that took part in the uprising were denounced for treason and only the Roman Catholic Church was allowed to function. Huge reparation payments were imposed on the Transylvanians and their right to self-government was repealed. During that month, the Imperial commissioners of Transylvania ordered the execution of a long list of nobles and ordinary citizens alike. On 14 September 1603, General Basta suggested that the Habsburg King and Emperor Rudolf I should Germanize Transylvania with a large-scale settlement of Germans with special privileges. Basta left Transylvania on 7 April 1604. Bocskay received a letter from Count Belgiojoso, Captain-General of Kassa, on 28 September 1604, ordering him to report to the camp at Rakamaz. As Bocskay did not appear, Belgiojoso set out against him with his army on 14 October 1604. On 15 October 1604, Bocskay attacked the troops of Colonel Prezzen, Belgiojoso's second in command, as they were marching between Álmosd and Diószeg. The *Hajdú* contingent (*ragamufins*), which the Emperor previously paid to fight in his army, changed sides and Bocskay's victory was upsetting. Bocskay then entered Debrecen and, turning north, he enlisted the troops from the forts of Szendrő and Krasznahorka, and then he entered Kassa (now Košice, Slovakia). His army continued to grow; their number swelled with the *Hajdú* troops and escaped serfs. People from the mining towns also joined his cause. Although General Basta gained small victories in the upper regions of Hungary, the uprising regained some territories from the imperialists. The Transylvanians sided with Bocskay. The parliament assembled in Marosszerda on 21 December 1605, and elected him their ruler. Basta's counter-attack began from the Danube, but collapsed. At the beginning of the following March the insurgent Hungarian

Council faced the people of Europe with a proclamation. In it, they portrayed the illegal and tyrannical rule of King and Emperor Rudolf I as forcing them into the armed uprising. At the National Assembly held by the Insurgent Council in Szerencs on 20 April 1605, Bocskay was elected Hungary's Reigning Prince. At the beginning of May, Bocskay's troops crossed into Transdanubia (*Dunántúl*) at Pozsony (now Bratislava, Slovakia), and, by the end of the month, they had conquered the territory as far southwest as Muraköz. In May, Bocskay's *Hajdús* made incursions into southern Austria, Moravia and Silesia. Emperor Rudolf I, getting no help from Europe, was forced into a peace treaty. On 12 December, the Reigning Prince of Hungary ennobled some of his 9,254 heroic *Hajdús* and settled them in the southern part of County Szabolcs. On 23 June 1606, a Treaty was signed in Vienna between Prince István Bocskay, and Archduke Matthias. The Treaty granted all constitutional and religious rights and privileges to the Hungarians in both Transylvania and Royal Hungary, including Calvinists and Lutherans. The accord also recognized Bocskay as the Prince of Transylvania and guaranteed the right of Transylvanians to elect their own independent princes in the future. The Treaty became a fundamental document regarding Hungarian political liberty and would be referenced in the future conflicts of the seventeenth century. – B: 0883, 1230, 1031, T: 7668, 7103.→**Bocskay, Prince István; Basta, Giorgio; Basta Cart; Báthory, Prince Zsigmond; Hajdús.**

**Freedom Fight of Thököly, Count Imre (Insurrection and Freedom Fight) 1672-1699.** – *Background:* Problems started in Hungary, already torn into three sections, with the new Turkish offensive in 1663. Consequently, new Hungarian territories and castles fell under Turkish rule. Count Miklós (Nicholas) Zrinyi, in a lightning campaign, retook the lost territories together with some of the Turkish castles along the River Dráva. At Szentgotthárd, the Turkish army was defeated. However, the Peace Treaty of Vasvár of 1664 caused deep resentment in Hungary, for it left the liberated territories and castles in Turkish hands. The dissatisfied Hungarian nobles conspired against the Habsburg rule in Hungary. The so-called Wesselényi Conspiracy was uncovered and its participants executed. Thököly's father had been a member of the Wesselényi Conspiracy (1666-1670) and died while defending his castle against the Austrian Imperial forces. As a result, Count Imre (Emeric) Thököly had been forced to flee to Transylvania (*Erdély*, now in Romania). Emperor Lipót I (Leopold I, 1654-1705) used the Wesselényi Conspiracy as a pretext to colonize and Germanize Hungary and make it a fully Catholic country by eliminating Protestantism. The persecution of Protestant pastors and teachers began in earnest by the Extraordinary Judiciary of Pozsony (now Bratislava, Slovakia). The Protestants know the decade of 1671-1681 as the "decade of mourning". Simultaneously, the Austrian Imperial Army began the conquest and occupation of Hungary. The towns and castles were soon occupied by Austrian Imperial troops, whose regular looting led to the flight of the people, and a guerrilla-type resistance developed. The main center of these rebels was the *Partium*, the region west and northwest of the Transylvanian border and the marshes of the River Tisza. In the summer of 1678, Count Imre Thököly (1657-1705) became the leader of the rebels, called *Kuruc*. He led them against Northern Hungary, already under Austrian control, and the Kuruc War started. While the Imperial troops were advancing in the Szilágy region, Thököly captured the important mining towns behind them. Thököly became famous overnight. The young man of 22 proved himself a born leader and a skillful diplomat. His fast cavalry and his

foot soldiers called “*talpas*” were excellent fighters, though undisciplined on the whole. Since he was short of funds to pay them, he financed his campaigns through forced contributions raised in the conquered towns. During the war, his light cavalry reached as far as Moravia and Silesia. The Viennese military council was unable to muster an army against him. They tried to thwart the momentum of the insurrection by offering territorial concessions. Since Thököly wanted to rule Hungary, he refused to bargain and, in order to achieve his goal, he made the fateful decision to turn to the Turkish Empire for help. Following the Polish war, the ambitious, top Turkish military leader, Grand Vizier Kara Mustapha, wanted to crush the power of the House of Habsburg. Thököly and his cause seemed to be the means to fulfill his ambitions. Hence, his friendly open-arm reception of Thököly’s envoys in January 1682. Soon after, in the summer of 1682, with the help of Ibrahim, Pasha of Buda, Thököly captured the towns of Kassa, Eperjes, Lőcse (now Kosice, Presov, Levoca in Slovakia) and Tokaj. Despite the heroic defense by István (Stephen) Koháry, he also took Fülek (now Filakovo, Slovakia). After these conquests, Pasha Ibrahim presented him with a document. In it, he addressed Thököly as King of Upper Northern Hungary and, for the payment of an annual tax, he assured Thököly of Turkish aid and defense. It must be mentioned, however, that Thököly only called himself Ruling Prince of Upper Hungary (*Felvidék*). All this time, the Turkish troops were ravaging the conquered territories by burning many villages and taking their inhabitants into slavery. Following the departure of the Turks, Thököly signed an armistice with Vienna and took control of Upper Hungary as far as the Garam River.

By this time, only the Turks were Thököly’s allies. For some reason, the Prince of Transylvania, Mihály (Michael) Apafi I (1662-1690), felt offended and became his enemy. At the same time, the Hungarians of Western Hungary (*Dunántúl*) made an agreement with the King. Due to Austria’s unfavorable international circumstances and Thököly’s military successes, the King did not have a choice in 1681, but had to summon the Parliament to Sopron, where he restored the Constitution, re-installed the Hungarian public administration, and recalled the German garrisons from the border fortresses. Thus, the Thököly insurrection became part of general political events in Europe. It had a more significant effect on Hungary’s development than the military campaigns of Gábor (Gabriel) Bethlen (1613-1629) or György (George) Rákóczi I (1630-1648), ruling Princes of Transylvania. Sadly, Poland was alarmed by Thököly’s successes. Jan Sobieski, the Polish king, was apprehensive that the Turks might attack his country through Upper Hungary controlled by Thököly. In vain did Thököly try to allay Sobieski’s fears, who at the end made an alliance with Vienna. Interestingly, it was exactly Thököly’s military achievements against the Habsburgs that encouraged the Turkish Sultan to attack Vienna. Before the impending attack, Thököly’s envoys, negotiating in Vienna, were given no concessions. It soon became evident to Thököly that the Viennese court only wanted to use him as a tool to thwart the Turkish attack. Count Pál (Paul) Esterházy, the Palatine of the country, was against the fulfillment of Thököly’s demands and was instrumental in continuously dragging out the negotiations. By 21 June 1683, Thököly lost his patience, declared an end to the armistice and fully committed himself to the Turkish alliance.

At this time, in Vienna, no one thought of the liberation of Hungary from Turkish rule. On the contrary, the Viennese court was ready to concede even more Hungarian territory to the Turks to save the Habsburg Empire from further attacks. Despite the determination of the Austrian ministers, a war ensued resulting in the liberation of Hungary. This was

solely due to Thököly and the Hungarians who sided with the Turks. They forced the Emperor into the Turkish war and, as the Venetian envoy remarked, they foiled Austria's "peace politics" that would have led to the eventual destruction of the country's Hungarian population. Though the Turkish Grand Vizier heavily counted on Thököly, he and his army did not appear at the siege of Vienna. Hence, the united Christian armies won a decisive victory over the Turks. When the Christian armies crossed the Hungarian border and moved toward Buda, the Grand Vizier ordered Thököly to come to the aid of the Turkish garrison. Thököly, however, did not obey the call and stayed out of the Battle of Párkány (now Sturovo, Slovakia) as well, that also ended with a serious Turkish defeat. The Grand Vizier fled from Buda to Belgrade. There, he received the traditional silk cord, assigned to disgraced Turkish officials of high rank in order to commit suicide. Soon after, many of Thököly's supporters deserted him and joined the King's army. The Turkish-Hungarian friendship ended when the Pasha of Várad imprisoned Thököly. Though it resulted in much misery, it did a great service to the idea of Hungarian independence. The result of the miscalculated action of the Pasha of Várad was that all Thököly's followers left the Turkish camp and the cities of Upper Hungary fell one after the other to the Imperial armies. Only the castle of Munkács (now Mukacheve, Ukraine), held by Thököly's wife, the heroic Ilona (Helena) Zrinyi, resisted for two more years. Though the Turkish leadership soon realized their political mistake and released Thököly, it was too late; his earlier supporters did not rejoin the Turkish alliance. About 20,000 Kuruc soldiers crossed over to the King's side. These excellent battle-hardened soldiers were eager to take revenge on the Turks and fought in the wars of liberation that were to come. – B: 1150, 1230, 1153, 0883, 7665, T: 7665.→**Thököly, Count Ime; Zrinyi, Count Miklós; Zrinyi, Countess Ilona; Bethlen, Prince Gábor; Rákóczi I, Prince György; Fugitives; Kuruc; Decade of Mourning.**

**Freedom Fight of Rákóczi II, Prince Ferenc (Insurrection and War of Liberation) 1703-1711** – *Background:* The expulsion of the Turks from Hungary and the defeat of the Thököly Freedom Fight encouraged Emperor Lipót I (Leopold, 1654-1705), to continue the colonization of Hungary. The Emperor and the Viennese Court regarded Hungary as a territory "conquered" by arms. Not only the areas that had been occupied by the Turks but also Upper Northern Hungary, Transylvania and Western Hungary, all of them the Habsburg Court considered as permanent provinces of their empire. This provoked again a growing bitterness in Hungary. Mostly because of the repossessed territories from the Turks were not returned to their original Hungarian owners. The Commission of New Acquisition gave most of them to Austrian nobles. The citizens of the towns felt the heavy tax burden of the Habsburg absolutistic rule. The peasants and serfs lived in misery and uncertainty. This triggered a new insurrection against Habsburg rule, which developed into one of the greatest struggles for freedom in Hungary's history. Its goals, besides the defense of the rights of the nobility and religious freedom, included the re-establishment of the national state, the acceleration of economic development, and the decrease of the serfs' financial burden. Consequently, a large number of serfs, together with the veterans of the garrisons of the border castles and the remnants of the *Kuruc* soldiers of the Thököly insurrection, openly turned against the Habsburgs. For this turn of events Prince Ferenc (Francis) Rákóczi II (1676-1735), arrived in Hungary on 16 June 1703 from Poland through the Verecke Pass. He was welcomed at the border by Tamás (Thomas) Esze, leading only a few hundred poorly armed men. They were the remnants

of the *Kuruc* insurrectionists, defeated and scattered by Count Sándor (Alexander) Károlyi a few days earlier at Dolha. The first soldiers of the Prince came from the Bagossy Hajdu battalion, *en route* to participate in the Spanish War of Succession. Under the leadership of Tamás Esze and Albert Kis, they deserted and hid in the Forest of Bereg. Rákóczi's flags were first unfurled at Vári and Tarpa. The 800-strong outstandingly armed mercenary cavalry unit, provided by the Polish aristocracy and led by Miklós (Nicholas) Bercsényi, arrived a few days later to the camp at Zavadka. Another group of deserting Hungarian Hussars of 200 men joined them, under the leadership of László (Ladislav) Ocskay and Balázs (Blaise) Borbély. This motley collection of soldiers formed the basis of Rákóczi's army. At its height, it reached a considerable size and organization. The Prince was faced with a huge task, since the time of King Mátyás I (Matthias Corvinus, 1458-1490) there had been no independent standing army in Hungary. During the Turkish occupation the Turks took into slavery the majority of military-age men from this territory, and relatively few Hungarians served in the Emperor's army in the War of the Spanish Succession. As the insurrection gained strength, increasing numbers of imperial officers joined Rákóczi. They organized the newly formed battalions into disciplined units. At its height, in the fall of 1706, the *Kuruc* army consisted of 52 cavalry and 31 infantry battalions, totalling about 100,000 men. However, the country's resources were only sufficient to maintain an army of 10-15,000. It was due to the exceptional organizational talents, commanding authority and personality of Ferenc Rákóczi II that the widely differing components of his army held together. This unique army in military history was composed of two major sections. Namely, the trained regular troops and the field or auxiliary troops, whose training and equipment was not consistent. The majority of the army consisted of the latter, whose skill and courage rivaled those of the best regular units, though undoubtedly there were cavalry battalions among them (Ocskay, Béri Balogh, Ebeczk). However, the *Kuruc* army was never fully unified and this is why it lost six main battles. It could only be victorious when it employed surprise attacks, quick raids or when it could use the terrain to its advantage. The major problem at the end was the lack of properly trained non-commissioned officers. This explains why many *Kuruc* battalions often behaved in an undisciplined manner, both on and off the battlefield. Those non-commissioned officers, who deserted the Imperial army to join the *Kuruc* army, almost immediately were given regular commissions, for there was a lack of officers as well. Rákóczi was very much concerned with the training and development of his commissioned and non-commissioned officers. He was not very successful in his efforts because soldiers of high caliber were needed on the battlefield. His creation of the Noble Company in 1707 was to serve as a basis for a future military academy. Most of the weapons and equipment were manufactured in the northern towns of Hungary, though some of the military supplies came from Poland. Pick axes were the regular equipment for the *Hajdu* units. In the *Kuruc* army, swords of all types were regular weaponry. Later the spear was replaced by the introduction of the bayonet. Another major concern was to provide uniforms for the army. Though Rákóczi could not achieve total unity in this area, the guards, the regular army and a few battalions of the field army were fully equipped and clothed from halfway time through the duration of the insurrection. The clothes came from Poland and Turkey. The Prince paid the soldiers and the cost of equipment from the income of his huge estates (1,400,000 acres). As it was customary at the time, military uniforms were

designed for looks and not for practicability or camouflage. The officers' uniforms were especially ornate. Rákóczi's coat of arms with the motto '*Pro Libertate*' (For Freedom) was worn on the headgear of every soldier. Only the Prince and Count Miklós Bercsényi were allowed to wear tiger skin capes and to sport black heron plumes on their shakos. The generals and the colonels had leopard skin capes, while the lower ranked officers wore wolf skin capes. Insignias marking their ranks were placed on their headgear. The commanding general's special insignia was a golden mace. The largest contingent of foreign mercenaries came from France. With the permission of Louis XIV, 80-85 French officers and about 1000-1500 non-commissioned officers and soldiers served in Rákóczi's army. About 200 castles and fortresses participated in the insurrection. Although 26 remained under permanent Imperial control, the rest fell into Rákóczi's hands, at the cost of heavy fighting or surrender. Besides the regular castles, several earth ramparts, fortifications and bridgeheads were established along the Danube River. Among them, Érsekújvár (now Nové Zámky, Slovakia), was the most important. It was rebuilt by the French Colonel Rivièrè, following the system of Marshall Vauban, leading designer of fortifications in the period. During the insurrection, Rákóczi's soldiers only had one opponent the Imperial Army, but it was a formidable one. Commander Eugene of Savoy brought his troops to such a level of efficiency that Emperor and King Lipót I (Leopold) (1654-1705) and his successor, King József I (Joseph) (1705-1711), had the best army in Europe at the time. The generals and colonels, all professional soldiers with decades of experience, led their troops against Rákóczi's motley army, commanded mostly by self-taught officers, who fought in a disorganized manner. Still, under these conditions, Rákóczi's army fought on for 8 years. This was due partly to the fact that, in certain features, it was superior to the Imperial forces and partly due to the pre-occupation of the Viennese Court with the Spanish War of Succession that required a larger military commitment. In situations where quick decisions, a sharp eye, presence of mind, a strong arm and speed were more important than organized battle order, the *Kuruc* army was definitely superior to the slowly moving Imperial troops. Szomolány, Győrvár, Egervár, Szentgotthárd and Kölesd were the main battlegrounds. The *Kuruc* soldiers did not like big battles, fought in fixed military formations, though quite often victory was already in their hands in the first phase of the struggle. On 13 June 1707, the National Assembly at Ónod annulled the right of the House of Habsburg to the Hungarian throne. On the same day, the Assembly elected Ferenc Rákóczi II to be the Reigning Prince of Hungary, by entrusting the governance of the country to the Prince and a Senate. The number of *Kuruc* soldiers began to dwindle after the unfortunate Battle of Trenčény (now Trenčín, Slovakia) in 1708. General exhaustion and the loss of hope demoralized Rákóczi's army. The last straw was the bubonic plague of 1709 that killed approximately half a million people, one-fifth of Hungary's population. Ferenc Rákóczi II still hoped to turn the tide around. In 1711, he went to Warsaw, Poland, to get help from Peter the Great of Russia. In his absence, his Commander-in-Chief, Count Sándor Károlyi, began peace negotiations with Count János (John) Pálffy, the Commander-in-Chief of the Imperial forces. After the signing of the Peace Treaty of Szatmár – incidentally never recognized by Rákóczi – the formal surrender of the remaining troops took place on the plains of Nagymajtény on 1 May 1711. By this time, the total number of the *Kuruc* army, including those present and few garrisons in the castles and towns still under their control, shrank to about 18,000. Several thousand of the *Kuruc* soldiers ended up in the

Imperial Army. However, many of them sought service in other European countries, where they were welcomed due to their reputation. Among them, the Hussar officers were most valued and sought after. Even though Rákóczi's army was disbanded, it had a lasting effect on Hungarian military art. The training ground of the world famous Hungarian light cavalry, the Hussars, was the front line of the Rákóczi insurrection. Those Hussars, who gained fame for Hungarian soldiers in the wars of Charles III and Maria Theresa, were of the same tradition as Rákóczi's Hussars. The organizers of the French light cavalry were Rákóczi's émigré officers and their descendants. It is evident today that Rákóczi's freedom movement was a historical, national and social necessity. His policies regarding the national minorities, the liberation of serfs and religious tolerance represented progressive concepts and were ahead of his times. During the time of Rákóczi's insurrection, there was no conflict between the Hungarian and the non-Hungarian population of the country within the Carpathian Basin. They all fought together against a common enemy. Due to the machination of the Viennese Court, only the Serbs showed some resistance that they regretted later. The officers commanded the non-Hungarian troops in their own languages. The Prince's respect and trust toward the national minorities is clearly shown by his selection of two members of his diplomatic corps from the clergy. One was a Romanian Greek Orthodox priest and the other the Slovak Lutheran minister of Ócsa. How much Ferenc Rákóczi was loved and respected by both the Hungarians and the ethnic minorities was dramatically revealed in 1906, when his remains were returned to Kassa (now Košice, Slovakia). From far and wide, thousands of Slovaks and Ruthenians attended his funeral. On the wall of the Cathedral of Kassa, a memorial plaque recalls the heroes of the insurrection. "*SISTE VIATOR! Stop pilgrim and pay respect to the glorious deeds of these great heroes and to their memory*". – B: 1130, 1138, 1348, T: 7665.→**Neoaquistica Commissio; Foothills Insurrection; Rákóczi II, Prince Ferenc; Brezna Proclamation; Thököly, Count Imre; Károlyi, Count Sándor; Pálffy, Count János, Bercsényi, Count Miklós; Esze, Tamás; József I, King; Hajdús; Hussars; Kuruc.**

**Freedom Fight of 1848-1849 (Revolution and War of Independence) – Background:** Under the impact of the French Enlightenment and the French Revolution at the end of the 18th century, the progressive leaders of European societies, Hungary included, made efforts to gain better conditions for their respected countries. In Hungary, a series of "Reform Diets" in Pozsony (now Bratislava, Slovakia) tried hard to achieve this goal. Seemingly, it was achieved in March 1848: Hungary regained its freedom and its constitutional rights in a bloodless revolution. However, it turned into a War of Independence because Austria soon launched a military campaign against Hungary, by inciting the ethnic minorities against Hungarians and also requested the military help of Russia against Hungary. Ultimately Hungary was defeated.

*The sequence of events was as follows:*

*11 April 1848:* the Emperor of Austria, also King of Hungary, signed certain concessions making them into laws. However, the Viennese court soon withdrew these laws and launched a campaign of incitement among the national minorities in Hungary. These actions *de facto* declared war on Hungary's legal government.

*13 March:* at their Karlóca, Hungary meeting (now Karlovic, Serbia), the Serbs living in Hungary declared their independence from Hungary. Ernő (Ernest) Kiss, Chief Commander of the Bánát region and Colonel János (John) Damjanich suppressed their

insurrection.

*27 June:* at their Lugos meeting the Romanians living in Hungary offered their armed assistance to the Revolution.

*31 August:* the Croatian troops of General Jellasich attacked and occupied Fiume (now Rijeka, Croatia). Count Ádám Teleki, Commander-in-Chief of the Hungarian troops facing the Croats, refused to fight against the “Imperial troops” and, on 10 September, withdrew with his army to Keszthely. In the absence of an opposition, Jellasich crossed the Dráva River the next day with his army of 35,000, and began his march toward Pest. On 18 September, the people of Nagykanizsa rebelled against the marauding Croatian troops and wiped out the Croatian rear guard.

*24 September:* Lajos (Louis) Kossuth, leader of the Revolution, started his recruiting campaign in the central part of the Great Hungarian Plain. His main stops were Cegléd, Nagykőrös, Kecskemét and Szolnok.

*26 September:* Jellasich’s troops reached and occupied Székesfehérvár, about 60 km southwest of Pest.

*29 September:* the Honvéd (national) army stopped and forced the retreat of Jellasich’s army at Pákozd. Lajos Kossuth continued his recruiting tour in Szentes, Hódmezővásárhely and Szeged. On 1 October, Jellasich, violating the three-day armistice agreement, left his position and retreated toward Vienna. The following day, the Austrian cabinet ordered all Imperial commanders in Transylvania (*Erdély*, now in Romania) and Hungary to support Jellasich against the Hungarians.

*3 October:* the Emperor appointed Jellasich Commander-in-Chief of all Austrian forces in Hungary, and officially declared that there was a state of war between Austria and Hungary. Under János (John) Moga, the Honvéd troops pursued and expelled Jellasich’s army from the country. The National Guard routed its rear guard in Székesfehérvár.

*7 October:* at Ozora in County Tolna, the troops of Karl Roth, a general of the Austrian army, surrendered to the Honvéd army.

*16 October:* the Transylvanian Szeklers, meeting at Agyagfalva, ordered a general mobilization of the National Guard to support the Hungarian Revolution.

*17 October:* the Imperial Army command, stationed at Nagyszeben (now Sibiu, Romania), called on the Transylvanian Romanians to rise against the Hungarian Revolution.

*18 October:* the troops of General Mór (Maurice) Perczel drove the Imperial Army out of the Mura region.

*18 November:* under the Polish Colonel Jozef Wysocki, the Polish legion was organized.

*29 November:* the Szeklers of Háromszék rebuffed the attack of General Heydte’s Imperial troops at Hedvig. They were eventually overwhelmed by the simultaneous attacks of the Transylvanian Romanians and Saxons, and the Imperial control slowly took over Transylvania.

*11 December:* the Government of Piedmont recognized Hungary as an independent state and appointed Colonel Baron Alessandro Monti as its Ambassador to Hungary.

*26 December:* Prince Alfred Windisgrätz, Commander-in-Chief of the Imperial forces, invoked martial law meaning immediate execution on capture, if resisting, and demanded unconditional surrender.

*8 January 1849:* he occupied Pest and arrested Prime Minister Count Lajos (Louis) Battyány, a loyalist to the Imperial cabinet.

*The night of 9 January:* the Romanian insurrectionists destroyed the city of Nagyenyed (now Aiud, Romania). They massacred some of the inhabitants; others were driven out into a snowstorm. The sacking of Nagyenyed was one of the worst atrocities committed against Hungarians in the course of the war. Nevertheless, on 12 January János (John) Ham, Archbishop of Esztergom, ordered the priests of his district to support the attacking Imperial troops and to publicize the Imperial proclamations in their churches. The pastoral circular of 20 January, signed by the majority of the Hungarian bishops, contained similar directives.

*24 January:* Baron Pucher, the Lieutenant-General of the Imperial Army - on the basis of previous permission from the Viennese cabinet - sought military aid from the Russian Army stationed in Wallachia. In response, on

*1 February:* 20,000 Russian soldiers entered Transylvania, via the Vöröstorony Pass. Presumably, this was done partly to test the reaction of other European powers to foreign intervention. The gamble paid off since no international protest(s) followed.

*9 February:* General József (Joseph) Bem's victory at Piski began the liberation of central and southern Transylvania. In a series of victories, he expelled the Imperial troops from Transylvania. The remnants of the Imperial troops from Nagyszeben escaped on 15 March across the Vöröstorony Pass and Lieutenant-General Puchner's troops, together with their Russian allies, fled on 20 March via the Tömös Pass, to Wallachia.

Similar successes were achieved in central and northern Hungary. The Honvéd army was victorious on 6 March 1849 at Isaszeg and at Vác on 10 April. Following these battles the successful spring campaign liberated the northern part of the country from Imperial control.

*14 April:* the Hungarian National Assembly, held in the Great Reformed Church of Debrecen, abrogated the rights of the Habsburg-Lotharingian House to the Hungarian throne and elected Lajos Kossuth as Governing-President of the country.

*20 April:* the Austrian cabinet relieved Windisgrätz of his command and, in view of the mounting losses, ordered the immediate withdrawal of Imperial forces from Pest. That was followed by the gradual withdrawal of all Austrian troops from Hungary.

*1 May:* based on the terms of the Holy Alliance, Austrian Emperor Franz Joseph I turned to Czar Nicholas I of Russia for assistance to defeat the Hungarian Revolution.

*9 May:* after the Romanians had killed their moderate leader, Iona Dragos, they went on a rampage in Abrudbánya (now Abrud, Romania), massacring the Hungarian population. The next day, General Heinrich Hentzi, Imperial Commander of the Castle of Buda, turned his artillery toward the houses of Pest across the River Danube. On 21 May, the Honvéd army captured the Royal Castle in a heavily contested siege.

*15 May:* the Hungarian Government initiated a trial for treason against József Ham, the Archbishop of Esztergom and, on 14 July, Franz Joseph I forced the Archbishop's resignation.

*30 May:* the Austrian cabinet removed General Ludwig Welden, Windisgrätz's replacement. In his place, General Baron Julius Von Haynau was appointed as Commander-in-Chief of the Imperial troops in Hungary.

*15 June:* the Russian invasion, as requested by the Austrian Emperor and Hungarian King, began on two fronts. Under Prince Feodorovich Paskievich, the main military

forces crossed into Hungary through the Dukla Pass, and another force, under General Alexander Nikolaevich Luders, invaded Transylvania through the Tömös Pass. The Russian force of 194,000, together with the Austrian and Croatian armies, totaled 370,000 with 1,192 guns versus the 152,000 strong Hungarian *Honvéd* army, equipped only with 450 artillery pieces and fighting in smaller units in different parts of the country. This huge disparity between the two antagonists foreshadowed the tragic end of the Hungarian Revolution and War of Independence.

22 June: Haynau began setting up an Austrian-type gendarmerie for internal control.

14 July: Lajos Kossuth and Nicolae Balcescu signed the belated Hungarian-Romanian peace agreement.

31 July: one of Hungary's greatest poets, Sándor (Alexander) Petőfi, lost his life in the tragic battle at Segesvár. His remains were never found.

13 August: at Világos, General Arthur Görgey, together with the main Honvéd army of about 32,000 men and 150 guns, surrendered without conditions to General Rudiger of the Russian Imperial Army. The Honvéd army, organized only in a few months, decisively defeated and expelled the troops of the Habsburg Emperor from Hungary. The exhausted troops could not continue the war against the overwhelming Russian forces; therefore they chose to surrender, not to the Austrians but to the Russians, who defeated them.

27 August: the first wave of the Kossuth emigration arrived in the Bulgarian city of Vidin that was under Turkish rule at that time.

27 September: under General Klapka, the fortress of Komárom, while never captured during the war, surrendered on the condition of no reprisals against its defenders. The Viennese Court was incapable of defeating the Hungarian Revolution and War of Independence on its own, in spite of all bribes and promises made to the national minorities. It was Austria's total political and military failure and only with the help of a foreign government's overwhelming force could Vienna regain control of Hungary.

6 October: by the judgment of the Imperial Court Martial, the ex-Prime minister Count Lajos Battyány was executed in Pest. At the same time, in the moat of the fortress of Arad (now in Romania), the "thirteen martyrs of Arad", 12 generals and one colonel of the Honvéd army, were executed either by gallows or by bullet.

The revenge of the Habsburg Emperor and his cabinet was fueled to a large extent by the loss of face and prestige they had suffered due to their inability to defeat the Revolution on their own. The execution of the military leaders was followed by the execution of the political leaders, numbering in the hundreds. Harassment and imprisonment of those who stayed went on for years. Thus, many escaped to foreign countries. More than half of Hungary's leading educated intellectuals were killed or were forced into exile. Of the captured rank and file soldiers, about 40 to 50 thousand were taken abroad to Italy and Bohemia as forced laborers. European public opinion was enraged at the inhumanity shown by Austria, and this is well illustrated by the words of the English statesman, Lord Palmerston: "*The Austrians are the most bestial of those members of the human race who have made claims to be civilized human beings*". The memory of the 1848-1849 Revolution and War of Independence is preserved not only in Hungarian history but also in the history, music and art works of the people of Europe and America. One example among many is German poet, Heinrich Heine's poem: "1848 October". – B: 1230, 1288, 1336, 1020, T: 7665.→**March 1848, 12 points; Kossuth,**

**Freedom Fight of 1956, (Revolution and Freedom Fight) 23 October - 4 November 1956** – *The background of revolution:* After World War II the countries between Austria and the Soviet Union, Hungary included, were occupied by the Soviet Army. Relying on the support of the occupying forces, the Hungarian Communists seized power by force: by the falsification of election results, by the liquidation of potential and real opponents, by deportations, and by generally terrorizing the entire population. The much promised great economic developments did not materialize. The workers suffered as a result of the forced tempo of industrialization; and the peasants suffered

because the state collected most of their produce without compensation and eventually collectivized their land. The whole population was affected by a 179.6% increase in prices in 1951. In parallel with the steep decline in the standard of living, the State Security Authority (*Államvédelmi Hivatal – ÁVH*), using Soviet methods, terrorized the population. They were searching for non-existent internal enemies. No one was in a position to do anything against the totalitarian state. The period up to 1953, the year Stalin died, saw many show trials, based on false evidence.

There was widespread but not necessarily public discontent. As changes were occurring in the Soviet Communist Party, the ideas of reform, however faintly, began to take form. Similarly, there were now new groups of Communists, who wanted to promote Hungary's national interests and who opposed the old Stalinist Rákosi group. After Stalin's death in 1953, the national discontent came to the fore in a few workers' strikes. The Soviet leadership ordered Mátyás (Matthias) Rákosi, the Secretary-General of the Hungarian Workers' Party (*Magyar Dolgozók Pártja*, i.e. the Communist Party), to Moscow, where they removed him from power. This was the end of the infamous Rákosi Era and its absolute rule. Imre (Emeric) Nagy, the new Prime Minister became very popular, when he acknowledged in the Parliament the past mistakes of the Party and promised to correct them with new economic policies, favoring the average citizen. In 1954, the Petőfi Circle became the forum of the Reform Communists, where open criticism of the Stalinist policies was temporarily tolerated. By 1955, Mátyás Rákosi regained the upper hand in the Party and successfully removed Imre Nagy from his position. Later, he even expelled Nagy from the Party. The concessions made by Imre Nagy were withdrawn and the debates in the Petőfi Circle were stopped. After Khrushchev's secret speech to the Soviet Communist Party in 1956, denouncing Stalin, the reform movement gained strength again. The debates in the Petőfi Circle resumed and open demands were made to rehabilitate the victims of the show trials and to punish those responsible for the Nagy were withdrawn and the debates in the Petőfi Circle were stopped. After Khrushchev's secret speech to the Soviet Communist Party in 1956,

denouncing Stalin, the reform movement gained strength again. The debates in the Petőfi Circle resumed and open demands were made to rehabilitate the victims of the show trials and to punish those responsible for the legalized murders. Having lost Moscow's support and under pressure from within the party leadership, Rákosi resigned in July in favor of a longtime partner and another Stalinist, Ernő (Ernest) Gerő. On 10 October 1956, László (Ladislav) Rajk and his executed Communist associates were re-buried in a formal ceremony, while tens of thousands of people listened in cold silence to the contrite eulogies made by the Communist leaders responsible for their death.

While the Hungarian Communist Party leadership participated in an eight-day long conference with the Yugoslav Communists in Belgrade, the suppressed feelings and resentment of the oppressed masses came to the surface and unprecedented events and actions quickly followed each other in their absence. The university students made the first public demands for change formulated the feelings and the aspirations of the Hungarian people. On 16 October, the students of the University of Szeged created the first independent Student Association. By 22 October, student associations had been formed and meetings were held at all the Hungarian universities.

*The events of the revolution:*

*On 23 October 1956*, the university students of Budapest called for a demonstration at 3:00 pm. The students of Pest were to meet at the statue of Petőfi, those of Buda at the statue of General Bem. They were joined by tens of thousands of people, uniting in one vast mass of people. At 5 pm they arrived in front of the Parliament building, demanding the appearance of Imre Nagy. Following this, some of the unarmed demonstrators moved to the building of the Hungarian Radio, to have their demands for political change read over the air. When Ernő Gerő, just returned from Belgrade, Yugoslavia, was informed of the events, he made a provocative speech at 8 pm, calling the demonstrators counter revolutionaries and rabid nationalists. The speech only caused disappointment and anger. A large group went over to the gigantic bronze statue of Stalin, erected in 1951, and, by 9 pm, this symbol of tyranny was cut down with welding torches. Then a smaller group attempted to enter the Radio building to have their demands broadcast; but the AVH units guarding the building opened fire on the demonstrators. Some of the demonstrators managed to get hold of some guns and began firing at the building, turning the hitherto unarmed demonstration into an armed uprising.

*On the night of 23/24 October 1956*, the Central Committee of the Communist Party invoked the provisions of the Warsaw Alliance and called on the Commander-in-Chief of the Soviet troops stationed in Hungary to provide aid in the "restoration of order". By this time, the Soviet Army units were already waiting in the outskirts of Budapest.

The Soviet tanks moved into Budapest, seized the main public buildings, the railway stations and the bridges in the early morning of October 24. The Presidential Council chose Imre Nagy as Prime Minister once again; he was not entirely clear about the nature of the uprising at this early stage. He invoked the War Measures Act that authorized the execution on the spot of anyone participating in the insurrection. He also introduced an

after-dark curfew and a total ban on any gathering of people in the streets. Nevertheless, the previous day's speech by Ernő Gerő had caused so much anger and resentment that demonstrations were held throughout the country. The gravity of the political situation was fully recognized by Moscow and a high level delegation was dispatched to Budapest and they agreed to a compromise solution proposed by the Hungarian Communist leadership.

Following the action of the AVH at the Radio building and in response to the intervention of Soviet forces, the unarmed demonstration turned into an armed insurrection and broadened into a full-fledged national revolution. At first, at the main crossroads in Budapest, then around the country, independent armed groups formed, spontaneously and successfully resisting the attacking Soviet tanks and the AVH units. Initially, most of the freedom fighters were workers and students; but recruits and officers of the Hungarian Army, bringing military expertise to the struggle, soon joined them. The insurgents acquired their arms from Party Centers, military barracks, armories and weaponry captured from the enemy.

The policemen either left their posts or joined the revolutionaries. The Soviet tanks were often lured into narrow streets, where they were attacked and destroyed with Molotov cocktails thrown from roofs and doorways. There were many 13-15 year old boys among them, who managed to escape parental supervision and joined the fight. For their heroic, if foolhardy, actions they received the endearing name "*Pesti srácok*" (Boys of Budapest). At times, and in some areas, the Soviet tanks directed indiscriminate machine gun fire at houses and lit windows. At the least sign of opposition they used their heavy guns to destroy whole apartment buildings. While the population viewed such despicable actions with contempt, they increased the morale and determination of the fighters who were fully supported by the people. Within a day the armed resistance spread across the country like wild fire. Under 10 years of AVH terror, involving torture, unlawful imprisonment and series of executions, the people came to loathe not only the oppression, but also the never ending lies of Communist propaganda.

The Communist leaders of Hungary desperately hung on to power. They attempted to portray the national revolution as insignificant armed disturbances, caused by hooligans and "elements of the old ruling classes". Initially, they did not acknowledge the presence of Soviet tanks and tried to break the momentum of the Revolution by initiating insincere negotiations and making pacifying, albeit false promises pending on the surrender of arms by the freedom fighters.

*In the morning of 25 October 1956*, a demonstration took place on the square in front of the Parliament. The demonstration was violently dispersed by machine gun fire from the roof of the Ministry of Agriculture facing the square. About 200 dead and 1000 wounded were left at the site. The firing only ended when, surprisingly, one of the Soviet tanks returned fire with its machine guns. Viewing these events with alarm, the Soviet delegation proposed to remove Ernő Gerő from his post of Secretary-General. In his place, the Hungarian Communist leadership appointed János (John) Kádár, who had been both imprisoned and tortured during Rákosi's reign of terror, as the new Secretary-General of the Party. With the expansion of the Revolution, the wounded began to fill up the hospitals. The AVH made itself even more loathed for ignoring the rules of the International Red Cross and firing mercilessly on ambulances and medical personnel. Only the AVH was willing to support or fight for the Hungarian Communist dictatorship

and it did it mercilessly. In spite of orders, the regular army units did not fire at the insurgents anywhere in the country. The young staff officers of the Ministry of Defense, with their actions or inactions substantially contributed to the successful unfolding of the Revolution. In the course of the struggle, it was proven that the leading Communist politicians were not really Hungarians but Soviet commissars and military officers with Soviet citizenship masquerading in Hungarian colors.

*By 25 October*, many of the Soviet tanks ordered to quash the Revolution, did not fire at the freedom fighters. Many Russian soldiers gave them their weapons and many others, including non-commissioned officers and regular officers, joined the freedom fighters and fought alongside them.

*On 26 October 1956*, Pope Pius XII devoted a special papal encyclical to the events in Hungary, expressing his support for the Revolution and praying for its success.

Throughout the country, the newly formed independent municipal and factory councils formed and presented their demands. Among them were the immediate withdrawal of Soviet troops and the setting up of a truly national Hungarian government. In these demands, just like in the street fighting, the people: workers, peasants and white-collar professionals were united. While the AVH continued to attack the freedom fighters, more and more complete units of the army joined the revolutionaries.

Within the first three days of the Revolution, the Communist Party completely disintegrated in Hungary. The red stars were removed from public buildings, the Lenin statues were thrown out of the windows of party offices, and Party members threw away or burned their membership booklets. The new Secretary-General could only rely on the AVH and, in his radio speeches the word “order” was replaced with “request”.

Vandalism, theft and indiscriminate killing usually accompany revolutions. This was not the case in Hungary. Nobody took any food, jewelry or other items from the broken shop windows. When captured, the AVH agents were arrested and safely escorted to prison by the freedom fighters. Where mob justice was carried out, the public identified the AVH agents on the spot. Often the freedom fighters saved them from death. In many cases, the members of the AVH asked to be arrested, for they felt more secure under the guard of the revolutionaries. While lynching is never justified, the cause of such sporadic acts, during the initial phase of the Revolution, lies in the fact that those arrested and tortured by them could not forget the AVH’s ruthless acts of the hated Communist regime, coupled with unlimited tortures.

With the victory of the Revolution on 26 October, in Győr, most of western Hungary came under the control of the revolutionaries. At this time the commanders of the Russian forces stationed in western Hungary announced that they would not interfere in the internal affairs of Hungary.

Workers' councils were formed across the country and they were to be the single most important new public organization that shaped the course of events, both in the short term and even after the defeat of the Revolution. Colonel Pál (Paul) Maléter was sent with his armored unit against the freedom fighters of the Corvin-köz, but decided instead to support the Revolution, as did Sándor (Alexander) Kopácsy, the Police Chief of Budapest.

*On 26 October 1956*, the Russian forces repeatedly attacked the freedom fighters’ positions including the Corvin-köz (Corvin-alley), where a large movie theater was used as their headquarters. From there the freedom fighters had a good view and easy access

towards the main boulevards and other centers of resistance in the area. The Killian-barracks across the street were also a site of fierce fighting. Colonel Maléter, later Minister of Defense of the Revolutionary Government, was ordered to eliminate the insurgents; but after two days of vacillation he decided to join the Revolution instead. The advance waves of Soviet forces were broken up by the heroic and fearless defense of the revolutionaries and the Russians were forced to withdraw leaving behind many burned out tanks.

Under the leadership of Imre Nagy as Prime Minister, a new national government was formed. The combined effects of the workers' strike that began on October 24, and the self-sacrifice of the revolutionaries brought about the rapid demise of the Communist Party in Hungary.

The revolutionaries liberated the political prisoners held in the prison at Vác. In many cities in the country, armed conflict erupted between the revolutionaries and the defenders of the Communist regime who soon gave up resistance and went into hiding. The agricultural communities sent many truckloads of food supply for the freedom fighters. They had no organized system for obtaining provisions. The treatment of the wounded became a public concern. In the first three days, the number of dead was numerous with an even larger number of wounded insurgents.

On 28 October 1956, in the official paper of the Communist Party, the "*Szabad Nép*" (*Free People*), an editorial appeared with the title, "Being loyal to the truth". It stated that what had taken place in Hungary was not a counter-revolution but a national democratic movement. The struggle was not against the regime but for socialist democracy and national independence. In his evening speech, for the first time since the Revolution began, Imre Nagy publicly took the side of the Revolution, promising fulfillment of the freedom fighters' demands.

Soon it became obvious that the new Government was still under Communist influence. The Communist Party, in quasi alliance with it, used delaying tactics. Though they no longer controlled the workers or even the Army, the Communists obstructed the full official acceptance of the people's demands. The officers of the Zrinyi Military Academy and the cadets of Szentendre, sent against the freedom fighters, took up positions against the Soviet troops instead.

The Soviet occupation forces, stationed in Hungary, were not large enough to deal with the situation and were not suitable for the suppression of the Hungarian people's insurrection. Though, to a large extent kept in isolation from Hungarian society, they were aware of the real conditions in the country and could see that what they witnessed was not a counter-revolution of the upper classes and the imperialists, as the propaganda made it out to be. In the capital, the Russian troops simply could not prevail and in the countryside the commanders deemed it wiser to refrain from intervention. The Russians' most important route of re-supply, in District XX of Budapest, was cut by 3000 freedom fighters. They had 74 pieces of artillery with regular army personnel manning them and more than 3500 automatic weapons. From the Soviet troops, they bought (for money, food and liquor) the following military equipment: 2 rocket launchers ("Stalin organs"), 1 tank, 6 armor-piercing guns, 4 automatic heavy guns, 44 machine guns, 360 sub-machine guns, 600 various infantry weapons, 3 gasoline trucks and 15-20 trucks full of ammunition. When the Russians attempted to break the blockade, they lost 50-60 tanks and 20-25 armored personnel carriers in the encounter.

*On October 28, 1956*, numerous smaller Russian units led by their commanders joined the freedom fighters.

With the agreement of the Soviet delegation, Imre Nagy ordered a general cease-fire. On this day, conceding to the demands of the freedom fighters, the hated AVH was dissolved. According to foreign observers, the number of victims, dead and wounded freedom fighters and civilians, up to the time of the cease-fire was about 10,000.

At the request of the three western permanent members of the UN Security Council the Council, put the "Hungarian question" on its agenda. However, the Suez Crisis, occurring at the same time, diverted international attention from the Hungarian events.

*On 29 October 1956*, the National Guard was established from among the freedom fighters and members of the regular army. The freedom fighters wanted to follow Austria's example and to proclaim Hungary's complete neutrality. As yet, Prime Minister Imre Nagy resisted the general demands of the country and rejected the memorandum of the Writers' Union that outlined their demands.

In the question of the Hungarian problem, the Soviet Union welcomed the attitude of the United States. On the same day, the American Ambassador in Moscow presented the following telegram to the Soviet Government: "*The United States does not consider Hungary or any member of the Soviet Bloc as a potential ally*".

*On 30 October 1956*, the freedom fighters took control of the main public facilities of Budapest. They disarmed the still resisting AVH units. With this, the fighting ended and public order was restored. The political prisoners were freed from the internment camps, the cleaning of rubble from the streets began and peaceful life resumed in the capital. The shaping of a new life for the country became the central topic of both public and private discussions. Having witnessed the unity and the force of the people's will, Prime Minister Imre Nagy now fully identified himself with the aims of the Revolution and remained committed to them in the coming days. On this day the one party system also ceased to exist. A new cabinet was formed from the coalition parties of 1945 and negotiations were initiated about the withdrawal of the Soviet troops.

However, the military leadership of the victorious revolution by the people was taken over by the Moscow-trained generals; therefore the revolution could not count on the total loyalty of the army. The activities of these generals and staff officers made it easier for the Soviet forces to recapture Budapest on November 4.

In its declaration about Eastern Europe and Hungary, the Soviet Union acknowledged that: "In the relationship between the Soviet Union and the people's democracies, the principle of equality was mistakenly ignored". The Hungarian Government then presented to the representatives of the Soviet Union their main demand. Namely, the complete withdrawal of the Soviet troops from the territory of Hungary, the withdrawal of Hungary from the Warsaw Pact, and the re-arrangement of Hungary's relations with the Soviet Union on the basis of independence and neutrality. In his radio address, Imre Nagy announced these demands and recognized the legality of the spontaneously formed workers' councils, counting on their cooperation and support.

Thus, the Revolution achieved its political goals. All components of the new political stage, new parties, or associations as well as the remnants of old parties, such as the Hungarian Communist Party in a new, truly democratic political system, were tolerated due to the great power status of the Soviet Union.

*On 31 October 1956*, the Russian forces began their withdrawal from Hungary.

However, it soon became obvious that the seemingly cooperative negotiations by the Soviet delegation were part of a delaying tactic. Only the demoralized occupational troops, having suffered heavy losses, were withdrawn and replaced with fresh armored divisions entering Hungary at various border crossings. The Council of Ministers discussed these developments and concluded that this action of the Soviet Union was a violation of the Warsaw Pact because the entry of the new Soviet forces took place without consultation with the Hungarian Government and without its consent. By this time, public order was re-established in the capital. The Council of the Rabbis of Budapest declared that there were no acts of anti-Semitism in the country, despite the fact that almost all the Muscovite Communist leaders of Hungary were Jewish. It was the unanimous view of the western media that the Revolution was incredibly pure; i.e., free of crimes or reprisals and that its victory was not followed by mob rule.

*By 1 November 1956*, the new Soviet armored divisions totally occupied Hungary. They closed down the Austrian border, surrounded the airports and drew three armored rings around Budapest. On the same day, Andropov, the Soviet Ambassador and Minister Plenipotentiary to Hungary, was told of the decision of the Hungarian Council of Ministers. The Council's decision was to withdraw from the Warsaw Pact, as the Soviet Union had violated its terms and to declare Hungary's complete neutrality and her wish not to join any power bloc. After the radio speech of Imre Nagy, the new General-Secretary of the Communist Party, János Kádár went to the Soviet Embassy in Budapest, and then departed in an armored carrier to an unknown destination.

*On 2 November 1956*, the previously silenced church leaders: Lutheran Bishop Lajos (Louis) Ordass, Reformed Bishop László (Ladislav) Ravasz, next day the Catholic ex-Archbishop of Hungary József (Joseph) Mindszenty, as well as the Association of Rabbis all took a stand on the side of the Revolution. All of them voiced their commitment to the objectives of the uprising, expressed their belief in its purity and emphasized the necessity to focus on a peaceful reconstruction in the months to come. In Budapest, a collection of donations was organized in unguarded open boxes to help the families of those who were killed in the fighting.

At the same time, Soviet leaders, Khrushchev and Malenkov were on the island of Bryony in Yugoslavia, discussing the Hungarian question with President Tito. On the same day, the US government sent the following telegram to Yugoslavia: *"The Government of the United States does not look with favor at those governments which have an unfriendly relationship with the Soviet Union"*.

The new Soviet armored divisions silently invaded Hungary from three directions: via Záhony from the Soviet Union and also from Romania and Czechoslovakia. The invading Soviet forces had thirteen armored divisions and three elite infantry divisions including approximately 200,000 men. According to the declaration of the Russian Commander-in-Chief the invading troops were coming with 'peaceful intentions' and had no plans to attack. The Hungarian military response was to hold back with rather vain hopes, and with the decision not to give any excuse to the Soviets to use their overwhelming force. The whole country was in a nerve-wracking state of military readiness but took no action.

*On 3 November 1956*, the twelfth day of the Revolution, the newly formed Hungarian Government well reflected in its composition the prevailing public opinion. There were three Communists, three Smallholders, three Social Democrats, two Peasant Party ministers and one minister without party affiliation in the new Government. The two

basic demands of the people, neutrality in foreign policy and free elections based on a multiparty system, were seemingly achieved. The remnants of the AVH, still in hiding, came forward to the call of the Government, and appeared at the State Prosecutor's office in large numbers, asking for their own arrest until the investigation of their case was complete.

The United Nations put the "Hungarian question" on its agenda after a vote, with a proportion in favor of discussion ten to one. In his letter to Secretary-General Hamarskjöld, the Prime Minister of Hungary asked the UN to protect Hungary's newly proclaimed neutrality. The American delegate reminded the members that the Paris Peace Treaty of February 10, 1947 guaranteed Hungary's independence. However, the Security Council postponed its meeting about the "Hungarian question".

*On 4 November 1956*, the negotiations for the withdrawal of the Soviet troops that had begun the day before in Budapest were resumed at Soviet request at the Soviet headquarters located in the village of Tököl. However, the request was only intended as a trap for the Hungarian military leaders, led by the Minister of Defense, Pál Maléter. At two o'clock in the morning, General Serov, head of the Soviet Political Police "arrested" them – in other words captured them.

The 2000 Soviet tanks surrounding Budapest began their attack at 3 o'clock in the morning. The commander of the National Guard, Béla Király, asked Prime Minister Nagy for permission to order a defensive action; but his request was refused. Nagy informed Béla Király that Soviet ambassador Andropov - standing beside him - had just reassured him that there must have been some "mistake", because the Soviet Government had given no orders to attack Hungary. The Soviet Ambassador tried to deceive the Hungarian Prime Minister up to the last moments. News of the attack came at 5:15 am local time, on Radio Budapest in an urgent appeal by Nagy himself for help from the West. Despite an apparent withdrawal the previous week, Soviet troops, deployed outside Budapest swept back into the capital with Russian and Romanian reinforcements, between 4 am and 8 am local time. Soviet artillery units pounded Budapest from the surrounding hills, as Soviet planes bombarded the capital.

At the end of the broadcast, the Prime Minister of the legitimate Hungarian Government escaped to the Yugoslav Embassy in Budapest and, together with a few associates, asked for political asylum.

The Soviet forces were merciless with their overwhelming superiority. The Soviet tanks indiscriminately shot at civilian houses in certain areas, especially when their action was reciprocated by gunfire. No Hungarian units fought with the Russians, while many Soviet officers and soldiers fought and died on the Hungarian side. If the Russians captured any of these soldiers alive, they executed them on the spot. There was no mercy but there were no illusions either. The freedom fighters knew that the fight was unequal and, if they ran out of ammunition, there would be no more supply. They fought as long as their ammunition lasted and no one tried to escape. The Soviet tanks destroyed everything in their way. They blasted Budapest, a city that had lived in the euphoria of a hard earned couple of days of freedom.

Although Hungary was not prepared for such an all out attack, the defensive struggle continued for several weeks. The Russian forces fired at unarmed bread lines of mostly women and children and at ambulances. Ignoring international laws, they were unable to crush the resistance in a few days as originally planned. Only the use of heavy artillery

and bombing raids could overcome the resisting workers of the industrial centers. The university students fought on until their last bullets; the students of the Zrinyi Military Academy fought on for weeks in the Mátra Mountains, from where they sent the message 'MUK' that meant "*Márciusban újra kezdjük*" (In March we will start it again").

At the time, the attention of the Western Powers was concentrated on the Suez Canal crisis and not the Hungarian freedom fighters' desperate situation. Fading cries for help over the airwaves fell on deaf ears. The Prime Minister of Canada, John Diefenbaker, was the only Western statesman demanding an international investigation of the crushing of the 1956 Hungarian Revolution; but his demand led to no UN resolution.

In the end, the 200-million strong Soviet Union's military might crushed the freedom of a nation of only 10 million. Through one of the greatest betrayals in history, the Soviet Union committed one of the greatest massacres in Hungarian history.

While the Revolution was suppressed, the Soviet leaders appointed a new satellite Government under János Kádár. However, neither the Kádár Government nor the Soviet military leaders foresaw the lengthy passive resistance of the workers, following the military defeat. With the renewed Soviet occupation, the Hungarian Revolution did not come to a sudden end. National strikes followed paralyzing the economy of the country. The Kádár Government tried to explain the presence of Soviet troops and persuade the people to return to work, with leaflets dropped from airplanes; but to no avail. Underground flyers continued to demand the withdrawal of Soviet troops and the freeing of arrested labor leaders. János Kádár declared that he did not wish to start criminal proceedings against "Imre Nagy and his group" for their previous activities. However, when they left their refuge in the Yugoslav Embassy, they were immediately captured and taken with Soviet assistance to Romania. Later on, when the Kádár Government's position grew stronger, all of them were brought back to Hungary and, together with Pál Maléter, they were tried and executed on 16 June 1958.

The revenge was merciless and widespread since the whole population was involved in the uprising, especially since the leaders of the struggle were the workers and their sons and daughters, who had grown up in the "Socialist" (Communist) system. Later, the Kádár-regime attempted to stain the purity of the Revolution by means of propaganda.

*On 7 November 1956*, the most important Soviet national day, was not celebrated with enthusiasm by anyone except the hardcore communists. In the eyes of the Hungarians, the Soviet army was an alien occupation force and everyone viewed János Kádár as a traitor. While the freight trains transported the captured Hungarian freedom fighters to the interior of the Soviet Union, in the universities of Kiev, Leningrad and Moscow, a student movement stirred in support of the Hungarian people. Student groups passed out leaflets and proclamations calling on the Russian people to help the Hungarians. In many cases, the trains, carrying the deported freedom fighters, were delayed by the local population and there were even calls for the overthrow of Soviet power. For a long time after the Revolution, many Soviet soldiers were still serving prison sentences for refusing the order to fire on Hungarians.

The UN General Assembly's XI session meeting, between 12 November 1956 and 9 March 1957, dealt with the "Hungarian question" and passed a resolution calling for the setting up of a five member investigative committee, whose task would be to inform the member states of the events in Hungary. The resolution also demanded the withdrawal of Soviet troops, the entry of UN observers to Hungary and free elections held under the

supervision of the United Nations. The Kádár-Government refused these demands on the grounds that they represented a grave interference in the internal affairs of Hungary.

During this period the number of killed was between 15-20 thousand, including 2-3 thousand civil casualties; 1-3 thousand freedom fighters killed in action and in wounds; 3-4 thousand victims of revenge; 3-4 thousand victims of prosecution; uniformed persons killed 2-3 thousand; 848 mostly young persons were deported to the Soviet Union. The number of wounded was 20,000. In the retaliation that followed the 1956 Revolution, 21,600 were arrested and incarcerated, at least until 1963. Of this number 13,000 were sent to internment camps. In 1957, the Communist authorities sentenced about 200 teenagers (14-16 year old boys and girls) to death but kept some of them on death row until they reached the age of 18 when they were hanged. Some of them were executed earlier. Between 1956 and 1961, no less than 300 people (youngsters and workers) were executed in Hungary. Following the Revolution, many others were executed by "death brigades", made up of former AVH agents. Later, these agents were rewarded with high paying media-related positions, working for long years as broadcasters, journalists and editors.

As to the real number of death the calculation of Géza Juhász, witer, journalist and critic, revelad new figures. According to him there were 8-10 thousand civilian death, 3-4 thousand victims of revenge, 2-3 thousand death of the insurgent, and 2-3 thousand death of the Soviet and Hungarian armies. Alltogether 15-20 thousand died in the armed conflict of 1956 in Hungary.

According to the Austrian Interior Ministry, 165,361 Hungarian citizens asked for political asylum in 1956 in Austria. At the beginning of 1957, more than ten thousand escaped to Yugoslavia and also ended up in western countries. The total number of refugees rose to 210,000. By general amnesty, 3480 imprisoned persons were freed in 1963, but kept under police surveillence and were discriminated against for decades. However, 600 freedom fighters still remained in prison until the 1970s.

According to foreign historians and writers, the 1956 Revolution marked an important turning point in human history. It could only be compared in magnitude to the French Revolution and the Russian Revolution of October 1917.

Severe retaliation against leading Hungarians in detached territories, especially in Transylvania, Romania, took place in the wake of the defeated Hungarian Revolution.

The Hungarian freedom fighters could not foresee that their Revolution would awaken national consciousness all over Eastern Europe and in the Soviet Union, leading eventually to the collapse of the Soviet empire at the end of December 1991.

During the past decades, many books, monographs, articles and memoirs have appeared about the 1956 Revolution, both in Hungarian and in other languages. They unanimously conclude that the precondition or the main underlying cause of the 1956 Revolution was the ubiquitous oppression by internal and external forces that permeated everyday life in Hungary. Another unfortunate fact is that no single charismatic leader emerged after the spontaneous explosion of the people's frustration. In 1956, Hungarians did not want to have anything to do with Communism or Socialism, nor did they want the return of the pre-war social and economic order. Their desire was merely to live freely in an independent state and in a democratic system, imbued with a social conscience.

Following the collapse of the Communist regime in Hungary, some 200,000 people gathered on Budapest's Heroes Square on 16 June 1989, to say farewell symbolically and

to give final respect in the form of a state funeral to the heroes and martyrs of the Revolution most of whom were buried in unmarked graves. After the solemn tribute in the cemetery of Rákoskeresztúr, special areas were set aside in memory of those who were re-buried and of those whose graves were never found. A large memorial was also erected here, commemorating their heroic sacrifice. Before the fall of Communism, only Hungarians living in the West could demonstrate such expressions of respect and gratitude.

The Hungarian Revolution and Freedom Fight of 1956 ranks among the glorious Hungarian Freedom Fights of Prince István (Stephen) Bocskay, Count Imre (Emeric) Thököly, the Insurrection and War of Liberation of Prince Ferenc (Francis) Rákóczi II, and the Revolution and War of Independence of 1848-1849. – B: 1230, 1078, 1366, 7655, 1020, T: 7665.→**State Security Authority; Petőfi Circle; Rákosi, Mátyás; Nagy, Imre; Gerő, Ernő; Bem, József; Maléter, Pál; Ordass, Lajos, Ravasz, László; Mindszenty József; Király, Béla; Kádár János; Red Rules in Hungary.**

**Freedom Fight of 1956 (Revolution and Freedom Fight), Anniversaries of** – The Kádár regime called it a counter-revolution, after crushing the freedom fight. However, the great majority of people in Hungary silently and mostly secretly remembered it every year as a genuine Revolution and Freedom Fight against Communism and Soviet occupation.

At the *first anniversary in 1957*, Albert Camus (1913-1960), the renowned French existentialist philosopher and writer, remembered it thus: *“The trampled down, enfettered Hungary did more for freedom and justice than any other nation in the world during the last twenty years...we could only remain faithful to Hungary, if we never and nowhere would reveal why the Hungarian fighters gave their lives and never even indirectly would justify the murderers. It is not easy for us to be worthy of so much sacrifice. But we should attempt to do it, forgetting our disputes, revising our errors, with redoubled effort and increased solidarity in a unifying Europe at last.”*

On the *40th anniversary* of the Revolution and Freedom Fight in 1996, a grand memorial was erected in the old Tabán district of Budapest. It is 16.5 m high and is crowned by a 4 m high *Turul* bird, the totem bird of the ancient Hungarians. There is an inscription relating to 1956 on it. Below the inscription, over the depiction of the rising revolutionary masses, there is the symbol of the Revolution: the national flag with a hole in the center where the hammer and the sickle used to be. The memorial is the work of Károly (Charles) Ócsai.

*The 50th anniversary* of the 1956 Revolution and Freedom Fight was held worldwide in 2006, recognizing its significance in world history, but the main event was in Budapest, after 16 years of changed political conditions in Hungary. The state celebration was attended by more than 50 high ranking representatives of other nations, including royalty and presidents, paying homage to the fallen fighters and to the Revolution and Freedom Fight which, in the long run, changed the political landscape of Europe. However, due to the political tension in the country, separately from the state ceremony, the political opposition and the veterans of the 1956 Revolution organized separate commemorations. Protesters and more than a 100 thousand participants of the opposition rallies, who assembled peacefully, waving flags and placards, were suddenly attacked by a strong police force with rubber bullets, tear-gas, water cannons and even mounted police, who

beat up, injured and arrested many. This abominable act not only marred the historical event and aborted the effort to demonstrate a national unity, but aggravated the political tension in Hungary, caused by the publication of a secret “Balatonőszöd speech” of Socialist Prime Minister, Ferenc (Francis) Gyurcsány, who openly admitted to lying and giving false promises to voters in order to win re-election in April 2006. – B: 1644, T: 7456.→**Gyurcsány, Ferenc.**

**Freising, Otto** (1114-1158) – Bishop of Freising, German chronicler and uncle of Frederick Barbarossa. He studied in Paris. Between 1147 and 1149 he took part in the Second Crusade to the Holy Land and went through Hungary. His *gesta* (saga) of Emperor Frederick I, written in Latin is about the king’s life until 1156, while his *World Chronicle*, written in 1146, is an important historical resource for Hungary. – B: 1138, T: 3240.

**Fricsay, Ferenc** (Francis) (Budapest, 9 August 1914 - Basel, Switzerland, 20 February 1963) – Hungarian conductor, from 1960 an Austrian citizen. He became one of the most acclaimed conductors of his generation. Fricsay studied at the Budapest Academy of Music under both Zoltán Kodály and Béla Bartók, whose music he later championed. He started his career as conductor of a military band. Fricsay’s first conducting appointment came in 1936, in Szeged, where he remained until 1944. His debut conducting the Budapest Opera was in 1939 and in 1945 he was appointed the company's music director, taking the parallel appointment with the Budapest Philharmonic. Between 1946-1948, he was conductor of the Hungarian State Opera. In 1947, he was guest conductor with the Vienna State Opera. From 1948-1952, he became Music Director of the West German Opera of Berlin, and of the Symphony Orchestra of the West German Radio (RIAS). From 1956-1959, he was Music director of the Munich State Opera. He toured all over Europe, North and South America, and was guest conductor at the Salzburg and Edinburgh Music Festivals. He was a noted interpreter of Verdi, Mozart and Bartók. He published a book *About Mozart and Bartók (Über Mozart und Bartók)* in 1962. – B: 0883, 1426, 1031, T: 7617.→**Fricsay, Richard Jr.; Fricsay, Richard Sr; Bartók, Béla; Kodály, Zoltán.**

**Fricsay, Richard Jr.** (Vienna, 5 February 1888 - Budapest, 11 February 1961) – Army musician, officer, teacher of music and classical singing. Son of Richard Fricsay Sr., and father of Ferenc (Francis) Fricsay. He followed the footsteps of his father and became a military musician. He was a music officer in Székesfehérvár (1908-1910), following it he was conductor at the Hungarian *Landwehr* army in Zagreb (now in Croatia) (1910-1920). From 1920 to 1922 he was Music and Voice Professor at the Royal Hungarian Ludovika Military Academy, Budapest. A year later he was employed at the Academy of Music, in the Department of the Armed Forces Cartographical Office as an adviser. From 1924 to 1945 he was bandleader of the Military Music of the Water Guard in Budapest. Then, followed a year as President of the Music Department in the Ministry of Defence. He retired in 1946 as conductor in the Armed Forces with the rank of Colonel. From 1947 to 1958 he was a music director and librarian at the Hungarian Radio, serving it with his rich musical experience. – B: 0883, T: 7103.→**Fricsay, Richard Sr.; Fricsay, Ferenc; Ludovika Royal Hungarian Military Academy.**

**Fricsay, Richard Sr.** (Kremsier, Bohemia, 27 March 1867 - Budapest, 16 March 1945) –

Conductor. Father of Richard Fricsay Jr. He studied in Kremsier and Olmütz, thereafter became a high school teacher at the local school and also a representative of the Thonet factory. From 1897, he was the military conductor of the Austro-Hungarian Army. He obtained Hungarian citizenship in 1902. He organized the Philharmonic Orchestra of Székesfehérvár, and established a music school there. In 1912, he worked in Nagyvárad (now Oradea, Romania). Between 1913 and 1934, he was Director-Conductor of the orchestra of the First Honvéd Infantry Regiment. On several occasions, he performed with his Honvéd orchestra abroad (Bayreuth, Sofia, Istanbul). The organization of the Austro-Hungarian Monarchy's military orchestra is linked to his name. A Military Music Heritage Society (*Katonazenei Hagyományörző Egyesület*) bears his name in Budapest. – B: 0883, 1031, T: 7684→**Fricsay, Richard Jr.; Fricsay, Ferenc.**

**Friderikusz, Sándor** (Alexander) (nickname Fridi) (Nyíregyháza, 2 November 1958 - ) – Journalist, reporter, showman, businessman. He earned a Degree in Jurisprudence at the Law School of University of Budapest. He has been a reporter and journalist since age 14. His first TV program was, *My Movie*. His *Friderikusz Show* was launched in 1992. It was about famous people around the world. His guests included Cindy Crawford, Alain Delon, Jean Paul Belmondo, Linda Grey, and others. In 1994, he became a member of the International Association of The World's Most Popular Showmen. From 1998 to 1999, he had another show: *Funny and Amazing (Meglepő és mulatságos)*. Between 2000 and 2001, his new show was the *Child's Mouth (Gyerekszáj)*. In it he talked to young children about serious, grown-up questions. At the same time, his *My Movie Continues... (Az én mozim folytatódik...)* was released. In 2002, he had a show called *Fantastic Europe (Fantasztikus Európa)*, which was related to the European Union. He is one of the richest Hungarians. He wrote six books. One of them is entitled: *Would You Like To Be the President of the Republic? (Akar-e Ön köztársasági elnök lenni?)*. He was awarded among others the Pulitzer Memorial Prize (1997), the Tolerance Prize (1997) and the title of Private Person Who Donates the Most (1999), the Prima Primissima Prize (2005), and the Free Press Prize (2008). – B: 1040, 1031, T: 1040, 7103.

**Friedman, Milton** (Brooklyn, N.Y. 31 July 1912 - San Francisco, 16 November 2006) – Economist. His father was Jenő (Eugene) Saul Friedman, his mother Sarah Ethel Landau, both born in Hungary's Sub-Carpathia (*Kárpátalja*, now Ukraine), but emigrated to the US, where their son was born. Soon, the family moved to Rahway NJ in the environs of New York. In 1932, he graduated from Rutgers University, New Brunswick, NJ, a famous Hungarian center at the time. He continued his studies at the University of Chicago, where he received an M.A. (1933) and he earned a PhD at Columbia University, New York (1946). He taught Statistics, later Economics at the University of Chicago (1946-1976). He led the "Monetarist" Chicago School against the Keynesian orthodoxy in the 1960s and early 1970s. He has been a senior research fellow at the Hoover Institution since 1977. He was drawn to the field of public affairs. He was a member of the research staff of the National Bureau of Economic Research (1937-1981). In the fall of 1950, he was in Paris as a consultant to the U.S. governmental agency administering the Marshall Plan. Later, his major assignment was to study the Schuman Plan, the precursor of the Common Market. He was economic adviser to Senator Goldwater; advisor to President Nixon (1971-1974) and to Augusto Pinochet, President of Chile (1973-1974). He helped to straighten out Chile's confused economy. He was a member of President Ronald Reagan's Economic Policy Advisory Board. His works include many

books and articles, most notably: *A Theory of the Consumption Function; The Optimum Quantity of Money and Other Essays*, and *A Monetary History of the United States; Monetary Statistics of the United States*, and *Monetary Trends in the United States and the United Kingdom*, with A.J. Schwartz. In 1976, he was awarded the Nobel Prize in Economics “for his achievements in the fields of consumption analysis, monetary history and theory and for his demonstration of the complexity of stabilization policy”. He received many awards, among them the Presidential Medal of Freedom (1988) and the National Medal of Science (1988). He is regarded as the best-known economist and leader of the Chicago School of monetary economics. – B: 1037, 1196, 1410, T: 7103.→**Stigler, George Joseph.**

**Friedmann, Endre** (Andrew) (1913 - 1954) – Photo-reporter, photo artist, also known as “Robert Capa”. His Hungarian friends nicknamed him on account of his wide mouth “*cápa*” (shark). He became famous in the Spanish Civil War for his pictures taken as war correspondent of the Republicans. He reported to Time Magazine during World War II about the Allies’ operations in North Africa and Western Europe, and from the war in Indochina. He lost his life on a minefield in Vietnam. He was one of the most distinguished photo-reporters of the 20th century. – B: 1153, T: 7680.

**Friedrich, István** (Stephen) (Malacka, now Slovakia, 1 July 1883 - Vác, 25 November 1951) – Politician, industrialist. He acquired an engineering diploma at the Universities of Budapest and Charlottenburg, Germany, then read Law at Budapest. In 1928, he founded a mechanics shop and later a metal and hardware factory at Mátyásföld, near Budapest. In 1918, he was Undersecretary of Military Affairs in the Mihály (Michael) Károlyi Government. During the Council (Soviet) Republic, he was arrested for counter-revolutionary activities, but escaped. He participated in the downfall of the Gyula (Julius) Peidl Government on 6 August 1919. He was Prime Minister from 7 August until 25 November 1918, then Minister of National Defense until 15 March 1920. Together with the Andrassy Group, he formed the new party of *Allied Christian Opposition (Szövetkezet Keresztyén Ellenzék)* in 1922. He set up the *Szittyá’s Camp (Szittyák tábora)*, a right-wing organization. He was indicted in the Tisza-lawsuit, but was acquitted. He participated in the Western Hungarian fights of 1921 against the *Őrvidék* (now *Burgenland*) annexation to Austria. In 1951 he was arrested in connection with the Archbishop József (Joseph) Grósz, and was accused with conspiracy to overthrow the democratic order. He was sentenced to 15 years in Prison. He died in Vác’s Prison. In 1990 his sentence was annulled and he was rehabilitated. – B: 0883, 1031, T: 7103.→**Council (Soviet) Republic of Hungary; Ereky, Károly; Nagyatádi Szabó, István; Grósz, József; Grósz Trial; Hungary, History of.**

**Friedrich, Károly** (Charles) (Sopron, 4 August 1906 - Sopron, 30 January 1995) – Lawyer, tourist guide and cinematographer. After he earned a Degree in Law he became the operating engineer of the *City Cinema (Városi Mozi)* in Sopron. He shot many films of Sopron, recording city events, first in black and white, later in color. These films are kept in archives. He also edited a *Cinema Newspaper (Mozi Újság)* in Hungarian and German. He made a film, *Symphony of Sopron* in color that was shown all over the country. He won the competition of film operators sponsored by Metro Goldwyn Mayer for three years in a row. After World War II, when cinemas were nationalized in Hungary, he became a tourist guide in Sopron and won the title of *Outstanding Guide*. He

knew the history of Sopron better than anyone else. Between 1951 and 1989, he gave 2430 lectures in Hungarian and German about *Beautiful Sopron*, illustrated by his color slides. Altogether a million people attended his lectures. As a citizen of outstanding accomplishments, he was given the *Pro Urbe* award in 1970. In 1986, he became an honorary freeman of the city. In 1991, he was awarded the Golden Ring. There is a memorial plaque in his honor, in the city. – B: 1367, T: 7103.→**Sopron.**

**Friedrich, Klára** (Clara) (Mrs. G. Szakács) (Budapest, 11 May 1948 -) – Teacher of handicapped children, teacher of runic writing and researcher. In her childhood, she learned runic writing from her father. She wanted to further her studies at the University of Budapest in Hungarian, German literature and History of Art but she was rejected three times due to her family's religious affiliation. She obtained a teacher's diploma from the College of Training Teachers of the Handicapped, where she studied Linguistics as well. She educated herself in history, folklore, and archeology, helped by András (Andrew) Zakar, history scholar, priest, and private secretary of Cardinal Mindszenty. Her writings and books on Hungarian ancient history and runic writing have appeared since 1994, among others: *The Scattered Pearls of our History (Múltunk szétszóródott gyöngyszemei)*; *Let us Learn and Teach Runic Writing (Tanuljuk és tanítsuk a rovásírást)*; *The Crown of Roga (Roga koronája)*; *Prince Roga (Roga herceg)*; *Runic-writing Exercises not only for Children (Rovásírás gyakorlatok nem csak gyerekeknek)*; *House on the Bridge (Ház a hidon)*; *The Youth of Attila (Attila Ifjúsága)*; *Textbook of Runic Writing and Ideas for Study-Circles (Rovásírás tankönyv és szakköri ötlettár)*; *Runic Writing Games not only for Children (Rovásírás játék nem csak gyerekeknek)*; *Zsófia Torma – a Lady in Service of Hungarian Archeology (Torma Zsófia – egy asszony a magyar régészet szolgálatában)*, and *Pastors and Teachers for the Survival of Runic Writing (Papok és tanítók a rovásírás fennmaradásáért)*. Her books, co-authored with her husband Gábor Szakács, include *Runic-writing: The Title-Deed of our Carpathian Basin (Kárpát-medencei birtoklevelünk a rovásírás)* (2003); *Chiseled in Stone, Carved in Wood (Kőbe vésték, fába rótták)* (2005), and *From Tászok Peak to the Bosnian Pyramids (Tászok-tetőtől a bosnyák piramisokig)* (2007). – B: 1934, 1935, T: 7103.→**Szakács, Gábor; Zakar, András; Forrai, Sándor; Hungarian Runic Script.**

**Frommer Pistol** – The first recoil automated pistol. Rudolf Frommer patented this pistol with a 7.65 mm bore. Its 9-mm variant was manufactured in Budapest, Hungary. The magazine of this pistol, located in the handle, stored 7 cartridges. Several hundred thousand of them were used by the Austro-Hungarian, German, Bulgarian and Turkish armies during World War I. Later varieties were the Frommer-Baby pocket pistol and the Frommer-Stop, which was the most advanced military pistol of its age, weighing only 580 grams. – B: 1078, 1226, 1020, T: 7662.→**Frommer, Rudolf.**

**Frommer Rudolf** (Rodolphe) (Pest, 4 August 1868 - Budapest, 4 September 1936) – Mechanical engineer, inventor. He was employed as a bank clerk after his matriculation. In 1895, he produced the first German-Hungarian, Hungarian-German stock market dictionary. In 1896, he joined the Hungarian Arms and Machinery Factory and later became Chief Executive Officer of the company. Hungarian armaments manufacturing expanded greatly under his leadership. He patented more than 100 inventions in Hungary and abroad before 1930. The Frommer pistol was his best-known creation. He had great successes with it and with his rifle, machine gun and coil-spring shotgun in Hungary and

in foreign countries as well. He did not possess an engineering degree but was accepted as a professional engineer due to his great accomplishments. – B: 1078, 0883, 1226, T: 7662.→**Frommer Pistol.**

**Front, Hungarian** (*Magyar Front*) – Name of the first anti-government organization set up in 1945, just after the Soviet occupation of Hungary. In the autumn of 1945, the political police arrested 40 persons, among them Mihály (Michael) Kádár, a physician and Zoltán Bilkey Papp, a medical student. They were accused of organizing underground anti-state activities, including distribution of anti-Communist flyers, plotting for the liquidation of prominent Communist leaders and the Soviet members of the Allied Controlling Committee (*Szövetségi Ellenőrző Bizottság*). On 18 May 1946, the People's Court sentenced them to death. Although Bilkey Papp was pardoned by Zoltán Tildy, President of the Republic of Hungary; however, he was secretly executed in 1951, according to documents surfaced in 1956. – B: 1091, 1020, T: 7103.→**Conspiracy Trials; Tildy, Zoltán.**

**Frosty Saints** (*Fagyos Szentek*) – A swift downward trend in air temperature usually occurs during the second and third weeks of May in the Carpathian Basin often resulting in frost. It is caused by the cold, dry, northerly air masses. The calendar days of 11, 12, 13 and 25 of May coincide with days commemorating St Pancrace, St Servace, St Boniface and St Urban, hence the name Frosty Saints. – B: 1138, 1020, T: 7645.

**Fugitives**, 17th century (*Bujdosók*) – In the second half of the 17th century, after the fall of the Wesselényi movement against the Habsburgs (1666-1670), those, who escaped to the *Partium* (*Részek*, a region between Hungary and Transylvania, eastern edge of the Great Hungarian Plain) were called *bujdosók* (fugitives); they included the valiant, the homeless serfs and patriots, but mostly the Protestants, persecuted for their religion. Later on, they were called *Kuruc*. In the Letter Patent (*patens*) of Emperor Lipót I (Leopold), dated 22 December 1671, almost two thirds of the soldiers of the border castles (*Végvárak*) were released from their service. In turn they harassed civilians. The *bujdosók* started armed attacks against the harassing foreign soldiers and the Habsburg oppression with Transylvanian, Turkish, then French assistance in 1672. At the end of August 1672, the 1000 *Bujdosó* hiding in the *Partium*, under the leadership of István (Stephen) Petróczy, broke into the territory of the kingdom, and their number increased within a few days to many thousands. They occupied the fortress of Kálló, then Ónod, Tokaj and Szendrő. On the 14th of September, they won an important victory over the Imperial army of Baron Paris Spankau. The other branch of the fugitives' army, led by Mihály (Michael) Teleki, suffered defeat; but Petróczy's men occupied Counties Sáros and Szepes. In 1678, Count Imre (Emeric) Thököly took command of the *Bujdosók* and started the War of Liberation from Austrian-Habsburg rule. Later, Prince Ferenc (Francis) Rákóczi II continued the fight. – B: 1230, 1138, T: 7668.→**Partium; Thököly, Count Imre; Freedom Fight of Thököly, Count Imre; Kuruc; Rákóczi II, Prince Ferenc.**

**Fulda, Annals of** (Germany) – Fulda and its Benedictine Monastery in Hessen Province of Germany, founded in 744, were the center of German medieval book culture. In the 8-9th century, until 901, the Annals of Fulda were written in this monastery. The last entries are important Hungarian historical sources. These either call the Hungarians Avars, or simply as '*Avari qui et dicitur Ungari*' (*Avars who were called Hungarians*).

These records cover the Avar-Hungarian military campaigns preceding Árpád's settlement in the Carpathian Basin. – B: 1138, 1020, T: 3240.

**Fülep, Lajos** (Louis) (Budapest, 23 January 1885 - Budapest, 7 October 1970) – Art historian, Minister of the Reformed Church, philosopher, writer. He attended high school in Nagybecskerek (now Zrenjanin, Serbia) studied Literature, Philosophy and History of Arts at the University of Budapest. At the same time, he was a contributor to newspapers (1902-1906), including the *Peoples Voice (Népszava)*. In 1904 and in 1906, in Paris, he became familiar with modern art; he was the first advocate of Cézanne. Then he moved to Florence, Italy. In 1911, he edited with György (George) Lukács a philosophical journal, the *Spirit (Szellem)*. From 1912, he pursued postgraduate studies and completed theological studies at the Reformed Theological Academy of Budapest (1916-1918). He worked at the Ministry of Foreign Affairs in 1918, and was Government Commissioner in Fiume (now Rijeka, Croatia), and Government Chargé d'Affaires in Italy. In 1919, he was appointed Professor of Italian Literature at the University of Budapest. After the fall of the Council (Soviet) Republic, he was Parish Minister in Dombovár, Medina, Baja, and finally in Zengővárkony, where he served until 1947. In an article in 1927, he pointed out the danger of the trend of one child per family, particularly in the Transdanubian (*Dunántúl*) region of Hungary. In 1934, he was one of the editors of the journal, *Reply (Válasz)*. In 1946, he taught at the Italian Institute, Budapest. From 1947, he taught at the Eötvös College, University of Budapest, and, from 1951 until his retirement in 1961, he was Professor in the Department of History of Art of the University of Budapest. He was a corresponding member of the Hungarian Academy of Sciences (1948). He is regarded as the most outstanding Hungarian art-philosopher beside György Lukács, the renowned Marxist philosopher. His bust is in the front of his former study, now a memorial. He authored books on the history of arts and philosophy, among them *Arts and Worldview (Művészet és világnézet)* (1923); *Miklós Izsó* (1953); *Rembrand and Our Age (Rembrandt és korunk)* (1956); *József Rippl-Rónay, Tivadar Csontváry, Gyula Derkovits* (1975). He was honored with the Baumgarten Prize (1930), and the Kossuth Prize (1957). A documentary film was made on his life in 1910. – B: 0883, 0878, 1122, T: 7103.→**Lukács, György; Izsó, Miklós; Rippl-Rónay, József; Csontváry, Tivadar; Derkovits, Gyula.**

**Fülöp, Attila** (Szombathely, 2 July, 1942 - ) – Opera singer (tenor). He studied Electrical Engineering, and worked as a Sound Engineer at the Hungarian record company, Hungaroton (1968-1972). However, he turned to singing and completed his studies in voice privately under Dr. Jenő (Eugene) Sipos and Dagmar Lange Freiwald in Berlin (1965-1971). In 1971, he made his stage debut, singing Tamino in Mozart's *Magic Flute* at the Budapest Opera. Since 1972, he has been a private singer at the Opera House. He specialized primarily in lyric and character tenor roles (as Count Almaviva in Rossini's *Barber of Seville*). In October 1978, he participated there in the premiere of the opera, *Outside the Door (Az ajtón kívül)*, by Sándor Balassa. Then, he took on numerous character roles, like Mime in Wagner's *Nibelungen Ring Cycle*, and Holy Fool in Mussorgsky's *Boris Godunov*. He became one of the prominent singers of his generation in Hungary and regularly sings as a guest singer in oratorios and concerts in European musical centers. In the concert hall, he also appeared as the Evangelist in the *Passions* of J. S. Bach. His voice is recorded by Hungaroton in the complete recordings of Haydn's operas: *Der Apotheker*, *La fedeltà premiata* and *L'Infedeltà delusa*, also in the

contemporary opera *Outside the Door* (*Az ajtón kívül*), and in a variety of other works, such as *Mosè in Egitto* by Rossini, *Te Deum* by Marc Antoine Charpentier, *Il ritorno di Tobia* by Joseph Haydn, and Mozart's *Coronation Mass*. Between 1996 and 2003 he was General Secretary, and between 2003 and 2005, Acting Director of the Opera House, Budapest. In 1971 he won third prize in the Hungarian Radio song competition and also won a prize at the Geneva song competition in 1972. In 1975, he was awarded the Grand Prize of the French Academy and, in 2007 he received the Officer's Cross of Order of Merit of the Republic of Hungary. – B: 0883, 1445, 1735, T: 7456.

**Fülöp, Gábor Dénes** (Gabriel Denis) (Alsófalva, now Ocna de Jos, Romania, 14 May 1931 - Marosvásárhely, now Targu Mures, Romania, 15 January 2005) – Minister of the Reformed Church in Transylvania (*Erdély*, now in Romania). Completed his higher studies at the Protestant Theological Academy, Kolozsvár (now Cluj-Napoca, Romania) in 1958. He acquired his teacher's qualifications in 1952. He was an assistant minister in Magyarkálya (now Căianu, Romania) and at the Marosvásárhely-Gecse Church. In the meantime, he conducted a secret mission by helping to accommodate talented *Csángó* students at Hungarian Boarding Schools in Transylvania, since Romanian authorities closed down their Hungarian schools in 1959. He was arrested by the Romanian Communist Secret Police in 1959, was indicted and sentenced to 11 years forced labor, and all his property was confiscated. He was freed by amnesty in 1963. Thereafter he worked as a day laborer. In 1964, he resumed his pastoral work, and from 1984, he served at the Castle-Church (*Vártemplom*) congregation, Marosvásárhely. After the political changes in 1990, he established social and educational institutions, including the Church Organists Training School; the *Lazarenum Foundation* for supporting orphans, the poor and the elderly; the *Diakonia Home* for the care of the elderly; and the *Calepinus Foundation* offering foreign language courses. He was one of the founding members of the Hungarian Democratic Alliance in Romania (*Romániai Magyar Demokrata Szövetség – RMDSZ*). He was awarded with a number of prizes and medals, among them the For Country and Freedom Prize, and the Gábor Bethlen Prize. He was made an honorary citizen of Marosvásárhely. – B: 1263, T: 7103.

**Fülöpp, József** (Joseph) (Kondoros, 4 August 1903 - Calgary, Alberta, Canada, 14 February 1992) – Army officer. His secondary education started at the Premonstrian High School of Nagyvárad (now Oradea, Romania), and he graduated from the Cadet School of Sopron. His higher studies were at the Ludovika Military Academy, Budapest (1920). His military career included service in Szeged and Békéscsaba, then in Budapest, and finally in Paks, as colonel. After World War II, he was in refugee camps in Germany and Austria, where he was made Camp Commander. He and his family emigrated to Canada. They settled in Winnipeg, Manitoba, but moved to Calgary in 1951, where the City Office employed him. He was one of the organizers of the Hungarian Veterans' Association, and was its Canadian Chapter's leader. In 1979, he was made a life member of the Hungarian Veterans' World Association for his long, dedicated service. He was one of the founders of the Széchenyi Society and its President between 1968 and 1983. He helped to organize the Boy Scouts in Calgary, and served in the leadership of the Hungarian Boy Scout External Organization. After the 1956 Hungarian Revolution and Freedom Fight, he was one of the main coordinators of the Hungarian refugees in Calgary. He was honored with a number Hungarian and foreign Medals of Merit. – 1166, T: 7103.

**Funeral Dance** – A variation of Hungarian folk dances, a dramatic, ritualistic dance performed both at weddings and funeral feasts. Holding burning candles, they dance around a man impersonating the deceased. The custom points to the death-dance cult of the Middle Ages. – B: 1078, 1138, 1020, T: 7617.

**Funeral Feast** – a feast given in conjunction with a funeral, mentioned in the chronicles dating from the Árpád-period. The Hungarian word *tor* (feast) is the old form of the word *tűz* (fire), most probably connected to the funeral pyre, hence the origin of the name. The “paying of last respect” is a memory fragment of an ancient and primitive religious custom among peoples of a more enlightened religious standing. In some places, the feast was held before or, more commonly, after the funeral. The same food was served at christenings and wedding feasts. Always a “paprikás” meat dish and mutton stew with gruel were served nation wide. At the table, the place of the deceased was left vacant but food was offered to him on a plate nevertheless. In the past, the feast was sometimes held in the cemetery. In many places, the poor and the beggars were invited to partake. The custom is now dying out. – B: 1078, 1138, 1020, T: 7617.

**Funeral Oration and Prayer** (*Halotti beszéd és könyörgés*) – The oldest Hungarian language text, represented by two manuscripts, the *Sermo sup sepulchrum* (Sermon above the grave) and a Prayer from about 1192-1195 AD. The sermon begins “*Latiatuc feleym zumtuchel mic vogmuc. yfa pur ef chomuv uogmuc.*” (In modern Hungarian: „*Látjátok feleim szemekkel mik vagyunk isa por és hamu vagyunk*” “*You see, my brethren, with your eyes what we are, well, we are dust and ashes...*”). This is the first known sermon and prayer in Hungarian, composed for a funeral service, and is a free translation of the Latin text. The whole sermon has two parts: the sermon's text (26 lines and 227 words) and the prayer (6 lines and 47 words). If one does not count repeated words, there are 190 individual terms in the script. The first part, the “Sermon”, conforming to the order of the Latin funeral service, is a freely constructed abstract of the subsequent Latin section. The second part, the “Prayer” is a true translation of the prescribed church text. The work gives a good indication of the vocalization, form and syntax of the Hungarian language of the period. According to some, it was written either in Zalavár or Pannonhalma or at the monastery of Boldva. It was found in the Pray Codex. An Augustinian monk, Xystus Schier, probably detected it in the Latin Church-book. János (John) Sajnovics, a Jesuit monk, published the full text in 1771. It is of inestimable value for not only is it the first extant Hungarian language relic, but also the first Hungarian text of literary value. It is in the collection of the National Széchényi Library (*Országos Széchényi Könyvtár*), Budapest – B: 1031, 1230, 1138, T: 7617. → **Pray Codex; Boldva, Reformed Church; God.**

**Fur Jacket** (*ködmön*) – A winter jacket with sleeves made of curly-haired Hungarian *racka* heepskin, less often goatskin, known already in pre-settlement times. Men as well as women wore it. Tightly cut or widening out at the sides toward the bottom, shaped somewhat like a bell; black or white edging is frequent; men’s jackets have stand-up collars but the women’s collars lie flat. Lengths can be different. They are decorated with appliques or embroidery. Their other names are *kozsock* and *kozsu*. – B: 1078, 1134, 1322, 1020, T: 7684. → **Szűr Mantle.**

**Fur Lined Short Coat** (*mente*) – Hungarian-type clothing that already appeared in the Scythians’ attire. It was worn by men as well as women, was made of felt and was open

at the front. Beside a wide, knee-length variety (Nyitra, now Nitra, Slovakia, Örség) and the old *mente* (Debrecen), the short, fitted at the waist styles (Mátraalja, Örség) or the short varieties (Debrecen) came generally into use. It was made of blue, black, in rarer cases, green or red felt. Its lining and edging are made of black or white sheepskin. Metal or corded buttoning was developed as decoration; in winter it was worn properly, in summer it was thrown over one's shoulder and was held together with the *mente-cord*. It was so important that it not only became part of a girl's dowry but it was customary for a widow to continue wearing her deceased husband's *mente*. In some areas, even in the 19th century, it appeared as part of a woman's clothing. Its current form can be traced back to the period of the Jazygians. In times of war, bronze scales were sewn on them to give protection against arrows, swords and spears. At later times, metal cording was attached with 5-7 rows of gold braiding, in order to protect against sword cuts. During the time of the *Kuruc* insurrection, at the turn of the 17th century, the *mente* and *dolmány* were braided in the same way. It was a complementary part of the Hussars' uniform; its use was extended from the Hungarian Hussars to cavalymen everywhere in Europe. – B: 1078, 1134, 1322, 1020, T: 7684. → **Szűr Mantle; Kuruc.**

**Furkó, Zoltán** (Biharkeresztes, 28 March 1940 - ) – Writer, literary historian, critic. His higher studies were at the University of Debrecen, where he read Hungarian and French Literature. There, he organized a Literary Circle and began publishing in the paper *University Life (Egyetemi Élet)*. In 1969, he joined the Hungarian Radio and was Editor of the World Literature program; later he edited the *Outlook (Kilátó)* program. Some of his radio programs were *Portraits of Modern Writers (Modern írók portréi)*; *In the Workshop of Literary Translators (Modern műfordítók műhelyében)*, and *Exchange of Ideas (Eszmecsere)*. He was also involved in radio plays, such as Voltaire's *Candide*, Doctorow's *Ragtime* and M.V. Llosa's *Conversation at the Cathedral*. He also had an opportunity to work with leading actors and stage managers. In 1980, he worked for Hungarian Television. In the meantime, he continued writing and working for publishing houses, such as the Corvina and the Academic Publishing Houses. In 1993, he was one of the founders and Director of the Ajtósi Dürer Publishing Co. that focuses on publishing rare books. He was Professor of Mass Media Studies at the University of Budapest. He also lectured at the Gáspár Károli Reformed University, Budapest, and was Editor-in-Chief of the *Sunday Paper (Vasárnapi újság)* program of the Hungarian Radio. He is a member of the Hungarian Pen Club. His works include *Viola Berki (Berki Viola)* monograph (1972); *Hungarian Television 1957-1997 (Magyar Televízió 1972-1997)* (1997), and *A Message of Sándor Márai (Márai Sándor üzenete)* interview (1990). – B: 0878, 1266, 1438, T: 7103.

**Furmint** – The most famous Hungarian grape, a variety of wine grape from the *Pontian Balcanica* branch of *Vitis vinifera*. The name Furmint is taken from the word "froment" for the wheat-gold color of the wine it produces. While it is possible that the grape is native to Hungary, it was likely brought to Hungary in the 13th century, during the reign of King Béla IV (1235-1270). It is a late variety, usually ripening in the second half of October. This grape provides the main characteristics of the Tokay vine. Furmint originates in the Tokaj hegyalja region, on the slopes of the Tokaj Range in northeastern Hungary. Later it was planted in other parts of Hungary, as well as in Croatia, Dalmatia, Austria, Germany, France and the former Soviet Union. It is a strong vine stock with large leathery leaves and large bunches of yellow, dotted fruits that are large and long,

thick skinned, cylinder shaped, and those exposed to the sun are rust colored with abundant juice contents. They ripen late, shrivel, then advance into a noble rot. The wine is white, heavy, aromatic and sweet. Furmint is the principal grape in the better-known Tokay dessert wines. It is also grown in the tiny Hungarian wine region of Somló. Furmint plays a similar role in the Slovakian wine region of Tokaj – B: 0942, 1031, T: 7680, 7103.

**Für, Lajos** (Louis) (Egyházasközpont, 21 December 1930 - ) – Historian, politician. He studied at the Reformed High School of Csurgó from 1941, matriculating in 1949. From 1950, he studied for a Teacher's Degree (Dip.Ed.) at the University of Debrecen and obtained his Dip.Ed in History in 1954. From 1954-1957, he was a demonstrator in the Historical Institute there, while he was also a reserve sub-lieutenant. He actively took part in the 1956 Revolution and Freedom Fight as Secretary of the Kossuth Circle of Debrecen, and Secretary of the Socialist Revolutionary Commission. He was arrested and interned on 4 November, during the Soviet military invasion, but he was freed by Christmas. First, he fled to France but returned to Hungary on 16 May 1957. He was unemployed for a while; later he found work in the library of the College of the Cistibiscan Reformed Diocese of Debrecen. From 1961, he was a dockworker but, 6 months later he was given a teacher's position at Dabas and a little later, at Pestújhely. In 1964, he was appointed scientific correspondent for the Hungarian Agricultural Museum. From 1978, he taught at the Teachers College of Nyíregyháza, and from 1981, at the Teachers College of Eger. He obtained a Ph.D. in 1983. A founding member of the *Hungarian Democratic Forum (Magyar Demokrata Fórum – MDF)* (1987), he was Vice-President in 1991, and Executive President from 1991-1993. He was a Member of Parliament (1990-1998), and Minister of Defense (1990 - 1994). From 1987 he was Assistant Professor, and from 1990, Professor of Medieval and Early Modern Hungarian History at the University of Budapest. His field of research is the history of agrarian production and society in the 18-20th century Hungary. From 1996, he was Director of the Ráday Collection. In 1997-1998, he was lay President of the Danubian Reformed Church District. After the death of Prime Minister József Antall, he became President of the MDF in 1993, and held the position until his retirement. He authored nearly 200 studies and 12 books. Among them are *Outlying Garden Farms on Quicksand (Kertes tanyák a futóhomokon)* (1983); *Where are the Soldiers? (Hol vannak a katonák?)* (1988); *Minority and Science (Kisebbség és tudomány)* (1989), and *Fate and History (Sors és történelem)* (1991). He was a recipient of the Legion of Honor, Officer's Grade on 16 January 1997. – B: 0874, 1031, 1643, T: 7456. → **Lakitelek, Consultation at.**

**Füry, Lajos** (Lajos Arnold; pen-names Lajos Havasi, Lajos Havasy, Kálmán Losonczy) (Budapest, 29 May 1913 - Sarasota, FL, USA, 25 November 1994) – Writer, journalist. He graduated from the Ferenc Deák High School, Budapest. He studied Law and Political Science at the University of Budapest, where he earned a doctoral degree. He read World Literature and Arts at Sorbonne, University of Paris, and International Law in Vienna. In Sofia, he studied Hungarian-Bulgarian historical connections. For a while, he was a lawyer's assistant, but soon worked for the leading dailies in Budapest, such as the *Budapest Newspaper (Pesti Hírlap)*, *Pest Diary (Pesti Napló)*, *New Hungarians (Új Magyarország)*, and for weeklies such as the *West (Nyugat)*; *Sunrise (Napkelet)* and *New Times (Új Idők)*. In the Army, he participated in regaining parts of Upper Hungary (*Felvidék*, now Slovakia, 1938), Transylvania (*Erdély*, 1940) and Voivodina (*Délvidék*,

1941). He was a reporter with the Army on the Eastern front and fought in the defense of Székesfehérvár, Győr and the River Rába line. As a POW, he worked as an interpreter in the West. He emigrated to the USA with his family in 1949, settled in Washington, DC and, for 32 years, worked in the Library of Congress. He authored 51 books and more than 2000 articles, including plays. His books include *Between two Stations (Két állomás között)* (1953); *The End of the Road (Az út vége)* (1955); *The Gold Statue (Az aranyszobor)* (1957); *The Feast of the Devil (Az ördög lakomája)* (1961); *Khagan Árpád (Árpád fejedelem)* (1964), and *Man and his Woman (Ember és asszonya)* (1989). He traveled extensively and visited Hungarian communities around the world. He spent his royalties on Hungarian causes. He was one of the founders and President of the Árpád Academy (1970-1973), Cleveland, Ohio. He was a recipient of the Árpád Medal, the Medal of the Transylvanian World Federation, Medal of the Pen Club, and Medal of the Library of Congress. – B: 0878, 1037, T: 7103.

**Füst, Milán** (Fürst, Milan Konstantin) (Budapest, 17 July 1888 - Budapest, 26 July 1967) – Writer, poet, translator of literary works. He earned a Ph.D. in Law at the University of Budapest in 1912. He taught at the High-School of Commerce in 1918. He retired in 1929, and was trained in the fur trade, but earned his living as a writer. He acquired a Degree in Esthetics at the University of Budapest. He belongs to the first generation of the literary review, West (*Nyugat*). He created something new in every genre. However, between 1950 and 1955, his writings could not be published and he was sent into retirement in 1960. His major works include *Advent* (1922); *Golden Plate (Aranytál)* (1921); *Hunting in the Fall (Őszi vadászat)* (1955); *Toward Parnassus (A parnasszus felé)* (1961); *My Wife's Novel (Feleségem regénye)* (1942) was translated into several languages. His dramas are: *Catullus* (1927) and *King Henry IV (IV Henrik király)* (1940). His poems include *You Cannot Change It (Változtatnod nem lehet)* (1914); *Selected Poems (Válogatott versek)* (1934) and *Collected Poems (Összes versek)* (1988, 1996). He translated from the works of Shakespeare, Tolstoi and Goethe. His collected essays in esthetics include *Vision and Impulse in Art (Látomás és indulat a művészetben)* (1948). He was honored with the Baumgarten Prize (1933, 1935, 1946) and the Kossuth Prize (1948). – B: 0878, 0877, 0883, 1257, T: 7103.

**Fuszek, Rudolf** (Rodolphe) (Budapest, 20 January 1882 - Monrovia, Liberia, 30 April 1941?) – Physician. He completed his higher studies at the University of Budapest. From 1903, he was an assistant at the Pathology Institute in Budapest. He later became an assistant professor at the same Institute. From 1908 and 1911, he studied tropical diseases at the *Tropisches Institut* in Hamburg, interrupting his studies meanwhile to work as a ship's doctor in the epidemic areas in South America. In 1911, he overcame an epidemic that erupted at the railroad construction in Cameroon, Africa. In 1912, he worked in South America again to put an end to the yellow fever. He became a well-known international expert in tropical diseases. From 1913, he worked in Monrovia, where he was later Director of Public Health Services. Besides his medical practice, he compiled a valuable ethnographic collection and, when he visited Hungary in 1932, he donated his collection to the Hungarian Ethnographic Museum. He died before the results of his work were published. – B: 0883, 1134, T: 7660.→**Teleki, Count Sámuel; Roheim, Géza; Tordai, Emil.**

**Füzesi, Magda** (Magdalene) (née Mester) (Nagybereg, now Berehi, Carpatho-Ukraine,

Ukraine, 3 May 1952 - ) – Poetess. Her higher studies were completed at the State University of Ungvár (now Uzhhorod, Ukraine) (1975-1981), where she read Hungarian Literature. Then she studied Ethnography at the University, Debrecen (1998). She was maker-up in a Press-shop, Beregszász (now Berhovo, Ukraine) (1969-1975). From 1975 to 1991, she was a contributor to the *Red Banner (Vörös Zászló)*, then to the *Bereg Newspaper (Beregi Hírlap)* (1991-1995). She became its Editor-in-Chief in 1995, and finally Editor of its Hungarian version (1998). Her main works include *Lilies of the Valley (Gyöngyvirágok)*, poems (1977); *A Man from the Crowd (Egy ember a tömegből)* poems (1983); *Reassuring (Bíztató)* poems (1992), *Pleading for a Smile (Mosolykérő)*, poems for children (1996), and *Landscape with Chesnuts (Táj gesztenyékkel)* (1998). She translated from Russian and Ukrainian as well. She received the Toll-Prize (1996). – B: 0874, 0878, 1257, T: 7103. → **Carpatho Ukraine.**

## G

**Gaál, Antal** (Anthony) (Mohács, Hungary, 6 January 1905 - Lima, Peru, 9 November 1975) – Mining engineer. He received his diploma from the Academy of Mining, Metallurgy and Forestry Engineering of Sopron in 1937. After his first employment with the Egercsehi coal mine, he joined the Hungarian-American Oil Company, where he designed an oil loading station at Újudvar, a pumping station at Bázakerettye, and a liquid gas fraction separator plant at Lovászi for the company. Upon his proposal, the Transdanubian Oil Region Section of the Hungarian Mining and Metallurgy Association was formed in 1941. He emigrated to Peru in 1948, and became an employee of a large oil company at Talara. First, he worked as an editor; later, he became the leader of the Planning Division until his retirement. – B: 0883, 1339, T: 7662.

**Gaál, Botond** (Vámosatya, 27 March 1946 - ) – Theologian of the Reformed Church. He attended the Faculty of Mathematics and Physics of the University of Debrecen obtaining a bachelor degree in 1970; and from the Reformed Theological Academy of Debrecen, obtained a Degree in Theology in 1976. He studied at the New College of Edinburgh University (1976-1977). He earned his Theological Doctoral Degree from the Reformed Theological Academy of Debrecen (1985). He studied as Research Fellow at the Center of Theological Inquiry, Princeton, NJ, (1991-1992 and in 1999). He taught Mathematics and Physics at the Reformed College, Debrecen (1970), was Dean of the College (1977-1987); Dean (1987-1991), and Professor of Dogmatics at the Reformed Theological Academy of Debrecen in 1987; President of the College from 1987-1992; Dean of the Academy from 1988-1992 and 1994-1995; President of the University Association in Debrecen (1994-1995). He was Secretary-General of the Regional Center of the Hungarian Academy of Sciences (1993-1999). He is a regular member of the General Assembly of the Reformed Church in Hungary; a member of the Presidency of the World Council of Hungarian Professors (from 2000); a member (elected from outside) of the Doctoral Council of Debrecen University, belonging to the State (from 2004). He is a member of a number of learned societies. In 1993 he became founder and leader of a special institution for the study of Science and Theology called Steven Hatvani Theological Research Center. His field of research: the application of theology and the study of the relationship between the natural sciences and theology. He published a great number of essays and articles. His works include *Space, Time and the Word (Tér, idő és az Ige)* (1985) and *Teaching and Application of the Natural Sciences at the Debrecen Reformed College (A természettudományok oktatása és művelése a Debreceni Kollégiumban)*. – B: 0874, 1652, T: 7617, 7103. → **Debrecen, Reformed College.**

**Gaál Ferenc** (Francis) (Debrecen, 1881 - Los Angeles, CA, USA, 1956) – Painter. He studied at the Budapest Art School. He was a student of Ede (Ed) Balló, Aladár Edvi Illés and István (Stephen) Bosznay. He spent a considerable time at the Artist Colony of Szolnok. He was a painter of naturalistic landscape and composition painter. He went on study trips to Germany and France and exhibited in Budapest (1923) and in Amsterdam (1925). His lifework includes *Self-Portrait (Önarckép)*; *In a Room (Szobában)*; *In the Park (A Parkban)* and *Contemplating (Merengés)*. He was awarded the Izidor Halmos Prize and the Casino Prize of Lipótváros, Budapest. – B: 0935, T: 7103. → **Edvi Illés, Aladár.**

**Gaál, Franciska** (Frances) (Budapest, 1 February 1904 - New York, USA, 2 January 1973) – Actress. She graduated from the School of the National Union Actors in 1919. Her first stage appearance was in 1920 at the Theater of Eskü Square, Budapest. From 1921 and 1922 she was a member of Budapest's Inner City Theater (*Belvárosi Színház*) and the Hungarian Theater (*Magyar Színház*). The latter venue saw her first memorable success in the play *Ibolya* by Ferenc Molnár, who wrote the leading female role for her. From 1923 on, she performed primarily at the Comedy Theater (*Vígszínház*), where she always captivated her audience with her charming performances of mischievous characters, often assuming a characteristic naïve or French accent. Her talent was also noticed abroad and she was successful in silent films. The arrival of the sound motion picture made her one of the first international film stars from Hungary. In the early 1930s, she filmed in Vienna, Berlin and Budapest. Between 1937 and 1940, she appeared with international celebrities in Hollywood films. During World War II, she lived in Hungary but returned to the USA in 1946, where she continued to accept film roles, while teaching at the School of Acting in New York. Her major theater roles include Mari in Mikszáth-Harsányi's *The Noszty Boy's Affair with Mari Tóth* (*A Noszty fiú esete Tóth Marival*); Ida in Gárdonyi-Emőd-Rezső's *Ida's Story* (*Ida regénye*); Anja in Chekhov's *The Cherry Orchard* (*Cseresznyéskert*), and Elis in Shaw's *Pygmalion*. Her main feature film roles are *Csibi*, (1934); *Spring Parade* (*Tavaszi parádé*) (1935), and *Little Miss Pirate* (*Kalózkisasszony*) (1938). – B: 0883, 1427, T: 7667.

**Gaál, Gábor** (Gabriel) (Budapest, 8 March 1891 - Kolozsvár, now Cluj-Napoca, Romania, 13 August 1954) – Hungarian writer and sociologist in Romania. He received his teacher's diploma in Budapest. During his student years, he joined the circle of philosopher, György (George) Lukács. He participated in World War I. After the "Aster' Revolution" in 1918, he obtained a position at the Educational Committee. After the fall of the Communist Regime he moved to Vienna; later moved on to Berlin in 1922. There he worked as a dramaturgist for the film enterprise of Sándor (Alexander) Korda. In 1925, he returned to Hungary and was arrested; but escaped and returned to Vienna. In 1926 he moved to Kolozsvár, where he became Co-Editor of the newspaper *Our Age* (*Korunk*). In 1940, the paper was banned. During World War II, he served in the Hungarian army. After the War, he edited the periodical *Our Way* (*Útunk*), and took part in organizing a Hungarian literary life in Romania. He started publishing the works of Hungarian classical writers in a series called *Progressive Traditions* (*Haladó hagyományok*). He was an important representative of Hungarian Marxist literature in Romania. He lectured on Philosophy and History of Literature at the University of Kolozsvár. Some of his works are *Reality and Literature* (*Valóság és irodalom*) (1950); *Selected Writings* (*Válogatott írások*) (1964-1971) and *Letters* (*Levelek*) (1975). – B: 1257, T: 7663.→**Lukács, György**.

**Gaál, Gaszton** (Székesfehérvár, 30 November 1868 - Balatonboglár, 26 October 1932) – Landowner, politician. He won a mandate in 1906 with an independence platform, based on 1848 revolutionary sentiments. He remained a staunch protector of agricultural estateholder interests. After the Council (Soviet) Republic fell in 1919, he was Commissioner of the Counties of Somogy, Tolna and Baranya; then became Lord Lieutenant of Somogy. As a Smallholders' Party representative, he became a Member of Parliament

and was elected its President in 1921. In 1922, he was appointed Vice President of the new ruling *United Party (Egység Párt)*, but withdrew from his post in the same year on account of the Government's tax policy. In 1926, he founded the *Agrarian Party (Agrár Párt)*. In 1931 he was elected President of the newly re-established *Smallholders' Party (Kisgazda Párt)*. A Street in Balatonboglár and a Boy Scout Troop bear his name. – B: 0883, 1160, T: 7667.

**Gaál, György** (George) (Pozsony, now Bratislava, Slovakia, 21 April 1783 - Vienna, 6 November 1844) – Writer. He acquired his university education at Pest and Buda, and was employed by Prince Miklós (Nicholas) Esterházy at Kismarton (1804). The Prince took him to Vienna, where he worked at a German library. He translated works of Hungarian writers into German. Most of his works appeared in German. He initiated the collection of Hungarian folk tales and he published its first collection. His collection of Hungarian proverbs and adages were translated by him and published in German, Latin, Italian, French and English. He was the first to make known Hungarian literature abroad. He published a comparative collection of English, French, Italian, Latin and Hungarian proverbs. His works include *Märchen der Magyaren (Fairy-tales of the Magyars)* (1822); *Sagen und Novellen (Legends and short stories)* (1843), and *Ungarische Volksmärchen (Hungarian folk-tales)*. (1857). – B: 0883, 1078, 1257, T: 7103.→**Esterházy, Prince Miklós József; Paczolay, Gyula.**

**Gaál, György Elemér** (George Elmer) (Kolozsvár, now Cluj-Napoca, Romania, 16 February 1948 - ) – Literary and cultural historian in Transylvania (*Erdély*, now in Romania). He graduated in English and Hungarian Languages and Literature at the University of Kolozsvár (1971). He earned a Ph.D. in 1981. He was an English teacher at the Ady-Sincay Secondary School (1971-1975), and an assistant professor at the University of Kolozsvár. Between 1975 and 1982, he taught English at the No. 3 Secondary School. Since 1983, he has taught at the Sámuel Brassai Secondary School, and is an adjunct professor at the Protestant Theological Institute, Kolozsvár. His works include *Guide to the Old and New Kolozsvár (Kalauz a régi és az új Kolozsvárhoz)* (1992); *The Map of the Házsongárd Cemetery (A Házsongárdi temető térképe)* (1994), and *The Sreet of the Hungarians (Magyarok utcája)* (1995). He edited many books, among them *On the Land of the Móc (A mócok földjén)* by Viktor Aradi (1974); *Essays (Esszék)* by Ralph Waldo Emerson (1978), *Sonnets of William Shakespeare (William Shakespeare szonettjei)* (1991). He is a contributor to many magazines, such as *Our Age (Korunk)*; *Our Way (Utunk)*; *Helikon*, and *Christian Sower (Keresztény Magvető)*. He is one of the editors of the *Hungarian Literary Lexicon* in Romania. He is the author of more than 200 articles and essays. He is a member of several literary associations. – B: 1036, 1257, T: 7103.

**Gaál, József** (Joseph) (*dálnoki*) (Nagykároly, now Carei, Romania, 12 December 1811 - Pest, 28 February 1866) – Writer, poet. He studied Philosophy and Law at the University of Pest. Even before finishing his studies, he was employed by the Council of the Governor-General. His poems, his historical and satirical writings were published from 1830 on in the periodicals *Wreath (Koszorú)* and *Aurora*. He became popular after the presentation of his comedy, *The Notary of Peleske (A peleskei nótárius)*. In 1841, he became a member of the Kisfaludy Association and, in 1848, he was elected as County Recorder in the province of Szatmár; subsequently he became a ministerial secretary. For

a period of time in 1849, he was the editor of the publication *March Fifteenth (Március Tizenötödike)*, followed by a stint as a soldier in János (John) Damjanich's unit. After the defeat of the 1848 War of Independence, he was interned for six years in Arad (now in Romania). Until the end of his life, he worked as a secretary and an educator. With his novels about the *Great Hungarian Plain (Alföld)*, he was one of the forerunners of the great lyric poet Sándor (Alexander) Petőfi. – B: 0883, 1257, T: 3240.→**Damjanich, János; Petőfi, Sándor.**

**Gaal, Sándor** (Gál) (Alexander) (Csíkszentgyörgy, now Ciucsângeorgiu, Romania, 21 September 1817 - Nocera di Pagani, Italy 17 June 1871) – Officer of the National Defense Guard. A military carrier was his original choice. During his military schooling, he was appointed as instructor; but in 1842, he retired from the Army as a lieutenant. In 1848 he volunteered with the National Army to participate in the War of Independence, and as captain, became the Chief of Staff, first of the Szekler, then of the Háromszék Army Divisions. In December 1848, he was promoted to colonel; and in January of 1849, became the military District Commander of the Szeklerland (*Székegyföld*, Transylvania), where he enjoyed great popularity. In the fading days of the War, he was promoted to General and, even after the defeat, he held out with his loyal Szeklers. Under the overwhelming pressure of the Czarist army, he retreated to Moldavia, and from there emigrated to the Western Europe. He was active in politics, first in Hamburg, later in London. He was condemned to death in absentia in 1852. He participated in further insurgent activities and prepared a plan for a Szekler uprising. The Turkish government hindered his activities and, at the request of Lajos (Louis) Kossuth, he returned to London. In 1860, he joined the Hungarian Legion of Garibaldi. Later, he clashed with the policy of Piedmont and became depressed. – B: 0883, 1428, T: 3233.→**Kossuth, Lajos.**

**Gábor, Andor** (Andrew) (Újnéppuszta - Magyarszerdahely, 20 January 1884 - Budapest, 21 January 1953) – Writer, poet, journalist, critic, translator of literary works. His first articles appeared during his university years. From 1910 on, he became successful as a writer of cabaret, comedy, satirical novels and poems. During World War I, he participated in the civil anti-war movement, and in the Democratic Republic as a member of the Cultural Council. His political views grew increasingly leftwing. In 1919, he participated in the proletarian revolution. After the fall of the Council (Soviet) Republic of Hungary in 1919, he moved to Vienna and became a representative of the Communist line at the *Viennese Hungarian News (Bécsi Magyar Újság)*. His writings of the Viennese period are considered classics of Hungarian literary journalism. After living in Austria and France, he settled in Berlin. In 1929, he became a member of the editorial board for the journal *Linkskurve*. On Hitler's rise to power in 1933, he relocated to Moscow. From 1938, he was Editor of *New Voice (Új Hang)*, the Hungarian exiles' literary periodical there. During World War II, his writings focused on inspirational themes of national consciousness and reflections on sentiments in exile. He returned to Hungary in 1945, and worked for the dailies *Free People (Szabad Nép)*; *New Word (Új Szó)* and *Clarity (Világosság)*. From 1950 to 1953, he was Editor-in-Chief of the satirical magazine *Ludas Matyi (Crafty Matt, the Goose-herd)*. His main works include the poems *Colorful Rhymes (Tarka rimek)* (1913); *Thirtythree (Harminchárom)* (1928), and *To My Homeland (Hazámhoz)* (1943); plays such as *Little Paul (Palika)* (1915) and *Dollar Daddy (Dollárpapa)* (1917); novels such as *Seven Butterflies (Hét pillangó)* (1918); *Faces of the Dead (Halottak arcai)* (1922), and *Bank Street (Bank utca)* (1922). He received the

Kossuth Prize (1953). – B: 0883, 1257, T: 7667.→**Council (Soviet) Republic of Hungary.**

**Gábor, Áron (1)** (Aaron) (Bereck now Bretcu, Romania, 21 November 1814 - Uzon, now Ozun, Romania, 2 July 1849) – Army officer in the War of Independence of 1848- 1849; the sole founder and Commander of the independent Szekler Artillery. He began his education at the High School of Csíksomlyó (now Sumuleu Ciuc, Romania) where, at a young age, he was much interested in technology. He started his military service with the 2nd Szekler Regiment. In 1840, he served in the 5th Pest Artillery. His request to serve in the bombardier corps was denied and he left the Army. However, in 1842, instead of his younger brother, he volunteered again with the Artillery. His request for further technical study was again denied and he left the Army permanently. He went to Vienna for a few months to study canon-casting technology at the Genie-Corps, as an amateur student, and acquired a few books about the subject. Until 1848, he lived in Moldavia, but he returned to Transylvania (*Erdély*, now in Romania) upon receiving news about the beginning of the Hungarian War of Independence. On 28 November 1848, he was commissioned by the Szekler National Assembly at Sepsiszentgyörgy (now Sfintu Gheorge, Romania), to start manufacturing gunpowder and military equipment. He established three plants at Hermány (now Cașoț Romania), Kézdivásárhely (now Târgu Secuiesc, Romania) and Szentkeresztbánya (now Vlăhita, Romania). All of them also produced firearms. In the battle at Hidvég (now Hăghig, Romania) on 29 November 1848, the two of his six-pounder guns were significant factors in the victory over the Austrian Imperial Army. In three months, his plants produced 70 guns, mostly three pounders. His gunpowder and firearms production started to assume great significance. Promoted to major, Lajos (Louis) Kossuth appointed him as Commander of the Szekler artillery. Soon, in the ensuing battle at Kökös, he fell in an artillery barrage. His hastily prepared grave, near Eresztvény, was trampled over by Czarist cavalry and, for a long time, he rested in an unmarked grave, until the nation's gratitude erected a monument over it. His legendary deeds were preserved in folk songs. – B: 1230, 1297, T: 3233.→**Kossuth, Lajos.**

**Gábor, Áron (2)** (Aaron) (Kaposvár, 20 April 1911 - Saarbrücken, Germany, 28 December 1982) – Journalist, writer, lawyer. He received a Law Degree from the University of Budapest in 1933. Subsequently, he joined the staff of an anti-fascist, anti-communist journal, *Budapest*. During World War II, he reported from the Russian front. A collection of his war correspondence was published in *Beyond the Stalin Line (Túl a Sztalin Vonalon)* (1941). In 1944, he crossed the front line and joined the new Hungarian Government, established in the Russian-occupied Debrecen. As Secretary General of the Hungarian Red Cross, he recorded the names of a quarter million of Hungarian soldiers and civilians deported to Soviet slave labor camps. The Soviet military authorities arrested and condemned him to death because of his war reports. The sentence was commuted to five years of slave labor and banishment for life in Siberia. After 15 years, he was allowed to return to Hungary; but because of hostile official attitudes, he escaped

to the West in 1965. In exile, he wrote his famous trilogy *East of Man*, (*Az Embertől Keletre*) (1976); *Distorted Freedom*, (*Szögletes Szabadság*) (1968) and *Men of Many Centuries* (*Évszázados Emberek*) (1971). In his books he described his arrest and his struggles during banishment. – B&T: 7662.

**Gábor, Dénes** (Dennis) (Budapest, 5 June 1900 - London, 9 February 1979) – Physicist, inventor. He was born into a Jewish family; at a very early age, he was attracted to physics. After a brief stint as a soldier in 1918, he enrolled in the Budapest Polytechnic. In 1921, he entered the *Technische Hochschule* in Berlin and acquired a Degree in 1924, his Doctorate in Electrical Engineering in 1927, and subsequently joined *Siemens & Halske AG*. With the rise of Hitler in 1933, he left Germany and, after a short period in Hungary, he went to England, where he found employment in research at the Thomson-Houston Co. in Rugby, where he stayed for 14 years. He dealt with electron-optical problems and information theory. In an attempt to improve the electron microscope, he developed holography in 1948, making him famous worldwide. For this discovery, he received the Nobel Prize in Physics in 1971 “for his investigation and development of holography”. His other work is the *Theory of Communication*, known as “structural” theory. In 1949, he joined the Imperial College of Science & Technology in London, and became Professor of Applied Electron Physics until his retirement in 1967. Together with his assistants, he dealt with numerous problems, among them the elucidation of the “Langmuir Paradox”. They constructed a holographic microscope; a new electron-velocity spectroscope; a flat, thin color television tube, and a new type of thermionic converter. His theoretical work included communication theory, plasma theory, magnetron theory, and a scheme of fusion. He was granted more than 100 patents. He received many honors including Fellow of the Royal Society (1956), Honorary Member of the Hungarian Academy of Sciences (1964), D.Sc. University of London (1964), Hon. D.Sc. Univ. of Southampton (1970) and Commander of the Order of the British Empire (1970). Awards and schools bear his name. – B: 1193, 1031, T: 7103. → **Holography**.

**Gábor, Dzsingisz Jenő** (Dzsingisz Eugene Gabor) (Győr, Hungary, 14 March 1940 - ) – Dutch politician of Hungarian extraction. After World War II, his religious, intellectual family was treated as a political enemy in the Communist era under Rákosi. Forced to leave Hungary after involvement in the 1956 uprising, he settled down in the Netherlands, became the adopted “grandson” of the grandmother of the UN’s Dutch Refugee Commissioner’s, Berman. She sent him to the Jesuit school to complete his secondary education, and then he studied Economy and International Law at the Catholic University of Tilburg. He became a Dutch citizen in 1968, and was employed by the European Agency of the Dutch Ministry of Economy, where he was Under-Secretary in the Shipbuilding Division, at age 28. Finally, he became Head of the Administration at The Hague. A few years later, he was overseer of the City’s largest investment project, working with builders, architects and tourism officials. In 1983, the Queen of the Netherlands appointed him Mayor of the village Haaksbergen. In 1990, he became Under-Secretary of State for the Ministry of Agriculture. In the 1990s, he visited Hungary several times as a political party representative. Following his 1994 election defeat in Holland, he represented the opposition in the Dutch Parliament for four years. In 1998, he was appointed as advisor to the Central and Eastern European Agricultural and Environmental Protection Program and was delegated to Hungary as agricultural attaché of the Dutch Embassy, thereby facilitating Hungary’s entry into the EU. In 2006, the

Balassi Kiadó of Budapest published his diary, *Half Way to Europe. A Diplomat's Notes between 1999 and 2005. (Európába – félúton. Egy diplomata feljegyzései 1999-2005)*. – B: 1031, 1554, T: 3240

**Gábor, Miklós** (Nicholas) (Zalaegerszeg, 7 April 1919 - Budapest, 2 July 1998) – Actor. He graduated from the Academy of Dramatic Art in 1940. In 1941, he accepted a contract from the Madách Theater (*Madách Színház*), Budapest. After 1945 until 1954, he played at the National Theater (*Nemzeti Színház*), Budapest, mainly in classic roles (*School for Wives; Tartuffe; Much Ado About Nothing; Midsummer-Night's Dream*). His dramatic strength first revealed itself in the lead role in Cocteau's play *Indiscretions (Les Parents Terribles, Rettenetes szülők)*. Among his outstanding comic roles were in Gogol's *The Inspector-General (A revizor)*; in Shaw's *Widowers' Houses (Szerelmi házasság)*; in Schiller's *Love and Intrigue (Ármány és szerelem)*; in Shakespeare's *As You Like It (Ahogy tetszik)*, and *Othello*. In the Madách Theater he continued the great performances in E. Scribe's *The Glass of Water (Egy pohár víz)*, and in V. Hugo's *Ruy Blas (A Királyasszony lovagja)*. Other outstanding interpretations were Jack the Knife (*Bicska Maxi*) in Brecht-Weill's *Three-Penny Opera (Koldusopera)*, in Shaw's *Joan of Arc (Szent Johanna)*, and in Beaumarchais' *The Marriage of Figaro*. He frequently acted in film, radio and television productions. From 1970 on, he also acted as stage manager. He was an actor with intellectual strength and performed his roles with rich emotion. He discussed the problems of theater interpretation in numerous articles and also in his books, which include *With Pen (Tollal)* diary (1963), *A Cute Genius (Egy csinos zseni)*, and *Limping Freedom (Sánta szabadság)* (1987). He was a recipient of the Kossuth Prize (1953), the Milán Füst Prize (1997), and held the title of Artist of Merit and Outstanding Artist (1962, 1967). – B: 0870, 1178, 1257, 1445, T: 7684.

**Gábor, Zoltán** (Lendva, now Lendava, Slovenia, 31 March 1922 - ) – Essayist, painter, graphic artist. His secondary education was at his place of birth and at the High School for Applied Arts, Zágráb (now Zagreb, Croatia) (1939-1941), then continued at a school of the same type in Budapest (1941-1944). His higher studies were at the Academy of Applied Arts of Zágráb (now Zagreb, Croatia) (1945-1949), where he acquired a diploma. He was in Paris in 1951 and 1952. He taught at the Teacher Training College, Zágráb (1951-1952); then was a high-school teacher in Zágráb (1954-1956). In the fall of 1956 he was in Vienna. In 1961 and 1962, he was a free-lance artist in Zágráb. From 1969, until his retirement in 1989, he worked as an applied artist at the Zágráb Mental Hospital. He illustrated more than 60 books and made 600 book-covers. His pictures include the *Four Seasons (A négy évszak)*, a large tableau, and nine series of the history of Lendva. He had many individual and group exhibitions in Slovenia, Croatia and Hungary. His works are held in a number of European countries and in the USA, Canada, Australia and Lebanon. He is a member of the Alliance of Croatian Applied Artists and corporate member of the Hungarian Academy of Sciences, Budapest. Among his writings are *Carrier Pigeon (Postagalamb)* essays (1982); *On the Track of Apis (Ápissz nyomán)* (1991); *I will Tell it (Elmondom)* sketches (1995); *Tragom Apisa*, (in Croatian) (1991), *Posledi Apisa* (in Slovenian) (1993). – B: 1169, 1654, T: 7103.

**Gábor, Zsa Zsa** (Suzanna) (Sári/Sara Gábor) (Budapest, 6 February 1917 - Los Angeles, 30 March 2011?) – Actress; started her acting career in Vienna in 1932. She studied acting in 1933. In 1936 she became Miss Hungary. Her family moved to the US because

of the approaching war; in 1941 she joined her sister, Éva, in the US. Unlike her sister, Zsazsa did not devote her life only to acting; she ran the Zsazsa Cosmetic Ltd. Her credits include *Moulin Rouge* (1952); *Touch of Evil* (*Egy kis gonoszság*) (1959); *Most Wanted Man* (*A legközöttebb férfi*) (1962); *The Fear of High Places* (*Félelem a magas helyektől*) (1968); *The Movie Maker* (*A filmgyártó*) (1986); *The Naked Truth* (*A csupasz igazság*) (1992), and *A Very Brady Sequel* (*Pontosan Brady folytatása*) (1996). As a celebrity she is considered to be one of the best-known Hungarians in the world. – B: 1037, T: 7103.

**Gáborjáni Szabó, Kálmán** (Coloman) (Debrecen, 18 September 1897 - Budapest, 19 June 1955) – Painter, graphic artist. He finished his studies in Budapest at the Academy of Fine Arts under János (John) Vaszary and Imre (Emeric) Révész. Between 1922 and 1945, he was an art teacher at the Reformed College, Debrecen. In 1923, he started wood engraving and went on a study trip to Rome in 1931 and in 1938. His Italian experiences were put in the *Visioni d'Italia* woodcarving album. His bookplate was published in 1934. In 1937-1938, he painted a series of frescos of Hungarian historical events for the College of Debrecen. In 1945 he was involved in the reorganization of the College in Debrecen. In 1951 he published an album on the theme of peace. He was the first artist to organize a children's drawing exhibition. He became a Professor at the Academy of Fine Arts in Budapest (1945). In 1966, an exhibition of his works was held at the National Gallery (*Nemzeti Galéria*) in Budapest. His paintings include *Fragrant Lilacs* (*Illatozó orgonák*) (1930) and *Calla with Lemons* (*Kála citromokkal*) (1932). Aba Novák influenced his art that became well known. – B: 0934, 1409, T: 7653. → **Debrecen, Reformed College; Aba Novák, Vilmos; Vaszary, János.**

**Gabriel, Asztrik L.** (Pécs, 10 December 1907 - 16 May 2005, Budapest) – Catholic priest, medieval historian. He graduated from high school in 1926. After entering the Premonstran Order he studied Theology at Jászóvár near Jasov, 20 km west of Kassa (now Košice, Slovakia). In 1929, he enrolled in the University of Budapest, where he read Linguistics, French Civilization and Medieval History, receiving a Ph.D. in 1936. He studied for four years at the *Sorbonne*, the *École Nationale des Chartes* and the *Collège de France* in Paris. He became the founding director of the French College at Gödöllő, Hungary, where he also served between 1938 and 1947 as Resident Fellow; later became a professor at the University of Budapest. He fled Hungary in 1947, and found refuge as a guest professor at the Pontifical Institute of Medieval Studies in Toronto, Canada. A year later he moved to the US and became a professor of Old French Literature and History of Medieval Education and he became Director of the Medieval Institute of the University of Notre Dame, Ind., where he worked until his retirement in 1973. However, he remained active as a visiting and exchange professor at several universities and colleges, including that of Luxembourg, Munich and Paris. He participated in many international congresses, conventions and conferences. He was elected a member of the *Société de l'Histoire de France*, and was made a Fellow of the Royal Historical Society; the *Académie de Inscriptions et Belles Lettres*, Paris; the Medieval Academy of America; and the *Bayerische Akademie der Wissenschaften*, Munich. He authored 167 articles, essays and books, some with special Hungarian relevance: *Alexandre de Hongrie, maître régent à la Sorbonne médiévale* (*Magyarországi Sándor Mester, a középkori Sobonne tanára*) (1941); *Hungarian Opinion at a Medieval Disputation in Paris* (*Magyar vélemény egy középkori párisi*

*dispután*, (1943); *Le recueil de sermons d'un Hongrois étudiant à l'université de Paris, au XIIIe siècle* (Egy XIII. századi magyar klerikus párisi egyetemi szentbeszéd-gyűjteménye) (1943); *Ungarische Bildergalerie: Die Heilige Elizabeth 1207-1230* (Magyar képcsarnok: Szent Erzsébet, 1207-1231); *Pester Lloyd* (1943); *Robert Sorbonne at the University of Paris* (1956); *The University of Paris and its Hungarian Students and Masters during the Reign of Louis XII and François Ier* (1986); *Marcus Marc de Kémes: Hungarian Masters at the University of Paris, ca. 1521-1523*, and *Hungarian Students and Masters who attended both the Universities of Vienna and Paris* (1989). See also, *Students and Masters from Hungary at the Universities in Vienna and Paris in the 14th and 15th centuries*. Some of the many titles and awards he has received are: Titular Provost of the Church of Saint Michael the Archangel on the Island of St Margit, Budapest; honorary member of the Hungarian Academy of Sciences; officer of the *l'Ordre des Palmes Academiques*, Officer of the *Légion d'Honneur*, *Commendatore nell'Ordine al Merito*, the Gold Medal *Pro Ecclesia et Pontifice*, and Honorary Doctor of the *Bibliotheca Ambrosiana in Milan*. – B: 1001, T: 7103.

**Gách, Marianne** (Budapest, 8 June 1916 - Budapest, 25 December 1989) – Journalist. She began her career in 1936, writing for the weekly magazine, *Theater Life* (*Színházi Élet*), while completing her studies at the Music Academy. Her articles, writings and commentaries dealt primarily with music and theater. The interview was her favorite genre. From 1940, she worked for the magazine, *Film, Theater, Literature* (*Film, Színház, Irodalom*), then from 1945, for the *Progress* (*Haladás*); and finally, until her retirement, for *Film, Theater, Music* (*Film, Színház, Muzsika*). Instead of relying solely on a “question and answer” formula, she managed to bring forth in her interviews an impression of the most important aspects of the life, art and activities of the subject. She also interviewed musicians, singers, actors, directors and authors from abroad, always emphasizing human values along with artistic accomplishments. She was a recipient of the Rózsa Ferenc Prize, (1985). – B: 0883, 1160, 1257, T: 7667.

**Gádor, Béla** (Nyíregyháza, 22 May 1906 - Budapest, 23 January 1961) – Author, journalist. Prior to 1945, he was a bank official; from 1947 until his death, he wrote for *Ludas Matyi* (*Crafty Matt, the Goose-herd*), a satirical weekly where, from 1948 to 1953, he was Editor, and from 1953 to 1956 Editor-in-Chief. His satire followed Andor Gábor's style. The humor behind the satire of everyday life he artfully cultivated was based on keen psychological observations and insight. His main works are *Stories of a Few First Loves* (*Néhány első szerelem története*) (1958); *It's Hard to Write Satire* (*Nehéz szatírárt írni*) (1955); *I Wrote in my Anger* (*Irtam mérgemben*) (1961); *Lords, Poets, Murderers* (*Urak, költők, gyilkosok*) (1960), and *Gods in Love* (*Szerelmes istenek*) (1955). He was a recipient of the Attila József Prize (1953). – B: 0883, 1091, 1257, T: 7667.→**Szűr-Szabó, József**.

**Gádor, István** (Stephen) (Kóka, 11 November 1891- Budapest, 22 July 1984) – Ceramic artist. In 1911, he graduated from the School of Applied Arts, where he studied sculpture. On the inspiration of a Viennese exhibition he turned to ceramic arts, became a member of the *Wiener Werkstätte*, and continued to work in Vienna. He was successful at many international exhibitions and competitions: won a silver medal at the Milanese National Triennial in 1933, then gold medals at the 1935 World Exposition in Brussels and at the Milanese Triennial of 1936. He received similar recognition in Paris, New York and, in

1931, in Hungary. Exhibitions of his life's work were held in 1955, at the National Salon; in 1961 and 1966, in the Ernst Museum, and in 1971 at the Art Gallery of Budapest. A permanent exhibit of his works was opened in 1977, at the Castle of Siklós. His memoirs were published in 1979. He was awarded the Kossuth Prize (1955, 1975), the titles of Merited Artist (1962) and Outstanding Artist (1967). – B: 0883, 1409, T: 7667.

**Gajdusek, Dániel Carleton** (Yonkers, NY, USA, 9 September 1923 - Tromsø, Norway, 12 December 2008) – Physician, virologist, pediatrician. His mother, Ottilia Döbröczki was a Hungarian from Debrecen and his father was of Slovakian extraction; they met as emigrants. He started his studies in Rochester and obtained his Medical Degree at Harvard University. After his graduation he was a scientific researcher at the California Institute of Technology. For two years, he worked in Australia, where he first heard about “*kuru*”, a fatal brain disease that devastated mainly the primitive tribes of New Guinea. For years, he treated the people of the local *Fore* tribe and discovered the pathogen of the disease. The importance of his discovery is that it opened a new era in the research of the degenerative diseases of the nervous system. He won the Nobel Prize (shared) for his work on identifying and describing slow virus infections in humans (1976). Further works by his team included the study of the Creutzfeldt-Jakob disease, also caused by slow pathogens. Since then, such mechanism has been proposed for many illnesses, including AIDS and Multiple Sclerosis. From 1958, he worked at the National Institute of Neurology and Communicative Disorders and Stroke in Bethesda, Maryland. He was inducted into the National Academy of Sciences in 1947. – B: 1410, 1031, T: 7660.

**Gál, András** (Andrew) (Budapest, 24 June 1968 - ) – Painter. During 1982-1986 he studied at the Academy of Applied Arts, Budapest, later at its Painter Department during 1987-1991. Afterwards he conducted postgradual studies from 1991 to 1994. His teachers were Lajos (Louis) Sváby, Károly (Charles) Klimó, and Zoltán Tölg-Molnár. From 1995 to 1996 he was demonstrator in the painter department of the above Academy. During these years of studies he obtained a number of scholarships, among them the scholarship of the Hungarian Academy of Rome (1997-1999), the Derkovits scholarship (1997), the scholarship of the city of Vienna (1997, 2001), and the Eötvös scholarship (2007). Gal paints his pictures in oil on a large scale, conveying the pictorial movement instead of colors by *impasto* painting-technique, as in *Moving-about (Mozgás)* (1996). Sometimes he joins several panel paintings as in *Standing on something (Valamin állás)* (1995), or employing the method of picture within picture, or using the margin of the picture for the composition as in *Lack (Hiány)* (1996). Gal took part in many one-man and collective exhibitions in Hungary as well as abroad. His works are housed in a number of public collections: Ludwig Museum, Budapest, Karl Ernst Osthaus-Museum, Hagen (Germany), Neue Galerie am Landesmuseum, Joanneum, Graz (Austria), Public Endowment for Modern Art, Dunaújváros, King St. Stephen Museum, Székesfehérvár, Vass Collection, Veszprém and Municipal Art Museum, Győr. He was awarded the Barcsay Prize in 1996. – B: 1654, T: 7456.

**Gál, József** (Joseph) (Székesfehérvár, 10 August 1955 - ) – Sport sailor. His higher studies were at the Budapest Polytechnic, where he obtained a Mechanical Engineering diploma. Together with Nándor (Ferdinand) Fa, he sailed around the world in two years with a homemade ship, named Szt. Jupát, between 26 September 1985 and 12 September 1987. In 1991, he set off on another around-the-world expedition along the Equator with

his family. He was honored with the highest sport medal of Hungary. – B: 1298, T: 7675. → **Fa, Nándor.**

**Gál, László** (Ladislav) (Alsókaból, Hungary, now Kovilj, Serbia, 19 December 1902 - Újvidék, now Novi Sad, former Yugoslavia, now Serbia, 13 July 1975) – Poet, writer, journalist, translator of literary works. He studied in Budapest and Rome. He started his career as a journalist in these cities; later he went to the Vajdaság (now Vojvodina, Serbia). In the early 1930s, he moved to Szabadka (now Subotica, Serbia), and joined the Yugoslav-Hungarian Literary Circle. He published a satirical weekly, *Grimace* (*Grimasz*). He was a contributor to the periodicals, *Kalangya* and *Bridge* (*Híd*). After World War II, he became a founding member of the newspaper, *Free Voivodina* (*Szabad Vajdaság*), and edited it until his retirement. In 1944, he founded and edited the journal, *Hungarian Word* (*Magyar Szó*). His poetry forms an important part of Yugoslav-Hungarian literature. His poems were published in many volumes between 1939 and 1972 at Újvidék, including *Song About the Poor Fisherman* (*Dal a szegény halászról*) (1959); *Butterfly World* (*Lepkevilág*) (1965) and *Rock Years* (*Sziklaévek*) (1969), (1975). He was honored with the Híd Prize. – B: 0883, 1257, T: 7663.

**Gál, Sándor** (Alexander) (Búcs, now Búc, Slovakia, 29 November 1937 - ) – Writer. He completed his secondary studies at the Agricultural High School, Komárom (1954-1959); and a journalist course in Budapest (1966-1969). Thereafter he worked at the journal *Free Land* (*Szabad Föld*), Budapest (1959-1969). In 1969, he was a reporter at the journal, *New Word* (*Új Szó*), Pozsony (now Bratislava, Slovakia). Between 1969 and 1971 he was dramaturgist at the Thalia Theater, Kassa (now Košice, Slovakia). Since 1971, he has been a reporter for the weekly, *The Week* (*A Hét*). He is also involved in the CSEMADOK (Czechoslovakian Hungarian Social and Cultural Alliance); was its Deputy President as well as that of the Mother-Tongue Conference (*Anyanyelvi Konferencia*). He is author of poems, short novels, critiques, book-reviews and books. His writings appeared in *New Youth* (*Új Ifjúság*); *Working Woman* (*Dolgozó Nő*); *New Word* (*Új Szó*); *Campfire* (*Tábortűz*), and *From Csallóköz to Bodrogek*. His books include *Statues without Faces* (*Arcnélküli szobrok*) poems (1964); *Equinox* (*Napéjegyenlőség*) poems (1966); *Mummy in the Grass* (*Múmia a fűben*) short novels (1970); *First-class Loneliness* (*Elsőosztályu magány*) short novels (1974); *Gravel-mountains* (*Kavicshegyek*) short novels (1979); *Between Eden and Golgotha* (*Éden és Golgota között*) poems (1984); *The One and Only Time* (*Egyetlen idő*) poems (1988); *Written Speech* (*Írott beszéd*) writings (1993); *Between Two Oceans* (*Két óceán között*) travelogue (1997), *New Infinite* (*Új végtelen*), poems (2005), and *History of the Eastern Diary* (*A Keleti Napló története*), monologue (2007). He was awarded the Imre Madách Prize (1970, 2005), the Attila József Prize (1994), the Berzsenyi Prize (1995), the Gold Memorial Prize of the President of the Republic of Hungary (1997), the Silver Plaque of the Slovak Government (2002), the Zoltán Szabó Prize (2002), the Posonium Life-Prize (2002), and the Pulitzer Life-Prize (2009). – B: 1083, 1257, 1890, T: 7103.

**Gala Dress, Hungarian** (*díszmagyar*) – It is a traditionally Hungarian gala costume worn on special festive occasions. It is composed of pieces developed over centuries. The man's costume consists of a *dolmány* (dolman) or *atilla* (military style gala-coat), a pantaloons with fancy braiding decoration, *mente* (short, fur-lined coat), black, red or yellow boots, a fur head dress, and a sword. The ladies' dress consists of a Hungarian-cut

bodice, long skirt, pelisse and a *párta* (head dress), and red or yellow boots. Heavy embroidery and precious stone decorations are characteristics of the *diszmagyar* costume. It was customary to wear it on festive occasions until 1944. – B: 0942, 1138, T: 3233.

**Galamb, József** (Joseph) (Makó, 3 February 1881 - Detroit, MI, USA, 4 December 1955) – Mechanical engineer, chief designer at the Ford automobile factory. He studied at an Industrial School in Szeged, and completed his education at the Budapest Polytechnic. He became familiar with automobile manufacturing in his first job at the Magyar Automobile Rt. in Arad. He visited the engine manufacturing factories in Dresden, Hamburg and Bremen, and the Adler factory in Frankfurt employed him. He sailed to the US in 1904 to see the International Automobile Show at the World's Fair in St. Louis, where the Westinghouse Co. employed him as a toolmaker. In December 1905, he traveled to Detroit and became acquainted with Henry Ford. Galamb became his draftsman; but he was soon transferred to the research division. The Ford factory employed only 300

workers at the time and produced only the B, K and N models. In 1907, Galamb designed the model T. Subsequently, 15.5 million model T's were manufactured without any modification on the design. As components of the model T, he invented the planetary gearbox and the electric ignition plug. These inventions mark important progress in automobile technology. Later, he designed a new type of light tractor, the Fordson (1918-1920) that became a model for tractor manufacturing in the USA. During World War I, he designed ambulance vans and light tanks for the military. He established the manufacturing of the Liberty airplane engine and about four thousand were produced to the end of the war. Galamb designed racing cars, trucks, and cooperated in prototype experiments and in designs of manufacturing plants. In 1927, he designed the more attractive model A to replace the obsolete model T and several other models. In 1927, Galamb was promoted to the position of chief engineer and retired in April 1944. – B: 0883, 1020, T: 7662.→**Assembly Line Automobile Production; Planetary Gearshift.**

**Galambos, Erzsi** (Bessy) (Budapest, 5 December 1931 - ) – Actress. She received her first lessons in acting at the Children's Theater of "Uncle" Lakner. Thereafter, she attended the Actors' Training School of the Actors' Society, Budapest. She was a dancer at the National Theater (*Nemzeti Színház*), Miskolc (1955-1958) and worked at the József Katona Theater (*Katona József Színház*), Kecskemét (1958-1962), the Petőfi Theater (*Petőfi Színház*), Budapest (1962-1964), the Operetta Theater (*Operett Színház*) (1964-1983); the Attila József Theater (*József Attila Színház*), (Budapest (1983-)). She acted with great success in many roles, including Puck in Shakespeare's *A Midsummer-Night's Dream* (*Szenivánéji álom*); Eliza in Shaw-Lerner-Loewe's *My Fair Lady*; Jenny in Brecht-Weill's *The Threepenny Opera* (*Koldusopera*); Madame Foyer in Nagy-Pozsgai-Bradányi's *The Kid* (*A kölyök*); Mrs. Marosi in Molnár's *The Physician* (*A doktor úr*). Her feature films and TV roles include *Widowed Brides* (*Özvegy menyasszonyok*) (1964); *Csalódások* (*Disappointments*) (1972); *Maya* (TV) (1978); *Lola Brau* (TV) (1984), and

*Affair of the Cards in Ladies' Circles (Kártyaaffér hölgykörökben* (TV) (1990). She is a recipient of the Mari Jászai Prize (1968), Life-Member of the Society of Immortals (1998), the Déryné Prize (1990), the Merited and Outstanding Actor titles (1973, 1981), and the Kossuth Prize (2002). – B: 0874, 1445, T: 7103.

**Galambos, Lajos** (Louis) (Kótaj, 14 October 1929 - Budapest, 14 September 1986) – Writer. After his high school graduation in Nyíregyháza he enrolled in the Academy of Dramatic Art, Budapest. However, he left the school and started to work at the newspaper, *Fresh News (Friss Újság)*. Thereafter, he joined the humorous weekly paper, *Ludas Matyi (Crafty Matt, the Goose-herd)*. He also did radio reporting. The periodical, *New Writing (Új Írás)* published some of his articles. He wrote short stories for the periodical *Contemporary (Kortárs)*. Some of his stories were made into films. His drama, *Armistice (Fegyverletétel)*, was produced at the Comedy Theater (*Víg Színház*), Budapest. He moved to Nyíregyháza in 1970, and published his writings in the literary review, *Life and Literature (Élet és Irodalom)*, as well as other newspapers. His drama, the *Amorous Planets (Szerelmes égitestek)*, was produced at the József Attila Theater, Nyíregyháza in 1985. He also wrote film-scripts. Some were made into feature films, such as *The Bells Went to Rome (A harangok Rómába mentek)*, and *Before God and Man (Isten és ember előtt)*. The collection of his writings is now at the József Attila Museum at Nyíregyháza. He received the József Attila Prize in 1962. – B: 0883, 1257, T: 7663.

**Galántha, Judit** (Judith) (Mrs N. Hermann), her pen-names include Judith G. Hermann, Galantha H. Judit) Tompa north of Szabadka, 12 September 1944 - ) – Broadcast journalist, writer. Educated in Hungary where she became a broadcaster in 1964. She emigrated to Canada in 1968 and obtained a BSc degree at the Université de Montreal. For 15 years, Radio Canada International employed her as an announcer-producer, then as a supervising producer until 1991. She was a correspondent for Radio Free Europe's Hungarian service until its closure. She was also a contributor to, later translator for the new *Encyclopaedia Hungarica*, Calgary, Alberta, and chief translation contributor to the *Hungarian World Encyclopedia*. She is the first woman to actively follow the footsteps of Alexander Csoma de Kőrös from Transylvania through India, Kinnawar, Ladakh and Sikkim. These field trips lasted over four years and she delivered several Alexander Csoma de Kőrös memorial plaques, including one to the Mentsi Kang's prestigious medical museum at Lhasa, Tibet, China in 1993. The native Tibetan medical system inspired her to study it with renowned Tibetan professors at the Tara College of Tibetan Medicine, Scotland. She is the first Hungarian with such a unique qualification. She has published academic research papers in English on a yearly basis since 1992, at the Congress of the Social Sciences and Humanities, through the Hungarian Studies Association of Canada. She has been engaged with the Alexander Csoma de Kőrös and Tibet-related independent research work since 1984. The University of Toronto, Canada, the Library of Congress, USA, the British Library, UK, the Széchényi National Library and the Museum of Geography, Hungary, are repositories of her research work. Her book, *Fehér Hegyek, Kék Pipacsok (White Mountains, Blue Poppies)*, was published in 1992, on the occasion of the 150th anniversary of the death of Alexander Csoma de Kőrös. During this commemorative year, she was guest speaker at many venues all over the world. She is widely traveled, especially in East and Southeast Asia, Hawaii, Australia and New Zealand, North Africa, the Caribbean region, North America and most countries in Europe. She is the first female recipient of two distinguished awards: the

Alexander Csoma de Kőrös commemorative medal of the KCsSKME of Covasna, Transylvania (now in Romania) and the Sámuel Teleki medal of the prestigious Hungarian Geographic Society. She is past president of the Hungarian Studies Association of Canada (2003-2005). – B&T: 3240.→**Hungarian Studies Association of Canada, Hungarian Voice of Canada; Kőrösi Csoma, Sándor; Balázs, Dénes.**

**Galánthay Glock, Tivadar** (Theodore) (Vágvecse now Veca, Slovakia, 30 October 1872 - Budapest, 15 December 1956) – Military officer, stenography expert. As an 11-year-old, he already showed interest in Egyptian hieroglyphic writings. He attended the Officer Cadet School in Pozsony (now Bratislava, Slovakia) and served as a warrant officer in the 68th Infantry Regiment. During his military career he was posted to many garrisons, including Bosnia. As he had a gift for languages, he learned several and he occupied himself with studying ancient writings, including the Hungarian runic script. He proved that the ancient Hungarian writing belongs to the so-called Asia Minor writings that originated under Egyptian and Phoenician cultural influence. He stated that the ancient Hungarian writing demonstrates the closest affinity with the Egyptian writing symbols. As a shorthand writer, he put forward his independent stenography system in 1909. He discovered certain writing elements in the ancient Hungarian runic writing showing substantial simplifying effort found in today's Hungarian stenography. On the occasion of the Countrywide Stenography Exhibiton of 1913 in the Arts and Crafts Museum, he presented the stenography of the Ural-Altaiic and related peoples. He applied the Gabelsberger stenography system to the Chinese language. Over the years, he perfected his system; then he devised his own system based on the Japanese, Siamese, Albanian and Korean stenographies. During World War I, the Russians took him prisoner on the Galician front in 1916. After his return, he was appointed commandant of the military highschool in Hajmáskér, and later he served at the Ludovica Royal Military Academy, as Head of Foreign Language Studies, and as teacher of several languages. He retired in 1925, and occupied himself mainly with painting and stenography. In 1935, he was elected Member of Parliament. In 1937, at the International Stenography Congress in London, he demonstrated the Chinese stenography system with great success. He was then offered a professorship in Peking (Beijing) but he did not accept it. In the same year he traveled to Tirana at the invitation of Zogu, King of Albania.. – B: 0883, 1160, T: 7669.→**Ludovika Royal Hungarian Military Academy; Hungarian Runic Script.**

**Gáldi László** (Ladislav) (Göbl) (Miskolc, 23 May 1910 - Budapest, 5 February 1974) – Linguist, literary historian, lexicographer. He obtained his Ph.D. in Linguistics from the University of Budapest in 1954. At first, he worked as a librarian at the University Library, Budapest. Between 1932 and 1935, he was a contributor to the Hungarian Study Center in Paris. In 1938, he became a visiting lecturer at the Faculty of Philosophy of the University of Budapest. In 1942, he moved to Kolozsvár (now Cluj-Napoca, Romania) and taught at the University there. In 1945, he moved back to Budapest after Hungary lost Northern Transylvania again. His literary career started with writing poetry and translating Romanian works into Hungarian. He published his works in the periodical, *Apolló*. He wrote a monograph about Mihai Eminescu. He participated in the Slavic Conference in Sophia, Bulgaria, and presented a paper about the structure of Lermontov's poetry. His doctoral thesis was on compilation of dictionaries. It was an important work, as he analyzed dictionaries from the point of view of the development of the Hungarian language. He compiled a Russian-Hungarian, Hungarian-Russian Dictionary. He edited

the Spanish-Hungarian Dictionary and revised the Great Hungarian Dictionary. He wrote stylistic studies on poetry in French, Italian and Romanian. His works include *La mètre et la rythme (Meter and Rhythm – Időmérték és ritmus)* (1937); *La culture hongroise en Transsylvanie (Hungarian Culture in Transylvania – Magyar kultúra Erdélyben)* (1944), and *Précis de stylistique française (Summary of the French Style – Összefoglaló a francia stílusról)* (1967). He was a member of the Hungarian Academy of Sciences between 1942 and 1949, and restored in 1989. – B: 0883, 1257, T: 7663.

**Gálffy, Mózes** (Nagyszeben, now Sibiu, Romania, 13 July 1915 - Budapest, 23 July 1988) – Linguist. He was educated in Kolozsvár (now Cluj-Napoca, Romania.). Between 1940 and 1941, he was Professor of Hungarian Language and Literature at the Unitarian College, Kolozsvár. Later, he joined the Transylvanian Institute. In 1946, he became an associate professor at the Faculty of Linguistics of the University at Kolozsvár, and kept the position until his retirement in 1980. His main linguistic research was the field of dialect. He studied dialects of different geographical regions. He conducted research at Kalotaszeg, in the Valley of the River Fekete Körös, and in the Moldavian Csángó region. Gálffy, in partnership with Attila T. Szabó and Gyula (Julius) Márton composed a linguistic atlas and a dialect dictionary (of some 13 volumes). He published articles about Hungarian dialects in Transylvania in relevant periodicals. He wrote a Hungarian Grammar Book and a Hungarian Orthographical Dictionary. He was co-editor of many philology books about Hungarian idioms. He regularly published articles on linguistics between 1948 and 1975. Among his works are *The Handbook of the Present Hungarian Language (A mai magyar nyelv kézikönyve)* with D. Balogh and M. J. Nagy (1971); *Glossary of Torja (Torjai szójegyzék)* with Z. Nemes and Gy. Márton (1974), and *Szekler Geographic-Linguistic Dictionary (Székely nyelv-földrajzi szótár)*, with Gy. Márton (1987). – B: 0883, 1257, T: 7663. → **Szabó, Attila T.**

**Galgamente** – The banks and surroundings of the Galga Creek, a 65-km-long tributary of the Zagyva River. Its source is in the Cserhát Hills, between the Börzsöny and Mátra Mountains, part of the Northeastern Hungarian Central Mountains. There are a number of old settlements on its banks, like Galgagyörk, Galgaguta and Galgamácsa, indicating that the area must have been occupied and settled by one of the Hungarian tribes soon after the Carpathian conquest by Khagan Árpád's Magyars. – B: 1068, 7456; T: 7456.

**Galgóczi, Erzsébet** (Elizabeth) (Ménfőcsanak, 27 August 1931 - Ménfőcsanak, 20 May 1989) – Writer. She was born into a farmer's family. She graduated from the State High School of Győr in 1949. She worked in the Rolling Stock and Machine Factory in Győr. In 1950, she won the first prize in literature at a competition. Then she registered at the Academy of Dramatic Arts, Budapest. She studied script writing and dramaturgy (1950-1955). Her first book of short stories appeared in 1953. She worked as journalist and wrote reports and sociographies. Her play, *The Wife of the Attorney General (A főügyész felesége)*, was performed on stage in 1970. A film was made from her novel, *On the Halfway (Félúton,)* in 1972. Her other play, *Whose Law (Kinek a törvénye)* had its première at the Theater of Győr in 1977. Her books include *Cogito*, short stories (1981); *Outside and Within the Law (Törvényen kívül és belül)* novel (1978); *Drifting Ice-flows (Úszó jégtáblák)* novel (1987), and *Twin Holiday (Kettős ünnep)* short stories (1989). Her primary interest was the present and the contemporary men facing taboos. After 1980, she was involved in politics and was an MP until 1986. Her documentary novel, *Otter*

*Trap (Vidravas)* appeared in 1984, which caused a scandal, for it featured the development of the Communist rule from 1945 to the Hungarian Revolution of 1956. Her writings were translated into some 30 languages and many of them were made into feature films. She was a recipient of the Attila József Prize (1952, 1969, 1976), and the Kossuth Prize (1978). – B: 1122, 1257 T: 7103.

**Galicia** – A region lying northeast of the arc of the Carpathian Mountain Chain. From the 9th century, it belonged to the Principality of Kijev (Novgorod). During the 12th century, it became a bone of contention between the kingdoms of Poland and Hungary. The latter's King Béla III (1172-1196) assumed first the title of King of Galicia. However, it became incorporated into Poland by 1386. The Habsburgs acquired the eastern part in 1772, and finally all of Galicia in 1795, during the dismemberment of Poland. Poland managed to reacquire it for a while (1919-1939). After World War II, the Soviet Union annexed its eastern part as Western Ukraine. Galicia was an important source of Jewish migration to Hungary. – B: 1153, 1020, T: 7661. → **Béla III, King.**

**Gáll, István** (Stephen) (Budapest, 28 December 1931 - Budapest, 21 October 1982). – Writer. In 1950 he was expelled from high school before graduation for criticizing Marxist ideology. Thereafter, he enrolled in the Budapest Polytechnic; after graduation he worked in the construction industry. Later, he served in the army. After his discharge from the military he moved to Pécs and began to write. He wrote poetry, using folktales as themes. At the same time, he attended the University of Budapest and studied in the Faculty of History. He worked as dramaturgist for the Hungarian Radio. He wrote his first novel, *The Trap (Csapda)* in 1966. He was a regular contributor to the weekly, *New Writing (Új Irás)*, until his death. He wrote dramas, novels and short stories. Some of his stories were made into feature films and radio plays. Among his writings are *The Sun Worshipper (A napimadó)* (1970); *The Old Man (Az öreg)* (1975); *Iron Age (Vaskor)* (1980), and *Calendar (Kalendárium)* (1982). He was awarded the Attila József Prize in 1967, 1976 and the Kossuth Prize in 1978. – B: 0883, 1257, T: 7663.

**Galley Slave Hungarian Preachers** – Protestant teachings spread quickly in Hungary during the 16th century, not so much for religious reasons but rather as a form of protest against Catholic Habsburg rule that even the Catholic nobles had had enough of. After the leaders of the resistance movement led by Count Wesselényi were executed in 1670, the Protestant nobles fled to Transylvania (*Erdély*, now in Romania). The Protestant preachers in Hungary could not flee, for they were summoned before an extraordinary tribunal of the Vienna Government. On 4 April 1674, the extraordinary tribunal of Pozsony (now Bratislava, Slovakia) sentenced first the preachers, then on the 7th, the teachers (almost 400) to loss of life, and confiscated all their goods and chattels, on grounds of high treason. Most of them were released after they had renounced in writing all further active participation in the Protestant Church, emigrated or, in some cases, converted to Catholicism. However, eighty-nine rejected all the above and were sent to various prisons. In March 1675, the 41 preachers who refused to sign the document of conversion, instead of being executed, had to be escorted to Naples (Buccari) and, as a gesture of clemency, the still living 30 were sold as galley slaves on a Spanish ship for 50 gold (florins) each. Fourteen of them died, either on the road or on the galley. As a result of the outcry of indignation this created throughout Europe in general and in the Protestant states in particular (England, Sweden and the Netherlands), Leopold I of

Austria gave in to pressure and ordered the Spanish captain to release the galley slaves. On 11 February 1676, Dutch admiral Michiel de Ruyter secured the release of the remaining 26 Hungarian preachers. In the fall of 1676, a book, authored by two former galley slaves, was published in Halle, under the title: *Unerhörter Gefängniss-Process*, describing the calvary of the Hungarian galley-slave preachers. Their martyrdom, as well as the general international protest, resulted in the 1681 Edict of Tolerance of Sopron. In it, the Habsburg Emperor allowed the free practice of religion in Hungary, a right that was already law in Transylvania (*Erdély*) since 1557. The General Convent of the Reformed Church in Hungary placed a commemorative marble plaque, in 1936, on the Church's Head Office, at 21 Abonyi Street in Budapest. A memorial in Debrecen that stands between the Great Church (*Nagytemplom*) and the Reformed College (*Református Kollégium*) proclaims their martyrdom, and where Pope John Paul II paid tribute to their memory in 1991. – B: 1231, 1274, T: 7617.→**Kollonich, Lipót; Harsányi, István; "Decade of Mourning"; Ruyter, Michiel de; Reformed Church in Hungary; Payr, Sándor; Kocsi Csergő, Bálint; Evangelical Lutheran Church in Hungary.**

**Gallus, Sándor** (Alexander) (Sopron, 16 November 1907 - Melbourne, Australia, 1996) – Archeologist specializing in prehistory. He obtained his Degree at the University of Szeged, and his Ph.D. at the University of Budapest. He was an adjunct professor at the History Department of the University of Szeged until 1944. World War II brought him to the West and he emigrated to Australia in 1949. He was the co-founding President of the Hungarian Institute, Melbourne. He worked as a teacher until his retirement in 1967. Beside his teaching work, he was involved in archeology. In 1956, he organized a group of young people to dig for the remains of native settlements at Keilor, near Melbourne. Their ten-year long archeological work opened up the *Koonalda Caves*, located at the calcareous lowland of the *Nullarbor Plain*. According to their findings, the cave was in use some 30,000 years ago. They found primitive drawings on the cave walls. In 1967, an expedition, led by Richard Wright, proved Gallus' findings, that the first indigenous people lived in Australia 40,000 years ago and not 8-9 thousand years as was believed earlier. Some 60 papers and books are among his literary output; their subjects are partly Hungarian, partly Australian. His works include *The Figure-Urns of Sopron's Burgstall* (1934); *The Horse-Riding Nomads in Human Development* (1953) in annals; *The Possibility of an Affinity between the Hungarian and Sumerian Languages*, in Hungarian (1977); *Results of the Exploration of Koonalda Cave 1956–1968* (1971); *The Middle and Upper Pleistocene Stone Industries at the Dry Creek Archeological Sites near Keilor* (1976); *Concept of "People"* (1981); *Magyar ethnogenesis* (1981), and *The Position of the Carpathian Basin in Europe* (1991). He was a member of archeological societies and foundation President of the Hungarian Historical Society Sydney. – B: 1105, 1285, T: 7456, 7675.→**Roheim, Géza; Vászolyi, Erik.**

**Galsai, Pongrác** (Pancras) (Pécs, 31 October 1927 - Budapest, 22 April 1988) – Writer, journalist. He graduated from the High School at his hometown, and graduated from the Arts Faculty of the University of Budapest. His first writings were published in the weekly, *Pest Newspaper (Pesti Hírlap)*, and in the periodical *Our Fate (Sorsunk)*. His first job was teaching at his hometown between 1949 and 1954; thereafter he became co-editor of the literary periodical *Transdanubia (Dunántúl)*. Later, he worked as a dramaturgist at the Comedy Theater (*Vidám Színpad*), Budapest. Between 1958 and 1983, he was Co-Editor for the weekly magazine, *Ladies' Journal (Nők Lapja)*, and was

responsible for its literary section. He wrote short stories for the magazine, *Contemporary (Kortárs)*, and wrote film and theater reviews for the literary review, *Life and Literature (Élet és Irodalom)*. There is a series of satirical articles for the monthly periodical, *Grimace (Grimasz)*. His writings include *Roles of Gizi Bajor (Bajor Gizi játéka)* (1971); *Irregular Portraits (Szabálytalan arcképek)* (1978), and *Paternoszter* (1983). He was awarded the Attila József Prize (1983) and the Andor Gábor Prize (1982). – B: 0883, 1257, T: 7663.→**Bajor, Gizi.**

**Gálszécsi, István** (Estván) (Stephen) (Gálszécs? - ca. 1543) – Lutheran teacher, preacher and songwriter. He came from an ancient noble family. He studied at the Universities of Vienna, Krakow and Wittenberg. He worked as a teacher in Gálszécs and Kassa (now Košice, Slovakia) and was a preacher in Gyula and Abaújszántó. He was one of the early writers of the Reformation Movement. Two of his surviving works were published in Hungarian in Krakow, Poland. Both publications are pioneer works in the literature of Hungarian Protestantism. One of them is part of the oldest songbooks, *A Short Booklet on Pious Songs and on Christian Faith (Kegyes inekről és keresztyén hűtről rövid könyvecske)*. It contains three hymns of Martin Luther. It is the first book with music notes in Hungary (1536); the other is the oldest Hungarian Protestant catechism: *A Short Booklet on Christian Science (A keresztyén Tudományról való rövid Könyvecske)* (1538). – B: 0931, 1136, 1257, T: 7617.→**Gálszécsi's Songbook.**

**Gálszécsi's Songbook** – It was published in Krakow in 1536. Only few fragmentary pages are known; they contain three Hungarian songs. The third fragment most probably originates from a later edition. – B: 1197, T: 3240.→**Gálszécsy, István.**

**Galyatető** – A 965 m high peak in the western part of the Mátra Mountain of volcanic origin, in the Northeast Hungarian Central Mountains. It is composed mainly of Miocene andesites. The area of the mountain is situated on the border of the Counties Heves and Nógrád, northwest of the town of Gyöngyös. Near the peak there is a tourist hostel and on its slope there is a ski-jump. – B: 1068, 7456, T: 7456.

**Gáncs, Péter** (Budapest, 24 May 1951 - ) – Lutheran Bishop. He came from an ancient pastoral family. He was educated in Nyíregyháza; 1969 he started Theological studies at the Lutheran Theological Academy, Budapest, graduating in 1974. After ordination, he served as Assistant Pastor at the Bécsi Kapu (Viennese Gate) Square Congregation of Budapest. In 1976, he worked at the Ecumenical Council of Hungarian Churches, Budapest. From 1977 he was Assistant Pastor at the Rákosc-saba-Pécel-Isaszeg congregation. In 1980 he was on scholarship at the Wuppertal Seminary of the Rhein-Lutheran Church, Germany, where he studied the question of confirmation. Returning to Hungary, he received a call from the Nagytarcsa Congregation, where he spent 16 years. Between 1981 and 1984, he worked as a youth counselor at the World Service Department of the Lutheran World Federation, Geneva, Switzerland. In Hungary he was Pastor-Director of the Home of the Pastors' Widows in Kistarcsa. In 1992 he started the Rainbow Kindergarten in Nagytarcsa, and became the editor of the Lutheran Radio Mission Program. Soon, he organized and directed the Lutheran Radio Mission Center in Cinkota. In 1997 he was appointed leader of the National Mission Center. His main task was to organize mission events in local congregations. He was also the President of the National Mission Committee. In 2003, he was elected Bishop of the Lutheran Church's South District. He authored the *Life Sign (Életjel)* textbook for confirmation classes in

1985 and, since 1996 he has edited the *Mission Magazine*. – B: 1050, T: 7103.

**Gander Airport, Hungarian Mementos**, Newfoundland, Canada – A Museum was established to commemorate pioneers of long-distance flights in the lobby of the local civilian airport. The Hungarian part includes a souvenir-tablet of the flight of György (George) Endresz and Sándor (Alexander) Magyar on 16 June 1931, with the airplane named “*Justice for Hungary*”. They flew from Newfoundland to Bicske, Hungary. With this historic flight, they wanted to call international attention to the gross injustice Hungary suffered with the Versailles-Trianon Dictated Peace Treaty on 4 June 1920. – B: 1299, 1020, T: 7665.→**Justice for Hungary; Justice for Hungary Ocean Flight; Endresz, György; Trianon Peace Treaty.**

**Ganz, Ábrahám** (Unter-Embrach, Switzerland, 6 November 1814 - Pest, Hungary, 15 December 1867) – Pioneer of Hungarian heavy industry. He settled in Hungary in 1842, and worked in the Joseph Mill (*József Műmalom*) as a teemer. In 1844, he opened a shop in Buda and manufactured cast iron implements for household use. During the 1848-1849 Hungarian War of Independence, he delivered cannons and cannon shells for the Hungarian army. When the Freedom Fight failed, he was convicted for supplying the army; but his sentence was suspended. In 1854 he experimented with the chill casting of railway car wheels. In 1855 he patented his method and began the large scale manufacturing of chilled-cast railway wheels. This product was exported to several central European countries and helped the expansion of his factory. Together with his excellent co-workers, he expanded the factory with new products, eventually known all over Europe and the world. The Ganz Factory manufactured the underframes of the old streetcars of Toronto, and the turbines of the Niagara Falls’ Power Plant. This factory enabled the development and manufacturing of many significant Hungarian inventions. In 1863, he became an honorary citizen of Pest. Over-exertion damaged his nervous system and he committed suicide. Out of his modest shop developed the large Ganz manufacturing companies of his days. – B: 0883, 1031, T: 7662.→**Freedom Fight of 1848-1849.**

**Ganz-Jendrassik Engine** – György (George) Jendrassik made several innovations with respect to the high-revolution Diesel engine in the late 1920s. Finally, he registered a worldwide patent of the pre-combustion chambered Ganz-Jendrassik-Diesel engine. There was wide interest in this engine and it spread quickly. – B: 1126, 1020, T: 7662.→**Jendrassik, György.**

**Gara, László** (Ladislav) (Budapest, 17 July 1904 - Paris, France, 9 May 1966) – Writer, journalist, literary translator. After graduating from high school, he studied stage management with Arthur Bárdos at the Inner City Theater (*Belvárosi Színház*). In 1924, he went to Paris as a sports reporter for the Summer Olympic Games. After the Games, he stayed in Paris and enrolled at Sorbonne’s Faculty of Education. He worked for the weekly, *Lu and Vu*. He started to translate Hungarian poems into French. He was a contributor to the *L’Anthologie Pogány-Geo Charles* (1927). He edited a French language anthology of modern Hungarian prose. He left Paris after the German occupation and moved to the countryside, where he wrote his only novel, *Les Juifs de Saint-Boniface*. It is about life in a Jewish internment camp. In 1948 he became a correspondent for the *Hungarian News Agency* (*Magyar Távirati Iroda – MTI*) in Paris. In 1952, he returned to Budapest and worked for Hungarian News Agency (*Magyar*

*Távirati Iroda – MTI*). In 1956, he was again in Paris and translated Hungarian literary works into French. For this purpose, he established a group of French co-workers. They translated the avant-garde Hungarian poetry of Attila József, Gyula (Julius) Illyés and Lajos (Louis) Kassák. He published a treatise on Endre (Andrew) Ady's poetry. His chief work is the *Anthologie de la poesie hongroise de XII. siecle a nos jours (An Anthology of Hungarian Poetry from the 12th Century to the Present)* (1962). With these works, he did a valuable service in propagating modern Hungarian literature in the French language. – B: 0883, 1257, T: 7663.→**Bárdos, Artur; József, Attila; Illyés, Gyula; Kassák, Lajos; Ady, Endre.**

**Garabonciás** – A figure in Hungarian folk beliefs and folklore, belonging amongst persons of supernatural powers: a magician and storm maker. Its other Hungarian appellations are: *Garboncsás, Gorboncses, Barboncás* and *Verboncás*. The origin of the word *garabonciás* is uncertain, probably of Greek origin, which came through Latin and Italian mediation into Hungarian, where it is the continuation of the original meaning “prophesying, necromancy” (Latin: *necromantia*). According to Professor Dezső (Desider) Pais, the origin of the word is from the Italian word *gramanzi* (oracle, seer). Its medieval meanings are “vicious”, “cruel”, and “evil”. Connected to it are such figures as Vagabond Sorcerer and Wandering Wizard Student. The beliefs attached to it include the belief that, similarly to the shaman (*táltos*), he is born with one tooth, or with several teeth. Wearing a ragged gown, holding a book, he knocks on people's doors: asks for milk or an egg; he does not need much, but it must not be given by measure. If it is denied to him, as a punishment he causes a rainstorm or hailstorm or, from his gown, he “reads out, conjures up” a dragon and on it he rides above the village. The long tail of the dragon sweeps down the roofs of houses and tears up the trees by the roots. The best defense against the wandering wizard student is to toll the church bells. He completes 13 school programs and acquires a magic book; with its help he can raise himself into the air. Our idea of a wandering wizard student (*garabonciás*) is composed of three layers: a universal heathen European, a medieval Christian, and a heathen Hungarian concept. The first may be connected with the Germanic *Wilder Jäger (Storm demon)*, the second with the medieval wandering student (*vagana, goliard*), while the last one appears as a magician having a pact with the devil. Some features of these foreign ideas tend to merge with the Hungarian shaman belief. There is a Garabonciás Ensemble and Foundation in Budapest. There is a small village Garabonc, with some 800 inhabitants, at the Little Balaton Lake. B: 1122, 1134, T: 7456.→**Táltos; Shaman; Witch; Pais, Dezső.**

**Garai, Gábor** (Gabriel) (Ruprecht) (Budapest, 27 January 1929 - Budapest, 8 September 1987) – Writer, critic, literary translator. At the beginning he was interested in painting and novel writing, but later turned to poetry, under the influence of the great lyric poet Endre Ady. His first poem, the *Transient (Átutazó)*, was published in the weekly magazine the *New Times (Új Idők)*. In the same year, he graduated from high school. His first volume of poetry, the *Confession at Dawn (Hajnali vallomás)*, was published in 1953. He spent some time at the Faculty of Economics of the University of Budapest. Between 1950 and 1958, he was a financial clerk at the Hungarian National Railways. After serving two years in the Army, he enrolled at the Faculty of Arts of the University of Budapest. After a tragedy hit his family, he wrote a collection of essays about their difficulties. From 1958 until 1960, he was English-German Editor for the Europa Publishing Co. He worked for the literary review, *Life and Literature (Élet és Irodalom)*

then, as secretary for the Writers Union, later as editor of the magazine, *Horizon (Látóhatár)*. His volumes of poetry appeared in *Crowded Days (Zsúfolt napok)* (1956), followed by *A Song for Healing (Ének a gyógyulásért)* (1958). Later, he used surrealist elements, a period well demonstrated in the *Fire Dance (Tűztánc)* cycle. In 1961, he traveled in Italy and a new chapter began in his writings. He synthesized his philosophy and his outlook on life in his poetry. His translations were published in a volume of *Free Harbor (Szabad kikötő)* (1961). Some of his volumes are: *Motherland (Anyaföld)* (1968); *Season of Elegies (Elégiák évada)* (1974); *Indian Summer (Vénasszonyok nyara)* (1981) and *The Knight of the Lady (A lady lovagja)* (1986). He was a recipient of the Attila József Prize (1959, 1963, 1979) and the Kossuth Prize in 1965. – B: 0883, 1257, T: 7663. →**Ady, Endre.**

**Garam-Szent-Benedek Abbey** - Benedictine Abbey in former Upper Hungary, *Felvidék* (now Hornsky Benadik, Slovakia). King Géza I of Hungary founded it in 1075, confirmed by subsequent kings, and sanctioned by Pope John XXII in 1328. The people of Körmöc, Zólyom and Újbánya destroyed the Abbey in a revolt; but in 1405 it was rebuilt. The Hussites occupied it and burnt it down on 29 July 1436. In 1451, János Hunyadi returned it to the original owners. After 1526, it fell under Turkish authority. After János (John) Turi recaptured it, King Miksa (Maximilian) II donated the Abbey with all the rights to the Archbishopric of Esztergom in 1565. In 1599, the Turks razed it again. It was rebuilt; but fire destroyed it in 1881. Cardinal János (John) Simor, Archbishop of Eszterom, rebuilt and extended it, hence its present form. The Church was built in the style of the *Nagyboldogasszony* Church of the Buda Castle. The Abbey was a *Locus authenticus (hiteles hely)*, a place of authorization for centuries. Tamás (Thomas) Kolozsvári painted the Abbey's famous double altar in 1427. In the middle of the painting is the scene of Christ on the cross, but without the two thieves. In front of Mary is the donor and to the right of the cross is the Hungarian King Zsigmond (Sigismund), leading the soldiers. On the sides of the altar there are scenes from the Passion and, on the outside panels, St Benedek (Benedict), St Miklós (Nicholas) and St Egyed (Giles) are painted. There is a famous silver chalice named after its place of origin. It is covered with gold, made around 1580 by a Hungarian goldsmith. It is kept in the treasury of the Esztergom Cathedral. Now the Abbey is a social service home. – B: 0942, 1078, T: 7669. →**Hunyadi, János; Kolozsvári, Tamás; Simor, János.**

**Garami, Arthur** (Derecske, Hungary, 20 Nov 1921 - Montreal, 12 Jan 1979) – Violinist, teacher. He graduated from the Ferenc (Franz) Liszt Academy of Music, Budapest in 1942; studied violin (1935-1942) with Géza de Kresz, chamber music (1937-1942) with Imre (Emeric) Waldbauer and Leo Weiner, and Hungarian folk music (1940-1941) with Zoltán Kodály. In 1940 he won second prize at the Hubay National Competition. He taught at the National Conservatory of Music in Budapest, and was an assistant concertmaster of the Hungarian Radio Orchestra (1945-1946). Between 1946 and 1949 he lived in Paris, frequently played in recital or as soloist on French radio, and gave the Paris premiere of William Walton's Violin Concerto. He was a 2nd Prize winner in the 1946 Jacques Thibaud Competition, and at the 1947 Geneva International Competition for Musical Performers; also appeared in concert in London and on the BBC. He emigrated to Canada at the invitation of the Hamilton Conservatory of Music. Garami

directed the Conservatory's string department (1949-1954). He broadcast frequently for the CBC on radio and on TV, and made his Canadian concert debut 7 March 1951 with the Hamilton Philharmonic Orchestra in Tchaikovsky's Violin Concerto. He appeared with the major Canadian orchestras and made numerous tours (1951-1954) in the USA. Garami moved in 1954 to Montreal, where he was a soloist and member (1954-1965) of the Canadian Broadcasting Corporation's Little Symphonies' Orchestra; concertmaster (1956-1959) of the McGill Chamber Orchestra, and an assistant concertmaster (1960-1965) of the Montreal Symphony Orchestra. He taught at McGill University in Montreal (1955-1964), at the École Vincent-d'Indy, (1962-1979). In May 1964, with his regular accompanist Charles Reiner, he presented Beethoven's 10 sonatas for violin and piano at Carnegie Recital Hall, New York. Garami was a founding member and first violin of the Classical Quartet of Montreal (1968-1976). In Paris in 1947, Garami made several recordings for the Pacific label, playing Bartók's *Rumanian Dances*, Dinicu-Heifetz' *Hora staccato*, Dohnányi's *Ruralia Hungarica*, and several other virtuoso pieces. Garami owned a Guarnerius violin made in Mantua in 1714, which formerly belonged to violinist Géza de Kresz. He committed suicide. The whereabouts of this famous violin is unknown. His collection of scores and books is held at the CMM. – B&T: 7617.→**Kresz, de Géza; Kodály, Zoltán; Weiner Leó.**

**Garas, Dezső** (Desider) (Grósz) (Budapest, 9 December 1943 - Budapest, 30 December 2011) – Actor. His higher studies were at the Academy of Dramatic Art, Budapest (1953-1957). From 1957, he worked at the National Theater (*Nemzeti Színház*), Budapest. From 1967, he was with the Madách Theater (*Madách Színház*). He joined the 25th Theater (*25. Színház*) in 1956 and, from 1977 to 1980, he worked at the Mafilm Studio; then for 10 years he was a member of the Folk Theater (*Népszínház*), Budapest. From 1990-1993, he was at the Szigligeti Theater (*Szigligeti Színház*), Szolnok, and for two years he was with the Artist Theater (*Művész Színház*). From 1973, he was a freelance actor. Between 1999 and 2002, he was with the József Katona Theater (*Katona József Színház*), Budapest, and in 2003, he worked at the Comedy Theater (*Vígszínház*). Since 2004 he is a member of the National Theater (*Nemzeti Színház*), Budapest. His major stage roles include Cardinal Barbieri in B. Brecht's *Life of Galileo* (*Leben des Galilei – Galilei élete*); Peachum in Brecht-Weill's *Threepenny Opera* (*Háromgarasos opera*); Dauphin in Shaw's *Saint Joan* (*Szent Johanna*); Marmeladov in Dostojevskij's *Crime and Punishment* (*Bűn és bűnhődés*); Shylock in Shakespeare's *The Merchant of Venice* (*A velencei kalmár*), and Lucifer in Madách's *The Tragedy of Man* (*Az ember tragédiája*). His feature films and TV productions include *The Naked Diplomat* (*A meztelen diplomata*); *Jaguár*; *A Crazy Night* (*Egy örült éjszaka*); *Abigél*; *Lucky Daniel* (*Szerencsés Dániel*); *Miss Arizona*, and *Neighbors* (*Szomszédok*). His stage manager works include Kálmán's *The Gypsy Princess* (*Csárdáskirálynő*), and Schwajda's *Wonder* (*Csoda*). He is a popular and one of the best Hungarian character actors. He is a recipient of the Mari Jászai Prize (1963, 1965), the Merited Artist and Outstanding Artist titles (1978, 1983), the Kossuth Prize (1988), and he was the Actor of the Nation (2000). – B: 0874, 1445, 1031, T: 7103.

**Garay, János** (John) (Szekszárd, 10 October 1812 - Pest, 5 November 1853) – Epic poet, lyricist. At first, he was a medical student in Pest; later he turned to philosophy. He became vice-editor of the *Honművész* in 1833. He published his heroic and nationalistic poems and prose articles from 1834. He was one of the founders of the Dramatic Society

of Pest. In 1838, he was Editor of the *Messenger (Hirnök)*, Pozsony (now Bratislava, Slovakia); then moved to Pest, where he continued his newspaper work. In his poem, the *Veteran (Obsitos)*, published in 1843, the swashbuckler veteran inspired Zoltán Kodály to compose an opera about the legendary *János Hány*. Garay was one of the most beloved lyrical poets of the 19th century. For a time, he was Editor of Kossuth's *Newsletter (Hírlap)*. Through his poetry he supported the events of the War of Independence (1848-1849) and, except for Sándor (Alexander) Petőfi, he was its most important lyricist. In spite of his failing health, he even became a member of the National Guard, but was unable to actively participate in the fighting. Because of his poetry he was court-martialed, following the surrender of the Hungarian Army at Világos, but was set free, although he lost his teaching position. In spite of his blindness and poverty, he worked until his death with the help of his wife. Ferenc (Franz) Liszt, Ferenc (Francis) Erkel and Zoltán Kodály, among others, wrote musical scores for his words. – B: 0883, 1257, T: 3240. → **Erélyi, János; Petőfi, Sándor; Liszt, Ferenc; Erkel, Ferenc; Kodály Zoltán.**

**Garázda Clan** – The town of Garázda (now Gorazde, Bosnia), on the banks of the River Drina, the ancient seat of the family of Bosnian descent, still exists. From this family descended the families Szilágyi de Horogszeg and the Counts Teleki. In the 15th century, two of its members rose to prominence: Miklós (Nicholas) Garázda and László (Ladislav) Szilágyi distinguished themselves in the wars against the Turks with their heroism. Later, they valiantly defended the Bosnian castle of Zrebernik for four years. King Zsigmond (Sigismund of Luxembourg) (1387-1437) rewarded their services with substantial grants of land. Two sons of László Szilágyi gave their lives in the Turkish wars. Their sister was Erzsébet (Elizabeth) Szilágyi, wife of János Hunyadi and mother of King Mátyás I (Matthias Corvinus) (1443-1490). The family produced three renowned poets; one of them was Csinge, or János (John) Csezmicei, Bishop of Pécs, who, under the pseudonym of Janus Pannonius, became a famous poet and humanist. After the 16th century, the various branches began to call themselves after their respective estates, dropping the name Garázda. One of these families rose to prominence under the name Teleki. – B: 1078, 1020, T: 7617. → **Teleki Family; Zsigmond, King; Hunyadi, János; Szilágyi, Erzsébet; Mátyás I, King (Mathias Corvinus); Janus Pannonius.**

**Gárdonyi, Géza** (Agárdpuszta 3 August 1863 - Eger 30 October 1922) – Writer, poet. He attended school in Sárospatak and Pest then, in 1882, he obtained his teacher's qualification in Eger. He was a teacher in Karád, Devecser, Sárvár and Dabrony. In 1885, he was a correspondent to several newspapers in Győr. Papers in Budapest published his poems and novels. After 1892, he also wrote music-related articles and an operetta libretto. His writings about the peasants, the *Letters of Gabriel Göre (Göre Gábor levelei)*, made him well known. From 1897, he went into seclusion in Eger. His stage play, *The Wine (A bor)*, was a huge success in 1901. Some of his main works are: *My Village (Az én falum)* (1898); *Eclipse of the Crescent Moon (Egri csillagok)*, youth novel (1901) (in other English translation *Eclipse of the Half Crescent*) is about the heroic defense of the Fort of Eger against the Turks, which was published the same year and made him immortal. His other works include a novel about Attila, *The Invisible Man (A láthatatlan ember)* is about Attila (1902); *Abel and Esther (Ábel és Eszter)* (1907), and *God's Captives (Isten rabjai)* about the monastic life in medieval Hungary. He was put to rest in the Fort of Eger, and his house in Eger is a Museum. – B: 0883, 1153, 1257, T: 3240.

**Gárdonyi, Zoltán** (Budapest 25 April 1906 - Herford, Germany, 27 June 1986) – Composer, music educator, music historian. Following his studies with Zoltán Kodály in Budapest, and with Paul Hindemith in Berlin, he taught at the Franz Liszt Academy of Music, Budapest, where he chaired the Department of Protestant Church Music until it was terminated in 1949. He was Professor of Music and Hymnology at the Reformed Theological Academy of Budapest, from 1949 to 1953. He moved to Germany in 1972. His legacy of nearly 400 compositions includes works for organ, symphony and chamber ensembles. Some of his compositions for chamber ensemble are three *String Quartets*; *Fantasy for Violin and Organ*; *Three Images of Holy Week* for Organ and Strings; *Sonatas for Piano, Violin, Viola, Violoncello, Double Bass, Flute and Tuba*. For organ: *Three Sonatas*; *Psalm Fantasy*; *Partita Veni Creator*; *Christmas Cradle Song*; *Chorale Preludes*, and *Bi-partita for Two Organs*. Numerous *choral works*, a cappella (e.g. *Psalm 23*, *Psalm 46*, *Psalm 96*) and with instruments (e.g. *Psalm 45*, *Psalm 84* and *Psalm 90*); songs: *Five Songs for Soprano and Piano* (text by R. M. Rilke). He is renowned for significant research on J. S. Bach and Ferenc (Franz) Liszt, and is regarded as one of the outstanding figures of 20th century Protestant Church music in Europe. – B: 0905, T: 0905, 7103.→**Kodály, Zoltán; Liszt, Ferenc, Gárdonyi, Zsolt.**

**Gárdonyi, Zsolt** (Budapest, 21 March 1946 - ) – Composer, concert organist, music theorist. He is the son of the distinguished Zoltán Gárdonyi. Subsequent to his musical education in Budapest, as well as in various music centers of Europe, he has been living in Germany since 1968. After winning the Award for Young Composers in 1979, he gained widespread recognition as a composer and concert organist. He has been Professor of Music Theory at the State Conservatory of Würzburg, Bavaria, since 1980. A selection of his compositions for organ include: *Preludio con Fuga*; *Mozart Changes*; *Ten Chorale Improvisations*; *Five Chorale Preludes* based on the Geneva Psalte;, *Grand Choeur*; *Hommage a Marcel Dupré*. Chamber Music: *Divertimento for Woodwind Quintet Suite for Clarinet and Piano*; *Rhapsody for Trombone and Organ*; *Variations for Violoncello and Organ*; *Sonata da chiesa for Trumpet, Trombone and Organ*; *Duplum for Oboe and Organ*. Vocal Music: *Magnificat for Mezzosoprano and Organ* (or Strings); *Hymn of Thanksgiving* for Choir and Organ, and *Psalm 8 for Choir and Organ*. He is known internationally as a result of his numerous recordings, frequent guest lectures, concert tours and publications on music theory. He received an Honorary Doctorate from the Reformed Theological Academy, Debrecen. – B: 0905, T: 0905, 7103.→**Gárdonyi, Zoltán.**

**Gárdos Effect** – The process of transporting ions of red blood cells via the “Gardos Channel” named after Professor György (George) Gárdos. All red cells contain Gardos Channel proteins in their membranes. – B: 1300, 1020, T: 7660.

**Garibaldi Guard** – Original name of the 39th volunteer infantry regiment of New York in the Civil War. It was recruited mainly from Hungarian nationals. The chief organizer was Antal (Anthony) Wékely, a Hungarian officer of the National Guards in the War of Independence (1848-1849). He was the first commander of the regiment. The regiment’s first engagement was on 23 May 1861, and their fighting record was excellent. The most distinguished Hungarian officers were Major Hugo Hellebrandt, Viktor Sándory, Ferenc (Francis) Takács, Lajos (Louis) Tenner, Antal (Anthony) Utassy and Ede (Edward)

Zerdahelyi, captains. Commander Wékely was killed in action in the battle of Winchester, 19 September 1864. Frigyes György (Frederic George) Utassy became the next commander of the regiment and was also killed in the battle of Bull Run. – B: 1143, 1020, T: 3233.

**Gas and Petrol Hammer** – The introduction of the gas or petrol hammers replaced the steam hammers in small industrial plants with significant energy savings. The operation of the early hammers required the constant input of human labor. Donát Bánki and János (John) Csonka designed a new system, where the expanding gases in the cylinder of a continuously operating internal combustion engine provided the power for the operation of the hammer. This system could operate other machinery besides the hammer at the same time. Only the striking power of the hammer required manual control. – B: 1126, 1020, T: 7662.→**Bánki, Donát; Csonka, János.**

**Gas Insulated Glass Ignition Plug** – A new ignition plug, invented by István (Stephen) Szilágyi around 1938, was a novel solution. Instead of the conventional ceramic insulation that was relatively expensive and difficult to manufacture, he surrounded the central metal electrode with a heat resistant glass tube. The compressed gas and air mixture, penetrating between the electrode and the glass tube, provided better insulation than any other material. This new plug gave stronger sparks, more efficient combustion and improved performance. This opened the way for further development of the Otto engine. – B: 1230, 1020, T: 7662.

**Gas Lighting** – Public gas lighting was installed for the first time in the world in Tata, County Komárom, Hungary, on 24 July 1897. Acetylene gas was used for the lighting of streets and squares. – B: 1230, 1020, T: 7662.

**Gas Mask** – A device used in the military by firefighters and by some industries to prevent the inhalation of poisonous gases. A Hungarian guard leader invented the predecessor of the gas mask in 1830. He called it the “self-saving device”. It was made of a goatskin mask and a container of compressed air strapped to the soldier’s back and a flexible tube connecting the air supply to the mask. The air flew through a whistle indicating the rate of the use of the air. – B: 1138, 1126, T: 7662.

**Gas Turbine** – A complex machinery for the use of the kinetic and thermal energies of hot, combustion gases. It is composed of a continuous output compressor, a combustion chamber and a turbine mechanism with stationary and rotating plates. It is fueled with natural gas or atomized heating, or diesel oil. Combined with an electric starter motor, it is an operational engine. Aladár Zsélyi (1883-1914) was a pioneering researcher of the gas turbine theory. György (George) Jendrassik was the leading specialist of the gas turbine technology. His 100 horsepower gas turbine was patented in 1930 and begun operation on 2 October 1938, after further development. It created a great sensation throughout the world. Subsequently Jendrassik filed several other worldwide patents. – B: 1230, 1126, 1153, T: 7662.→**Jendrassik, György; Zsélyi, Aladár.**

**Gas Turbine Jet Propulsion Engine** – A reaction engine achieving propulsion by a high velocity gas jet, produced by a gas turbine. It is used mainly for the propulsion of aircrafts. The energy used by the engine gives the high acceleration to the gases leaving the turbine. The thrust of the engine is equal to the kinetic energy of the backward streaming gases. The engine may have one or two compressors in a row. Where two

compressors are used, the air compressed by the first compressor is further compressed in the second compressor, before entering the combustion chamber. The higher gas density proportionally increases the thrust of the engine. The advantage of this is the great thrust in relation to its weight. Albert Fonó worked out the fundamentals of this engine and patented it in Germany in 1928. – B: 1138, 1126, 1153, T: 7662. → **Fonó, Albert.**

**Gasoline Engine** – János (John) Csonka (1852 - 1939), the founder of the Hungarian auto industry, conducted experiments for constructing a gasoline engine. This drew the attention of the then university student, Donát Bánki (1859-1922), who joined Csonka as an associate. They constructed the first Hungarian internal combustion engine, a gas-motor, in 1882. With the experiments of their engines, they were staking out new directions, totally independent from foreign designers, who were still struggling with concepts borrowed from the steam engine. In his essay of 1892, *The Theory of Gas Motors*, Donát Bánki established some of the basic laws of the theory of internal combustion engines. The contemporary technology of this area was not yet clearly established. Soon thereafter, he constructed the high-compression engine named after him, the “Bánki motor”, prior to the Diesel engine. In the same technical field, István (Stephen) Zachariás (1884-1943) invented an internal combustion gasoline engine, without compression space. Its other advantage was its production that was compatible with valve-operated motors. Repairs were simpler, construction was easier and the engine had a longer life. – B: 1226, 7662. → **Bánki, Donát; Csonka, János.**

**Gáspár, Béla** (Oraviczabánya, now Oravița, Romania, 1898 - Beverly Hills, CA, USA, 7 January 1973) – Chemist. He studied Medicine and Pharmacology in Budapest; but color photography was his real interest. He lived in Germany and in Belgium from 1930 to 1939, then emigrated to the United States. In the early 1930s, he received a US Patent for his dye-bleach color-printing system. In 1934, he patented a silver dye-bleach motion picture process. The azochrome silver dye-bleach material was also called the “Gáspár color”. Ciba AG in Switzerland perfected this process in cooperation with Ilford Ltd. in 1962, and it was marketed as Ilford Cibachrome. In 1970-1971, he developed the widely adopted Color Proofing Material (CPM). – B: 1123, 1020, T: 7662.

**Gáspár, Endre** (Andrew) (Debrecen, 22 January 1879 - Budapest, 15 April 1955) – Writer, journalist, literary translator. He studied at the Faculty of Law and at the Faculty of Arts at the University of Debrecen. After graduation, he started to work at a daily *Newspaper (Hírlap)* in Debrecen. After World War I, during the Hungarian Council (Soviet) Republic, he edited the *People's Will (Népakarat)* daily. In 1919, he moved to Pozsony (now Bratislava, Slovakia). From there, he emigrated to Austria and settled in Vienna, where, he became a translator at the *Theater an der Wien*. After the *Anschluss* in 1938, he was arrested but later released, and he moved to Budapest. In 1944, he was deported to a concentration camp. When the War ended, he resumed his journalistic work. He translated more than 500 Hungarian novels into German, Spanish, English and other languages. He translated the works of Marx, Engels, Whitman, Ovid, Heine, Joyce, Thomas Mann, Pushkin, Lope de Vega, Calderon, Schiller and Shakespeare into Hungarian. His work *Selected Translations (Válogatott műfordítások)* was published in 1956. He received the Attila József Prize in 1953. – B: 0883, 1257, T: 7663.

**Gáspár, Ferenc** (Francis) (Szilágysomlyó, now Șimleu Silvaniei, Romania, 9 June 1861 - Budapest, 12 July 1923) – Physician, travel book writer. At first, he studied at the

Unitarian College, Kolozsvár, (now Cluj-Napoca, Romania), and later, continued his education in Vienna, where he obtained his Medical Degree. In 1885, he joined the naval force and was at sea for six years. In 1885-1886, during the long journeys on board of the “Frundsberg” steam corvette, he visited East Africa, India and East Asia, where he studied the tropical diseases. In 1895 he retired from the Navy, and continued his journeys on ocean liners. In 1907, he settled down in Budapest and became a civil servant at the Ministry of Commerce. He was later the Commissioner of the Franz Joseph Commerce Hospital. Dr. Gáspár was also the author of numerous geographic and ethnographic articles and travel books. – B: 0883, 1306, T: 7660.

**Gáthy, István** (Stephen) (Huszt, now Khust, Ukraine, June 1780 - Tata, 24 September 1859) – Engineer of hydraulics, writer on technical and musical subjects. He studied at Máramarossziget and Debrecen, later, between 1800 and 1803, at Ó-Szöny, completed courses in Law; then he went to Pest University to complete courses in Engineering and Law. At that time, his work, *The Piano School (Zongoraiskola)*, was the first of its kind in Hungarian. He became the engineer of the Esterházy estates at Pápa, and was engaged at the drainage of the local swamps. He also created plans for the controlling of the Rába, Rábca and Marcal Rivers. He became Chief Forester, later Chief Engineer of the Tata estates. He constructed the very precise angular deviation mirror, displacing the universally used surveying table instrument. He wrote many articles for hydraulics, forestry and agricultural publications. – B: 0942, 0883, T: 7675.

**Gáti, Béla** (Ács, 16 September 1873 - USA?) – Mechanical engineer, technical writer. He was Head of the Post Office Research Station between 1903 and 1918. He was an internationally recognized expert of electro-technique, especially in the field of weak current research. The introduction of the barretter bolometer, of his own design, for high frequency measurement, brought him international fame. He introduced the precise measurement of cable insulation resistance with working current. He made pioneering contributions with the development of methods for rapid telegraphing, with the use of telephone frequencies with the use of strong-current microphones, telephone relay, long distance telephoning and with the photographing of the sound frequencies of the ABC. He contributed to numerous international technical journals. – B: 0883, 1160, T: 7662.

**Gáti István** (Stephen) (Mánd, 8 April 1749 - Szatmárnémeti, now Satu Mare, Romania, 17 February 1843) – Minister of the Reformed Church, teacher, linguist. He attended universities in foreign countries. His first position as pastor was in Dabolc (now Dobolt, Romania) in 1778. Then he served the community in Huszt (now Khust, Ukraine) (1779). Later, he served in Máramarossziget (now Sighetul Marmatiei, Romania) (1787). He last served in Szatmár, where he had a teaching job as well, until his retirement in 1831. He worked hard to propagate the Hungarian literary language. He wrote a book about natural sciences and held modern views on many topics. He worked out the first Hungarian shorthand system. His chief writings are: *The History of Nature (Természet története)* (1792); *The First Book of Stenography (A stenographia első könyve)* (1820), and *Meditation over Hungarian Dialect, Lexicon and Spelling (Elmélkedés a magyar dialektusról, lexiconról és helyesírásról)* (1821). – B: 0883, 1257, T: 7663.

**Gáti, Károly** (Charles Gati) (Budapest, 14 September 1934 -) – Political scientist. Between 1953 and 1955, he was a junior reporter for the daily, *Hungarian Nation (Magyar Nemzet)*; since 1956, he has lived in the United States; between 1963 and 1995,

he was with the Schenectady Union College; from 1972, he was a lecturer at Columbia University and co-researcher of its Research Institute. Between 1993 and 1994, he was Chief Advisor to the Ministry of External Affairs of the Government of the USA. Since 1994, he has been first Vice-President of Interinvest, an international investment company. He is Professor of European Studies and Fellow of Foreign Policy Research Institute of the Johns Hopkins University, Washington, D.C. His area of research is the history and politics of East-Central Europe. His major works include: *The Populist Current in Hungarian Politics 1935-1944* (1965); *Containment and the Cold War* (ed.) (1974); *The International Politics of Eastern Europe* (1976); *Eastern Europe* (co-editor) (1978); *Blue Collar Workers in Eastern Europe* (co-editor) (1981); *Hungary and the Soviet Bloc* (1986); *Hungary in the Shadow of the Kremlin (Magyarország a Kreml árnyékában)* (1990), the *Bloc Went up in Smoke (Füstbe ment tömb)* (1991), and the *Vesztett illúziók... (Lost Illusions...)*, about the 1956 Revolution, in a number of translations) (2006). He received the Marshall Shulman Prize (1987), the Middle Cross of Honor of the Republic of Hungary (2005) and a Memorial Plaque (2006). – B: 0874, T: 7684.

**Gaudi-Nagy, Tamás** (Thomas) (Budapest, 1971 - ) – Attorney, specializing in International Law, politician. He is a descendant of a Szekler-Magyar *Csángó* family from the village-group of Hétfalu (*Seven Villages*), who, after the dictated Peace Treaty of Trianon (1920) had to leave County Brassó, which was annexed to Romania, to settle in Truncated Hungary, what remained of the Historic Kingdom of Hungary, in 1920. His grandfather was a judge. Gaudi-Nagy started his legal studies in 1990, in the Department of Jurisprudence and Political Science of the University of Szeged, and he obtained his Doctorate in Law from the University of Budapest in 1995. From 1998, he worked as an attorney and, from 2001, as a specialist in European Law. He initiated the National Legal Aid Foundation and Service, and, since 2005, he has been its Executive Director. His name became widely known with his courageous and successful legal defense of the mishandled, wounded and detained victims of police attacks. He is a founding member and Honorary President (1998-2007: President) of the Hungarian Wonderous Stag (*Csodaszarvas*) Society, which helps young people living anywhere within the Carpathian Basin. He was also member of the Presidium of the World Federation of Hungarians between 2002 and 2006. His name is linked to the fact that to this day Hungarians living in the former southern territory of the Hungarian Kingdom, now annexed to Serbia, still retained their Hungarian citizenship, since the Serbian authorities neglected to revoke it. In the 2010 national elections, Gaudi-Nagy was in fifth place of the national list, representing the Movement for a Better Hungary, known as the *Jobbik* Party, and as a non-party member, he became a candidate for parliamentary membership and was nominated for the position of Minister of Justice. As a Member of the Parliament, he plays an eminent role in the Parliament of 2010. – B: 1031, T: 7456. → **Morvai, Krisztina; Vona, Gábor, Political Parties in Hungary.**

**Gaynor, Mitzi** (von Gerber) (Chicago, Ill., 9 April 1931 - ) – Actress, singer, dancer, a descendant of a Hungarian family. She made her debut as a child, and by age 12, she had joined the dancing chorus of the Los Angeles Civic Light Opera. 20th Century Fox signed her up in 1950. Feature films to her credit include *Golden Girl* (1951); *Bloodhounds of Broadway* (1952), and *There is no Business like Show Business* (1954). After she left Fox, she married talent agent Jack Bean, who put her on the live stage,

where she co-starred with Bing Crosby and Donald O'Connor in *Anything Goes* (1956); with George Gobel and David Niven in *The Birds and the Bees* (1956), and with Frank Sinatra in *The Joker is Wild* (1957). She did her best work while on loan to Metro-Goldwin-Mayer for George Cukor's *Les Girls* (1957). In it, she shared star billing with Gene Kelly, Kay Kendall and Taina Elg. In 1957, she played a role in the film version of Rodgers and Hammerstein's *South Pacific* (1958). There are more than 30 feature films to her credit. She had a successful series of TV special: "Mitzi..." She continued her acting career through the 1980s and, for several years she headlined a top-rated annual TV special. – B: 1279, 1031, T: 1279, 7103.

**Gazda, István** (Stephen) (Budapest, 2 December 1948 - ) – Science historian. His higher studies were at the Science and Philosophy Departments of the University of Budapest (1967-1973). From 1973 to 1983, he was an adjunct professor at the Budapest Polytechnic. Simultaneously, he was a column editor until 1985 at the daily, *Hungarian Nation* (*Magyar Nemzet*). Between 1985 and 1988, he was a column editor for the periodical, *Science* (*Tudomány*). From 1991, he was the chief contributor of the Budapest Polytechnic. Since 1994, he has been Director at the Institute of Hungarian History of Science. He was a series editor of the *Hungarian Science Magazine* (*Magyar Tudománytár*). His field of research is contemporary Hungarian history of science. He is a recipient of the Géza Zempléni Prize. – B: 1257, T: 7103.

**Gazda, József** (Joseph) (Kézdivásárhely, now Tirgu Secuiesc, Romania, 8 April 1936 - ) – Teacher, writer, art critic in Transylvania (*Erdély*, now in Romania). He studied at the Székely Mikó College, Sepsiszentgyörgy (now Sfintu Gheorghe, Romania) (1942-1953); read Philology at the University, Kolozsvár (now Cluj-Napoca, Romania), between 1953 and 1958, obtaining his Degree in 1958. He taught Hungarian Literature and other Hungarian-related subjects at Székelykocsárd (now Lunca Muresului, Romania) (1958-1961), at the prestigious Bethlen College of Nagyenyed (now Aiud, Romania) (1961-1964), then at the Körösi Csoma Sándor High School, Kovászna (now Covasna, Romania) (1964-1998) until his retirement. He directed more than 500 stage productions and toured with his student acting troupe throughout the entire Carpathian Basin. He is a prolific writer. His articles and art critiques have been published by Transylvanian and Hungarian newspapers, literary and art periodicals, among them the *Our Age* (*Korunk*); *Our Way* (*Utunk*); *Helikon*; *Credit* (*Hitel*), and *Contemporary* (*Kortárs*). Since 1980, he has been very much interested in sociography and has written political articles since 1990. He published art monographs, art travelogues, sociographies and a textbook. Among his 19 books, some are *Eugene Gyárfás* (*Gyárfás Jenő*) (1969); *Gateways to the East* (*Kelet kapui*), (1985); *So I know, so I say* (*Így tudom, így mondom*) (1980); *Masters of Everything – the Book of Rural Knowledge* (*Mindennek mestere - a falusi tudás könyve*) (1994), and *The Fire in October - 1956 in Hungarian Lives* (*A tűz októberére – 1956 magyar sorsokban*) (2006). He is member of civic and artistic societies. His political activities include the local presidency of the RMDSZ (*Hungarian Democratic Alliance in Romania – Romániai Magyar Demokrata Szövetség*) in Kovászna; he was a former member of the set-up committee of the *Hungarian National Council of Transylvania* (2003-2004), and since 2004, he has been Vice-President of the *Szekler National Council of Transylvania* (*Székely Nemzeti Tanács – SZNT*). Their aim is to achieve territorial autonomy for Szeklerland (*Székelyföld*). He is the founder of the *Sándor Körösi Csoma Cultural Society of Kovászna*. He was a recipient of the Bethlen

Prize (1993) and the Gyula Wlassics Prize (2001). – B: 1036, 1257, T: 7103, 3240.

**Gecse, Endre** (Andrew) (Gálócs, now Haloch, Carpatho-Ukraine, 7 June 1907 - Ungvár, now Uzhhorod, Carpatho-Ukraine, 7 June 1959) – The martyred Minister of the Reformed Church in Carpatho-Ukraine. His secondary education was at the Reformed College, Sárospatak, where he later studied Theology at the Reformed Theological Academy. He was Parish Minister in Gálócs and Huszt (now Khust, Carpatho-Ukraine). On the second anniversary of the 1956 Hungarian Revolution, a flyer appeared in Gálócs, written by some schoolchildren. Nonetheless, Rev. Gecse was accused, although he did not know about the action, for he was in Huszt at the time. The Soviet authorities planned a show trial. However, Rev. Gecse died of the tortures he suffered at the KGB prison. He was the only victim in Carpatho-Ukraine (*Kárpátalja*) following the 1956 Hungarian Revolution and Freedom Fight. He was reburied in Gálócs and a plaque was unveiled on the church-wall on 25 October 1992. In 1993, he was posthumously awarded the 1956 Memorial Medal. – B: 1128, T: 7103.

**Géczi, János** (John) (Monostorpályi 4 May 1954 - ) – Poet, writer. His higher studies in Biology were at the University of Szeged (1973-1978). From 1979 to 2000, he worked as editor at various newspapers, including *Educational Technology*, *School Culture*, and *Echo (Visszhang)*. Since 1996, he has been a professor at the University of Szeged, and has published poems, novels, stories, dramas and critiques. His main works include *Wild Oranges IV (Vadnarancsok IV)* poems (1982); *Confession (Gyónás)* poems (1988); *The Tower (A torony)* short novel (1992); *Essays (Esszék)* (1995), and *Exhibition (Tárlat)*, essay in applied art (2001). He was awarded the Gizella Prize (1992) and the Salvatore Quasimodo Prize (1993). – B: 0874, 1257, T: 7103.

**Gegesi Kiss, Pál** (Paul) (Nagyszőlős, now Vinohragyiv, Carpatho-Ukraine, 2 November 1900 - Budapest, 3 April 1993) – Pediatrician, child psychiatrist. Between 1946 and 1971, he was professor at the University of Budapest. In the last years of his life, he was a scientific consultant to a Children's Clinic. His main field of specialization was infant therapy and clinical child psychology. He carried out research into the effects of diabetes, circulatory disorders and infections causing atrophy in infancy. He also dealt with childhood heart diseases caused by diphtheria and scarlet fever, electrocardiography and brain tumors in children. He was life President of the Hungarian Red Cross. He was awarded the Kossuth Prize in 1953. He was a member of the Hungarian Academy of Sciences (correspondent 1949, regular 1954). Gegesi Kiss was a significant representative of the Hungarian pediatrics.– B: 0879, 1031, T: 7456.

**Gelei, József** (Joseph) (Árkos, now Arcus, Romania, 20 August 1885 - Budapest, 20 May 1952) – Zoologist. He completed his university studies at Kolozsvár (now Cluj-Napoca, Romania) and was an assistant professor in Hungary from 1909. He was conducting zoological experiments between 1912 and 1913, at the Universities of Munich and Würzburg, Germany. He was a university professor at Kolozsvár between 1914 and 1924, later at Szeged and Budapest and, after 1945, again at Szeged. He was also Director of the Biological Institute there and, on two occasions, Rector of the University. He was a recognized international authority in the area of cytology and microtechnics of invertebrates. His publications include *Data on the Biology of the Cell (Adatok a sejt biológiájához)*; *Feinstrukturen einzelliger Organismen (Fine-structure of Single-celled Organism)*; *Ottó Hermann the Researcher (Hermann Ottó az életbúvár)*, and *Biology for*

*Medical Students (Biológia orvostanhallgatóknak)*. Several newly discovered species were named after him. – B: 0883, 1483, T: 7675.

**Geleji Canons** – Canons commissioned by the National Synod of Szatmárnémeti (now Satu Mare, Romania) and put together by István (Stephen) Geleji Katona (1589-1649). These Canons were accepted in Eastern Hungary, Transylvania (*Erdély*, now in Romania), and the regions along the Danube, until the Synod of Debrecen. Some parts of it were later integrated into subsequent church laws. – B: 0942, T: 3240.→**Geleji Katona, István; Debrecen, Synod of.**

**Geleji Katona, István** (Stephen) (Gelej, 1589 - Gyulafehérvár, now Alba Iulia, Romania, 12 December 1649) – Bishop of the Reformed Church, spiritual writer. At age of seven, the Turks abducted him. After a long search his mother found him and paid a ransom for his release. He studied at Sárospatak and, with the help of Reigning Prince Gábor (Gabriel) Bethlen (1613-1629), he studied at the University of Heildelberg, Germany between 1615 and 1617. On his return, he became at first a teacher in Gyulafehérvár. Soon after he was named Pastor to the Court and, in 1633, he was elected 13th Bishop of the Reformed Church in Transylvania (*Erdély*, now in Romania). After the death of Gábor Bethlen, he was also in the confidence of Reigning Prince György (George) Rákóczi I (1630-1648), and with his unique determination, widely popularized and organized the Reformed faith in Transylvania. He was a knowledgeable and willful individual with a domineering personality, who stubbornly and consistently defended and protected the religious faith of his Church against other Christian believers. He consistently fought the Unitarians and the puritanist influence in his own church. In his polemic and dogmatic essays he was against any trends criticizing the orthodox Reformist Church. He published several voluminous collections of sermons in Latin and Hungarian. In 1636, he finished the song collection of the previous Bishop, János (John) Keserű Dajka, the *Old Gradual (Öreg Gradual)* and published it at Gyulafehérvár. He put together and gave his name to the *Canons of Gelej (Geleji Kánonok)*. He was very much interested in the Hungarian language and published a *Hungarian Grammar (Magyar grammatikátska)* in 1645. With his definition of spelling and etymological theories, he was the beginner of Hungarian etymology. As a music expert, he was involved in the correction of choral scores; but was against the use of organ or other instruments, also vocal polyphony in the Church. He negatively influenced the progress of the ecclesiastical music of the Reformed Church for a long time. – B: 1150, 1078, 1153, 1257, T: 3240.→**Geleji Canons; Reformed Church in Hungary; Bethlen, Prince Gábor; Rákóczi I, Prince György; Language reform.**

**Gelence, Church Frescos** (now Ghelinta, Transylvania [*Erdély*], in Romania) – The legend of St László (St Ladislav) is on the north sidewall of the church of Gelence, built in 1245. A series of frescos illustrate the King riding a white horse that represents the power and good nature of mankind, while the Cumanian (*Kun*) leader, representing evil, is riding a black horse. Both riders have a family tree with three major branches and are part of the action. In the end, the Cumanian leader dies and the three branches turn into a bird of death. The belt worn by the King is exactly the same as those worn by the early Magyars. After the restoration of the church dome in 1628, two two-headed birds were found inside on the ceiling, but neither of them was an eagle. – B: 1301,1020, T: 7653.→**László I, King.**

**Gelencsér, Péter** (Tolnataházi, 8 March 1936 - ) – Sculptor. He became interested in art in high school under the influence of the artist, Sándor (Alexander) Tóth. After the 1956 Revolution, he left the country and moved to the Netherlands, where he took up art studies at the Academy of Fine-Art in The Hague, on a Dutch Government scholarship. After two years, Gelencsér won a scholarship to study for 6 months in Paris, and was assigned to the Hungarian-born French modernist sculptor, Pierre Székely. Székely introduced him to abstraction that stimulated new ways of working after his traditional classical education. During 1962, he attended the Academy for Creative Art in The Hague. In 1963 he took up an opportunity to study in Carrara, Italy, where he wanted to further develop his techniques in marble. During his time in Carrara, he won a competition for the commission of a bust of John F. Kennedy in 1964, for Altoona, Pennsylvania. This Kennedy bust established his reputation in the field of memorial sculptures and would lead to further significant commissions of political figures in the 1980s and 1990s. In 1965, he and his wife settled in Cottesloe, Australia, where they still live. Beside his sculptures, he was involved in teaching as well. In 1973 he took an appointment for four years in Malaysia, as a lecturer in Fine Art at the University of Sains, where he established the sculpture department and completed two major public sculptures. After his return to Australia, he took on further public commissions. He participated in exhibitions with his works in wood, marble, concrete, bronze and stainless steel, as well as mosaic works. His creations are in France, the Netherlands, the US and Malaysia. – B: 1302, 1020, T: 7675. → **Tóth, Sándor (3); Székely, Pierre.**

**Geller, Uri** (Tel Aviv, Israel, 20 December 1946 - ) - Paranormal actor and writer. He was born to Austro-Hungarian parents. Between the age 11 and 17, he lived in Cyprus. He claims to have served as a paratrooper in the Israeli army and was wounded in action during the 1967 Six-Day War. From 1969, he performed as a nightclub entertainer and is well known in Israel. In the early 1970s, he settled in the US and captured the attention of scientists (he supposedly had paranormal abilities) and the media. At the peak of his career in the 1970s, he performed full-time for television audiences worldwide. He retired from public life in the 1980s. In recent years, his paranormal demonstrations, such as spoon bending have been less and less frequent. He is the author of 16 fiction and non-fiction books. He now lives in Sonning-on-Thames, Berkshire, England. He is a vegetarian and speaks 4 languages: English, Hebrew, Hungarian and German. He maintains many ties with celebrities (with spoons to bend), such as John Lennon, the Spice Girls. Bending Winston Churchill's and John F. Kennedy's own spoons; he contributed artwork to Michael Jackson's CD, *Invincible*, but split with Jackson because of his anti-Semitic statements. He owns a 1976 Cadillac covered with pieces of bent tableware. – B: 1081, T: 7456.

**Gelléri, Andor Endre** (Andrew) (Budapest, 30 March 1906 - Wels, Austria, between 6 and 20 May 1945) – Novelist, short story writer. He earned certification in metallurgy from a vocational school and was employed in a variety of jobs. As a high-school student, he submitted short stories to the daily, *The Evening (Az Est)* thus the editor, Lajos (Louis) Mikes, discovered him in 1924. He wrote his only novel, *The Laundry (A nagymosoda)*, in 1930. It was in short stories that he was at his best. His heroes were the downtrodden, the laborers, the unemployed and the homeless. He found poetry in everyday life. Four collections of his short stories were published in his lifetime. He was a recipient of the Baumgarten Prize in 1933 for the *Thirsty Drunkards (A szomjas*

*ittasok*). His insight into the tragedy in the lives of the working classes was sharper than that of his contemporaries. Although he may not have been a revolutionary, his social critique was stirring. From 1941, he was called in for civil service several times (Monor, Nagykáta, Aszó, Gyertyánliget, Jászberény) by the military. In 1944, the Germans captured him. First he was in a concentration camp in Mauthausen, then in Günstkirchen, Austria, where he survived the liberation in early 1945. His weakened body succumbed a few days later to an outbreak of spotted fever. His main works are *Moon Street (Hold utca)* (1934); *Lightning and Evening Fire (Villám és esti tűz)* (1940); *Winter Harbour (Téli kikötő)* (1946); *The Story of Self-Esteem: Autobiographical Novel and Confession (Egy önérzet története: regényes önéletrajz és vallomás)* (1957), and *Magician, Help! (Varázsló, segíts!)* (1959). – B: 0883, 1257, T: 7667.

**Gellért, Bishop** (Saint) (Giorgio, Sagredo) (Venice, 993 - Buda, 24 September 1046) – Benedictine monk, abbot, bishop and martyr. His parents sent their sickly child to the Benedictine School of San Giorgio Maggiore, and made a vow that, if he survived, they would dedicate him to the service of God. Eventually, he entered the Order. In 1015, he set out to the Holy Land to study the writings of St. Jerome at the Monastery of Bethlehem. After embarking on a ship, a storm forced the ship ashore near Parenzo (Porec, Italy), where he met Archabbot Razina, who invited him to go with him to Hungary for missionary work. In the same year's feast day of the Blessed Virgin (15 August) in Hungary, he met King St. István I (St Stephen, 997-1038) and, at the request of the King, he became the teacher and spiritual guide of his son, Prince Imre (St. Emeric). Gellért fulfilled this task for seven years. In the meantime, he was also the Abbot of the Abbey at Pécsvárad. After his retirement, he became a hermit in the forest of the Bakony Mountains (north of Lake Balaton). In 1028, he was commissioned to establish a bishopric at Marosvár (now Csanád). After King István I's death, Gellért and other bishops set out to welcome the returning sons of the exiled Prince Vászoly; but some people of the old pagan faith captured and killed them. Gellért's body was buried at the Church of Our Lady in Pest, but was later reburied at his bishopric in Csanád. On 23 February 1384, his remains were sent to his birthplace, Venice. In 1083, Gellért was canonized together with King István I and Prince Imre. The original Kelen Hill of Buda was later renamed Gellért Hill and his statue, holding a cross in his hand and looking across the River Danube to Pest, was erected there in 1902. The Rock Church on the hill is also bears his name. – B: 1150, 0942, T: 7103.→**Gellért Legends; István I (St. Stephen), King.**

**Gellért Legends** – There are two legends of Bishop Gellért, who lived in the 11th century. One is about the *tamed wolf*, the other the *Conversion of Ajtony*. The legends most probably originated at the latest after his consecration to sainthood in 1083. There are two versions, a shorter and a longer one. The so-called short legend, created around 1109, is to satisfy the breviary format. The larger legend came to existence in the 13th century and it talks redundantly about the life of the Bishop. It was revised on several occasions; the latest revision was done at the beginning of the 14th century, after the launching of the Benedictine reforms in 1302. Although these improvements considerably lowered their historical value, they still contain much valuable information on Hungarian culture and lifestyle in the 11th century. The first mention of the work of the servant population in Hungary appears here. The style of the original version is rhymed, while the later additions reflect a measured prose. Probably Gellért connected

the idea of the Blessed Virgin with the ideas of the old “Great Lady of Heaven” of the Hungarians, by assuming that they are one and the same. It is likely that, on his advice, King István I (St Stephen) offered his country to the protection of the Blessed Lady, as a patron saint of Hungary, and called his Hungary the Realm of Saint Mary. – B: 1150, 0942, T: 3240.→**Gellért, Bishop.**

**Gellért, Oszkár** (Oscar) (Goldmann until 1899) (Budapest, 10 September 1882 - Budapest, 16 December 1957) – Poet. He studied Law, at the same time published poems in the periodicals *New Times (Új Idők)*, and in the *Budapest Daily (Budapesti Napló)*. Ernő (Ernest) Osvát, Editor of the *Hungarian Genius (Magyar Génius)*, was impressed by his talent and gave him the Associate Editor position in 1902. The *Hungarian Genius* published his first volume of poems in 1902. These poems reflected the spirit prevailing in Europe at the turn of the century. He published several thousand articles between 1904 and 1918, dealing mainly with problems related to public education. From 1908, he was a contributor to a newly established literary review, the *West (Nyugat)*, where he published his second volume of poems. His romantic lyric poetry attracted general interest but scandalized the conservative circles. He was a war commentator for the *Budapest Journal (Pesti Hírlap)* during World War I, but his poems became increasingly pacifist. He became one of the chief contributors of the literary review, *West (Nyugat)* in 1917, and a regular member of the Vörösmarty Academy in 1918. When he published his book on the victorious revolution (1918), the Prime Minister, Count Mihály (Michael) Károlyi, chose him as his press secretary. When the Communist Council (Soviet) Republic was overthrown in September 1919, he was arrested but released after one month of detention. From 1920, he was the editor of the *West (Nyugat)* until its termination in 1941. Gellért had an important role in the revival of Hungary’s literary life after 1945. His publications include *At the First Station (Az első stációnál)* (1903); *The Woman of Rubens (Rubens asszonya)* (1912); *The Three Mountain Peaks (A három hegycsúcs)*, poems (1950); *You Are not Alone (Nem vagy egyedül)* poems (1956), and *One Hundred Out of a Thousand (Száz az ezerből)* (1967, 1982). He was awarded the Baumgarten Award in 1933, 1934, and the Kossuth Prize in 1949. – B: 0883, 1257, T: 7662.→**Osvát, Ernő; Council (Soviet) Republic of Hungary.**

**Gellért, Sándor** (Alexander) (Debrecen, 11 December 1916 - Szatmárnémeti, now Satu Mare, Romania, 14 November 1987) – Hungarian poet and translator in Romania. He matriculated at the Reformed High School of Szatmárnémeti and, after some years, continued his education at the University of Debrecen. The University of Kolozsvár (now Cluj-Napoca, Romania) granted him a high school teacher diploma in 1951. From 1945-1948, he taught at a high school in Szatmárnémeti and, from 1948 until his retirement in 1977, he taught Hungarian language at Mikola. He published poems, prose, travel journals and translations. His more important publications include *Girls Who Had to Dance to Death (Halálra táncoltatott lányok)* poems (1942); *The Well of Peter Bodor (Bodor Péter kútja)* poems (1955), and *Stars on the Sky of Suomi (Csillagok Suomi egén)*, translation of Finnish poems into Hungarian (1972). – B: 0883, 1257, T: 7662.

**Gellérthegy** (Mount Gellért) – A 235 m high hill on the right bank of the Danube, situated in the middle of the city of Budapest, at the meeting point between Districts I and XI. It is largely composed of Triassic dolomite (*Hauptdolomit*); its southern slopes are overlain by the Buda Marl and the Kiscell Clay, while its northern slopes are also covered

by the Buda Marl. Prehistoric winds formed walls of yellow loess deposits on the western side of the hill and also the other Buda Hills. The Budapest thermal line extends at its foot, along which the thermal springs of Gellért, St. Emeric and Rudas break out to the surface. In the Middle Ages, it used to be called *Kelen Mount*; it now bears the name of the missionary and first Bishop of Csanád Diocese, St Gellért (Gerardo Sagredo, originally from Lombardy, Italy), who was tossed down over the cliff of this hill by the Hungarian pagans during the pagan uprising of 1046. There used to be a chapel in honor of St Gellért on top of the hill, prior to the Turkish occupation. Later, there was an observatory on top of the hill. After the 1848-1849 War of Independence from Habsburg Rule, the Austrian government built a fortress, called the *Citadel*, on Mount Gellért. Now the hill is surrounded by parklands and a garden suburb. There is a statue of St Gellért on the northern side of the hill, directly overlooking the Elizabeth Bridge of the city. On the southern side of the hill, there is a rock chapel of the Pauline Order, carved out from the cliff, creating an atmosphere of piety. It was closed off by a massive block of concrete by order of the hard-line Communist government of the Stalinistic era after World War II, and it was reopened after 1989. – B: 1068, 7456, T: 7456. → **Pauline Order; Gellért, Bishop.**

**Gemenc Nature Reserve** (Danube National Park) – A 5-10 km wide and 30 km long channelled flood plain of the Danube River, 120 km south of Budapest.

This area represents a unique portion of the River Danube and its flood plains, where the presence of a high water table and the old channels of the river created lush, deciduous forests, rich in a variety of abundant wildlife. There is an abundant bird population among the willows and poplars, and oak-ash-elm hardwood gallery forests with a famous wildlife. There are Bluebells, Convallaria, Berries, Siberian Iris, and it has the best ornithological,

zoological and botanical spots. There is a very strong population of European Red Deer (*Cervus elapus*), famous for their massive antlers, providing high quality trophies. There are also wild Boars, Sakers, Lesser Spotted Eagles, Herons, Black Stork, Egrets, Waterfowl and White-tailed Eagles. Other birds include the Night Heron, Squacco Heron, Spoonbill, Grey Heron, Great White Egret, Redshank, Purple Heron, Grebe and great numbers of Black-headed Gulls, a few Mediterranean Gulls, Grey Partridge, Godwits, Sandpipers and Lapwings. Botanical highlights in meadows are the Green-winged Early Spider, Soldier Orchid, *Orchis coriophora*, *O. laxiflora* subsp. *palustris*. The Hungarian Nature Protection Office has safeguarded this reserve since 1977. – B: 1160, 1303, T: 7656, 7103.

**Gencsy, Béla** (Botfalva, now Prikordonne, Carpatho-Ukraine, 21 December 1899 - Beregszász, now Berehove, Carpatho-Ukraine, 23 April 1982) – Bishop of the Reformed Church. He attended high school in Botfa, Tarnóc, Ungvár (now Uzhhorod, Carpatho-

Ukraine) and Sárosptak (1909-1917). He served in the army during World War I (1917-1918). He studied Theology and Philosophy at the University of Debrecen and was Assistant Minister in Palló, Gálócs, Bátfa and Mokcsakérés between 1921 and 1923; Parish Minister in Szürte from 1923 to 1979; Deputy Dean, then Dean of the Ung Reformed Church Deanery (1946). From 1948, he was acting Bishop, ordained Bishop from 1956, serving until his retirement in 1979. He successfully protected his Church against the militant atheism of the Soviet Union. – B: 0910, T: 7103.→**Reformed Church in Carpatho-Ukraine.**

**Gencsy Sári** (Sally) (Debrecen, 16 August 1929 - Budapest, 6 May 2008 ) – Opera singer (coloratura soprano). She studied voice and piano in Debrecen. She studied under the direction of Mihály (Michael) Makay at the Ferenc (Franz) Liszt Academy of Music, Budapest. Aladár Tóth contracted her in the Opera House, Budapest, in 1948. She made her debut in the role of Gilda in Verdi's *Rigoletto*, where she sung the coloratura and subrette roles. The *bel canto* figures of Mozart and Verdi were her forte. She retired from the Opera House in 1975 and, in the same year, was appointed Adjunct Professor at the Academy of Dramatic Art, Budapest. Her major roles included Zerlina in Mozart's *Don Giovanni*; Blonde in Mozart's *Il Seraglio (Szöktetés a szerájból)*; Violetta in Verdi's *Traviata*; Gilda in Verdi's *Rigoletto*; Lucia in Donizetti's *Lucia di Lammermoor*; title role in Delibes's *Lakmé*, and Iluska in Pongrác Kacsóh's *John the Brave (János vitéz)*. She was a recipient of the Merited Artist title (1974). – B: 1445, 1936, T: 7103.→**Tóth, Aladár.**

**Gendarmerie, Royal Hungarian** (*Magyar Királyi Csendőrség*)– After the Compromise of 1867, it became clear that the universally hated Austrian Gendarmerie needed to be withdrawn from the territory of the Kingdom of Hungary and it was immediately replaced by a native institution to look after public safety, as the '*pandúr*' (gendarme) system of the Hungarian counties was not quite appropriate.

After the transference of the more likeable Transylvanian Gendarmerie in 1881 to Hungary, the Royal Hungarian Gendarmerie began to be formed around this organization: it was an institution organized along military lines, watching over public safety as well as internal security. The public safety service included the protection of the political system of the State, its public order, its legal system, as well as the provision of a special police force. The internal security service included Gendarmerie training and military discipline. The Royal Hungarian Gendarmerie had jurisdiction over the entire kingdom, embracing the Carpathian Basin, except in the capital, Budapest, and in some municipal boroughs. It was subordinate to the Ministry of Defense and the Ministry of the Interior. Its staff (both the officers and the crew) could not be members of any political party. Despite this rule, the institution of the Gendarmerie survived the short period of Communist revolution (the Hungarian Soviet Republic) in 1919. In the inter-war period, the Gendarmerie was considerably overburdened by underground activities: clearing up various movements (far right and far left) that threatened law and order in communities, and in the overall state. In times of war, a military operational arm of the Gendarmerie served as military police. During World War II, the full force complement reached 19,000 men, and the Royal Gendarmerie attended to four different activities: (1) It served as military police in operational and occupied areas to maintain public order, regulating traffic and directing people; (2) Partisan war: to suppress and root out secret partisan nests and concentrations, to prevent them from disrupting rail and road transport

and from killing army and Gendarmerie personnel. This service was especially necessary in the newly returned Bácska area of Hungary, where they had to fight infiltrating partisan units from the neighboring Bánát region, at that time part of Yugoslavia under German occupation. In Zsablya alone (now Zabalj, 20 km northeast of Újvidék – now Novi Sad, Serbia) 40 Gendarmes were killed. Gendarmes were fighting partisans also in the Mura Interfluve in the southwest and around Huszt in the northeast, in Ruthenia (now Khust, Ukraine); (3) Deportation of Jews: it carried out instructions and directives from the authorities and later on from the German occupying forces; however, weapons were never used, not even when the gendarmes escorted deported Jews on foot to the German border. It was the Gendarmerie that successfully prevented a planned massacre of Jews in December 1944 in Budapest (in district XIII near the banks of the Danube on the Pest side, on Pozsony Street); (4). In the defensive war against the advancing Soviet army on Hungarian territory: some units of the Gendarmerie were fighting, even as they were retreating and several such units were annihilated in the process. Romania drew the Gendarmerie battalion of Kolozsvár (now Cluj Napoca in Romania) into fighting, after a last-minute change of sides in the War. All other large Gendarmerie units also became involved in military activity. In the Verecke Pass of the northeastern Carpathians a Gendarmerie battalion was the last to leave and retreat with 50% loss of life. The five best-equipped five Gendarmerie battalions were wiped out in the defense of Budapest; 160 Gendarme officers and 3,000 Gendarmes are buried in the mass graves of Castle Hill in Buda. The Provisional National Government (in Debrecen, in the Soviet-occupied eastern part of Hungary turned Communist under duress), declared the dissolution of the institution of the gendarmerie on 22 December 1944. A collective condemnation of the Gendarmerie followed: their members were not certified for identification, they were pilloried, interned, imprisoned, sent to Siberia, tortured and hanged. As part of this unparalleled brutality, the relatives, families, widows and orphans were also denied any legitimate claim or assistance. The Royal Hungarian Gendarmerie was an exclusively Hungarian organization in character and mentality. The Hungarian Gendarme always championed the national interests. The Gendarme and his family set a good example for the community. The surviving members became scattered all over the world but honorably held their own in all aspects of life. After the withdrawal of the Soviet occupying forces from Hungary in 1991 and the collapse of the Soviet Union, when the political situation in Hungary started to improve (though still fluctuating between communism and capitalism), the Hungarian Gendarme Fraternal Society, operating in the West, repeatedly petitioned the Hungarian Government to revoke the discriminating condemnation of the Gendarmerie, to rescind the outlaw status of its members and to compensate them as a body, morally and legally. The Government of the one-party socialist state of 1987 already decided to set aside the deeply unjust law, while the Government of the newly independent Hungarian state of 1991 recognized their length of time in service by decree, including it as further contribution to their pension allowance. Furthermore, the Constitutional Court's No. 44/1991 decision deemed the 1960/1945 ME decree unconstitutional, even at the time of its passing, because it breached a number of general legal principles. – B: 1020, 1304, 1020, T: 7668.

**Genealogy** – The most comprehensive Hungarian genealogy is the diligent work of Iván Nagy (1824-1898). Its title is *The Noble Families of Hungary: Their Coats of Arms and Genealogy Tables (Magyarország családai czímerekkel és nemzedékrendi táblákkal)*.

This painstaking work was written from 1857 to 1868 and appeared in 13 volumes on 6,500 pages. It contains 3,500 family trees, 550 coats of arms and 10 thousand family histories. This is regarded as a basic work of Hungarian genealogy and heraldry. János (John) Karácsonyi (1858-1929), priest and genealogist, published a work entitled *Hungarian Clans until the Middle of the 14th Century (A magyar nemzetségek a XIV század közepéig)* (1900-1909). Béla Kempelen (1874-1952) dealt extensively with the genealogy and published a number of books on this subject, among them the *Families of Hungarian Nobility, vols. i-xi (Magyar nemes családok I-XI)* (1911-1931). – B: 0883, 1429, T: 7103. → **Karácsonyi, János; Kempelen, Béla; Nagy, Iván.**

**Geneva Reformation Memorial** – Behind the University building there is a high wall, the Reformation Memorial. In its center stand the larger-than-life statues of the greats of the Reformation: Calvin, Farel, Bèze and Knox. On both sides of the wall are plaques as well as bronze statues of the defenders of Protestantism: the monarchs of England, France Germany and the Netherlands. Among them is the statue of István (Stephen) Bocskai, Reigning Prince of Transylvania (*Erdély*, now in Romania). Next to it is a relief also of Bocskai showing him as he proclaims, following the Diet of Transylvania, the freedom of religion already granted at the Diet of Kassa (now Košice, Slovakia), on the 15th of December 1606. Engraved by the relief is the text of the document, as adopted by the Diet, in Latin and partly in French. Bocskai is not represented here as ruler of Transylvania but as the Reigning Prince of Hungary. – B: 1305, 1020, T: 7617. → **Bocskai, Prince István.**

**Genocide** – The United Nations General Assembly defined ethnic cleansing in 1948 as an act of atrocity against humanity. The decree spells out the definition of genocide as executed by a nation or a group of people that annihilates partially or entirely, all members of a national, popular or religious group, forces them into a situation resulting in death, hinders the birth of their children or forcibly takes their children away. Hungary adhered to the United Nations convention with Act No. XVI 1955. – B: 1153, 1020, T: 3240. → **Atrocities against Hungarians.**

**Geobitzas** – The name appearing on one of the pictures of the Hungarian Holy Crown, sent by Michael Ducas, Emperor of Byzantium, in 1074. The name most probably refers to King Géza I (1074-1077) of Hungary. – B: 1078, T: 7662. → **Holy Crown, Hungarian.**

**Geócze, István** (*szendrői*) (Stephen) (Bacska, County Zemplén, 25 July 1836 - ? , 1896) – Military writer, founder of Hungarian military literature. He studied Law in Pest; later, he fought with Garibaldi for the liberation of Sicily and Naples. He was a lieutenant in Garibaldi's guard, then Squadron Commander of the first Suave (infantry) battalion. He distinguished himself in the Battle of Capua. From 1863, he taught for a year at the Military Academy of Cuono, then he left the military and on 13 January 1864, he sailed from Genoa to Brazil. Like many others before him, he too established a coffee plantation. When he heard of the Compromise of 1867 between Hungary and Austria, he sold his plantation and returned to Hungary. His book, entitled *Travel to Brazil vols. i,ii (Utazás Braziliába, I, II)*, was published in 1869, and because of its flowery language, it became a great success. He entered the Hungarian Royal Military in 1870, and taught at the Royal Military Ludovika Academy from 1872. Between 1872 and 1879, he edited the Gazette of the Royal Military Ludovika Academy, a scientific military paper. He retired

in 1884. He wrote many military books of rules in the Hungarian language. – B: 1091, 1078, T: 3240.→**Compromise of 1867; Ludovika Royal Hungarian Military Academy.**

**Geőcze, Zoárd** (Budapest, 23 August 1873 - Budapest, 26 November 1916) – Mathematician. He completed his higher studies at the University of Budapest. At first he taught in the Junior High school of Podolin, and later in the High School of Ungvár (now Uzhhorod, Ukraine). He spent two years in Paris on a scholarship, obtaining his doctorate at the Sorbonne (University of Paris); later he resumed teaching but this time in Budapest. His scientific work belongs to the field of the theory of real functions; other of his studies are connected with surface mathematics, where he clarified many problems. With some other problems, he opened up a new chapter in modern analysis research. For the full elaboration of these areas he did not have time before the outbreak of the World War I. However, his published papers indicated what still had to be done in these areas, of mathematics. He died of an illness contracted in the Serbian campaign of World War I. – B: 0883, 1306, T: 7456.

**Geography of Hungary** – The present-day truncated Hungary is situated in the middle of the Carpathian Basin, between northern latitude 45°45'-48°35' and eastern longitude 16°5'-22°55', on both sides of the River Danube and its largest tributary, the River Tisza. Over 80% of its surface is flatland that does not rise more than 200 m above sea level. Its mountains are of modest height, around 400m above sea level, making up only 20% of the total area of the land; the highest elevation in present Hungary is the Kékestető at 1014 meters, in the Mátra Mountains northeast of Budapest. The geographical features of the Carpathian Basin evolved during the Miocene Period 24 to 5 million years ago, when the widening of the Danube, Europe's second largest river took place; hence it is also called the Middle Danube Basin. In the North: the Northern Carpathians together with the Northern Interior Central Mountains constitute what used to be the Northern part of Historic Hungary (Upland, *Felvidék*, in the Kingdom of Hungary, now Slovakia). The highest peak of the Carpathian Mountain chain is in this area, the Gerlachfalva Peak at 2,655 meters (now Gerlachovsky Stit, Slovakia) in the High Tatra Range (Vysoke Tatry). Further east, where the Carpathians become narrowest in the whole mountain system, the area is referred to as the Northeastern Carpathians, now part of Ruthenia or Carpatho-Ukraine (*Kárpátalja* in Ukraine). The Hungarians entered the Carpathian Basin (ca 896-900 AD) through the Verecke Pass of this part of the Carpathians. The northernmost parts of the Great Hungarian Plain reach into the area of Carpatho-Ukraine (Ruthenia). Of the other interior mountains of the Carpathian Basin, the Transylvanian Central Mountains (Transylvania, *Erdély* has been part of Romania since 1920) attain the highest altitudes, with the highest peak being the Nagy Bihar (Great Bihar) at 1849 meters. The Transylvanian Basin is situated between this mountainous terrain and the wide Eastern Carpathians on a number of intermontane, undulating and moderately high plateaus. These hilly plateaus are bounded in the south by the Southern Carpathians, where one of the peaks, the Negoj in the Fogaras Alps reaches a height of 2544 meters. Beyond the present southern border of Hungary, the Great Hungarian Plain continues in the Bácság area down to the River Száva and the Lower Danube, where some mountain groups are to be found, as well as at the Dráva-Száva confluence (e.g. the Fruskagora). The eastern slopes of the Austrian Alps extend into the Carpathian Basin e.g., into the so-called Őrség district, next to Austria's easternmost strip, the Burgenland province, formerly the

westernmost part of the Kingdom of Hungary. The environs of the city of Sopron are the closest to the Alps foothills. – B: 1078, 7456, T: 7456.

**Geophysics** – As an independent discipline, geophysics began during the 18th century but its fast development occurred in the 20th century. Applied geophysics really started in the 1900s from the torsion balance of Baron Loránd (Roland) Eötvös, used for raw material exploration. – B: 1138, 1020, T: 7456.→**Eötvös, Baron Loránd.**

**George, Árpád** (Árpád, György) (Szalonna, 1910 - Ligonier, USA, 2 July 1988) – Minister of the Reformed Church in America. He arrived to the United States with his parents in 1913, and settled in Trenton, New Jersey. In 1920, he and his family returned to Hungary's Tokaj area. In 1931, after completing his education in Sárospatak, he returned to the United States and enrolled at Bloomfield College and Seminary in New Jersey. Following his ordainment in 1935, he served as Pastor of the Elizabeth Hungarian Reformed Church for six years. He was called to the pastorate of the Hungarian Evangelical and Reformed Church of Chicago, South Side in 1946, where he was instrumental in building the new church complex. It was dedicated on 20 March 1966. He served three Hungarian congregations during the thirty-three years of his ministry. From 1951 to 1963, he served the Hungarian community as an Officer of the Calvin Synod and as President from 1963 to 1967. He was called to serve as member of the Board of Directors of the Hungarian Reformed Federation of America in 1960, was elected Secretary in 1968, and President in 1976. He retired after 20 years of service with the Federation at the end of 1980. – B: 0906, T: 7103.→**Reformed Churches in America.**

**Georgikon, Keszthely** – The Agricultural College founded by Count George Festetics in 1797, on the initiative of János (John) Nagyváthy. It was the first institute of higher agricultural learning in Europe. Its original purpose was to train highly qualified managers for the various Festetics estates. At the outset, agriculture, forestry, stud-farm management, legal and economic instructions were offered, not only on superior but also on basic and middle levels. The estate, serving educational purposes, was at first 500 acres, and from 1814, 985 acres. The school was functional between 1707 and 1848, when instruction was stopped because of the War of Independence (1848-1849). The school had 97 professors on staff and 1444 students. Professors and students marched under the Hungarian flag into the War of Independence. From 1817, the public examinations under the name of Helikon of Keszthely became celebrations. Students, teachers and writers participated in these literary celebrations. Because of its patriotic spirit, the Austrian Government at first prohibited the functioning of the school but, following the Compromise of 1867, it allowed it again. From this time on it functioned as a higher institute of agriculture and forestry. Between 1874 and 1906, the school had a three-year curriculum. The 100th anniversary was celebrated on 12 October 1897. On this occasion the statue of the founder, George Festetics, was erected. From 1906, the school functioned as an Agricultural Academy and had a four-year curriculum from 1943. It became the Keszthely division of the Agricultural University in 1945. In 1949, the Communist Government closed it, because the majority of its students were considered "class aliens". It was reopened as an Agricultural Academy in 1954, and it became an institute of university rank in 1962. In the 1970s, it was amalgamated with other agricultural institutes. After the reorganization in 1989, it was renamed Pannonian Agricultural University's Georgikon Faculty of Agricultural Sciences. – B: 0942, 1150,

1153, T: 7680.→**Nagyváthy, János; Festetics, Count György; Universities.**

**Georgius de Hungaria** (*Magyarországi György Mester*) (? , 1422 - Rome, Italy, 1502) – Monk, mathematician. Probably he was a student of the School of Pozsony (now Bratislava, Slovakia). As a student he fell into Turkish hands and was taken to Turkey, where he spent thirty years in captivity. Following his release he returned to Hungary and entered the Dominican Order. He moved to the Netherlands and settled near Utrecht, where he taught mathematics. He wrote in Latin a textbook on mathematics *Arithmetice summa tripartita Magistri Georgij de hungaria (Magyarországi György mester aritmetikájának foglalata három részben)*. The book contained 20 pages and was published in Utrecht in 1499. This is the first book of mathematics from a Hungarian author. It was republished in the Netherlands in 1965. – B: 1306, 0883, T: 7103.

**Gera, Zoltán** (Pécs, 22 April 1979 -) – Soccer-player. He started his career at the Pécs Mecsek FC in 1997, where he played in the NB II. From 1 July 2000, he became a player in the Ferencváros TC. Gera played 115 league games and scored 32 goals. He won the league title and the Hungarian Cup twice and made his way onto the Hungarian national team. Gera joined West Bromwich Albion with a three-year contract on 30 July 2004. He usually plays as an attacking midfielder, though he has also played on both the right and left wings throughout his career. On 9 June 2008, Gera turned down a new contract at West Brom and joined Fulham. Gera was named Fulham F.C. Player of the Season. He was named Hungarian Player of the Year in 2002, 2004 and 2005. For his efforts in the 2009–2010 season and his goals in the UEFA Europa League, Gera was voted the fans' player of the season for the 2009-2010 season. – B: 1031, T: 7103.

**Gerbeaud, Emil**→**Kugler, Henrik.**

**Geréb, Mátyás** (Matthias) (? - 1493) – Palatine of Croatia around 1486. He had many military and other merits. At the siege of fort Jajca, witnessed by King Mátyás I (Matthias Corvinus, 1443-1490), he killed in a personal duel he killed a Turkish chieftain called “Mustafa the Provoker”, and put the Turk’s severed head at the feet of the king. On another occasion, he captured a marauding Turkish army of 7,000 at Dubica, took their loot and freed many of their Christian prisoners. – B: 1078, 1020, T: 3233.→**Mátyás I, King (Mathias Corvinus).**

**Gerecse Range** – Situated in the Danube bend, north of Budapest, it is composed of north-south oriented ridges of Mesozoic limestone and dolomite beds of the Triassic Age (230 to 190 million years ago) in the south, and Cretaceous in the north. These ridges are arranged in three series: the first contains the peaks of Nagysomlyó (415 m), Bartaszvég (537 m) and Hajagos (448 m), the Szelim Cave on its western slope; the second ridge contains Gerecse (633 m) and the Pisznice (549 m); the third ridge series contains Öregkő (324 m), Somberek (409 m) and Nagysomlyóvár (449 m). The *Gerecse Marble* of the early Jurassic Age (a dense, red limestone) is mined at Piszke, Almás, Bajót and near Nyergesújfalu. The range is covered by dense forests. – B: 1068, 7456, T: 7456.

**Gérecz, Attila** (Dunakeszi, 20 November 1929 - Budapest, 7 November 1956) – Poet. He was sentenced to a 15-year prison term in 1950 for high treason, escaped, and was detained again. Freed on 31 October 1956, during the Revolution, he fought against the invading Soviet troops and destroyed two of their tanks; but the third killed him. His collected poems were published under the title: *Little Blind Alley (Kis zsákutca)* in 1991. – B: 0878, 0877, 1257, T: 7103.

**Geregye Clan** – It flourished in Zala and Vas counties, with the family seat in the town of Geregye, County Vas. In the second half of the 13th century the family's first traces were in County Bihar. They settled in Transdanubia (*Dunántúl*) after the Mongol invasion of 1241 - 1242. From this clan descends the Egerváry family. – B: 1078, 1020, T: 7617.

**Gerevich, Aladár** (Miskolc, 16 March 1910 - Budapest 14 May 1991) – Sportsman, fencer. His father was a fencing trainer. He learnt the mastery of fencing from Italo Santelli, a coach working in Hungary at the time. Gerevich collected seven Olympic gold medals in saber fencing in six consecutive Summer Olympic Games and he also won one silver and two bronze medals. He was the individual World Champion once and achieved the other victories as a team member. He became a gold medalist at the Rome Olympic Games in 1960, at the age of fifty. He was a member of the Hungarian saber team that won gold medals at Los Angeles, Berlin, London, Helsinki, Melbourne and Rome. When told in 1960 that he was too old to compete for a place in the Hungarian team, he challenged the entire team and defeated them all. He was seven times Olympic Champion in saber fencing. He won ten medals over the course of six Olympics; World-Champion nine times, and European Champion five times. He was one of the most decorated athletes in Olympic history and the most successful Hungarian fencer and athlete. – B: 0881, 1081, T: 7675, 7103.

**Gergely, Ágnes** (Endrőd, 5 October 1933 -) – Poetess, writer, literary translator. She studied Hungarian and English Literature at the University of Budapest (1953-1957). Between 1950 and 1952, she was an industrial apprentice and, from 1957 to 1963, she worked as a teacher. Between 1963 and 1972, she was a reporter for the Hungarian Radio. Thereafter, she was a columnist at the literary review, *Life and Literature (Élet és Irodalom)* (1971-1974). Since 1988, she has been a free-lance writer and, since 1992, a university lecturer and an honorary member of the University of Iowa, USA (1974). She is also a member of the Széchenyi Academy of Literature and Art (1998). Her works include poems: *Aztec Moment (Azték pillanat)* (1970); *Shipwreck (Hajóroncs)* (1981); *Land of Kings (Királyok földje)* (1994); *Necropolis* (1997); and novels: *The Interpreter (A tolmács)* (1973) and *The Unguarded (Őrizetlenek)* (2000), also studies and translations into Hungarian from the works of Joyce, Edgar Lee Masters, Christopher Okigbo and others. She was awarded a number of prizes, among them the Attila József Prize (1977), the Salvatore Quasimodo Prize (1995), and the Kossuth Prize (2000). – B: 0874, 1257, T: 7103.

**Gergely, András** (Andrew) (Sopron, 23 May 1946 -) – Historian and diplomat. He completed his higher studies at the Eötvös College of the University of Budapest in History and Philosophy (1964-1969). From 1969 to 1976, he worked at the History Science Institution of the Hungarian Academy of Sciences. From 1976 to 1998, he taught in various positions at the University of Budapest, then, from 1998, as a professor. In 1986-1987 he was on a Humboldt scholarship in the German Federal Republic. His field of research is 19th century Hungarian history. From 1988, he was involved in politics as a member of the *Hungarian Democratic Forum (Magyar Demokrata Fórum – MDF)*, later, the *Hungarian Democratic People's Party (Magyar Demokrata Néppárt – MDNP)*. He has been a member of the History Committee of the Hungarian Academy of Sciences and the Hungarian-Austrian Joint Commission on History. Since 1990, he has been

working at the Ministry of Foreign Affairs. He was Ambassador to the South African Republic, with accreditation to Mozambique and Swaziland. From 1999, he was Ambassador to the Netherlands. He is also one of the founders and President of the Hungarian Civic Cooperative Society. His main works include *Development of Széchenyi's Ideology (Széchenyi eszmerendszerének kialakulása)* (1971); *An Economic Policy Alternative in the Reform Age (Egy gazdaságpolitikai alternatíva a reformkorban)* (1981); *How was it in 1848? (1848-ban hogy is volt?, essays)* (2001), and *History of Hungary 1790-1918 (Magyarország története 1790-1918)*. He is a recipient of the György Ránky Prize (1990), and the Golden Cross of Merit of the Republic of Hungary (2001). – B: 0878, 1257, T: 7103.

**Gergely, Ferenc** (Francis) (Budapest, 10 September 1914 - Budapest, 18 March 1998) – Concert and church organist. He completed his higher studies at the Ferenc (Franz) Liszt Academy of Music, Budapest, under the direction of Aladár Zalánfy, Albert Siklós and Jenő (Eugene) Ádám. He was a friar of the Franciscan Order and the organist of the Franciscan Church of Pest from 1931, for 67 years. He was also an organist at the Dohány Street Main Synagogue from 1947. He taught organ, first at the National Music School (*Nemzeti Zenede*), Budapest, from 1943 to 1969, then at the Béla Bartók Music School. He was a professor at the Ferenc Liszt Academy of Music from 1948 until his retirement in 1976. He performed organ concerts in Hungary and all over Europe. He also made a number of recordings. His repertoire included organ pieces of classical, romantic, modern and Hungarian composers. He educated many young organists, published organ works, and was regarded as the grand old man of the organ. He was honored with the Liszt Prize (1992) and the Kossuth Prize (1994), and he was made a Chevalier of the Order of St. Gregory the Great (1989). A memorial concert series bears his name at the Franciscan Church, Pest. – B: 0877, 1487, T: 7103. → **Zalánfy, Aladár; Siklós, Albert, Ádám, Jenő.**

**Gergely, István (1)** (Stephen) (Kozmás, now Cosma, Romania, 14 August 1939 - ) – Sculptor in Transylvania (*Erdély*, now in Romania). He graduated from the Andreescu Academy of Applied Arts, Kolozsvár (now Cluj-Napoca, Romania) in 1964. Since then, he has been an art teacher at a high school in Kolozsvár. Some of his works are: *Busts of Péter Bod and Antal Végh (Bod Péter és Végh Antal mellszobra)* in Alsócsernát (now Cernat) (1973), and *Bust of Áron Gábor (Gábor Áron mellszobra), Sepsiszentgyörgy* (now Sfintu Georgheni) (1973). He held exhibitions in Kolozsvár (1976). Since 1972, he has made plaquettes of great figures of Hungarian history, e.g. János (John) Apáczai Csere, Miklós (Nicholas) Tótfalusi Kis, Gábor (Gabriel) Bethlen, János (John) Kájoni, János Arany, and Endre Ady. – B: 1036, T: 7103. → **Bod, Péter; Apáczai Csere, János; Tótfalusi Kis, Miklós; Bethlen, Prince Gábor; Kájoni, János; Arany, János; Ady, Endre.**

**Gergely, István (2)** (Stephen) (Vice, now Vita, Romania, 29 April 1955 - ) – Priest in Transylvania (*Erdély*, now in Romania). He studied Theology at the Roman Catholic Theological Academy, Gyulafehérvár (now Alba Iulia). He was Chaplain in Gyergyószentmiklós (now Gheorgheni) (1981-1983), in Brassó (now Brasov) (1983-1984), and in Kiskapus (now Kapusu Mic/Copsa Mica) (1984-1987), then Parish Priest in Csiksomlyó (now Sumuleu Ciuc) from 1987, now all in Romania. He founded the *Csibész Foundation (Csibész Alapítvány)* in 1992, to support youth raised in orphanages

in finding their place in society. In 1996 he created the *Lázár Foundation (Lázár Alapítvány)* and assisted in organizing the *Organization of the Prematurely Born (Korábban Születettek Szervezete)*. He established the *Altar-Stage (Oltár Színpad)* on the triple mounds of Csíksomlyó for religious and cultural events. He was one of the organizers of the *Youth Meetings of Csíksomlyó (Csíksomlyói Ifjúsági Találkozók)* and assisted in settling *Csángó* families in Transylvania. He also supported setting up memorials. He was honored with the Pro Urbi Medal and the Medal of the Knightly Order of Hospitalers. – B: 1036, T: 7103.→**Csíksomlyó Pilgrimage; Csángó.**

### **Gergely járás→Gregory Walk.**

**Gergely, Márta** (Lustig) (Barcs, 28 March 1913 - Budapest, 22 May 1973) – Writer. She studied at a high school in Pécs but was expelled because of her promotion of the great lyric poet, Endre Ady. She moved to Budapest in 1931, and worked at a textile factory for two years. In 1934, she received the Pantheon publisher's Mikszáth award for her novel, *The Cinder Washer (Salakmosó)*, describing the life of factory workers in Pécs. From 1935, she published several novels, mostly dealing with the life of women of different social strata. After 1945, she promoted the literature of the younger generation. She was the Editor of the children's journal, *Mate (Pajtás)*, from 1949 to 1956, and of the *Little Drummer (Kisdobos)* from 1956. Her popular series about the life of a teenage girl, *Blondy (Szöszi)*, was translated into several languages. Some of her other publications were: *I, Elisabeth Máthé (Én, Máthé Erzsébet)* (1935); *It is Better to Serve (Szolgálni jobb)* (1936), and *Father's Daughter (Apja lánya)*, (1946). She was twice honored with the Attila József Prize (1951, 1958) – B: 0883, 1257, T: 7662.→**Ady, Endre.**

**Gergely, Mihály** (Michael) (until 1946, Sándor Gergely) (Varbó, 9 November 1921 - Varbó 28 July 2007) – Writer, journalist. He was an industrial apprentice at the Diósgyőr Ironworks (1936). From 1940, he worked as a turner. After completion of high school he studied at the University of Economics, Budapest (1963-1966). He was Editor at various newspapers in Miskolc and Diósgyőr, as well as at the Hungarian Radio from 1950. From 1950, he worked at the Writers' Association and became its President in 1956. From 1957, he was a freelance writer and editor. He retired in 1977. In his writings, he described the changes and challenges of the workers' life. They include *Fight in the Glass-Factory (Harc az üvegygyárban)* novel (1950); *Black Peacock (Fekete páva)* (1964); *Poet and King (Költő és király)* novel (1979), and *The 15th Law of the Cosmos (A kozmosz 15. törvénye)*, story (1984). He received the Attila József Prize (1953), the Literary Prize of Miskolc (1972), the Literary Prize of Borsod (1981) and the Knight Cross of the Order of Merit of the Republic of Hungary (2002). – B: 0874, 1257, T: 7103.

**Gergely, Péter** (Budapest, 1936 - Ithaca, New York, USA, 1995) – Architect, structural engineer. He completed his studies in Hungary, Canada and the United States and received his Ph.D. in 1963. He fought as a University National Guard in the Hungarian Freedom Fight of 1956, escaped to the West and settled in the US. For 32 years he was a professor at Cornell University, Ithaca, New York. From 1983-1988, he was Chair of the Department of Structural Engineering, and from 1985-1988, Director of the School of Civil and Environmental Engineering. His research and discoveries led to significant advancements in understanding the mechanics of reinforced and pre-stressed concrete and its application to building codes. He also made pioneering contributions in structural dynamics and earthquake engineering. His discoveries provided answers to many

previous problems that occurred in the area of moderate seismisms. His improved building codes for structures, especially nuclear plants in earthquake zones are used on a national level. Many of his discoveries were realized through the National Center for Earthquake Engineering, which he helped to establish. He authored 100 scientific papers. He also volunteered in many scientific associations and received six international awards; received an Honorary Doctorate from the Budapest Polytechnic (1992). – B: 1279, T: 1279, 7103.

**Gergely, Song of** (Gregory) – Song of lamentation dated prior to 1490. It is the earliest secular lyric chant in Hungarian. It relates the tale of Demeter Jaksics' official visit to Istanbul, the Ottoman Empire, and of his death. Its author probably was a traveling professional minstrel. Only the first seven of its verses survived; they are in three fourteen-line paragraphs. – B: 1150, 0883, T: 3240.

**Gerle, Robert** (Abbazia, Italy, now Opatija, Croatia, April 24 1924 - Hyattsville, MD, USA, October 29 2005) – Concert violinist, conductor and teacher, a graduate of the Ferenc (Franz) Liszt Academy of Music, Budapest. In 1942 he won the Hubay Prize for violin performance. He spent much of World War II in a labour camp in Budapest; but toward the end of the war, with the Soviet advance, he escaped and hid in a crawlspace for weeks at a music professor's apartment. In January 1945, Soviet soldiers found him and 26 other Hungarian Jews in the apartment. They took them before a firing squad as suspected snipers. According to an account years later in the *New York Times*, as Mr. Gerle walked to his death with his instrument case, the Russian in charge ordered him to play a piece by Tchaikovsky. When he finished the selection, the officer was convinced that he was a musician and not a sniper and let all the men go. Gerle had concert engagements from New York to London in the late 1950s and early 1960s. After holding teaching assignments at the Peabody Institute in Baltimore and the Mannes College of Music in New York, Mr. Gerle accepted an offer in 1972 to start the orchestra program at the University of Maryland Baltimore County. He spent two decades at UMBC while also teaching at the Catholic University, conducting the Friday Morning Music Club Orchestra in Washington and serving as musical director of the Washington Symphony. He wrote two books on violin technique: *The Art of Practicing the Violin* (1983) and *The Art of Bowing Practice* (1991), as well as a memoir, *Playing it by Heart: Wonderful Things can Happen any Day* (2005). – B&T: 7617.

**German Occupation of Hungary in 1944** – On the instruction of the Regent Miklós (Nicholas) Horthy, in 1942, the Miklós Kállay Government conducted secret negotiations with the Western Allied Powers to bring about Hungary's withdrawal from the War. The USA and Great Britain showed little interest in Hungary, especially after 1943, when Hungary came under the Soviet sphere of influence. Though the negotiations continued, they did not lead anywhere, and Hitler became aware of them. Thus, in March 1944, on the pretext that he wanted to discuss the withdrawal of Hungarian units from Russia, Hitler called Horthy to a conference. On 19 March 1944, while Regent Horthy and part of the Government were at Hitler's headquarters, the German troops occupied the major strategic points in Hungary. Hitler threatened Horthy with a full-scale military and political occupation of Hungary, if he did not fulfill Hitler's demands. Since there were no combat-ready troops in Hungary to resist the Germans, in order to avoid the total subjugation of the country, Horthy accepted Hitler's terms. He dismissed Prime Minister

Miklós Kállay and, at German request, appointed Döme (Dominic) Sztójay, the ex-ambassador to Berlin and friendly toward Germany, to head a new Government. The Gestapo would now supervise the management of Hungary's internal affairs. Many Hungarian politicians were arrested and taken to German concentration camps. Despite Hitler's promise to the contrary, the German troops remained in Hungary. With the new German-oriented government in control, the several million Polish and Jewish refugees, who had hitherto enjoyed the protection of the Hungarian Government, were now at the mercy of the Gestapo and the SS, who immediately began the collection and deportation of the Jews to German concentration camps. When Regent Horthy learned of this, he dismissed the Sztójay Government and called on General Lakatos to form a new Government with a mandate to explore the possibility of negotiating an armistice. – B: 1288, 1485, 1020, T: 7665. → **Horthy, Miklós; Kállay, Miklós; Hitler, Adolf; Sztójay, Döme; Koszorús, Ferenc; Jews in Hungary.**

**German Settlers and their Repatriation** – It was the long-term design of the House of Habsburg to diminish Hungary's independence and eventually integrate it into the Austrian Empire. The systematic "colonization" began in 1763, after the Hubertsburg Peace, when veterans of the war were encouraged to settle in Hungary with their families. The agents of Empress and Queen Maria Theresa (1740-1780) focused on the heavily populated Rhein region of her domain, inviting those people to settle in the Bácska region, in Southern Hungary. To start with, the settlers received only temporary titles to the land but, under the rule of József II (Joseph, 1780-1790), they were given permanent ownership in order to keep them there permanently. In his patent of 21 September 1782, Joseph II granted them full freedom of conscience and religion. He promised each settler free travel, provisions, a new fully furnished house, land, tools, beasts of burden, and tax-free status for 10 years. On 20 November 1945, the Allied Control Commission, (according to the decision of the Potsdam Conference), ordered the deportation or resettlement of the German minority population of Hungary back to Germany. In response, on 29 December 1945, the Hungarian Government published its Order-in-Council, No. 12 330/1945, to carry out the instruction of the Allied Control Commission. The resettlement process began on 15 February 1946 and, in the first stage, about 136,000 persons were transported to the American Zone of Occupation in Germany. On 9 January 1947, in the second stage, about 50,000 persons were transported to the Soviet Zone of Occupation. The total number of those repatriated was about 190,000. – B: 1230, 1020, T: 7665.

**Germanization in Hungary** – This meant German assimilation of Hungarians by force. The term was used in Hungary, when the totalitarian rule of the Habsburg Dynasty forced the use of the German language upon the Hungarians in the areas of administration and education. Empress and Queen Maria Theresa (1740-1780) considered it her main duty as ruler to increase the power of the monarch, to decrease the privileges of the Hungarian Estates, and to make her Empire a cohesive unit. Her sometimes open, sometimes hidden attempts at Germanization served this purpose. She achieved her greatest success in this respect by enticing the Hungarian aristocracy to live in Vienna and rewarding them with titles and royal decorations to ensure their loyalty. Her son, King József II (Joseph, 1780-1790), continued the Germanization quite vigorously by making German the language of instruction in all schools and in public administration. However, Hungarians continually resisted and that led to repeated freedom fights, such as the ones led by Bocskai,

Thököly, Rákóczi II, and finally Kossuth. These fights greatly weakened both countries.  
 – B: 1138, 1020, T: 7665.→**Freedom Fight of Bocskai; Freedom Fight of Thököly; Freedom Fight of Rákóczi II; Freedom Fight (War of Independence) of 1848-1849; Kossuth, Lajos**

**Germanus, Gyula (Julius)** (Budapest, 6 November 1884 - Budapest, 9 November 1979)

– Orientalist, Arabian and Turkish linguist, and writer on cultural history. He studied at the Universities of Budapest, Istanbul, Vienna and Leipzig. He participated in the “Young Turks” reform movement of the 1910s. Between 1912 and 1919, he was a professor at the Oriental Commerce Academy; between 1920 and 1947, at the Oriental Institute of the University of Economics, Budapest

and, from 1948, at the Arabic Department of the University. Meanwhile, he founded the Faculty of Islam at the Santiniketan Institute in Bolpur (West Bengal, India), on the invitation of Rabindranath Tagore. He was a professor there between 1929 and 1932. He took several excursions to the Middle East and the Far East. From 1920, he regularly lectured at Turkish, Egyptian and Hindu universities. He converted to Islam and was involved in the cultural history of the Islamic people. He was respected worldwide as one of the outstanding experts of Arabic literary science, and was offered membership in the Arabic, Syrian, Iraqi and Italian Academies. Many of his essays and books were published in Hungarian and foreign languages. Among his publications are: *Allah Akbar* (1936) and *In the Pale Light of the Crescent Moon (A félhold fakó fényében)* (1957) He was buried according to Islamic rites, in the presence of the Islamic countries’ diplomatic representatives. According to his wishes, his sepulchral monument is decorated with a turban. His statue was dedicated in a Budapest Park bearing his name. – B: 1150, 1138, 1153, 1257, T: 7675.

**Germany, Hungarians in** – From the Medieval period Hungarian students, young men and apprentices went to Germany to study and to acquire higher experience in various trades. After World War I, a growing number of Hungarian artists, professors, engineers, agricultural and industrial workers lived and worked there. Toward the end of World War II, significant numbers of Hungarian army units were sent to Germany in order to be refitted; but in the meantime, the War ended and they became POWs of the Western forces. When they were about to be transported back to Hungary, many, mostly officers, managed to remain in Germany, instead of falling into the hands of the Soviets and facing deportation to the Soviet POW camps. During this period, many civilians, mainly those of German origin fled to Germany in fear of Soviet occupation and Hungarian communist takeover – which actually happened. After 1945, some 30,000 Hungarians remained in Germany. Deportation of ethnic Germans from Hungary started in earnest following the decision of the Potsdam Conference in 1946. Until 1948, 185,655 ethnic Germans with Hungarian citizenship were deported from Hungary to various occupational zones in West Germany. Only from 1945 can one talk about a group of Hungarians settled and living in Germany. After the crushed Revolution and Freedom Fight of 1956, some 25,000 Hungarians found refugee status in Germany. After 1961, approximately 25,000

ethnic Hungarian workers from Yugoslavia came to Germany. After the “Prague Spring” in 1968, circa 5,000 Hungarians from Slovakia escaped to Germany. Between 1975 and 1989, some 45,000 Hungarians from Transylvania (*Erdély*, now in Romania) emigrated to Germany. Their numbers considerably increased in the 1990s. From the former East Germany some 15,000 Hungarians were incorporated into the united Germany. From 1990, about 30,000 Hungarian experts lived and worked temporarily in Germany. The bulk of Hungarians (75%) live in Southern Germany (Bavaria, Baden-Württemberg and Hessen), while 80% of Hungarians in Germany have German citizenship. At the turn of the millennium, some 120,000 Hungarians lived in Germany, although other estimates give a smaller figure. It should be noted that only 60% of them came from present-day Hungary, 40% are from former Hungarian territories ceded to neighboring states (Slovakia, Romania, Carpatho-Ukraine, Serbia, Slovenia) by the Versailles-Trianon Dictated Peace Treaty in 1920, and where 3.5 million ethnic Hungarians live separated from their mother country. Germany is a major center of Hungarians living in the West. Such important institutes as the *Radio Free Europe*, the *New Horizon (Új Látóhatár)* literary review, the *Guardian of the Nation (Nemzetőr)*, the *Hungarian Institute of Munich (Müncheni Magyar Intézet)*, the *Hungarian House in Berlin (Magyar Ház Berlinben)*, and the *Hungarian Gymnasium (High School) at Burg-Kastl (Burg-Kastl-i Magyar Gimnázium)* operate here. The Hungarian Roman Catholic Church has one Chief Pastorate and eleven parishes in Germany: in Aachen, Augsburg, Bamberg-Nuremberg, Essen, Frankfurt, Hamburg-Berlin, Cologne, Mannheim-Freiburg, Munich, Stuttgart and Weingarten, and there are Catholic Pastoral Care Services in seven cities. There is a *Mindszenty House* in Cologne, and a *Hungarian Catholic Mission* and the *Döpfner House* in Munich. There are also the *Hungarian Catholic Intellectual Movement (KMÉM)*, the *Hungarian Maltese Charity Service*, the *Hungarian Caritas Service*, the *Cultural and Literary Clubs*, the *Boy Scouts Troops*, as well as choirs and weekend schools. The number of these associations is between 50 and 60. The Hungarian Protestant Churches have five united congregations in Germany: in Cologne, Stuttgart, Nuremberg, Ulm and Munich. In addition, there is a Hungarian Lutheran Pastoral Care Service and a Reformed Hungarian Pastoral Care Service in Germany. It is expected that the number of Hungarians in Germany will further increase in the future, as Hungary is now a member of the European Union. – B: 1265, 1364, 1382, T: 7103.

**Geró, Ernő** (Ernest) (Singer) (Terbegec now Trebusovce, Slovakia, 8 July 1898 - Budapest, 12 March 1980) - Politician, economist, communist leader. He began medical training in Budapest, but did not finish it. His political career began in the Young Socialist movement and continued at the Young Communist Workers Association. In 1919, he fled to Vienna. He was active as Communist Party organizer and conducted Party services as part of the international Communist movement in several European countries. During World War II, as a representative of the Hungarian Communist Party, he was D.Z. Manuilski's advisor in the Komintern. After 1945, he was given key roles in the Government's economic affairs. In 1945-1956, he held ministerial posts of Commerce, Transport, Finance, State and National affairs, and was also Deputy Prime Minister. From 1949 to 1952, he was President of the People's Economic Council. Between 1949 and 1953, together with Mátyás (Matthew) Rákosi and Mihály (Michael) Farkas, he was a member of the top-secret dictatorial committee that exercised complete control over the country. Following Rákosi's dismissal, he was first secretary of the

Central Leadership. He viciously attacked the Revolution in a radio speech on 23 October 1956, and refused all concessions. He is responsible for calling in the Russian Army to defeat the Revolution. He was stripped of all his official posts on 25 October 1956, and fled to the Soviet Union. On his return, the *Hungarian Socialist Workers' Party* (*Magyar Szocialista Munkáspárt – MSZMP*) held him accountable for illegal activities and political distortions committed between 1948 and 1956, and he was discharged from the Party. His retirement years were spent in complete withdrawal, doing translation work. His main works: *The Hungarian People's Economical Five-Year Plan (A magyar népgazdaság öt éves terve)* (1949), and *In Battle for a Socialist People's Economy (Harcban a szocialista népgazdaságért)* (1950). He received the Kossuth Prize in 1949. – B: 0883, 1090, T: 7667. → **Rákosi, Mátyás; Vas, Zoltán; Freedom Fight of 1956.**

**Gerster, Antal** (Anthony) (Kassa, now Košice, Slovakia, 7 June 1825 - San Jose, CA, USA 1897) – Officer of the Hungarian National Defense Army. He attended the Polytechnic in Budapest. In the 1848-1849 War of Independence, he served as Captain of the Technical Corps. After its defeat, he migrated to Prussia, and in 1851, he landed on the North-American continent. He owned a prosperous construction firm in Brooklyn, and participated in the social life of the Hungarian immigrant colony. In the American Civil War, he served in the Fremont Division, first under General Alexander Sandor Asboth, later under General William S. Rosecrans, finally under General Ulysses S. Grant; he retired as Colonel of the Artillery. Many of his large-scale constructions are known in the USA. – B: 1143, 1020, T: 3233.

**Gerster, Béla** (Kassa, now Košice, Slovakia, 20 October 1850 - Budapest, 3 August 1923) – Engineer. He studied at the Vienna Polytechnic. From 1874, he was a municipal engineer in Vienna. He was a colleague of István (Stephen) Türr, and member of the expedition that marked the path of the Panama Canal in 1876. He mapped the regions of upper Paya and Cue. In 1877 he was chief engineer of the Ferenc Canal consortium by Becéj (a.k.a. Duna-Tisza-Duna Canal, now Kanal Dunav-Tisa-Dunav in Serbia) and was the project manager at its construction. In the meantime, he took part in the development of István Türr's water management plan. He served as a lieutenant in the 1878 Bosnian war. Upon the request of István Türr, he acquired the construction permits in Athens, Greece for the Korinthos Canal. He became the executive chief engineer of the Corinth Canal Construction Co. and project manager of constructions. He designed the route map for the Athens-Larisa-Tempe Valley Railroad between 1881 and 1886. In 1886, he returned to Hungary and designed the railroad between Kassa and Torna in 1889, and the Szepes-Mecenzef railroad in 1893. In 1919, he was the construction director of the Danube-Tisza Canal. – B: 0942, 0883, 1020, T: 7662. → **Türr, István.**

**Gertler, Endre** (Andrew) (Budapest, 26 July 1907 - Brussels, Belgium, 23 July 1988) – Belgian violinist of Hungarian descent. Until 1925, he studied with violinist Jenő (Eugene) Hubay and Zoltán Kodály. From 1920, he was already giving recitals and taking part in concerts. In 1928 he settled in Belgium. From 1940, he was a teacher at the Brussels Conservatory of Music; then, from 1954 to 1959, taught at the Cologne Academy and, from 1964 to 1978, at the Hanover Academy in Germany. He was first violinist of the Gertler Quartet (1931-1951). He was a friend of Béla Bartók and his sonata-partner. In many music centers of Europe he premiered Bartók's sonata for solo violin in 1945. By recording all the violin compositions of Bartók, he won the Grand Prix

de Disque in Paris in 1967. His Quartet first presented A. Honegger's III, and Bartók's VI String Quartet. He taught at the Bartók Seminary of Budapest and Szombathely, and at the Royal Conservatory of Music, Brussels. – B: 1197, 1138, T: 7456, 7684.→**Hubay, Jenő; Zathureczky, Ede; Bartók, Béla; Kodály, Zoltán.**

**Gertler, Victor** (Budapest, 24 August 1901 - Budapest, 5 July 1969) – Producer. He started as a bank-clerk, then studied singing and acting at the school of Szidi Rákosi, and was on the stage of the National Theater in Pécs (*Pécsi Nemzeti Színház*). Between 1927 and 1933, he worked in Berlin, Vienna, Paris and London. He learned the film trade at the UFA Studio in Berlin. He returned home in 1933. During World War II, he was abroad, but returned in 1945 and started working in the film industry. He was the first manager of the nationalized Hunnia Film Industry. He taught at the Academy of Dramatic Art from 1948 to 1954. Some of his major films are: *Nurse Mary (Mária nővér)* (1933); *The Bartered Man (Az elcsereált ember)* (1938); *Running Over (Gázolás)* (1948); *State Department Store (Állami Áruház)* (1952); *Dollar-Dad (Dollárpapa)* (1956); *Golden Man (Aranyember)* (1962), *And Then the Chap (És akkor a pasas)* (1966). He was a recipient of the Kossuth Prize (1957) and the Outstanding Artist title (1966). – B: 0883, 1160, T: 7103.

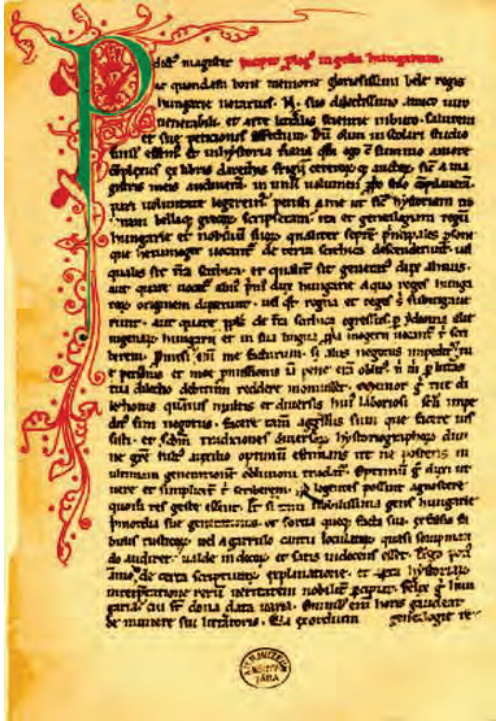

**Gerzson, Pál** (Paul) (Hird, 25 January 1935 - Budapest, 28 May 2008) – Artist. He was educated in the schools of Nagyvárad (now Carei, Romania), Ungvár (now Uzhhorod, Ukraine) and Kőszeg. He studied painting at the Academy of Fine Arts, Budapest, as a student of János Kmetty, Endre Domanovszky and Gyula Hincz, between 1949 and 1953. From 1960 until 1974, he taught acting at the Academy of Applied Arts, while from 1974, he taught at the Academy of Fine Arts, where, from 1986 until his retirement in 1990, was Head of the Art Department. He started painting in a representational spirit, later developing a world in which he formed motives into fantastic outlines, proclaiming the magnificence and beauty of life. His murals, panneaux, intarsias and stained-glass windows show that he was equally at home in monumental genres as he was in panel painting. His famous murals may be found in Budapest, Pécs, Győr, Baja, and even in Helsinki. He first appeared in public with his works in the Ernst Museum in 1967, later in the Art Gallery in 1982, and then in a one-man exhibition in the Vigadó Gallery of the Municipal Concert Hall of Budapest in 1993, all of them marking milestones in his creative oeuvre. His work was exhibited in numerous collective and individual exhibitions, right up to the one-man show at Gödöllő on the occasion of his 77th birthday. In the 1990s, he played an active role in a number of societies and institutions in the field of art, e.g. Fine Arts (*Szépművészeti*) Society, which he founded and became its president; in 1992, he was one of the 22 foundation members of the Hungarian Academy of Arts. He was an outstanding figure in his contemporary Hungarian art of painting, who taught generations. His work was recognized with the Mihály Munkácsy Prize in 1969 and again in 1971, and he received the title of Meritorious Artist in 1986. He was also presented with the Oeuvre Prize in 2006. – B: 0874, 1704, T: 7456.→**Kmetty, János; Domanovszky, Endre,**

**Gesta** – A genre, a lengthier version of the Medieval Latin chronicle, including several imaginary persons and characters. Usually it is a story of a historical personality (king, emperor), or the historical exploits of a nation. While the annals and chronicles strictly follow chronology, a *gesta* is much more concerned about causality and correlation. It

was very popular in Western Europe and in the Byzantine Empire between the 5-12th centuries. Medieval Hungarian historical chroniclers, Anonymus and Simon Kézai each created a *Gesta Hungarorum*, the *Story of the Magyars*. – B: 1150, 1138, 11231, T: 3240. →Anonymus; Kézai, Simon.

**Gesta Hungarorum** – There are two *gestas* of the same name. (1) The older one is from

The first page of Anonymus:  
*Gesta Hungarorum*

the end of the 12th century, written in Latin. Its author is unknown, hence the name Anonymus, for he never revealed himself directly, only as *P magister dictus*. It is about Hungarian mythology and the history of the settlement of the country in the Carpaian Basin. Following the legends of origin, it presents Prince Álmos and the seven chieftains. It talks about the migration to the new country, the incorporation of the Khabars, joining forces with them, the gradual control of the Carpathian Basin, together with detailed placements of different clans and family groups in the new homeland. It describes the epoch of the military expeditions; but when it comes to the era of King István I (St Stephen, 997-1038), the story abruptly ends. In many ways, Anonymus projected his own world into his work and that makes it an important historical and linguistic relic of his era. The author did not use much of any written resources. He only used some of the works of Justinus, and

the 10th century works of Regino, the Abbott of Prüm; but he preserved a lot from ancient Hungarian poetry and this comes through in his description of the clans' traditions. Anonymus wrote only about the history of Árpád's people. Since 1746, this singular manuscript has been in the center of scientific attention. There are different theories as much about the proper timing of his work, as about his identity. The most probable date of this work is around 1196. (2) Master Simon Kézai, a cleric of King László IV (Ladislav) the "Cumanian" (*Kun*), wrote his *Gesta* between 1282 and 1285. He epitomized the Ancient Chronicle and added the story of Csaba and his Khabar people to it. Since the story of the Huns is already in the Annals of Pozsony (now Bratislava, Slovakia) Kézai could not have authored it. He recorded the king's military triumphs of Morvamező and Hódtó, and added two appendices, treating the subject of the newcomer clans and the origin of the servants. – B: 1150, 1230, 1257, T: 3240. →Anonymus; Kézai, Simon; Kézai Chronicle; *Gesta Ungarorum*; Árpád.

**Gesta Ladislai Regis** – This *gesta* is from the time of King Kálmán (Coloman, 1095-1116). It was prepared ca 1100, and is the continuation or second part of the *gesta* from the 11th century. It describes events between 1060 and 1095 related to King Salamon (Solomon) and King László I (St Ladislav). – B: 1091, 1257, T: 7103. →Salamon King; László I, King.

**Gesta Ungarorum** – The oldest Hungarian historical *gesta*. It was Mátyás (Matthias) Bél, who pointed out that the *Gesta* of Anonymus and the subsequent chronicles have surprising similarities in some chapters. Later this was explained by the use of a common source. This source is seen and called as the *Gesta Ungarorum* of the 11th century. There is a general belief that the writing of this ancient *gesta* began during the rule of King András I (Andrew, 1046-1060) and continued during the 12th century. While Anonymus selected only certain details of this presumed *gesta*, the *gesta* writers of the 13th century and the following editors of the great chronicles used it much more extensively. – B: 1150, T: 3240. → **Gesta Hungarorum; Bél, Mátyás; András I, King.**

**Gestetner, Dávid** (Csoma, 20 March 1854 - London, England, 18 March 1939) – Inventor. He emigrated to the USA as a child, then moved to England a few years later and settled in London. He opened a small shop in 1880, where he produced his first duplicating machine, the so-called “cyclostyle-toll”. Later, he invented the “stencil”, and produced the office mimeograph, the “cyclostyle-mimeograph”. Out of this, he developed the automatic stencil mimeograph, the “automatic cyclostyle”, operated by a hand crank. This machine was further improved and was developed into the modern, fully automatic, stencil mimeograph. – B: 0883, 1126, T: 7662.

**Geszi, László, Song of** – A lyrical verse, propagandist by nature, dated 1525. It is the oldest poem written in the Hungarian language. Since then it has only lost a few words and letters. It was destined to serve as a support for the Central Power by the gentry assembled in Hatvan, and as a call for solidarity against the Turks. Its author was a nobleman from County Gömör, Warden of the Castle of Esztergom, born probably around the end of the 15th century and died between 1548 and 1560. As the poem indicates, he had some humanist learning and was probably a well-known songwriter of his time. – B: 1150, T: 3240.

**Geyer, Stefi** (Stephanie) (Budapest, 28 June 1888 - Zürich, 11 December 1956) – Concert violinist. She was the daughter of Josef Geyer, a police physician, who played the violin himself. When she was 3 years old she started playing the violin, with remarkable results. She subsequently studied under Jenő (Eugen) Hubay. Béla Bartók and Othmar Schoeck, who were both in love with her, wrote violin concertos for her. Bartók's first violin concerto was only published after he and Geyer had both died. Willy Burkhard dedicated his 1943 violin concerto jointly to Geyer and Paul Sacher. In 1920, she married Swiss composer Walter Schulthess. She moved to Zurich, where she gave concerts, and taught at the Zurich Conservatory of Music from 1934 to 1953. She schooled numerous musicians, among them composer Klaus Huber. – B & T: 7617. → **Bartók, Béla; Hubay, Jenő.**

**Géza I, King** (? - 25 April 1077) – Hungarian king, king Béla I's eldest son. He reigned between 1074 and 1077. After the death of his father, he obtained the armed assistance of the Poles to procure dukedoms for his brothers László (Ladislav) and Lampert, and aligned himself with King Salamon in his military ventures; but rebelled and was defeated at Karcag in 1074. Together with his brother László, and Moravian Count Ottó, he defeated King Salamon and pressed Emperor Hendrick IV to retreat. He was crowned King at Székesfehérvár on 14 March 1074. In 1075, he founded the Abbey of Garamszentbenedek (now Hronský Benedik, Slovakia). He had two sons, Kálmán and

Álmos, from his marriage to Greek Princess Synadene. Michael Dukas, Emperor of Byzantium sent him a crown as a gift and it became the lower part of the Hungarian Holy Crown. – B: 1133, 0883, T: 3312.→**Salamon, King; László I, King; Kálmán, King; Holy Crown, Hungarian.**

**Géza II, King** (1130 - 31 March 1162) – Hungarian king from 1141 to 1162. Following his father King Béla II, he ascended to the throne at the age of fourteen, on 16 September 1141. Until he reached maturity, his mother and Bán Belos governed the country. He reached the age of maturity at the time he recaptured Pozsony (now Bratislava, Slovakia) from Boris and, with Bán Belos' assistance, he defeated Boris' ally, Prince Henry Jasomirgott on 11 September 1146. During his reign, the second Crusade went through the country and the Saxons of Transylvania (*Erdély*, now in Romania) and the Cipsers (Zipsers) of German origin settled in Szepes County in Northern Hungary (Upland, *Felvidék*, now Slovakia). The Hungarian-French cultural connections were further strengthened. Assisting his brother-in-law, Prince Izjaszlav, he led six campaigns into Russia between 1148 and 1152. In 1154, a Byzantine war broke out and his brothers, István (Stephen) and László (Ladislav) fled to Emperor Manuel. Near the end of his reign, the previously strong relations with Frederick Barbarossa ceased. At the urging of Archbishop Lukács, bonds were established between the Pope and the French-Norman connections. Upon his death, he was buried in Székesfehérvár. From his marriage to Eufrozina, daughter of Mstislav I, Prince of Kiev: István (Stephen), Béla, Géza, Árpád, and four daughters were born. – B: 1133, 0883, T: 3312.→**Cipszers; Cipszers Anthem and Hymn; Saxons of Transylvania.**

**Géza-István, Reigning Prince** (Géza Stephen) (940 - 1 February 997) – He was the Reigning Prince of Hungary between 971 and 997; son of Kagan Taksony, great grandson of Reigning Prince Árpád. Through his envoys he made peace between Hungary and Germany in 973. He laid down the foundation of the Hungarian Kingdom in 972-973, and strengthened the weakened clans after the settlement by Árpád. At the time, four independent powers were ruling in Hungary: the Principality of Géza, the sons of Koppány and Szorende, the Gyula of Transylvania, and the Ajtony of Marosvár. Géza recognized the perils of such an alignment and all his life strove to persuade the chiefs to unite under one banner. Where he was unsuccessful, he tried to establish alliances through marriage toward the same end. This is why he married Saroldu, the daughter of the Gyula, and later gave away his daughter to Sámuel Aba. Using his military power, he restrained the western nations from adventuring into Hungarian territory. Using family connections, he gained the alliance of the Gyulas and the Khabars. He moved his capital from Fehérvár (now Székesfehérvár) to Esztergom. At that time, all political thrusts were influenced by religious ideals. By embracing Western Christianity, he endeavored to unite the various religious factions within the Carpathian Basin under the Christian banner. It was inevitable that Géza's people forced to be baptized through Saroldu's persistent efforts. According to the records in the Saint Gallen chronicles (*Necrologium*), Géza was bestowed the name István (Stephen) at his christening by Bishop Bruno of Verdun. He was the first leader to fully assess Hungary's political situation. From the West he invited missionaries and priests, and employed the force of the sword to convert the whole country to Christianity. According to Bishop Pilgrim's report, more than 5,000 of the nobility were also baptized at that time. The sign of the growth of Géza's authority

is shown in a letter from the Holy Roman Emperor to Bishop Pilgrim. In it, he addresses Géza-István as “king”, and the country as a “Kingdom”, although he was not crowned with a crown sent by the pope. Thus he was not recognized as a Christian King; only his son István received this privilege. Through his envoys he signed a peace agreement with the Emperor in 973. His children were born as Christians. Géza-István started the organization of the Western Christian Church. He founded the Abbey of Mount St. Márton (St Martin) at Pannonhalma, and a Convent for the nuns in Veszprémvölgy. In 996, he married his son to Princess Gizella of Bavaria, thereby strengthening the country’s western connections. He built a cathedral at Fehérvár in honor of the Blessed Virgin Mary, which was later rebuilt by his son. He established several bishoprics. He was buried at the Basilica of Fehérvár. From his marriage to Saroldu, a son, Bajk (Vajk-István, his successor) and four daughters were born. The burial chapel of his second wife, Adelheid was uncovered in 1970 under the staircase of the church in Székesfehérvár. After his death, the Church could not canonize him because of his “bloodstained hands”, as described in the István legends. Within Géza-István, the struggle between the centuries-old nomadic pagan god of the *puszta* (steppe) traditions and the Christian God made him to say he was powerful enough to worship two gods at the same time. – B: 0942, 0883, T: 3312. → **Saroldu; Árpád; Árpád, House of; István I. King.**

**Ghillány, Baron István** (Stephen) of Láz and Bernicze, (Eperjes, now Prešov, Slovakia, 29 January 1910 - ? ) – Composer. He started his education in Eperjes (1916-1920), then, continued at the Jesuit Pius College of Pécs (1920-1925), completing secondary schooling at Sátoraljaújhely (1925-1928). He studied at the Vienna Academy of Commerce from 1929 but, under the influence of Jenő (Eugene) Zádor, soon transferred to the new Conservatory of Music of Vienna, where he graduated under Rudolf Nilius in Music Composition (1934). However, at his father’s request, he worked with the Generali Insurance Co. in Prague, then in Pozsony (now Bratislava, Slovakia). In 1936, he took over his father’s Eperjes agency. Then, in 1939, he moved with his family to Budapest, completed the training course for their trade, and was appointed to Kassa (now Košice, Slovakia) as head agent. At the request of his father-in-law, he moved to Pátka. During and after World War II, he went through many adventures, and not once was he near to death. From 1947, he was a pianist and composer in the Eperjes coffee house band of Eduárd Eremiás. From 1 January 1951, he was on forced labor in a Czechoslovakian concentration camp. In 1952, he became disabled as a result of an industrial accident. The same year, he became member of Eremiás’ band again and taught piano and music theory at the School of Music, as well as coaching, and from 1955 to 1957, he was an orchestral musician first in Kassa, then in Liptószentmiklós (now Liptovský Mikuláš, Slovakia) and Rózsahegy (now Ružomberok, Slovakia). He spent two years as a conductor in Ótátrafüred, and five years in Bártfafürdő (near Bardejov). From 1973 until his retirement, he lived in Pozsony and worked as an auxiliary music teacher in the local music school at Pozsonyligetfalu (now Petržalka, Slovakia) and as a composer of church music from 1975. His *Piano Suite (Zongorasztvit)* became widely performed; his church music (e.g. *Missa Pastor Bonus* and *Ave Maria*) is also performed in Slovakia, Hungary and Austria, while his orchestral works include a symphonic poem, entitled, *Rainbow over Branyiszko (Szivárvány Branyiszko fölött)* (1953); *Vals Magiolato*, piano piece (1955); *Daybreak (Hajnalhasadás)*; *Intermezzo for Orchestra* (1966); *Lullaby (Bölcsődal)* (1971), and *The Bishop’s Dogies (Püspöki kutyácskák)*. – B: 1083, 1890, T:

7456.

**Ghymes Ensemble** – Was formed in 1983 of Hungarian musicians of the Academy of Pedagogy at Nyitra (*Felvidék*, now Nitra, Slovakia), who previously were involved in ancient, classical and rock music. Their first dance houses and folk music concerts were organized in the youth camps at the village of Gimes – in archaic writing *Ghymes*, where the ensemble's name came from, assumed in 1984. Their music is based on Hungarian and Middle- and East-European music, on unique Ghymes music, and on improvisations. The founding members are the Szaka-brothers: Gyula (Julius) and Tamás (Thomas). The ensemble has a growing popularity. Their recordings include *Message (Üzenet)* (1993); *Fire-jumping (Tűzgrás)* (1996); *Ghymes Concert* (2003); *Far-distance flying (Messzerepülő)* (2006), and *Spark-eyed (Szikraszemű)* (2010). Among their numerous distinctions are: the Don Quijote Prize (2001), the eMeRTon Prize (2002), the Artkiszjus-Prize (2005), the Pro Renovanda Cultura Hungariae Foundation Prize, the Hungarian Heritage Prize (2008), and the Kossuth Prize (2011). – B: 1031, T: 7103. → **Dance House Movement.**

**Giczy, János** (John) (Alszipor, 28 December 1933 - ) - Painter. He attended Teachers' College in Sopron (1951-1953); the Academy of Fine-Art in Budapest (1953-1954); the Pedagogical Academy in Budapest (1954-1955) and in Eger (1955-1957). He taught at the Training Academy for Kindergarten Teachers, Sopron (1959-1999). From 1957, he exhibited his paintings in Sopron, Győr, Budapest, Kaposvár, Hatvan, Gödöllő, Nagycenk and Hódmezővásárhely. He had one-man shows in Krakow (Poland) (1977), Kismarton (1977), Landeck (Austria) (1990) and Kempten (Germany) (1992). His works include unique wing-altars and paintings, such as *Village Men (Falusi emberek)*; *Vigil (Virrasztás)* and *Golgota*. The title of his autobiography is *Invitation (Invitáció)* (1997). He was awarded a number of prizes, including the Realista Triennial (Sofia, 1985), the Pannonia Prize (Kismarton, 1975), and several other Hungarian prizes. – B: 0874, 1653, T: 7617.

**Gidai, Erzsébet** (Elizabeth) (Kecskemét, 1940 - Budapest, 19 August 2008) – Economist. She was one of five children in a tradesman family. She studied at the University of Budapest, obtaining a Degree in Mathematical Economics in 1962. She obtained Ph.Ds. at the Universities of Budapest and Berlin, and an Academic Doctorate in Political Economics, granted by the Hungarian Academy of Sciences in 1988. She began her career in the Hungarian National Bank, later working in research institutes of the University. She became Professor in the Faculty of Political Economy (founded by her) at the University of Sopron, lectured on Economics and Economic Forecasting; also at the Goethe University of Frankfurt, among others. She was Head of the Sociological and Forecasting Institute at the University of Budapest; Vice-President of Class IX Forecasting Commission of the Hungarian Academy of Sciences, and took part in similar activities abroad as a researcher and specialist. She was a Member of Parliament of the Hungarian Justice and Life Party (*Magyar Igazság és Élet Pártja – MIÉP*), later as an independent member (1988-1992). Her fields included the study of the Hungarian economy, in particular national indebtedness, privatization, development, living conditions and conditions of the restructuring of the Hungarian economy. Her 300 published works (also some books) include *Hungary After the Turn of the Millennium (Magyarország az ezredforduló után)*, co-editor (1999), and *Future of Hungary:*

*Hungaria in aeternum (Magyarország jövője: Hungaria in aeternum)*, studies, (2005). – B: 1603, 1643, T: 7456.

**Gidran Horse** – A breed of chestnut Hungarian Anglo-Arabian horse. It was bred at the Mezőhegyes State Stud Farm in 1816 with an import of the desert-bred Arabian horse, named Siglavy Gidran. He was believed to be of the Seglawi Jedran strain. In 1817, a chestnut stallion, known as Gidran Senior served Arabian, Turkish, Transylvanian and Spanish-Naples mares. Six colts, resulting from these mares, went on to become chief stallions at Mezőhegyes. In 1820, the Spanish-Naples mare, Arrogante, foaled the colt, the later Gidran II. He became the breed's foundation stallion. Until 1855, the dams of the Gidran chief stallions were 33% Arabian, 22% Transylvanian, 16% Spanish, 16% Nonius, 6% Hungarian native, and 6% Gidran mares. Then English thoroughbreds were increasingly introduced in 1893. Thoroughbred stallions were used in three generations subsequently to improve the breed. The Shagya Arabian stallions, Gazal III and Siglavy II, were then used as chief stallions, in order to establish a more stable Anglo-Arabian type. The result was a heterogeneous type known for their excellent jumping and galloping ability. The modern Gidran is a high quality riding and driving horse that achieved recognition in international competitions. They are well known for their athletic ability, well-balanced temperament and sturdy build. Gidrans excel at the Fédération Equestre Internationale's disciplines, where the breed's speed, endurance, agility and courage are showcased. It became an endangered breed; there were less than 200 Gidrans left in the world. – B&T: 1307.

**Gimes, Miklós** (Nicholas) (Budapest, 22 December 1917 - Budapest, 16 June 1958) – Journalist, politician. He began medical training at the University of Szeged, but later abandoned his studies. During World War II, he was conscripted into the labor service, but escaped and joined Tito's partisans. In 1945 he worked for the Communist Party's daily, *Free Nation (Szabad Nép)*, writing the Foreign Affairs column. With several others he was responsible for shaping the paper's cultural-ideological image. In 1953, he distanced himself from Rákosi's line. In 1954, he was a correspondent in Zurich, Berlin and Paris. He called for the rehabilitation of László (Ladislav) Rajk, and demanded that the guilty be brought to justice. This led to his expulsion from the *Hungarian Workers Party (Magyar Dolgozók Pártja – MDP)* in 1955. He became one of the most radical of the followers of Imre (Emeric) Nagy. He proclaimed himself anti-Stalinist and rejected the one-party system. In 1956, he was reinstated in the MDP. In contrast to Imre Nagy, he welcomed the outbreak of the uprising on 23 October 1956. Together with Péter Kende, he published two short-lived newspapers, *Hungarian Liberty (Magyar Szabadság)* in October, followed by *October Twenty-Third (Október Huszonharmadika)* in November. He refused to recognize the Kádár Government after the Russian army occupied the country on 4 November, and organized strikes in protest. On 5 December, he was arrested and stood trial as a third-level accused in the Imre Nagy case. He was charged, among others with conspiracy to overthrow the People's Democratic State. He was

sentenced to death and executed. Initially, he was buried in an unmarked grave but was rehabilitated and reburied as a hero by the Hungarian Government on 16 June 1989. – B: 0883, 1257, T: 7667.→**Rákosi, Mátyás; Rajk, László; Nagy, Imre.**

**Gion, Nándor** (Ferdinand) (Szenttamás, Hungary, now Srbobran Serbia, 1 February 1941 - Budapest, 27 August 2002) – Hungarian writer from Vojvodina, Serbia (formerly part of South Hungary, Southland). He trained as a mechanic, thereafter studied Hungarian Literature at the University of Újvidék (now Novi Sad, Serbia) (1963), worked at the Hungarian Theater (1983-1985) and at the Hungarian Radio Station (1963-1983 and 1985-1993), Újvidék. He moved to Budapest in 1993. His essays and books appeared from 1963 on. He wrote 19 books, among them: *Amphibian in the Cave (Kétélűiek a barlangban)* novel (1968); *My Brother, Joab (Joáb, testvérem)* novel (1969); *Mail Robbers (Postarablók)* novel (1972); *Soldier with Flower (Virágos katona)* novel (1973); *Volley Fire for a Black Buffalo (Sortűz egy Fekete Bivalyért)* youth-novel (1982), and *This Day is Ours (Ez a nap a miénk)* novel (1997). He was honored with several awards, among them the Neven Prize, the Tibor Déry Prize, the Sándor Márai Prize, and the Laurel Wreath of the Republic of Hungary. – B: 0937, 1257, T: 7103.

**Girgác** – An alternate name applied to the Göcsej area in the 19th century, by the students of the City of Pápa College. – B: 1134, T: 7684.

**Girl Scouts in Hungary→Boy Scouts and Girl Scouts in Hungary.**

**Giskra, Jan** (15th century) – Moravian mercenary leader. In ancient scripts, his name varies as Jiskra or Iskra. In his youth, he soldiered in Italy. At the beginning of his career he fought on the side of John Huss; but later changed sides and served as a mercenary for the Habsburgs. He came to Hungary under the reign of King Zsigmond (Sigismund of Luxembourg) (1387-1438), rendered some services to him and also served his successor, Albert. Elisabeth, the widow of Albert invited him into her service in 1440. He entrenched himself in Upper Hungary (Upland, *Felvidék*, now Slovakia), conquering several cities. After the death of King Ulászló I (Wladislas) (1440-1444), he became the virtual overlord of Northern Hungary. Because of the Governor, János (John) Hunyadi's preoccupation with the Turkish menace at the southern border of Hungary, he had no chance to fight Giskra, who took control over the cities of Kassa, Eperjes, Zólyom, Körmöcbánya and Selmechánya (now Košice, Presov, Zvolen, Kremnicka, Banska Stiavnica in Slovakia). For the young King Mátyás I (Matthias Corvinus) (1458-1490), his presence created difficulties; but in 1462 they came to an understanding and the King took him into his service. He received several forts along the River Tisza as a donation. Out of his Hussite followers, the Black Army was organized, and became famous all over Europe. Giskra remained loyal to King Mátyás until his death. – B: 1078, 1133, T: 3233.→**Zsigmond, King; Ulászló I, King; Hunyadi, János; Mátyás I, King.**

**Gizella, Blessed** (Kesla, Gisela) (Regensburg, Bavaria, 985 - 1050) – Hungarian Queen, consort of István I (St Stephen) (997-1038), first king of Hungary. She was a Bavarian princess. Her father was Bavarian Prince Henrich IV, and her mother Princess Giselle. Her grandfather was the first German king, Henrich, her other grandfather was the King of Burgundy. She wanted to become a nun; but Hungarian Reigning Prince Géza-István asked for her hand in marriage for his son István. They were married around 996. Priests and knights accompanied her from Bavaria to Hungary. She not only had an important role in spreading the Christian faith in the country, but she established a convent at

Veszprémvölgy, as well as at Esztergom and Somlyóvásárhely. With her ladies she made many altar cloths, vestments and mantles. The coronation mantle of Hungary is attributed to her handiwork. After the death of her son, St. Imre (St Emeric) (1030), and following the death of her husband (1038), she withdrew from court; but had a hard time, for the new ruler, Peter Orseolo, confiscated her properties and put her under house arrest in Veszprém. Later, the new ruler, Sámuel Aba (1041-1044) freed her. In keeping with Bavarian traditions, she returned to Bavaria. In Passau she entered the Order of the Benedictine nuns and died there; her relics are kept in a local church. Other tradition says that she died in Hungary and was buried in Veszprém. The Church began the beatification process in 1911; however, her canonization has not yet been completed. – B: 0942, T: 7103.→**István I, King; Géza-István, Prince; Aba Sámuel.**

**Glád** – A tribal leader at the time of the Hungarian settlement in the Carpathian Basin (896). He ruled over the Temes and Szörény regions. According to Anonymus, the chronicler, Glád conquered his realm with the help of the Cumanians. Kadocsa, Szoárd and Vajta conquered Glád's territory within two weeks. A decisive battle was fought in the vicinity of the Avar redoubt at Zsadány. Glád lost the battle despite the fact that the Cumanians, Bulgars and Vlachs (later called Romanians) helped him. The defeated Glád swore an oath of allegiance and the Hungarians let him rule the territory during his lifetime, for he belonged to a kindred tribe. The treaty with him was similar to that which the Hungarians had made with Marót shortly before. There are some Avar rings, earthenworks that survived relatively well in this region. – B: 0941, 1133, T: 7669.→**Anonymus.**

**Glattfelder, Gyula** (Julius) (Budapest, 18 March 1874 - Szeged, 30 August 1943) – Catholic Bishop. He completed his Theological Studies in Budapest, and was ordained in 1896. He taught religion, then became Professor of Rhetoric at the Central Seminary, Budapest (1909-1911). He established the St. Imre College in Pest in 1900, and in Buda in 1908, for needy seminary students. He was appointed Bishop of Csanád in 1911, and resided in Temesvár (now Timișoara, Romania). When the Versailles-Trianon Peace Treaty ceded Transylvania and Bánát to Romania in 1920, he protested the Romanian Agrarian Reform, in order to protect Roman Catholic schools. Romanian authorities demanded his dismissal by the Pope, and he was removed from his bishopric to Szeged, Hungary, in 1923. There, he founded the Seminary, a Teacher Training School, and a College for apprentices. With the co-operation of the cultural politician, Kúno Klebesberg, he built the Votive Church of Szeged with its Dóm Tér (Dome Square), surrounding the Cathedral, the Seminary, and the University of Szeged. He repatriated the relics of St. Gellért from Venice to Hungary. When he was appointed Archbishop of Kalocsa, he excused himself due to illness. Some of his works are: *Leo XIII and the World's Historic Vocation of the Papacy* (*XIII Leó és a pápaság világtörténeti hivatása*) (1909); *The Man of Nature and the Man of Grace* (*A természeti ember és a kegyelem embere*) (1902); *Barriers of Our Spiritual Progress* (*Szellemi haladásunk akadályai*) (1912); *Spiritual Causes of the World Economy* (*A világgazdaság lelki okai*) (1931), and *Saints and Heroes 1038-1938* (*Szentek és hősök 1038-1938*) and *Sermons* (1938). – B: 0945, 1160, T: 7103.→**Klebesberg, Kunó.**

**Glatz, Ferenc** (Francis) (Csepel, 2 April 1941 - ) – Historian. His higher education was at the University of Budapest (1959-1964). He worked at the editorial office of a

highlevel periodical, *Centuries (Századok)* (1965-1968). From 1968 on, he filled various positions, including the Directorship of the Institute of Historical Studies of the Hungarian Academy of Sciences, and finally the Presidency of the Hungarian Academy of Sciences. He was former Minister of Culture of the Miklós (Nicholas) Németh Government (1989). Besides his main field as a historian of 19th-20th century cultural history, history of everyday life and historiography, he devoted special attention to research on Hungarian minority communities beyond the border in neighboring countries (some newly created). His research in the minority issue of Central and Eastern Europe is regarded as significant. The Europe Institute in Budapest, which he organized and directs, focuses its activities on issues of Central and East European minorities. The *Europe Institute* in Budapest, which he organized and directs, focuses its activities on issues of Central and East European minorities. makes its studies available in foreign languages. During his tenure as President of the Hungarian Academy of Sciences, he developed the exchange program of Hungarian scholars and scientists beyond the borders. He is a regular member of the Hungarian Academy of Sciences (1991). His major works include *Historiographer and Politics (Történetíró és politika)* (1980); *Gesellschaft, Politik und Verwaltung in der Habsburger Monarchie 1830-1918 (Society, politics and administration in the Habsburg Monarchy 1830-1918)*, with Ralph Melville (1988); *National Culture - Cultured Nation 1867-1987 (Nemzeti kultúra, kultúrált nemzet 1867-1987)* (1988); *Historiography in the Change of Epochs (Történelemírás korszak váltásban)* (1990); *The Minority Question in Central Europe, Yesterday and Today (A kisebbségi kérdés Középeurópában tegnap és ma)* (1992); *Politics of Learning in Hungary at the Turn of the Millennium (Tudománypolitika az ezredforduló Magyarországon)* (1998), and *Chronicle of the Hungarians (A Magyarok Kórnikája)* (1995, 2000). He is a recipient of the Széchenyi Prize (1995), the Prize for Minorities (1996), the *Ányos Jedlik Prize* (1997) and the Herder Prize (1997). – B: 0874, 1257, T: 7103.→**Hungarian Academy of Sciences.**

**Glatz, Oszkár** (Oscar) (Budapest, 13 October 1872 - Budapest. 23 February 1958) – Painter. He studied with Simon Hollósy at Munich in 1891, and at the Julian Academy of Paris. In 1896 he participated in the founding of the Nagybánya Artis Colony (now Baia Mare, Romania). He painted the life of the farmers of Nagybánya in bright *plein air* pictures. From 1897on he was an exhibiting artist. First, he was successful with his writers' portraits, including Pál (Paul) Gyulai, Kálmán (Coloman) Mikszáth, Károly (Charles) Eötvös, Géza Gárdonyi, Ambrus, Zoltán, etc. After 1900 he developed his naturalist style at Buják (County Nógrád). The peasant figures appeared in idyllic pictures, the motives of folk costumes appeared only lightly. He was professor at the Academy of Applied Art, Budapest (1914-1938). His works appeared at collective exhibition in Budapest in 1910, 1923, and 1953. He was also active as an artistic writer. His paintings include *Tale (Mese); Romanian Woman on her Way to the Church (Román asszony útban a templom felé)* (1907); *Evening at the Snow-capped Mountain (Est a havason)* (1908); *Young Woman of Buják with Pitcher (Bujáki menyecske korsóval)* (1923), and *Young Peasant Woman of Nógrád (Nógrádi parasztnyecske)* (1934). A number of his works are in the possession of the National Gallery, Budapest. He received the Kossuth Prize (1952), and the Outstanding Artist title (1953), A Street in Budapest bears his name. – B: 0883, 1031, T: 7301.→**Hollósy, Simon; Nagybánya Art Colony; Gyulai, Pál; Mikszáth, Kálmán; Eötvös Károly; Gárdonyi Géza; Ambrus, Zoltán.**

**Glosses** – Collection of glosses in medieval texts. A *glossa* is a relatively short Latin text with translations and explanations in the margins, between the lines, or as footnotes. Two *glossariums* from the 15th century contain large numbers of Hungarian words explaining the Latin text, and are important relics of the contemporary Hungarian language. These are the Budapest and the Németújvár *glosses*. The unpublished Boldizsár (Balthasar) Batthyány missal from 1489, now in the Széchényi Library, Budapest, can also be regarded as a *glossa*. There are writings in the margins of its pages. Glossas were used until 1530. – B: 1141, T: 7662.

**Gobbi, Hilda** (Hildegard) (Budapest, 6 June 1918 - Budapest, 13 July 1988) – Actress. As a scholarship student, she obtained her diploma at the Academy of Dramatic Arts in 1935. She received a contract with the National Theater (*Nemzeti Színház*), Budapest, and remained its member for 25 years. From 1960, she acted at the Attila József Theater (*József Attila Színház*), Budapest. Among her most important roles were Onione in Racine's *Phaedra*; Mirigy in M. Vörösmarthy's *Csongor és Tünde*; Misi Nyilas in Zs. Móricz's *Be Good Unto Death (Légy jó mindhalálig)*; Gertrud in Shakespeare's *Hamlet*; Mrs. Pearce in Shaw's *Pygmalion*; Gertrudis in J. Katona's *Bánk bán*, and Aase in Ibsen's *Peer Gynt*. Prior to 1945, she played a significant role in workers' theater roles and in the resistance movement. She was an outstanding recitalist. She often played in feature films and TV plays, such as *The Borrowed Castle (A kölcsönkért kastély)* (1937); *Judge Sári (Sári Bíró)* (1943); *Relatives (Rokonok)* (1954); *Electra* (1963); *The Black City (A fekete város)* (1971), and *Dead Souls (Holt lelkek)* (1983). She performed on the radio as well. She became popular as Auntie Szabó in the *Family Szabó (Szabó család)* serial radio drama. She was an interesting and original character, who had a great ability to portray mainly older women. Her wide artistic range developed gradually and extended from the tragic to the comic. Her loud, high-spirited humor was especially effective in comedies. After 1945, she was very active in her outstanding theater and social work. She organized a college, the *Academy of Performing Arts (Árpád Horváth College)*, for students of laborer and peasant origin, and established two homes for aged actors with no income, the Mari Jászay and Árpád Ódry Homes. In 1951, she initiated, organized and furnished the Gizi Bajor Memorial Museum that inspired the idea of the State Theater History Museum. She received the Kossuth Prize (1949), the titles of Artist of Merit (1950) and Outstanding Artist (1955). A prize bears her name. – B: 0870, 1031, 1178, T: 7684. → **Jászay, Mari; Ódry, Árpád; Bajor, Gizi,**

**Göcsej** – Area in southwest Hungary, in County Zala. It has been known as a special region since 1769. The area is bordered by the River Zala, the brook Kerka and by the streams of the two Válickas. The size of the territory is about 1,040 km<sup>2</sup> although, ethnographically, the villages on the eastern side of the Válicka valley also belong to the Göcsej people. There are some 90 small villages in the area, typically settled in units called *szeg* (eg. Kustánszeg, Pálfiszeg etc). The terrain is rugged, spotted with hills and valleys. The discovery of oil in 1937 around Lisper and Nagylengyel, somewhat altered the pastoral character of the area. During the time of the reign of the Royal House of Árpád (AD 1000-1301), it was a protection (defence) zone for Transdanubia (*Dunántúl*). The inhabitants of Göcsej are well known for their characteristic Hungarian dialect. – B: 1134, 1153, 1133, T: 7656. → **Göcsej Group of People; Árpád.**

**Göcsej Group of People** – This distinct group of people is living in County Zala on the

southwest part of Hungary. According to ethnographer Imre (Emeric) Szentiványi, their ancestors were the *Palóc*, who originally lived there. They are relatives of the Szeklers. Both of them have Hun and Avar ancestry; they were there before the Hungarians entered the Carpathian Basin in 895. Protector Menader already wrote about the settling of a Hun tribe in Zala that awaited the arrival of the Avars and the Hungarians. Their 90 small villages are bordered by the brook *Kerka*, and by the two *Válicka* streams. The size of their territory is about 1,040 km<sup>2</sup>. The Avars always kept their ancestral and cultural links with the Szeklers. They have similar decorative folk art elements, as well as bloodindex number and anthropological characteristics. The natives of Göcsej still keep their original customs; all strongly resembling those of the Szeklers, even their minstrel songs are almost the same. In 1930, they numbered about 70,000, all with ancient Hungarian names. Since then their numbers are dwindling. They speak a unique Hungarian dialect. The native population retained its traditions and culture. Their small villages usually have only one main street and the tiny houses have thatched roofs. – B: 1105, 1133, T: 3240, 7103. → **Göcsej; Palóc.**

**God** (*Isten*) – The monotheism of Hungarians is of ancient origin, long before the conversion to Christianity. In Hungarian, the name for God is *Isten*, a word of uncertain origin (according to Lóránd Benkő, 1970; also Géza Bárczi, 1941). – B: 1138, 0942, T: 7682. → **Funeral Oration and Prayer.**

**God of the Hungarians** (*Magyarok Istene*) – An expression in Hungarian proverbs, folk songs and manners of speech that, through the refrain of Sándor (Alexander) Petőfi's poem, the National Song (*Nemzeti Dal*) became proverbial: ... "We swear by the God of the Hungarians... that we won't be slaves anymore..." (*A magyarok Istenére esküszünk..., hogy rabok tovább nem leszünk!*). No trace is left in written Hungarian documents; it was considered a dangerous expression, reminiscent of the pagan religion; therefore, it could not appear on the expensive parchment of the Catholic clergy. The living language however used the "God of the Hungarians". Mother earth is the ancestral mother of the Hungarian nation. According to official Byzantine sources, the ancient Hungarians honored fire, air and water but called the creator of the world *Isten* (God) and sacrificed horses, oxen and sheep to him. – B: 1078, 1141, 1020, T: 7682. → **Petőfi, Sándor.**

**Godá, Gábor** (Gabriel) (Budapest, 1 April 1911 - Budapest, 12 April 1996) – Writer. After completing his secondary studies in Budapest in 1929, he existed by doing casual labour. Later on, he was a copy editor, editor, and literary translator. His first and only volume of poems, *This Spring is Like Autumn, Buddy* (*Ősz ez a tavasz, Pajtás*) (1929), published while he was still in high school. *A Letter from Hell* (*Levél a pokolból*) stories (1936) followed it. He was in the labor services during World War II. From 1945 to 1950, he led the Cultural Department of the City of Budapest. Between 1957 and 1959, he was a member of the editorial board of the literary review, *Life and Literature* (*Élet és Irodalom*). In 1958-1959, he was General Manager at the Army's Theater (*Néphadsereg Színháza*). Satire and bitter humor characterized his works. Among them are the *Legends* (*Legendák*); (1942); *Exorcism, vols. I, II* (*Ördögűzés, I, II*) selected stories (1963); *Gentle Psalms* (*Szelid zsoltárok*), essays (1970), and *The Man Who Became a Bird* (*Ember, aki madár lett*), collected stories (1982). He received the Attila József Prize (1957, 1960, 1971) and the Kossuth Prize (1966). – B: 1257, T: 7103.

**Godó, Mihály S.J.** (Michael) (Kisiratos, now Dorobani, Romania, 25 September 1913 –

Újszentanna, now Santana, Romania, 22 September 1996) – Roman Catholic priest, teacher. He completed High School in Nagyvárad and Gyulafehérvár (now Oradea and Alba Iulia, Romania), and graduated in 1935. He studied Theology in Kolozsvár (now Cluj-Napoca, Romania) (1935-1938), and completed it in Krakow, Poland (1939). He was a tutor in Theology at Jászvásár (now Iasi, Romania) (1939-1944). He continued his theological studies in Szeged, where he was ordained in 1942; was chaplain in Hódmezővásárhely, then a teacher of Religion in Szatmárnémeti (now Satu Mare, Romania) (1945). He served as a secret courier between Cardinal József (Joseph) Mindszenty, Archbishop of Esztergom, and Áron Márton, Bishop of Gyulafehérvár. In 1946, he was University Chaplain in Kolozsvár, then Parish Priest in Szatmárnémeti in 1947. After the suppression of the Jesuit Order by the Romanian state, he was deported, together with his colleagues, to Szamosújvár (now Gherla, Romania). Through his writings on issues related to Church law, he helped priests remain faithful to the Roman Catholic Church. In 1953, he was accused of treason and sentenced to 16 years of prison. He spent years in lead mines, and eight years in solitary confinement. He was released in 1962, but confined to Szamosújvár for three years. He was the Parish Priest in Herkulesfürdő (now Baila Herkulane, Romania) in 1965; but due to being subjected to constant harassment, he requested to be arrested. The court intended to release him but he vehemently accused the Ceausescu regime; thus he received a further six-year prison sentence, as well as a heavy fine. He was freed in 1980, and served as Parish Priest in various locations. He was honored with the Middle Cross of Merit of the Republic of Hungary (1994). – B: 0945, T: 7103.→**Mindszenty, József; Márton, Áron.**

**Gödöllő, Jamboree** – The 4th World Jamboree was held in the Park of the Royal Summer Residence of Gödöllő in 1933. It opened on 4 August, in the presence of Regent Miklós (Nicholas) Horthy, the Hungarian Head of State, Lord Robert Baden-Powell (B-P), founder of the Scout Movement, and Chief Scout, and Count Pál (Paul) Teleki, the Hungarian Chief Scout and later the Prime Minister of Hungary. The Jamboree was attended by 26,000 Scouts from 34 nations. One of its main goals was to awaken sympathy for Hungary after the tragic Versailles-Trianon Dictated Peace Treaty of 1920. The Jamboree was characterized by a deep religious observance. Christian and even Islamic services were conducted by leading clergy. The programs and events, such as campfires, were memorable. The weather was excellent and the attending scouts still remember B-P making his rounds at the campsite on a magnificent brown charger. It was also evident that the whole Hungarian nation cooperated to make the event a success. Besides the ten main camps, there were special camps for young boy scouts, fliers, water sports and a deaf-mute camp. There were camp police, firefighters, a rescue party, and many work groups that included 3,250 scouts. The *Hungarian Scout Jamboree (Jamboree Magyar Cserkész)* daily was published in five languages in 20,000 copies. There were many stores, scout exhibitions, theaters, banks, post offices and restaurants that served the needs of the scouts and of the 40-50 thousand visitors. Special postage stamps were issued, including the first airmail stamp. The atmosphere was friendly and the Scouts of five continents, of 14 religions, 54 nations speaking 30 languages were represented; altogether 26 thousand wished to become acquainted with and to respect and love each other. For the memory of the Jamboree a statue of a boy scout was unveiled on 23 April 1994. – B: 1324, T: 7103.→**Trianon Peace Treaty.**

**Gödöllő, I Pax Ting** 1939 – World Gathering of Girl Guides. The founder of Girl

Guide/Girl Scout movement was Lord Baden-Powell (B-P), the founder of the Boy Scout movement. The movement started in 1909, in London, at the Boy Scout gathering, where many girls were present. B-P decided to launch a scout movement for them and named it the Girl Guide Movement. Its first organizer was Antonia Lindmayer. After the great success of the 1933 Jamboree in Gödöllő, B-P charged the Boy Scout Association in Hungary with organizing the first gathering of Girl Guides. On the advice of Lady Baden-Powell, the new name was "I Pax Ting" (meaning of peace). In spite of the threat of war, the first Girl Guide/Girl Scout World Camp was held in Hungary between 25 July and 7 August 1939, attended by 5,800 Girl Guides and Girl Scouts from 23 countries. They were accommodated in eight camps. Beside the programs and campfire activities, they made several visits to Budapest and other sightseeing places. A set of 4 postage stamps was also issued. The I Pax Ting was successful and internationally well appreciated. The war broke out a month later. – B: 1327, T: 7103.

**Gold Finds of Máramarossziget** (now Sighetu Marmatiei, Transylvania, Romania) – The best gold-producing regions in prehistoric times were Spain, Ireland and Hungary. The shapes and the greenish-yellow color of the gold jewelry found in Bronze Age graves in Northern Europe suggest that they were fashioned in the Carpathian Basin from Transylvanian gold. The more than 40 gold circlets of the Máramarossziget treasure suggest that they could have been used as currency. Their weight shows certain conformity: their approximate 9-gram weight unit conforms to the multiples of 6, 18 and 36. This proves that the ancient peoples of the Carpathian Basin used the Babylonian weight system. The bulk of the gold-finds of the region dated from the end of the Bronze Age and the Hallstatt period (700-400 BC). – B: 1078, 1020, T: 7617.

**Goldberger, Leó** (Leopold) (Buday-Goldberger) (Budapest 2 May 1878 - Mauthausen, Austria-Germany, 5 May 1945) – Industrialist. After completing his law studies he joined the Goldberger firm, Budapest. When the textile firm was transformed into a family business in 1905, he became Managing Director and a trustee. From 1908, he was its Chief Executive Officer and, from 1910 its President and Chief Executive Officer. His firm gained international reputation through its export activity. He had ties with the Commercial Bank of Pest from 1920 onward. In the Horthy-era he played a leading role in many economic institutions. He was President of the National Society of Hungarian Textile Manufacturers and a board-member of the National Society of Industrialists (*Gyáripárosok Országos Szövetsége – GYOSZ*), that of the Hungarian Institute of Foreign-Trade, and Chief Counselor of the Hungarian National Bank. He was a Member of the Upper House of the Parliament. In 1944, he did not join his relatives who were shipped to Portugal by the SS, but voluntarily sided with the deportees. He died by starvation a few days after the Mauthausen Concentration Camp was liberated. – B: 0883, 1154, T: 7103.

**‘Gold Train’** – This is the name of the special railway train that carried the Hungarian National Bank’s gold reserve, the gold treasure of the Hungarian Academy of Sciences, valuables of Hungarian citizens and industrialists, as well as precious contents of high value from museums. At the end of January 1945, the trains consisted of 77 sealed boxcars and 3 more wagons of silverware. The train was sent to Austria in order to prevent it from falling into the hands of the advancing Soviet army. A 47-head gendarme detachment under the leadership of Captain Lajos (Louis) Deme escorted it. The Gold

Train fell into American hands at Werfen in the Salzburg area, on 16 May 1945. The Hungarian state reserve was in 25-kg blocks, a total of 36.5 tons of gold. In separate boxes, there were 2 Corvinas, stamp collections worth millions, foreign currencies and banknotes. The Americans returned the state treasures including the gold bars, the gold reserve of the Hungarian National Bank to the newlyformed Government of Hungary. It arrived on 6 August 1946. However, the rest of the Gold Train had a different fate. This contained confiscated Jewish valuables, including 10 boxes of gold, 1 box of gold medals; 18 boxes of gold jewellery including diamonds; 32 boxes of gold watches; 1,560 boxes of silverware; 100 paintings; 300 Persian carpets; foreign currencies, rare furs, stamps, porcelain and lace. However, American General Mark Clark declared that the owners of Jewish property could not be identified. Therefore, they cannot be returned to their rightful owners. They remained in American custody. Owners, however, claimed their property in vain. In the meantime, army officers and soldiers tapped into the withheld treasure and it was partly sold in shops while the remainders were shipped to New York and auctioned off. Finally, the US authorities acknowledged their responsibility, apologized, and paid \$25.5 million compensation to the surviving owners. – B: 1230, 1384, T: 7103.→**Dispossessed Goods.**

**Golden Bull** (*Bulla Aurea - Aranybulla*) – an edict with a golden seal, usually issued by rulers in the MiddleAges and in the Renaissance. Hungarian King András II (Endre,

Andrew, 1205-1235) promulgated a Golden Bull (*Aranybulla*) in 1222. The Golden Bull sanctioned the rights of *estates* against a king or a monarch and gave them a constitutional basis to consolidate their holdings. King András II's rule caused widespread unrest in Hungary. Its causes included his unlucky war to conquer Galicia, his crusades to the Holy Land, as well as his wife's, the Meranian Gertrude's lavish household, leading to her

assassination in 1213. Finally, the King's opponents formed an alliance, forcing him to ratify the Golden Bull of 1222. The document guaranteed rights to the *servientes* and it also contained the famous *clause of resistance*, whereby, if the king failed to keep his word, the nobles were invested with the right to resist and oppose him without charge of disloyalty. The Golden Bull was confirmed in 1231 but, according to it, the Archbishop of Esztergom could invoke the *jus resistendi* in the name of the nobility. Some scholars pointed out that there is a similarity between the Hungarian *Golden Bull* and the English *Magna Charta Libertum*, issued in 1215. – B: 1402, 1031, T: 7103.→**András II, King; Right to Resist; Diploma Leopoldinum.**

**Golden Seal** – In a general sense it is the Golden Seal by which, since the time of King Béla III (1172-1196), the Hungarian kings confirmed their important documents; in a

**stricter** meaning it is the Decree that King András II (Endre, Andrew, 1205-1235) reaffirmed and proclaimed the ancient Hungarian Constitution as statute No. 31 of 29 May 1222. At the same time, it secured the right of resistance for the prelates and nobles in case the king or his successors breached the terms of the Decree. Seven copies of the Decree were made: for the Pope, the Johannites, the Templars, the King, the Chapter of Esztergom, the Chapter of Kalocsa, and the Palatine. This Decree was the basis of the Hungarian Constitution until 1848. It had no direct Constitution-forming significance, as it merely enacted those principles and rules, still unwritten but already effective in the ancient Constitution. The Parliament of 1687 repealed the right of resistance. The pendant seal did not remain on any of the copies; it is known from another Decree of King András II of 1223, as a masterpiece of the goldsmith's art in the Árpád era. The material of the seal is gold, its diameter 67 mm. The legend: "*ANDREAS. D(e) IGRA(tia) VNG(ar) IE. DALAC(ie). CGOHAC(ie). RAM(e) S(er) VIE.GALAC(ie). LODOMERIEQ(ve). REX SIGILLUM SECUNDI ANDREE TERCI BELE REGIS FILLI*". The coat of arms on the seal shows 7 lions in 4 stripes. The National Archives in Budapest holds the Seal. – B: 1078, 1230, T: 7669.

**Golden Team, The** (*Aranycsapat*) – name of the best Hungarian football (soccer) team of all time in the early 1950s. That was the most glorious period of Hungarian soccer; the National Team was unbeaten for three-and-a-half years. The team, called the Golden Team by the press and the public, managed to beat England, football power of the time, on two occasions. The team, managed by Gusztáv (Gustavus) Sebes and playing most of their games with Gyula (Julius) Grosics, Jenő (Eugene) Buzánszky, Gyula (Julius) Lóránt, Mihály (Michael) Lantos, József Bozsik, József Zakariás, László (Ladislav) Budai, Sándor (Alexander) Kocsis, Nándor (Ferdinand) Hidegkuti, Ferenc (Francis) Puskás and Zoltán Czibor achieved its first success at the Olympic Games in Helsinki, when the composition of the team was slightly different, when it beat Yugoslavia 2:0 in the final on 2 August 1952. The next major milestone was the match at the opening of the stadium in Rome in 1953, where Hungary beat the host Italian team 3:0. This match later came to be called the European Cup Final and it was essentially the legal predecessor of the European Championship. The success story continued on 25 November 1953, when Hungary beat England, undefeated at home for 90 years, 6:3. The return match took place in the May of the following year, when the Hungarian team won 7:1 in the People's Stadium of Budapest. After this, the Hungarian team was the favorite at the World Championships in 1954 in Switzerland. The Hungarians reached the final, defeating Brazil and the two-time world champion, Uruguay; Germany, defeated by the Hungarians 8:3 previously turned the match around from a losing position and triumphed 3:2. Although the great series was broken on 4 July, the National Team continued its brilliant performance until the Revolution of 1956, suffering only three defeats. The team fell apart following the Revolution. Kocsis and Czibor left for Barcelona, where they won the championship twice. Puskás went to Real Madrid. He won the European Champion Club's Cup three times in the Real colors and was the coach of the Greek Panathinaikos, when the team played in the European Cup of Champions final, in 1971. Both Nándor Hidegkuti and Gyula Lóránt tried their hand at coaching, Hidegkuti was more successful, as in 1961, the Italian Fiorentina won the Winners' Cup under his leadership, then he was the coach of Győr, when the team reached the top four in the European Champion Club's Cup. – B: 1031, 1348, 1414, T: 1348, 7103.→**Bozsik, József; Budai, László;**

**Buzánszky, Jenő; Czibor, Zoltán; Grosics, Gyula; Hidegkúti, Nándor; Kocsis, Sándor; Lantos, Mihály; Lóránt, Gyula; Puskás, Ferenc; Zakariás, József; Match of the Century.**

**Golden Train** – 1938 was a double Holy Year in Hungary. This year signified the 900th anniversary of the death of István I (St Stephen, 977-1038), the first King of Hungary. The year was declared the year of St. István. In the same year, the 34th Eucharistic World Congress was held in Budapest between 26 and 29 May. From 27 countries, some 30,000 faithful joined the 443,687 Hungarian participants. Pope Pius XI sent Cardinal Pacelli as Papal Legate to the Congress (later to become Pope Pius XII). After the Congress came the commemoration of the death of King István I. The festivities began on May 30th. Its outstanding event was the Golden Train of 3 coaches. One of them was a converted Pullman car with a partial glass sidewall to display the relic, the *Holy Right Hand of St István (Szent Jobb)*. The Golden Train visited every part of the country, attracting tens of thousands, who flocked to have a glimpse of the relic. Church services were held in cities and towns where the train stopped. In later years, the train made further trips, e.g. to Northern Transylvania (*Észak Erdély*) in 1941. Northern Transylvania when it was returned to Hungary by the Second Vienna Award in 1940, but was ceded again to Romania after World War II. – B: 1326, T: 7103.→**István I, King (St Stephen); Vienna Award II.**

**Goldmark, Károly** (Charles) (Keszthely, 18 May 1830 - Vienna, 2 January 1915) – Composer. He began to study violin in 1842 in Sopron, then continued in Vienna in 1844. In 1847, he was already playing solo performances. During the Vienna uprising, he returned home and participated in the Hungarian War of Independence (1848-1849). Then he became a violinist at the theater of Sopron and, in the following year, played at the celebration of the victory over the Austrian Imperial Army in Győr. Between 1848 and 1850, he was a theatre violinist and a music teacher in Hungarian cities, as well as in Vienna. Almost destitute, he learned to play the piano and developed his ability to compose. In 1850 he had a contract in Buda but, from 1852, he played for seven years in theaters in Vienna. During that time, he started to compose chamber music; he had his debut as a composer in 1857, in Vienna and, two years later, he also appeared in Pest. His name became known especially in Vienna, where he settled. His first great success was the *Sakuntala Overture* in 1865 that resulted in a Hungarian government scholarship. Between 1865 and 1871, he composed his chief oeuvre. His compositions include *Trios* for piano, violin and cello; a *String Quartet*; *Violin Concerto*; *Rustic Wedding Symphony*; *Six operas*, among them the *Queen of Sheba (Die Königin von Saba, Sába királynője)*, performed in Vienna on 15 March 1865, by the intercession of Ferenc (Franz) Liszt and Count Gyula (Julius) Andrássy. This opera achieved great success and meant world fame. Hungarian folk culture largely determined his musical language, while the most diverse opera composers of Western Europe share the language of his operas. Ultimately, he developed an individual style. This secured a significant role for him in the music history of the 19th century. Although he occasionally left Vienna, his contact with his motherland never broke. In 1910, on his 80th birthday, the city of his birth celebrated him. He composed his last work at the age of 84. His manuscripts are kept at the Helikon Library in Keszthely, Hungary. – B: 1197, 0942, 1078, 0883, T: 7684.→**Liszt, Ferenc; Andrássy, Count Gyula.**

**Goldmark, Péter Károly** (Peter Carl) (Budapest, 12 February 1906 - County Westchester, NY, 12 July 1977) – Engineer, physicist, inventor. In 1919, his family moved to Vienna and his education was continued there, where he earned a Degree in Physics (1929). He received his Engineering Degree in Berlin (1931). He moved to England and, from 1931 to 1933, he worked for a radio company. After emigrating to the United States in 1933, he worked as a construction engineer until joining the Columbia Broadcasting System (CBS) in 1936. There, he developed the first practical color television system with an electro-mechanic device (1940); he also developed the 33 1/3 LP phonograph record (1948). Later, he achieved fame with the first electronic video recording system and he also developed a scanning system, used by the Lunar Orbiter spacecraft, to transmit photographs from the Moon to Earth (1966). From 1972, he headed the Goldmark Communication Corporation. During World War II, he developed a device for disabling German radar. He had some 160 inventions to his credit. He died in an automobile accident. He received the National Medal of Science. He was a corresponding member of the American Academy of Sciences. – B: 0833, 1279, T: 7662, 7103. → **Microgroove Long Playing Record.**

**Goldziher, Ignác** (Ignatius) (Székesfehérvár, 22 June 1850 - Budapest, 14 November 1921) – Orientalist. He studied at the Universities of Budapest, Berlin, Leiden and Leipzig, where he received a BA degree. From 1873-1874, he traveled in Syria, Palestine and Egypt on a state scholarship. From 1894 until his death, he taught Semitic Philology in Budapest. He was one of the great Semitic philologists of his age. He introduced a modern, critical method of study for the history of Islam. His more important works are: *Der Mythos bei den Hebraern...*, (The Myth of the Hebrews, 1876); *Islam* (1880); *Mohammedanische Studien I-II* (1889-1890); *The Essence of Jewry and its Development, vols. I, II (A Zsidóság lényege és fejlődése I, II)* (1922-1923). He was a member of the Academy of Berlin, St. Petersburg, Amsterdam and Copenhagen, as well as of the Hungarian Academy of Sciences. In 1889, he received a Gold Medal at the International Orientalist Congress in Stockholm. – B: 0883, 1257, T: 7662.

**Gombás, Pál** (Paul) (Selegszántó, now Antau, Burgenland, Austria, 5 June 1909 - Budapest, 17 May 1971) – Physicist. His higher studies were at the University of Budapest. After graduation in 1932, he became an assistant professor in the Department of Theoretical Physics of the same university. From 1939, he taught at the University of Szeged, and from 1941 he was Professor at the University of Kolozsvár (now Cluj-Napoca, Romania). After World War II, he became Professor at the University of Budapest. In 1947, he moved to the US; but returned home in 1948 and, from then on until his suicide, he was Head of the Physics Department of Budapest University. He was a member of related societies, including the Hungarian Academy of Sciences (1945), and was its Deputy President from 1948 to 1958. His research interests included quantum mechanics and the question of statistic atom theory. He further developed the atom model, known as the Thomas-Fermi-Dirac-Gombas atom-model. He authored more than 130 papers and 12 books, some in foreign languages, including *Die statistische Theorie des Atoms und ihre Anwendungen (The statistical theory of the atoms and their applications)* (1949, Russian. 1950, Hungarian 1955); *Simplified SCF for all Atoms* (1970), and *Physics for Engineers (Fizika mérnökök számára)* (1971). He was rewarded with the Kossuth Prize (1948, 1950). There is a Pál Gombás Prize. – B: 0883, 1160, 1031, 1122, T: 7103.

**Gombaszögi, Ella** (Budapest, 27 December 1898 - Budapest, 12 October 1951) – Actress. She and her sister Frida attended the Academy of Dramatic Art, Budapest. Before obtaining her diploma, she was already contracted by the Comedy Theater (*Vígszínház*), Budapest (1913). In 1924, she was a member of the Hungarian Theater (*Magyar Színház*), and from 1928, she worked at the Operetta Theater (*Operett Színház*). During World War II, she was not allowed to act. After 1945, she worked at the Comedy Theater (*Vígszínház*), the Art Theater (*Művész Színház*), and the Madách Theater (*Madách Színház*). She was excellent in comic roles, usually as the partner of Gyula (Julius) Kabos in feature films. Her major roles included Elza in Molnár's *The Devil* (*Az ördög*), and Sári in Heltai's *Girls of Tündérlak* (*Tündérlaki lányok*). Her successful feature films were *Train of Ghosts* (*Kisértetek vonata*) (1933); *Dream Car* (*Meseautó*) (1934); *Be Good Unto Death* (*Légy jó mindhalálig*) (1936), and *Mrs. Déry* (*Déryné*) (1951). – B: 0883, 1178, T: 7103. → **Kabos, Gyula**.

**Gömböc** – A convex three-dimensional homogeneous geometric body with one stable and one unstable point of equilibrium, with minimal “flatness” and “thinness”, invented by Gábor Domokos and Péter Várkonyi. It has been assumed that there also exist convex polyhedra with just one stable face and one unstable point of equilibrium. The minimum number of faces could be large. The *Gömböc* mimics the “self-righting” abilities of shelled animals such as turtles and beetles. Such a shape was conjectured by the great Russian mathematician, Valadimir Arnold, as a *mono-monostatic* body. The shape was developed by Gábor (Gabriel) Domokos, Head of the Department of Mechanics, Materials and Structures at Budapest Polytechnic and a former student of his, Péter Várkonyi, at Princeton University. The *Gömböc* made front page in the mathematical journal *Mathematical Intelligence* in 2006, where another Hungarian invention, the *Rubik's Cube* appeared in 1979. The *New York Times* featured the *Gömböc* in its 10 December 2007 issue. Domokos and his wife Réka developed a classification system for shapes based on their points of equilibrium, by collecting pebbles from a beach and noting their equilibrium points. The *Gömböc* was developed in conjunction with that system, as a supposedly “perfect” self-righting mechanism. The inventors contend that the *Gömböc* has its uses in both biology and geology. *Gömb* in Hungarian means “sphere”, and *gömböc* refers to a sphere-like object. (It is mostly known in the folk culture as *kis gömböc*, a spherical creature in the loft that remained from the body of a slaughtered pig, which swallows everyone, one after the other, who goes to see what has happened to the previous ones.) The mathematical *Gömböc* in fact does have sphere-like properties; its flatness and thinness are minimal, and this is the only type of nondegenerate object with this property. A sphere also has minimal flatness and thinness; however, it is degenerate at the same time (cf. Várkonyi & Domokos, 2006). – B: 1031, 1943, T: 7456. → **Rubik's Cube**.

**Gombocz, Zoltán** (Sopron, 18 June 1877 - Budapest, 1 May 1935) – Linguist. From 1895, he studied at the Eötvös College, University of Budapest. In 1899, he graduated as a French language teacher. He conducted phonetics research in Paris, Leipzig, Finland and Sweden between 1903 and 1904. In 1906, he qualified as Professor of Phonetics at the University of Budapest and taught French at the same University from 1908 to 1910. From 1914, he taught Comparative Linguistics of the Ural-Altai languages at the University of Kolozsvár (now Cluj-Napoca, Romania). From 1927, he was Director of the Eötvös College, Budapest and Section Chairman at the Hungarian Academy of

Sciences from 1933. With János (John) Melich, he received an award from the Hungarian Academy of Sciences for the publication of an etymological dictionary of the Hungarian language in 1921. He was an outstanding scientist and a mentor of the new generation of linguists. He covered the entire field of linguistics but his main interest was in descriptive and historical phonetics. His more important publications are *The Principles of Linguistics of our Age, (A jelenkori nyelvészet alapelvei)* (1898); *History of Languages and Psychology (Nyelvtörténet és lélektan)* (1903), and *To the History of Hungarian Phonetics, (A magyar hangok történetéhez)* (1905). He was a member of the Hungarian Academy of Sciences. – B: 0883, 1257, T: 7662.→**Melich, János.**

**Gombos, Gyula** (Julius) (Temesvár, now Timișoara, Romania, 30 September 1913 - Budapest, 5 December 2000) – Writer, politician. His first literary essays and articles appeared in 1936, in the *Hungarian Way (Magyar Út)* and *Hungarian Life (Magyar Élet)*. His first book, *Dream About the Country (Álom az országról)*, was published in 1941. He did not publish between 1945 and 1950. He participated in the anti-Fascist resistance movement, and from 1945 he was involved in the political life of the Smallholders' Party and the Peasant Alliance. When he got wind of the secret police suspecting him of being part of a political conspiracy, he escaped to Switzerland in 1948, and moved to the USA in 1951, settling in New York. He worked for Radio Free Europe's editorial board in New York, and became Chief Contributor for the periodical *New Horizon (Új Látóhatár)* periodical. In 1984, he moved to Paris. Some of his other works: *Lean Years (Szűk esztendő)* (1960) is about the Reformed Church under Communism. His main work is *Dezső Szabó (Szabó Dezső)* a monograph (1966, 1989); *After Twenty Years (Húsz év után)* essays (1970); *After Twenty One Years (Huszoneyv év után)* (1972); *On the Left of History (A történelem balján)* (1975); *Hillsdale, sociography* (1979), in Hungarian (1982); *Speakers of the Truth (Igazmondók)* essays (1981); *Freedom Founders (Szabadság alapítók)* (1984), and *The Third Way (A harmadik út)* (1984, 1990). Among others, he was a recipient of the Gábor Bethlen Prize (1989) and the Széchenyi Prize (1990). – B: 0921, 1257, T: 7103.→**Reformed Church in Hungary; Szabó, Dezső; Bibó, István.**

**Gömbös, Gyula** (Julius) (Murga, 26 December 1886 - Munich, Germany, 6 October 1936) – Politician. He was born into a Lutheran family of teachers. His career began as an officer in the Austro-Hungarian Army, and fought in World War I. His political career began in 1919 by organizing the Hungarian National Defense Society (*Magyar Országos Véderő Egyesület – MOVE*). He organized a network of counter-revolutionaries, who sought to destabilize the Communist Government of Béla Kun. He joined the exiled Government in Szeged, where he came into contact with Admiral Miklós (Nicholas) Horthy who, at the head of an army entered Budapest in November 1919 and, after deposing the communist Kun government, was elected Regent in 1920. In the spring of 1921, Gömbös organized the military opposition to prevent King Károly IV (Charles) from reclaiming his throne. In 1922 he joined the *Unity Party (Egységes Párt)* of István (Stephen) Bethlen and István Nagyatádi Szabó. In 1923, he founded the *Hungarian National Independent Party (Magyar Nemzeti Függetlenségi Párt)*. In 1928, he returned to the Unity Party and became Undersecretary at the Ministry of Defense. From 1929, he was Minister of Defense in the Bethlen-Károlyi cabinet. From 1 October 1932 until his death, he was Prime Minister of Hungary. He worked for Hungary's close cooperation with Mussolini's Italy and, from 1933, with Hitler's Germany. He wanted to reorganize

the Hungarian nation on the Italian model. He did not hesitate to achieve his goals by using authoritarian methods. In the field of domestic policy Horthy yielded to Gömbös and granted him the right to dissolve Parliament for a new election. Despite the improved economic life of the country, the political elite's trust was shaken by the time of his sudden death. Under his administration, Hungary was unrelentingly committed to the road of cooperation with Berlin and Rome. He was one of the major policy-setting politicians of Hungary between the two World Wars. – B: 0931, 0883, T: 7103.→**Kun, Béla; Károly IV, King; Horthy, Miklós; Bethlen, Count István.**

**Gömör** – Region in the middle of Upper Hungary (Upland, *Felvidék*, now partly in Slovakia). This mountainous region includes an area north of the Bükk Mountains, Hungary and south of the foothills of the Carpathian Mountains in Slovakia including the towns of Losonc (now Lucenec), Rimaszombat (Rimavská Sobotá) Nagyrőce (now Revúca) and Rozsnyó (Roznava) towns. This region has approximately 280,000 inhabitants: 48% Hungarian, 44 % Slovak, 6% Gypsy and 2% other. On its Hungarian side, there are the northern parts of Borsod Abaúj, Zemplén, Heves and Nógrád counties. The whole area is 4,275.4 km<sup>2</sup>. At the time of the Hungarian settlement (895-896), the southern part of the region was settled by Magyars while the northern, forested land had a sparse population of Tóts (now called Slovaks). The area beside some towns was populated with small villages. The discoveries of valuable metallic ore mines brought Alsatian and Flemish settlers. The Turkish occupation of the 16th and 17th centuries damaged its southern and western parts. The population of this area is known as the *Palóc* ethnic group. – B: 1143, 1224, 0942, T: 7656, 7103.→**Palóc.**

**Gömöri Codex** – An ancient Hungarian manuscript, a book of prayers, written by nine different hands. Its largest section is dated from 1516. Most of it was copied for Krisztina (perhaps Dombay), a Dominican nun, by another nun named Katalin (Cathleen). The smaller part was finished by Pál (Paul) Tétényi, a Pauline vicar, and the rest by others. This linguistic relic was given to the Széchényi National Library, Budapest by Károly (Charles) Gömöry in 1821, where it is still kept. – B: 1150, 0942, T: 3240.→**Codex Literature.**

**Gömöri, György (1)** (George Gomori) (Budapest, 16 July 1904 - Palo Alto, CA, USA, 1 March 1957) – Physician. He obtained his MD from the University of Budapest. From 1928, he was a pathologist at the Pathological Institute. From 1930, he was a surgeon at University Clinic III, and later assistant professor. In 1938, he emigrated to the USA, where first he worked in a private hospital and, in the meantime, obtained his American qualification. In the same year, he became a pathologist at the University of Chicago. From 1943, he was a professor of internal medicine. He had a fundamental role in the foundation of the Histochemistry Society, and later he was Vice-President, then President of the Society. From 1956 until his death, he worked at the Medical Center and Medical Research Foundation in Palo Alto, California. He was a member of numerous scientific societies. At the beginning of his career, he studied the special histological structure of the bone; later histochemistry was the main topic of his research and he became known worldwide in this field. The result of his research opened a new era in enzyme histochemistry. The method that he initiated for the research of reticulum (fiber network system) was named after him and it is known everywhere as the Gömöri silver impregnation method. He also published numerous scientific articles. A medical award,

established by the Histochemical Society in 1987, bears his name. – B: 0883, 1432, 1031, T: 7660.

**Gömöri, György (2)** (George) (Budapest, 3 April 1934 -) – Literary historian, poet, literary translator. His higher studies were at the University of Budapest, where he read Hungarian and Polish Literature (1953-1956). In October-November 1956, he was a member of the revolutionary Petöfi Circle, and Editor of the paper *University Youth (Egyetemi Ifjúság)*. After the crushed Revolution of 1956 he moved to England and studied at Oxford University (1957-1962), and at Jogyakarta, Indonesia (1960-1961). He taught Hungarian and Polish literature at Berkeley University, California, USA (1963-1964), and was a researcher at Harvard University (1964-1965), USA. Between 1965 and 1969, he was a researcher at the Eastern European Institute of the University of Birmingham, UK. He had a teaching position at the University of Cambridge, where he lectured on Polish and Hungarian Literature and Language from 1969 to 2001. His essays and papers were published in English, American, Canadian, Polish and other foreign and Hungarian periodicals. His works include *Flower-testimony (Virág-bizonyság)* poems (1958); *Polish and Hungarian Poetry from 1945 to 1956* (1966); *Metamorphoses (Átváltozások)* poems (1969); *Cyprian Norwid* (1974); *Restless Early Summer (Nyugtalan koranyár)* poems (1984); *English-Hungarian Relations in the 16-17th Centuries (Angol-magyar kapcsolatok a XVI-XVII században)*, (1989); *Transylvanians and Englishmen (Erdélyiek és angolok)* studies (1991); *Private Talk in the Fall (Őszi magánbeszéd)*, poems (1997), and *Magnetic Poles* (2000). He translated into English the poems of László (Ladislás) Nagy, Attila József, Miklós (Nicholas) Radnóti, György (George) Petri and his own. He is involved in editing anthologies. He was presented with prizes and awards, among them the Jurzykowski Prize (1972), the Salvatore Quasimodo Memorial Prize (1993), the Imre Nagy Memorial Plaque (1993) and the Pro Culture Hungarica (1999). – B: 0874, 1257, 1031, T: 7103.→**Nagy, László; József, Attila; Radnóti, Miklós; Petri, György.**

**Göncz, Árpád** (Budapest, 10 February 1922 -) – Politician, writer. He graduated from the Law School of Budapest University in 1944. The same year, as a member of the Táncsics Battalion, he participated in the armed resistance movement against the occupying German forces. In 1945, he worked in the Independent Smallholders' Party. After the Party dissolved, he lost his job in 1948 and worked as a welder and pipe fitter from 1949-1951, and as a soil conservationist and agricultural engineer from 1951 to 1956. Between 1952 and 1956, he completed his studies at the Agricultural University of Gödöllő, near Budapest, but he was expelled from the University on account of his involvement in the 1956 Revolution. During the Revolution he worked in the Peasants' Federation; then joined the resistance after 4 November, when the Soviet troops crushed the Revolution. Two years later, at State Minister Bibo's trial he was sentenced to life imprisonment. He received an amnesty and was released in 1963. He learned English in prison and, after his release he worked as a literary translator and writer. His works include *Hungarian Medeia (Magyar Medeia)* (1976); *Balance (Mérleg)* (1990); *Homecoming (Hazaérkezés)* (1991) in English (1995), *Inheritance (Örökség)* (1993); and a collections of short stories *Encounters (Találkozások)* (1980), in English 1991. He translated over a hundred works, mostly by English and American authors: J.Baldwin, E.L. Doctorow, W. Faulkner, W. Golding, E. Hemingway, S. Sontag, J. Updike, E. Wharton, and others. After holding various offices, he was President of the Federation of

Hungarian Writers from 1989 to 1990, and was Honorary President of the Federation in September 1990. He joined Hungarian political life at the end of the 1980s: he was a founding member of the Network of Free Initiatives (NFI), then of the Alliance of Free Democrats (*Szabad Demokraták Szövetsége – SZDSZ*) and of the Historical Justice Committee. He became a Member of Parliament in 1990 and was elected Speaker of the House. He was elected President of Hungary in 1990 and re-elected in 1995, and served until 2000. He received many prizes and awards, among them the Attila József Literary Prize, the Wheatland Prize, the Premio Mediterraneo Prize, the prize of the American Institute of East-West Studies and the Joseph Bach Prize, Germany. He received Honorary Doctorates from several foreign universities and was also awarded many prestigious foreign decorations. – B: 0993, 1257, T: 7103.→**Political Parties in Hungary.**

**Göncz, László** (Ladislav) (Muraszombat, now Murska Sobota, Slovenia, 13 April 1960 -) – Poet, historian, politician. He studied at Lendva (now Lendava, Slovenia), graduated in 1984. His higher studies were at the Dániel Berzsenyi Teacher Training Academy, Sopron, where he obtained a diploma in History and Cultural Planning in 1989. He studied at the University of Pécs, obtained a Degree in History, and earned a Ph.D. From 1980 until 1986, he was an unskilled worker at the Nafta Co., Lendva. Between 1986 and 1989, he worked as a cultural planner; then, from 1989 until 1993, he was Political Secretary of the Hungarian Cultural Community. From 1994, he has been Director of the Hungarian National Cultural Institution. Since 2008, he has been a parliamentary representative of the Hungarian community in Slovenia. Among his writings are *Chapters from the History of Lendva until 1920 (Fejezetek Lendva történetéből 1820-ig)* (1993); *Lendva=Lendava*, with A. Halász (1996); *Hungarians of the River Mura Region: 1918-1941 (Muravidéki magyarság: 1918-1941)* (2001), and *Melting Icicles (Olvadó jégcsapok)*, historical novel (2003). He was a recipient of the Berzsenyi Prize (1992), the Ágoston Pável Commemorative Medal (1999), and the For Culture of County Zala honor (2001) – B: 1169, 1031, T: 7103.

**Gönczy, Lajos** (Louis) (Székelyudvarhely, now Odorheiu Secuiesc, Romania, 29 September 1889 - Kolozsvár, now Cluj-Napoca, Romania, 22 April 1986) – Minister of the Reformed Church, theologian. He studied Theology and Philosophy in Kolozsvár and Berlin, received a Ph.D. in Philosophy from the University of Kolozsvár. He was a bishop's secretary and assistant minister; then, in 1914, he became Minister in Gyulafehérvár (now Alba Iulia, Romania), and in 1920, at Dés, (now Dej, Romania). He was an assistant professor in Kolozsvár. In 1924, he received an appointment as Professor of Practical Theology at the Reformed Theological Academy, Kolozsvár. He retired in 1949. His major works include *Under God's Mighty Hand (Isten hatalmas keze alatt)* sermons (1927); *Cult of the Reformed Church (A református egyház kultusza)* (1928); *Eschatology and Preaching (Eschatológia és igehirdetés)*; *Kecskeméthy: Commemorative Album (Kecskeméthy: Emlékkönyv)* (1934); *Homilial and Sacramental Worship (A homiliás és sákramentumos istentisztelet)* (1941); *The Problem of Emotions (Az érzelmek problémája)* (1941), and *Prayer Book for Reformed Christians (Imádságos könyv református keresztyének számára)* (1974). – B: 0911, T: 7617.→**Reformed Church in Romania.**

**Gönczy, Pál** (Paul) (Hajdúszoboszló, 26 December 1817 - Karácsond, 10 January 1892)

– Educator, writer. From 1834 he studied Philosophy at the Reformed College of Debrecen, and was a teacher from 1844 on. In 1844 he went to Switzerland for a study trip. He was one of the organizers of the Orphanage at Zelemér, which operated from 1845 to 1849. In 1850-1852 he taught at the Educational Institute of Pál (Paul) Szőnyi. In 1852 he founded a Private Institution for the children of the nobility, and he handed it over to the Reformed Church in 1859, when it founded the Reformed Secondary School of Pest, and he was its Principal until 1867. From 1867 to 1889 he was Departmental Councilor, then Undersecretary of the Ministry of Culture, Budapest. In order to replace the German maps, he edited a map entitled the *Wall-Cloth of the Countries of the Hungarian Crown (A Magyar Korona Országai Fali Abrosza)*. He was Member of the Hungarian Academy of Sciences (1858), and also of the Upper House of Parliament (1859). He had a significant role in the execution of the Public School Act (*Népiskolai törvény*). His wide range of pedagogical and literary activity is significant. His works include *Public School Organization (Népiskolai szervezet)* (1859); *The Plan of a Protestant Secondary School (Egy protestáns gimnázium terve)*, under the pseudonym, János Sebessi (1860); *Guidebook to the Teaching of the Hungarian Alphabet and to the Primary Reading Book (Vezérkönyv a magyar ABC és elemi olvasókönyv tanításához)* (1869), and *Studies (Tanulmányok)* (1888). – B: 0883, T: 7103. → **Maps of Hungary**

**Gór Nagy, Mária** (Cegléd, 3 May 1947 - ) – Actress, actor-educator. Her higher studies were at the Academy of Dramatic Art (1965-1969). In 1969-1970 she worked at the National Theater (*Nemzeti Színház*) and from 1970 to 1992 at the Thalia Theater (*Thália Színház*), she was also a member of the Arizona Theater (*Arizóna Színház*), all in Budapest. In 1984, she established her own private Actor School (*Gór Nagy Mária Színitanoda*) in Budapest. In 1998, she founded the Youth Theater (*Ifjúsági Színház*) in Budapest. Since 1993, she has been the spokesperson of the *Ladcatcher (Legényfogó)* journal. Her main roles include Luca in Shakespeare's *The Comedy of Errors (Tévedések vígjátéka)*; Julika in Illés' *Ball on the Puszta (Bál a pusztán)*; Miss Hei in G. Greene's *The Quiet American (A csendes amerikai)*; Gizus in Tersánszky's *Marci Kakuk (Kakuk Marci)*, and Ruth Kelly in M. Chase's *My Friend Harvey (Barátom, Harvey)*. She appeared in several feature film roles such as *The Valley (A völgy)*; *A Crazy Night (Egy örült éjszaka)*; *A Kid on a White Horse (Egy srác fehér lovon)*, and *Picture Hunters (Képvadászok)*. She also appeared in TV plays. She received the Thalia Memorial Ring (1986), and the Déryné Prize (1996). – B: 0874, 1433, T: 7103.

**Görbe, János** (John) (Jászárokszállás, 15 November 1912 - Budapest, 5 September 1968) – Actor. He was a shepherd boy, sign-painter apprentice in his birthplace, and later unskilled laborer in Budapest. In the meantime, he completed his studies at the acting school of Kálmán (Coloman) Rózsahegyi. He worked at countryside theaters, then the Inner City Theater (*Belvárosi Színház*), Budapest was his place of work. From here, he moved on to the National Theater of Kolozsvár (now Cluj-Napoca, Romania), next was the National Theater (*Nemzeti Színház*), Budapest in 1945. From 1949, he worked in the Inner City Theater. Thereafter, in succession he was a member of the Hungarian Folk-Army Theater (*Néphadsereg Színháza*), the National Theater, Miskolc (1963), and finally he was with the Kisfaludy Theater (*Kisfaludy Színház*), Győr in 1968. His acting was natural but full of dramatic emotion; he genuinely could depict the characteristics of common men. His roles include Miska Tar in Zs. Móricz's *Little Bird (Kismadár)*; title role in K. Kós' *Budai Nagy Antal*; Petur in J. Katona's *Bánk bán*; Imre Csendes in

Dobozy's *Storm (Szélvihar)*, and Chaplain Stegumber in Shaw's *Saint Joan (Szent Johanna)*. There are 59 feature films to his credit, among them *Earthquake (Földindulás)* (1939); *Muted Bells (Elnémult harangok)* (1940); *Men on the Snow-Capped Mountains (Emberek a havason)* (1942); *Sign of Life (Életjel)* (1954); *A Glass of Light (Egy pikoló világos)* (1955); *House Under the Rocks (Ház a sziklák alatt)* (1958); *Lark (Pacsirta)* (1963), and *Harlequin and his Lover (Harlekin és szerelmese)* (1966). He acted in TV series, such as *Parable (Példázat)*, parts i-vi (1964-1966), and *Princ, the Soldier (Princ a katona)* parts i-xiii (1966). He was awarded the Kossuth Prize in 1951. – B: 1160, 1445, T: 7103.→**Rózsahegyi, Kálmán.**

**Görcsöni, Ambrus** (Ambrose) (16th century) – Composer of verse-chronicles, possibly scribe at a noblemen's court. He composed the chronicle *Verse-chronicle on the Notable Deeds of His Majesty King Matthias, Son of the Honorable John Hunyadi (Historiás ének a felséges Mátyás Királynak, a nagyságos Hunyadi János fiának jeles viselt dolgairól)* in Ungvár (now Ushhorod, Ukraine), published in Kolozsvár (Cluj-Napoca, now Romania), in 1577. The chronicle begins with Árpád. In the story Görcsöni presents the strong-armed Hunyadis as examples during the contemporary anarchic times. He used the writings of Italian humanist and poet Antonio Bonfini (1434-1503), court historian to King Matthias, as well as the chronicles of János (John) Thuróczi as his sources. It is an unfinished work that was completed later by Mihály (Michael) Fazekas. It must have been a popular reading at the time, for the verses are often used in tune notations. – B: 1150, T: 7617.→**Mátyás I, King; Bonfini, Antonio; Thuróczi, János; Fazekas, Mihály.**

**Görgey, Artúr** (Toporc, now Toporec in Slovakia, 8 January 1818 - Budapest, 21 May

1916) – Military officer of the National Defense Guards. During the 1848-1849 War of Independence he was on more than one occasion Commander-in-Chief of the Hungarian forces. He started his military education in 1832, at the Military Engineering and Tullin Polytechnic. In 1837, he was a lieutenant of the Hungarian Body Guard corps. In 1842, he was second lieutenant in the regiment of the Nádor Hussars. In 1845, he left the Imperial Army and started studying chemistry at the University of Prague. In 1847, while analyzing cocoa butter (*butyrum cacao*), he discovered the lauric-acid. Right at the start of the Rerevolution that led to the Hungarian War of Independence in March 1848, he offered his services to the Hungarian cause. Soon he was

promoted to captain on 13 June 1848, and shortly after to major. In November of 1848, he arrested and, after a short summary court marshal, he ordered the execution by hanging of Count Ödön (Edmund) Zichy, an agent of Palatine Jellačić, Governor of Croatia and enemy of the Hungarian cause. In October 1848, in a shared command with General Mór (Maurice) Percel, captured a five times larger imperial force in Transdanubia (*Dunántúl*). He had the lion's share in the victory at Ozora. For his resolute military decisions, on Lajos (Louis) Kossuth's recommendation, the National Military Council promoted him to general and appointed him as Commander of the Army of the Upper Danubian District. During the fall of 1848 and in the following

winter campaign of 1849, he excelled with his leadership ability. His fast troop movements, the use of concentrated artillery fire and his personal bravery and coolness under enemy fire baffled the enemy. With his well planned and disciplined retreats, rear guard maneuvers and counter-offensives, he drilled his freshly recruited troops and avoided any major clash with the larger and better equipped imperial forces. During the winter campaign's break-through Battle at Branyiszko, he was operating independently of the Government. Having secured the important and wealthy mining cities of Northern Hungary (Upland, *Felvidék*, now Slovakia), and pressed by strategic reasons, his army succeeded in joining the Upper Tisza army. In April 1849, he launched the spring offensive east of the city of Miskolc, in a few weeks he chased the Imperial Army to the western border at Pozsony (now Bratislava, Slovakia), the opposite, western end of the country. The chain of victories included Hatvan, Tápióbicske, Isaszeg, Vác and Nagysalló. In each case, those victorious battles were fought against a superior adversary. At the same time, his political stand was conciliatory with the Habsburg Dynasty on constitutional grounds. Due to his obvious views, he became isolated in the National Assembly. Following the defeat at Kápolna, he played a decisive role, together with the military leadership, in the forced abdication of Count Henrik (Henry) Dembinsky from his Commander-in-Chief post. In political alliance with the party of conciliation, he opposed the radical elements around Kossuth. He was Minister of Defense between 7 May and 14 of July 1849. After the intervention of Czarist Russia, he was reluctant to move his army away from the Fort of Komárom and he maneuvered his army into the Tisza-Maros River triangle with a great detour. Once there, with the knowledge of the Government, he negotiated with the Russian leaders. Against 200 thousand Russian elite troops, even Görgey's military genius was inadequate. After the Temesvár defeat, Kossuth transferred absolute government power to Görgey, who surrendered the army unconditionally to the Russian commander, Prince Paskievich on 13 August 1849. The Russian commander assured Görgey about the safety of the Hungarian army's leading officers. The Czar's advice for a general amnesty was refused by the young Emperor Franz Josef, with the following statement: "*The welfare of my Empire imposes such an obligation on me, which I am not allowed to let out of sight*" ("*Die Wohlfahrt meines Reiches legt mir Verpflichtungen auf, die ich nicht aus den Augen verlieren darf*"). The Czar's order was that, in case his request for clemency was ignored, then the Hungarian Commander-in-Chief Görgey should be escorted to Russia. Since this arrangement was known, Görgey was pardoned on 26 September 1849, but at the same time, he was interned in Klagenfurt, Austria. Despite the severe retaliation after the defeat by the Austrians, he was spared the death sentence, as the only high-ranking Hungarian officer. Public opinion condemned him as a traitor. The great poet Mihály (Michael) Vörösmarty condemned him in a passionate poem, while Pál (Paul) Gyulai, another literary figure, defended him. Görgey returned to Hungary after 1867, and settled at the Visegrád region and lived there for the rest of his life. He was a military genius but his political stand is debatable. – B: 1153, 0942, T: 3233.→**Kossuth, Lajos; Gyulai, Pál; Vörösmarty, Mihály; Freedom Fight of 1848-1849.**

**Görgey, Gábor** (Gabriel) (former first name Artúr) (Budapest, 22 November 1929 - ) – Poet, writer, literary translator, a descendant of Artur Görgey. His higher studies began at the University of Budapest in 1948, in the German and English Departments. He and his

family were deported from Budapest to the countryside by the Communist regime (1950-1953). After his return, he was an office attendant. From 1955 he worked at the *Institute of Popular Culture (Népművelési Intézet)* and, from 1959 to 1994, he contributed to the journal, *Hungarian Nation (Magyar Nemzet)*. He was a dramaturgist at the *Pannonia Film Studio* (1961-1969); between 1982 and 1989, literary director at the *National Theater (Nemzeti Színház)*, Szeged. From 1994 until his retirement in 1996, he was artistic director at the Hungarian Television. From 1994 to 2001, he was Vice-President of the Pen Club, and Minister of Culture from June 2002 to January 2003. He is a member of a number of learned societies such as the István Bibó Society; founding member of the Széchenyi Literary and Art Academy and the European Academy of Science and Art. He is a successful playwright and uses the means of absurd drama. He wrote about history both in an absurd and in a satirical way. His works include *Smoke and Light (Füst és fény)* poems (1956); *Rococo War (Rokokó háború)*é play (1967); *Air Corridor (Légifolyosó)* poems (1977); *Meeting with a Half-Dog (Találkozás egy fél kutyával)* prose (1981); *Gallop on the Blood Field (Galopp a Vérmezőn)* plays (1987); and *Last Report from Atlantis (Utolsó jelentés Atlantiszról)*, novel (2001). He translated poems by Chaucer, Shelley, Hölderlin, Brecht, Nelly and Sachs. He received a number of prizes, among them the Graves Prize (1976), Attila József Prize (1980), Pro Arte Prize (1985), the Pro Urbe Budapest Prize (2001), the Kossuth Prize (2006), and the Middle Cross with Star of the Order of Merit of the Republic of Hungary (2010). – B: 0874, 1257, T: 7103.→**Görgey, Artúr.**

**Gorka, Géza** (Nagytopolcsány, now Topol'cany, Slovakia, 16 September 1894 - Budapest, 25 September 1971) – Ceramic artist. He went to school in Nagytopolcsány and Trencsén (now Trencin, Slovakia). Gorka wanted to become a painter; moved to Mezőtúr, where he learned the art of pottery-making from Balázs (Blaise) Badár. In 1919 he went to Germany, where he became a student of Paul Mann in Leukirchen, and the Art Director of the *Großherzogliche Majolikamanufaktur* in Karlsruhe, Germany, where he learnt the latest glazing techniques. On his return to Hungary in 1922, he worked in the workshop of Balázs Badár in Mezőtúr. His ceramics were first exhibited in Vienna in 1928, where they attracted a good deal of attention. In 1923, he moved to Nógrádverőce and founded the *Keramos Company* to produce modern decorative ceramics, following the traditions of Hungarian folk-art. When the Company went bankrupt in 1927, he started to work on his own. Amorphous and assymmetric forms became more and more dominant in his art in the 1950s. He had several exhibitions in Hungary and abroad. There is a permanent exhibition of his works in his house at Nógrádverőce. – B: 0943, 1153, T: 0943, 7103.→**Badár, Balázs.**

**Gorsium** – A Roman settlement near the village of *Tác*, in the region of Székesfehérvár. It was once part of Pannonia, a province of the Roman Empire, now Transdanubia (*Dunántúl*). Emperor Trajan founded Gorsium in 106 AD on the place of the dissolved military camp. It was an important settlement, the seat of the Provincial Assembly and the center of emperor worship; but other pagan shrines were present as well. Later on, it became a Christian town. The Sarmatians destroyed Gorsium in 260; but a new city, *Herculia*, replaced it. The Magyars probably found a partially or totally Christian population there in 895. In the 11th century, the name of the settlement was *Fövény* (meaning sand). The 16th century Turkish wars destroyed Fövény. Currently, a Roman city is being excavated and the ruins of city walls and gates, villas, shops, halls, the

amphitheater, cemeteries, pagan shrines and early Christian churches, as well as some 4,000 artifacts can be seen in the archeological park, although only a small part of the town has been uncovered. – B: 1308, 7617, T: 7103.→**Pannonia, Aquincum; Brigetium; Savaria; Scarbantia; Sopiana; Strigonium; Sarmatians.**

**Gosárvári Mátyás** (Matthias) (16th century) – Historical songwriter. He was a customs officer in the province of Hunyad (Transylvania, *Erdély*, now in Romania). In his rhymed chronicles he sang about the history of the Huns, the disintegration of Attila's empire, the settling of the Szeklers. Its title is *Story of the ancient Hungarians, first arrival, how they settled in Sicambria with Attila and their great bloodshed for Pannonia*. His book was printed in the workshop of Gáspár (Gasper) Heltai of Kolozsvár, in 1579. The author dedicated it to István (Stephen) Báthori Jr. of Somlyó, nephew of the Ruling Prince. The dedication was written in four-line stanzas or quatrains of eleven syllables. Although the versification is uneven, its linguistic value is important. – B: 0942, 1150, T: 3240. →**Heltai, Gáspár.**

**Gosztonyi, Péter** (Budapest, 2 December 1931 - Bern, Switzerland, 31 March 1999) – Military historian. He obtained a Degree in Economics in Budapest; moved to Switzerland in 1956; studied Philosophy and History and earned a Ph.D.. He was Director of the Eastern European Library of Switzerland from 1964. He dealt with military history and he authored in this subject more than 17 books and some 200 articles. Among them are *Hungarian Golgotha*, *History of Political Revenge in Hungary from 1849 to 1963 (Magyar Golgota)*; *Admiral and Regent Miklós (Nicholas) Horthy (Admiral und Reichsverweser Miklós von Horthy)*; *Hitler's Foreign Army (Hitlers Fremde Heere)*; *The Red Army (A Vörös Hadsereg)*; *General Vlasov (Vlaszov tábornok)*; *Hungarian Soldiers in World War II (Magyar honvéd a második világháborúban)*; *Storm over Eastern Europe (Vihar Kelet Európa felett)*; *Budapest in Flames (Budapest lángokban)*, *Hungary in World War II (Magyarország az 2. Világháborúban)*, and *Uprising Sea...1956 (Föltámadott a tenger... 1956)*. – B: 1178, 0879, 1257, T: 7103.

**Góth, Sándor** (Alexander) (Pest, 19 October 1869 - Budapest, 7 September 1946) – Actor, director, and translator of literary works. In the Academy of Dramatic Art he was a student of Imre (Emeric) Nagy. After completing his studies he was contracted to Debrecen in 1890, and in 1894, he went to Kolozsvár, (now Cluj-Napoca, Romania). In 1896 he received a contract with the newly opened Comic Theater (*Vígszínház*), Budapest and remained its member until his death, apart from a year each he spent with the Magyar Theater, as well as the Renaissance and National Theaters, Budapest. He was an actor of a very wide range, and his comic interpretations were famous. He was also successful in leading roles of Bernstein's dramas translated by him. Góth excelled as a stage manager and acting-teacher. From 1931 until 1939 he was teacher at the Academy of Dramatic Art. Ella Kertész was his wife, an artist of the Comic Theater, who was his stage partner for decades. His roles included Prince Plata Ettingen in Ferenc (Francis) Molnár's *Olympia*; The chaplain in Sándor (Alexander) Bródy's *The Schoolmistress (A tanítónő)*; Bolinbroke in E. Scribe's *A Glass of Water (Egy Pohár Víz)*; Bloomfield Bennington in G. B. Shaw's *The Doctor's Dilemma*; Turai in Ferenc Molnár's *The Play's the Thing (Játék a kastélyban)*. Góth was one of the pioneers of Hungarian filmmaking. In 1911 he joined Miklós Faludi's film studio, Hunnia. He had roles also in sound-films, such as *Bitter Love (Keserű szerelem – János Hunyadi)* (1912). As a director, he

managed e.g. the *Merry Widow* (*Víg özvegy*) (1912); *Hyppolit the Butler* (*Hyppolit a lakáj*) (1931), and *Gentlemen's World* (*Úri világ*) (1938). His stage work included *Vengerkák*, a play co-authored with Árpád Pásztor (1917); *Paying Guest* (*Fizető vendég*) (1934), and *If Molière had only Written a Diary... (Ha Molière naplót írt volna...)* (1943). Góth translated more than fifty stage plays. – B: 0883, T: 7456. → **Bródy, Sándor; Molnár, Ferenc.**

**Gothard, Jenő** (Eugene) (Herény, County Vas 31 May 1857 - Herény, 29 May 1909) – Engineer, astronomer. He obtained a Degree in Mechanical Engineering from the Vienna Polytechnic while also studying Geodesy and Astronomy. On returning to his estate in Herény in 1881, he set up an observatory and conducted astronomical observations with the assistance of his younger brother. His main interests were the spectroscopy of comets and sky photography. He discovered the central star of the Lyra's ring cloud. He was the first to establish the relationship between the *novae* and the ring clouds. He was best known for his outstanding photography of the sky. He captured the lunar eclipse of 12 July 1889, in one half of a second with his special camera, and photographed the cloud of the Lyre constellation. He became famous by his astronomical observations via photography, and as an excellent instrument maker. He developed several photographic and photochemical procedures, constructed a “photo gun”, the forerunner of the double cameras. He was a member of the Royal Astronomical Society, London, and the Astronomische Gesellschaft, Germany. His main works are: *The Methods and Observation Methodologies of Contemporary Astronomy* (*Az újabbkori csillagászat módszerei és megfigyelésmódjai*) (1886); *Photography* (*A photographia*) (1890), and the *Studies in Spectralphotography* (*Spektralphotographiai tanulmányok*) (1881). The observatory of Szombathely's High School bears his name and it also houses the instruments and library of the Herény observatory, closed in 1918. – B: 0883, 1162, T: 7674, 7103.

**Gothic Style in Hungary** – The Gothic architectural style, following the earlier Romanesque style, was born in France in the middle of the 12th century and spread all over Europe during the 13th century. Germany and Hungary adopted this style relatively late. It is characterized by the use of ribbed vaulting, flying buttresses, pointed arches and steep towers and roofs. The use of columns and flying buttresses relieved the walls from great pressures and allowed the creation of playful, delicate structures. Best examples in Hungary are the main church of the Buda castle and the Benedictine church in Sopron. – B: 1138, T: 7663.

**Göttweig Fragment** – In Göttweig, Lower Austria, a Benedictine monastery was established in 1072. The Monastery of Zalavár was also under its authority, between 1715 and 1873. The Göttweig Monastery's library contains a rich collection of manuscripts and incunabula. The manuscript fragment found there is a valuable 15th century Hungarian language relic. The 9-line long prayer fragment is addressed to the Virgin Mary. Flóris Rómer discovered the Hungarian text buried within the Latin text. The manuscript fragment is the property of the Göttweig Monastery – B: 1078, T: 7617. → **Rómer, Flóris.**

**Götz, László** (Ladislas) (Halastópuszta, south of Körmend, 1934 - Sankt Pölten, 1992) – Physician, historian. As “class alien” he could not study at the Arts Faculty of the University of Budapest, but he was able to study Medicine at the University of Pécs.

After the 1956 Revolution and Freedom Fight, he fled to Austria. He continued his studies in Medicine at the University of Vienna, where he obtained his Degree. Later, at the University of Sankt Pölten, he also obtained a Degree in Dermatology. It was at St. Pölten that, besides his work as a dermatologist, he began studying early Hungarian history, with the published literature of its archeological, linguistic aspects and its ancient history. He also began studying at the Arts Faculty of the University of Vienna. Here, in the early 1970s, he became acquainted with the eminent Hungarian archeologist Gyula (Julius) László (well-known for his debatable views on early Hungarian history), who stayed in Vienna for some time, and exerted considerable influence on Götz's views. Götz was also influenced by the linguist Sándor (Alexander) Csóke, living in Austria at the time. From 1981, Götz began writing a number of ancient historical works, published by himself (because he could not find an interested publisher), dealing with the "Neolithic Revolution" which, he claimed, places the human ethnic, cultural and linguistic relationship on new foundations. He particularly studied the Sumerian culture and language. In his opinion the influence of the ancient Near-Eastern and Mid-Eastern languages exerted "immeasurable influence" on later civilizations. He placed emphasis not only on regular phonetic changes, but also on semantic changes and on the creativity of the human mind. He pointed out that the Sumerian language and culture ruled Asia Minor for nearly 2000 years and influenced other languages and cultures far and wide, especially after the Semitic Akkadian takeover of the Sumerian City States, when the native population fled in all directions in large numbers. It's conceivable that they settled among the ancestors of the proto-Hungarians and other so-called Finno-Ugric (Ural-Altai) peoples, from the Black Sea and the Caspian Sea regions all the way to the Urals. Their language was neither Semitic nor Arian (i.e. Indo-European), but agglutinative, as are the Finno-Ugric (Ural Altaic) languages. Götz became a popular author among the émigré general public. His studies include *On the Near-Eastern Ancestral Language – the Critique of European Linguistics and View on History (Az elő-ázsiai ősnyelv felé – Az európai nyelvtudomány és történelemszemlélet kritikája)* (1981); *The Sun Rises in the East – Our Culture from Ancient Historic Times, vols. i, ii (Keleten kél a Nap – Kulturánk a történelmi ősidőkből, I-II)* (1994). – B: 1031, 2000, T: 7456.→**László, Gyula.**

**Governor, Vice Regent** – A person assigned to administer the political and military affairs of a country or part of a country. He represents the ruler or he is temporary head of state. Hungary's governors/vice-regents were: (1) János (John) Hunyadi, governed between 1446 and 1452 for King László V (Ladislás, 1453-1457) a minor, living abroad at the time; (2) Mihály (Michael) Szilágyi, named Governor for five years, when King Mátyás I (Matthias Corvinus, 1438-1490) was elected, but the King asked him to resign in 1458 after only year in office; (3) János Gáspár (John Gaspar) Ampringen, Great Master of the Teutonic Order of Knights, who became Governor of Hungary on the order of Emperor Leopold I, between 1673 and 1681, following the elimination of the Wesselényi Conspiracy, and the suspension of the Constitution of the higher orders; (4) Lajos (Louis) Kossuth, Governor with limited powers, elected by the National Assembly on 14 April 1849; he governed in this capacity for 4 months; (5) Archduke Joseph Habsburg, as Governor, became Head of State on 7 August 1919, and was in office for 16 days, until 23 August 1919; (6) Rear Admiral Miklós (Nicholas) Horthy de Nagybánya was elected Regent on 1 March 1920 by the National Assembly and was in office until

his resignation on 16 October 1944. – B: 1230, 1231, 1020, T: 3240.→**Hunyadi, János; Kossuth, Lajos; Horthy, Miklós; Wesselényi Conspiracy.**

**Gózon, Gyula** (Julius) (Érsekújvár now Nové Zámky, Slovakia 19 April 1885 - Budapest, 8 October 1972) – Actor. He studied at the private acting school of Szidi Rákosi and started his career in rural towns in 1902. Between 1906 and 1910, he worked in Nagyvárad (now Oradea, Romania), then in Budapest, as a member of the Cabaret of Endre (Andrew) Nagy, the People's Opera (*Népopera*), and in 1919 the King Theater (*Király Színház*). He even ran his own theater, the *Geranium Cabaret (Muskátli Kabaré)*, where he worked with Lili Berky, his wife. He performed, among others, at the Inner City Theater (*Belvárosi Színház*) and the National Theater (*Nemzeti Színház*). During World War II, due to the anti-Jew laws, he could not act. In 1945, he was again on the stage. His major roles include Cadet Bilitzky in Herczeg's *The Daughter of the Nabob of Dolova (A dolovai nábob lánya)*; Szellemfi in Szigligeti's *Liliomfi*; Vackor in Shakespeare's *A Midsummer-Night's Dream (Szentiványéji álom)*; the French king in Kacsó's *John the Brave (János vitéz)*, and Tyelegin in Chekhov's *Uncle Vanya (Ványa bácsi)*. He played major roles in some 90 feature films including *Hyppolit, the Butler (Hyppolit a lakáj)* (1931); *A Night in Venice (Egy éj Velencében)* (1934); *Dream Car (Meseautó)* (1934); *This Villa is for Sale (Ez a villa eladó)* (1935); *Rosewood Cane (Rózsafabot)* (1940); *Mrs. Déry (Déryné)* (1951), and the *Sons of the Stone-hearted Man (A köszívű emberfiai)* (1964). He was a popular actor, excellent in dramas as well as in operettas. He received the Kossuth Prize (1954) and the titles of Merited Actor (1951), and Outstanding Actor (1955). – B: 0883, 1178, T: 7103.→**Berky, Lili.**

**Gozsdu, Manó** (Emanuil Gojdu) (Nagyvárad, now Oradea, Romania, 22 February 1802 - Pest, 8 February 1870) – Lawyer, politician. He came from a Romanian merchant family, studied law in Nagyvárad and Pozsony (now Bratislava, Slovakia) and received his Degree in 1824. For four years, he worked at the law office of Mihály (Michael) Vitkovics in Pest, later opened his own practice. At the Vitkovics house, he met with Ferenc (Francis) Kazinczy, Dániel Berzsenyi, and other writers. In 1826, he was the first lawyer to submit income tax documents to the Councils of Pest and Buda in Hungarian, instead of the customary Latin. He presided over the Assembly of the Romanian minority in Hungary on 21 May 1848 when, in a vote of confidence, support for the Batthyány Government was declared. He was Lord Lieutenant of Krassó from October 1860 to 1861. During the 1861 parliamentary session, he was Secretary of the Upper House. From 1866, he was a Member of Parliament and, from 1869, Supreme Court Judge. As a politician, he strove to promote co-operation between Hungarians and the Romanian minority in Hungary. He supported Romanian literature and extended financial backing for the publication of numerous books in Romanian. His poems were published in the periodical, *Literary Offering (Szépliteratúrai Ajándék)*. His wealth remained in Hungary; however the Romanian state expressed a claim to it. – B: 0883, 1257, 1020, T: 7667.→**Kazinczy, Ferenc; Berzsenyi, Dániel; Batthyányi, Lajos.**

**Goÿ, Andor** (Andrew) (? , 1896-?) – Instrument technician, inventor. His most significant invention is the Goÿ typesetting machine. This was a typewriter that produced font types like handwriting. His invention was recognized worldwide. It was the world's first 11-unit typesetting typewriter. The machine could accommodate 11 sets of different font sizes and, depending on their size, it reproduced 250-300 per minute. – B: 1226, T: 7662.

**Grabovszky, Emil** (Ungvár, now Uzhhorod, Ukraine, 20 November 1892 - Ungvár, 20 October 1955) – Painter and graphic artist. He studied between 1911-1914 at the School of Applied Art in Budapest, then at the Academy of Applied Art between 1915 and 1917. In 1918 he became member of the artist group of Nagybánya (now Baia Mare, Romania) where he gathered enormous knowledge in fine arts that had great influence on his style. In 1919 he returned to Ungvár, and took part in the artist movement and activities of the region. In 1926, he emigrated to Hungary, where he worked as a restaurateur and took some study trips to Austria, Yugoslavia, Switzerland and Italy. In this period he painted numerous *plein air* landscapes. In 1939 he moved back to Ungvár and worked for a while in the library. He was an impressionist painter, who had a great talent in capturing the monumental site of the Carpathian Mountains and showed the surrounding nature in a beautiful, warm, lyrical atmosphere. His works include *Hoverla* (1946); *Mountains of Kőrösmező (Kőrösmezői hegyek)* (1951) and *Winter Twilight (Téli szürkület)* (1947). His paintings and works are kept in the Museum, Ungvár and other museums around the Carpathian region. – B: 0883, 1160, T: 7653.

**Graduals** – These are songbooks of early Protestant liturgy with Gregorian tunes and Hungarian texts. They contain, besides the part of the daily *Officiums* included in the Protestant service, holiday hymns, chants of the Mass, laments, passions, etc. Of the printed editions, the following are significant: the *Old Gradual (Őreg Graduál)* (1636); the *Songbook of Gál Huszár (Huszár Gál Énekeskönyv)* (1674), and the *Appendix (Függelék)* (1675) to the Brewer-edition of the *Lőcse Songbook (Lőcsei Énekeskönyv)*. Of the manuscript copies the following are of importance: the *Apostagi, Batthyány, Bélley, Csáti, Curgói, Eperjesi, Kálmáncsai, Kecskeméti, Komjátszegi, Nagydobszai, Patay, Ráday and Spáczay Graduals*. The interesting feature apparent in them is the gradual influence that the spirit of folk music had on Hungarian Gregorian chants. – B: 1197, 1020, T: 7617.→**Huszár, Gál.**

**Grain Slicing Machine** – This was invented in the 1930s by Pál (Paul) Rajkai, a Hungarian mill architect. This invention was a significant development in milling technology. He solved a problem that was considered impossible by the experts, the handling and slicing of individual grains during the milling process. The slicing and separation of the wheat germ from the rest of the kernel improved the quality of the flour and produced a highly nutritional by-product. Wheat germ constitutes about 40% of the grain and may be used for fortifying the flour. – B: 1226, 1020, T: 7662.→**Rajkai, Pál.**

**Gramophone Pickup (Phono)** – Made up of a magnetic cartridge and an attached stylus (needle). The magnetic cartridge has a permanent magnet and a small coil (or armature), located between the poles of the magnet. As the stylus moves within the grooves of the record, the coil moves between the poles of the magnet. The movement of the coil induces a voltage within its windings that is proportional to the variations in the grooves of the recording. The extremely small voltages generated in the coil are amplified through several stages, boosting the strength of the electric signal to the point that a loudspeaker can convert the electric signal into audible sounds. The Hungarian physicist Ferenc (Francis) Tarján invented it in 1924. – B: 1226, 1020, T: 7456.→**Tarján, Ferenc.**

**Granasztói, Pál** (Paul) (Budapest, 29 August 1908 - Budapest, 3 July 1985) – Writer, civil engineer, city and landscape designer. From 1934 to 1945, the Planning Division of the City of Budapest employed him. From 1948 to 1958, he was Chief Consultant for the

Ministry of Construction and City Development. He was a member of the *Congress Internationaux d'Architectura Moderne* between 1947 and 1956. He won several awards for his city designs and published numerous books on related subjects. Some of his publications are: *European Architecture (Európai építészet)* (1947); *City and Architecture (Város és építészet)* (1960) and *Fate of Our Cities (Városaink sorsa)* (1976). He received the Pro Arte Prize (1966), the Miklós Ybl Prize (1974) and the János Hild Medal (1974). – B: 0883, 1257, T: 7662.

**Grandpierre, Attila** (Budapest, 4 July, 1951 - ) – Astronomer, musician, poet, writer. He completed his astronomy-physics studies at the University of Budapest in 1974. He became co-worker at the Astronomy Research Institute of the Hungarian Academy of Sciences, where his research bore important results. His field of research includes the nature and life on planets and the Sun, and the external and internal character of the Universe. Between 1975 and 2000, he was the singer, composer and lyricist of a musical ensemble named *The Galloping Post-mortem Examiner (A vágató halottkém)*. He is also engaged in writing philosophical works. He is a columnist of the periodical, *Gate (Kapu)*. He is a member of the editorial committee of *World Futures* and the *Noetic Journal*. Since 1997, he has been Professor at the King Louis the Great University of Miskolc (*Nagy Lajos Király Egyetem*). He played a role in the films *Negative Nights (Negatív éjszakák)*; *The Night Song of the Dog (A kutya éji dala)*, and the *Noe Delta 2*. Among his books are *The Maddening Magic of the Universe – Mind Rockets (A mindenség örjítő varázsa – Agyrakéták)* poems (1994), and *Fabulous Ship of Several Stories– Living Tree of Tales (Emeletes mesehajó – élő mesefa)* poems (2000). Author of books dealing with Hungarian ancient history: *Hungarians are the Ancient People of Royal Magicians (Királyi mágusok ősnépe a magyar)*; *Fabulous Legends of Hungarian Ancient Times (Magyar ősidők csodálatos mondái)*; *Atilla and the Huns... (Atilla és a Hunok...)*; *Are the Hungarians Aboriginal in the Carpathian Basin? (Őshonos-e a Magyar a Kárpát-Medencében?)*, and *How Could the Hungarian People be Saved? (Miként menthető meg a magyar nemzet?)*. He is also a recording artist; his LP records include *Getting the World-Instinct Leap Out (A világozstön kiugrasztása)* (1991); *Hammering on the Gates of Nothing (A Semmi Kapuin Dörömlve)* (1992); *Re-Conquering of Eden (Az Éden visszahódítása)* (1997-1998) and *Sundance (Naptánc)* (1990). – B: 0874, 1953, T: 7103.

**Grandpierre, Emil**→**Kolozsvári Gradpierre, Emil.**

**Grandpierre, Lajos** (Louis) (Debrecen, 8 January 1905 - Debrecen, 30 April 1986) – Writer, reporter. He came from an exiled French Protestant Huguenot family that settled in Hungary. After his high school studies, he became a manual laborer; after serving in the military, he worked in the leather industry in various cities of Transylvania (*Erdély*, now in Romania). His first novel, *Accident (Baleset)* was published in the journal *People of the East (Kelet Népe)* in 1941. With his historic novel, *Storm in Fairyland (Vihar Tündérországbán)*, he won first prize in 1942 at a novel competition. Between 1945 and 1965, he was the editor of three different journals in the cities of Kalocsa, Kecskemét and Debrecen. His novels centered on events of the immediate past. His works include *Valley of Wonders (A csodák völgye)* novel (1945); *In Eternal Readiness (Örök készenlétben)* novel (1980) and *The Vanished Manuscript (Az eltűnt kézirat)* novel (1986). He was a recipient of the Ferenc Rózsa Prize (1960) and the SZOT Prize (1961). – B: 0883, 1257, T: 7662.

**Grave Markers** – Grave markers in Hungary are divided between two great religious groups: Catholic and Protestant. The Catholic grave markers are mostly in the form of the cross, or at least the cross is shown on them; they are wooden crosses or gravestones, seldom made out of metal. Those of the Reformed and Unitarian faiths are made of wood. They differ according to the various parts of the country, but with their measurements and carving they are supposed to look like humans; therefore it has legs, a trunk and a head. When the runic writing became illegal and the people knew no Latin or German, the grave markers also indicated the sex, age, family and fortune, sometimes even social position of the deceased. Various symbols are carved on the grave markers, like the Sun, tools, instruments, weeping willow, etc. The formal features offer themselves for a semiotic analysis on the levels of syntax, semantics and pragmatics. The opposites: “young”-“old”, “male”- “female” and “rich”-“poor” are represented in various modes. The symbol is important insofar as the grave markers are anthropomorphic that is also reflected in the verbal labels of their parts: “head”, “breast”, “foot”, etc. Historically, the grave markers probably belong to the most ancient layer of Hungarian folk culture. Typologically, the Hungarian wooden grave markers are examples of the highly differentiated ethno-semiotic systems, used by the peasantry in Eastern-Central Europe. The Protestant Hungarian grave markers offer the most interesting sign language in Hungary’s culture. – B: 1134, 1317, T: 7682.→**Hungarian Runic Script.**

**Grave Markers, Balatonudvari** – Unique tombstones in a small village on the northern shore of Lake Balaton, in the neighborhood of the Tihany peninsula. It belonged to the Tihany Abbey during medieval times. Its main attraction is the historic cemetery and its 63 “heart-shaped” tombstones. Most of them are from the years between 1800 and 1850, the works of unknown village stone carvers. This kind of tombstone can be found elsewhere as well, but not in great numbers. – B: 1318, 1020, T: 7103.

**Grave Post, Wooden** (*kopjafa*) – In ancient times, the spear or pike was stuck into the grave of the warrior as protection for the dead. Later on, it was placed into a wooden post; and still later, the post was ornamented. Eventually, the pike was left out leaving the wooden post itself. These beautifully carved and/or painted wooden grave posts are at present the unique ornaments of Hungarian Calvinist and Unitarian cemeteries. Their designs usually vary from village to village. The main motives of the carved ornaments are: the tulip (the symbol of Virgin Mary), and the X-shape (representing the letter B in the old script, standing for Blessed Lady (*Boldogasszony*) or midwife (*bába*), both words starting with B in Hungarian. – B: 1153, 1020, T: 7456, 3233.→**Grave Markers; Madonna the Great.**

**Grave Statuettes, Cupholding** – Carved stone or cast metal in human form. One of the oldest examples holds the cup with both hands at the height of the statuette’s navel, while, on the newer ones, one hand is pressed against the navel, and the other is holding the cup slightly higher. The earliest examples of such statuettes were dug up in the ancient Sumerian city of Ur, in Mesopotamia (present-day Iraq). These are small statuettes carved from alabaster. The Greek Omphalos cup is a round, low vessel. In the middle of it, the traditional marking represents the navel. Over the deceased, a round-shaped mound called *kurgan* was erected and the statuette was placed, facing east, on top of it. The largest number of these *kurgans* is found in the area of the Dnieper and Don Rivers in Russia where, according to Herodotos, the Scythians had their burial places.

Cumanians also made similar statuettes; such stone statuettes were erected over the grave of Hun leaders Keve, Béla and Kadosa. At the Russian archeological site of later burials, a number of larger size grave statues were found. They were also masculine figurines holding the cup in front of their navel. These statues were facing in south-westerly direction. – B: 1078, 1141, T: 7675.→**Sumerians**.

**Gravetti Culture** – This culture flourished in the last stage of the Stone Age in Europe, between 40,000 and 10,000 BC. They were of Asian ancestry and introduced into the Carpathian Basin their way of life, which was different from the previous ones. These people lived on the plains in hunting groups and settled mostly beside the rivers. They dwelled in huts covered with leather and dirt and hunted for food. For tools, they used chisels, bones and antlers. Remnants of their works of art include some small female statuettes. Settlements discovered in Hungary are at Árka, Bodrogkeresztúr, Dunaföldvár, Madaras, Pilismarót, Ságvár, Szeged, Tarcál, and at the Danube-Bend. – B: 1138, 1230, T: 7676.

**Gravitational Pendulum** – A torsion balance; it is the most famous invention of Baron Loránd (Roland) Eötvös to measure the variations of the gravitational force. – B: 1226, T: 7456.→**Eötvös, Baron Loránd**.

**Gravity, Theory of** – This pointed out the rules of the variations in the gravitational force. In the course of his scientific studies, Baron Loránd (Roland) Eötvös successfully demonstrated that the force of gravity depends only on the mass of a body and not on the nature of its material. The gravitational mass and the inert mass are equal or proportional. This determination by Eötvös is the basis of Einstein's general theory of relativity. – B: 1226, T: 7456.→**Eötvös, Baron Loránd**.

**Gray Cattle of Hungary** (*Magyar szürke* or *Gray Hungarian*) – Longhorned Gray Steppe Cattle, a traditional Hungarian breed, used both for draft purposes and for eating. They were yoked in teams of four or more to pull merchant wagons across the Steppes, sometimes in long caravans. However, at the beginning of the 1850s, they began to decrease in numbers, due to crossbreeding and the increasing use of the *Simmental*. In 1861, a Hungarian nobleman moved a superior herd to a state farm. Here, the breed was selected for early maturity and heavy musculature. In addition, some lines were selected for increased milk production. The breed continued to lose popularity. By 1975, only two herds remained with a total of 300 cows. By 1982, the stock had increased to 850 cows in 6 herds; currently there are about 3500 cows and their number is growing. The Hungarian Steppe cow weighs an average of 535 kg, with a height at the withers of 135 cm. The average bull weighs 700 kg and stands 150 cm at the withers. In Medieval times, this cattle-breed was sought after in western European cities and the cattle were driven on foot to markets. That meant a steady income for the country's economy. Until the beginning of the 20th century it was the foremost breed in Hungary; but its number has steadily declined. Today this breed is protected as a national treasure and its significance has grown due to their alleged resistance against BSE and

CJD diseases. Gray cattle herds are kept especially on the Hortobágy Puszta. – B: 1319, 1020, T: 7103.→**Livestock keeping.**

**Great Hungary** – *Magna Hungaria* is the Latin name of the earlier, supposed ancient home of Magyars. Julianus friar reported its existence to King Béla IV (1235-1270), when he returned from his mission in 1236. He reported that he found a Magyar-speaking settlement between the Kama and Bjelaja Rivers and the Ural Mountains, who knew of their brethren, who had moved to the West. Julianus understood them, because their language was practically identical. Julianus also reported the danger of the Mongol-Tartar invasion, which became a tragic reality in 1241-1242. Julianus' report was confirmed by Giovanni da Pian del Carpini who visited that territory in 1246. – B: 1122, T: 7103.→**Magna Hungaria; Julianus Friar; Mongol-Tartar Invasion.**

**Great Hungarian Plain** (*Nagyalföld*) – An alluvial plain situated in the middle of the Carpathian Basin, dominated by two large rivers: the Danube, forming its western and southern boundary, and the greatest tributary of the Danube, the Tisza River, dissecting the plain down the middle from northeast to south. Its main component areas are the Danube-Tisza Interstice, the Trans-Tisza Region and the Bánát Region. The extent of the Plain from north to south is 460-500 km and from west to east 220-290 km; the area is larger, than 90,000 km<sup>2</sup>. The Versailles-Trianon Peace Treaty of 1920 ceded some of its fringe parts to the neighboring countries. From the Great Plain of the Carpathian Basin, approximately 60,000 km<sup>2</sup> was left in truncated Hungary. Its present name first started to be adopted near the end of the Middle Ages. This large Plain, often monotonous in appearance, does not in fact show a uniform picture. Sand hills dominate the Danube-Tisza Interstice and the Nyírség (in the northeast); the once extensive *puszta* (steppes) are now cut by canals and along the Tisza River. There are numerous ox-bow lakes. The surface of the Plain is a mosaic of low lands of different altitudes. The Nyírség, encompassed by Nagykároly (now Carei Romania), Debrecen and Tokaj, is a sea of undulating sand hills, covered by sparse patches of forests or poor scrublands; in earlier centuries, a barren region, but now a region of extensive orchards. The large Sárrét, formed by the Berettyó and Körös Rivers, is in extent a marshy lowland part of the Hungarian Plain, where several hundred, so-called Cuman hills appear. The Plain is generally poor in mineral resources; however, more recent research has opened up a number of crude oil and natural gas sources and there is richness in thermal waters. In past centuries, the Plain was dominated by agriculture, especially livestock farming, using the extensive farming method. In the flood plains and marshy lowlands, fishing and hunting used to be a widespread occupation, often in a primitive, predatory fashion. However, the more recent flood-mitigating embanking work and land reclaim by draining has led to much more agricultural activity, tillage of the land and, in the sandy areas, to the development of fruit production and viticulture. The climate of the Plain tends to vary and can be extreme; its typical climatic phenomena are sudden storms and swift hail, as well as the *Fata Morgana* mirages. The Hungarians, after their occupation of the Carpathian Basin, settled mainly alongside the river flats. After the devastation caused by the Mongol invasion in 1241-1242, King Béla IV, in order to resettle the depopulated areas, brought in the Cumanians to the Danube-Tisza Interstice. Toward the end of the 13th century, the settlement network stabilized itself in a pattern of fairly densely distributed small villages. In the following centuries, the country-town and markettown pattern developed; but this was disrupted by the Ottoman Turkish occupation in the 16th

and 17th centuries. Subsequently, the Hungarian population of the southern part of the Plain virtually died out or fled further north. New regions and ethnic groups were formed; the population of the central parts of the Plain became concentrated in larger settlements and country towns. From the end of the 14th century, some Balkan ethnic groups, fleeing from the Turkish conquerors, regularly received permission to settle on the Plain, mainly on its southern part. A larger number of Serbians settled there after the ill-fated uprising against the Turks in 1691. State-run resettlement actions led to the establishment of continuous areas of new German settlers in the Bácska and Bánát regions. At the beginning of the 18th century, Slovakian settlement areas were also formed on the Plain. The more recent Hungarian resettlements came from the tobacco farmers of the Szeged and Csongrád areas and from County Békés during the 19th century. Near the Lower Danube, Szeklers from Bukovina settled in 1883. After World War II, large numbers of Germans from Bácska, and Slovaks of County Békés were deported. Industrial developments on the Plain were slow to appear and the processing industry was limited; but after 1945, more and more industrial plants were built. The two most important towns of the Hungarian Plain are: Debrecen, rich in history, the center of the northeastern part of the Plain; and Szeged in the southeast at the mouth of the River Maros, where it flows into the River Tisza. – B: 1078, 1143, 1138, 7456, T: 3240, 7456.→**Turkish Rule in Hungary; Trianon Peace Treaty, Paris Peace Treaty.**

**Greek Catholic Church in Hungary** – Name of the churches of the Byzantine rite and united with the Roman Catholic Church. The Hungarian Greek Catholic Church has a long history. It is well known from the history of St. Cyril and Method that the Magyars, before settling in the Carpathian Basin, met Byzantine Christianity. The Byzantine historian, Johannes Skylitzes (811-1057) reported in his *Synopsis Historiarum* about the visit to Byzantium and baptism of tribal leaders Bulcsu in 948 and Gyula in 952. The coronation mantle of King István I (St Stephen, 997-1038) is one of the finest examples of Byzantine art in Hungary. There were several Byzantine monasteries in the country already in the 11th and 12th centuries, all destroyed during the Mongol-Tartar invasion in 1241-1242. The year 1054, when the Latin and Greek Churches mutually excommunicated each other, is marked as the final breach between the Greek and Latin parts of Christianity. Yet the separation is complicated and was never complete. In Hungary in 1646, a good number of Sub-Carpathian Ruthenians, and Romanian Orthodox in 1698 united with Rome thanks to John Joseph Cameli, Greek Basilian monk, and the Jesuits Pál László (Paul Ladislav) Barányi and Gábor (Gabriel) Hevenessy with the support of Cardinal Lipót (Leopold) Kollonits, Archbishop of Esztergom. In the 15th and 16th centuries, due to widespread population shifts caused by the Turkish invasions, communities of Orthodox Serbs, Rusyns, Slovaks and Greeks moved into the area. Most of them eventually became Catholic, but retained their Byzantine heritage and married clergy. In the 18th century, a number of Hungarian Protestants became Catholic and chose the Byzantine rite. They were placed under the jurisdiction of non-Hungarian Byzantine bishops. Once the Greek Catholics were integrated into Hungarian society, some began to press for the use of the Hungarian language in the liturgy; but permission was not granted. For this reason, the first Hungarian translation of the liturgy of John Chrysostom was only published privately as late as in 1795. In the 19th century, several other liturgical books were published in Hungarian; but the church authorities still did not approve their use. A watershed in the history of this community took place in 1900, when

a large group of Greek Catholic Hungarians went to Rome on pilgrimage for the Holy Year. They presented Pope Leo XIII with a petition asking him to approve the use of Hungarian in the liturgy and to create a distinct diocese for them. On 18 June 1912, Pope Pius X established the diocese of Hajdúdorog for the 162 Hungarian-speaking Greek Catholic parishes. The use of Hungarian was still limited to non-liturgical functions: the liturgy was to be celebrated in Greek and the clergy were given three years to learn it. World War I intervened, and the requirement to use Greek was never enforced. In the 1930s the rest of the necessary liturgical books were published in Hungarian. The diocese of Hajdúdorog originally covered only eastern Hungary and the city of Budapest. Its jurisdiction was extended to all Greek Catholics in Hungary in 1980. Since 1950, there has been a Greek Catholic Theological College in Nyíregyháza that became a confederated college of the Pontifical Oriental Institute in Rome in 1996. Its publication is the *Greek Catholic Theological Revue*. Between 1990 and 1995, there were 21 new Greek Catholic churches built, and 2 kindergartens, 1 secondary school, 1 high school, 2 colleges and 3 social homes were founded in Hungary. The Greek Catholic Church in Hungary has now 167 parishes with 279 priests, 10 friars and 11 nuns. Szilárd (Constantine) Keresztes, the Bishop of Hajdúdorog is also the Apostolic Administrator of Miskolc. There is a rather small number of Greek Catholic Hungarians, who emigrated to North America and they have a few parishes, all of them part of the Ruthenian dioceses in the USA and the Ukrainian dioceses in Canada. – B: 1116, 1117, T: 7456, 7103.

**Greek Crown** (*Corona Greca*) – The name of the lower part of the Hungarian Holy Crown that received its name from the scripts appearing on it. It was assumed that Michael Dukas, ruler of Byzantium (1071-1078) sent it, its proof being his picture on the crown. However, this was attached to the crown later, probably replacing the picture of the Virgin Mary.. It has the following symbols: five pendants, terminal decorations, and ten enamel pictures, six of them portraits of the militant saints. The upper part of the crown (*Corona Latina*) could not serve as a crown without the lower part. There is a picture on the coronation mantle, depicting the original crown sent by Pope Sylvester II to King István I (St Stephen) (997-1038), crowned at Christmas of 1000. – B: 1321, 1020, T: 7103. → **István I King; Holy Crown, Hungarian.**

**Gregor, József** (Joseph) (Rákosliget, 8 August 1940 - Szeged, 27 October 2006) – Opera singer (bass). He studied singing under Miklós (Nicholas) Kerényi and Endre (Andrew) Rösler at the Béla Bartók School of Music, Budapest (1957-1959). He started as a chorister in the Army's Art Ensemble (*Honvéd Művészegyüttes*) (1959-1963). From 1964 to 1968, he was a member of the National Theater (*Nemzeti Színház*), Szeged, and from 1988-1989, a member of the Kisfaludy Theater (*Kisfaludy Színház*), Győr. From 1976, he appeared regularly at the Opera House, Budapest. He was Manager of the Operatic Section of the National Theater, Szeged (1989-1992). He made his operatic debut at the Szeged National Theater in 1964. His debut at the Hungarian State Opera came in 1977. He sang most of the great Italian basso roles (Fiesco, Attila, Philip, Henry VIII); some of the finest Mozart parts (Osmin, Leporello, Don Alfonso and Sarastro) and the buffo characters (Don Pasquale, Dulcamara, Basilio and Varlaam), as well as roles in many other operas, classic and modern. He was an excellent cantata as well as oratorio singer and has contributed to more than 30 Hungaroton recordings, including oratorios and concert arias. He sang in several of the leading opera houses of the world, including Hamburg, Antwerp, Marseilles, Amsterdam, Ghent, Baltimore, Geneva, Metropolitan

Opera in New York, Houston, Portland. He was awarded, among others, the Ferenc Liszt Prize (1974), the titles of Merited Artist and Outstanding Artist (1978, 1989), the Pro Urbe Prize of Szeged (1991) and the Kossuth Prize (1999). – B: 0874, 1445, T: 7103.→**Rösler, Endre.**

**Gregory Walk** (*Gergely járás*) – A folk custom originating in the Middle Ages. The day of St. Gregory the Great (12 March) marked the beginning of the school year in the Middle Ages. The students put on all kinds of costumes and went around the villages/towns singing: “*To doctor Saint Gregory the famous teacher – on his day according to old customs – let’s go to school as God ordered*” (*Szent Gergely doktornak, Híres tanítónknak neve napján, Régi szokás szerint, Menjünk Isten szerint iskolába...*). This was the way to recruit new students and to gather donations for the teacher. The ones carrying the basket for donations were called “spiters”. – B: 1150, 0942, T: 3240.

**Greguss, Ágost** (Austin) (Eperjes, now Presov, Slovakia, 27 April 1825 - Budapest, 13 December 1882) – Writer, esthete, literary critic. He completed his education in Hungary, Austria and Germany, and taught in a high school at Szarvas (1846-1849). His poems and articles appeared in periodicals from 1844 on. In a pamphlet entitled *Messenger (Futár)*, published in Szarvas in 1847, he attacked Sándor (Alexander) Petőfi’s poetry. In the 1848-1849 War of Independence, he fought against the Austrians. After 1852, he contributed to several journals and worked as an editor. From 1860, he was a member and Secretary of the Kisfaludy Literary Society and was its President from 1879. He was the Editor of the Society’s Year Book from 1870. He taught Esthetics at the University of Budapest until his death. He translated Shakespeare and other foreign poets into Hungarian. Some of his publications are: *The Outlines of Esthetics, (A szépeészet alapvonalai)* (1849), *Hungarian Prosody (Magyar verstan)* (1854). He was a member of the Hungarian Academy of Sciences – B: 0883, 1257, T: 7662.→ **Petőfi, Sándor.**

**Greguss, Pál** (Paul) (Fulgur) (Budapest, 9 June 1921 - Budapest, 28 February 2003) – Chemical engineer, physicist. He did his higher studies at the Budapest Polytechnic (1939-1941) and at the University of Szeged (1940-1944). He earned a Ph.D. in the field of ultrasound. His first professional employment was as chemical engineer at the Coal Mines of Tatabánya (1946-1949). From 1949 to 1952, he was a teacher in the high school of Tatabánya. Between 1949 and 1952, he was an assistant professor in the Department of Biophysics of the University of Budapest. In 1956, after various scientific positions, he became Head of the Ultrasonic Research Laboratory, established at the Hungarian Railway Scientific Research Institute. He worked as a scientific counselor in Durgapur, India (1966-1968), then, in 1969, he joined the Department of Ophthalmology of the New York Medical College, as a Research Professor of Applied Biophysics. He left the US in 1973, and moved to Germany to become Professor at the *Technische Hochschule*, Darmstadt. He also worked as a professor at the Optical Laboratory of the *Gesellschaft für Strahlen-und Umweltforschung mbH*. He returned to Hungary in 1976, and, until his retirement in 1990, he was Director of the Biophysical Laboratory of the Budapest Polytechnic. From 1990 to 1994, he was a consultant at the Lycée Joliot- Curie International Research Institute in Renne, France and, from 1995 he was Professor Emeritus at the Budapest Polytechnic. He invented a panoramic lens, the Pál-Optic, used in NASA's Deep Space Program. Its lens provides a 360° view of the Earth, the Sun and the Moon simultaneously and therefore it can be used to determine the exact location of the space probe. He was the author of over 330 scientific publications, including several

books, and the owner of more than 20 patents all around the world. Some of the awards he earned in recognition for his work include the Pioneer Award in Medical Ultrasonics and AIUM, and NASA's Certificate of Recognition for the PAL-optic. For the same invention and its applications, he received the "Invenció '91" Award from the Hungarian Association of Inventors, the Genius '96 Oscar Award and the Gold Medal of the 1st Inventors' Olympic Games - Genius '98. He was a pioneer of acoustical and medical holography. – B: 0874, 1105, 1279, T: 1279, 7103.

**Greguss, Zoltán** (Budapest, 5 May 1904 - Budapest, 20 December 1986) – Actor. At the age of 17 he was already on the stage of the Szeged Theater (*Szegedi Színtársulat*). In 1928 he worked at the National Theater (*Nemzeti Színház*), Budapest. After a long recovery from an accident, he acted again – mainly in *bonvivan* roles – at countryside theaters. In 1940 he joined the Madách Theater (*Madách Színház*), Budapest. After 1945, he worked at the Artist Theater (*Művész Színház*), the Innercity Theater (*Belvárosi Színház*), and was Director of the Modern Theater (*Modern Színház*) in 1948. From 1949 to his retirement in 1979, he was a member of the Madách Theater. His major roles include Duke of Reichstadt in Rostand's *The Eaglet* (*L'aiglon, Sasfók*); title role in Felkai's *Nero*; Szatyin in Gorkij's *Night Asylum* (*Éjjeli menedékhely*), and Claudius in Shakespeare's *Hamlet*. His major feature film roles include *Black Diamonds* (*Fekete gyémántok*) (1938); *Transylvanian Manor House* (*Erdélyi kastély*) (1940); *Midnight Express* (*Éjféli gyors*) (1942); *Opiate Waltz* (*Ópiumkeringő*) (1943) and *Dearest Anna* (*Édes Anna*) (1958). He also appeared in TV plays such as *The Knights of the Golden Glove* (*Az aranykesztyű lovagjai*); *The Governor* (*A kormányzó*) and *Wedding Anniversary* (*Házassági évforduló*). He was granted the titles of Merited Artist (1956) and Outstanding Artist (1972). – B: 0883, 1091, 1445, T: 7103.

**Greksa, Kázmér** (Casimir) (Pécs, 23 December 1864 - Budapest, 13 November 1921) – Writer, literary historian. He was educated in Zirc and Budapest. From 1886, he taught at various denominational schools. He entered the literary scene with poetry, novels and translations of poems. Among his works is *Zrínyi's Poetry in Relation to Tasso, Virgil, Homer and Istvánffy* (*A Zrínyiász és viszonya Tasso-, Vergilius-, Homeros-, és Istvánffyhoz*) (1889-1890). In it he compares the *Zrínyiász* to the writings of Tasso, Virgil, Homer and Istvánffy; also to those of Ariosto, Voltaire, Klopstock, Milton and Apollonius. He wrote a biography of Pope Leo XIII, and published the Hungarian translation of his poetry. Greksa made translations from French and Latin and wrote on esthetics, linguistics and also produced historical discourses on literature. He published old Hungarian and classical prayers and church hymns under the title, *Cantate*, based on original codices and source-material. He compiled a Hungarian language instruction book in Croatian. In 1903 he was professor in Zagreb. – B: 1078, 1257, T: 7617.

**Grenadier** – Beginning with the mid 16th century, it was the name of those soldiers who, as defenders of fortresses, threw at the attackers cast iron balls with explosives. A Grenadier carried in his leather pouch four to five such explosive grenades. On the leather strap of the pouch there was a glowing fuse to activate the fuse of the grenade itself, which required 30-40 seconds to explode. In the Austro-Hungarian Imperial Army, until 1860, every battalion had its own Grenadier Company. The Grenadiers in almost every army wore distinguishing headgear. In the Hungarian Army, that headgear was made out of bearskin. – B: 1078, 1020, T: 3233.

**Grendel, Lajos** (Louis) (Léva, now Levice, Slovakia, 6 April 1948 - ) – Writer. He went to school in Léva. From 1966 to 1967, he studied Mathematics and Physics at the Faculty of Sciences of the University of Bratislava and, from 1968 to 1973 he studied Hungarian and English Literature at the same University and obtained a Teacher's Degree. Between 1973 and 1987, he was an editor for the Madách Publishers, and was its Editor-in-Chief between 1988 and 1990. He became Editor-in-Chief of the *Literary Review* (*Irodalmi Szemle*) as well in 1990. From 1997, he worked at the Kaligram Publishers, first as Editor-in-Chief, later as Manager. From 1997 he has been an adjunct professor at the Hungarian Language and Literary Department of the Comenius University; he also lectures at the Charles University, Prague. In 1986, Grendel became a member of the Slovakian Writers' Association. His works include short stories, novels, essays, critiques, studies, and articles in a number of papers and magazines, such as the *Adult Education* (*Népművelés*); the *Literary Review*; the *Madách Calendar* (*Madách Naptár*); the *Woman* (*Nő*), etc. His books include *The Unfaithful* (*Hűtlenek*) short story (1979); *Sharp-Shooting* (*Éleslövészet*) novel (1981); *Transpositions* (*Áttételek*) novel (1985); *Breakups* (*Szakítások*) novel (1989); *Bells of Einstein* (*Einstein harangjai*) novel (1993); *And His Kingdom Comes* (*És eljön az ő országa*) novel (1996), and *King Matthias in New Hont* (*Mátyás Király New Hontban*) novel (2005). His books have appeared in Slovak, French, German, Polish and Italian translations. He is an outstanding member of contemporary Hungarian literature. He received a number of prizes, among them: the Prize of the Hungarian Writers' Association (1987), the Tibor Déry Prize (1988), the Attila József Prize (1990), the Imre Madách Prize (1990, 1997), the Milán Füst Prize (1995), the Endre Ady Prize (1997), the Kossuth Prize (1999), the Pribina Cross, Class I (2003), the Posonium Literary Grand Prix (2003), the Kristal Vilenica Prize (2006), the Giuseppe Acerbi Literary Prize (2006) and the Sándor Márai Prize (2007). – B: 1083, 1257, 1551, T: 7456.

**Grétsy, László** (Ladislav) (Budapest, 13 February 1932 - ) – Linguist. His higher studies were at the University of Budapest, where he obtained a Degree in 1954. From 1958, he worked at the Language Science Institute of the Hungarian Academy of Sciences; from 1971 he was Departmental Head. Between 1987 and 1998, he was Professor and Chair of the Hungarian Language Department of the Teacher Training Academy, Budapest. He is a member of a number of related institutions and is involved at various levels of work with the *Hungarian Language Guard* (*Magyar Nyelvőr*) and *Dear Mother Tongue* (*Édes anyanyelvünk*), and other periodicals. He gave many linguistic lectures on Hungarian Radio and Television. His major works include *Mother Tongue Kaleidoscope* (*Anyanyelvi kaleidoszkóp*) (1973); *Linguistic and Mass-communication* (*Nyelvészet és tömegkommunikáció*) (1985); *Let us stop for a word!* (*Álljunk meg egy szóra!*), with I. Vágó (1991), and *Our Language* (*A mi nyelvünk*) (2000). He was a recipient of a number of prizes, among them the Prize of Youth (1988), János Apáczai Csere Prize (1992), and the Pál Bugát Memorial Medal (2001). – B: 0874, 1257, T: 7103.

**Griffin** – Mythological creature, presumably of Eastern origin, as it is already represented on the ancient relics of Persepolis. Griffin-motives also appear on Scythian artifacts. The Greeks portrayed them with leonine bodies and eagle heads and wings. In their culture, the griffin was the symbol of prophetic faculties and perspicacity. The griffin displayed on late Avar belt buckles is the sacred bird of the Sun God Apollo. It is possible that the winged griffin was the emblem of one of the late Avar tribes. On

Medieval church doors, griffins stand guard at the gates of Heaven, triumphing over Evil, represented by monsters. In Medieval times people believed in the existence of the griffin; it even appeared in some contemporary natural history books. It was often used in representative art; but in heraldry it was shown only in profile, its head, plumed neck, wings and the talons on its front legs are from the eagle; the rest of its body is from the lion and is usually portrayed rampant. As both creatures are in close symbolic relation to the Sun, they allude to the double nature of the Sun symbol. Besides being a combination of the most powerful celestial and the most powerful terrestrial animal, it also represents the unification of worldly power, celestial energy, power and wisdom, as well as the union of the divine and the human. On pitcher No.2 of the Nagyszentmiklós Gold Treasure, a griffin is attacking a stag. The griffin of Hungarian folk role is a variant of the same creature; it is known also to the Kazakhs, the Kyrgyz, and the peoples of India and Iran. Both help the hero in the fairy tales by rescuing him from the “other” world. In Hungarian folk tales it is known as a wise, diviner bird, the guardian of the treasure. – B: 1136, 1231, T: 7617.→**Nagyszentmiklós Gold Treasure.**

**Griffin and Tendril Group** (*Griffes-indás*) – The first proto-Hungarian group that supposedly arrived in great numbers in the Carpathian Basin around 670-680 AD. They received their name from the metal decoration on their belt buckles and end pieces. In reality, they were two different groups of people. The ones using the griffins were the Várkonyos from the plains of the Lake Aral region, a natural habitat for birds of prey. The others, using the tendrils, were the Onugors from the thickly forested region of the River Volga (Tanais). Their alliance strongly reinforced the power of the Avars and their territory already covered the area of the Little Hungarian Plain, the Vienna Basin and Transylvania (*Erdély*, now in Romania). – B: 1336, 1020, T: 3240.→**Pre-Hungarians; Avars; László, Gyula.**

**Grosics, Gyula** (Julius) (Dorog, 4 February 1926 - ) – Sportsman, football (soccer)-player, coach, sport organizer. He played as goalkeeper in such football teams as the Dorog AC (1939-1947); Mateosz (1947-1950); Honvéd (1950-1956); Tatabánya Bányász (1956-1963). He was an exceptionally successful goalkeeper, earning the nickname “Black Panther”, and was a member of the National Team 86 times between 1947 and 1962. He was a member of the winning Olympic national football-team in 1952, also the silver medalist national football team at the World Soccer Competition in 1954. He was coach of the Tatabánya team (1963-1964), the SBTC (1964-1965); supervisor in Kuwait (1966-1968); President of the Volán SCV (1969-1986); Department Chair of the Volánturist (1969-1976); since 1991, he has been the Honorary President of Volán FC. He was a Member of Parliament in 1990, 1991 and 1994. He authored *Thus I Saw from the Gate (Igy láttam a kapuból)* (1963); *Goalkeeper Training School (Kapusiskola)*, with J. Albert (1963). Since 1993, he has been a member of the presidium of the Hall of Fame Committee, and honorary citizen of Dorog and Budapest. He was elected the Sport-man of the Year (1952), the Soccer-player of the Year (1959). His other distinctions include the Gold Medal of Hungarian Olympic Committee (1995), the St. Stephen Prize (1997), the Freedom of Hungary Prize (2008), the Prima Primissima Prize (2009), and he was elected the Sport-man of the Nation (2011). The Catholic Soccer Academy and a Sport High School of Buda bear his name. – B: 0974, 1031,T: 7103.→**Golden Team, The; Bozsik, József; Budai, László; Buzánszky, Jenő; Czibor, Zoltán; Hidegkúti, Nándor; Kocsis, Sándor; Lantos, Mihály; Lóránt, Gyula; Puskás, Ferenc; Zakariás, József;**

### Match of the Century.

**Gross, Arnold** (Torda, now Turda, Romania, 25 November 1929 - ) – Painter, graphic artist. He escaped from Romania in 1947 and settled in Budapest. He attended the Academy of Fine Arts, Budapest (1953), where his masters were Gyula (Julius) Hincz, György (George) Kádár, György Konecsni and Károly (Charles) Koffán. He started his career as a painter; but soon became a renowned copperplate engraver. In the 1950s he shaped his unique style, characterized by clear content and form with superb technique. He virtually revived the art of copper engraving. He exhibited in Rome, Trieste, Tokyo, Amsterdam, Stockholm, Cologne, Hamburg, London, Los Angeles and Athens. One of his large compositions, the *Artists' Garden (Művészek kertje)* can be seen at the former Hotel Duna Intercontinental, Budapest; and at the Buda Penta Hotel, the *Suburban Dream (Külvárosi álom)* is displayed. His published works are *Copper Engravings (Rézkarcok)* (1973); *Poems and Pictures (Versek és képek)* with Anna Adamis (1979), and *Memorial Book of Arnold Gross (Gross Arnold emlékkönyve)* (1985). He was recipient of a number of prizes, including the First Prize of the Krakow Graphite Biennale (1966, 1968), the Munkácsy Mihály Prize (1955, 1967), the title of Merited Artist (1987), the MSZOSZ (National Council of Hungarian Artists) Prize (1993) and the Kossuth Prize (1995). – B: 0874,1654, T: 7617, 7103.→**Konecsni, György.**

**Grossmann, Gusztáv József** (Gustavus Joseph) (Budapest, 10 August 1878 - Budapest, 17 January 1957) – Mechanical engineer, inventor. He studied at the Budapest Polytechnic and received a diploma from the Zürich Polytechnic in 1900. The Siemens-Halske Co. in Berlin employed him in 1911 in the fields of X-ray physics and X-ray technology. After lengthy experimentations, the Company produced the world's first 200 kW deep-therapy instrument that became the standard instrument of deep therapy. He was the director of the Siemens-Reininger-Veifa Co. between 1925 and 1931. During this time, he made a pioneering contribution to the development of an X-ray machine with a ventilator tube. After 1932 he left the industry and concentrated on his scientific work. His achievement was the tomograph and the development of the theoretical and practical tomography that was adopted all over the world. He returned to Hungary in 1942 and, from 1951, he was Section Head of the Scientific Association of Communication Techniques. From 1954, he worked in the National Institute of Oncology. As an X-Ray physicist, he was a significant pioneer of X-Ray technology. He contributed to the development of the science and technology of roentgenology in Hungary. – B: 0883, 1226, T: 7662.

**Grossmann, Marcel** (Budapest, 9 April 1878 - Zürich, Switzerland, 7 September 1936) – Mathematician. He attended school in Basel, then studied Mathematics at the Zürich Polytechnic and earned his doctorate in 1912. He became a schoolteacher in Frauenfeld, Switzerland in 1901, and taught in Basel in 1905. He became Professor of Descriptive Geometry at the *Eidgenössische Technische Hochschule* in Zürich in 1907. He was Albert Einstein's classmate. When Einstein sought to formulate mathematically his ideas on the General Theory of Relativity he turned to Grossmann for assistance. Grossmann introduced Einstein to differential calculus. The collaboration between Einstein and Grossmann is well documented and resulted in the General Theory of Relativity. Grossmann discovered the significance of the tensor calculus of Christoffel, Ricci-Curbastro and Levi-Civita to relativity. – B: 1278, 1281, T: 7103.

**Grósz, József** (Joseph) (Féltorony, now Halbturn, Burgenland, Austria, 9 December 1887 - Kalocsa, 3 October 1961) – Archbishop. He studied in the high school of the Benedictines at Győr from 1899-1907. He studied Theology at the Pazmaneum in Vienna. He was ordained in 1910, was Parish Priest in Oroszlány; then gradually received higher ecclesiastical positions. He was consecrated Bishop for the Diocese of Győr in 1928. He became Archbishop of Kalocsa in 1943. In 1945, he was President of the Bishops' Bench. After the arrest of Cardinal Mindszenty, he was asked, but was not required to resign. He signed the agreement between the Church and State in 1950. He was arrested nevertheless, indicted on fabricated accusations and sentenced to a 15-year prison term in 1951 that was changed to house arrest. On 12 May 1956, he received amnesty and was allowed to return to his position. He has established eight parishes, was President of the *Opus Pacis*, and member of the Presidium of the Patriotic People's Front. – B: 0945, 0883, T: 7103.→**Grósz Trial; Mindszenty József; Opus Pacis; Patriotic People's Front.**

**Grósz, Károly** (Charles) (Miskolc, 1 August 1930 - Gödöllő, 7 January 1996) – Politician. Following in his father's footsteps, he worked at the Machine Factory of Diósgyőr, then apprenticed at the Borsod Press in 1945, and became a member of the Hungarian Communist Party. In 1958, he was Secretary for County Borsod of the Hungarian Youth National Alliance and moved to Budapest. He was conscripted in 1950, graduated from the officer's training school and served in Kaposvár and Marcali. In 1954, he was demobilized and worked at the County Borsod's Party Headquarters. As a consequence of his activities during October 1956, he was removed from the County Borsod's Party leadership. In 1958, he edited the journal, *Northern Hungary (Észak Magyarorszag)*. He graduated from the Party's Academy in 1961, and filled various party positions later. From 1979, he was the Party's first secretary in County Borsod. Between 1980 and 1989, he served as a member of the Central Committee of the *Hungarian Socialist Worker's Party (Magyar Szocialista Munkáspárt – MSZMP)*. He was Prime Minister between 1987 and 1988, and initiated economic reforms that led to his Party's collapse. Despite his loyalty to his party, his program of austerity steered the Government away from Communism, prompting more radical politicians to replace him. This process finally led to the change of the political system in Hungary in 1989. – B: 1066, T: 7103.

**Grósz Trial** – On 18 May 1951, the Archbishop of Kalocsa József (Joseph) Grósz, was arrested, along with a number of others and put on a show trial, similar to the show trial of Cardinal József (Joseph) Mindszenty two years earlier. They were falsely accused of 'anti-state, anti-people criminal activity' and support of such activities, even 'armed conspiracy'. Archbishop Grósz was sentenced to 15 years' imprisonment and eight of his co-defendants received between 8 and 13 years; others were tortured and died in prison, some were executed. With this trial, the Communist regime successfully intimidated the hierarchy and members of the Catholic Church and, with it, the Church's limited independence came to an end: an agent of the State Office for Religious Affairs was placed in every diocesan office. The regime introduced censorship to all religious publications and even the sermons were prescribed for the clergy. Prior to the Revolution of 1956, the condemned were conditionally released. – B: 1230, 1315, T: 7103.→**Grósz, József; Mindszenty Trial.**

**Grouped Courtyard** – A building arrangement, where the main building and the

outbuildings form a common courtyard scattered on a plot of land. This form of arrangement can be found mainly on the Great Plain (*Nagy Alföld*). – B: 1134, T: 3240.

**Grove, Andrew S.** (András Gróf) (Budapest, 2 September 1936 - ) – Business man. He graduated from the Madách High School, Budapest and studied Chemistry at the Budapest Polytechnic. Because of his involvement in the 1956 Revolution, he had to leave Hungary and ended up in the USA. He graduated from the City College of New York in 1960 with a Bachelor of Chemical Engineering Degree and received his Ph.D. from the University of California, Berkeley, in 1963. Upon graduation he joined the Research and Development Laboratory of Fairchild Semiconductor and became Assistant Director of Research and Development in 1967. In July 1968, he participated in founding Intel Corporation. In 1979, he was named President, and in 1987 became its Chief Executive Officer. In May 1997, he was named Chairman and CEO; but in May 1998, he relinquished his CEO title. He stepped down as Chairman in May 2005, but remains Senior Advisor. Time Magazine named him 'Man of the Year' in 1998. He has written over 40 technical papers and holds several patents on semiconductor devices and technology. For six years he taught a graduate course in semiconductor device physics at the University of California, Berkeley. He is currently a lecturer at the Stanford University Graduate School of Business, teaching a course on Strategy and Action in the Information Processing Industry. He authored books, such as *Physics and Technology of Semiconductor Devices* (1967), used at many universities in the USA, *High Output Management* (1983, 1985), translated into 11 languages, *One-on-One With Andy Grove* (1987, 1989), *Only the Paranoid Survives* (1996) and *Swimming Across* (2001). He wrote articles in *Fortune*, the *Wall Street Journal* and the *New York Times*; he has written a weekly column on management carried by several newspapers, and a column on management for *Working Woman* Magazine. He is a member of many professional societies: fellow of the IEEE and a member of the National Academy of Engineering. He received many honorary academic degrees, including an Honorary Doctorate of Science from the City College of New York (1985), an Honorary Doctorate of Engineering from Worcester Polytechnic (1989) and an Honorary Doctorate of Law Degree from Harvard University (2000). He received 30 awards, including the IEEE Engineering Leadership Recognition award (1987) and the AEA Medal of Achievement award (1993). In 1997, he received the Technology Leader of the Year award from Industry Week, the CEO of the Year award from CEO Magazine and received the Lifetime Achievement Award from the Strategic Management Society. – B: 1037, 1038, T: 7103.

**Gruber, Vendel S.J.** (Wendelin) (Szentfűlöp, 13 February 1914 -) – Jesuit priest, missionary. He completed his high school studies with the Jesuits of Travinki, Bosnia. He entered the Jesuit Order at Zagreb, Yugoslavia. In 1935, he was in Sarajevo, began his theological studies in 1939, and continued them at the Gregorian University in Rome, Italy, 1941. He was ordained there in 1942; taught religion in a high school, then became the Administrator of the Seminary at Zagreb. In 1945 he was arrested by Yugoslav partisans and kept in detention for months. Once released, he undertook pastoral work among the poor and secretly visited the death camps set up by the Yugoslav partisans for the extermination of German ethnic groups of the Bácska and Bánát regions (in Gádor, Körtés, Molyfalva, Rezsőháza, Szávaszentdemeter, etc). In these concentration camps, some 60 thousand died out of the 200 thousand detainees. By smuggling food and medicine into the camps, he made an effort to let the world know about them. He was

arrested twice but escaped. He was again captured in Sarajevo in 1947, was accused of espionage for the Vatican, and was sentenced to 14 years in prison. At the request of Pope Pius XII, German Chancellor Adenauer intervened on his behalf and finally he was freed. He moved to Germany; but the Vatican sent him to South America to challenge the Communist influence within the Catholic Church. He became a parish priest in Brazil for the Germans, who had emigrated from the regions along the Danube River and founded schools, colleges and hospitals for them. He was in Paraguay at the time he was invited back to Temesvár (now Timișoara, Transylvania in Romania) in 1994. – B: 0945, T: 7103.

**Gruby, Dávid** (Kisbér, 20 August 1810 - Paris, 14 November 1898) – Physician, microbiologist. He started his studies at the Medical School of the University of Pest, and obtained his Medical Degree in Vienna in 1839. He was the first to photograph cells through a microscope. He moved to Paris and discovered the pathogens of fungal skin diseases and oral fungal infections. He was the first to describe these pathogens. He made scientific investigations into the effect of ether and chloroform narcosis. He treated the most famous contemporary artists and writers, among them: Alexandre Dumas, Frederic Chopin, Honoré de Balzac, Heinrich Heine, Victor Hugo, Franz Liszt, Mihály (Michael) Munkácsy and Mihály Zichy. During the War of Independence (1848-1849) he returned to Hungary, fought in the army of General József (Joseph) Bem and was wounded. He returned to Paris and, in 1859, he was the first to use cotton wool in medical practice. He established an observatory on Montmartre. He supported social welfare institutions and endowed foundations. Gruby also fed lunch to 200 people every day. He died a poor man, after spending all his wealth on science and charity. He was honored with the Grand Cross of the *L'égion d'honneur* of France. – B: 0883, 1126, T: 7660. → **Bem, József**.

**Guardsmen, Hungarian Nobility's** – A troop of guardsmen, composed of the nobility. Empress Mária Theresa (1740-1780) established the Nobility's Guardsmen on 11 September 1760, as a required measure of fidelity of the Hungarian nation toward the House of Habsburg in the Seven Years' War. The first 120 guardsmen took their oath on 28 September 1760; the Captain of the guardsmen at their formation was Count Lipót (Leopold) Pálffy. In 1764, the Estates of the Empire offered 100 thousand *forints* annually for the corps of 120 young nobles; while, in addition, Transylvania offered 20,000 *forints* annually for the provision of 20 guardsmen. The Captain of the Guardsmen was always a member of the General Staff of the Army who, in 1765, was admitted to the knight baronets of Hungary. The Guardsmen received excellent training. In addition to the knowledge of all branches of military service, their syllabus included mathematics, physics, literature, German and French languages, administration of official business, jurisprudence, drawing, dancing, history of art, etiquette, horsemanship and fencing. After generally five years of service, they joined the regular army; from there it was possible to return to the guardsmen's service. It was basically an officer's institution as guardsmen: every member started as a second lieutenant; the guardsman-sergeant was in reality a major and the guardsman captain in fact a general. They all wore a magnificent red uniform, yellow boots, a leopard-skin shoulder piece, fur cap with flap, and a sash woven together with silver thread and green silk; they also wore a saber on the hip. The young noblemen lived for years in the imperial capital with its atmosphere of advanced culture. This exerted strong influence on the just developing modern Hungarian culture; in fact, almost all the initiators and developers of the more up-to-date Hungarian

literature were members of the Guard, such as Ábrahám Barcsay, György (George) Bessenyei and Károly (Charles) Kisfaludy. Emperor and King Joseph II (1780-1790) cut the staff numbers by half and decreed that every county of the realm might send only one young noble. He also decreed that the young guardsmen should converse among themselves only in German. Later on, Leopold II (1747-1792), Holy Roman Emperor and King of Bohemia and Hungary (1790-1792), impelled by the political situation, restored the full original staff number of the Hungarian guardsmen in 1790 and, at the same time, expected from them the presentation of their patent of nobility (*armalis*) and familiarity with the Hungarian language. It was also Leopold II, who established the Palatine's guardsmen of 15 Hungarian men, stationed at Buda. King Francis I (1792-1835) in 1792 further increased the guardsmen's numbers to 120; their pomp and splendor reached its highest level during his reign. In the 1840s, the guardsmen's literary activities again started to thrive. However, on 11 September 1848, the guardsmen resigned *en masse* and, as officers, joined in large numbers the Hungarian Army, independent of the Habsburg Austrians. Hence, the guardsmen as an institution were disbanded with an imperial decree in 1850. The famous generals, Artur Görgey and György (George) Klapka, were guardsmen between 1837 and 1842; but did not return to Court service. Between 1867 (the year of the Compromise with the Habsburgs) and 1918, the one-time guardsmen were serving as *Königliche-Ungarische Leibgarde* in Vienna and as *Ungarische Trabantengarde* in Budapest. These were militarily organized units but did not belong to the army; the former had 2 generals and 39 officers; the latter 1 general, 3 officers and 34 guardsmen in 1913. – B: 1078, 1230, 1020, T: 7456.→**Mária Terézia, Empress and Queen; Bessenyei, György; Kisfaludy, Károly; József II (Joseph), King; Görgey, Artur; Klapka, György.**

**Guardsmen, Royal Hungarian** – A military unit serving as security guards for the Regent of Hungary, as reorganized on 10 October 1920 (1) from the general staff company of the high command; (2) from the earlier *Drabant* guardsmen (*Trabantengarde*); and (3) from the Viennese force that remained in Gödöllő. At the unit's formation it consisted of 276 men; this number was soon reduced to 5 officers and 120 guardsmen (infantry section), and 2 officers and 20 guardsmen (cavalry section). The first Commander of the Guardsmen was György (George) Görgey. In 1940, after the return of the northern part of Transylvania to Hungary, a Szekler guardsman company was established; in 1943-1944 a riflemen guardsman battalion was formed. Their wardrobe consisted of several attires: Court gala, Court service, marching, large society, small society and weekday. The uniform was of Hungarian character with braid, Zrinyi helmet or Bocskai cap. On 15 October 1944, the complete staff numbered 470 men. On that morning they gave armed resistance against the Germans on Eskü Plaza in the Buda Castle Hill area, in defense of Miklós (Nicholas) Horthy Jr, the Regent's son. During the night of 16 October, keeping their oath, they fought a gun-battle against the occupying German forces, defending the Royal Castle, where the Regent lived. Four guardsmen were killed in action. Their defense was crushed and the Royal Hungarian Guardsmen as an institution ceased to exist. The last Commander of the Guardsmen was Lieutenant General Károly (Charles) Lázár. – B: 1078, 1230, 1020, T: 7456.→**Horthy, Miklós.**

**Guary Codex** – A manuscript, containing Hungarian meditations and teachings, compiled at the Marian Franciscan monastery of Óbuda in 1483. This is a very valued Hungarian language relic. It used to belong to Miklós (Nicholas) Guary, hence the name.

The 67-leaf Codex was compiled for the use of the nuns of Óbuda. Now it is in the collection of the Library of the Hungarian Academy of Sciences. – B: 0942, 1150, 1230, T: 7617.→**Codex Literature.**

**Guba** – A Hungarian peasant's long, sleeveless outer coat, made of sheepskin. It is shorter than the *suba*, the wide sheepskin-coat. The fur is worn on the outside, hence it is never ornamented. It is similar to the *burka*, worn by people of the Caucasus Mountain's northern regions. In Hungary, it was a popular garment, mostly among the inhabitants of the Szamos and Upper Tisza Rivers area. Its role was to leave the arms free, while guarding the soldiers' bows and arrows against the rain, also to shield him from the arrows. – B: 1322, 1020, T: 3240.

**Gubányi, Károly** (Charles) (Jobbágyi, 9 September 1867 - Pilis, 13 January 1950) – Engineer and world traveler. He studied at the Budapest Polytechnic and earned his Degree in 1890. After a few years in railroad construction, he went to Manchuria with Antal (Anthony) Szentgáli. He took part in the Manchurian railroad construction, especially of its tunnels. Next he accepted a job at the construction of the port of Vladivostok. He returned home when the Japanese-Russian War broke out. In 1906, he moved to Australia and lived on his plantation. He returned to Hungary in 1913, and started an experimental farm in Pilis. He published several travel-related accounts and economic policy papers. – B: 0883, 1090, T: 7680.

**Gubernatorial Office** – A governing office established by Emperor Leopold I of Austria (1654-1705), after extending his rule over Transylvania (*Erdély*, now in Romania). This was the governing body of the Principality of Erdély (Transylvania) between 1690 and 1867. It was headed by an appointed governor who carried out Austrian rule. The office was located in Gyulafehérvár (now Alba-Iulia, Romania). After the middle of the 18th century it was transferred to Nagyszeben (now Sibiu, Romania). – B: 1153, 1231, T: 7103.

**Gulácsy, Irén** (Irene) (Mrs. Pálffy) (Lázárföldpuszta, 9 September 1894 - Budapest 2 January 1945) – Writer. At first she lived in the Szeged area, then in the Hanság region. She later moved to Nagyvárad (now Oradea, Romania) and became an associate editor of the newspaper, *Nagyvárad*. In 1928 she settled in Hungary. Her first novel, *Tempest (Förgeteg)*, dealt with the problems of the agrarian reform. Her second novel, *Sun Offering (Napáldozat)*, a peasant drama, won first prize. After the success of the *Black Grooms (Fekete vőlegények)*, a stirring novel about the battle of Mohács in 1526, she devoted her writing almost exclusively to historical themes e.g. *King Louis the Great, vols. I, II, III (Nagy Lajos király, I,II,III)*. She died at the end of World War II, during the Soviet Army's siege of Budapest in 1945. – B: 0883, 1257, T: 7617.→**Budapest, Siege of.**

**Gulácsy, Lajos (1)** (Louis) (Budapest, 12 October 1882 - Budapest, 21 February 1932) – Painter. He studied at the Art School of Budapest. He was an autodidactic painter. In 1902 he was on a study tour in Rome, Florence and Paris; afterwards he frequently visited Italy and made a number of paintings of Medieval and Renaissance towns. His first exhibit was held in Budapest in 1907. Then he exhibited in Nagyvárad (now Oradea, Romania), in Temesvár (now Timisoara, Romania), in 1911, and in Szeged in 1912. He was in Venice, Italy when World War I broke out; he suffered a nervous breakdown and, from 1917 on, he spent much of his time in sanatoriums; in 1922 he became blind. His

paintings have dream-like characters, depicted in light colors. His artistry is close to surrealism. Some of his major paintings are: *Madman and the Soldier (A bolond és a katona)* (1909-1911); *Dante's Meeting with Beatrice (Dante találkozása Beatrice-vel)* (1907); *Self-Portrait (Önarckép)* (1903); *Old Garden (Régi kert)* (1913); *Transcience* (1912); *Der Rosenkavalier (The Knight of the Rose – Rózsalovag)* (1914); *Young Woman with Rose Tree (Fiatal nő rózsafával)* (1910-1912), and *Golgotha* (1912). He received the Jubilee Prize of Franz Josef (1908). – B 0974, 1257, T: 7103.

**Gulácsy, Lajos (2)** (Louis) (Tivadarfa, now in Ukraine, 8 January 1925 - ) – Bishop of the Reformed Church in Carpatho-Ukraine. After completing his high school studies, he worked as a clerk in Budapest. He registered as a student of Theology at the University of Debrecen, but could not begin his studies because of the border closure between Hungary and Carpatho-Ukraine. Nevertheless, he returned to Hungary and started theological studies privately, with the help of the Reformed Church. In 1949, he was arrested with six of his friends and accused of anti-Soviet propaganda, being a hindrance to science, and misleading the youth. He was sentenced to 10 years in an educational labor camp in Kazakhstan, to the mines of Dzekazgani and Kingiri. He was released in 1956; was able to resume his theological studies only in 1978. He was dean of the Reformed Church District of Bereg (1987), also auxiliary bishop from 1991, and Bishop of the Reformed Church in Sub-Carpathian Ukraine (*Kárpátaljai Református Egyház*) (1994-1998). His works are *Separate History of the Reformed Church in Sub-Carpathia (A Kárpátaljai Református Egyház külön története)*, in *We Believed in You from the Beginning (Tebenned biztunk eleitől fogva)* ed. J. Barcza (1990); *The Present Life of the Hungarian Reformed Church in Sub-Carpathia (A Kárpátaljai Református Egyház jelene)* in *Extra Hungariam* (1992), and a number of articles. His biographical book is entitled: *From the Deep to the High (Mélyből a magasba)*. – B: 0910, T: 7103. → **Reformed Church in Carpatho-Ukraine.**

**Gulyás** – (1) Cattle herdsman. The cow-keepers are sometimes called milkers. (2) The well-known meal, more like a stew, cooked by the herdsmen. It is made of beef. The meat is cut into small pieces then, together with onion, salt, hot paprika and caraway seeds, sometimes with tomatoes, it is cooked until the meat is tender. Then quartered potatoes are added, followed by small pasta dumplings. Instead of beef, it can be made of pork or mixed meat, the latter one is the tastiest. The so-called *Székely (Szekler) gulyás* was named from its first makers and is made with sour cream and cabbages instead of potatoes. – B: 1078, 1020, T: 3240.

**Gulyás, Balázs** (Blaise) (Budapest, 26 June 1956 - ) – Physician, neuroscientist. His secondary education was at Pannonhalma (1970-1974); he studied Medicine at the Medical School (1975-1981) and Physics at the University of Budapest (1976-1981). After he moved to England, he studied at Cambridge University in 1981, continued his studies at the Higher Institute of Philosophy of the Catholic University of Leuven (1981-1984), then studied Canon Law and Law at the Law School (1984-1988) and Neuroscience at the Medical School of the same University (1983-1988). His post-graduate studies were at the Department of Clinical Neuroscience, Karolinska Institute, Karolinska Hospital, Stockholm, Sweden, and the University of Oxford, Department of Experimental Psychology, Oxford, United Kingdom. His Degrees are: MD (1981), BA and MA in Philosophy (1982, 1984), and PhD in Neuroscience (1988); “Habilitation” in

Medicine (Leuven 1988, Stockholm 1997, Debrecen 1999). His present position, since 1988, is Unit Research Leader at the Department of Neuroscience, Karolinska Institute, Stockholm, and at the Department of Clinical Neuroscience, Psychiatry Clinic at the same Institute since 1998. His publications include *Emergent Evolutionism and the Brain-Mind Problem* (1984); *The Brain-Mind Problem* (ed.) (1987); *Relative Motion Sensitivity in the Visual System of Cats and Monkeys* (1988), and *Functional Organization of Human Visual Cortical Areas*. In Peters, A. and Jones, E. G. (eds.): *Cerebral Cortex. vol. 12*, (1997); *Neural Networks for Internal Reading and Visual Imagery of Reading: A PET study*, in *Brain Research Bulletin* 53 (2001): 319-328. He is an external member of the Hungarian Academy of Sciences since 1995, and a recipient of the Marie Curie Award (2001) and the János Arany Prize (2005). – B: 1135, T: 7103.

**Gulyás, Lajos** (Louis) (Kisfalú, 4 February 1918 - Győr, 31 December 1957) – Minister of the Reformed Church, martyr. He completed High School in Érsekújvár (now Nové Zámky, Slovakia), studied Theology in Losonc (now Lucenec, Slovakia) (1937-1939), then in Pápa (1939-1942). He was Assistant Minister in Deáki, Felsőgellér and Balatonszepezd, and Parish Minister in Levél (1949-1957). He was involved in the political life as well. He became a committee member of the Smallholders' Party. At Mosonmagyaróvár on 26 October 1956, during the Revolution, there was a volley, fired by the security forces of the State Defense Office (*Államvédelmi Hivatal – ÁVH*) into a gathering of citizens, resulting in many fatalities. Rev. Gulyás rescued a security officer from the hand of upset civilians about to lynch him. In spite of this act, the minister was arrested later, indicted for grave anti-state activities and sentenced to death by hanging. He was buried in an unmarked grave; he was reburied in 1990, and was fully rehabilitated by his Church. – B: 0910, T: 7103.

**Gundel, Károly** (Charles) (Budapest, 23 September 1883 - Budapest 28 November 1956) – Restaurateur and writer. After completing his studies at the Commerce School, he learned his trade in the most famous restaurants of Switzerland, Germany, England and France. From 1906, the Csorbató and Tátralomnic premises of the International Wagon-Lit Company employed him as hotel secretary and later manager. In 1910, he entered the Wampetich Restaurant in Budapest, next, he rented the restaurants of the Royal and Gellért Hotels. His publications on gastronomy belong to the best works on the subject. His published works in foreign languages, cooking exhibitions and demonstrations made Hungarian cuisine popular and promoted foreign tourism. He was a leading personality of the restaurant and hotel industry. A restaurant and a high school in Budapest bear his name. – B: 0833, T: 1105, 7680.

**Guyon, Count Richard** (Bath, England 31 March 1813 – Harem Iskelesi, Istanbul, Turkey, 12 October 1856) – Military officer of the Hungarian National Defense Forces during the War of Independence (1848-1849). He was a descendant of a noble Scottish family. In 1834 he served as an officer in the Austrian Imperial Army. He retired from the Army and settled on his estate in County Bars in Hungary, acquired through marriage. In the summer of 1848, he joined the Hungarian Defense Guards and, as a commander of a contingent, he fought against the invading forces of Palatine Jellačić. He distinguished himself at the Battles of Pákozd and Schwechat with his daring attacks. Lajos (Louis) Kossuth promoted him to colonel on 31 October 1848. He led the expeditionary forces against Simulich, and during the retreat of the provoked battle, he counter-attacked the

Imperial Forces. In the winter campaign of 1849, he was the hero of the Battle of Branyiszko. It was a decisive victory, securing the unity of the Hungarian forces. He played a decisive role in breaking the siege of Komárom, and in the reinforcement of the fort. Kossuth promoted him to general and appointed him Commander of Fort Komárom. Görgey, the Commander-in-Chief of the Army, removed him from that post for political reasons. He won the last victory of the war with Hungarian forces at Nagyhegyes. He participated in the Battle of Temesvár (now Timișoara, Romania) as Chief of Staff of General Bem. After the defeat, he cut himself through the enemy line to the Turkish border and emigrated to Turkey. He reached the rank of Brigadier-General in the Turkish Army. In the Crimean war he was the commander of the Turkish army in Asia. Due to court intrigues, he was removed from command and poisoned. – B: 1230, 1020, T: 3233.→**Freedom Fight of 1848-1849; Kossuth, Lajos; Görgey, Artur.**

**Guzmics, Izidor László** (Isidor Ladislas) (Jánosfa, 7 April 1786 - Bakonybél, 10 September 1839) – Abbot, poet, linguist, translator of literary works. He attended High School in Alsólendva, Kőszeg, Szombathely and Sopron. He entered the Benedictine Order in 1805, and studied Theology at Pannonhalma, Győr and Pest. He became acquainted with the works of La Fontaine and Herder, as well as Hungarian literature, and became one of the founders of the Hungarian Society (*Magyar Társaság*). He taught mostly in Pannonhalma. From 1832 until his death he was the Abbot of Bakonybél, where he edited the journal, *Church Storehouse (Egyházi Tár)*. At Zirc he published linguistic and theological essays, such as *Religion, Faith (Vallás, Hit); New Views on the Holy Scripture (Szentírás iránti újabb nézetek); Mattheus, the Hun Prince (Matheus, a hun fejedelem)* (1814), and *Remnants of Theokritos (Theokritosz maradványai)* (1825). He wrote poems, epigrams and short stories and translated Greek dramas. He was a linguist and a corresponding member of the Hungarian Academy of Sciences. – B: 0932, 1031, 1257, T: 7103.

**Gvadányi, Count József** (Joseph) (Rudabánya, 16 October 1725 - Szakolca, now Skalica, Slovakia, 21 December 1801) – Military officer, writer, and descendant of an Italian military family. He attended school in Eger; later studied Philosophy at the University of Nagyszombat (now Trnava, Slovakia). From 1743, he served in the military for 40 years. He took part in the War of Succession and the Seven Years War; also in Count András (Andrew) Hadik's famous "hussar-feat" of exacting ransom from the city of Berlin. Gvadányi also excelled with his courage. From 1763, he was stationed for a time in the Upper Tisza region of Hungary, where he visited the town of Peleske regularly. He later used his Peleske acquaintances as models for the characters of *The Notary of Peleske (Peleskei Nótárius)* and *Spoiler Paul (Rontó Pál)*. He retired in 1783, settled in Szakolca, took up farming, and published narrative poems, written in populist style. He gave excellent descriptions of Hungarian folk-dances and, in many of his writings, poked fun at the affectations of foreign manners by the nobles. He became especially popular with the description of the village notary's travels to Buda, and the stories about Pál Rontó. His statue was unveiled in his hometown of Rudabánya in 1925, on the bicentenary of his birth. A Street in Rudabánya bears his name. – B: 1197, 107, 0883, T: 7617.→**Hadik, Count András.**

**Gyallay, Domokos** (Dominic) (family name: Gyallay-Pap) (Bencéd, now Bențid, Romania, 4 August 1880 - Budapest, 11 April 1970) – Writer. He qualified as a teacher at

the University of Kolozsvár (now Cluj-Napoca, Romania). After some years' of teaching he fought in World War I. From 1921, he was a journalist in Kolozsvár; then returned to teaching. He was Editor of the illustrated weekly, *Hungarian People (Magyar Nép)*. He published more than fifty books in the series of the *Library of the Magyar Nation (Magyar Nép Könyvtára)*. He was Editor of the literary magazine, *Herdsman's Campfire (Pásztortűz)* (1924-1930). His volumes of short stories appeared from 1921. He edited the journal, *Better Future (Szébb Jövő)* (1941-1944). He lived in Budapest after World War II. Some of his works are *On Iron Bread (Vaskenyéren)* novel (1926); *In the Shadow of the Great Fire (A nagy tűz árnyékában)* novel (1928); *Beckoning Mountains (Hívó hegyek)* novel (1940), and *Transylvanian Legends (Erdélyi legendák)*, stories (1968). He was a member of the Kisfaludy and the Petőfi Societies and was awarded the Corvin Wreath (1941). – B: 0883, T: 7103. → **Izsák, Domokos.**

**Gyallay Pap, Domokos** (Dominic) (Dés, now Dej, Romania, 1919 - Toronto, Canada, 15 May 1995) – Lawyer, diplomat, historian. He completed his high school studies at the Unitarian High School, Kolozsvár (now Cluj-Napoca, Romania), then read Law at the local Romanian University for three years. The fourth year he completed at the University of Kolozsvár (now Cluj-Napoca, returned to Hungary in 1940, then ceded again to Romania after World War II), where he earned his doctoral degree in Law. With a state scholarship, he spent one year at the *Staatsarchiv*, Vienna. In 1943, he worked at the Ministry of Foreign Affairs, Budapest, and passed the diplomat's examination. He worked at the Hungarian Embassy in Bucharest, Romania until 1949. He left Hungary and ended up in Canada in 1949. He published numerous articles and studies. – B: 1037, 1257, T: 7103.

**Gyalu** (Gyelo) – Ruler of the *Bulaks* in Transylvania (*Erdély*, now in Romania) during the Magyar settlement in the Carpathian Basin, led by Prince Árpád (895). According to the chronicler Anonymus, the Hungarian chieftain, Tétény, went to Transylvania (*Erdély*) and defeated Gyalu's forces in a battle near the towns of Rákos and Hidalmás. Gyalu himself fell in the battle and his people swore allegiance to Tétény. – B: 1078, T: 7103. → **Árpád; Anonymus.**

**Gyalui Asztalos, János** (John) (17th century) – Painter and cabinetmaker from Transylvania (*Erdély*, now in Romania). Some of his works have survived the centuries, for example, the ceiling of the Reformed Church in Magyarbikal (now Bicalatu, Romania), the ceiling in Ketesd (now Tetisu, Romania) (1692), the balcony-gallery at Visa (now Visea, Romania) (1699), and part of the gallery-balcony of Kőrösfő (now Izvoru Crisului, Romania). He used few motives, but applied tasteful patterns in his works. – B: 1185, T: 7653.

**Gyárfás, Ágnes** (Miskolc, 7 September, 1932 - ) – Historian of Philosophy. Her secondary studies were at the Reformed Girls' High-School of Miskolc. She earned a Degree in Hungarian Language and Literature, Librarianship, later also Esthetics from the University of Budapest, and she obtained a Ph.D. in 1970. Until 1990, she was Head of the Central Medical Library of Miskolc. From 1989, she and her colleagues began to establish a private university in Miskolc, which succeeded in 1990 under the name of King Louis the Great Private University of the Philosophical Society of Miskolc (*Miskolci Bölcsész Egyesület Nagy Lajos Király Magánegyeteme*). She has been its President and professor. Recently there is a controversy with regard its 'private

tuniversity' status. Earlier on, she was involved with history of the theater and medicine, and also wrote some critiques and organized radio programs. She featured the beginnings of the Hungarian theater with its intrigues, around 1792. In 1986, she published Péter Bárány's manuscript drama *Mátyás Korvinus*, rejected when the first Hungarian theater was opened; she also published Péter Bárány's other work, entitled *The First Hungarian Psychological Work and its History (Az első magyar pszichológiai mű és története)* (1990). Later, she was engaged in the analysis of ballads and fables. During her librarian years she launched and edited the journal, *Medical Review of Borsod (Borsodi Orvosi Szemle)*, and she is editing the cultural magazine, *Ancient Roots (Ősi Gyökér)*, (with articles going back to Sumerian times). She wrote a great number of studies on medical and theater history and philosophy. Her books include *Matthias Corvinus... (Korvinus Mátyás...)* play by Peter Bárány, edited, introduced and published by Ágnes Gyárfás (1986); *Chapters on Hungarian Psychology (Fejezetek a Magyar lélektanból)*, university textbook (1996, 1998, 2002); *Book of Waters vol. I, Life on the Heavenly Waters (Vizek könyve I, Élet az égi vizeken)* (2005), and *Book of Waters, vols. ii, People of the Waters of the Earth (Vizek könyve II, A földi vizek népe)* (2007). – B: 1955, T: 7456, 7103.

**Gyárfás, Miklós** (Nicholas) (Győr, 6 December 1915 - Budapest, 4 October 1992) – Writer, poet, dramaturgist. He was an actor, factory worker, journalist and teacher at the Academy of Dramatic Art, Budapest. In the 1930s, he started out as a poet, but became a writer and a successful playwright instead. His works include *Ladies in the High (Kisasszonyok a magasban)* (1963); *The Genius Lovers (A lángeszű szerelmesek)*; *Escape (Egérút)*, operetta in prose (1965); *The Secret of a Long Life (A hosszú élet titka)* hommage à Chaplin; *Forced Landing (Kényszerleszállás)* (1966); *Events in the Manor House (Történetek a kastélyban)* (1973), and *Dekameron* (1980). His plays were staged in many European countries, in Canada and in Japan as well. He was awarded the Attila József Prize (1954) and the Andor Gábor Prize. 1967). – B: 0932, 1257, T: 7103.

**Gyarmati, Andrea** (Budapest, May 15, 1954 - ) - Olympic swimmer, physician, pediatrician. She is a world champion and established a world record in 100- and 200-meter butterfly and backstroke swimming (1967-1973). At the 1972 Summer Olympic Games in Munich, she won Bronze in the 100-meter butterfly stroke; Silver for the 100-meter backstroke competition. She retired from sport in 1975. Between 1979 and 1983, she was a physician at the Heim Pál Children's Hospital; physician at the Budapest District VII Pediatric Clinic; and since 1992, she has been a pediatric expert on TV programs. – B: 0874, 1031, T: 7617. → **Székely, Éva.**

**Gyarmati, Dezső** (Desider) (Miskolc, 23 October 1927 - ) – Water polo player and coach. His higher studies were at the University of Budapest, where he studied Art History (1952-1956), then coaching at the School of Physical Training, Budapest (1962-1966). He played water polo first at the Gamma Club (1941-1944), then at the Csepel Club (1945-1947) and at the Dózsa Club (1947-1956), Budapest. In 1956, he was the leader of the revolutionary committee of the Hungarian Olympic team. In 1957 he emigrated to the USA. He was a coach in Europe, and later on, he returned to Hungary. He was banned from playing and was a laborer and barman. Between 1960 and 1970, he played at the Ferencváros Gymnastic Club (FTC); was a coach at the Vasas Club (1970-1972, 1988-1989) and the BVSC (1981-1985). He was a member of the National Team 109 times and Olympic champion in 1952, 1956 and 1964, twice silver medalist; member

of the European Champion Team in 1954 and in 1962. He had a successful career in the Hungarian Water Polo Federation; he was its Vice-President and was a Member of Parliament from 1990-1994. He was the star of the Hungarian teams that dominated the international water polo world in the '50s and '60s of the 20th century. He is widely regarded as one of the greatest water polo players of all time. He is Sportman of the Nation – B: 0874, 1178, T: 7103.→**Székely, Éva.**

**Gyarmathy, Tihamér** (Pécs, March 8 1915 - Budapest, 9 January 2005) - Painter, graphic artist. He attended the Academy of Fine Arts in Budapest, where he studied under János (John) Vaszary and László (Leslie) Kandó, then pursued his studies in Italy, Switzerland and France (1937-1939). He had an exhibition in Paris in 1938, and a second one in Zürich. He returned to Hungary in 1945, and founded the *European School*, (*Európai Iskola*) and in 1946, he created the *Hungarian Group of Abstract Artists* (*Elvont Művészek Magyarországi Csoportja*) and the *Art Gallery to the 4 Points of the Compass* (*Galéria a 4 Világtájhoz*) in Budapest. In 1947, under the auspices of the *Realités Nouvelle*, he took part in an exhibition in Paris, and in 1948 in Budapest. In the same year his group broke up and he had to earn his living by manual labor for more than 20 years. In 1963 he was invited to the First International Plaine in Kosalin (Poland). In 1965 he exhibited a 9-meter tall iron statue at the Industrial Biennale in Elblag (Poland). He had exhibitions in Wrocław, Poznań, Gdańsk, Warsaw, Stuttgart, Brussels, Antwerp, Milan, Stockholm, and Bujumbura (Burundi); he had numerous exhibitions in Hungary, including a life-work show at the Budapest Art Gallery. He received the Special Medal at Cagnes-sur-Mer (France); won the Silver Cup of Naples (Italy); he was recipient of the Belgian Grand Prix Foundation's Prize and received the following Hungarian Prizes: Janus Pannonius Prize, the Kossuth Prize (1990) and the Society of Hungarian Creative Artists Prize (1996). – B: 0874, 1031, T: 7617, 7103.→**Vaszary, János.**

**Gyepű** – Name of the strip of land in the western borderland area of Hungary that served as a protection zone against invaders from the West. It was established soon after the Hungarian settlement in the Carpathian Basin in the 9-10th centuries. This was the ancient *Őrvidék*, and it had three defense lines: (1) Felsőőrvidék gyepű (from Borostyánkő to the valley of the River Rába); (2) Alsóőrvidék gyepű (from the old Lug settlement to the River Mura); and (3) Göcsej inner defense line (from Zalalövő). Lake Fertő is a remnant of the ancient wetland that must have acted also as a „gyepű“. After the end of the First World War, this was a disputed territory, where Pál (Paul) Prónay created the State of Lajta-Banat (*Lajta Bánság*) on 4 October 1921; but it was dissolved after a short time. Some of the western parts of the ancient Őrség region have belonged to Austria since 26 November 1921. – B: 1369, 1031, T: 7103.→**Borderland; Pre-Borderland; Prónay, Pál; Lajta-Bánát.**

**Gyergyai, Albert** (Szegő) (Nagybajom, 20 January 1893 - Budapest, 7 July 1981) – Literary historian. He studied at the Eötvös College, University of Budapest, and at Tours, France on an *Ecole Normale Supérieure* scholarship. From 1950 to 1970, he taught French Language at the University of Budapest. He wrote some 15 books, published 50 volumes of translations, and edited 36 anthologies. His significant translations include Flaubert's *Madame Bovary* and *L'Education Sentimentale*, and also Voltaire's *Candide*. He also translated works of La Fontaine, Balzac, Villon, Montaigne and Verhaeren. – B: 0883, 1257, T: 7662.

**Gyergyó**, Transylvania (*Erdély*, now in Romania) – Headwaters area of the River Maros, including the snow-capped Görgény and Gyergyó Mountains and the surrounding Northern Hungary. It became part of Szeklerland in Transylvania (*Erdély*) at the end of the 12th century. Its central settlement is Gyergyószentmiklós (now Gheorgheni, Romania). In the 16th century, Armenians settled in this area, they became completely assimilated with the Transylvanian Hungarians. In the 18th century Romanian agricultural workers were brought in. – B: 0942, T: 7656. →**Szeklers**.

**Gyergyó Alps** (*Gyergyói havasok*) – Part of the Eastern Carpathian Mountain Range, consisting of two parallel-running belts: the western, crystalline, inner belt, made up of schists, phyllites, and an intrusive body of ditroite; and an eastern, outer belt of Lower Cretaceous flysch deposits of limestone and sandstone, are strongly folded onto it. The main ridge acts as the watershed between the valleys of the Golden Bistrița (*Aranyos Beszterce*) River in the east and the Mureș (Maros) River in the west. The mountain range of the Gyergyó Alps is also the source of the Olt River (at 1416 m) and the Maros River (at 1350 m), both rivers dissecting the Transylvanian Basin. This section of the Eastern Carpathians (in the northern part of County Csik) is densely covered by pine and beech forests and the whole range is dissected by deep and narrow valleys, especially the Ditró and Tászok Creeks. Human settlements are very sparse. Three passes connect the Transylvanian Basin with Moldavia across this range: the *Tulghes (Tölgyes) Pass* at 645 m. m a.s.l. the *Bicaz (Békás) Pass* at 665 m a.s.l., and the *Tatár Pass* at 1157 m a.s.l. The highest point is *Nagyhagymás* (1793 m), other high peaks are: the *Közrehavas* (1463 m), the *Oroszbükk* (1286 m) and the *Bükkhavas* (1346 m). The well-known health resort and mineral water place, *Borsec (Borszék)* is about 15 km north of the intrusive ditroite mass. There is brown-coal mining on a small scale in the area. The copper-ore deposit of *Balánbánya (Balan)* is situated in the metamorphic belt (gneisses and mica schists). – B: 7456, T: 7456.

**Gyerőmonostor, Bird Woman** of (now Mirastireni, Transylvania, *Erdély*, now in Romania) – The forefathers of the Gyerőffy, Kabos, Kemény, Mikola and Radó families, all descendants of a common ancestor, built a family church in Gyerőmonostor before the 1241 Mongol invasion. There are three sculptures built into the side of the half-finished church tower. One of these depicts an approximately 120-130-cm-tall woman nursing on one breast a serpent; on the other, a winged serpent. Her body is covered from waist down by plate-tracery that complements the carving style of the serpent. The statue was named Bird Woman, perhaps because of the tracery. The sculpture is a rare example of the survival of paganism. The Gyerőmonostor sculpture has interesting parallels in Syria, in the former Byblos and Ugarit, where several bronze statuettes were found. One of them represents a sitting goddess with a snake coiled around her upper body. Archeologists also found a small ivory slab in Ugarit, on which two young men are depicted, dressed only in loincloths, sucking the goddess' covered breasts. Presumably the Gyerőmonostor statue – resembling the goddess described by Herodotus – is a symbolic representation of the Sumerian goddess of love, fertility and war, *Inanna*, and the god of vegetation, fertility and the underworld, *Dumuzi*. – B: 1176, 1020, T: 7617. →**Sumerians**.

**Gyimes** (Ghymes, Transylvania, *Erdély*, now in Romania) – Small narrow Pass in the Gyimes Mountains of the Eastern Carpathians. It was not populated until the 17th

century. Even now, it has only three villages: Gyimesbükk, Gyimesfelső and Alsólak, inhabited by Csángó-Szeklers, a special Hungarian ethnic group. The inhabitants of the three villages built a beautiful church with the leadership of their priest, Father János (John) Dani, and erected a characteristic carved wooden Szekler gate in front of the church. The ruins of an old Rákóczi castle increase the touristic value of this area. – B: 1134, 1020, T: 7656.→**Csángó; Szeklers.**

**Gyimesy Kásás, Ernő** (Ernest) (Gyergyószentmiklós, now Gheorgheni, Romania, 15 April 1901 - 1988) – Painter. He studied in Budapest at the Academy of Applied Art in 1923. Thereafter, he continued his studies in Chicago, Vienna, Munich, St Gallen, Leipzig, Dresden, Berlin, London and Rome. He participated in at least twenty individual exhibitions, presenting his works. He was the permanent exhibiting artist of the National Art Salon in Budapest. He helped to organize the Photo Museum of Budapest in 1939. He visited the United States a few times, and lectured and wrote in the newspapers about the unjust, post-World War I Dictated Treaty of Versailles-Trianon of 1920. Between 1945 and 1956, he lived in Hungary, where he was jailed, or kept under house arrest because he sympathized with the US, where he eventually settled in 1956. His paintings include *Miners' Houses (Bányászházak)*; *Harbor (Kikötő)*; *Forest in the Fall (Őszi erdő)*; *Nagybánya Landscape (Nagybányai tájkép)*, and *Chicago*. He participated in numerous international art exhibitions, such as in Johannesburg, Cape Town, Nairobi, Washington and Los Angeles. He studied and mapped the places in the US, where Hungarians settled before World War I. He founded the Association of Hungarian Artists living in foreign countries, and was its President for a long time. The Association had 25 exhibitions in twenty years and each one had an average of 40-45 exhibiting artists. Approximately 80,000 people have visited those exhibitions. He organized exhibitions for the Hungarian Conference in Cleveland. He was also a great journalist. His works appeared in book form as well. With László (Ladislav) Könnnyű, he collected and published data of the members of the World Federation of the Hungarian Fine Artists Abroad, established by him. – B: 1037, 1020, T: 7653, 7103.→**Könnnyű, László.**

**Gymnasium (High School) in Kastl, European-Hungarian** (*Kastli Európai Magyar Gimnázium*) – High School, established in 1958, at a former Benedictine Monastery in Kastl, Upper Bavaria, Germany. Kastl is about 60 km from Regensburg, and circa 50 km from Nuremberg. The monastery was transformed into a modern boarding school. The school was created after the crushed Hungarian Revolution and Freedom Fight of 1956, when 200 000 Hungarians escaped to the West and many with families ended up in West Germany. There was a need for creating a teaching institution for secondary general education for the children of refugees and it was officially approved by the American occupation-zone authorities. The language of instruction was Hungarian. The aim of the school was to teach Hungarian, German and English language and literature, also history, mathematics, geography as well as religion with all aspects and denominations of Christianity in an ecumenical spirit (the leading churchman was Szaniszló Ambrus). The high school provided secondary education with a final maturity examination to thousands of young Hungarians. – B: 1400, T: 7103.

**Gyökössi, Endre** (Andrew) (Rákospalota, 17 February 1913 - Budapest, 20 November 1997) – Minister of the Reformed Church, theologian, psychologist, poet, writer. He completed his secondary education at the Kálmán Könyves High School

(*Reálgimnázium*), Újpest (1931). He studied Theology at the Reformed Theological Academy, Budapest (1931-1936). In the meantime, he read Philosophy and Pedagogy at the University of Budapest. He was on a study trip in Basel, Switzerland, where he was a student of Karl Barth and Emil Brunner (1940-1941). He received his teacher's qualification in Religion, and earned a Ph.D. in Philosophy and Pedagogy at the University of Debrecen (1946). He received an Honorary Lecturer (*privatdozent*) qualification in Pedagogy, Psychology and Religious Psychology from the Reformed Theological Academy, Budapest (1950). He was Assistant Minister in Rákospalota-Óváros, then in Újpest-Újváros. In the meantime he served as a teacher of Religion. He was Parish Minister of Újpest-Újváros (1942-1979). In the meantime he conducted extensive pastoral care and wrote more than one hundred articles, essays, poems, plays and books. He was the editor of several religious papers, including the *Refomáció* (*Reformation*), which appeared only in one issue during the Revolution of 1956. He was a sought-after preacher and lecturer. A selection of his writings include *I Wanted to Write about Spring* (*Tavaszcól akartam írni*) poems (1936); *The Nest* (*A fészek*) novels, poems for juveniles (1947); *It is not good for a Man to be alone* (*Nem jó az embernek egyedül lenni*) (1972, 1999); *About Us for Us* (*Magunkról magunknak*) (1976, 1992); *God's Forgotten Language: the Dream* (*Isten elfelejtett nyelve: az álom*) (1988); *Today's Parables* (*Mai példázatok*) (1988); *Biblical Miniatures* (*Bibliai miniatűrök*) (1994); *Quietness of the Soul* (*A lélek nyugalma*) (1997); *The Power of Love* (*A szeretet ereje*) (1997); and his series: *Handshake from on High* (*Kézfogás a magasból*). He was a member of the Hungarian Protestant Literary Association, the Vörösmarty Society, the Hungarian Psychiatric Society, and the *Collegium Doctorum* of theologians. He was an important theologian in the second half of the 20th century. He received an Honorary Doctorate from the Reformed Theological Academy, and was awarded the *Pro Urbe* Medal of the City of Budapest. A Pastoral Institute of the Reformed Church and a kindergarten bear his name. – B: 0910, 0878, T: 7103.

**Gyöngyösi Codex** – A prayer book, a short Hungarian language relic, dated to the late 16th century. Four different hands copied it; the third, Magistrate Pál (Paul) Bíró, was in all probability the translator of that particular section. It is possible that the Codex was written for his personal use. It contains a heroic poem composed about King László I (St Ladislas, 1077-1095); and another one, on the death of King Mátyás I (Matthias Corvinus) (1443-1490). The codex consists of 35 leaves and is kept in the Library of the Hungarian Academy of Sciences, Budapest. – B: 0942, 1150, T: 7617. → **Codex Literature; László I, King; Mátyás I, King (Mathias Corvinus).**

**Gyöngyösi, István** (Stephen) (Ungvár? now Ushhorod, Ukraine, 1629 – Rozsnyó, now Rožňava, Slovakia, 24 July 1704) – Poet, solicitor. He was son of a rich lawyer of Eperjes (now Prešov, Slovakia). He received an education in classical literature from the Sárospatak College. From 1653 he was Judge of the County Court of Gömör, from 1663 secretary of the Palatine Ferenc (Francis) Wesselényi. On the disclosure of the Wesselényi plot he was also imprisoned, but with the help of the Archbishop of Esztergom, György (George) Szelepcsényi, he was soon freed. Presumably it was at this time that he turned Roman Catholic. As solicitor he was in the service of Ilona (Helen) Zrinyi, István (Stephen) Koháry and Bálint (Valentine) Balassi. In 1681 and in 1687 the County Gömör elected him representative of the two Houses of the Diet, from 1686 to 1693 and again from 1700 he was sub-prefect of the county. In 1683 he was on the side

of Imre (Emeric) Thököly, while after the downfall of the latter he joined the Habsburg side. After the outbreak of the Rákóczi Freedom Fight he supported Ferenc Rákóczi II. In his narrative poems embellished with lyrics, he mainly sang of the history of high-born aristocratic marriages for his own social class: typical of the gentry class, with politically fluctuating, compromising attitude, but with lively depiction of his era. Gyöngyösi was a Baroque poet, successful in his own time, very popular in circles of nobility. His works include *Venus of Murány Conversing with Mars (Marssal társalkodó Murányi Venus)* (1664); *Rose Wreath (Rózsakoszorú)* (1690); *Phoenix Coming to Life from his Dust...or Memory of János Kemény (Porából megéledett Phoenix avagy... Kemény János... emlékezete)* (1693); *Palinodia Prosopopoeia Hungariae...* (1695); *Collected poems of István Gyöngyösi (István Gyöngyösi összes költeményei)* (I-IV)(1914). – B: 0883, 1031, 1257, T: 7456.→**Vályi Nagy, Ferenc; Szelepcsényi, György; Wesselényi, Count Ferenc; Thököly, Count Imre; Balassi, Bálint; Rákóczi II, Prince Ferenc; Freedom Fight of Rákóczi II, Prince Ferenc; Zrinyi, Countess Ilona; Koháry, Count István.**

**Gyöngyössi, Pál** (Paul) (Derecske, 26 April, 1707 - St. Petersburg, Russia, 1790) – Physician, linguist. He completed his university studies in the Netherlands. In 1753, he was invited to Russia, where he worked as a medical practitioner and college teacher. He was also an active author. He wrote and published medical and linguistic studies in Latin, as it was the common language in that era. He was in contact with the most famous linguists of his time. In 1765, Empress Catherine II ‘The Great’ hired him as her Court Physician. – B: 0883, 1138, T: 7660.

**Gyóni, Géza** (Áchim) (Gyón, 25 June 1884 - Krasnoyarsk, Russia, 25 June 1917) – Poet. He attended school at Szarvas, and Békéscsaba, and began theological studies at the Evangelical-Lutheran Theological Academy of Sopron, but left it for journalism. He worked at the newspapers *Courier (Híradó)*, *Sopron Diary (Soproni Napló)*, and *Bácska Newsletter (Bácskai Hírlap)*. He fought in World War I, became a prisoner of war, and died in a Russian prison camp in 1917. His first poems show him as a follower of János (John) Vajda and Endre (Andrew) Ady’s poetry. His works are: *Poems (Versek)* 1904; *With Sorrowful Heart (Szomorú szívvel)* (1909); *By Campfire on Polish Fields (Lengyel mezőkön táborníz mellett)* (1914-1915), and *Letters on Calvary and other Poems (Levelek a kálváriáról és más költemények)* (1916). As a prisoner of war he wrote anti-war poems. His most famous one, *Send them just for One Night (Csak egy éjszakára küldjétek el őket)* is translated into many languages. His collected poems were published in 1941, his formerly unknown poems in 1943. His selected poems were published in 1959, 1964 and 1967. His work was awarded the first prize of the British Literary Society in 1934. – B: 0883, 0877, 1257, T: 7103.→**Vajda, János; Ady, Endre.**

**Győr** (Latin: *Arrabona*, German: *Raab*) – A large town (population 50,000 in 1930; 127,000 in 1983) in northwest Hungary at the confluence of the Danube and Rába Rivers. It became the leading textile center of truncated Hungary and it also has an important heavy industry, producing railway equipment, machine tool and chemicals. In the industrial suburbs it also produces agricultural equipment. Late in World War II, tanks were made here. It is an important railway junction (meeting of 5 lines). Since the privatization in the 1990s, the former industrial structure has changed. The site has been inhabited since the Stone Age. The town built on the site of a Roman military outpost (50-380 AD) was later occupied by Goths, Huns, Avars (up to 800) and finally the

Magyars, the relatives of the Huns and Avars, in the Carpathian settlement time (900 AD). Under King St. Stephen (St István, 997-1038), it became an Episcopal See in 1001, while in 1030 the King organized his counter attack from here to oust Emperor Conrad II's forces. The town first started to develop in the 12th century. King Stephan V (István, 1270-1272) defeated the Bohemian King Ottokar II at Győr in 1271. The Ottoman Turks took the town briefly in 1594-1598. In 1743, it was declared a royal free town by Empress and Queen Maria Theresa (1740-1780). In 1809, it was occupied by the Napoleonic Army. During the 1848-1849 War of Independence against Habsburg rule, the Hungarian revolutionary army was defeated near this town by the Austrian Army under Haynau on 28 June 1849. Győr has a 12th century cathedral (started in Romanesque style, rebuilt in Baroque style in the 17th century) and a fine Baroque-style Episcopal Palace, with a rich treasury; and also the Gothic Héderváry Chapel dating from the 15th century, guarding the bust-relic of King St. Ladislav (László, 1077-1095) in a valuable 14th century reliquary. Other important buildings are: the impressive town hall, overlooking the István Tisza Plaza; the Chamber of Commerce, County offices, two monasteries, a museum, a seminary in a 17th century building, which houses the famous library of 40,000 volumes, amongst them valuable codices, some from the Corvina library of King Matthias Corvinus (1458-1490); two high schools and other specialized schools. The Benedictine St. Ignatius Church overlooks the Széchenyi Plaza in the central medieval core of the town, surrounded by a wall until 1830. The large public hospital is equipped with 700 beds. There are a number of cultural associations, e.g. the Kisfaludy Literary Circle; also several papers are published here, such as the *Transdanubian News (Dunántuli Hírlap)* and the *Győr News (Győri Hírlap)*. – B: 1068, 1582, 1789, 7456, T: 7456. → **István I, King; Mária Terézia, Empress and Queen; Freedom Fight of 1848-1849; Győr, Battles at.**

**Győr, Battles at** – There were two armed engagements called the Battle of Győr: (1) As a preliminary to the Battle of Wagram, Napoleon ordered Eugene, Italian viceroy, with his Italian-French army to Hungary, to block the way of the army of Grand Duke János (John), withdrawn via Graz, Austria to Győr. His forces, united with those of Palatine József's (Joseph), numbered 10,000 infantry troops and 9,000 cavalry, while the opponent forces were of 42,000 infantry and 13,000 cavalry. Although the battle was fought with alternating victories, Napoleon's forces won the final victory in 1809. The French had a mere 3,000 casualties, while the Austro-Hungarian army lost 140 officers and 6,886 men, 571 horses, 2 cannons and 2 flags. This was Napoleon's only battle on Hungarian soil. The cenotaph at Kismegyér commemorates the fallen fighters. (2) Since the retaking of Buda by the Hungarian forces during the War of Independence of 1848-1849, the Russian intervention was certain. The Austrian army advanced on both shores of the River Danube, while the Russians proceeded through the Dukla Pass, via Kassa (now Kosiče, Slovakia) and Miskolc, to Pest. On 28 June 1849, the Hungarian Army was forced to cede Győr to the overwhelming Austrian forces and they retired toward Komárom via Ács. – B: 1078, 1020, T: 7103. → **Győr; Freedom Fight of 1848-1849.**

**Győr Clan** – According to 12th century chronicler Simon Kézai, the ancestor of the Győr clan is Pót of Lebény or Ernest, who came to the Carpathian Basin with an army of retainers. The first documented member of the clan, István (Stephen) Csépan, was Lord Lieutenant of County Bács and Palatine of Hungary between 1205 and 1209. Pót was Lord Lieutenant (*főispán*) in County Moson. In 1208 King András I (Endre, Andrew,

1205-1235) confirmed the Charter of the Benedictine Abbey of Lébény, established the clan's burial place at their main estate in Zselicszentjakab (now Kapos-Szentjakab) along with the founding of the Abbey. The clan is last mentioned in a 1375 document. The Dersffy, Imreffy and Gyulay families are their descendents. – B: 1078,1020, T: 7617.→**Kézai, Simon; András I, King.**

**Györe, Imre** (Emeric) (Debrecen, 2 December 1934 - ) – Poet, dramatist. His higher studies were at the University of Budapest, where he completed his studies in Journalism in 1956. Thereafter, he worked for the literary review, *Life and Literature (Élet és Irodalom)*. From 1962 on, he was a contributor to the daily, *Hungarian Nation (Magyar Nemzet)*. He changed from political poetry to deeper thoughts, mingled with irony, satire and the grotesque. He also wrote historical and mythological verse-dramas and oratorios. His works include *Flogging Song (Korbácsos ének)* (1959); *Death Chaser (Halálűző)* (1966); *Orpheus' Love (Orfeo szerelme)* (1969); *Dózsa's Caskets (Dózsa koporsói)* (1976), and *Hungarian Monologues (Magyar monológok)* (1996). He was awarded the Andor Gábor Prize (1958) and the Attila József Prize (1980). B: 1257, T: 7103.

**Györffy, György** (George) (Szucság, now Suceagu, Transylvania, Romania, 26 August 1917 - Budapest, 19 December 2000) – Historian. His higher studies were at the University of Budapest (1935-1939), and he obtained a Ph.D. from the same University with a dissertation entitled *Pechenegs and Hungarian (Besenyők és magyarok)* (1940). At the outbreak of World War II, he was on a scholarship in Sweden, and he had to return to Hungary. He worked as a librarian at the University Library, Budapest (1941-1942). From 1942 the Pál (Paul) Teleki Historical Institute employed him. From 1945 to 1949 he was Director of the Institute of Ethnology, Budapest. Between 1951 and 1988, until his retirement, he worked in various capacities at the History Institution of the Hungarian Academy of Sciences. He became a member of the Hungarian Academy of Sciences (corresponding in 1990, ordinary 1991), and was member of the Society of Hungarian Linguists (*Magyar Nyelvtudományi Társaság*). His field of research encompassed Hungarian prehistory, the conquest period, the Árpád era, Oriental research, and historical topography. Among his works are: *Studies on the Origin of Hungarian State (Tanulmányok a magyar állam eredetéről)*, (1959); *Historical Geography of Hungary in the Árpád Age vols. i-iv (Az Árpád-kori Magyarország történeti földrajza, I-IV)* (1963-1998); *On the Predesessors of Hungarians and on the Conquest. Information of the Contemporaries and the Chonicles (A magyarok elődeiről és a honfoglalásról. Kortársak és krónikások híradásai)*, (2nd edition, 1975); *Fiar Julianus and the Discovery of East (Julianus barát és Napkelet fölfedezése)* (1986); *Anonymus...*, studies (1988); *Eastern Elements of the Hungarians (A magyarság keleti elemei)* (1990); *Chartae Antiquissimae Hungariae* (1994), and *King István and his Work (István király és műve)*, 3rd enlarged edition (2000). His distinctions include the Herder Prize (1988), the Széchenyi Prize (1992), and his lifework became a part of the Hungarian Heritage. – B: 0879, 1257, 1031, T: 7103.→**Gesta Hungarorum; Anonymus; Árpád, House of; István I, King, Kálmán King.**

**Györffy, István (I)** (Stephen) (Karcag 11 February 1884 - Budapest, 3 October 1939) – Ethnographer. He completed his university studies in Kolozsvár (now Cluj-Napoca, Romania) and Budapest, and received a Ph.D. in Philosophy in 1910. He worked with the *Csángós* from 1917. In 1918, he was part of the unfinished expedition to Asia Minor.

From 1926, he lectured at the University of Budapest and became an honorary lecturer in 1929. He was the first Professor of Ethnography there in 1934 and, in 1938, became Director of the Regional Ethnic Research Center. His most important discovery was the typically Hungarian “double lot intensive garden-farming prototypal settlements”. He also worked on the ethnic problems of the *Hajdús* and the *Matyós*, and the formation-process of an ethnic group. His monographs on Hungarian folk costumes and folk art will remain a great treasure. His scientific work, coupled with his teaching and organizing abilities greatly contributed to the raising of Hungarian ethnography to Western European standards. He was a forerunner of the sociological study of village life through his literary works. Later, the famous Győrffy College for talented peasant youth was named after him. Some of his publications are: *Folk Architecture in the District of Nagykovács*, (*A Nagykovács és környékének népies építkezése*) (1908-1909); *Hungarian Settlements in the Valley of the River Feketekőrös* (*A feketekőrösölgyi magyarság települése*) (1913); *The Origin of the Hungarians in Transylvania* (*Az erdélyi magyarság eredete*) (1913), and *Hungarian Folks – Hungarian House* (*Magyar Nep – magyar ház*) (1943). He was member of the Hungarian Academy of Sciences. – B: 0883, 1257, T: 3240.→**Csángós; Hajdús; Matyós; Ethnography; Győrffy, István (2).**

**Győrffy, István (2)** (Stephen) (Budapest, 1912 - Leányfalu, 2000) – Ophthalmologist. He was the son of ethnographer, István Győrffy. His higher studies were at the Medical School of the University of Budapest, obtaining his MD in 1936. In the same year, he started working at the Maria Street Ophthalmology Clinic, Budapest, where he worked until his retirement in 1972. His field of research was the contact lense. He was the first to make contact lenses from plastic material in 1939. Within a couple of years, his invention of acrylic-lenses became used worldwide. In 1945, he discovered the principle of zoom lenses. In 1954, he invented a special device for lens-pressing. He wrote some 140 scientific articles and participated in a number of international congresses on contact lenses. Later in life, he became interested in medical history and medical numismatics. He was a member and honorary member of many related societies, among them the International Contact Lens Society (1959), the European Contact Lens Society of Ophthalmologists (1972), and the International IOL Society (1972). – B: 1550, T: 7103.→**Győrffy, István (1); Contact Lens.**

**Győrffy, László** (Ladislas) (Budapest, 2 October, 1940 - Budapest, 27 January 2009) – Writer, actor. His higher studies were at the Academy of Dramatic Art, Budapest (1961-1965). He worked as an actor in country theaters in Kaposvár, Miskolc and Debrecen, Győr, Békéscsaba and Veszprém. After 1983 he was a freelance writer. His major roles include Writer in *Bíró's Town in Evening Light* (*Város esti fényben*); Lancelot in *Svarc's Dragon* (*Sárkány*), and Jaques in Shakespeare's *As You Like It* (*Ahogy tetszik*). He wrote about marginalized men. His literary works include *Stone Organs* (*Kőorgonák*) novel (1980); *Patrol in the Night* (*Őrjárat az éjszakában*) tale-novel (1995); *End of the Millennium in a Flashlight* (*Ezredvég villanófényben*) (2000), and *He, Who Escaped Death* (*Aki megszökött a halál elől*), historical novel (2001). He was awarded the Lajos Nagy Prize (1998). – B: 0874, 1257, T: 7103.

**György, Ádám** (Adam) (Budapest, 1982 - ) – Piano virtuoso. He started playing at the age of four. First he studied under Katalin (Catharine) Halmágyi, and continued at the Béla Bartók Conservatory of Music, Budapest, in 1994. From 2000 to 2006, he attended

the Ferenc (Franz) Liszt Academy of Music, Budapest, where he studied under György (George) Nádor and Balázs (Blaise) Réti. In 1998 he won the National Youth Piano Competition, as well as Hungary's Pianist 2000 award. He soon became an itinerant artist with growing success and popularity. His concert tours apart from Hungary included: Switzerland, Germany, Austria, Italy, Poland, Belgium, China, Thailand, Malaysia, Singapore, Indonesia, Brazil and the USA, where he appeared at Carnegie Hall in 2008. He also played at the opening ceremony of the UEFA Euro 2012, in Warsaw, Poland. His repertoire contains a significant part of the piano literature. He is also a recording artist. In 2009 he founded the *Ádám György Castle Academy (Kastély Akadémia)*, an international piano master course at the Teleki-Wattay Castle, Pomáz, his home town. He created *The Ádám György Foundation* to support music education around the world, as well as helping talented students to participate the Academy. Among his numerous distinctions are: the Prix Classic Vienna (2002), the Special Prize of the San Remo International Piano Competition (2003), and the Grand Prize of the V. International Chopin Piano Competition in Budapest (2012). – B: 1031, 1868, T: 7103.

**György, Lajos** (Louis) (Marosvásárhely, now Targu Mureș, Romania, 3 April 1890 - Kolozsvár, now Cluj-Napoca, Romania, 31 December 1950) – Literary historian. He was a high school teacher and later a university professor. In the 1920s, he was a leading figure of literary life in Transylvania (*Erdély*, now in Romania), and dedicated his time exclusively to literary work. From 1928, he was the curriculum director of the Teacher's Training College, Kolozsvár. After 1945, he taught Literature at the University of Kolozsvár. In the meantime, he was the editor of three Hungarian literary journals in Transylvania. He was a positivist thinker, with an enormous knowledge of the history of literature. His most significant studies are related to the history of Hungarian anecdotes. His most important publications include *Hungarian Elements in World Literature, (Magyar elemek a világirodalomban)* (1924); *Bibliography of Hungarian Literature in Transylvania (Az erdélyi magyar irodalom bibliográfiája 1919-1923)* (1925), and *The Intellectual Life of Transylvanian Hungarians (Az erdélyi magyarság szellemi élete)* (1926). He was a member of the Hungarian Academy of Sciences. – B: 0883, 1257, T: 7662.

**György Master** (George) – He was son of Simon, the ancestor of the Sós of Sóvár families. Master György was the military commander for King László IV (Ladislav, 1272-1290). In 1277, he killed in a battle the rebel, Lóránd (Roland), Bailiff of County Szepes. In another battle, he captured Gerő, successor of Loránd, head of the rebel forces. In 1278, the King sent him, with a Hungarian-Cumanian cavalry force of 8,000, to gather intelligence on the position of the Czech King Ottokar's forces that kept the castle of Laa under siege. Although Ottokar repulsed the repeated attacks, Master György managed to lure him out of his fortified camp. The Czech king subsequently lost his life in the decisive battle fought on 8 August 1278, between the Austrian towns of Stillfried and Dürnkrut. The combined forces of Habsburg Emperor Rudolph and King László IV defeated the Czech military force. – B: 1078, 1020, T: 7617. → **László IV, King.**

**György, Pál** (Paul) (Nagyvárad now Oradea, Romania, 7 April 1893 - Philadelphia, Pa., USA, 19 February 1976) – Physician. He studied at the Medical School of the University of Budapest and received his M.D. in 1915. He studied Pediatrics at the University of

Heidelberg, Germany, in 1920. Thereafter, as a professor, he taught the same subject at the same University between 1927 and 1931. In 1930, he moved to Cambridge, UK, for further studies and, in 1933, he settled in the USA, and worked as a research professor at Western Reserve University of Cleveland from 1944. He worked at the University of Pennsylvania between 1950 and 1957, and was Head of the Pediatrics Ward at the University Hospital; later, he filled the same position at the General Hospital. His research was in Pediatrics, Biochemistry and Dietetics. His main achievements include the discovery of the B6 vitamin. He did mother-milk research and liver-cirrhosis research. He published more than 400 scientific papers. He received, among others, the Borden Prize. La Leche International Society set up a scholarship in his name. – B: 1419, T: 7103.

**Györi, Jakab** (Jacob) (17th century) – Lieutenant of the *Hajdús*. He was known for his unwavering bravery, combined with cunning. He became the prototype of the *Hajdú* image. His deeds became legendary. He was a fanatic Calvinist and, with his daring troops, he sided with Reigning Prince György (George) Rákóczi I of Transylvania (*Erdély*, now in Romania). In 1636, at the village of Madarász, close to Szalonta, a battle was fought between the Prince's forces and a Turkish contingent, superior in number. Despite the Turks' superiority, the battle remained undecided and both parties retreated to their camps for the night near Testhalom. The event inspired the great poet, János (John) Arany, to immortalize it in a poem. The foxy Jakab Györi, with only 300 of his *Hajdús*, sneaked around the Turkish camp and, with noisy drumbeats, blasting horns and firing their arms in rapid succession, managed to create such a havoc in the Turkish camp that the Turks took it as the arrival of Rákóczi's auxiliary forces and fled. Those who were not drowned in the nearby bog became prey to Györi's men. – B: 1078, 1020, T: 3233. → **Hajdú; Rákóczi I, Prince György; Rákóczi II, Prince Ferenc; Arany, János.**

**Györy, Elemér** (Elmer) (Takácsi, 30 June 1891-Budapest, 25 November 1979) – Bishop of the Reformed Church. He studied Theology at Pápa (1911, 1915), and in Geneva (1912-1914). He received an Honoraray Lecture (*privatdozent*) qualification in Practical Theology at Pápa, and taught Mathematics at the local High School (1915-1917). He was an assistant minister in Nagyigmánd (1917), then Bishop's Secretary in Komárom (1917-1920); Minister in Hetény (now Chotin, Slovakia) (1920), but resigned in 1923, for the Czechoslovak authorities expelled him as an "annoying alien". He was Minister in Komárom (1923-1926), then Bishop's Secretary (1924-1926); Professor of Practical Theology at the Reformed Theological Academy, Pápa (1926-1928); Minister in Győr (1938-1943), then again in Pápa (1943-1962). He was Bishop of the Transdanubian Reformed Church District from 1943 until 1961). In 1926, he created and edited, for six years, a diaspora newspaper, the *Gladsome Message* (*Örömmüzenet*). His numerous writings appeared in religious periodicals. His books include *Jókai's Legacy* (*Jókai hagyatéka*) (1925);, *Evangelization in the Reformed Church* (*Evangélizálás a református egyházban*) (1926); *A Guide for Doing Social Work* (*Útmutató a szociális munkák végzéséhez*) (1931); *In the Service of the Glory of God* (*Isten dicsőségének szolgálatában*) (1933), and *White Army of Christ the King* (*Krisztus király fehér serege*) and *War and Peace* (*Háború és béke*) (1941). – B: 0910, T: 7103. → **Reformed Church in Hungary.**

**Győr-Sopron-Ebenfurt Railroad** – 150-km standard gauge railroad between the cities of Győr and Sopron, Hungary. The total length of the railroad is 200 km, including the

branch lines, some of them in Austria. The Győr-Sopron-Ebenfurt Railroad Company began operations in 1876. During its first 100 years, the company transported passengers and 2 million tons of freight yearly. The main line was electrified in 1980. The company is a Hungarian-Austrian consortium, with an Agreement that was valid until 2007. – B: 1078, 1138, 1153, 1020, T: 7662.

**Győry, Dezső** (Desider) (Wallentinyi) (Rimaszombat, now Rimavska Sobota, Slovakia, 18 March 1900 - Budapest, 1 February 1974) – Poet, writer, journalist. He studied in Hungary and Germany and received a commerce diploma in Hamburg. From 1921 he published poems and articles in different journals. He was a left-leaning pacifist writer. He did his literary work mainly in Czechoslovakia, moved to Hungary only in 1949. He was President of the Hungarian Writers' Circle in Czechoslovakia. His poems and novels have been published in Hungary since 1955. Some of his works are *Hungarians with a New Face* (*Újarcú magyarok*) poems (1927); *Flower of Storm – Flower of Fate – Flower of Fire* (*Viharvirág – Sorsvirág – Tűzvirág*) trilogy (1955-1966), and *The Forests of Gömör* (*Gömöri rengeteg*), novel (1960). – B: 0883, 1257, 1551, T: 7662.

**Gyovád Clan** – Its known ancestor was Governor (*bán*) Tivadar (Theodore), who lived during the reign of King Béla IV (1235-1270). The clan, mentioned between 1284 and 1468, owned several estates in Counties Zala, Somogy and Bihar. The Kercsényi family is a descendant of this clan. – B: 1078, T: 7617. → **Béla IV, King.**

**Gypsies in Hungary** – An ethnic minority in Hungary. They call themselves *Roma* (*man*), sometimes *Kalo* (*black*). European peoples call them by different names; but most of them are the variation of the word *Cigány* (*Zigeuner*, *Zingarella*, and *Roma*, *Romani*, etc.). They appeared in Europe in the 15th century, but they did not know where they came from, where their original home was. This indicates that they have been far from their roots for a long time. With regarding this, there are a number of theories, e.g. Egypt (people of *Pharaoh*). They could have originated from Africa (*Zeugitana* province) or the Caucasus (*Zygius* people) or the Middle East (*Saracens'* descendants). István (Stephen) Vályi, a minister of the Reformed Church in Almás, County Komárom, in the 18th century, was the first to point out that their origin was in India. While on scholarship in Leiden, Holland, Vályi met some students from Malabar, India. He realized that in their dialogue with each other, they used words similar to those that the Gypsies use in Hungary. He recorded some 1,000 words with meanings that appeared similar or identical to Gypsy words. He also learned that allegedly there was a province called *Cigania*. They appeared in the early 15th century at Hungary's southern border with the Balkans, escaping the advancing Turks. In 1423, King Zsigmond (Sigismund of Luxembourg, 1387-1437) granted them a letter of protection, including self-government and permission for bread-winning activities. Hungarians at first welcomed them; however, later they were restricted, even persecuted and discriminated against. They lived in a tribal system as most of them still do so today. Their leader is the *Vajda*, and the Elders of the clans enjoy respect. Their tribes and clans usually have specific skills in their traditional trade, including nail making, wood shell carving, beehive-oven making, bullet-, gunpowder- and weapon-making, clay and straw brick making, and music. Gypsy bands became quite popular in the country as early as the 14th century, as well as in the Western world. In their family life, there are traces of an ancient matriarchal system and some Indian mythology. Women are regarded as possessing certain transcendental abilities, such as

enchantment, fortunetelling, palmistry and divining. Since they are an unsettled wandering people, they spread all over Europe. There were early and recent efforts to settle them down. Empress Maria Theresa (1740-1780) and Emperor Joseph II (1780-1790) tried to settle them, but to no avail. This problem was dealt with by an international organization, the Gypsy Lore Society. In Hungary, mainly after World War II, there has been an ongoing effort to solve this problem. In the 1990 census, 142,683 persons declared Gypsy origin. According to an educated estimate, their number in 1998 was between 450,000 and 500,000; in 2010, their number was estimated to be near to 800,000. The Second Orban Government makes great effort to provide them with education, jobs, and find their rightful place in the new Hungary. In democratic Hungary they have a number of associations, among them the *Lungo Drom*, the Democratic Association of Hungarian Gypsies, the “*Pharalipe*” (Brotherhood) Independent Gypsy Association. There is a Hungarian Gypsy member at the European Parliament, the first in Europe (2004). The Second Orban Government worked out and introduced a new Roma strategy in Hungary to solve their growing problem, its architect is Zoltán Balog. – B: 0942, 1068, 1168, T: 7103. → **Zsigmond, King; Mária Terézia, Empress and Queen; Orbán, Viktor; Balog, Zoltán; Vekerdi, József.**

**Gypsy Band** – Music band common in central Europe since the mid 18th century; one of the most famous early bandleaders was János (John) Bihari, dubbed “the Napoleon of the Fiddle”, as they shared the same year of birth (1769). Musical tradition and technique have been passed down through generations and culminated in virtuoso violinists, such as Sándor (Alexander) Lakatos and Sándor (Alexander) Fodor. Gypsy violinists tend to be highly skilled, constantly striving to impress with their virtuosity and passion. Their playing swoops dramatically from the highest to the lowest positions, uses cascades of arpeggios and heart-stopping chromatic runs, harmonics, pizzicato, exaggerated vibrato and a rate of acceleration. Gypsy repertoire reflects the popular tunes of a location; but simple tunes are transformed into masterpieces of emotion and technique. A favorite is *The Lark (A pacsirta)*, where high squeaks, trills and harmonics imitate the birdsong. The *Csárdás* is a type of tune originally associated with army recruiting ceremonies and generally has a slow, romantic introduction, reflecting the sadness of departure, a bold and uplifting middle section, and a frantically paced climax depicting the excitement and adventure ahead. The Italian composer, Vittorio Monti (1868-1922) wrote his famous *Czardas* based on Gypsy tunes. He was just one of many 19th and early 20th century composers captivated by gypsy music; and it is fitting that many of their works have been in turn assimilated by the Gypsies. Usually Gypsy orchestras play versions of the *Brahms Hungarian Dances*; Dinicu's *Hora Staccato*; Sarasate's *Zigeunerweisen*; Liszt's *Hungarian Rhapsodies*, or J. Huby's *Hejre Kati*. A key technique in Hungarian Gypsy violin playing is the vibrato trill. Another interesting technique featured in the Monti *Czardas* is the type of harmonic that appears in the slow middle section. A strange variant on the normal fiddle is the horn violin, commonly found in the Bihar region of northwest Transylvania, based on the Stroh Phonofiddle. A metal horn and diaphragm are attached to an otherwise normal violin, giving a loud and piercing tone. – B&T: 1322. → **Bihari, János; Liszt, Ferenc; Folk Fiddling.**

**Gyula (1)** (Geula) (10-11th century) – He was a Hungarian prince, grandson of Töhötöm, conqueror of Transylvania (*Erdély*, now in Romania), and son of Horka. Around 950, two Hungarian rulers, Bulcsú and Gyula, were baptized in Constantinople. Bulcsú

continued his pagan lifestyle. He lost a battle against Emperor Otto I, in 955, at Lechfeld, near Augsburg, and he and Lehel were captured and executed in Regensburg. Gyula, the ruling prince of Transylvania, brought the missionary bishop, Hierotheos (Hierothus), with him from Constantinople. He converted people in Transylvania to the Eastern Orthodox Faith, and baptized Sarolt (Saroldu), Gyula's daughter. She became the wife of Ruling Prince Géza and mother of King István I (St Stephen) (997-1038). Gyula kept his faith and freed the Christian prisoners. Several churches were built along the River Maros under his rule. However, in 1003, Gyula assailed István in defense of old tribal rules. István defeated and imprisoned him but, when he adopted Western Christianity, he was treated with respect. – B: 0942, 1316, T: 7103.→**Bulcsu; István I, King; Lechfeld, Battle of; Lehel, Horn of.**

**Gyula (2)** – Town near the southeastern edge of the Great Hungarian Plain in County Békés, close to Transylvania, ½ km west of the White Körös River. Around 1300, it was a small village, named *Gyulamonoștóra*. By 1400, it had developed into a well-frequented place of pilgrimage, and became a flourishing town, its golden age reached in the early part of the 16th century. The town was fortified by a castle, built of bricks, and its manufacturing industry was well developed. In 1566, the Ottoman Turks took it, and a continuous decline set in, until the Turks left an uninhabited settlement in 1695. Gradually, there was some revival, but was destroyed in the 1801 fire. Then it was completely rebuilt and gradually became an industrial and commercial center for an extensive surrounding satellite area. Gyula had 35,000 inhabitants in 1983, and 24,910 in 1920, mostly Hungarians, with 2,200 Romanians, 730 Germans and 200 Slovaks. According to church affiliations: 1/2 Roman Catholic, 1/3 Reformed, and 1/7 Greek Catholic. It has the ruins of a medieval castle fortress, but also a more recently built attractive manor house. The town has a High School, a girls' Secondary School, a Library, a Museum, and a large Hospital with a Sanatorium for TB patients. It has also a spinning mill, textile works, shoe factory, production of spirits, cordials, matches and picture-frames. There are also County offices, law-courts, a board of finance, an open air Castle Theater (*Várszínház*) operating during summer; also the Castle Bath with a Spa (*Várfürdő*). There is a monument in the town center for the great opera composer, Ferenc Erkel, who was born in Gyula in 1810. – B: 1068, 1816, 7456, T: 7456.→**Erkel, Ferenc.**

**Gyula Zombor Clan** – (Julius Zombor) this clan is descendant of the Transylvanian (*Erdély*, now in Romania) Voivode, *Gyula*, and his brother, *Zombor*. From this clan stems chief Maglód. Anonymus mentions him and his name is preserved in the town of Maglód in County Pest. His ancestor is Count Sibrid, whose son, Count Erdő, received the town of Németi in County Zólyom from King László IV (Ladislav) (1272-1290). The clan was mentioned in Counties Zólyom and Hont between the years of 1200 and 1300. – B: 0942, T: 7617.→**László IV, King; Anonymus.**

**Gyulafehérvár** (*Latin*: Apulum; *German*: Karlsburg, earlier called Weissenburg; *Romanian*: Alba Iulia) – Ancient town in Transylvania (*Erdély*, now in Romania), on the right bank of the Ompoly River, near its confluence with the Maros River, consisting of the actual town and, on an elevated level, the fortress. It is the administrative seat of Judet Alba (before 1920: County Alsó-Fehér). In 1910 its population was 11,616, including 5,226 Hungarians, 5,170 Romanians, 792 Germans and 287 Gypsies. In 2002, there were 62,722 Romanians, 1,836 Hungarians, 1,475 Gypsies and 217 Germans. The town was

established by the Romans in the 2nd century AD, when a Roman *castrum*, called *Apulum* stood there. During the period of the great migrations, it was wiped out of existence. Then it was destroyed by the Tartars in 1241 and, three centuries later, by the Ottoman Turks. In the Middle Ages it was rebuilt and became the ancient capital city of Transylvania (*Erdély*). It grew to become the seat of the Transylvanian Voivodes, then of the Princes. It used to be a royal free town with a Municipal Council, county and district courts. It is the seat of the Roman Catholic Bishop of Transylvania and, since the 15th century, also that of the Eastern-Orthodox Metropolitan. Prince Gábor (Gabriel) Bethlen founded a famous Academy there, with such famous teachers as Márton (Martin) Opitz, Henrik Bisterfeld and János (John) Apáczai-Csere; but in 1658, Turkish-Tatar troops destroyed and burnt it down. From 1538 on, the Roman Catholic Bishopric ceased to function due to the Turkish occupation; but it was reestablished by Emperor Charles III in 1715, and now it is an Archbishopric. In 1785, the leaders of the Romanian peasant uprising, Hora and Kloska, were executed here. During the War of Independence against the Habsburg rule (1848-1849), the town, held by Austrian troops, was besieged by General József (Joseph) Bem and his Hungarian army units for five months; the siege was ended by the Russian forces, under General Luders on 12 August 1849. At the end of World War I, it was in this town that the Romanians of Transylvania declared the annexation of Transylvania (*Erdély*) to the Kingdom of Romania on 1 December 1918. Ferdinand I was crowned the King of Romania in the Orthodox Cathedral on 15 October 1922. There are a number of churches in the lower-lying town area. The impressive St. Miklós (Nicholas) Cathedral in the fortress area was founded by King St. Stephen (István) of Hungary, originally built in a basilica style in the 11th century, on the ruins of which the cathedral was built in late Romanesque style in the 13th century. It was later (1443-1444) extended by János (John) Hunyadi in Gothic style, consisting of three naves and a cross nave. It houses the tombs of a number of Transylvanian Princes, also Queen Isabella, King János Zsigmond (John Sigismund) of Hungary, and János Hunyadi, Regent and national hero. A Renaissance-style Chapel was added to the Cathedral by János (John) Lászlai, Archdeacon of Transylvania. The fortress area also houses the Bishop's Palace, the *Batthyaneum* Archbishopric Library, with 55,000 volumes, rich in incunabula, with coin-, antique- and mineral-collections. The fortress itself was built by Emperor Charles VI in the 18th century (hence the German name of the town, "Karlsburg"). The High School, built by Prince Gábor Bethlen, was later converted into infantry barracks. The area is famous for its viticulture, producing wines such as the *Rózsamáli*. – B: 1031, 1068, 1582, 1789, 1816, 7456, T: 7456. → **Bethlen, Prince Gábor; Apáczai Csere, János; Bem, József; Isabella, Queen; János II, King; Hunyadi, János; Gyulafehérvár Cathedral.**

**Gyulafehérvár Cathedral** (Gyulafehérvár, now Alba Iulia, in Transylvania, *Erdély*, now in Romania) – Transylvania's greatest Romanesque building was erected in the center of the castle. The first cathedral was built in the 11th century; and the second on the foundation of the first one, during the 12-13th centuries. It was burned down during the Mongol-Tartar invasion in 1241-1242, when its vaults and sanctuary collapsed. In 1277, the Saxons burned it down again. Subsequently, it was rebuilt, the sanctuary lengthened, and the Lászlai-chapel placed in the lateral nave. The sarcophagi of János (John) Hunyadi, Queen Isabella, László (Ladislás) Hunyadi, János Zsigmond (John Sigismund) (János II, King) are in the church. György (George) Martinuzzi, Prince Gábor (Gabriel)

Bethlen, Prince György (George) Rákóczi I. and János (John) Corvin are also entombed here but their graves were robbed and their bones scattered. – B: 1337, T: 7663.→**Gyulafehérvár; Hunyadi, János; Hunyadi, László; Isabella Queen; János II, King; Martinuzzi, György; Bethlen, Prince Gábor; Rákóczi I, Prince György.**

**Gyulafehérvár Declaration** (Gyulafehérvár, now Alba Iulia, Transylvania, Romania) – On 1 December 1918, following the armistice of World War I, the Romanians of Transylvania (*Erdély*, now in Romania) held an *ad hoc* Assembly in Gyulafehérvár and they unilaterally declared Transylvania's union with Romania. Hungarians, Szeklers and Saxons were not invited, and were not present at the Assembly. However, they together with other smaller groups made up a slight majority of the Transylvanian population. The Romanians committed themselves with the following declaration, on 2 December 1918: “*In Great Romania (Romania mare) ...all ethnic groups living together get their national freedom, education, administration; justice will be carried out in their native tongues by officials of their ethnicity and every nationality shall have proportionate representation*”. Following the declaration, the Romanian army occupied Transylvania betraying the armistice. The Versailles-Trianon Peace Treaty in 1920 sanctioned the occupation. Romanian promises to the nationalities were gradually sabotaged and finally remained unfulfilled; their fate was persecution, oppression and cultural genocide under both the Royal and the Communist Romania. The 1 December became Romania's National Day. – B: 1230, 1020, T: 7103.→**Trianon Peace Treaty; Vienna Award II; Paris Peace Treaty; Atrocities against Hungarians.**

**Gyulafehérvár Glossary** (Gyulafehérvár, now Alba Iulia, Transylvania, *Erdély*, now in Romania) – A valuable Hungarian language relic. Elemér Varjú discovered it within a Latin Codex in the Gyulafehérvár Library. He reported his finding to the Hungarian Academy of Sciences on 28 November 1898. The Codex, covering 154 small octavo leaves was written between 1295 and 1310, and consists of Latin Church sermons. The author of the translations is believed to be János (John) Watachai, a Hungarian Franciscan priest. He wrote the Hungarian translations directly underneath the Latin text in three places. This cohesive Hungarian language relic stood in second place of importance after the *Funeral Oration and Prayer (Halotti beszéd és könyörgés)* as, at the time of its discovery, it predated another Hungarian language relic, the *Königsberg Fragment and its Ribbons (Königsbergi Töredék és Szalagjai)* (ca. 1350). – B: 1141, T: 7617.→**Königsberg Fragment and its Ribbons; Funeral Oration an Prayer.**

**Gyulafehérvár Lines** (Gyulafehérvár, now Alba Iulia, Transylvania, Romania) – The Hungarian translation of a 15-line verse summary of three Latin prayers in a Franciscan Codex, now in the Library of the Batthyaneum in Gyulafehérvár. The text is in the literary form customary during the Middle Ages, i.e. a short, versified summary of the central idea or theme. – B: 1050, 1230, T: 7617.

**Gyulafehérvár Religious Disputes** (Gyulafehérvár, now Alba Iulia, Transylvania, *Erdély*, Romania) – There were two significant religious disputes between Calvinists and Unitarians in Gyulafehérvár. The first occurred between 24 and 27 April 1566. The participants were Péter Méliusz Juhász, Bishop of the Refomed Church of Debrecen, and Ferenc (Francis) Dávid, leader of the Unitarians. György (George) Blandrata moderated the dispute. A profound argument pursued and resulted in favor of the Calvinist proposals. The second dispute between Calvinists and Unitarianans took place between 8

and 18 March 1568, in the presence of the reigning prince and the theologians. The dispute concluded unsuccessfully. – B: 1078, T: 7103.→**Méliusz Juhász, Péter; Dávid, Ferenc.**

**Gyulaffy, László** (Ladislás) (ca 1525 - Udvarhely, now Odorehiu, Romania, 13 May 1579) – Army officer, fortress commander. He was a descendant of a noble Transdanubian (*Dunántúl*) family and an outstanding hero of the Turkish wars. In 1549 he served in Szigetvár (1551), then in Pápa (1557), in Győr, as commander of a hundred strong mounted detachment. In 1560 he became the Commander of the Tihany Fortress. In 1551, he took part in the siege of Lippa, and Emperor Miksa I (Maximilian I, 1564-1576) made him a Knight of the Golden Spur. In 1566, with the aid of György (George) Thury, he retook the forts of Veszprém, Tata, Gesztes and Vitány from the Turks. He was promoted in the same year to Supreme Commander of Veszprém. His skirmishes and duels made his name known in the whole country; but there were also complaints against him, made to the Emperor by the Prior of Veszprém, for his abuse of power. As a result, the Court called him to Vienna. Instead of complying, he changed sides and offered his services to King János II (John, János Zsigmond, 1540-1553), Reigning Prince of Transylvania (1556-1571) and moved to Transylvania (*Erdély*, now in Romania). According to folklore, he bade farewell to Transdanubia in a short poem. The fort of Csobánc remained in the possession of the Gyulaffy family. In 1575, in the Battle of Szentpál, he fought as a general in the army of Prince István (Stephen) Báthory. Báthory rewarded him for his services with the fort of Szilágycseh and 63 villages. Today a School bears his name. – B: 0883, 1078, T: 3233.→**János II, King; Csobánc Castle; Báthory, Prince István.**

**Gyulai, Pál (1)** (Paul) (Kolozsvár, now Cluj-Napoca, Romania, 25 January 1826 - Budapest 9 November 1909) – Poet, writer, critic. He studied at the Reformed College of Kolozsvár (now Cluj-Napoca, Romania). He became tutor to the sons of Count János (John) Bethlen. During that time he published his first novels and poems. In 1848 he was one of the leaders of the revolutionary youth in Kolozsvár. However, he did not participate in the War of Independence. He was secretary to the pacifist Domokos (Dominic) Teleki. He began his career in 1850, as a literary critic for the newspaper, *Fliers of Pest (Pesti Röpívek)*. In 1854, he published an important literary historical study, the *Sándor Petőfi and Our Lyric Poetry (Petőfi Sándor és lírai költészetünk)*. He spent two years in Paris and Munich. Later he became one of the leading figures of the *Deák Party (Deák Párt)*. Later, he taught at Kolozsvár; then became one of the strong critics of the Hungarian Academy of Sciences. In 1862 he returned to Pest, and filled various positions related to literature. From 1873, he was Editor at the *Budapest Review (Budapesti Szemle)*, and Professor at the University of Budapest (1876-1892). Then he became President of the Kisfaludy Society, a member of the Upper Chamber of the Parliament, and a member of the Hungarian Academy of Sciences. His works include *The Master of an Old Manor House (Egy régi udvarház gazdája)* (1867); *Poems of Paul Gyulai (Gyulai Pál költeményei)* (1870), and *Critical Papers (Kritikai dolgozatok)* (1854-1861). He is regarded as the first representative of Hungarian critical realism. A Street bears his name in Budapest. – B: 0883, 1122, 1257, T: 7103.→**Petőfi, Sándor; Deák, Ferenc; Hungarian Academy of Sciences.**

**Gyulay, Pál (2)** (Paul) (ca 1550 - Abafája, 10 December 1592) – Vice-chancellor of Transylvania (*Erdély*, now in Romania) – Humanist, writer, historiographer. He received his education in Kolozsvár (now Cluj-Napoca, Romania) and, from 1568, at the University of Padua, Italy. He became the secretary of Gáspár (Gasper) Bekes in 1572. From 1577 he was a councilor of István (Stephen) Báthori, Prince of Transylvania (1571-1586) and King of Poland (1576-1586). During Báthori's rule, Gyulai became Vice-Chancellor of Transylvania at the Transylvanian Chancellery in Krakow. After the death of Báthori in 1586, he returned to Transylvania. However, because of his support of Zsigmond (Sigismund) Báthori, Báthori's rival: Boldizsár (Balthasar) Báthori murdered Gyulai. Gyulai was a highly educated humanist, chronicler of István Báthori's Russian campaign, in his work *Commentarius* (1581). – B: 0883, 1257, T: 7617.→**Báthori, Prince István.**

**Gyurcsány, Ferenc** (Francis) (Pápa, 4 June 1961 - ) – Politician, economist, businessman. His higher studies were at the University of Pécs. He acquired a Teacher's Degree in 1984, and an Economic Degree in 1990. His business career started in 1990, when he joined the CREDITUM Financial Advisory Ltd., Budapest. For a short while he was Director of the EUROCORP International Financial Co. From 1992 until 2002, he was CEO of ALTUS Investment and Trustee Co., and then a member of the Board of Directors. His political career began with the Communist Youth Organization (*Kommunista Ifjúsági Szövetség – KISZ*). He was its secretary in Pécs between 1984 and 1988. In 1988 and 1989, he was President of the University and Academy Council of the KISZ central committee. Soon, for a short while, he became Vice-President of the Democratic Hungarian Youth Alliance (*Demokratikus Magyar Ifjúsági Szövetség – DEMISZ*). In 2002, Prime Minister Péter (Peter) Medgyessy appointed him as his Chief Strategic Advisor; and in 2003, he became Minister for Children, Youth and Sport. In the same year, he was elected member of the National Board of the *Hungarian Socialist Party (Magyar Szocialista Párt – MSZP)*. In January 2004, he was elected Party President of County Győr-Moson-Sopron. On 25 August 2004, the Party's Extraordinary Congress nominated him its candidate for Prime Minister of Hungary. On 29 September 2004, the Parliament endorsed him as Prime Minister. The MSZP and SZDSZ won re-election in the second round of the general elections on 23 April 2006, gaining 210 seats in the 386-seat Parliament, and the second Gyurcsány Coalition Cabinet was formed on 9 June 2006. After winning the election, he radically changed his economic policy. On 24 February 2007, he became the President of the MSZP. Due to the worsening economy and global financial crisis, Gyurcsány abdicated as Party President and Prime Minister on 21 March 2009. On 22 October 2011 he founded the Democratic Coalition (*Demokratikus Koalíció*) Party with 10 members of the Parliament from the Hungarian Socialist Party – *Magyar Szocialista Párt MSZP*. The aim is the defeat of the Orbán Government and the creation of the 4th Republic in Hungary. – B: 1167, T: 7103.→**Political Parties in Hungary.**

**Gyurcsó, István** (Stephen) (Garamkövesd, now Horská Kamenica, Slovakia, 27 January 1915 - Dunaszerdahely, now Dunajská Streda, Slovakia, 16 March 1984) – Hungarian poet in Slovakia. Until 1945, he worked as a laborer in Czechoslovakia, Hungary, Austria and Yugoslavia. From 1952 until his retirement, he was a co-worker at the Cultural Society of Hungarian Workers in Czechoslovakia (*Csehszlovákiai Magyar Dolgozók Kulturális Szövetsége – CSEMADOK*). After 1968, his writings were banned for a long

time. From 1949, his poems appeared in newspapers such as *Torch (Fáklya)* and *New Word (Új Szó)*. He published a book *Across Mountains and Valleys (Hegyeken völgyeken)*. In it he reported his impressions about 128 villages he visited. His other works include *My Mother Smiles (Anyám mosolyog)* poems (1955); *Restless Years (Nyugtalan évek)* poems (1964); *Mirror pieces (Tükördarabok)* poems (1983); *Depth and Height (Mélység és magasság)* poems (1985), and *We Were Not Bad (Nem voltunk rosszak)* selected poems (1995). A Foundation and a Prize bear his name. – B: 0883, 1257, 1551, 1890, T: 7103.

**Gyurkó, László** (Ladislás) (Budapest, 22 April 1930 - Budapest, 25 August 2007) – Writer. Early in his career he was employed as a casual worker, later as a clerk. His first writings appeared in 1956. Since 1957, he has lived from his writings. He was a contributor to the periodical, *Contemporary (Kortárs)* in 1963 and, from 1964 to 1969 he worked at the publication, *Light (Világosság)*. Between 1970 and 1980, he was Manager of the 25th Theater (*25. Színház*), Budapest; thereafter, he was that of the Folk Theater (*Népszínház*), Budapest. From 1979 to 1986, he worked at the Institute of Popular Culture (*Népművelési Intézet*). For a year (1983-1984) he was Manager of the Kecskemét Theater (*Kecskeméti Színház*), and, from 1986 to 1989, he was Deputy Editor-in-Chief for the periodical, *Mirror (Tükör)*. Between 1981 and 1985, he was a Member of Parliament. His works include *Sinners (Bűnösök)* novel (1961); *The Fourth Man (A negyedik ember)* essays (1964); *Family Novel (Családi regény)* (1984); *The Shadow of Death (A halál árnyéka)* novel (1981); *Booted Revolution (Bakancsos forradalom)* novel (2001). Among his plays are *My Love Electra (Szerelmem Electra)* (1968, 1972); *Golden Calf (Aranyborjú)* (1974) and *The Sinner (A bűnös)* (1974). In his works, he deals with philosophical and ethical problems of society. He was awarded the Attila József Prize (1968) and the Kossuth Prize (1980). – B: 0874, 1257, T: 7103.

**Gyurkovics, Mária** (Budapest, 19 June 1913 - Budapest, 28 October 1973) – Coloratura soprano. She studied at the Ferenc (Franz) Liszt Academy of Music, Budapest. From 1947, she was a member of the Hungarian State Opera. Her debut was in Verdi's *Rigoletto* as Gilda, in 1937. Shortly after, she became the leading coloratura soprano of the Opera House. She filled the empty space left by the death of Lujza (Louisa) Szabó, the emigrated Gitta (Peggy) Alpár, and the retired Erzsi (Lisa) Sándor. She had oratorio performances, sang in operettas, and starred in films; but the opera and oratorium performances were her forte. She sang in almost all great pieces of the repertory of the Opera House, such as Gilda in Verdi's *Rigoletto*, Norina in Dinozetti's *Don Pasquale*, Mária Gara in Erkel's *László Hunyadi*, title role in Delibe's *Lakmé*, Rosina in Rossini's *Barber of Seville*. She sang Oratorios, such as Handel's *Messiah*, *Judas Maccabaeus*, Haydn's *Creation*, Orff's *Carmina Burana*, and Mozart's *Requiem*. She performed with great success in almost all European capitals. She was a recipient the Merited Artist title (1950), the Kossuth Prize (1951), the Ferenc Liszt Prize (1952) and the Outstanding Artist Prize (1954). – B: 0883, 1197, T: 7685.→**Alpár, Gitta; Sándor, Erzsi; Szabó, Lujza.**

**Gyurkovics, Tibor** (Budapest, 18 December 1931 - Budapest, 16 November, 2008) – Psychologist, writer, poet and playwright. He attended the Piarist High School, Budapest and matriculated in 1950. Because of his family background, he was not admitted to Medical School, Law School, or the Academy of Dramatic Art. He worked as a clerk.

Finally, he was allowed to study at the Teacher Training College for Handicapped Children (1953); then he read Psychology at the University of Budapest (1953-1955). He was at first an Assistant, later on a Full Professor at the Teachers' Training Academy for Handicapped Children (1955-1957). In 1956, he became President of the Revolutionary Committee of the Academy; but after the crushed Revolution, he lost his position. He became a substitute teacher in a suburb of Budapest. Between 1958 and 1960, Gyurkovics was the leading Psychologist of the Central Institute of Neurology for Children. From 1960 to 1968, he was a psychologist in the National Mental and Neurology Clinic, and also a psychological expert for the Pest County's Court of Justice (1966-1970). His experiences appeared in a number of his novels and poems. From 1968, he began to live from his writings. He was the dramaturge of the Petöfi Theater (*Petőfi Színház*) of Veszprém (1988-1992); Co-Chairman of the Chamber of Hungarian Writers (1991-1995); Deputy-Chairman of the Hungarian Academy of Arts; Psychologist for the Hungarian National Soccer Team from 1994, and President of the Hungarian Writers' Association from 1995. His works include *Grafit*, poems (1961); *Breadbreaking (Kenyértörés)* poems (1963); *Son of Man (Emberfia)* poems (1966); *Iron-Rooster (Vaskakas)* poems (1970); *Glass Ball (Üveggolyó)* short stories (1973); *Service (Szolgálat)* novel (1976); *Suicide by Prescription (Öngyilkosság receptre)* short stories (1977); *The Last Christmas (Az utolsó karácsony)* short stories (1980); *Bone without Fish (Szálka hal nélkül)* satire (1984); *To Kill, to Embrace (Ölni, ölelni)* dramas (1985); *Ballad of the Body (A test balladája)* poems (1991); *Cob of Corn (Kukoricacsutka)*, for juveniles (1997), and *Cantata Aquilarum*, poems (1998). His plays are: *You will Die in the Evening (Este meghalsz)*; *The Old Man (Az öreg)*; *Kreutzer Sonata*, and *God is not a Gambler (Isten nem szerencsjátékos)*. His first volume of poetry appeared in 1961; he wrote 49 books. His poetry, prose and plays show him as a multi-faceted, talented and always forward-looking writer. His lyrical attitude is always present in his writings and his form is always masterly. His most fruitful years were in the 1990s, when his creative spirit soared freely. He was a recipient of the Attila József Prize, the International Board on Books for Young People – IBBY Prize, the Hungarian Heritage Prize, and the Kossuth Prize. – B: 0874, 1257, T: 7103.

---

## H

**Haar, Alfréd** (Budapest, 11 October 1885 - Szeged 16 March 1933) – Mathematician; started his higher studies in Chemical Engineering at the Budapest Polytechnic; but in 1904 changed over to the University of Budapest. In 1905 he continued his studies in Göttingen, Germany, where he obtained his Ph.D. in 1909. Before a short stay at the University of Zürich as an assistant professor 1912-1919, he was Professor of Mathematics at the University of Kolozsvár (now Cluj-Napoca, Romania). In the years after World War I, in order to escape Romanian rule, he lectured temporarily in Budapest, then in Szeged, where the Kolozsvár University was in exile. In Szeged, together with Frigyes (Frederick) Riesz, he established a famous mathematical center. In 1922 they founded the journal *Acta Scientiarum Mathematicarum*. In 1929, at the University of Hamburg, he expounded his researches in variation in mathematics. In 1931 he was invited to become a member of the Hungarian Academy of Sciences. Haar's research extended over a very wide field and led to significant results. These research fields included orthogonal serial functions, singular integrals, theory of sets, analytical functions, partial differential equations, calculus of variations, function approximation, linear unevennesses, discrete groups, continuous groups, the plateau problem, and the infinite Abelian group. He put the problem of the theory of multiple variables on new foundations. Also, in his last work, he achieved something fundamental for modern mathematics by proving the existence of invariant groupings ("Haar Measure, Haar Integral"). He published mainly in German. His main works include *Zur Theorie der orthogonalen Funktionensysteme* (1910 and 1911), *Zur Variations-rechnung Abhandlungen aus der Mathem* (1930), *Der Maasbegriff in der Theorie der Kontinuierlichen Gruppen (The concept of the grain measure "Maas" in the theory of continuing groups)* (1933). – B: 0883, 1279, 1306, T: 7456.→**Riesz, Frigyes.**

**Haas, Mihály** (Michael) (Pinkafő, now Pinkafeld, Austria, 8 April 1810 - Pest, 27 March 1866) – Catholic Bishop, theologian, writer. He began his studies at Szombathely, and continued them in Pécs and in Vienna, where he was awarded a Ph.D. in Philosophy. After he was ordained in 1834, he served in Dunaföldvár and Pécs. Between 1837 and 1846, he worked as a professor at the newly founded Lyceum at Pécs, during which time he also became active in the literary field. In 1846 he was appointed parish priest and soon after was named provost. In 1853 he became inspector of all schools in the district. At the end of his life, he was made Bishop of Szatmár (now Satu Mare, Romania). Of his literary output, the ones dealing with local history are of some importance. His collections of folk music, folk customs, proverbs, as well as nicknames of certain Western Hungarian settlements are significant. – B: 0883, 0942,1020, T: 7617.→**Catholic Church in Hungary.**

**Habans** – Name of an Anabaptist sect in historic Upper Hungary (Upland, *Felvidék*, now Slovakia). A large group of the radical Anabaptist movement, fleeing persecution in Switzerland and in Tyrol first settled in Nikolsburg and Austerlitz, Moravia. There, Jakob Hutter, a Tyrolean hatmaker and an able leader gave them their spiritual and worldly Constitution, around 1529. The Hutterites-Habans, as they later became known, believed in adult baptism, and a communal life based on Biblical principles. The "new Christians", soon settled in Northwest Hungary, mostly in Counties Pozsony, Trencsén and Nyitra

(now Bratislava, Trencin and Nitra, Slovakia). Powerful Hungarian landowners: the Pálffy, Erdődy, Illésházy, Czobor, Nádasdy, Batthyány families and the Rákóczi at Sárospatak shielded them from the authorities, mainly for their excellence in many crafts. The Pozsony Diet enacted the first of many Acts against the Hungarian Anabaptists in 1548. After the Battle of the White Mountain in 1620, the Hutterites were expelled from Moravia. A large group, about 180 persons from Ó-Szombat, Hungary (now Sobotište, Slovakia) was received by Prince Gábor (Gabriel) Bethlen (1580-1629) and settled in Alvinc (now Vintu de Jos in Transylvania, *Erdély*, now in Romania). Eventually a group emigrated to Russia,

**Habán deep dish**

and later to the USA and Canada, where they still prosper today. The Habans were accomplished metal workers, producing beautiful cutlery for their landlords. They also introduced the French method of constructing fireproof thatched roofs from straw dipped in clay slip; but above all, they produced some of the finest majolica services outside of Italy. In the Haban communes, potters of outstanding ability produced fine tin-glaze earthenware, painted in high temperature blue, green, yellow and brownish-purple flowers on a white, sometimes blue background. These motives were influenced by contemporary Italian majolica and by some local flora, including tulips and snowdrops. By the sect's strict regulations, only floral motives were allowed. Human figures and animals appeared on Haban ceramics only after the communes were broken up and many of the Hutterites were forced to convert to Catholicism, during the reign of Empress & Queen Mária Terézia (Maria Theresa, 1717-1780). Those who resisted fled the country, eventually settling in North America, around the turn of the 19/20th century. Originally the Haban name applied only to the converted Hutterites, but later tended to include all of the Anabaptists in Hungary. The elegant style of the Haban vessels greatly influenced the motives on later rural Hungarian folk ceramics. The descendants of the converted Hutterite potters kept the traditional style alive, sometimes complete with 17th century dates until the beginning of the 20th century. Haban ceramic vessels are treasured and proudly displayed by many museums today. – B: 7654, T: 7654. → **Hutterites; Bokály; Bethlen, Prince Gábor; Mária Terézia, Empress and Queen; Horváth, J. Eugene.**

**Habsburg, Otto von** (Otto Habsburg-Lothringen) (Reichenau an der Rax, Lower Austria 20 November 1912 - Pöcking, Bavaria, Germany, 4 July 2011) – Diplomat, head of the Habsburg family. He was the eldest son of Károly (Charles) IV (1916-1918), the last Emperor of Austria and the last King of Hungary, and Princess Zita of Bourbon-Parma. At the age of four, Otto became Crown Prince of the Austro-Hungarian Monarchy, when his father ascended the throne, following the death of Ferenc József I (Francis Joseph). However, at the end of World War I in 1918, King Károly IV (Charles) had to abdicate; both monarchies were abolished and the family was forced into exile, when the Republics

of Austria and Hungary were founded. Otto spent the following years in Switzerland and in Madeira (Islands of Azores), where Károly IV died prematurely in 1922, making Otto heir to the throne at the age of ten. Meanwhile, the Austrian Parliament had officially expelled the Habsburg Dynasty and confiscated all their property (*Habsburgergesetz* of 3 April 1919). In 1935, Otto graduated from the University of Louvain, Belgium, having studied Social and Political Science. A fervent patriot, he had opposed the Nazi *Anschluss* of Austria of 1938, and also opposed Hitler's regime. He fled to the USA and spent most of the years of World War II in Washington, DC. After the War, he lived in exile in France and Spain. Well after the end of World War II, he finally renounced all claims to the Austrian throne in 1961, and was eventually allowed to return to his home country in 1966. He became a German citizen in 1978. An early advocate of a unified Europe, he served from 1979 until 1999 as a Member of the European Parliament for the conservative German CSU Party. He was one of the organizers of the so-called Pan-Europa picnic on the Austrian-Hungarian border region in 1989. He spoke fluent Hungarian, had frequently visited Hungary, and supported Hungary in many ways. He was the last heir to the throne of the former Austrian-Hungarian Empire and oldest member of the Habsburg family. – B&T: 1031.→**Károly IV, Emperor and King; Zita, Queen; Pan-European Picnic.**

**Habsburg Restoration Attempts** – There were two attempts by King Károly IV (Charles, 1916-1918), the last Hungarian king, to reclaim the throne in 1921. (1) The King, as a political emigrant, received a resident's permit to stay in Switzerland, but was prohibited from leaving the country. Therefore he traveled in disguise and with false documents, by train, then he crossed the Hungarian border by car and, on 26 March 1921, he arrived by horse-drawn carriage at the palace of the Bishop of Szombathely. The next day, he had an unsuccessful meeting with Regent Horthy in Budapest. On 3 April, the representatives of the Entente Powers launched a concerted diplomatic protest against the Habsburg restoration attempt. The King left the country on 5 April 1921 (and died in Madeira on 1 April 1922). The successor states, comprising the Little Entente (Czechoslovakia, Yugoslavia and Romania) unanimously protested against the return of King Károly IV, declaring it a *cause de guerre*. (2) The Swiss Government refused to extend the residence permit of the King, since he had violated its conditions. Instead, the castle of Hertenstein was designated as his new residence, which he could leave only with special permission. Nevertheless, Queen Zita, who was very much concerned about their uncertain future and who possessed an exceptionally strong will, arranged a second trip to Hungary with the help of the King's supporters. On a rented plane, they arrived at the manor house of Count Cziráky, in Dénesfa in County Sopron, on 20 October 1921. In the evening, the troops of the Sopron barracks, under the command of Lieutenant Colonel Lehár and Colonel Ostenburg, swore an oath of loyalty to the King. They also formed the Royal Government with István (Stephen) Rakovszky as Prime Minister and Count Gyula (Julius) Andrássy as Foreign Minister. In six railway cars, they set out toward Budapest but, at the outskirts of the city, the cadet battalions were ordered to stop their advance. In the meantime, the successor states ordered partial mobilization on hearing the news of the King's return, while the regular Hungarian army units surrounded the King's troops at Budaörs, and they were forced to surrender at Tata on 24 October. The Hungarian Government designated the Abbey of Tihany as temporary residence of the King and his retinue. On 1 November, they were handed over to the Entente Powers. They transported

them aboard the English ship, *Glowworm*, to the island of Madeira. Among the countries created on the ruins of the Austro-Hungarian Monarchy, Hungary was the only one that did not confiscate the estates of the Royal Family. On 6 November 1921, the Hungarian Parliament by Bills XL and VII abrogated the right of the Habsburg House to the Hungarian crown. – B: 1230, 1338, 1020, T: 7665.→**Károly IV, Emperor and King; Zita, Queen.**

**Had** (Army) – (1) A term used in the broad sense by the ancient Magyars to name the tribes or the family units. Both the male and female members and their children were covered by that expression, and even their serfs were included as members of the *Had*. In various regions, the meaning of the word differed greatly and the expression lost its significance in modern times. (2) In wartime, it is the name of an armed military unit. Declaration of war in Hungarian is *hadüzenet*, and waging war is *hadviselés*, words that preserved the old root of the word. – B: 1078, 1134, 1020, T: 3233.

**Hadik, Count András** (Andrew) (Kőszeg, 16 October 1710 - Vienna, Austria, 12 March

1790) – Military officer. He was a descendant of a small landholder noble family of Upper Hungary (*Felvidék*, now Slovakia). His career started as a regular Hussar. At the age of 22, he was made an ensign in the Dessewffy Hussar regiment; and in 1736, at the beginning of the Turkish War, he became a captain. He participated in the War of Succession of Austria and in the Seven Years War. His bravery and daring adventures, his Hussar-bravado became legendary. With 400 of his Hussars, he cut through the encirclement of the Fort of Neisse to reinforce the defenders. At Frankenstein, using some cunning, with 350 Hussars, he forced a whole Prussian regiment to flee. In the fall of 1757, as Division-General, with 5270 of his troops in Radenberg, with a daring manoeuvre, he exacted a ransom from the city of Berlin. It was one of the most significant surprise attacks in

Hungarian military history. His force consisted of 1100 Hussars and 1100 Austrian cavalry, the rest being Austrian, Hungarian and Croatian infantry troops and gunners. At that time, his own Austrian and the Prussian enemy armies were far away from him when he declared: "*The road to Berlin is free*". They set out on the 11 October and, five days later, on the birthday of Empress Maria Theresa, he was standing at the gate of Berlin. On the 16th of October, the military envoy, a trumpeter from the cavalry, delivered Hadik's letter to the Mayor of Berlin. It demanded 300,000 *tallers* in tribute money, which the City Council refused. They pulled up the drawbridge over the River Spree, but Hadik's artillery blew apart the chain holding the bridge. The City Council then requested mercy, but by that time Hadik demanded double the tribute money. The City Council could only raise 150,000 *tallers* in cash and gave a draft for the remaining 50,000, made out to Hadik. As Hadik strongly opposed looting, they handed over 25,000 *taller* for the military, which he distributed among the soldiers before leaving Berlin. He accounted for

the rest in Vienna and refused to accept the 12,000 *taller* offered to him personally. Maria Theresia rewarded Hadik with the Maria Theresia Grand Cross. In 1760, he was Commander-in-Chief of the Austrian Imperial Army. For his services he was awarded estates at Cernovič and Futak, along with the title of Count. Between 1764 and 1768, he was military commander, royal representative and attendant of the royal seat in Transylvania (*Erdély* now in Romania). In that capacity, he proposed, for the first time in Hungary, the abolishment of the feudal system. In 1772, he was Commander of the occupational forces and, for a short time, Governor of occupied Poland. In 1774 he was promoted to Marshal and, until his death, he remained the Head of the Imperial Military Council in Vienna. He participated in the campaigns against the French, in one campaign against the Turks, and three times against Prussia. He served for over 45 years. In 1777 he became a Count of the German Empire. He secured the immunity of the Szeklers in Transylvania, and was the initiator of the Szekler and Hungarian settlements in Bukovina. He is buried in Futak. His equestrian statue by György Vastagh was erected in 1937, within the Fort of Buda. – B: 0883, 1031, 1020, T: 3233, 7678.→**Hussars; Hussar Bravado.**

**Hadrovics, László** (Ladislav) (Alsólendva now Lendava, Slovenia, 10 September 1910 - Budapest, 13 May 1997) – Linguist, philologist, Slavic scholar. His primary education was at Lendva, the secondary at Kőszeg and finally at Keszthely, where he graduated in 1929. He studied Hungarian and Latin Literature at the University of Budapest, where he acquired a Degree in Education (Dip.Ed.) in 1934, and obtained a Ph.D. in Hungarian and Slavic Linguistics in 1935. In the same year he was on a scholarship in Berlin. From 1937, he worked at the University Library, Budapest. He was an assistant professor at the Slavic Institute. From 1941, he worked at the Pál (Paul) Teleki Institute and then became researcher for the History Institute of the Hungarian Academy of Sciences, and Professor, teaching Southern Slavic Philology and Literature. He became Department Head from 1954 until his retirement in 1974. He was a corresponding member and then a regular member of the Hungarian Academy of Sciences. Among his writings are: *Hungarian and Southern Slav Spiritual Links (Magyar és déli szláv szellemi kapcsolatok)* (1944); *Hungarian-Serbian-Croatian Dictionary (Magyar-szerbhorvát szótár - Madžarsko srpskohrvatski rečnik)* (1958), and *Hungarian-Russian Dictionary (Magyar-orosz szótár - Vengersko-russkij slovar)*, with L. Gáldi (1964). He was a recipient of the State Prize (1985). – B: 1122, 1161, 1257, 1339, T: 7103.→**Teleki, Count Pál.**

**Hafenschner, Károly Sr** (Charles) (Budapest, 6 July 1926 - ) – Lutheran minister, theologian. His secondary studies were at the Fásor Lutheran (Evangelical) High School, Budapest. In 1944 he commenced theological studies at the Lutheran Theological Academy, Sopron. With a scholarship from the World Council of Churches, he spent a year at the Seminary of Gettysburg, PA, USA, where he studied Ethics, the crisis of modern times and that of marriage, from the Christian point of view. He later on studied Practical Theology and learnt languages. He obtained a Ph.D. in Practical Theology from the Lutheran Theological Academy of Budapest in 1967. He was Assistant Pastor in Kőbánya-Budapest, the Mandák Home, and the Deák Square congregations, Budapest, where he was a pulpit supply for 3 years; junior pastor for 14 years, and pastor for 15 years. Since the Deák Square Church is the congregation of the Bishop of the Southern Lutheran Church District, he worked with such Lutheran bishops as Lajos (Louis) Ordass, László (Ladislav) Dezséry, Zoltán Káldy and Béla Harmati. He rendered

important support and versatile service to his Church. He was a member of the church delegation at the 3rd Assembly of the World Council of Churches, Minneapolis, MN, USA, and member of the Lutheran Vatican Committee. He participated in important ecumenical meetings, gatherings and consultations in many parts of the world. He was also lecturer at the Lutheran Theological Academy, Budapest. He retired from his pastoral duties in 1989. His book, *Das Herrenmahl (Lord's Supper, Úrvacsora)* is a theological textbook. His studies, articles and books appeared in German, English, Swedish and other languages. He is a recipient the Middle Cross of Honor of Republic of Hungary (2012). – B: 1050, T: 7103.→**Ordass, Lajos; Dezséri, László; Káldy, Zoltán; Harmati, Béla.**

**Hafnium** – A rare element with metallic properties, belonging to the group of titanium. Its atomic number is 72 on the periodic table and its atomic weight is 178.58 with properties very similar to that of zirconium. The chemist, György Hevesy, discovered it in 1922. It is used for making shielding covers in the atomic industry because it can absorb large volumes of neutrons. – B: 1138, 1020, T: 7675.→**Hevesy, György.**

**Haggenmacher Plansifter** – Károly (Charles) Haggenmacher, engineer, invented and patented the plansifter in 1887 that is used in the milling process to separate different types of flours according to particle size. He applied diverters to the sifters to direct the stream of the products as needed. His invention was adapted worldwide. – B: 0883, 1091, T: 7662.

**Hagymási, Bálint** (Valentinus Cybeleius Varasdiensis) (Varasd, now in Croatia, 1490 - 12 January 1517) – Humanist writer and poet; between 1506 and 1516 he studied with Italian poet Gionbattista Pio at the University of Bologna, with the financial support of György (George) Szatmári, Bishop of Pécs. At that time Hagymási was already Canon of Pécs and Székesfehérvár. His first independent publication appeared in 1512, in Bologna, under the title *Elegidion*. His main work, the *Opusculum de laudibus et vituperio vini et aquae*, (*Small Book on the Praise and Damnation of Wine and Water*) was published in 1517, in Hagenau, Germany. Another of his works is the poem *Ad Pannoniam*. – B: 1150, 1257, 1020, T: 7617.

**Hahót Codex** – The manuscript of the first Hungarian musical score, *Sacramentarium*, written between 1075 and 1092, for the Benedictine Order of Béla. The music notes appear as *neumas*, i.e. hand signs, the earliest form of music notation. The manuscript is kept in Zágráb (now Zagreb, Croatia). – B: 1150, T: 7617.→**Codex Literature.**

**Hain, Gáspár** (Gasper) (Kassa, now Košice, Slovakia, 17 February 1632 - Lőcse, now Levice, Slovakia, 1687) – Chronicler. He was son of the Magistrate of Lőcse, author of the Lőcse Chronicle. After his studies he became a teacher, then Rector of the secondary schools of Kassa and Lőcse. Later, he was appointed Councilor, then Magistrate of the City of Lőcse. The title of his chronicle is: *Zipserische oder Leutschauerische Chronika*. – B: 1078, 1257, T: 7617.→**Cipszers.**

**Hainburg (Hunvár)**, Austria – The first settlers in the area were the Illyrians and the Celts. Its Celtic name was *Carnuntum*, and it became the capital of the Province of Pannonia, where Roman Emperor Marcus Aurelius once resided. A castle was built there in 1050. The Romans had developed this town but, during the great migration, it fell into

ruin. The fortress was called Hun Fort (*Hunvár*), and it later became an Avar stronghold. The Hungarians used it as one of their border fortresses. In 1683, the Turks devastated the town and ruined its castle on their way to the siege of Vienna. The city's old statue of Attila the Hun probably dates from the 12th century. Joseph Haydn, the composer lived here from 1737–1740 as a child learning music, and singing as a choirboy. – B: 1078, 1031, T: 7103.→**Pannonia; Attila; Huns; Avars; Hajdús.**

**Hajdú Dance** – During the Turkish war of the 16th century, a specifically Hungarian dance was developed by restless, wandering *Hajdú* (*Heyduck*) soldiers: the Hajdú Dance (*Heyducker Tanz*). It is performed with cudgel or sword to bagpipe music. Its steps are made up of staggering, stamping, squatting, later spinning and leaping into the air. By the 18th century, it evolved into the *Verbunkos* (from German *Werbung*, recruiting), used as a recruiting dance by the Hungarian army. This in turn evolved into the now internationally known Hungarian dance, the *Csárdás*.– B: 1031, 1138, 1197, 1020, T: 3220, 7103.→**Verbunkos; Hajdús; Csárdás; Hungarian Dances, Traditional.**

**Hajdú, Júlia** (Budapest, 8 September 1925 - Budapest, 23 October 1987) – Composer, pianist. Her studies were completed at the Ferenc (Franz) Liszt Academy of Music, Budapest, where she obtained a Degree in Music Education. She studied folkmusic with Zoltán Kodály and jazz instrumentation with György (George) Rimki. She composed 14 operettas, hundreds of dance songs, music for radio and television, variety shows, songs, dance suites, such as the *Winter Pleasures (Téli örömök)*, *Merry Moments (Vidám percek)*, arias, serenades and movie background music. Her main works are *Comedians of Füred (Füredi komediások)* (1959); *Lady Doctor (Doktorkisasszony)* (1960), and *Pest is Worth a Night (Pest megér egy estét)* (1960). Her songs were quite popular at the time. – B: 0883, 1508, T: 7667.→**Kodály, Zoltán.**

**Hajdú, Péter** (Budapest, 27 December 1923 - Budapest, 19 September 2002) – Linguist. His higher studies were completed at the University of Budapest, in Hungarian and German languages (1941-1950). After World War II, he carried out research at the Library of the Festetics Estate, as a co-worker of the National Széchényi Library. From 1951, he worked in the Finno-Ugric Department of the Linguistic Institute of the Hungarian Academy of Sciences. He organized the Finno-Ugric Department at the University of Szeged, and was its professor until 1974, when he was appointed Director of the Linguistic Institute of the Hungarian Academy of Sciences. Between 1974 and 1992, he taught at the University of Budapest. He was also President of the Linguistic and Literary Department of the Hungarian Academy of Sciences (1965-1990). He was a research professor between 1991 and 1995, and retired in 1996. He was visiting professor in Vienna, Munich and Uppsala. He was Director of the Institute of Finno-Ugric Studies. His special field of research was Samoyedic languages, phonology, etymology, ancient history of the Hungarians (*Magyars*). He edited some 10 volumes. His works include *The Samoyedic Peoples and Languages (A szamojéd népek és nyelvek)* (1949); *Antecedents of the Development of the Hungarian People (A magyarság kialakulásának előzményei)* (1953); *Finno-Ugric Peoples and Languages (Finnugor népek és nyelvek)* (1962), *Introduction to Uralic Linguistics (Bevezetés az urali nyelvtudományba)* (1966), and *Samoyedic Chrestomathy (Szamojéd chrestomathia)* (1968). Some of his works appeared in German. He was a regular or honorary member of a number of learned societies, such as the Hungarian Academy of Sciences, exterior member of the Finnish

Academy of Sciences, Honorary Doctor of the University of Szeged and the University of Uppsala, Knight of the Finnish Order of the Lion, a recipient of the Labor Order of Merit and the Széchenyi Prize. – B: 0874, 0878, 1257, T: 7456.

**Hajdú Tradition** – The Hajdú tradition is characterized by the military life style of the 16-18th centuries. The heroic part of the tradition, kept alive by legends such as the freedom fights of István Bocskai (1604-1606); fights against invading Turks; against marauding Serbs, who fled to Hungary as the Turkish occupation of their land advanced. Today, this tradition is reflected by their folk dances. – B: 1134, 1020, T: 7103.→**Hajdús; Bocskai, Prince István.**

**Hajdúböszörmény Cauldron** – A 320-mm-high cauldron of the Late Bronze Age (1570 – 1200 B.C), found in the town of Hajdúböszörmény in Eastern Hungary. It is decorated with sun and bird symbols. It is dated from the 9th century BC. It is in the collection of the Hungarian National Museum, Budapest. – B: 1100, 1020, T: 7617.

**Hajdús** (*Haiduk or Haiduc*, in the singular *Hajdú*) – Collective name of an identifiable subgroup of Hungarians. The name is not based on ethnic features but on a type of profession or job. The group and its name originate from the late 14th century. At that time, animal husbandry and commerce were growing and, with them the demand for herdsmen and armed guards who accompanied the herds on foot to markets of the distant towns of Europe. These armed guards were called *Hajdús*. With the changing of cattle export laws, the existence of Hajdús became uncertain and, instead of returning to their former peasant life style, they organized themselves into irregular troops. Thereby the original concept of herdsmen changed to a military one from the second half of the 16th century. In the 16-17th centuries their numbers grew with the addition of outlaws, fugitives and insurgents against Habsburg rule. They took part in Prince István (Stephen) Bocskai's freedom-fights and, after the victorious battle of Álmosd on 15 October 1604, he settled many of them in the Hajdúság region in Eastern Hungary, which includes Kálló, [Hajdu]Nánás, [Hajdu]Hadház and Vámospércs. In a charter dated 12 December 1605, Bocskai gave them nobility and granted them estates. On 13 September 1609, Transylvanian Prince Gábor (Gabriel) Báthori resettled the Hajdús of Kálló to Böszörmény, because of an ongoing confrontation with soldiers of the Austrian Imperial Army. In later ages, *Hajdú* was the name of servants of the nobles or civil authorities, sometimes wearing decorative uniform. – B: 1078, 1134, 1138, 1231, T: 7103, →**Bocskai, Prince István; Hajdúság; Győrffy, István; Báthori, Prince Gábor; Hajdú Tradition; Hajdú Dance; Hajdúság.**

**Hajdúság** – A historical area in Hungary with a unique culture. A landmass of 966 km<sup>2</sup> was assigned to the jurisdiction of the *Haiduk* in County Hajdú-Bihar, containing six towns including the capital, Hajdúböszörmény; they were granted free status. Its population reached 63,000, before the Turkish occupation, dropped to 4700 in 1720; by 1870 its population was again 63,000. It enjoyed many privileges, granted only to the nobility in the Middle Ages by the King. From 1790, the area regularly sent a delegate to the Lower House of Parliament. In 1876, it became part of County Hajdu-Bihar. Its most famous area is the *Hortobágy* Steppe (*Puszta*) of Hungary. – B: 1078, 1134, 1138, 1020, T: 7656.→**Hajdús.**

**Hajmássy, Ilona** (Ilona Massey) (Nagykőrös, 16 June 1910 - Bethesda, MD, USA, 20 August 1974) – Actress. Her career began at the City Theater (*Városi Színház*), Budapest.

Subsequently, she moved to screen acting in Vienna, and Hollywood, USA, where she signed with Metro Goldwyn Mayer, under the name of Ilona Massey. Her first major success was with Eddy Nelson in the 1937 musical, *Rosalie. Balalajka* in 1939, is another notable example of her many films, where she starred once again with Eddy Nelson. Her feature films include *Circus Heros (A cirkusz hősei)* (1935); *New Wine (Új bor)* (1941); *The Invisible Agent (A láthatatlan ügynök)* (1942); *Spring Clouds in the Sky (Tavaszi felhők az égen)* (1944); *Tokyo Rose* (1946); *Mexican Vacation (Mexikói vakáció)* (1946); *Northwest Outpost (Északnyugati előőrs)* (1947); *The Looters (A fosztogatók)* (1948), and *Happy Love (Boldog szerelem)* (1949). – B: 0883, 1435, T: 7667.

**Hajmássy, Miklós** (Nicholas) (Hagymássy, Hagymási) (Zalaegerszeg, 20 July 1900 - Buenos Aires, 9 February, 1990) – Actor. He was trained at Kálmán (Coloman) Rózsahegyi's acting school; later performed with various theater companies. Discovered by Franciska Gaál, he joined the Comedy Theater (*Vígszínház*) in 1927 in Budapest. During the 1940s, he was on contract with the New Hungarian Theater (*Új Magyar Színház*), but acted at the Operetta Theater (*Operettszínház*) as well. He was cast primarily in comedies and light plays; and from 1933 on, also in films. In 1944 he left Hungary, settled in Argentina, and became a regular on the stage of the Hungarian Theater in Buenos Aires. His main roles included Balásházy in Hunyady's *Black Stemmed Cherry (Feketeszárú cseresznye)*; Gosztonyi in Móricz's *Gentry Fun (Uri-muri)*; Colonel Stromm in Mikszáth-Harsányi's *The Noszty Boy's Affair with Mari Tóth (A Noszty-fiu esete Tóth Marival)*, and Higgins in B. Shaw's *Pygmalion*. His feature films include *Stolen Wednesday (Az ellopott szerda)* (1933); *Hungarian Resurrection (Magyar feltámadás)* (1939); *A Night in Transylvania (Egy éjszaka Erdélyben)* (1941); *The Devil Never Sleeps (Az ördög nem alszik)* (1941); *The Perfect Family (A tökéletes család)* (1942); *Siamese Cat (Sziámi macska)* (1943), and *It Happened in Budapest (Ez történt Budapesten)* (1944). – B: 0883, 1339, 1445, T: 7667.

**Hajnal, Gábor** (Gabriel) (Gyepűfüzes, now Kohfidisch, Burgenland, Austria, 4 October 1912 - Budapest, 26 January 1987) – Poet, translator of literary works. His schooling was in Szombathely; moved with his family to Budapest in 1926. While attending University, he supported himself by private tutoring and working as a clerk. After 1945, he read Law for two years. From 1949 on, he worked as Editor for the journal, *Public Education (Népművelés)*, thereafter, in turn with the journals *Book (Könyv)* and *The World of the Book (Könyvilág)*. His works include *The Complaint of a Pauper (A szegény panasza)* (1947); *Among Stones (Kövek között)* (1980) and *Before You Step into the Fog (Mielőtt belépsz a ködbe)* (1980). – B: 0883, 0878, 1257, T: 7103.

**Hajnal, István** (Stephen) (Nagykikinda, now Kikinda, Serbia, 3 July, 1892 - Budapest, 16 June, 1956) – Historian. In 1919 he was an archivist at the Hungarian National Museum. From 1920 he was clerk at the National Archives, and from 1922 he acted as an archivist for the Princely Esterházy family. In 1921 he became an honorary lecturer (*privatdocent*), and from 1931 Professor of Modern History at the University of Budapest. His field of research was the problems of comparative history of writing; the relationship between sociology and science of history, and on certain questions of political history. He was particularly interested in the spreading of literacy, historical knowledge and understanding. His writings are important in the radical communication change of our age. He became a corresponding member of the Hungarian Academy of

Sciences in 1928, and became a regular member in 1939. He was stripped of membership in 1949 for political reasons, but his membership was reinstated in 1989. His main works include *On the Chancery of King Béla IV (IV. Béla király kancelláriájáról)* (1914); *Modern History (Az újkor története)* (1936); *Vergleichende Schriftproben zur Entwicklung und Verbreitung der Schrift im 12-13. Jahrhundert* (1943), *L'enseignement de l'écriture aux universités médiévales* (1954). – B: 0883, 1028, 1257, T: 7103.

**Hajnal, László Gábor** (Ladislav Gabriel) (Szabadszállás, 27 August 1948 - ) – Writer, journalist, sociologist. From 1967 he read Philosophy and History at the University of Budapest. In 1969 he was imprisoned by the Communist Government for subversive propaganda, but freed by amnesty in 1971. Thereafter, he was a manual laborer. In 1971 he worked as a reporter for the *Illustrated Newspaper (Képes Újság)*, and completed his higher studies in 1976. In 1981 he left Hungary for the West and worked at the *Free Europe (Szabad Európa)* Radio Station in Munich. In 1986 he founded a periodical entitled *Generations (Nemzedékek)*, and became co-owner of the *Novum Verlag* publishers in Munich. In 1995 he returned to Hungary. Among his works are *Only the Mornings are Terrible...(Csak a reggelek borzalmasak...)* articles (1982); *Human Mill (Embermalom)* selected writings (1985); *Vigil Without Fear (Virrasztani, félelem nélkül)* (1996), and *Prison-Book (Börtönkönyv)* (1998). – B: 0878, 1257, T: 7103.

**Hajnal, Zoltán** (Cegléd, 11 September 1933 - ) – Geophysicist, educator. He received his higher education at the University of Sopron, he emigrated to Canada in 1957, and continued his higher education at the University of Saskatchewan, graduating with a B.Ed., (1961), MSc. (1963), and Ph.D., University of Manitoba (1970). He was employed by Chevron Standard as an interpreting geophysicist (1963-1965). He worked at the University of Manitoba as a lecturer from 1965 to 1970, and was Professor of Geophysics at the University of Saskatchewan from 1970. His special fields include geophysics, physics of Earth and seismology. He published nearly 100 scientific and technical papers in periodicals, conference proceedings and technical reports. He has ongoing projects in the USA and Hungary. He served on more than twenty professional and expert committees, such as the Earth Sciences Computer Committee. He organized scientific conferences. The recipient of several research grants, he is a Fellow of the Massachusetts Institute of Technology. – B: 0893, T: 4342.

**Hajnóczy, József** (Joseph) (Modor (now Modra in County Pozsony), 3 May 1750 – Buda, 20 May 1795) – Scholar of jurisprudence and one of the leaders of the Hungarian Jacobites. He completed his legal studies in Pozsony (now Bratislava, Slovakia), became a qualified solicitor, and spoke seven languages. He became secretary, first to Count Miklós (Nicholas) Forgách and, from 1779, to Count Ferenc (Francis) Széchényi. About this time, he joined the Freemasons. He became a supporter of Emperor Joseph II, because he expected help from the Emperor in opposing feudalism in Hungary. He was appointed Deputy-Lieutenant of County Szerém, at the southern edge of the Kingdom of Hungary. After the death of Emperor József II (Joseph), not being a nobleman, he lost his position. Thereafter, in the unfolding nobility-nationalism movement of 1790-1791, during the reign of Lipót II (Leopold), he endeavored to get the relatively progressive wing to accept social-economic reforms. Hajnóczy soon became disillusioned in the movement and turned to the ideas of the French Revolution, which he tried in his writings to popularize in wide circles from 1791 on; his ideas grew ever more radical. In his work

on taxation, he criticized the Hungarian feudal constitution and demanded the levying of tax on the nobility and the secularizing of all church properties. By demanding the general and proportionate sharing of taxation, as well as freedom of the press, he was already pressing for the establishment of a civic state. He also urged the importance of the right of the serfs to culture. In 1792 he became Secretary of the Royal Treasury in Buda. In 1793, he distributed among his friends the Jacobin constitution, translated into Latin. In the spring of 1794, Ignác (Ignatius) Martinovics, the learned revolutionary leader of Hungary, drew him into the Jacobin movement as one of the directors of the secret Society of Freedom and Equality. On 16 August 1794, Hajnóczy was captured and taken to Vienna, then carried to Buda and, on 27 April 1795, he was sentenced to death. In the meadow southwest of the Castle Hill of Buda called *Vérmező* (Blood Meadow) he was beheaded, together with his companions. His works include *Writings of the Hungarian Jacobins (A magyar jakobinusok iratai)* (Published by Kálmán Benda, I-III, 1952). – B: 0883, 1031; T: 7456. → **Martinovics, Ignác; Jacobites in Hungary.**

**Hajnóczy, Péter** [Family name: Béla Ödön (Edmund) Hajnóczy] (Porcsalma, 10 August 1942 - Porcsalma, 8 August 1981) – Writer. He completed his secondary education in evening classes (1962). Thereafter he earned his livelihood with casual jobs. After the appearance of his first volume, *The Stoker (A fűtő)* (1975), he lived from his writings. He belonged to the circle of writers grouped around the *Moving World (Mozgó Világ)* literary review. One of the most characteristic figures of the 1970s, he introduced a new narration technique. Despite his short life, he created a complete literary world. His works include two short novels: *Death Rode out of Persia (A halál kilovagolt Perzsiából)* (1979); *The Bride of Jesus (Jézus menyasszonya)*, (1981), and *Short Novels and Other Writings (Kisregények és más írások)* (1993). – B: 0883, 0878, 1257, T: 7103.

**Hajós, Alfréd** (Guttman, Arnold) (Budapest, 1 February 1878 - Budapest, 12 November 1955) – Swimmer, architect. He was only 13 when he lost his father, who got drowned in the Danube. At age 18 he won a 100-meter free-style swimming competition in the cold water of the Zea Bay in Athens and, after a brief rest, also the 1,200-meter competition. Having scored these victories in swimming, he did not take part in any more competitions, but his many-sided talent was demonstrated by his participation in the first official football match in Hungary, and played also in the first select team against the Austrians. He did some boxing and took part in gymnastic competitions. After obtaining his Degree in Architecture at the University of Budapest, he worked in the engineering bureau of architect Ödön (Edmund) Lechner. In 1924 he designed a stadium plan, together with Dezső (Desider) Lauber. He designed a number of public buildings, among them the *Arany Bika (Golden Bull) Hotel* in Debrecen. Well after retirement age, he worked in the *Mezőterv Design Office*. Hajós was the designer of the swimming pool on Margaret Island of Budapest, which is named after him. A shipping firm, a school in Budafok, and a swimmingpool in Budapest bear his name. – B: 1768, 0883, 1031, T: 7456. → **Lechner, Ödön.**

**Hajós, György** (George) (Budapest, 21 February 1912 - Budapest, 17 March 1972) – Mathematician. He completed his higher education at the University of Budapest in 1929. For a few years he taught in high schools; then, between 1935 and 1949, he lectured at the Polytechnic of Budapest as a demonstrator, then as an assistant professor. Subsequently, he became Head of the Department of Mathematics at the University of

Budapest. In 1948 he was elected a member of the Hungarian Academy of Sciences. In 1965 he became a member of the Romanian Academy of Sciences and, in 1967, of the German Academy of Sciences. His research field was many-sided. Hajós made significant advances in the geometric theory of numbers, in the theory of groups, in discrete geometry, in the geometry of grid-points, in the theory of designing, in the grill-theory, in the Bolyai-Lobachevsky geometry, and in numerical analysis. His most important mathematical result is known as the Hajos-Minkowski Theorem. He was Editor-in-Chief of the journal, *Acta Mathematica Academiae Scientiarum Hungaricae*, in which he regularly published. His main work is *Differential Geometria* (1950); *Über einfache und mehrfache Bedeckung des n-dimensionalen Raumes mit einem Würfelgitter* (*Using simple and multiple coverage of the n-dimensional space with a cubic lattice*) (1941); *Introduction into Geometry (Bevezetés a geometriába)* (1960), in German (1969). He was twice a recipient of the Kossuth Prize (1951, 1962). A mathematic competition bears his name. – B: 0883, 1306, T: 7456.

**Hajós, Tamás** (Thomas) (Budapest, 1953 - ) – Poet, writer, translator of literary works and journalist. The Communist dictatorship did not allow him to attend secondary school, thus he completed high school through correspondence. Meanwhile he earned a living as a lathe operator, later as a laborer. After the publication of his poems in top literary magazines, he was appointed Librarian at the University Library, and then at the Széchenyi National Library in Budapest. After having emigrated to Canada (1977), Hajós once again worked as a lathe operator to support his further studies. Admitted to the University of Toronto in 1981, he obtained an English Specialist Degree and a Degree in Hungarian Literature (1985), followed by a Diploma in Marketing from Centennial College followed (1991). He fulfilled an important role in local Hungarian cultural life by founding and running the Hungarian Club of the University of Toronto (1981-1985), and organizing well over a hundred cultural events. A year later, he founded, and subsequently ran a publishing, printing and advertising business. Writing poems since early childhood, by 1967 he won a special literary poetry prize. This led to an introduction to the renowned poet László (Ladislav) Kálnoki, who would become his teacher and lifelong friend. Hajós entered into the literary world when the foremost literary review of the day, *Life and Literature (Élet és Irodalom)*, published nine of his poems at once in their 1 June 1974 Issue. The following year he was asked to translate poems for the anthology, *Modern Moldavian Poets – The Ballad of the Blue Snow (Mai Moldován Költők – A Kék Hó Balladája)*. He was a contributor to one of the editors and publishers of the literary journal, *Witness (Tanú)* (1978-1980). His book of poems, *In the Noose (Szárítókötélen)* was published in 1980 (American-Hungarian Writers' series). At the request of the Toronto Board of Education, he took part in the writing and editing of teachers' textbooks (1990-1992). Hajós edited a number of books, newspapers and periodicals, held poetry readings in Hungary, Canada and the USA, and his works have been published in different forums including print, radio and television. In English translation, his work has appeared in numerous publications, including *Writ 14*, (1982); *Crossroads: Anthology of Hungarian Canadian Authors* (1986), and *Blessed Harbours* (2002). – B: 0892, 1257, 7657, T: 7657. → **Canadian Hungarian Literature.** → **Kálnoky, László.**

**Halápy, Konstantin** (Szilárd Alápi) (Ungvár, now Uzhorod, Carpatho-Ukraine, 15 August 1698 - Privigye, now Prievidza, Slovakia, 8 January 1752) – Poet. He was born

into the lesser nobility in 1781, and he entered the Piarist Order. He taught at various places, including Debrecen and Privigye, Nyitra (now Nitra, Slovakia) and was named Principal of the Convent and Secondary School of Privigye. Later, he was named Provincial of the Piarist Order and was known by the above name in literary circles. He wrote numerous poems, odes, elegies, epigrams, enigmas, as well as educational and descriptive verses in Latin, including *Nessus indissolubilis Damonem and Pythiam* (1726), *Epigrammatum moralium liibri 6*, *Elegiarium unicus* (1747). – B: 1150, 1257, 1020, T: 7617.

**Halas, John** (Budapest, 1912 - London, 1995) – Scenario writer, animator. John Halas learned his craft under George Pál. He launched his career in 1934 and, two years later, moved to England, where he continued his cinematographic career with British Animated Films in London. Later, he and his wife, Joy Batchelor, founded the Halas-Batchelor Films. It became one of the most significant producers of cartoon films at that time. Their most famous feature was *Animal Farm* (1954), based on the novel by George Orwell. It was the first full-length animated film made in Great Britain. They made some 47 works, including *Owl and the Pussycat* (1952); *The Christmas Visitor* (1959); *Automania 2000* (1963); *The Three Musketeers* (1974), and *Dilemma*, (1981). – B: 1041, T: 7103.

**Halas Lace** (*Halasi csipke*) – Lace making is an ancient craft. It was introduced into the northern regions of Hungary (now Slovakia) by German miner families, settling there in

the 16th century, escaping religious persecution in their homeland. Gradually, this craft spread all over the Kingdom of Hungary. At first, the nobles in manor houses used lace as braids. Regions famous for lace making, apart from Upper Hungary, are: Mezőkövesd, Transylvania (*Erdély*, now in Romania), and first and foremost, Kiskunhalas, the home of the famous Halas Lace. Lacemaking in the farming town of Kiskunhalas started with Árpád Dékány (1861-1931), teacher and folk artist, who created his first lace design in 1902. His successors, Mária Markovits, Ernő (Ernest) Stepanek and Béla Tóth, developed the original design with folk

motives. The new lace was worked with only a needle and thread over a paper pattern. Their technique was wholly original. The unusual combination of weaving, and the traditional techniques of needle-lace gave this lace its unique feature. Early Halas lace even incorporated color into the designs, which included doilies, fans and border lace. Over the decades, the lace evolved and, by 1935, color was almost never seen. To keep their standard high and to help distinguish between the true Halas lace and copies, they incorporated a logo. Three fishes are now included in each piece of Halas lace. The fame of Halas lace continued to grow until World War II, when the Lace House (*Csipkeház*) and all its records and patterns were destroyed. The lace makers rebuilt it, and lace making was restored in Hungary. Among the great variety of motifs are butterflies, snowflakes, bell shapes, ribbons, and many more. Making of Halas lace is extremely time-consuming; its price per gram is equal to that of gold. The Halas lace was exhibited in Budapest, St Louis, Milan, London and Berlin World Exhibitions. It won the Grand Prix in Paris in 1937, ahead of the Brussels lace. There is a *Csipkeház* (*Lace House*)

Museum in Kiskunhalas. The Halas Lace Foundation was established by the local government of Halas that has also founded the Halas Lace Center, which coordinates the lace makers working in Hungary, supporting them and organizing biennial exhibitions – B: 1031, 1138, 1380, T: 7103.

**Halasy-Nagy, József** (Joseph) (Ercsi, 2 May 1885 - Hajdúszoboszló, 6 May 1976) – Philosopher. He received his Ph.D. in Philosophy from the University of Budapest in 1907, and began his career by teaching at the High School in Kiskunhalas. His first writings on literature appeared at this time in the journal *Communications on Literary History* (*Irodalom-történelmi Közlemények*). On Alexander Bernat's request, he translated Pascal's *Thoughts* (*Gondolatok*), and published it in 1912, with explanatory notes and comments. He also worked on *Taine*. In 1916 he became an honorary lecturer (*privatdozent*) with the thesis, *History of French Philosophy in Modern Times* (*A francia filozófia története az újkorban*). Between 1919 and 1924, he taught in Budapest and Pécs. From 1940 he held a faculty position at the Department of Philosophy, and was Dean of the Faculty of Arts from 1941 to 1942, at the University of Szeged. He was also on the editorial boards of the Athenaeum and Pannonia Publishers. His views incorporate various philosophical directions, from positivism to neo-kantianism. His interpretations of moral ethics reflect an idealist world-view. His works include *History of Philosophy* (*A filozófia története*) (1912, 1927); *Foundations of Ethics* (*Az ethika alapvonalai*) (1925); *Modern Thinking* (*A modern gondolkodás*) (1927); *Philosophy of Antiquity* (*Az antik filozófia*) (1934); *The Metaphysics of Aristotle* (*Aristoteles metafizikája*) (1936); *Man and his World* (*Az ember és világa*) (1940); *The History of the Beginnings of Political Science* (*A politikai tudományok kezdetei*) (1942); *The Spiritual Life of Man* (*Az ember lelki élete*) (1943), and *The Philosophy* (*A filozófia*), 1944. – B: 0883, 1257, T: 7667. → **Alexander, Bernát**.

**Halassy, Olivér vitéz** (Budapest, 31 July 1909 - Budapest 10 September 1946) – Swimmer, water-polo player. He completed his secondary education in Budapest; as a school boy he had an accident while traveling on a tram, and his left leg became crippled. Yet he turned to sport, became a swimming and water-polo member of the Újpest Gymnastic Club, and in 1931, he was a member of the water-polo playing and championship-winning team in the European Championships in Paris (1931), Magdeburg (1934), and London (1938). In the Olympic Games of Amsterdam (1928), he won second place, while in the Los Angeles Games of 1932, and in the Berlin Olympics of 1936, he was a member of the gold-medal winning water-polo team. Between 1926 and 1938, he gained excellent results in several events in free-style swimming. In 1931, in Paris, he became European Champion in the 1,500-meter free-style swimming. He won National Championships in river swimming on eleven occasions. As a member of the University of Budapest's sportsman team, he was 5 times in the select free-swimming team, and 91 times in the select water-polo team. In 1946, he lost his life in a robbery incident. The sports center of Újpest (northern suburb of Budapest) is named after him. – B: 1768, 0883, 1031, T: 7456.

**Halász, Albert** (Felsőlakos, now Gornji Lakoš, Slovenia, 2 February 1969 - ) – Poet, essayist, journalist. His secondary studies were in Lendva (now Lendava, Slovenia). He studied Hungarian Literature and Ethnography at the University of Budapest, where he acquired a Ph.D. in 1999. Between 1994 and 1997, he was journalist at the weekly,

*Peoples' Newspaper (Népújság)* in Lendva. In 1997 and 1998, he was a free enterpriser, publisher. Since 1998, he has been the Hungarian program director of the Slovenian TV. Among his writings are *Smile-Crumbles (Mosolymorzsák)* poems (1991); *The Press and Ethnography of Alsólendva 1889-1919 (Az alsólendvai sajtó és a néprajz 1889-1919)* (1994); *Icons (Ikonok)* poems (1996), and *Eminent Days, Folk Festivals in the River Mura Region (Jeles napok, népi ünnepek a Muravidéken)* (1999). – B: 0878, 1169, 1257, T: 7103.

**Halász, János** (John) (Zenta, Hungary, now Senta, Serbia, 27 April 1885 - New York, N.Y. 18 February 1976) – Physician. He attended school in Montenegro. He studied Medicine from 1913 at the Medical School of the University of Budapest. During World War I, he voluntarily enlisted in the army and served there from 1915 to 1919. Among other distinguished medals, the *Signum Laudis* was conferred upon him. From 1922, he worked at his birthplace as a physician, now under Serbian rule. When, in 1939, a part of Voivodina was returned to Hungary, he worked in Újvidék (now Novi-Sad, Serbia). He relentlessly fought for the health of the poor agricultural workers. Finally, the Hungarian Parliament enacted the “Peasant Law”, also called “Halász Law” in 1941. He became Chief Director of the *Institute of National Social Insurance (Országos Társadalombiztosítási Intézet – OTI)*. From 1944, he was again in the army. He moved to the USA in 1951 from Germany, and worked as physician in various hospitals. In New York, he set up a Hungarian Library and was involved in Hungarology research. He retired in 1962. His over 10,000-volume library became the core of the János Halász Library in Toronto, Canada. – B: 1037, T: 7103.

**Halász, József** (Joseph) (Szeged, 5 April 1945 - ) – Lawyer, politician. His higher studies were at the University of Szeged, where he studied Law, Mathematics and Auditing, obtaining a Degree in each, and a Doctoral Degree in Law. In addition, he earned a diploma in Systems Administration. He was a university professor for 17 years, and taught post-graduate courses in logic, leadership theory, systems theory and auditing. He wrote several editions of lecture notes. Among these, one entitled, *Programming Logic*, is still circulating among the students. He worked in professional appointments and in middle-management as well. He went on early retirement. Since then, he is engaged in political theorizing, insisting on the uniqueness and restoration of the Hungarian Holy Crown Doctrine. He also writes about the dangers that befell Hungary by joining the European Union. He founded the *Shield Alliance (Pajzs-szövetség)*, and edits the *Eunyet* electronic website, lecturing and writing articles and essays. He wrote a book entitled, *Love or Hate (Szeretet vagy gyűlölet)*. He calls himself “The Humble Servant of the Holy Crown”. – B: 2000, T: 7103. → **Holy Crown Doctrine; Crown, Doctrine of the Holy Crown.**

**Halász, Judit** (Judith) (Budapest, 7 October 1942 - ) – Actress. Her higher studies were at the Academy of Dramatic Art, Budapest (1960-1964). From 1964-1965 she worked at the National Theater (*Nemzeti Színház*) of Pécs. From 1965, she has been a member of the Comedy Theater (*Vígszínház*), Budapest. She is a versatile actress with some forty theater, film and TV roles to her credit. She created a new genre of singing poems of classical poets. Her theater roles include Estella in Krudy's *The Red Mail Carriage (A vörös postakocsi)*; Egérke in Örkény's *Cat's Play (Macskajáték)*; Mrs. Husheby in G. B. Shaw's *Heartbreak House (Megtört szívek háza)*; Lady Capulet in Shakespeare's *Romeo*

and *Juliet (Romeo és Júlia)*, and Emma in H. Pinter's *Betrayal (Árulás)*. Some of her film roles are *Singing Bird (Énekes madár)* (TV, 1966); *The Bear (A medve)* (TV, 1970); *The Pendragon Legend (A Pendragon-legenda)* (1974), and *On the Last Summer (Az utolsó nyáron)* (1990). She also made many recordings. She is a recipient of many awards and prizes, among them the Mari Jászai Prize (1971) the Merited Artist title (1983), the Smile Prize (1987), the Kossuth Prize (2001), Member of the Society of Immortals (2003), the Officer's Cross of Order of Merit of the Republic of Hungary (2007), the Prima Primiissima Prize (2008), Pro Urbe Budapest Prize (2010), and My Country Prize (2011). – B: 0874, 1105, 1445, T: 7103. → **Presser, Gábor**.

**Halász, Pál** (Paul) (Budapest, 29 August 1880 - Budapest, 27 July 1949) – Mechanical engineer. He invented the compressed-air mortar during World War I. It was soundless, therefore difficult to locate. – B: 0883, 1020, T: 7662.

**Halász, Zoltán** (Budapest, 31 December, 1914 - ) – Writer, journalist, art historian. He obtained a Law Degree at the University of Budapest (1938). He worked at the *General Credit Bank (Általános Hitelbank)*, Budapest, and was journalist at the *Hungarian Journal (Magyar Hírlap)*. During World War II, he served intermittently in the army. From 1945 he worked at the *Hungarian News Agency (Magyar Távirati Iroda)*, and was its reporter in Rome, Italy (1947). Between 1947 and 1949 he was a contributor at the Hungarian Radio. From 1950 to 1955, he was unemployed and earned his living as a translator. Between 1960 and 1989, he was Editor of the periodical, *Hungarian Quarterly*. From 1993, he was Editor of the *Encyclopaedia Britannica Hungarica*. His fields of interest are archeology, urban history, even gastronomy. He has done much for the proliferation of Hungarian culture abroad. His works include *Discovery of Budapest (Budapest felfedezése)* (1959); *Across Canada (Keresztül-kasul Kanadán)* (1975); *Hortobágy and its Environs (Hortobágy és környéke)* (1990), and *Gastronomic Adventures in Europe (Gasztronómiai kalandozások Európában)* (1997). – B: 1257, T: 7103.

**Halina Cloth** – A thick white, rough felt-type cloth made of strong sheep's wool. It is used to make outerwear and *halina* boots for the herdsmen of Upper Hungary (Upland, *Felvidék*, now Slovakia), the *Hungarian Steppe (Alföld)* and, to some extent, for those of Transdanubia (*Dunántúl*) in County Veszprém. – B: 0942, 1138, 1153, T: 3240.

**Halmay, Zoltán** (Dubrava, now in Slovakia, 18 June 1881 - ? 20 May 1956) – Swimmer, all-round sportsman. He started working as a journalist; later he worked as a civil servant. Apart from swimming, he competed in speed skating, and became a champion; he also played ice hockey and football, proving himself to be the best in these fields as well. He learned swimming in the swimming pools of the Danube and always made good use of his height of 189 cm, and also his long arms. He won 13 Hungarian Championships, and won championship titles in Austria, Germany and England. He participated as an athlete in three Summer Olympic Games: in Paris in 1924, he won two silver medals and one bronze medal. In 1904, in St. Louis, following Alfred Hajós' example, he won two Olympic Championships. In the London Games in 1908, he acted as team captain, helping his team members in every way. He became the famous all-round sportsman of the first decade of the 20th century. As a result of concentrating on his fellow sportsmen, neglecting himself, he only gained second place in the 100-meter sprint swimming and could not secure a winning position in the 4x200-meter sprint relay race in swimming.

His swimming career became a fiasco. He was elected to be a member of the Swimming Hall of Fame. – B: 1768, 0883, 1031; T: 7456.→**Hajós, Alfréd.**

**Halmi, Artur** Lajos (Louis) (Pest 1886 - New York, USA, 1939) – Painter. He learned his profession in Vienna and Munich. He went to Paris with a Munkácsy scholarship. Between 1894 and 1910, he lived in Munich and worked as a sketch artist at the newspaper, *Jugend*. In 1910 he moved to New York. He was quite popular in the United States for his magnificent portraits. His paintings include *Little Girl Before the Mirror (Kislány a tükör előtt)* and the *Old Woman and Flowers (Öregasszony és virágok)*. He exhibited in 1922 and in 1931. He was a recipient of a number of awards, among them the Golden Medal at Antwerp (1894), and Golden Prix Budapest (1896). – B: 0872, 0934, T: 7103.

**Halmi, Róbert Sr.** (Budapest, 22 January 1924 - ) – Producer, author, photojournalist. Son of a playwright mother, and a father, who was the official photographer to the Vatican and the Habsburg Empire. His higher studies were at the University of Budapest. In 1944, he participated in the antifascist resistance movement in Hungary, was twice arrested, sentenced to death, but escaped and lived in Austria. In 1947 he was put on trial by the Communist Government of Hungary for blowing up bridges and was sentenced to death. With his father's help, he escaped with a camera and little else and, in Salzburg he chronicled his travails in a seven-part series, in the *Saturday Evening Post*, called *Trial by Terror*. In 1950, he emigrated to the USA, and started as a penniless immigrant. Borrowing from his father's legacy, he ultimately secured a position as a photographer at *Life* magazine in 1952. In 1962 he started to make document films for television, and became well-known in adventure photography, showing exotic sites and dangerous assignments. In 1979 he produced his first significant work, the film adaptation of Hemingway's *Old Man*. There are some 200 film and TV productions to his credit, including *Gypsy; The Odyssey; Moby Dick; Argonauts; Arabian Nights; Gulliver's Travels; Animal Farm; Lonesome Dove, Dinotopia Daniel Defoe's Robinson Crusoe*, and the *Arabian Knights*. He is owner of the Hallmark Entertainment Co. with some 200-million subscribers worldwide He is the most prolific producer in TV history, a multiple Emmy Awarded winner and was recipient of the Peabody Award in 1999. – B: 1037, 1081, T: 7456.

**Halmos, Paul** (Pál, Richard) (Budapest, 3 March 1916 - Los Gatos Calif., 2 October 2006) – Mathematician. His mother died early on, his father, a physician, emigrated to Chicago, USA in 1924, leaving behind three of his sons under a guardian. Paul joined his father in 1929. He attended high school in Chicago. At first, he studied Chemical Engineering at the University of Illinois; then, after one year, he changed to Mathematics and Philosophy. He earned a Ph.D. in Mathematics in 1938. In early 1939 he obtained a position at Reed College in Oregon. Almost simultaneously he was offered a scholarship at the Institute for Advanced Study in Princeton, which he accepted. A year later he became John von Neumann's assistant. In 1942 Halmos published his *Finite Dimensional Vector Spaces*, which was to bring him instant fame as an outstanding writer of mathematics. After leaving the Institute for Advanced Study, he was appointed to Syracuse University, New York. Here, he took part in teaching soldiers in the Army's Specialized Training Program. In 1946 he became an assistant professor at the University of Chicago. In 1961 he moved to the University of Michigan. In 1968-1969 he served for

one year as Chairman of the Mathematics Department of the University of Hawaii. At the end of that year, he accepted a professorship at Indiana University. He remained at Indiana until 1985, when he moved to Santa Clara. Halmos is known for both his outstanding contributions to operator theory, ergodic theory, functional analysis in Hilbert space, and for his series of exceptionally well-written textbooks. He authored more than 120 articles and 13 books, including *Finite Dimensional Vector Spaces* (1942); *Measure Theory* (1950); *Introduction to Hilbert Space and Theory of Spectral Multiplicity* (1951); *Lectures on Ergodic Theory* (1956); *Naive Set Theory* (1960); *Algebraic Logic* (1962); *A Hilbert Space Problem Book* (1967), and *Lectures on Boolean Algebras* (1974). Among his many prizes and award are the Chauvenet Prize (1948), the L.R. Ford Prize (1971, 1977), the György Pólya Prize (1983), and the Steele Prize (1983). He has been elected a Fellow of the Royal Society of Edinburgh. He has also been awarded an Honorary D.Sc from the University of St Andrews. – B: 0874, 1278, T: 7103. → **Neumann, John von.**

**Halom Clan** – One of the six Szekler clans of Transylvania (*Erdély*, now in Romania). The ancient Hungarian meaning of the word *halom* was “resigned to die” or “ready to die”. From this clan stem the György, Halom, Názán and Péter branches. A 19th century document also mentions the Gabud branch. – B: 1078, 1020, T: 7617.

**Hamar, István** (Stephen) (Kisszentmárton, 18 December 1867 - Budapest, 11 August 1933) – Minister of the Reformed Church, theologian, writer. He studied Theology at Budapest (1886-1890), and Edinburgh (1890-1891). He was an assistant minister in Budapest (1891-1893), and secretary of the bishop (1893-1896). He became an assistant, then Professor of Old Testament at the Reformed Theological Academy, Budapest, from 1897 till his retirement in 1931. He was the guardian of the Ráday Library and Archives, and President of the Calvinist Political Association (1905-1912). His articles and studies appeared at home and abroad in newspapers and periodicals. Some of his writings appeared in books, others in lithographed form, and some are still in manuscript. A selection of his works: *Book of Hosea (Hóseás könyve)* (1897); *Biblical Theology, vol .i, (Biblia theológia, I)* (1989); *Little Biblical Lexicon (Bibliai kislexikon)*, with J. Murányi (1910); *Book of Isiah, vols. i-xii, (Ésajás könyve I-XII)* (1917); *Book of Prophet Joel (Jóel próféta könyve)* (1928); *Book of Prophet Amos (Ámos próféta könyve)* (1932), and *Introduction to the Old Testament (Ótestamentumi bevezetéstán)* (1921, 1929), He was co-author of the Czeglédy-Hamar-Kállay: *Biblical Lexicon (Bibliai Lexikon)*. – B: 0910, T: 7103.

**Hammerl, László** (Ladislav) (Budapest, 15 February 1942 - ) – Marksman, coach. His higher studies were at the Semmelweis Medical School of the University of Budapest (1961-1968), and at the School of Physical Training, Budapest (1978-1982). He worked at the Ganz Electric Works, Budapest (1952-1956), and at the Hungarian Home Defense Alliance (*Magyar Honvédelmi Szövetség*) (1957-1968). He was a competitor in the Dózsa Sport Club Újpest (1969-1977). His best achievements were: Olympic Champion in Tokyo (1964), silver medalist at the Mexico Olympic Games (1968), triple bronze medalist in European Competitions, Captain of the National Team for 24 years. He is Sportsman of the Nation. – B: 0874, 1656, T: 7103.

**Hámos, László** (Ladislav) (Neully-sur-Seine, France, 22 June 1961 - ) – Human rights activist. In the USA, he founded the New York based Transylvanian Committee (*Erdélyi Bizottság*), and the Hungarian Human Right Foundation, HHRF (*Magyar Emberjogi*

*Alapítvány*) in 1975, has been its President since 1976. The Organization fights against deprivation of civil rights of Hungarians in the detached historical Hungarian territories in the Carpathian Basin, mainly in Transylvania. They valiantly fought against Ceausescu's oppressive and village-demolition politics in Transylvania. On 26 April 1988, Victor Orbán, then Hungarian Prime Minister, appointed him his foreign policy counselor. He regularly participates in negotiations of Hungarian ethnic issues, as he is a member of the *Hungarian Standing Conference (Magyar Állandó Értekezlet – MAERT)*. In order to successfully defend the human rights of Hungarians, they built significant contacts to the upper echelons of the US administration. – B: 1037, 1031, T: 7103.→**Systematization; Tőkés, László.**

**Hamvas, Béla** (pen-name Antal Pál) (Eperjes, now Presov, Slovakia, 23 March 1897 - Budapest, 7 November 1968) – Writer, philosopher. He participated in World War I; in 1919 his family was expelled from Pozsony (now Bratislava, Slovakia) by the Czechoslovak authorities. They settled in Budapest. His higher education was at the University of Budapest, where he acquired a Degree in Hungarian and German Literature. After a short stint as a journalist, he became a librarian at the *Capital City Library (Fővárosi Könyvtár)* (1927-1948). He lost his job for political reasons during Communist times and earned his living as a laborer. He wrote some of his most important works during this period, but his works remained unpublished. He was one of the founders of the periodical, *Island (Sziget)*, and of a spiritual workshop in 1936. His writings in the field of literature, esthetics, philosophy, psychology, sociology and science-theory appeared in various newspapers and periodicals. In his work, *Scientia Sacra*, (written in 1943, published in 1988), he dealt with the metaphysical orientation of archaic men, and men of Christian culture. In *Karneval* and *Patmos*, literature, history, culture-history, philosophy and metaphysics are intertwined. Especially in *Karneval*, esoteric themes, such as hermetism and magic are utilized. His philosophy was ignored by officials, and even György (George) Lukács criticized them. Others insist that his work might be an alternate Hungarian philosophy. His basic experience was the universal orientation and the transparent existence, which is the contradiction between the authentic existence and the modern world. There is a growing interest in his work in France and Russia. Some of his works are *World Crisis (Világválság)* (1938); *Spirit and Existence (Szellem és egzisztencia)* (1987); *Silentium-Secret Notebook, (Silentium-Titkos jegyzőkönyv)* (1987); *The Invisible Story (A láthatatlan történet)* (1943, 1988); *Thirty-three Essays by Béla Hamvas (Hamvas Béla 33 esszéje)* (1987), and *Scientia Sacra* (1988). He was awarded the Kossuth Prize posthumously (1991). There is a Hamvas Institute in Budapest. – B: 0883, 0878, 1028, 1257, T: 7103.→**Lukács, György.**

**Hamvas, Endre** (Andrew) (Piszke, 27 February 1887 - Kalocsa, 3 April 1970) – Archbishop of the Roman Catholic Church. He started his Theological studies in 1909, and earned a Doctorate at the *Pázmáneum*, Vienna. He was ordained in 1913, and worked as Parish Priest in Naszvad (now Nasvady, Slovakia). In 1916, he became the Chaplain of the *Notre Dame de Sion Institute*. From 1928, he taught Ethics at the Seminary of Esztergom. He had various positions and offices, and was consecrated Bishop of the Csanád Diocese in 1944. He protested against the German persecution of the Jews in Szeged. After the arrest of Archbishop Mindszenty in 1949, he became the Apostolic

Administrator of the Diocese of Esztergom, from 1951 to 1956. In 1954, he was appointed Archbishop of Kalocsa. Due to ill health, he resigned in 1968. Yet he was still able to participate in the negotiations between the Catholic Church and the Communist State. He also attended the Second Vatican Council in 1962-1965. He worked also with the state-supported *Opus Pacis*, and the Catholic Committee of the National Peace Council. One of his works is *The Vatican and the Action Française (Vatikán és az Action Française)* (1928), and he wrote a series of religious textbooks for junior high school students. – B: 0945, T: 7103.→**Mindszenty, József; Opus Pacis; Catholic Church in Hungary.**

**Hamvas, József** (Joseph) (Pozsony, now Bratislava, Slovakia, 5 August 1911 - Toronto, 2001) – Chemical engineer, virologist, actor. He was educated at the Royal Military Ludovika Academy and the Polytechnic of Budapest and graduated as a Chemical Engineer in 1942. He served in the Hungarian Army. After World War II, he was employed by the Hungarian Restitution Mission in Vienna. He moved to Salzburg in the late 1940s, and later emigrated to the United States, and worked as an interpreter with the US Air Force, then he moved to Edmonton, Canada, to work for an oil company. He then moved to Toronto, worked in the Ontario Department of Health as Head of the Electron Microscopy Laboratory of the virus section, where he introduced the electrophoretic analysis of serum and electron microscopic identification of viral infections. He served as Acting President of the Federation of Hungarian Engineers and Architects. He was the former executive secretary of the Hungarian-Canadian Engineers' Association. He was Secretary General of the Rákóczi Foundation (*Rákóczi Alap*). He established the Hungarian Research Institute of Canada and was the former producer of the Hungarian House Radio at CHIN. He also published scientific papers on the technical use of the electron microscope in virus research. In Toronto he was active among the Hungarian emigrees, and he appeared intermittently at the Art Theater (*Művész Színház*) led by Sándor (Alexander) Kertész. – B: 0893, 1445, T: 4342.→**Ludovika Royal Hungarian Military Academy.**

**Hamza, András** (Andrew) (Seregélyes, 5 April 1920 - Manville, NJ, USA, 20 October 1983) – Minister of the Reformed Church in the USA. He graduated from the Reformed Theological Academy of Budapest. While still a theology student, he founded and led the renowned *Kántus*, the men's choir of the Academy. After World War II, he became the editor of the most outspoken weekly paper, the *Independent Youth (Független Ifjúság)*. In 1947, when the Communist pressure began to build up, he was arrested by the Hungarian Secret Service (*Államvédelmi Hatóság – ÁVH*). After a year of humiliating treatment, he was granted temporary release. In 1948 he managed to escape to Switzerland, where he supported himself as a factory worker, while attending to the spiritual needs of the Hungarian refugees. He arrived in the United States in 1950. At first, he performed pulpit supply in Pittsburgh, Pennsylvania. Between 1951 and 1957, he served in Dayton, Ohio, where he was instrumental in building a new church. In the same year he received a call from the congregation of the 116th Avenue Hungarian Church in New York. Then, in 1961, he was appointed administrator of the famous Madison Avenue Presbyterian Church in New York City, while serving the Hungarian congregation. From 1975 until his death in 1983, he was Minister of the Manville, NJ. Hungarian Reformed Church. He enjoyed worldwide reputation both as a spiritual leader and as a preacher. For twenty years, he acted as official representative of the Presbyterian Church in America at

domestic and international conferences; at the Assembly of the World Conference of Churches in Uppsala; at the Conference of the World Alliance of Reformed Churches in Kolozsvár (now Cluj-Napoca, Romania); and several times in Hungary and the United States. He founded and led the only Hungarian choir in the State of New Jersey, the famed Kodály Choir. – B: 0906, T: 7617.→**State Security Police; Reformed Churches in America.**

**Hanák, Péter** (Kaposvár, 8 August 1921 - Budapest, 6 October 1997) – Historian. His higher studies were at the University of Budapest (1945) and at the University of Rome from (1947). From 1948, he worked at the University of Budapest in various positions; finally, as professor from 1980. Between 1949 and 1991, he worked in various positions at the History Institute of the Hungarian Academy of Science. From 1964 to 1966, he taught at the University of Economics, Budapest. He was also a professor at the Central European University, Budapest. His field of research was the position of Hungary in Europe, her relationship with the neighboring nations, and Hungary's history in the 19th century. His works include *Hungary in the Monarchy (Magyarország a Monarchiában)* study (1975), *The Danubian Patriotism of Oszkár Jászai (Jászai Oszkár dunai patriótizmusa)* (1985), and *European Regions in History (Európa régiói a történelemben)* (with J. Szücs, 1988). He was a recipient of the Anton Gindely Prize (1986), the Széchenyi Prize (1997), and the Ferenc Deák Prize (1997). He was member of the Hungarian Academy of Sciences (1990, 1995). – B: 1257, T: 7103.

**Hanák, Tibor** (Kalocsa, 9 September 1929 - Vienna, Austria, 14 November 1999) – Philosopher, writer. He graduated from the Jesuit High School in Kalocsa, but for political and family reasons, he was not allowed to matriculate. In 1949 he escaped from Hungary to Austria by hiding beneath a railway carriage. He read Philosophy and Literature at the University of Innsbruck, and taught at a high school in Innsbruck (1955-1959); thereafter, he moved to Vienna, where he started publishing. His writings appeared in the *New Horizon (Új látóhatár)*; *The Literary Journal (Irodalmi Újság)*; the *Catholic Review (Katolikus Szemle)*, and other newspapers in the West. From the 1960s he was the Austrian reporter for Radio Free Europe. His main field of interest was 20th century philosophy, especially that of Ludwig Wittgenstein, and the Marxist György (George) Lukács, also a Hungarian. He wrote two books on Lukács. Some of his other books are *Ideologies and Our Age (Ideológiák és korunk)* (1968); *The Marxist Philosophy and Sociology in Hungary (Die marxistische Philosophie und Sociologie in Ungarn)* (1976); *The Development of Marxist Philosophy (Die Entwicklung der marxistische Philosophie)* (1976); *The Forgotten Renaissance, the Marxist Philosophy in Hungary (Az elfelejtett reneszánsz, a marxista filozófia Magyarországon)* (1979); *Philosophical Criticism (Filozófiai kritika)* (1980); *The Indispensable Judgment (A nélkülözhetetlen bírálat)* (1990); *The History of Philosophy in Hungary (Geschichte der Philosophie in Ungarn)* (1990), and *With Open Eyes (Nytott szemmel)*, essays (1990). As a consequence of his severe illness in late 1991 he lost his consciousness never to regain it. – B: 0921, 1257, T: 7103.→**Lukács, György.**

**Hankiss, Ágnes** (Erdős) (Budapest, 7 March 1950 - ) – Writer, politician. She studied Clinical Psychology at the University of Budapest (1974-1985), was a free-lance writer (1985-1995), then advisor to the Alliance of Young Democrats Party (*Fiatalkor Demokraták Szövetsége – Fidesz*) (1994-1996), and Commissioner of the *Europalia Hungaria* (1989-

1999). From 2000 she was Director of the Petőfi Museum, then Chief Director of the Béla Hamvas Institute. At the same time, she was presidium member of the board of the Hungarian Radio Public Foundation (*Magyar Rádió Közalapítvány*) from 1966. From 1990 to 1994 she was a member of the Capital City Assembly (*Fővárosi Közgyűlés*). In 2009 she was elected European Union parliamentary representative of Fidesz, and she is in the fraction of European People Party (*Európai Néppárt*). A selection of her works: *Anatomy of Confidence*, (*A bizalom anatómiája*), essays (1978), *Rope Walking* (*Kötéltánc*), essays (1984), *Fundamentals of Social Psychology* (*Társadalom lélektani alapismeretek*), university textbook (1984), *A Sensitive Farewell to the Reigning Prince* (*Érzékeny búcsú a fejedelemtől*), film script (1985), *A Fine History* (*Szép história*), novel (1989), *Map of the Soul* (*A lélek térképe*), essays, prose (1992). She received For Literature of the Furure Prize (1988), and the Attila József Prize (1992). – B: 0874, 0878, 1257, T: 7103. → **Hamvas, Béla.**

**Hankiss, Elemér** (Elmer) (Debrecen, 4 May 1928 - ) – Sociologist, literary historian. He earned a Ph.D. in English and French Literatures at the University of Budapest in 1951. From 1965, he was co-worker at the Literary Science Institution of the Hungarian Academy of Sciences. From 1983, he was Department Head, later Director at the Sociological Research Institute (*Irodalomtudományi Intézet*) of the Hungarian Academy of Sciences, Budapest. Between 1990 and 1994, he was President of Hungarian Television. He also taught at the University of Budapest; at Stanford University (1992) and at Georgetown University in the USA (1993-1994). From 1999, he was Visiting Professor at the University of Florence, Italy. He was Vice President, then President of the Hungarian Sociological Society (*Magyar Szociológiai Társaság*) (1993, 1994). His field of research is related to the method of literature psychology and literature explanation. From the mid-1970s, his interest turned to sociology. His works include *Literature and Psychology* (*Irodalomtudomány és pszichológia*) (1970); *Value and Society* (*Érték és társadalom*) (1977); *East-European Alternatives* (*Kelet-európai alternatívák*) (1989), and *Abenteuer Menschheit* (*Adventure of Humanity*) (1999), *Fears and Symbols* (*Félelmek és szhímbólumok*) (2006). He is a recipient of the Szent Márton Prize (1999), the Széchenyi Prize (2006), the Prima Primissima Prize (2007), the For my Country Prize (2008), he is Honorary Freeman of Budapest (2006). – B: 0874, 0878, 1257, 1031, T: 7103.

**Hankiss, János** (John) (Budapest, 21 September 1893 - Budapest, 28 April, 1959) – Literary historian. His higher studies were done in Budapest and Paris and he obtained a Ph.D. in 1915. Thereafter, he was a teacher, reader and Honorary Professor of French Literature at the University of Debrecen. From 1923, he was Professor at the University of Debrecen. In the meantime, from 1943 to March 1944, he was Undersecretary at the Ministry of Education. From 1950, he was a sessional lecturer of French Literature, as well as Librarian at the University of Debrecen. He was the editor at a number of newspapers and magazines, such as the *Debrecen Review* (*Debreceni Szemle*); *Source* (*Forrás*); *Helicon*, and *Our Contemporaries* (*Kortársaink*). He organized the first International Literary Congress, Budapest (1931), and, for sixteen years, he was Head of the Summer University of Debrecen. His main field of research was comparative literary history, literary history, and music history. Under the pen names “János Fehér, Antal Fehérváry”, etc. he authored poems, short stories and literary translations. His works include *Panorama de la littérature hongroise contemporaine* with G. Juhász, (1930);

*Europe and Hungarian Literature from the Conquest (896) to the Compromise (1867)* (*Európa és a magyar irodalom a honfoglalástól a kiegyezésig*) (1943), and *La littérature et la vie* (1953). – B: 0883, 1257, T: 7103.

**Hankóczy, Jenő** (Eugen) (Pusztaszelyke, 24 February 1879 - Budapest, 2 March 1939) – Agricultural research scientist, an internationally recognized scholar in the field of wheat and flour quality. He studied at the Agricultural College of Magyaróvár (1899-1900), and assistant professor of Agronomy at the same institution from 1901. From 1904 he was a research associate at the National Agronomical Research Station (*Orsz. Növénytermelési Kísérleti Állomás*). He initiated there his research into wheat and flour quality. He invented the *farinometer* in 1905, out of which developed the *farinograph*, a flour-quality grading instrument in 1912. His method and his instrument were adopted all over the world. From 1924 he was Director of the National Institute of Chemistry (*Orsz. Kémiai Intézet*). In 1928 he established a Grain and Flour Experimental Station (*Gabona- és Liszt-kísérleti Állomás*), which operated under his direction. He initiated the Hungarian national cadastral survey of wheat and high quality wheat production. His work made possible the selection and production of the most suitable wheat varieties in Hungary after World War I. A Street in District II of Budapest bears his name. – B: 0883, 1436, 1020, T: 7662. → **Farinometer**.

**Hanság** – A low-lying area east-southeast of Lake Fertő in the northeastern corner of Transdanubia (*Dunántúl*). The area is about 400 km<sup>2</sup> and is characterized by wet meadows, a high water table and peat deposits. Its drier perimeters show traces of human population, dating from the Late Stone Age (6000 BC). According to the Chronicles of Anonymus, the early Magyars settled here at around 980. One of the tribal leaders, Solt, settled the Kangars in this area to provide protection against invaders from the West. The draining of this area was started in the 18th century with the establishment of the Hanság Channel. To conserve the character of the early swamplands, the Hanság Land Conservation Area was established in 1976. – B: 1150, 0942, 1153, T: 7656. → **Anonymus**.

**Hanva Clan** – A Hungarian clan, dating from the Carpathian settlement period, 896 AD, supposedly a branch of the Hont-Pázmány clan, whose ancient seat was Hanva (now in Slovakia). In 1200, Count Zsigmond Hunth acquired the villages of Hanva, Szekláros, Visnyó, Répás and Fillér in County Gömör. In 1253 his son signed himself Venceslaus Hunth de Hanva. He is the direct ancestor of the family Hanvay de Hanva at Gömörszékáros. – B:1078, 1020, T: 7617.

**Harangozó, Gyula** (Julius) (Budapest, 19 April 1906 - Budapest, 30 October, 1976) – Dancer, choreographer, ballet master, ballet director. While still a student, he began as an extra at the Opera House and, by 1936, performed in most productions. His first choreography, the *Tragedy of Man* (*Az ember tragédiája*), was performed at the open-air festival of Szeged in 1935. His independent choreography is Huby's *Scenes in a Country Tavern* (*Scenes de la Csarda - Csárda jelenet*), which premiered at the Budapest Opera in 1936. He represented the first successful experiment with a ballet style of a distinctly Hungarian flavor. In 1937 he was appointed Ballet Master of the Opera, and in the same year and traveled to London on a study tour. Upon his return, and until 1942, he choreographed numerous single scene productions, such as Borodin's *Dances of Polovec* (*Poloveci táncok*); Milhaud's *Salad* (*Francia saláta*); Tchaikovsky's *Romeo and Juliet*

(*Romeó és Júlia*), and Bartók's *The Wooden Prince* (*A fából faragott királyfi*). Some of his works were performed in Florence, Milan and Berlin. In 1948-1949, he created F. Farkas's *Tricky Students* (*Furfangos diákok*); in 1951 Kenessey's *Kerchief* (*Keszkenő*); Delibes' *Coppelia* in 1953, and the new interpretation of Bartók's *The Miraculous Mandarin* (*A csodálatos mandarin*) in 1956, mark high points in his artistic development. Several of his works were filmed by Hungarian Television. During the 1950s, he was Director of Ballet at the Budapest Opera House, as well as President of the Hungarian Dancers' Association. He was one of the most prominent personalities of Hungarian ballet. He was recipient of the Kossuth Prize in 1956. – B: 0883, 1437, 1445, T: 7667.

**Harangozó, Imre** (Emeric) (Hungary, 1965 - ) – Ethnographer. He came from a peasant ancestry with firm Roman Catholic belief, and grew up in a Socialist system. He began his higher studies in 1985, and received a general teaching diploma in Debrecen, and also a diploma in 1994 in Békéscsaba to teach the Roman Catholic religion. In 2001 he received a degree, which allowed him to teach religion at the Department of Religious Studies of the Péter Pázmány Catholic University. The main focus of his writings is the sacral ethnography. Primarily, he has been preoccupied with the traditional world-view and belief-system of the Moldavian and Gyimes Magyars, but he also deals with the traditions and belief systems of the shepherds of the Great Plain (*Nagyalföld*), Hungary. In 1992, with his friends, he founded the Arnold Ipolyi People's Academy (*Ipolyi Arnold Népfőiskola*), of which he is the President. His other social offices include President of the Advisory Board of the For Újkígyós Public Foundation (*Az Újkígyósért Közalap Kuratóriuma*); Vice-President of the Lifetree Cultural Foundation (*Életfa Kulúrális Alapítvány*), and presidential member of the Lakatos Demeter Society of the Moldavian Csángó-Magyars (*Moldovai Magyarok Lakatos Demeter Szövetsége*). At the same time, he is a member of the *Hungarian Ethnographic Society* (*Magyar Néprajzi Társaság*), the *Association of Christian Intellectuals* (*Keresztény Értelmiségiek Szövetsége*), and the *Association of Catholic Hungarian Journalists* (*Magyar Katolikus Újságírók Szövetsége*). Imre Harangozó's ethnographic research has been published in 12 books, including *Shining Star of Radna...* (*Radna fényes csillaga...*) (1990); *Data to the Study of Folk Cultivation* (*Adalékok a népi műveltség vizsgálatához*) (1995); *There, Where Hungarians Once Lived...* (*Ott hul éltek vala magyarok...*) (2001); *The Center of the Village* (*A falu közepe*) (2004), and *Prayers from Etelköz* (*Etelközi fohászok*), with Réka Kővári (2005). His articles and studies were published in different papers and journals. He received the Sebestyén Gyula prize from the Hungarian Ethnographical Society in 2003. – B: 1935, T: 7690, 7103.

**Haraszthy, Ágoston** (Augustine) (Futkak, now Futag, Serbia, 30 August 1812 - Corinto, Nicaragua, 22 July 1869) – World traveler, entrepreneur and viticulturalist. He came from an old untitled noble family. He became fluent in the German, French and English. He was destined for a career in law. He read a lot about America and his fascination with it led him to venture a journey there with two new American friends. He set out for America on 27 March 1840, settled in Wisconsin and, in 1842, took part in the founding of Haraszthyville, Wisconsin, now Westville. He was invited by President Tyler to a reception, where he appeared in Hungarian attire. On his return to Hungary he published a work, *Travels in North America*, in two volumes, in 1844, which enjoyed great interest, containing an account of his journey across the ocean, settling in the USA and his ensuing work. He soon sold his estate in Temesvár (now Timișoara, Romania). In 1849,

he and his family of ten traveled to America and settled in San Diego, California, where he conducted various business activities (was ship owner on the River Mississippi, log-merchant, and fought with the Apache Indians), gained a good reputation, and subsequently was elected sheriff in San Diego, and alderman and politician in 1852. Later, he bought 65 hectares of land in the Sonoma Valley, in which he planted grape vines of Tokay and Zinfandel vine-plants, brought from Hungary. His articles and book on California grapes and wines created much interest. As a result of his work, viticulture was established and gathered momentum in the region. Today, he is regarded as the founder of viticulture in America and the father of California wine. In 1854, the President of the United States named Haraszthy a Controller of the mint and gold refining works. The following year, he became the Manager of the gold refinery. In 1857, he moved to Buena Vista. He was the first one in California to dig out a 30-meter long cellar in the mountainside, to keep his wines at a uniform temperature throughout the year. He recognized that the local redwood lumber was very well suited for making wine caskets. Later, he gave up his vineyards, and in 1866 moved to Nicaragua. First he bought a sugar cane plantation and set up a rum distillery. Later on, while building a sawmill he fell into a river and lost his life. It was believed an alligator killed him. On the 100th anniversary of his death, the United States Government held an exhibition and commemoration in his memory and also named Tokay the post office of Lodi, California. In 1961, the Senate of California acknowledged his services. In San Diego, in the centre of Balboa Park, there is a bronze plaque with his portrait in front of the local Hungarian House. – B: 0883, 1105, T: 7680, 7103.

**Haraszti, György** (George) (Budapest, 7 January 1912 - Budapest, 26 November 1980) – International lawyer. After completing his legal studies at the University of Budapest, he passed the examinations to qualify as a solicitor and judge in 1938. However, he was not called to the Bar; instead, he had to work as a forced laborer. Only after World War II was he able to practice as a lawyer; in 1948 he worked in the Ministry of Industry, and later he was in charge of the Department of International Law at the Ministry of Foreign Affairs. In 1950 he was set-aside on made-up charges. In 1952 he joined the International Law Section of the Faculty of Law at the University of Budapest. He became a professor in that section in 1962. He specialized in the legal practice of the International Court of Justice at The Hague, and also in legal aspects of the International Conventions, consular law and cosmic law. He was a member of the Institute of the International Law and of the Council of Cosmic Law of the United Nations Organization. He edited the serial *Questions of International Law* (vol. i, 1960; vol. ii, 1981), an important work in international law literature in Hungary. His works include *The Practice of the International Court of Justice: 1946-1956 (A nemzetközi bíróság joggyakorlata: 1946-1956)* (1958); *Some Fundamental Problems of the Law of Treaties* (1973), and *International Law (Nemzetközi jog)*, textbook with co-authors (1976, 1989), and he translated the work of Hugo Grotius entitled the *Law of War and Peace, vols. i-iii*, with R. Brósz, Gy. Diószdi, (1960). – B: 0883, 1031, T: 7456.

**Haraszti, Sándor** (Alexander) (Soltvadkert, 2 March 1920 - Atlanta, GA, USA, 16 January 1998) – Surgeon, Baptist pastor. He studied at the Teachers' Training Academy, Budapest (1943), then at the Baptist Seminary, Budapest (1944), after that at the Department of Philosophy of the University of Budapest (1944). He studied Medicine at the University of Lausanne, Switzerland in 1949, and completed it at the Semmelweis

University, Budapest. After the crushed Revolution and Freedom Fight of 1956, he left Hungary and moved to the USA. In 1957-1958, he worked in the Baptist hospitals in Missouri State and in St Louis hospitals. In 1958 he was a colleague of Albert Schweitzer at Lambarene, Gabon, Africa. He conducted research work in Georgia (1959-1960). In 1960 and 1961, he worked at the Clinic of Emory University, Atlanta, Georgia, USA. Afterwards, he was Chief Physicist of the Veteran Hospital of Atlanta. He was Secretary of the Hungarian Baptists in America. He was a colleague of evangelist Billy Graham, and accompanied him on his evangelizing tours to Russia, Hungary and Romania. In Romania, as translator for Billy Graham, he did not support Graham's stand in the case of Hungarian minority in Transylvania and the resistance of Rev. László (Ladislav) Tóké against Ceausescu's oppressive policy. Some of his works are *Trials of Faith in Marriage and Outside of Marriage (Hitpróbák házasságban és házasságon kívül)* (1965), and *I Was Not Disobedient (Nem voltam engedetlen)* (1997). – B: 1037, T: 7103.→ **Tóké, László; Holy Crown of Hungary, return of.**

**Hargita Mountain Range** (Transylvania, *Erdély*, now in Romania) – A mountain range of some importance within the southeastern bend of the Carpathian Mountain Range. It is 136 km long and 30 km wide. Its highest peak is the Madarasi-Hargita (1801 m). Its central mountains are quite rugged and uninhabited, densely covered by oak, beech, spruce, pine and true fir forests on their lower slopes, while the peaks provide alpine panorama. Its eastern slopes provide catchment basins for the Maros and Olt Rivers. Sulfurous gas and mineral springs are common on the perimeters of the mountain range. The Hargita Mountains, highly revered by the Szeklers, supplied materials for the famous Szekler carvings, thereby giving a special folklore character to this area. – B: 1130, 0942, T: 7656.→**Szeklers.**

**Hargitay, Mariska Magdolina** (Los Angeles, 23 January 1964 - ) – American actress, whose mother was Jayne Mansfield and her father was the Hungarian Mickey Hargitay, though the Italian-American cabaret performer Nelson Sardell claims to be her biological father. She learnt her father's native language, Hungarian, but she also speaks fluent French and Italian. She graduated in 1987 from the UCLA School of Theater, Film and Television, majoring in theater. She married the actor, Peter Hermann, on 28 August 2004. She began her acting career by appearing on the TV series, *Falcon Crest*, in 1987. She was widely known in her recurring role in the TV series, *ER*, as Dr. Greene's (Anthony Edwards) girlfriend, Cynthia Hooper, during the 1997-1998 season. Since 1999, she has starred as the detective, Olivia Benson, in *Law and Order: Special Victims Unit*. In 2005, she lent her voice to the video game, *True Crime: New York City*. In 2006, she won an Emmy Award for Outstanding Lead Actress for her role in the drama series, *Law and Order: Special Victims Unit*. In 2005, she was named by *People* magazine as one of the 50 most beautiful people. Her roles include *Ghoulies* (1985); *Seinfeld* (TV, 1993); *The Advocate's Devil* (TV, 1997), and *Plain Truth* (TV, 2004). – B: 1031; T: 7456.→**Hargitay, Mickey.**

**Hargitay, Mickey** (Miklós, Nicholas) (Budapest, 6 January 1926 - ) – Actor. He left his native Budapest, and emigrated to the USA at the beginning of the 1950s. He started as an adagio dancer, and also had his own construction company. He was interested in bodybuilding, and in 1955, he won the Mr. Universe title. Then he commenced an acting career. He joined the Mae West stage show, where he met Jane Mansfield. They married

in 1958. The same year he made his motion picture debut in *Slaughter on Tenth Avenue*. They made three films together but divorced in 1964. His subsequent roles were mainly in Italian productions. He remarried in 1973, and became successful in real estate. His daughter, Mariska Hargitay is a film-actress. Some of his remarkable feature films are: *Mr. Universe* (1988); *Deliria caldo* (1972); *Lady Frankenstein* (1971); *The Wild, Wild World of Jane Mansfield* (1968); *Bloody Pit of Horror* (1965); *Revenge of the Gladiators* (1961), and *The Loves of Hercules* (1960). – B: 1037, T: 7103.→**Hargitay, Mariska Magdolina.**

**Harmat, Artur** (Nyitrabajna, now Bojná, Slovakia, 27 June 1885 - Budapest, 20 April 1962) – Conductor, composer. He studied at the Ferenc (Franz) Liszt Music Academy in Budapest. For a while, he worked in Nyitra (now Nitra, Slovakia), then, from 1912, in Budapest. He taught music and was a school inspector for music education. From 1921 to 1927 he was Director of the Palestrina Mixed Choir; from 1922 to 1926, he taught at the Higher Music School, Budapest; from 1922 to 1938, he was conductor at the Inner-City main parish church. Together with Viktor Karvaly, he developed a new music curriculum for high schools, and revised the elementary music texts of Pongrác Kacsóh. From 1924 to 1960 he taught Gregorian Chant, Liturgical Music and Counterpoint at the Academy of Music, Budapest. In 1926 he established the Faculty of Sacred Music at the Academy of Music. He was the conductor at the Szent István Basilica in Budapest. His work include *Masses and Motetes (De profundis, Tantum ergo, etc.)*; *Folk Music Works*; *Song to Saint Margaret (Ének szent Margithoz)*; Secular Choir Compositions, such as *Mother of Mátyás* (text by János Arany). He compiled with Sándor (Alexander) Sík the new hymn collection *Thou Art Holy my Lord! (Szent vagy Uram!)* (1931) and the *Cantus Cantorum* with Alajos (Aloysius) Werner. His textbook is *Counterpoint, vols. i, ii (Ellenpont tan I, II)* (1947, 1958). A Choir and the Central Cantor Training School in Budapest bear his name. – B: 0883, 1031, T: 7667.→**Kacsóh, Pongrác; Sík, Sándor.**

**Harmati, Béla** (Ősagárd, 23 April 1936 - ) – Bishop of the Lutheran Church, theologian. He studied at his place of birth, and continued it in Csepel, Vác and Szentendre. His secondary education took place in the Fásor Lutheran (Evangelical) High School (1950-1952), and in the Attila József High School, Budapest (1953-1954). He studied Theology at the Lutheran Theological Academy, Budapest (1954-1959). With a scholarship from the World Council of Churches, he pursued postgraduate studies in Ecumenics, Systematic Theology, Philosophy and Sociology at the Ecumenical Institute of Bossey, at the University of Zürich (1966-1967), and at the University of Heidelberg, Germany (1970). He obtained a Doctoral Degree in Theology at the Evangelical Theological Academy, Budapest in 1980. The Protestant Theological Institute, Kolozsvár (now Cluj-Napoca, Romania) granted him an Honorary Doctorate in 1985. He was ordained in 1959, and served as an assistant pastor in Veszprém, Balassagyarmat, Rudabánya, Budapest-Fásor and Budapest-Józsefváros (1959-1966). He worked as an assistant of the Theological Department of the Lutheran World Federation, Geneva, (1967-1970). Between 1970 and 1973, he was the Foreign Secretary of the Evangelical-Lutheran Church in Hungary, and concurrently lecturer at the Lutheran Theological Academy, where he was Professor of Systematic Theology (1973-1976). In 1976 he was called to be the Pastor of the Budapest-Deák Square Congregation. Between 1980 and 1987, he occupied the Chair of the Sociological Department of the Lutheran World Federation, Geneva. In 1987, he was elected Bishop of the South District of his Church, its President

Bishop from 1990, and President of the Ecumenical Council of Hungarian Churches (1992-1998); President of the Hungarian Bible Council from 1991; a presidium member of the Christian-Jewish Society (1991), its Co-President in 1993; Co-President of the Dialogue Committee of the Lutheran World Federation and the Roman Catholic Church. He retired in 2002. He authored and edited many studies, essays and books in Hungarian, German and English, including *Christian Ethics and Property*; *Christliche Ethik und die Frage des Eigentums* (1982); *Church and Nation Building*; *The Role of Churches in Nation Building* (ed), (1983), *The Church and Civil Religion in the Nordic Countries of Europe* (ed) (1984); *Ordnung und Praxis Kirchlicher Amtshandlungen* (ed) (1984); *Christian Ethics, Property and Poverty* (ed) 1985); *The Church and Civil Religion in Asia* (ed), (1986); *A Lutheránus Világszövetség tanulmányi programja a "civil religion" kutatásról* (*The Program of the Studies of the Lutheran World Council on the Research of "Civil Religion"*), study (1989); and *Protestantizmus és nemzeti azonosságtudat* (*Protestantism and National Identity Consciousness*), study (1997). – B: 0910, T: 7103.→**Evangelical Lutheran Church in Hungary.**

**Harmatta, János** (John) (Hódmezővásárhely, 2 October 1917 - Budapest, 20 July 2004) – Classical philologist, linguist. In 1940 he completed his Arts course, majoring in Greek, Latin and Hungarian at the University of Budapest. During World War II, he did military service, and consequently was taken prisoner of war. From 1945-1948, he worked as a demonstrator in the Department of Latin Philology of the University of Budapest, where later he became Professor of Greek Philology (1948-1952). In 1952 he became qualified to lecture in Linguistics; and in 1957 he obtained a Ph.D. in Linguistics. From 1952 to 1987 he was Professor and Head of the Department of Indo-European Linguistics, and Head of the Department of Classical Studies at the same University from 1966 to 1987. In 1978 he was also Professor at the *Scuola Normale Superiore Università di Pisa*, *Accademia Nazionale dei Lincei*. His scientific research extended from Finno-Ugrian linguistics through Classical Studies to Orientalistics, the latter including Iranistics and Indology. In the field of Hungarian words of Iranian origin, he carried out exploration and systematizing a work of fundamental importance. He was a member of the Hungarian Academy of Sciences (correspondent, 1970, ordinary, 1979). He was also a member of academies, and a member of scientific societies in Hungary and abroad. His more important works include *Quellenstudien zu den Skythika des Herodot* (1941); *Le problème cimmérien* (1946-1948); *Studies in the History and Language of the Sarmatians* (1970), and *History of Civilizations of Central Asia vol. ii: The Development of Sedentary and Nomadic Civilizations: 700 BC to 250 AD*, editor and author (1993). He was a recipient of the Academy's Prize (1965), the Herder Prize (1973), the Széchenyi Prize (1990) and the Academy's Gold Medal (2003). – B: 0874, 1031, 1257, 1944, T: 7456.→**Ritoók, Zsigmond.**

**Harmonia Coelestis** – A compendium with the full title of *Harmonia Coelestis seu maelodiae Musicae per decursum totius anni adhibendae ad usum musicorum* (*Harmony of Heaven, or Music Tunes Imitated, a Collection of Scarce and Much Esteemed Anthems*), completed around 1700 by Prince Pál (Paul) Esterházy (1635-1713) and published in Vienna in 1711. Prince Esterházy had obviously studied the new development of the cantata and oratorio style in Venice and Vienna and used what he had learned about form and technique in his short "concertos". This collection contains fifty-five one-movement compositions for solo voices, choir and orchestra, with the use of rich

and often surprising combinations (violas, violone, harp, bassoon, theorba, violins, flutes, trumpets, organ, timpani). There are orchestral preludes and interludes in some of them (under the name of *sonata* and *ritornella*), and the treatment of instruments in general shows a relatively high technique and a good sense of coloring. The role of the choir is, for the most part, limited to homophonic ensembles. Solo voices, on the other hand, are given a varied role (*Ascendit Deus, Saule, quid me persequeris*). Some of these compositions consist of simple, strophic songs (*Ave maris stella*), others of the alternation of solo voices (*canto precinente*) and *ripieno chorus* (*Sol recedit igneus, Veni sancte spiritus*). Melody and harmony of Viennese, South German and Venetian masters have of course left their marks on these compositions; but their special importance consists in the fact that we can find Hungarian popular motives in many places and, in two pieces (*Jesu dulcedo cordium, Cur fles Jesu*), even the adaptations of Hungarian chorals. This collection is an unparalleled example of ancient Hungarian music. It is the first and also the last attempt to create, with the help of contemporary European technique, a Hungarian style in church music. – B: 0833, 1138, 1371, T: 1371, 7103. → **Esterházy, Prince Pál.**

**Háromszék** – A distinct area in the southeastern part of the land of the Szeklers in Transylvania (*Erdély*, now in Romania). It is located at the junction of the Olt and the Feketeügy Rivers. In the past, it had its own administration and judiciary. The Szeklers occupied this area at the beginning of the 13th century. The three early settlements are known as Kézdiszék, Orbaiszék and Sepsiszék. In the 16th and 17th centuries, they united as the currently known Háromszék. The northern area, due to its Roman Catholic population, is known as “*Szentföld*” (Holyland) and the southern flatland, formed by the junction of the Olt and Feketeügy Rivers, is known as “*Szépmező*”. The significant settlements here are Kézdivásárhely (now Targu Secuiesc), and Sepsiszentgyörgy (now Sfântu Gheorge). During the 1848-1849 War of Independence the whole population of this land joined the anti-Habsburg forces and, under the leadership of General Bem, liberated the whole area of Transylvania (*Erdély*) and, near the end of the war, mounted a significant opposition to the numerically superior invading Russian Army. Their legendary artillery genius was Áron (Aaron) Gábor. In 1876 they formed a separate county under the name of Háromszék. Together with Northern Transylvania, Háromszék was returned to Hungary by the Vienna Award II (1940), and it was again part of Hungary between 1940 and 1944. – B: 1134, 1138, T: 7656. → **Gábor, Áron.**

**Harsányi, András** (Andrew) (Sárospatak and Kisharsány) (Budapest, 1 August 1914 - Hopatcong, NJ, USA, 10 March 1996) – Bishop of the Reformed Church in America, writer. Son of the renowned Hungarian novelist, Zsolt Harsányi. He inherited his father’s love of literature as well as history, in which he received a Ph.D. from the University of Budapest. His love of the humanities notwithstanding, he chose to enroll at the Faculty of Reformed Theology at the University of Debrecen. He continued his studies at German and English universities. He employed his versatility not only in the service of his Church, but also in that of Hungarian culture. He worked for a while at the National Széchényi Library of Budapest. During the difficult times, before the end of World War II, he served as Press Secretary for the Prime Minister’s Office. At Easter 1945, he was forced to leave Hungary. For several years, under the auspices of the Refugee Board of the World Council of Churches, he organized and led the Hungarian Reformed and Evangelical Lutheran Missionary Service in Austria. He emigrated to the USA in 1950.

In the beginning, he served among English-speaking congregations. Then, in 1957, he received a call to serve the Carteret, New Jersey Hungarian Reformed congregation, where he preached both in Hungarian and English. From 1982 on, he served the Hungarian congregation of Washington, DC. Between 1966 and 1983, he was Dean of the Eastern Diocese of the Hungarian Reformed Church of America, and from 1986 until his retirement in 1993, he was its Bishop. As a representative of his Church, he took part in the Catholic-Presbyterian Council, as co-chairman, and was leader of the Presbyterian Reformed delegation on three occasions (1972-1988). He authored a number of articles, essays and books, including *The Dominican Order in Hungary before the Reformation (A Domonkos Rend Magyarországon a Reformáció előtt)* (1938, reprinted in 2001). He was made a member of the Hospitaller Order of St John of Jerusalem in 1956, and became its Commander in 1986. – B: 0906, T: 7617.→**Harsányi, Zsolt, Reformed Churches in Amercia; Knights of Hospitaller.**

**Harsányi, István** (Stephen) (County Baranya, 1630 - after 1678) – Minister of the Reformed Church. He was one of the outstanding Protestant preachers, who suffered galley-slavery during the persecution of Protestants in Hungary. He studied in Debrecen, and later at foreign universities. Upon his return from abroad, he became a minister at Rimaszombat (now Rimská Sobota, Slovakia). On 18 February 1674, he was summoned to appear before the Roman Catholic *Delegatum Judicium* in Pozsony, where he was sentenced to death and all his goods and chattels confiscated. After suffering imprisonment in Pozsony (now Bratislava, Slovakia), and Lipótvár, the Government in Austria, as a show of clemency, sold him, together with 40 Protestant ministers, to the galleys in Naples, Italy. After regaining his freedom, he journeyed in the company of his remaining 25 fellow ministers to Switzerland in 1676. After a period of lengthy wanderings, he returned to his native land and resumed his service at the church in Rimaszombat. Only one of his literary works survived. – B: 0883, 1931, T: 7617.→**Galley Slave Hungarian Preachers; "Decade of Mourning"; Reformed Church in Hungary.**

**Harsányi, János** (John C.) (Budapest, 29 May 1920 - Berkeley, CA, USA, 9 August 2000) – Economist. He attended the renowned Lutheran (Evangelical) High School in Budapest, and won first prize in mathematics in Hungary in 1937. He studied Pharmacology. When German Army units occupied Hungary on 19 March 1944, he, as a Jew, had to serve in a forced labor unit from May to November 1944. His unit was to be transported to Austria, destined for a concentration camp. He, however, escaped and found refuge in the cellar of a Jesuit monastery in Budapest. In 1946 he re-enrolled at the University of Budapest and earned a Ph.D. in 1947. Because of the worsening political situation, he, with his fiancée, escaped to Austria in 1950, and, in the same year, they emigrated to Australia. He worked as a factory worker for three years and studied Economics at the University of Sydney. In 1954 he was appointed a lecturer of Sociology at the University of Queensland, Brisbane. In 1956, he was awarded a Rockefeller Fellowship at Stanford University. In 1958 he returned to Australia, where he got a research position at the Australian National University in Canberra. His field of research was game theories and utilitarian ethics. The Armament Control Office of the USA invited him to join a team of American experts in game theory, to devise a plan in preparation for negotiations with the Soviets on armament control (1964-1970). He created a theory of how to convert a game with incomplete information into a complete

game but imperfect information, so as to make it accessible to a game theoretic analysis. For this work he received the Nobel Prize in 1994. In 1961, he settled in the USA and worked at Wayne University, Detroit (1961-1963). From 1964 to 1990 he was a professor at the University of California, Berkeley. He wrote the following books: *Essays on Ethics, Social Behaviors and Scientific Explanations* (1976); *Rational Behavior and Bargaining Equilibrium in Games and Social Situations* (1977); *Papers in Game Theory* (1982); *A General Theory of Equilibrium Selection in Games, with R. Selten* (1988), and *L'utilitarismo (Utilitarianism)*, translation (1988). He was a member of the National Academy of Sciences USA. He was a recipient of an Honorary Doctorate of Northwest University. A College in Budapest bears his name. – B: 1063, T: 7103.

**Harsányi, Zsolt** (Korompa, now Krompacky, Slovakia, 27 January, 1887 - Budapest, 29 November, 1943) – Writer, journalist and literary translator. He graduated in 1904 from the Reformed College of Sárospatak. He wrote his final examination in Hungarian Literature on an assigned topic, in verse form. He attended the University of Kolozsvár (now Cluj-Napoca, Romania) where, with Sándor (Alexander) Incze he founded a theatrical journal, the *Theater Life (Színházi Élet)*, which was transferred to Budapest in 1912. He worked for several daily papers, translated numerous operetta lyrics and wrote many one-act plays. His light-hearted popular song verses were known all over the country. He became widely known for the Hungarian libretti he wrote for the Imre (Emmerich) Kálmán and Ferenc (Franz) Lehár operettas. Besides these, he translated numerous English, French and German plays. He wrote original plays as well; among them the most famous were, *Musical Clock (Zenélő Óra)* and *Mad Madame Ásvay (Bolond Ásvayné)*. One of his outstanding creations was the libretto for the folk opera, *Háry János*, by Zoltán Kodály. He made his mark on the international literary scene with novels, which were translated into nearly 20 languages. These novels, many of them over 1000 pages long, were largely fictional biographies of writers, artists and historical personalities. His works include *The Golden Raven (Az Aranyholló)* novel (1925); *The Comet (Az üstökös)* novel (1932); *Ecce homo*, novel (1935); *Mathias rex*, novel (1937). One, the *Golden Apple (Aranyalma)* is on a mythological theme. His two great social dramas are: *Magdolna* and *Whisky with Soda (Whisky Szódával)*. The latter can be considered the swan song of pre-World War II Hungarian society. A selection from his vast output of short stories was published under the title *Cigarette at Dawn (Hajnali Cigaretta)*. For years, he served as president of the Hungarian Playwrights' Association and was supportive of young writers. – B: 0883, 1257, 1438, T: 7617. → **Kálmán, Imre; Lehár, Ferenc; Kodály, Zoltán.**

**Hársing, László** (Ladislás) (Nemesdéd, 17 September 1930 - ) – Philosopher. He studied at the Catholic Theological Seminary at Csorna and Veszprém (1949-1952); attended the Academy of Pedagogy at Eger (1952-1954), the University of Szeged (1954-1955), and the University of Budapest (1962-1964). Between 1955 and 1956, he was a teacher at the public school in Belezna. Between 1956 and 1958 he was Principal of the public school at Murakeresztúr, and School Supervisor between 1958 and 1961. From 1961 to 1966 he was an assistant professor, later adjunct professor at the Budapest Polytechnic; and, from 1966-1971, he was an adjunct professor at the Department of Philosophy of the University of Budapest, and later Professor (1971-1977). Between 1977 and 1982 he was chief contributor, then advisor of the Philosophical Institute of the Hungarian Academy of Sciences. From 1982 he was Professor at the University of Miskolc and, between 1985

and 1993, Department Head of Philosophy. He was a scientific candidate for Philosophy in 1968, and obtained his Ph.D. in 1978. His major works include *Logic of Scientific Reasoning (A tudományos érvelés logikája)* (1982); *Scientific Research and Morals (Tudományos kutatás és erkölcs)* (1983); *Ages and Ideas, vols. i,ii. (Korok és eszmények, I-II)* (1987); *Introduction to Ethics (Bevezetés az Etikába)* (1990); *Economy and Morals (Gazdaság és erkölcs)* (1992); *Introduction to the Theory of Science (Bevezetés a Tudomány elméletébe)* (1996), and *European Ethical Thinking (Az európai etikai gondolkodás)* (2001). – B: 0874, 1031, T: 7684.

**Hartvik Legend** – A legend in Latin, compiled from the larger and lesser legends of King István I (St Stephen, 997-1038), by Hartvik, Bishop of Győr. It was commissioned by King Kálmán (Coloman) (1095-1116) for the occasion of the canonization of King István I. It is a compilation of the so-called “Major and Lesser” legends and is an obviously tendentious work. The 12th century manuscript copy was preserved in a Codex in Frankfurt, Germany. The Hungarian National Museum acquired it in 1914. – B: 0942, 1078, 1020, T: 7617.→**István I, King; Kálmán, King.**

**Határ, Győző** (Victor) (family name Victor Hatar) (Gyoma, 3 November 1914 - London 27 November 2006) – Writer, poet, philosopher. His higher studies were at the Department of Architecture of Budapest Polytechnic, where he obtained a Degree in Architecture (1938). His first philosophical writing: *Dangerous Rotation Number (Veszélyes fordulatszám)* was confiscated in 1938. In 1943 he was court martialed for high treason for his novel-cycle *Country of Miracles, Far-East Eurasia (Csodák országa, hátsó Eurázia)*, sentenced to death; but this was commuted by appeal for a 12-year prison term. He took part in the antifascist uprising as a convict in Sátoraljaújhely in 1944. He published again from 1945, but soon he met confrontation with the new Stalinist regime and was expelled from the Hungarian Writers’ Union (*Magyar Írószövetség*), in 1949. For attempting an illegal border crossing he was sentenced to two-and-a-half years in prison. Later on, he worked as an architect and translator of literary works. In 1956, after the Revolution, he had to flee Hungary, and from 1957 he has been living in London, where he was co-worker of the Hungarian Department of the BBC. His major works include poems, such as *Liturgikon* (1948); *Hair Bridge, vols. i-ii (Hajszálhíd, I-II)* (1970); *Bear Purring (Medve dorombolás)* (1988); *Glass Casket (Üvegkoporsó)* (1992), and *Medaillon Madonna* (1997). He wrote novels, such as the *Anibel Trilogy* (1954), in Hungarian (1984); *Pepito et Pepita* (1966), in Hungarian *Pepita és Pepita* (1983), and *The Important Man (A fontos ember)* (1990). His plays include *Golgheloghi, i-ix* (1976). His philosophical studies are *Pantarbesz* (1966); *Cosmic Unconcern (Kozmikus Érdektelenség)* (1980); *Aeolien Harp, vols. i-ii (Szélfárfa, I-II)* (1982-1983); *Literature History (Irodalom történet)* (1991), and *Gy.H.’s Path, vols. i-iii (H.Gy. életútja, I-III)*, autobiography (1993). His literary output is 20 novels, 40 plays and a dozen philosophical writings and essays. Although he lives abroad, he professes himself to be a Hungarian writer. He is a member of the Széchenyi Academy of Literature and Art (1993); an honorary member of the Hungarian Academy of Arts and Sciences (1995); and Honorary Doctor of the University of Miskolc (1989). He is a recipient of the Kossuth Prize (1990), the Csokonai Prize (1991), the Salvatore Quasimodo Prize (1996) and the Sándor Márai Prize (2001). – B: 0874, 0878, 1257, T: 7103.

**Határőrvidék**→**Border Patrol Territories.**

**Hatos, Stefan** (Aurora, USA, 20 August 1920 - Lakeside Golf Club in Toluca Lake, Cal., USA, 1999) – Television producer; was born of Hungarian parents. His father was an iron peddler by trade. He began playing the piano and oboe in childhood and, while attending college on a music scholarship, he played oboe and English horn with the Detroit Civic Symphony Orchestra. To work his way through school, he played saxophone in dance bands. His career started when he became staff announcer at a Detroit radio station, and later on the NBC radio network. However, he was always more interested in writing and production than in performing. While an announcer, he wrote episodes of *The Lone Ranger* (1940), *The Green Hornet*, and a psycho-thriller, the *Hermit's Cave*. He served 37 months as a Commanding Officer in World War II, was wounded twice. After the War he joined an advertising agency and, in 1949, moved into television and created and produced one of the first night-time game shows on the first interconnected network of 17 TV stations on ABC-TV. The name of the show was *Fun for the Money*. He produced numerous radio and TV shows and became famous for *Let's Make a Deal* with Monty Hall, which had its debut in 1963, and had been running for over 4,600 shows. – B: 1031; T: 7456.

**Hatvani, István** (Stephen) (Rimaszombat, now Rimavská Sobotá, Slovakia, 21 November 1718 - Debrecen, 19 November 1786) – Mathematician, physicist, naturalist and polymath. His father was a master-bookbinder. His earlier education was at Rimaszombat, Losonc (now Lucanec, Slovakia) and Kecskemét; in 1737 he was appointed *praeceptor* (teacher) in Révkomárom. In 1738 he enrolled in the Reformed College in Debrecen but, because of the bubonic plague, only in 1741 did he become a gowned student. In 1746 he continued his studies in Basel, Switzerland, obtaining his Medical Degree in 1748. He was invited to the Universities of Heidelberg and Magdeburg in Germany, and Leiden, Holland; but in 1749, having been invited to the Reformed College of Debrecen, he took the Chair of the Department of Philosophy and Mathematics there. Besides lecturing on the History of Philosophy, he also taught Cosmology, General and Special Physics, Experimental Physics, Botany, Medical Physiology, Geography, Hydrostatics, Mechanics, Astronomy, Ethics and Natural Law. In 1750 he was the first in Hungary to teach Chemistry. As a physicist he recognized the significance of experiments in teaching Physics. Probably because of his electrostatic experiments, he developed the reputation of being “possessed by the devil”, forming legends around his figure. Besides teaching, he also did healing. He was the supervisor of the pharmacies of Bihar and Debrecen counties. He was in communication with a wide circle of scholars abroad. His works include *Introductio ad principia philosophiae...* (*Introduction to the Principles of Philosophy...*) (1757), and *Thermae Varadiensis examini physico and medico* (*Physical and Medical Examination of the Thermal-waters of Nagyvárad*) (now Oradea, Romania) (1777). – B: 0883, 1257, T: 7456 → **Debrecen, Reformed College of.**

**Hatvany, Lajos** (Louis) (Deutsch till 1897, Hatvany-Deutsch till 1917) (Budapest, 27 October 1880 - Budapest, 12 January 1961) – Writer, critic, literary historian. He was born into a wealthy family. His higher studies were at the University of Budapest, where he was under the influence of Pál (Paul) Gyulai. He earned a Ph.D. in Philosophy in 1905. With Pál (Paul) Ignatusz and Miksa (Maximilian) Fenyő, he was the founder of the influential literary review, the *West* (*Nyugat*) in 1908. He befriended the poet Endre (Andrew) Ady and was one of the first supporters of Ady's poetry. In 1911 he went to

Germany for an extended period. From 1917 to 1919 he was Editor of the *Pest Diary* (*Pesti Napló*), and from 1918 to 1919 of the journal, *Year* (*Eszkendő*). After having been a member of the National Council of the 1918 Revolution, he emigrated to Vienna in 1919. He lived there and in Berlin till 1927, when he returned home. During his time abroad he wrote against the Horthy system and consequently was sentenced to one-and-a-half year in imprisonment; but received an amnesty. His radical writings appeared in the Social Democrat press. He again left Hungary in 1938 for Paris, and returned to Hungary in 1947. He supported young writers and dedicated his life to Hungarian Literature. One of his friends was Thomas Mann. Apart from his critiques and literary history writings, among his works is the volume, entitled, *Thus Lived Petőfi* (*Így élt Petőfi*) (1955-1957). Some of his other books and plays are *Die Wissenschaft des nicht Wissenwerte* (1908); *The Twilight of Pál Gyulai* (*Gyulai Pál estéje*) (1910); *Das verwundete Land* (1921); *Speaking Houses* (*Beszélő Házak*) ed. (1957), and *Five Decades* (*Öt évtized*) (1961). He was a corresponding member of the Hungarian Academy of Sciences (1960) and recipient of the Kossuth Prize (1959). – B: 0883, 1257, T: 7103. → **Gyulai, Pál; Ady, Endre; Ignótz, Pál; Fenyő, Miksa.**

**Hauk, Lajos** (Louis) (1799-1850) – An Austrian freedom fighter, Lieutenant Colonel in the Hungarian National Defense Army; and a leader in the 1848 March and October uprisings in Vienna. After the defeat of the October uprising, he followed General József Bem to Hungary. He participated in the Hungarian War of Independence against Austria, as an aide of General Bem and became the commander of Szászváros (now Saros pe Tarnave, Romania) and Versec, Hungary (now Vrsac, Serbia). The Austrian military court condemned him to death and he was executed in the Fort of Arad (now in Romania). – B: 1138, 1020, T: 3233. → **Bem, József.**

**Haumann, Péter** (Budapest, 17 May 1941 - ) – Actor. His higher studies were at the Academy of Dramatic Art, Budapest, completed in 1963. His career started at the Csokonai Theater (*Csokonai Színház*) in Debrecen, and continued from 1966 at the National Theater (*Nemzeti Színház*), Pécs; and at the following Budapest theatres: 25th Theater (*25. Színház*); Attila József Theater (*József Attila Színház*); Madách Theater (*Madách Színház*); National Theater (*Nemzeti Színház*); Arizóna Theater (*Arizóna Színház*); Radnóti Theater (*Radnóti Színház*) and, from 1994, József Katona Theater (*Katona József Színház*). His major roles on the stage include the title role in G. Büchner's *Woyzeck*; the title role in B. Brecht's *The Resistible Rise of Arturo Ui* (*Der aufhaltsame Aufstieg des Arturo Ui*; *Állítsátok meg Aturo Uit*); Benedetto in Shakespeare's *Much Ado About Nothing* (*Sok hűhó semmiért*); *Hamlet*; *Claudius*; Torquemada in Illés' *Spanish Isabella* (*Spanyol Izabella*); Miska in Kálmán's *The Gypsy Princess* (*Csárdáskirálynő*); Doolittle in Shaw's *Pygmalion*; Puzsér in Molnár's *Sir Doctor* (*Doktor úr*), and Figaro in Beaumarchais' *The Marriage of Figaro* (*Figaró házassága*). He had some 20 feature films to his credit, including *Black Diamonds* (*Fekete gyémántok*), *Old Times Cinema* (*Régi idők mozija*); TV films *Twilight* (*Szürkület*), *Richard III*, *Mr. Ficzek*, *Storm* (*Vihar*). He was also involved in stage management. He is one of the popular and leading character actors. He is a recipient of the Mari Jászai Prize (1970, 1972), the Merited Artist title (1980), the Kossuth Prize (1985), the Prize of Theater Critics (1997), He is a Member of the Society of Immortals (1977), and Actor of the Nation (2010). – B: 0874, 1105, 1445, T: 7103.

**Hauser, Arnold** (Temesvár, now Timișoara, Romania, 8 May 1892 - Budapest, 29 January 1978) – Philosopher, art historian and art sociologist. He studied French and German Literature at the University of Budapest in 1910; from 1921 he studied in Berlin. György (George) Lukács, Lajos (Louis) Fülep, Bernát (Bernard) Alexander, and Béla Balázs exercised influence upon him. During the Council (Soviet) Republic in 1919, he dealt with the reform of art education. From 1934 he lived in Vienna, then in England. He was a professor of History of Arts at the University of Leeds (1951-1957). He returned to Hungary in 1977. He wrote a book: *The Social History of Art*, published in London in 1951, which received international acclaim as the foundation of the sociology of art and was translated into many languages. Its original title is: *Sozialgeschichte der Kunst and Literatur, vols. i-ii (A művészet és az irodalom társadalomtörténete, I-II)* (1968-1969, 1980); *Philosophie der Kunstgeschichte* (1958), *Methoden moderner Kunstbetrachtung* (1974), *Mannerism: The Crisis of the Renaissance and the Origin of Modern Art, vols. i,ii* (1965). – B: 0883, 1028, 1257, T: 7103. → **Lukács, György; Fülep, Lajos; Alexander, Bernát; Balázs, Béla (1).**

**Hauszmann, Alajos** (Aloysius) (Buda, 9 June 1847 - Velence, County Fejér, 31 July 1926) – Architect. Commenced his higher studies at the Budapest Polytechnic and continued them at the Academy of Berlin from 1866. After returning to Hungary, he worked at Arnold Skalnitzky's office and, from 1872, he taught at the Budapest Polytechnic. Besides his teaching engagements, he was active in writing and in running a busy designer's office. Earlier, he designed buildings in modest Renaissance style; such buildings are the new extension of the Polytechnic, the St Stephen Hospital (*St István Kórház*), and the Museum of Industry (*Iparmúzeum*). Later, he leaned toward the Baroque style. Its proofs are the Justice Palace (*Igazságügyi Palota*), New-York Palace, and the completion of the Danube side of the Royal Castle (*Királyi vár dunai részlege*). He wrote a description of his major designs. – B: 0883, 1031, T: 7103.

**Havadtoy, Sam** (Havadtőy, Sámuel) (London, 4 August 1952 - ) – Painter, interior designer. He was born to Hungarian parents in London, but raised in Hungary. The family returned to Hungary in 1956, just before the outbreak of the Revolution. After the crushed Revolution it became difficult for the family to return to Britain. It took 14 years for Havadtőy to acquire British citizenship. Eventually in 1971 he fled Hungary through former Yugoslavia, back to the United Kingdom. On an invitation, Havadtőy moved to New York, but intermittently he lived for four years in Geneva, Switzerland, until 2000. In 1978 he founded Samuel Havadtőy Gallery, an interior designer gallery, where he worked until 1981. Havadtőy designed the homes of notable artists, such as John Lennon's and Keith Haring's last home. In 1981 Havadtőy turned to New York's artistic scene, where he became close friends with notable artists, such as Andy Warhol, Keith Haring, George Condo, Donald Baechler, Jasper Johns and Yoko Ono, with whom Havadtőy began a relationship, being her companion for over twenty years, until 2001. Havadtőy inspired and contributed to many of Keith Haring's late works.

Havadtoy started painting at a young age, just after moving to New York, and acquired his own eclectic style during the 1980s. He mainly uses oil, acrylic and mixed techniques for his paintings. Havadtőy's works reflect subtle blends of different cultures, mostly Central European and American pop culture. His exhibitions include Tel Aviv, Budapest, Rome and Milan.

In the late 1980s, when the Eastern block was in a state of dissolution, Havadtőy

travelled frequently to Hungary, and has residences in Budapest and Szentendre. In 1992 he founded Gallery 56, which became significant in the Hungarian contemporary art scene by exposing important artists who were considered rarities at the time. The gallery focuses mainly on displaying American modern artists; classics of Hungarian contemporary art are also represented. – B: 1031, T: 7103.

**Havadtóty, Sándor** (Alexander) (Kovászna, now Covasna, Transylvania (*Erdély*), now in Romania, 11 November 1924 - ) – Minister of the Reformed Church, theologian, writer in the USA. He attended high school in Kovászna and Sepsiszetgyörgy (now Covasna and Sfântu Gheorghe, Romania). He studied Theology and Philosophy in Kolozsvár (now Cluj-Napoca, Romania), and Theology in Budapest. Upon receiving scholarship from the World Council of Churches, he left for the University of Basel, Switzerland, where he studied under Karl Barth and Karl Jaspers and received a PhD in Theology in 1952. Unable to return to his homeland he went first to Canada, where he was a minister of Hungarian Reformed Churches in Mt. Brydges, Ont., then in Windsor, Ont., (1954-1960). He became Parish Minister in Fairfield, CT. USA, and he also served as Supervisor at Yale Divinity School, New Haven, CT. (1962-1986). He was a member of the Committee of Human Rights for Romania; Vice President of the Committee of Transylvania; Advisor of the State Department Commission on Human Rights; and a delegate to the Alliance of Reformed Churches in Seoul, South Korea and Budapest, Hungary. After 33 years, he retired from the pastorate of Calvin United Church of Christ, Fairfield, and became Professor of Philosophy at the Norwalk Community and Technical College, Norwalk, CT. As a staff member of Radio Free Europe from 1967, he preached regularly to the nations of Central Europe. He has been the editor of the *Reformed News*, the *Szekler People* (*Székely Nép*) and the *Carpathian Observer*. His publications include *Arbeit und Eigentum in den Schriften des Jungen Marx* (*Labor and Property in Writings of the Young Marx*) (1952); *Tentative Statement Concerning Eschatology* (1957); *Karl Barth: Between East and West* (1962); *On Being a Christian* (1963); *Preaching in the Reformed Tradition* (1984); *The Oppression of the Hungarian Reformed Church in Romania* (1986), and *Comfort my People* (*Vígasztaljátok népemet*), selected sermons (2001). He also authored several articles and essays in three languages. He is recipient of the Julianus Prize (2003). – B: 0914, T: 7103. → **Reformed Churches in America.**

**Háy, Gyula** (Julius) (Stefan Faber) (Abony, 5 May 1900 - Ascona, Switzerland, 7 May 1975) – Playwright, translator of literary works. Following high school graduation, he served at the Hungarian Council (Soviet) Republic's Commissariat for Public Education (*Tanács-köztársaság Közoktatásügyi Népbizottsága*) in 1919. After its fall, he emigrated to Germany, where he returned again in 1929, after a six-year stay in Hungary. His first stage successes occurred abroad; but the 1932 demonstrations by Hitler's supporters blocked further presentations of his play, *God, Emperor, Peasant* (*Isten, császár, paraszt*), in Berlin. On Hitler's rise to power, he emigrated to Austria but, due to his participation in the 1934 Socialist demonstrations, he was expelled and moved to the Soviet Union in 1935. In 1945, he returned to Hungary, where his plays, written in exile, were frequently performed. From 1955 to 1956, he belonged to the revisionist group of Imre Nagy. Mainly on account of his articles in the *Literary News* (*Irodalmi Újság*), he became the most vocal representative of the views and sentiments of opposition writers. He was imprisoned in 1957, released in 1960, but was allowed to publish only translations until 1964, when finally a collection of his new writings, *Royal Dramas*

(*Királydrámák*) was authorized to be released, although not performed. Finally, in 1964, he left Hungary and settled in Ascona, Switzerland, where he remained for the rest of his life. His plays in this period were published in the *Literary News (Irodalmi Újság)* and the *New Horizon (Új látóhatár)*, two Hungarian language periodicals, circulated in the West. Some of his works are *Scene: Budapest-Time: Ten Years Ago (Szinhely: Budapest-Idő: Tíz év előtt)* novel (1929); *Tisza Hole (Tiszazug)* play (1934-1936), premièred in 1945; *Night of Judgment (Itélet éjszakája)*, play (1943) pemièred in Berlin (1945); *Man's Word on the Stage (Emberi szó a színpadon)* studies (1947); *Dramas*, vols. i,ii. (*Dramen I-II*) (1951, 1953); *Bridge of Life (Az élet hídja)*,play (1951); *Destinies and Fights (Sorsok és harcok)* 7 plays (1955); *Mohács* (1958-1960); *The Horse (A ló)* (1960); Oxford première (1965); *Attila's Nights (Attila éjszakái)* (1961-1962); *Dramas*, vols. i, ii. (*Dramen I-I*) (1964-1966; *Born 1900 (Geboren 1900)*, memoires (1971, 1974). He translated works from A. Checkov, G. Hauptman, E.T.A. Hoffmann, and others. His works were translated into English, Russian and Italian. He was a recipient of the Kossuth Prize in 1951. – B: 0883, 0878, 1257, T: 7667.

**Haydn, Franz Joseph** (Rohrau, Lower Austria, 31 March 1732 - Vienna, Austria, 31 May 1809) – Composer. His ancestor Gaspar Haydn moved to Hainburg (Austria) from Tétény (Tadten, County Moson, formerly Hungary, east of Lake Fertő or Neussiedlersee) Born into a poor but musical family, he was in the Stephanskirche choir of Vienna as a young boy. After years of poverty in Vienna, he became private Kapellmeister for Austrian magnates. In 1761, Prince Pál Antal (Paul Antony), the famous patron of arts, then most importantly Miklós I (Nicholaus) Esterházy employed him as Kapellmeister of his orchestra at his palace at Kismarton (now Eisenstadt, Austria) and also at his other palace at Eszterháza, (now called Fertőd, in Hungary, south of Lake Fertő), where he worked for thirty years, until 1790. He was expected to provide music for the Prince's daily ceremonies and weekly concerts; and he ran an opera theater; he did all the hiring, training and caring for the orchestral and vocal musicians, he performed his own music as conductor, violinist and pianist. In these two quiet countryside estates of the Prince, he composed prodigiously: 104 symphonies, 82 string quartets, 15 piano concertos, 52 piano sonatas, 21 operas, four oratorios and 14 instrumental masses. His two trips to London (1790-1792 and 1794-1795) mark the climax of his career, with his compositions admired in musical circles everywhere in Europe. It was for the London impresario, Johann Peter Salomon, that Haydn composed his last twelve, so-called Salomon, symphonies and his two great oratorios, *The Creation (Die Schöpfung, Teremtés)* (1798) and *The Seasons (Die Jahreszeiten, Évszakok)* (1801), which were received enthusiastically in Vienna and made him the most celebrated classical composer. Another late work of his is *Gotterhalte*, which became first the national anthem of Austria, and later that of Germany. In the field of symphonic and chamber music, he opened up new paths that made him immortal, the classical instrumental music after him, taken up by Mozart, Beethoven and Schubert. Joyfulness and good sense of humor pervade his work, also a delight in nature and a deep religious feeling. His musical themes are melodious and lively, structured around motives in sonata form. His marriage was miserably unhappy, but he lived comfortably in financial security, with remuneration from Prince Esterházy even after 1790, when Haydn lived in Vienna and also enjoyed fame in the musical world. He met the young Mozart and they became great friends, mutually admiring each other's compositions. Because of his long stay in Hungary, occasionally he

used Hungarian musical themes, as in Piano Trio No. 39 in E-major, also known as the “Gypsy Trio” after the movement *Rondo all’ ongarese*; as well, the *Ungarischer Nationalmarsch* for wind band in E-flat major (*Hungarian National March*). In the concert hall of the palace at Eszterháza (*Fertőd*), there are annual chamber music concerts; there is also a memorial plaque on the wall of the building. The palace chapel of the Esterházy family houses a mausoleum in his honor, while his palace at Kismarton (*Eisenstadt*) is now a Museum. – B: 1068, 1197, 1138, 1153, 7456; T: 7684, 7456.→ **Esterházy, Prince Miklós József.**

**Haynald, Lajos** (Louis) (Szécsény, 3 October 1816 - Kalocsa, 4 July 1891) – Archbishop and Cardinal of the Roman Catholic Church. He was ordained in 1839. He was Professor of Theology at the Seminary of Esztergom (1842-1846). In 1848, as the secretary of the Primate, he did not allow the announcement of the Declaration of Independence and the decrees of the Szemere Government. Therefore, the Kossuth Government dismissed him from office in June 1849. The Primate later restored him to his office. He became Bishop of Transylvania (*Erdély*, now in Romania), in 1852. Later, he urged the restoration of the laws of 1848, and the union of Transylvania and Hungary. In 1861, after having condemned the absolute rule of the Government of Vienna, he was forced again to resign. Between 1863 and 1867, he worked in Rome. In 1867 he became the Archbishop of Kalocsa and a member of the Upper House of Parliament. In 1879 the Pope created him Cardinal and he was very active in creating a number of foundations. As a herbalist, he was generous to scientists involved in flora researches. He donated his huge herbarium and library to the Hungarian National Museum, which possesses Europe’s third largest botanical library. A number of plants bear his name. He was a member of the Hungarian Academy of Sciences. – B: 0883, 1173, 1020, T: 7103.

**Haynau, Baron Julius Freiherr von** (Kassel, Germany, 14 October 1786 - Vienna, 14 March 1853) – Austrian military officer. After studying in Marburg, he entered the Austrian army in 1801. In 1809 he was promoted to *Hauptmann* (Captain). In 1813 he was promoted to Major, and transferred to the German legion, where he saw service in Northern Italy. Following Napoleon's return from exile, his battalion entered France. After the second Peace of Paris, his promotions continued to *Oberstleutnant* (Lieutenant Colonel), then to *Oberst* (Colonel) in 1830. Five years later, he was promoted to Major General and assigned as a Brigade Commander in Italy. In 1844 he was promoted to *Feldmarschalleutnant*. (Lieutenant General). The next year, he was made *Obertstinthaber* (Colonel General). In 1847, he was transferred to Temesvár (now Timișoara, Romania). During the Revolutions of 1848-1849, he proved to be loyal to the Emperor. He was appointed Commander of Verona and, at the Battle of Custoza, he played a decisive role. His most significant and remembered action was at the city of Brescia. The revolutionaries in this Italian city had massacred invalid Austrian soldiers in the local hospital and, in response to this atrocity Haynau executed 12 men in April 1849. This incident soon became known worldwide and von Haynau was called the “Hyena of Brescia”. Shortly afterward, he was promoted to *Feldzeugmeister* (General of the Artillery) and he subsequently was given supreme command over the Imperial Army in Hungary, which he led against the Hungarian Army and won some minor victories, in July 1849. Following the capitulation of the Hungarian Army not to him but to the Russian General Rudrigger at Temesvár (now Timișoara, Romania), in his vengeance, he ordered the execution of 13 of the highest ranking Hungarian army officers at the Castle

of Arad (now in Romania) and at Pest and imprisoned thousands of other officers. After his campaign in Hungary he soon retired to Graz. He died in Vienna. He received numerous orders and decorations during his career including the Commanders Cross of the Military, Maria Theresia Order (1849), Grand Cross of the Military Maria Theresia Order (1850), the Grand Cross of the Order of Saint Stephen and the Imperial Russian Saint Andreas Order. – B: 0942, 1230, 1138, 1153, 1145, T: 7103.→**Arad, Martyrs of.**

**Haystack** (*boglya*) – One of the most important elements in fodder farming, *boglya* (stack) is a familiar word throughout Hungarian-speaking territories. There are different types of stacks: (1) The propped stack is a small heap of hay easily transported on two wooden poles by two men, (2) The cartload of hay is about ten times larger. (3) A winter stack is for a longer period of time, constructed with a round base holding about 5 to 10 cartloads of hay or straw. It has a propped variation in Transylvania (*Erdély* now in Romania), in Upper Hungary (*Felvidék* now in Slovakia) and in Western Transdanubia (*Dunántúl*). Here, the hay or straw is stacked around a center pole. The haystacks look like inverted pears, as they are much larger at the top; hay stacking needs a lot of expertise, especially to shape this top. The finished haystack is secured with poles and twisted cords of hay. – B:1134, 1020, T: 3240.

**Hazai, György** (George) (Budapest, 30 April 1932 - ) – Turkologist, literary historian, linguist, translator of literary works. His higher studies were at the University of Budapest, where he studied Turkology and Archaeology (1954). From 1956 to 1957 he taught at the University of Sofia, Bulgaria. From 1967 he was a researcher at the Hungarian Academy of Sciences. From 1963 to 1982, he was a visiting professor at the Humboldt University of Berlin. From 1982 he was a counselor at the Orientalist Workshop of the Hungarian Academy of Sciences. Between 1984 and 1990 he was the manager of the Academy Publishing House and Press. From 1992 he was Professor of Turkology at the University of Nicosia, Cyprus. He is the editor of a number of Orientalist and Turkologist periodicals and is member of related societies. He is a member of the European Academy since 1990. His field of research is Osman-Turkish language development, Hungarian-Turkish language relationship during the Turkish occupation of Hungary (1526-1686), and Turkish literature. His works include *Das Osmanisch-Türkische in XVII Jahrhundert* (1973), *Bibliographisches Handbuch der Turkologie* (1986), *Handbuch der Türkischen Sprachwissenschaft (Handbook of Turkic linguistics)* (1990). He is a member of the Hungarian Academy of Sciences (1982, 1995). – B: 0874, 0878, 1257, T: 7103.

**Házy, Erzsébet** (Elizabeth) (Pozsony, now Bratislava, Slovakia, 1 October 1929 - Budapest, 24 November, 1982) – Opera singer (coloratura soprano). Concurrent with her singing studies, she took private piano lessons. She continued her voice training as Géza László's student. Her exceptional singing talent, in addition to her charming presence, attracted attention, even before her graduation. In 1950 she joined the Hungarian Radio Choir as a founding member, only to leave within a few months. Aladár Tóth convinced her to sign a contract with the Budapest Opera House. Her premier performance was in the role of the servant in Verdi's *Rigoletto*. She performed in classical operas at home and in numerous European countries. Several recordings have been made of her work. Her main roles include Mimi in Puccini's *La Bohème*; Cherubino in Mozart's *The Marriage of Figaro*; title role in Puccini's *Manon Lescaut*; Norina in Donizetti's *Don Pasquale*;

title roles in Hungarian operas: in Szokolay's *Samson, Vérnász, Hamlet*, in E. Petrovics' *Crime and Punishment (Bűn és bűnhődés)*, in A. Mihály's *Together and Alone (Együtt és egyedül)*, and Örzse in Z. Kodály's *Háry János*. She appeared in a film role as well as Crown Princess in Offenbach's *The Grand Duchess of Gerolstein*. She was a recipient of the Liszt Prize (1963), the Kossuth Prize (1970), and the titles of Merited Artist (1968) and Outstanding Artist (1976). – B: 0883, 1439, 1445, T: 7667. → **Tóth, Aladár.**

**Headdress** – A folk head apparel worn by married women. Its early variation can be seen on a small cup holder statue from the Siberian region of the River Yenisei. Usually, there are two kinds of headdresses: the inner kerchief and the outer bonnet. The former covers the hair; its style changes region by region. Its color and material indicate the wearer's age. It is made of fine linen, cambric or silk, and is often ornamented with embroidered holes. The newly married woman had the right to wear a special headdress until her first child was born. It was made of golden lace, ornamented with bridal ribbons, or made of some other special material. Headdresses for women: small girls' hair was covered with a bonnet or a beaded cap. When a young girl's hair became long enough to braid, she did not have to cover it anymore. Unmarried, grown up girls began to wear a headdress, called *párta*, after a certain age and at events, such as finishing their studies and at confirmation. Later the *párta* became the Hungarian headdress of festive occasions. Earlier, a bride wore a veil; later, she was distinguished from older women by her special bonnet. Each group of attire had its distinguished system of symbols in the headdress through its color and decoration, indicating the wearers' age, social status, and the occasion at hand. The different pieces worn by men, women and children on the head were governed by distinct rules. Women often integrated these pieces into their hairdo. Besides the sheepskin cap of men, there were other headdresses as well for them in Hungary. The oldest is the *süveg* or high fur cap. The hat replaced it only in the 19th century. At first these hats had large brims; later, the *pörge kalap*, or hats with smaller brims, became fashionable. To wear a hat with a feather, flowers or ribbons were the privilege of grooms and single men. Only married men wore their hat in the home, while single men were not allowed to do so. Men took their hat off only before meals, at bedtime, and in church. As women never parted from their headdress, men also wore theirs even into the coffin. – B: 1153, 1134, 1020, T: 3240.

**Heckenast, Dezső** (Desider) (Devecser, 1910 - Montreal, PQ, Canada, September 1989) – Historian, librarian. He attended high school in Pápa (1926), and studied Philosophy at the University of Budapest, earning a Ph.D. He taught Hungarian, French, German and Italian languages. He was a journalist and librarian in Szombathely. He left Hungary for the West and worked at the Jesuit College at the University of Oxford (1948-1952). He moved to Canada and was a teacher in Montreal. Later he worked at the Research Group for Eastern Europe at the University of Montreal. He organized the College's Madách Library. He was co-editor of the *East European Studies*, and member of the board of editors of the *Hungarians in Montreal (Montreáli Magyarország)* monthly. His essays appeared in American and Canadian newspapers and periodicals. He wrote the unfinished *History of the Heckenast Family (A Heckenast család története)*. A selection of his writings: *A Chapter from the History of Hungarian Literary Life (Egy fejezet a magyar irodalmi élet történetéből)*, (1936); *The Story of Hungarian Book Publishing (A magyar könyvkiadás regénye)* (1940); *The Question of Western Hungary (A nyugat-magyarországi kérdés)* (1958), and *Buda Castle, its Past and Future (Budavár múltja és*

*jövője*) (1959). – B: 0932, T: 7103.

**Heckenast, Gusztáv** (Gustavus) (Kassa, now Košice, Slovakia, 2 September 1811 - Pozsony, now Bratislava, Slovakia, 10 April 1878) – Bookseller, publisher, printer; a descendant of a *cipszer* family from Northern Hungary (Upland, *Felvidék*, now Slovakia). He studied at the College of Eperjes (now Prešov); however, due to his father's poor financial situation, he discontinued his studies and became a grocer. In 1826 he took a position in the bookstore of his brother-in-law, Otto Wigand, in Pest. When Wigand moved to Leipzig in 1832, Heckenast took over the business. In 1838 he opened a lending library, which contained, even by Western European standards, an unusually rich collection. In 1840 he formed a partnership with the printer, Lajos Landerer and, in the same year, launched the first Hungarian bibliographical journal, the *Bibliographical Bulletin* (*Bibliographiai Értesítő*). It ceased publication in 1842. On 15 March 1848, he printed the first products of the new free press, the *National Song* (*Nemzeti Dal*), by Sándor (Alexander) Petőfi, as well as the *Twelve Points* (*Tizenkét Pont*), the demands of the Revolution of 1848. He published contemporary Hungarian writers' individual and collected works, introduced the concept of series publication, and founded the newspaper, *Sunday News* (*Vasárnapi Újság*). Heckenast transferred his company to the Franklin Society in 1873. From 1874 on, he lived in Pozsony. – B: 0883, 1257, 1020, T: 7617. → **March 1848, 12 points; Cipszers; Petőfi, Sándor.**

**Hecker, Ádám** (Kaposzkekcső, South of Dombóvár, 8 June 1905 - Budapest, 27 August 1985) – Methodist parson. He was born into an immigrant German Lutheran peasant family. On reaching adulthood, he joined the Methodist Christian denomination. As a preacher designate, he served in Borjád, Dombóvár and Kaposvár. From 1924 till 1927, he studied Theology at the University of Frankfurt am Main; in the meantime, he spent one summer in London on a scholarship. On his return to Hungary he became the pastor of a German congregation in Budapest, and he also continued his studies at the Arts Faculty of the University of Budapest. During World War II, he took part in the rescue work of the Swiss Consul Karl Lutz's operations, rescuing Jews. He was enlisted in the Army in 1941, when Northern Transylvania was returned to Hungary by the Second Vienna Award (1940); then he served again in the Army on the Russian Front in 1944, and became a prisoner of war in 1945. After the war, as a Methodist minister, he was first assigned to Nyíregyháza, and shortly afterwards to Budapest again. In 1950 he established and organized a theological course to secure the regular supply of appointments of Methodist preachers. From 1957 to 1974 he worked as the Methodist Superintendent of Hungary. During the years 1974 to 1979, as a retiree, he continued to preach as pulpit supply in Pécs and Hidas, and also in Budapest from 1980 to 1982. His articles appeared in the religious press. – B: 0883, 1160, T: 7456. → **Methodist Church in Hungary; Ecumenical Council of Hungarian Churches; Vienna Award II.**

**Hedvig, Saint** (Jadwiga/Hedwiga) (Hungary, 18 February 1371 - Krakow, Poland, 13 June 1399) – Queen of Poland, youngest daughter of King Lajos I (Louis the Great) of Hungary, of the House of Anjou (1342-1382). The widowed Queen Elisabeth (of Bosnia) was requested by the Polish nobles to send her to Krakow, where she was crowned as King (sic) Jadwiga in 1384, at the age of eleven. She was warmly welcomed by the people of Krakow; however, she had to face considerable disunion and jealousy among the landed gentry. It became urgent that she should select a spouse to share her throne.

She was designated by her father to marry Sigismund of Luxembourg, the future Holy Roman Emperor and King of Hungary, Zsigmond (Sigismund of Luxembourg, 1387-1437); but, on the advice of the counselors, her choice was Prince Jagiello, the ruler of pagan Lithuania, who agreed to unite Lithuania with Poland, defend the united countries against the Order of Teutonic Knights, and embrace Christianity. She was actively involved in the political, cultural and the diplomatic life of Poland. She re-conquered the Duchy of Halyč (1387), and was in diplomatic correspondence with the Teutonic Knights (1390). She donated much of her wealth to charity, including hospitals and monasteries. She did much to strengthen Christianity in Poland and Lithuania. She restored the Academy of Krakow, since renamed Jagellonian University. She died in complications of childbirth and was buried in the Wawel Cathedral of Krakow. She was adored as a saint in her lifetime. Queen Jadwiga was canonized by Pope John Paul II on 8 June 1997. – B: 0942, 1031, 1371, T: 7103.→**Lajos I, King; Maria, Queen; Polish-Hungarian Personal Union; Poland, Hungarians in; Lithuania, Hungarians in.**

**Heftý, Frigyes** (Frederick) (Pozsony, now Bratislava, Slovakia, 1894 - Detroit MI, USA, 20 January, 1991) – Pioneer of Hungarian aviation. He was educated in Budapest but, as a student, he quit school and became an aviation mechanic. At the start of World War I, he volunteered for military service as a flyer and was soon at the front line. In 1917, as the most successful pilot of the famous Hány fighter squadron, he was decorated with the Gold Medal for bravery. In 1918, over Doberdo at the Italian Front, his plane was hit and caught fire. He successfully jumped from the burning plane at 5000 m altitude with the primitive parachute of that time. This was the first successful parachute jump of World War I. In 1919, during the time of the dictatorship of the proletariat, he was incarcerated in the infamous basement of the Parliament Building, Budapest. After being freed, he joined the National Army. On 20 August 1921, he was inducted during the first ordination of the “Order of Vitéz” (Hero) in the Royal Palace Garden. From 1929 on, he organized glider aviation among the Scout and *Levente* youth organizations. At the World Scout Jamboree in Gödöllő, Hungary, in 1933, he was the Director of the Flyers’ Camp. In 1936, he was invited to Cairo, Egypt, to organize the civil aviation program. He founded a school and invited experienced flying instructors. In 1944, he served in World War II, as a war correspondent for the Hungarian Air Force, and his talent as a writer was evident in his interesting reports. During the War he moved to Germany and later settled in the USA. During his flying career, he flew 67 different types of airplanes and 37 types of gliders. He celebrated his 50th anniversary as a flyer, at the age of 70, in California. He flew for the last time in 1964. He was not only a valiant flyer, but made his mark as an author in aviation literature. He was the author of many books on aviation, and several articles on the subject of flying. – B: 3312, 1441, T: 3233.→**Council (Soviet) Republic of Hungary; Pioneers of Hungarian Aviation; Heftý, László.**

**Heftý, László** (Ladislas) (1930 - 1993) – Lutheran pastor in Argentina, son of Frigyes Heftý. He received most of his secondary education in Hungary and matriculated after World War II in one of the Hungarian schools in Germany, established for refugee students. Not long afterward, he emigrated with his parents and sister to the United States. At first, he worked as a laborer in the automobile industry in Detroit. A few years later, he was able to enroll at the Lutheran Theology School in Chicago. After completing his studies, the United Lutheran Churches Association accepted his request to serve as foreign missionary and sent him to Buenos Aires, Argentina, to take over the pastorate of

the Hungarian Lutheran congregation from Béla Leskó, the founder of the church. Before taking up his post, however, he spent one year on fieldwork, serving the First Hungarian Lutheran (Evangelical) Church in Cleveland, Ohio. He served a Spanish-speaking congregation near Philadelphia as well. At the time of the 1956 Hungarian Revolution, the Government sent him on two separate occasions to Vienna to help Hungarian refugees emigrate to Argentina. During his years as pastor of the Hungarian congregation he never forgot his first calling as missionary. There were years when he assigned his pastoral duties in Buenos Aires to a Hungarian colleague and went to serve a Spanish congregation in another town. Upon his return to his Hungarian congregation in the Capital, he initiated a Spanish-language branch of the Church. He also founded a missionary congregation in a town 35 km from Buenos Aires, mainly serving the underprivileged population. Another of his achievements was the adding of a new wing to the Lutheran Home, a benevolent institution in the José C. Paz suburb. His Bible study instructions appeared in various Hungarian and Spanish publications. He also edited and published the newsletter, *Our Faith (Hitiink)*. In 1988, he received a Master's Degree from the Lutheran Theological Institute of Chicago, followed by a Doctorate in Theology from the Lutheran Theological Academy of Budapest. Before his retirement, he planned to serve as a professor of Theology. However, his untimely death prevented it. – B: 0906, T: 7617.→**Heftý, Frigyes.**

**Hegedűs Endre** (Andrew) (Hódmezővásárhely, 16 September 1954 - ) – Pianist. He graduated from the Ferenc (Franz) Liszt Academy of Music, Budapest in 1980 as a pianist, a performing artist and teacher; since 1999 he has been a professor of the Academy. He has participated in 20 international piano competitions and has won several prizes; first prizes in Monza, and at the Rachmaninov Competition in Morcone, both in Italy. He has recorded 27 CDs under the labels Hungaroton, Marco Polo and Studio Liszt Productions. His CD, containing the complete Bellini-Liszt operatic fantasies published by Hungaroton in 1993, received the Franz Liszt International Grand Prix du Disque from the International Liszt Society. Hungarian television companies made 12 films taken from his public concerts. In the course of Hegedűs' 30-year career as a performing pianist, he made more than 2600 public appearances. Beside his live concert activities in his homeland, he regularly gives concerts in Australia, Austria, Bulgaria, Canada, Czech Republic, Finland, France, Germany, Greece, Italy, Japan, Norway, Poland, Russia, Serbia, Slovakia, Switzerland, and the USA. Hegedűs resides in Budapest with his wife Katalin, also a concert pianist. Hegedűs is well known worldwide in the musical life. He was awarded the Franz Liszt Commemorative Plate of the Hungarian Ministry of Culture and the International Liszt Society in 1986 and 1999; He was included in the roster of Steinway Artists by the Steinway Center in New York in 2000, was awarded the State Franz Liszt Prize of Hungary in 2004, and received from President Ferenc Mádl, the Medal of Merit of the President of the Republic of Hungary. – B: 0874, 1031, T: 7456.

**Hegedűs, Géza** (Budapest, 14 May 1912 - Budapest, 9 April 1999) – Writer. His higher studies were at the University of Budapest, where he studied Law and simultaneously attended the Department of Arts (1930-1935). In 1935 he earned a Ph.D. in Law. Among his friends were Dezső (Desider) Kosztolányi, Lajos (Louis) Kassák, Bálint (Valentine) Hóman and György (George) Lukács. Between 1939 and 1946, he was text editor. During World War II he was in the labor service of the Army on the Eastern Front, and was later in concentration camps in Germany. Between 1946 and 1949 he was a

counselor at the Town Hall, Budapest, and was a columnist at various newspapers. From 1955 he taught at the Academy of Dramatic Art. From 1955 he was Manager at the Publishing House *Magvető Kiadó*, Budapest. He retired in 1973. He mainly wrote historical novels and dramas. His works include *The Bells Toll (Megkodiknak a harangok)* novel (1951); *Passions (Szenvedélyek)* novel (1973); *The Regained Life (A visszanyert élet)* novel (1989); *Portrait Gallery of Hungarian Literature, vols. i,ii (A magyar irodalom arcképcsarnoka, I,II)* (1992), and *Word Magic (Szóvarázs)*, selected poems 1940-1997 (1997). He received a number of awards, including the Attila József Prize (1951, 1954, 1975), the White Rose Prize (1994) and the Officer Cross of the Hungarian Republic (1995). A school in Budapest bears his name. – B: 0878, 1257, T: 7103. → **Kosztolányi, Dezső; Kassák, Lajos; Hóman, Bálint; Lukács, György.**

**Hegedűs, Gyula** (Julius) (Kéty, 3 February 1870 - Budapest 21 September, 1931) – Actor. He first appeared on stage in 1889 in Mrs. János (John) Keresztély's traveling choir in Tolnaapáti. Soon, he was admitted to Ede (Edward) Paulay's acting school and was trained by Ede Újházi. In 1891 he worked in the countryside: Szolnok, Pápa, Debrecen, Pozsony (now Bratislava, Slovakia), Székesehérvár, Zombor (now Sombor, Voivodina, Serbia) and Baja. In 1894 he joined the theater of Kolozsvár (now Cluj-Napoca, Romania), led by Mór (Mauritz) Ditrói who, in 1896 offered him a contract with the Comedy Theater (*Vígyszínház*) in Budapest where, with brief interruptions, he remained until his death. From 1914 to 1915 he was a permanent guest of the Hungarian Theater (*Magyar Színház*) and, in 1915-1916, a member of the National Theater (*Nemzeti Színház*), Budapest. He taught at the School of Acting in 1906, then in 1907 in the Opera Department of the Music Academy. In 1917 he became President of the Actor's Association. From 1929 he was a member of the Hungarian Theater (*Magyar Színház*), Budapest. He was an outstanding representative of naturalist acting, a leading figure among the Comedy Theater's original members. His unique artistic style, characterised by simple and natural diction, light dialogue, elegant and natural movements and posture, was developed primarily in performances of French comedies. His best interpretations were in roles by contemporary writers, in particular, Ferenc Molnár's *The Devil (Az ördög)*, *Liliom*, and *The Play is the Thing (Játék a kastélyban)*. His other roles include Tokamero in M. Lengyel's *Typhoon (Tájfún)*; Pál in F. Herczeg's *Blue Fox (Kék róka)*, and in various Chechov plays. Feature film roles in which he appeared include *The Dance (A tánc)*; *The Laborer's Jacket (Munkászubbonny)* (1914), and *Master Zoard (Zoárd mester)* (1917). He authored *Comedy (Komédia)* (1914); *The Art of Diction (A beszéd művészete)* (1917), and *Memoires (Emlékezések)* (1921). A Street in Budapest bears his name. – B: 0883, 1160, 1445, T: 7667. → **Paulay, Ede; Újházi, Ede.**

**Hegedűs, Loránt (1)** (Roland) (Budapest, 28 June 1872 - Budapest, 1 January 1943) – Writer, politician. He attended high school in Budapest, pursued university studies in Berlin and London. He earned a Ph.D. in Political Science in Budapest in 1895. He worked at the Ministry of Finance, later studied immigration issues in the USA (1898-1902). He was an MP (1898-1918), also President of the Alliance of Hungarian Industrialists, University Professor, and Minister of Finance (1920-1921). For two decades, he edited the *Economic Review (Közgazdasági Szemle)* journal. He was a member of the Hungarian Academy of Sciences and the Kisfaludy Society. He wrote editorials for the *Pest Newspaper (Pesti Hírlap)*, and was popular with the series entitled: *Mailbox (Levelesláda)*. His play, *Kossuth*, was performed at the National Theater. A

selection of his books: *Imposing Tax on the Stock Exchange (A tőzsde megadóztatása)* (1895); *Hungarian Emigration to America (A magyarok kivándorlása Amerikába)* (1899); *Count István Széchenyi's Story and his Night (Gróf Széchenyi István regénye és éjszakája)* (1933); *Lajos Kossuth, the Hero of Legends (Kossuth Lajos, a legendák hőse)* (1935), and *Tales about Happy Old Age (Mesék a boldog öregségről)* (1936). – B: 0932, 1257, T: 7103.

**Hegedűs, Loránt (2)** (Roland) (Hajdunánás, 11 November, 1930 - Budapest, 26 January 2013) – Bishop of the Reformed Church, theologian, philosopher, literary historian. He completed high school studies at his place of birth in 1949. He studied Theology at the Reformed Theological Academy, Budapest (1949-1954), where he attended at the Homiletical Seminar of the famous Reformed Bishop, László (Ladislav) Ravasz. He was an assistant minister in various places, including the Kálvin Square Church in Budapest. He took part in the demonstration of the Revolution of 1956, and he wrote an article in the *Reformáció (Reformation)* newspaper. After the crushing of the Revolution, he had to leave Budapest for not renouncing it. He was posted to various places as assistant minister (1956-1965). He was Parish Minister in Hidas, in a tiny Bukovinian Szekler congregation (1965-1983). In 1979 he continued his Theological studies at the University of Basel, where he earned a Doctoral Degree in Systematic Theology. He was Parish Minister of the Budapest-Szabadság Square congregation (1984-1996), and Bishop of the Danubian Reformed Church District (1991- 2002). He was ministerial President of the Hungarian Reformed Church's General Synod (1991-1997), and was Minister of the Budapest Kálvin Square Congregation (1996-2005). He was a member of the Presidium of the Conference of European Churches (1992-1997), and has been Honorary President of the World Alliance of Hungarian Reformed Churches since 1991; Co-President of the Christian-Jewish Society since 1993; and also Acting President of the Consulting Synod of the Hungarian Reformed Churches. He was one of the best-educated and prolific Theologians of the Reformed Church in the last quarter of the 20th century; and rebuilder of the ruined Reformed School System in Democratic Hungary. He was first of the founders of the Gáspár Károli Reformed University, Budapest (1993) the first university in the history of the Hungarian Reformed Church. He was its Professor of Religious Philosophy (1999-2003). He was the chief worker of the second (1991), third (1996) and fourth (2000) Hungarian Reformed World Assembly. He proclaimed and preached the message of the Gospel, and had given lectures about 300 times outside of Hungary: in the Carpathian Basin, in Western Europe, the United States of America, Canada, and the Far East (Korea, Taiwan, Australia). He was the author of a few hundred articles and essays, and is a sought-after lecturer. A selection of his books: *Opening to the Infinity (Nytás a végtelenre)* (1989); *Aspekte der Gottesfrage (Aspects of the Question of God)* (1982, 1998), in *Hungarian Az Isten-kérdés szempontjai* (2001); *A Study in the Concept of Transcendence* (1991); *New Beginning (Újrakezdés)* (1992); *The Theology of Calvin (Kálvin teológiája)* (1996); *New-Kantian and Value-Theology (Újkantiánus és értékteológia)* (1996); *History is in the Hand of God (Isten kezében a történelem)* (1998); *Hungary Has To Be saved! (Magyarországot meg kell menteni!)* (1998); *Moses Twenty-Two (Mózes Huszonkettő)* (2001); *Apocalypse Now and Forever (Apokalipszis most és mindörökké)* (2005); *Jesus and Europe (Jézus és Európa)*, and *Hungarian Reformed Millennium (Magyar Református Millennium)*. He is recipient of the Bocskai Award and the Pro Ecclesia Award. – B: 0910, 1257, T: 7103. → **Ravasz, László; Reformed Church**

**in Hungary.**

**Hegyalja** – The lower slopes of the Hungarian Zemplén Mountains, with south and southeast aspects adjacent to the River Bodrog. The twenty-eight villages in this region are all engaged in wine production; the wines from Bodrogolaszi, Mád, Olaszliszka, Tarcal, Tállya, Tolcsva and Tokaj are world famous. The total area of vineyards is 5,500 hectare of land, producing *Furmint* and *Hárslevelű* (Linden Leaf) wines, and the famous Tokaji dessert wine. Lately, the old vineyards were renewed with new varieties of grapes. Geographically, the region extends over the border to Slovakia; but Hungary is the dominant producer. – B: 1138, 1020, T: 7656.

**Hegyaljai Kiss, Géza** (Mád, 21 March 1893 - Debrecen, 26 October 1966) – Minister of the Reformed Church, poet, writer. He studied Theology at The Reformed Theological Academy, Sárospatak (1912-1916), and was on study trips in Germany in 1927 and in 1935. He read Literature and Esthetics at the University of Budapest and obtained a Ph.D. in 1925. He was an assistant minister in various places (1916-1923), then Parish Minister in Monok (1924-1926); in Böcs (1926-1938), and at the Debrecen-Árpád Square Church (1938-1952). He was a Member of Parliament from 1947 to 1949. For criticizing Church-leadership he was dismissed from the ministry. He was an editor of newspapers and a prolific writer. His output includes some thirty books. A selection of his writings: *Our Love (A mi szerelmünk)* poems (1914); *Calvin's Biography (Kálvin életrajza)* (1917); *Burning Hearts (Égő szívek)* poems (1925); *Spirit and Life, vols. i-ii-iii. (Lélek és élet I-II-III)*, sermons (1926, 1928, 1930); *The Emperor and the Pastor (A császár és lelkipásztor)* short novels (1926); *Glory to God! (Dicsőség Istennek!)* prayers (1937), and *Peaceful World (Békevilág)*, meditations (1947). He was a member of literary societies and a recipient of prestigious awards. – B: 0910, 1257, T: 7103.

**Hegyes, Róbert** (Metuchen, USA, 7 May 1951 – ) – Actor, director. His father was Stephen, an ex-Marine, and Hungarian-born, while his mother was Marie Cocozza, an Italian. It was her mother, who made Robert interested in the theater. He majored in Speech and Theater at Glassboro State College in New Jersey, USA. After receiving his B.A., he went to New York City to start working as a professional actor. He did get an acting job with a children's theater company, called *Theater in a Trunk*; it was a troupe of professional actors, performing plays in schools and playgrounds everywhere in New York City. Later, he received a role in a Broadway play, *Don't Call Black*. After several other engagements, he was immortalized in the 1970s sitcom classic *Welcome Back Kotter*, as the tough guy Juan Epstein. He also played in the popular 1980s series *Cagney and Lacey*, and also co-starred in the famous series *Law and Order*. He became Associate Professor and Artist-in-Residence of Theater and Communications in Rowan University, N.J. and is currently Adjunct Professor, Brooks College of Long Beach CA, USA. – B: 1081, T: 7456.

**Hegyföld** – The lower, south-facing slopes of the Mecsek Mountains, bordered by the River Dráva in the south. When the Magyars settled in the Carpathian Basin, the tribe of Khagan (Prince) Árpád lived in the area. During the Middle Ages, a high culture developed here. During the Reformation, a significant proportion of the population took up the Unitarian faith. The local population did not suffer greatly under the Turkish rule. After the Turkish withdrawal, the Habsburg rulers forcefully tried to convert the population to Catholicism forcing a great number of people to flee the area. Germans

populated the empty villages in the 18th century. After World War II, a significant number of Germans were deported to Germany. – B: 1134, 1020, T: 7656.

**Hegy, Barnabás** (Barnaby) (Zboró, now Zborov, Slovakia, 4 March 1914 - Budapest, 28 April 1966) – Cameraman. His technological and applied art training was completed in Budapest. His career in the film industry began in 1936, and from 1940 he was active as a cameraman. Following World War II, until 1947, he was programming supervisor at the Hungarian Radio; then until his death, cameraman at the Hunnia Film Studio. He produced nearly a hundred films. With the vibrant style of running commentary, his work communicated a strong sense of form and dramatic expression. He is credited with the most prominent achievements of the Hungarian film industry. His pictures include *The Thirtieth (A harmincadik)* (1942); *Just the Two of Us (Kettesben)* (1943); *Somewhere in Europe (Valahol Európában)* (1947); *A Woman Sets Out (Egy asszony elindul)* (1949); *Crafty Matt the Goose-herd (Ludas Matyi)* (1949); *A Strange Marriage (Különös házasság)* (1951); *The Sea Arose Again (Feltámadott a tenger)* (1953); *At Midnight (Éjfélkor)* (1957); *Yesterday (Tegnap)* (1959); *Alba Regia* (1961), and *Dread (Izony)* (1965). He was a recipient of the Kossuth Prize (1950) and received the Outstanding Artist title (1966). – B: 0883, 1439, T: 7667.

**Hegy-Füstös, István** (Stephen) (Gyömrő, 19 June 1919 - ) – Minister of the Reformed Church, writer. His higher studies were at the Reformed Theological Academy, Budapest (1938-1944), and at the Reformed Law Academy, Kecskemét (1944-1947). In 1942 he was trained as military chaplain at the Royal Ludovika Academy. Between 1942 and 1972 he served as assistant minister in Gyömrő, as a teacher of religion and an assistant minister in Budapest; YMCA (KIE) secretary (1946-1972). He was ordained in 1969, and became Parish Minister in Rákosfalva (1972-1979). He was on the editorial board of the Reformed periodical, *Confessio* from 1977, and the newspaper, *Presbíter* from 1992. In 1996-1997 he was Editor-in-Chief of the weekly, *Paper of the Presbyterians (Reformed) (Reformátusok Lapja)*. From 1948, he was an external member of the Hungarian Radio. From 1948 to 1956, he was Editor of the program *One Village, One Song (Egy falu egy nóta)*. He wrote a number of articles on artistic, ethnographic, folk music and popularizing themes, wrote plays and scenes for broadcasts, and also dramatized festival and Biblical scenes. His works appeared on the radio, in cultural and religious media: *Reformátusok Lapja*, *Evangélikus Élet*, (*Lutheran Life*), *Új Ember (New Man)*, *Békehírnök (Herald of Peace)*; *Theológiai Szemle (Theological Review)*, and other periodicals; also in daily newspapers. His research work is outstanding: he discovered the recorded voice of Lajos (Louis) Kossuth (1802-1894), the daguerreotype picture of Poet Laureate Sándor (Alexandredr) Petőfi (1823-1849); found and preserved recordings of outstanding people, such as László (Ladislav) Ravasz, Imre (Emeric) Révész, etc. He wrote the first juvenile studio play for Hungarian TV, *The Seven-times Tested Lad (A hétpróbás legény)* for the commemoration of the great King Mátyás I (Matthias Corvinus, 1458-1490). His books include religious textbooks for high schools (140,000 copies), *Biographies* (Albert Schweitzer, Toyohiko Kagawa, Martin Luther King); and puppet-show plays. He is recipient of the Medal for Country and Freedom (1991), Commemorative Medal of 1956 (1991), the Pro Urbe Gyömrő Award received together with his wife (2002). – B: 0874, 1630, T: 7103. → **Ludovika Royal Hungarian Military Academy; Christian Youth Association; Kossuth, Lajos; Petőfi, Sándor; Ravasz, László; Révész, Imre; Mátyás I, King (Mathias Corvinus).**

**Heim, Pál** (Paul) (Budapest, 30 November 1875 - Budapest, 23 October 1929) – Pediatrician. He received his Medical Degree in 1897. At the start of his career, he was at the Pediatric Clinic of Budapest as an intern; later became an assistant professor in Breslau (then Germany, now Wrocław, Poland). From 1901 he was Head Physician at the Hospital of the Order of Mercy in Budapest. He became a university lecturer in 1907. From 1918 on, he was Professor at the Universities of Pozsony (now Bratislava, Slovakia) and Pécs, and from 1929 he was Professor in the Pediatric Department of the University of Budapest. He was particularly interested in the detrimental effects of inadequate nutrition in infancy, as well as in premature infant care. His work on child protection is significant. His main works are *General Haematology (Általános haematológia)* (1908), and *Child Nutrition (A gyermek táplálkozása)* (1926). Today the Pediatric Hospital bears his name in Budapest. – B: 0883, 1105, T: 7667.

**Held, József** (Joseph) (Budapest, 14 October 1930 - ) – Historian. His higher studies were mainly in the USA, at Rutgers State University of New Jersey, New Brunswick between 1958-1962, and 1963-1968. At Rutgers, he was a professor (1966-1980), and then he held the Chair of the Department of History (1974-1980), where he was also Deputy Dean, later Dean (1980-1992). From 1988-1989 he was President of the Mid-Atlantic Slavic Association. He is an external member of the Hungarian Academy of Sciences. His books include *The Cult of Power: Dictators in the 20th century* (1983); *The Hunyadi Legend and Reality* (1985); *The Columbian History of Eastern Europe in the Twentieth Century* (1992); *Dictionary of East European History since 1945* (1994), and *Populism in Eastern Europe* (1995). – B: 0874, T: 7103.

**Helicon** – A Mountain peak in Boeotia in Central Greece in the vicinity of Mount Parnassos, home of the Nine Muses, where the god of poetry, Apollo, resided. It was the sacred place of the arts; the ascent of the mountain was the ultimate ambition of all poets. In a figurative sense, the name is used for gatherings, societies, etc., such as *the Helicon of Keszthely (Keszthelyi Helikon)*, founded at the beginning of the 19th century by Count György (George) Festetics. Also the journal *Transylvanian Helicon (Erdélyi Helikon)*, founded in the 20th century, which provided exposure for Hungarian writers in Romanian occupied Transylvania (*Erdély*). – B: 1150, 1020, T: 7617. → **Festetics, György**.

**Helicopter** – A rotary-winged aircraft. The first one was built by the Frenchman Paul Cornu. His helicopter was the first to achieve free flight, while carrying a passenger (1907). It left the ground only for several seconds and its elevation was only a few centimeters. Tódor Kármán, mechanical engineer-lieutenant and Vilmos (William) Zurovecz engineer-lieutenant under the direction of Major István (Stephen) Petróczy, experimented and designed the first helicopter of practical use in the Austro-Hungarian Aircraft Research Institute's plant at Fishcamend, in 1917. They named their 'helikoptera' PKZ, after the initial letters of their names. It made several successful ascents, before a sudden storm destroyed it. Oszkár (Oscar) Asbóth continued the helicopter experiments after World War I and the first flight of his helicopter near Kispest, Hungary, was a great success. István (Stephen) Hosszú, the first helicopter pilot operated Asbóth's helicopter. This was the first sustained and controlled helicopter flight. – B: 1230, 1153, T: 7662. → **Kármán, Tódor; Asbóth, Oszkár; Petróczy, István**.

**Hell, József Károly** (Joseph Charles) (Selmecebánya-Szélakna, now Banská-Stiavnica, Slovakia, 15 May 1713 - Selmecebánya, 11 March 1789) – Mine master mechanic, a

pioneer of mining mechanization. He was a son of Máté Kornél (Matthew Cornelius) Hell. He studied at the Mine Officers' Training Institute in Selmezbánya. His first invention, a closed-frame, rocker arm water pump, began operation in 1738. This was the predecessor of the modern rocker arm oil pumps used all over the world. More significant was his invention operated by compressed air. In 1753 he implemented a system that used compressed air to lift water from the mines of Selmezbánya. He was the first to apply compressed air for such a purpose. This can be regarded as the forerunner of the airlift technique, used today in oil wells. In 1758 he built an improved version of the English Potter's steam engine. He designed and put into operation a mine ventilation system in 1756, and built a crushing mill in 1766. He was also interested in weapon technology. – B: 0883, 1441, 1020, T: 7662.→**Hell, Máté Kornél.**

**Hell, Máté Kornél** (Matthew Cornelius) (Höll) (Schlakenwerth, Bohemia, now Czech Republic, 1650 - Selmezbánya, now Banská-Štiavnica, Slovakia, 1743) – Master mine mechanic. He settled in Selmezbánya in 1696. He had several inventions, such as the horse drawn water lifting mechanism. Upon his suggestion, István (Stephen) Mikovinyi designed and put into operation a water wheel pump in 1711. This mechanism was used in Sweden and in Bavaria, as the “Selmezbánya pump”. His modernized vertical shaft mine hoists were adopted all over Europe. – B: 0883, 1405, 1020, T: 7662.→**Hell, József, Károly; Mine Elevator; Hell, Miksa.**

**Hell, Miksa S.J.** (Maximilian) (Selmezbánya, now Banská Stievnica, Slovakia 15 May 1720 - Vienna, 14 April 1792) – Astronomer, mathematician, physicist, writer, son of Máté Kornél (Matthew Cornelius) Hell. He entered the Jesuit Order, studied Philosophy at the University in Vienna, thereafter, he taught briefly at Lőcse (now Levoča, Slovakia), later, at the University of Kolozsvár (now Cluj-Napoca, Romania). In 1755 he was appointed Director of the Astronomical Observatory of Vienna, and Professor of Mechanics at the University. Although he lived mostly in Vienna, his contacts with Hungarian astronomers remained continuous. The observatories at Kolozsvár, Eger, Buda and Nagyszombat (now Trnava, Slovakia) were built under his direction. He started the internationally respected astronomical periodical, *Ephemerides Astronomicae*, published until 1793. Commissioned by the Danish King Christian VII, he traveled with János (John) Sajnovics to Vardo, Norway, to make observations of the passage of the planet Venus in front of the Sun on 3 June 1769. On the basis of this event, he was the first to correctly calculate the distance between the Sun and the Earth. Several contemporary astronomers doubted the correctness of his result; but later measurements vindicated him. In the same year, he developed the method of measuring geographic latitude. His diverse interests are reflected in his writings. He published several books on mathematics between 1745 and 1755, including a book about the production and practical application of artificial magnets, several papers on astronomy and, based on the *Gesta Hungarorum* (*History of the Hungarians*) by 13th century Hungarian chronicler Anonymus, the early geography of Hungary. He was put in charge of the Organization of the Academy of Sciences of Vienna. – B: 0883, 1257, 1020, T: 7674.→**Hell, Máté Kornél; Anonymus; Sajnovics, János.**

**Heller, Ágnes** (Budapest, 12, May 1929 - ) – Philosopher, political scientist, survivor of the Holocaust; her family perished in a concentration camp. She studied Philosophy at the University of Budapest, under the guidance of György (George) Lukács. Later, she

became an assistant professor in the Department of Philosophy. For her participation and solidarity with the Hungarian Revolution of 1956, she was expelled from the University and, for years, banned from publication. Between 1963 and 1973 she worked as a researcher at the Institute of Sociology in Budapest. Since she belonged to the Budapest School of Philosophers, the Government authority banned her from all teaching and research works in 1973. She was forced to leave Hungary in 1977, and emigrated to Australia, and taught Sociology at La Trobe University in Melbourne. In 1986 she moved to New York, where she was appointed to the Hannah Arendt Chair, as Professor of Philosophy at the New School for Social Research. Since the political change of 1989 in Hungary, she now spends half of the year in her native land, and teaches at the Universities at Budapest and Szeged. Her major works include *The Dissolution of Moral Norms (Az erkölcsi normák felbomlása)* (1957); *The Renaissance Man (A reneszánsz ember)* (1967); *Theorie der Gefühle (A Theory of Emotions)* (1980); *A Theory of History* (1982); *Message of a Revolution (Egy forradalom üzenete)* (1989); *The Power of Shame (A szégyen hatalma)* (1985, in Hungarian 1996); *Beyond Justice (Az igazságosságon túl)* (1985, in Hungarian 1990); *The Idea of Beauty (A szépség fogalma)* (1998), and *Personal Ethics (Személyiségétika)* (1999). Many of her works have been published in English, German, French, Spanish, Italian, Hungarian, as well as in other languages. She is a corresponding member of the Hungarian Academy of Science (1990). She was awarded the Lessing Prize of Hamburg (1989), the Széchenyi Prize (1995), and the Hannah Arendt Prize in Bremen (1995). She received an Honorary Doctorate from the La Trobe University Melbourne (1996) and from the University of Buenos Aires (1997). – B: 0875, 0878, 1251, 1257, T: 7103. → **Lukács, György.**

**Heller-Forgó Air Condensation Cooling Plant** – The spent steam of steam turbines is conducted into a partial vacuum condenser, where it is sprayed with cooling water. This cooling plant was patented by László Heller. He used László Forgó's new heat exchanger system for his design. This cooling system requires only small quantities of water, making the development of thermal power plants possible in water-poor regions. – B: 1138, 1020, T: 7662. → **Heller, László; Forgó, László.**

**Heller, István** (Stephen) (Pest, 15 May 1813 - Paris, 14 January 1888) – Piano virtuoso, composer. He showed musical talent as a boy and played piano in public at the age of nine. He studied music theory under Alphonse Czibulka, and piano with Anton Halm in Vienna. From 1828 to 1830, he gave concerts as a traveling virtuoso in Hungary and Germany. First he settled at Augsburg, where he taught the children of an aristocrat lady; and by the help of a Count Fugger, took lessons in composition. In 1838, he moved to Paris which was to be his home. Here, he got acquainted with Hector Berlioz. Robert Schumann praised his compositions and found him a publisher. He played in England in 1849. He wrote very graceful and melodious pieces. His oeuvre include some two hundred piano pieces, among them *33 variations for Piano; Variation on the Theme by Bethoveen; Sieben Deutsche Lieder*, and a successful book *L'Art de phraser*. His piano pieces and studies are still popular worldwide. – B: 0903, 0883, 1509, T: 7103.

**Heller, László** (Ladislav) (Nagyvárad, now Oradea, Romania, 1907 - Budapest, 1980) – Mechanical engineer. He received his qualifications in the *Eidgenössische Technische Hochschule* of Zürich, Switzerland. He remained at the school for two years after graduation to study some special aspects of the strength of material. He established an

engineering consulting company after his return to Hungary and played a significant role in the development of power engineering before World War II. He was professor of the Budapest Polytechnic. He designed high-pressure boilers and worked on the improvement of their efficiency. He was the co-inventor of the Heller-Forgo air-cooling system, which became known worldwide as the Heller-System, applied in thermal power stations. With the introduction of entropy into practical designing he made a pioneering, basic contribution to engineering. He was a member of the Hungarian Academy of Sciences. – B: 1138, 1153, T: 7662. →**Forgó, László; Heller-Forgó Air Condensation Cooling Plant.**

**Helsinki Accord** – The Conference on Security and Co-operation in Europe, signed on 31 August 1975 in Helsinki by the high representatives of Austria, Belgium, Bulgaria, Canada, Cyprus, Czechoslovakia, Denmark, Finland, France, German Democratic Republic, Federal Republic of Germany, Greece, the Holy See, Hungary, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta, Monaco, Netherlands, Norway, Poland, Portugal, Romania, San Marino, Spain, Sweden, Switzerland, Turkey, Union of Soviet Socialist Republics, United Kingdom, United States of America and Yugoslavia. The 10 main points of the Accord are: (1) Sovereign equality, respect for the rights inherent in sovereignty. (2) Refraining from the threat or use of force. (3) Inviolability of frontiers. (4) Territorial integrity of States. (5) Peaceful settlements of disputes. (6) Non-intervention in internal affairs. (7) Respect for human rights and fundamental freedoms, including the freedom of thought, conscience, religion or belief. (8) Equal rights and self-determination of peoples. (9) Co-operation among States. (10) Fulfillment in good faith of obligations under international law. – B: 1138, 1020, T: 7677.

**Heltai, Gáspár** (Kaspar Heltner) (Nagyszeben, now Sibiu, Romania, 1510? - Kolozsvár, now Cluj-Napoca, Romania, 1574?) – Protestant pastor, writer, printer, a pioneer of idiomatic Hungarian prose writing and publishing. Around 1531 he came in contact with the humanist Bishop István Brodarics. Being of Saxon origin, Heltai began to learn Hungarian during 1536; and in the early 1540s he converted to the Lutheran faith. In 1543 he enrolled at the University of Wittenberg, and in 1544 returned to Hungary. He remained the pastor of the Saxon parish in Kolozsvár until his death. In 1550 he founded and managed a printing shop with György (George) Hoffgreff, until Heltai took over the business in 1559. In the same year he accepted the Reformed tenet. On becoming a disciple of Ferenc (Francis) Dávid, he converted to the Unitarian faith. Many of his publications were his own works. Through them he was instrumental in developing a uniform Hungarian spelling system. He was the most eminent Hungarian prose writer of the 16th century. Heltai's main work is a collection of narratives, called *A Hundred Fables* (*Száz Fabula*) including *Aesops's Fables* (*Esopus meséi*) (1566). His other major work, *A Chronicle About the Affairs of the Hungarians* (*Chronica az Magyaroknac Dolgairól*) (1575), is mainly a rewrite of Antonio Bonfini's Hungarian history. Some of his minor writings appeared in Latin and German; a significant and important part of his literary output however, is in Hungarian. With the exception of a few books, he made a complete translation of the Bible, as well. – B: 0883, 1257, T: 7617. →**Hoffgreff, György; Dávid, Ferenc; Bonfini, Antonio; Bible in Hungarian.**

**Heltai, Jenő** (Eugene) (Budapest, 11 August 1871 - Budapest, 3 September 1957) – Writer, poet, playwright, journalist. Interrupting his law studies he turned to a career in

journalism. He worked for the *Hungarian Daily (Magyar Hírlap)*, *The Week (A Hét)*, *Pest Newspaper (Pesti Hírlap)*, *Pest Diary (Pesti Napló)*. He lived for extended periods in London, Vienna, Berlin and Constantinople. In 1900 he was secretary of the Comedy Theater (*Vígsház*), Budapest; then, from 1914 to 1918, he was its dramaturgist and director. From 1918 he was literary director at the Athenaeum Publishing Company. From 1928 he was one of the directors of the Inner City Theater (*Belvárosi Színház*), and of the Hungarian Theater (*Magyar Színház*) between 1932 and 1934. His unreserved versification of the light French flair of big city life brought him praise with such works as *Modern Songs (Modern dalok)* (1892); *Kató* (1894); *Willow Whistle (Fűzfasíp)* (1913) and *Forgotten Poems (Elfelejtett Versek)* (1947). Songs he wrote for the *Singspiel* "John the Hero" (*János Vitéz*) by Pongrác Kacsóh earned him wide popularity. The Bohemian world of the turn at the century was depicted with wit, humour and much affection in his novels. The moral falsities of the contemporary bourgeois classes were revealed with fine irony and subtle technique in his comedies for the stage. His plays in verse resurrected comedies of various eras in a characteristic ironic/romantic style. After 1945 he was a supporter of the People's Democracy. For his translations of literary works he was awarded the French Honorary Prize. He was the Hungarian president of the PEN Club (the worldwide association of writers). His writings were translated into numerous languages. His main works include short stories: *Writers, Actresses and Other Scoundrels (Írók színésznők és más csirkefogók)* (1910); *Colourful Stones (Színes kövek)* (1911); *Wastepaper Basket (Papírkosár)* (1927); Novels: *The Last Bohemian (Az utolsó bohém)* (1911); *Family Hotel* (1913); *Jaguar* (1914); *The House of Dreams (Álmok háza)* (1929); Plays *Faces and Masks (Arcok és álarcok)*, (1925); *The Dumb Knight (A néma levente)* (1936); *The Thousand-and-Second Night (Az ezerkettedik éjszaka)* (1939), and *Menagerie (Menazséria)* (1962). He was recipient of the Kossuth Prize (1957). – B: 0883, 1257, T: 7667. → **Kacsóh, Pongrác.**

#### **Hephthalites → White Huns.**

**Herceg, János** (John) (Herczog) (Zombor, Hungary now Sombor, Serbia, 11 May 1909 - Doroszló now Doroslovo, Serbia, 29 January 1995) – Poet, writer, journalist, translator of literary works. Initially he studied in his hometown, then in Budapest. In the 1920s he appeared with his poems and reports. In the 1930s he was journalist and book publisher in Budapest. Between 1941 and 1944 he was a librarian at the City Library of Zombor, and editor of the periodical, *Kalangya*. From 1955 till 1957 he was editor of the periodical *Bridge (Híd)*, and later literary editor of the Novi Sad Radio in Serbia. He retired to Doroszló. He wrote 47 major works, among them: *In the Storm (Viharban)* short stories (1933); *Pepper and Cinnamon (Bors és fahéj)* short stories (1951); *Paper Ship (Papírhajó)* studies (1953); *Sky and Earth (Ég és föld)* novel (1959); *Shout from the Fog (Kiáltás a ködből)* poems (1970); *One Plus One (Egy meg egy)* portraits (1968); *Two Worlds (Két világ)* studies (1972); *Iketánia*, novel (1987), and *Gogoland*, novel, (1992). – B: 1169, 1257, T: 7103.

**Hercegszöllös, Canons of** (*Hercegszöllösi Kánonok*) (Hercegszöllös, now Kneževi Vinogradi, Croatia) – The founder of the Hercegszöllös Reformed Congregation was Péter Kákony (11544-1549). The Synod took place under Bishop and Pastor Illés (Elias) Veresmarti. The Canons were accepted by the Synod of the Reformed Congregations held at Hercegszöllös on 16 and 17 August 1576. At the Synod 40 ministers of the local

churches along the Danube attended. During their discussions they itemized (arranged into canons) all those issues, which characterized them as Reformed Christians and all the people they represented. It also set out what is expected of them as Reformed faithful, as ministers, and as a congregation according to the standards of the times. These Canons of Hercegszöllős summarized in Latin in 47 points the first organizational and theological principles and rules of the Reformed Christians of the regions adjoining the Danube, as well as those of Transdanubia including the Baranya area. These Canons determined for a long time the life of the Reformed Christian Congregations. István (Stephen) Szegei Kis was the author of the Canons, and later Máté (Matthew) Skaricza revised and translated them into Hungarian. With some of these Canons the Reformed Church distinguished herself from the Lutheran Church. The laws appeared in print in the printing press of Gál Huszár at Pápa a year later. In 2007, the Canons were published in archaic and modern Hungarian, as well as in Latin and Croatian. – B: 1105, 1613, 0940, T: 7456.→**Szegei Kis, István; Skaricza, Máté; Huszár, Gál; Reformed Church in Hungary, History of; Reformed Church in Yugoslavia.**

**Herczeg, Ferenc** (Francis) (Versec, Hungary, now Vršac, Serbia, 22 September 1863 - Budapest, 24 February 1954) – Writer. He was born into a wealthy Schwabian family. He attended high school at Temesvár (now Timișoara, Romania) and Szeged. He learned Hungarian at Fehértemplom, Hungary (now Bela Crkva, Serbia); completed Law School in Budapest (1881-1884), and worked at Budapest, Versec and Temesvár. His first short stories appeared in the Pest Journal (*Pesti Hírlap*) in 1886. His first novel, *Up and Down* (*Fenn és lenn*) of 1890 was a success and established his popularity. In 1894 he founded a literary weekly, entitled *New Times* (*Új Idők*) and edited it till 1944. He was detained during the communist-led Council (Soviet) Republic in 1919. He was the principal contributor of the *Pesti Hírlap* (*Pest Newspaper*), and emphasized the need for national unity. He had a strong role in the Irredentist Movement, but was always against Nazism, and advocated for Hungary's withdrawal from World War II. His major works include *Gyurkovics Sisters*, *Gyurkovics Boys* (*Gyurkovics lányok*, *Gyurkovics fiúk*) (1893), its adaptation for stage was a world success in 1899; as was *Blue Fox* (*Kék Róka*) (1917). His novels are *Pagans* (*Pogányok*) (1902); *Byzantium* (*Bizánc*) (1904); *The Seven Schwabs* (*A hét sváb*) (1916, 1983); *The Gate of Life* (*Az élet kapuja*) (1920), and *Northern Light* (*Északi fény*). He was the representative of the conservative-patriotic ideology in Hungarian literature at the beginning of the 20th century. He was a member of the Kisfaludy Society (*Kisfaludy Társaság*), president of the Petőfi Society (*Petőfi Társaság*), and vice president of the Hungarian Academy of Sciences. His academic office and membership were abolished in 1949; his banned works were again published in 1980 and his historical novels were republished in 1983. – B: 0881, 0883, 0887, 1257, T: 7103.

**Herding Dogs** – Probably the first domesticated animals of the Hungarians, used as a hunting companion in the beginning. With the advent of shepherding, two types of dogs came into existence through natural selection. The big bodied, white coated, guarding and defending type *komondor* and *kuvasz*; easily distinguished from the predators at night by its light color. The latter one was also a good herder dog. The smaller and faster herder dogs, the *puli*, *pumi* and *mudi*, were mostly black. Presently the *mudi* is the preferred dog among the Hungarian shepherds. – B: 1345, 1020, T: 3240.→**Mudi; Pumi; Puli; Komondor; Kuvasz.**

### **Herdsmen's Runic Numerals→Hungarian Runic Script.**

**Herend** – The oldest porcelain factory of Hungary, located in County Veszprém in Western Hungary (*Transdanubia, Dunántúl*) is the oldest porcelain factory of Hungary, creating porcelain objects of artistic value. It was founded by the faience and stone vessel maker Vince F. Stingl. In 1839 Mór Fischer, a porcelain painter, took over the factory and introduced the new technique of creating porcelain objects. At first his experiments were not successful as a commercial venture; but in 1841 he switched to imitating of old Chinese and

18th century European porcelain types of Meissen and Sèvres. Retaining his old fashioned style he achieved remarkable success at both home and abroad. At first his operation was restricted to the replenishment of the porcelain sets of aristocratic families; but soon after he produced independent samples. The great Hungarian families, the Esterházy, Batthyány, Pálffy and members of foreign ruling families were his first customers. These unique creations also achieved a remarkable success both at home and abroad. In 1873, under his son's guidance, the quality deteriorated and led to bankruptcy. However, the grandson of the founder saved it from ruin and restored it to its original level of excellence. In the millennium year of 1896, they made newer strides; and from the 1920's its products were individualized depicting flower motives of the Bakony region. Later, the fabrication of figurines again raised the reputation of the factory. Production between the two world wars was diversified with the inclusion of the "porcelain plastic" art. The expertise of the local artists was turned to a great advantage for the factory. The achievements of the 115-year-old factory were presented in 1954 at the Museum of Industrial Arts in Budapest. This factory of world fame includes products that are hand-painted and houses a permanent exhibition and museum section. – B: 1138, 1153, T: 7680.→**Fischer, Mór; Stingl, Vince Ferenc.**

**Heribald** (10th century) – Monk at St Gallen, Switzerland, at the time when the Magyar troops appeared in the Lake Constance region. All the monks fled but Heribald, who calmly watched their searching of the place. Due to his appealing behavior, the Hungarian warriors invited him to their feast. When Heribald and another monk sang psalms, they danced to the tune of the religious songs. A few years later when Heribald heard about another sortie by the Magyars, he begged the prelate to let him visit his friends. Ekkehard, also a St Gallen monk, recorded the Hungarian adventures around St Gallen and his chronicles greatly enrich Hungarian history of the post-Conquest period (AD 896). . – B: 1078, 1510, 1020, T: 7677.

**Herm** – (1) A stone pillar found of the roadside, depicting the god Hermes only its head and the sex organ. Its origin is assigned to the Pelasgians, who are said to have presented Hermes without hands and feet. It may be presumed that the souvenir was of an ancient sculptural experiment in an archaic form, which retained its original form. The herm arrived from Greece to Italy, where it was used as a boundary marker. The use of herms did not stop with antiquity. In the Middle Ages it became amalgamated with

ornamentation and the veneration of the saints. (2) In architecture, a herm is a whole or a half-column in the shape of a carved head, or the form of a half man. Its parts: head (possibly carved only in part), breast and arm bones. In most instances it is a square-shaped tapering shank. In the Baroque period it was a favorite decorative element of gardens. (3) A reliquary in the shape of a bust generally made of metal or precious metal. Perhaps its most beautiful example in Hungary is the herm of King László I (St Ladislav, 1077-1095), a Gothic cloisonné goldsmith's work of art from the second half of the 14th century. – B: 0942, 1153, 1020, T: 7677.

**Herman, Ottó** (Brezsnóbánya, now Brezno, Slovakia, 26 June 1835 - Budapest, 27 December 1914) – Naturalist, ethnographer, politician. He obtained his higher education at the Polytechnic of Vienna; joined the Polish Freedom Fighters in 1863, then returned to Hungary to open a photographic studio at Kőszeg. He became associated with museology while a conservationist in 1864, and established the zoological collection at Kolozsvár (now Cluj-Napoca, Romania), which later gained considerable acclaim. In 1875 he obtained a position in the Zoological Depository of the Hungarian National Museum, Budapest, and started and edited the *Natural Science Pamphlets* (*Természettudományi Füzetek*) for ten years. In the meantime he also assumed roles in political movements. Between the years 1879 and 1886, and later between 1888 and 1891, he was a Member of Parliament. Besides his progressive opinions he also adhered to patriotic views. Subsequently he wrote a series of important works reflecting his vast interests in the areas of ethnography, linguistics and archeology. In 1893, the founding of the Hungarian Ornithological Center is associated with his name, as is the launching of the fishing periodical *Aquila*. The style of his works is diversified, colourful and descriptive. Numerous textbooks and popularizing works all show his excellent style in Hungarian, with admirable command of the language. – B: 1150, 0883, 1257, T: 7675. → **Fenichel, Sámuel; Bíró, Lajos; Pungur, Gyula.**

**Hermann, Imre** (Emeric) (Budapest, 13 November 1889 - Budapest, 22 February 1984) – Neurologist, psychoanalyst. His higher studies were at the University of Budapest, where he earned an M.D. in 1914. During the Great War he served as a military doctor on various fronts. In 1919 he worked at the Psychological Laboratory of the University of Budapest. From 1919 until his death he worked as a psychoanalyst. Between 1949 and 1957 he worked at the Maros Street Clinic, Budapest. From 1919 he was Secretary of the International Psychoanalytic Society, later its Deputy President, and its President in 1945-1946. His research field included the world of instincts, perception, thinking and talent. His outstanding findings were the Clambering Theory and the Congruent Model concepts in the area of artistic creativity. His main works include *Introduction to the World of Psychoanalysis* (*Bevezetés a pszichoanalízis gondolkörébe*) (1923); *Psychoanalyse und Logik* (1924); *Das Ich und das Denken* (*The I and the thinking*) (1929); *The Ancient Instincts of Man* (*Az ember ősi ösztönei*) (1943, 1984), and *The Psychology of Anti-Semitism* (*Az antiszemitizmus lélektana*) (1945, 1990, in French 1989). – B: 0883, 1419, T: 7103. → **Ferenczy, Sándor; Buda, Béla; Bodrog, Miklós; Gyökössi, Endre.**

**Hernádi, Gyula** (Julius) (Oroszvár, now Bratislava-Rusovce, Slovakia, 23 August 1926 - Budapest, 20 July 2005) – Writer, script-writer, poet, dramaturgist. He completed his secondary education at the Benedictine High School, Győr (1944). He started studying

Medical School, later switched to Economics at the University of Budapest. During World War II he was a young army-trainee (*levente*) and later POW in the Soviet Union (1945-1947). After his return to Hungary he worked as a clerk. Soon his writings appeared in the periodicals *Star* (*Csillag*), *Transdanubia* (*Dunántúl*), and in the *Present Age* (*Jelenkor*). He became the scriptwriter for film director Miklós Jancsó. He was a dramaturgist of the Folk Theater (*Népszínház*) (1983-1985) and the József Katona Theater (*Katona József Színház*) Kecskemét (1989-1991); editorial Board member of the *New Time* (*Új Idő*); president of the editorial board of the periodical *Third Eye* (*Harmadik Szem*), and President of the Alliance of Independent Hungarian Writers (1991-1996); President of the Happiness Party from 1992. His 34-volume oeuvre includes: *On Friday's Stairs* (*Péntek lépcsőin*) novel (1959); *Highwaymen* (*Szegénylegények*) film-script (1965); *Corridors* (*Folyosók*) novel (1966); *Sirocco* (*Sirokkó*) novel (1969); *The Fortress* (*Az erőd*) novel (1971); *Red Requiem* (*Vörös rekviem*) novel (1975); *Vitam et sanguinem* (*My Life and My Blood*) film-novel (1978); *The Osteoporosis of Stupidity* (*A hülyeség csontritkulása*) dramas (1981) *Frankenstein*, novel (1984); *The Royal Hunt* (*A királyi vadászat*) dramas (1989), and *God Bleeding in the Kitchen* (*Isten a konyhában vérzik*) poems (1991). Sixteen of his novels were translated into ten European languages. He was recipient of the Attila József Prize (1976), the Ernő Szép Prize (1996) and the Kossuth Prize (1999). – B: 0874, 1257, T: 7103.→**Jancsó, Miklós.**

**Hero, Order of** →**Vitéz, Order of.**

**Heroes' Memorials** – Erected for the memory of fallen soldiers, the *Honvéds*, the “defenders of the homeland” or “homeguard”. It was the name of those soldiers who fought in the Hungarian War of Independence against Austria (1848-1849). The first such memorial was erected by the city of Debrecen on the Square located between the Reformed College and the Great Reformed Church. It was called *Honvéd emlék* (Heroes' Memorial). A more artistic monument was the statue of General Bem, erected in 1880 at Marosvásárhely, (now Tirgu Mures, Romania), but later demolished by the Romanians. In the Fort of Buda the sculptor György (George) Zala created his famous Hero's Memorial, which was followed by numerous monuments all over the country. The statue of Lajos (Louis) Kossuth, leader of the War of Independence (1848-1849), was erected at 70 different locations throughout the country and many in the western European countries and North America. – B: 1078, 1020, T: 3323.→**Honvéd; Freedom Fight of 1848-1849; Kossuth, Lajos; Zala, György.**

**Herpály Culture** – A culture dated between 3800-3200 BC. In the latter period of the new Stone Age the agricultural practices were sufficiently productive by European standards to ensure the sustenance of a larger community with the aid of advanced tools used for fishing and hunting. Archeological digs found along the River Tisza, the “Tell Settlements”, showed densely populated riverside villages in existence for many centuries that were renewed and enlarged many times. The first finds of metal and copper usage appeared, as did the first cremation burial ceremony. – B: 1230, 1020, T: 7676.

**Herskó, Ferenc** (Francis) (Hersho, Avram) (Karcag, 31 December 1937 - ) – Biologist. He and his family emigrated from Hungary to Israel in 1950. He studied Medicine and obtained his M.D. from the Haddassah Faculty of Medicine at the Hebrew University in Jerusalem, where he also received a Ph.D. in 1969. He was a Distinguished Professor at the Rappaport Faculty of Medicine at the Technion in Haifa, Israel, where he was

associate professor (1972-1980) and became professor in 1980. In 2004, he received the Nobel Prize in Chemistry for the discovery of ubiquitin-mediated protein degradation. His publications include *Components of ubiquitin-protein ligase system...* (with Heller, H., Elias, S. and Ciechanover) (1983); *The Protein Substrate Binding Site of the Ubiquitin-Protein Ligase System* (with Heller, H., Eytan, E. and Reiss, Y.) (1986), and *A Multicomponent System that Degrades Proteins Conjugated to Ubiquitin...* (with Ganoth, D., Leshinsky, E., Eytan, E.) (1988). In addition to the Nobel Prize, he is the recipient of a number of prizes, among them the Israel Prize in Biochemistry and Medicine (1994), as well as the Middle Cross with Star of Honor of Republic of Hungary (2005). – B: 1031, T: 7103.

**Hertelendy, Gábor** (Gabriel) (Gosztony, 7 September 1742 - Gyöngyös, 20 June 1820) – Military officer. He was educated at Kőszeg, joined the army in 1759, and became Commander of the newly formed Palatine Hussar Regiment of recruits from the ethnic dialect areas of Jász, Kun and Hajdú. He served with his regiment until he was promoted to division commander, fought in many battles of the Seven Years' War, and also against Turkey and France. His most memorable action was during the battle of Ulm (October, 1805) where, leading his Palatine Hussars, he cut through the whole French Army. A military march was dedicated to his name. – B: 1078, 1020, T: 3233.

**Hervay, Gizella** (Makó, 14 October 1934 - Budapest, 2 July 1982) - Poetess. She studied at the Transylvanian University of Kolozsvár (now Cluj-Napoca, Romania) graduating in 1956. She was editor of the children's magazine *Sunshine (Napsugár)* (1956-1957) and editor at the *Young Worker (Ifjúmunkás)*, (1957-1959 and 1968-1971). She taught in Bucharest (1959-1961). Her volumes of poetry include *Flower in the Infinite (Virág a végtelenben)* (1963); *From Morning to Death (Reggeltől halálig)* (1966); *Simple Sentences (Tömondatok)* (1968); *Filing Form (Űrlap)* (1973), and *Dives (Zuhanások)* (1977). The unveiling of her career is associated with the appearance of the first "Forrás Generation" of Transylvania (*Erdély*, now in Romania). In 1976, she moved to Budapest and was the editor at the Móra Publishers. In 1977 she lost her young son in the earthquake of Bucharest. In the same year she published his collected poems under the title *Continuation of the Sentence (A mondat folytatása)*, followed by *Sundered Bird (Kettészelt madár)* (1978); *Expelled Rainbow (Száműzött szivárvány)* (1980), and *Loden Coat on the Nail of Eastern Europe (Lódenkabát Kelet-Európa szegén)* (1983). She also published poems for children, such as *Book of Kobak (Kobak könyve)* (1966), and *Second Book of Kobak (Kobak második könyve)* (1968). She translated Romanian poetry as well. Hervay's metaphorical and visionary verses embody the drama of feminine existence. Her later works express the feeling of homelessness and personal mourning over those who perished by inhuman force. She committed suicide. In accordance with her last will, her ashes were placed next to those of her husband's in the Házsongárd cemetery at Kolozsvár. – B: 1153, 0878, 0883, 1257, T: 7617.

**Herzegovina** – A part of the Balkans, constituting a province within Bosnia, in the vicinity of Montenegro and Dalmatia. (Herzegovina-Neretva covers some 4,500 square kilometers. It is organized in 9 municipalities and it is populated with 270.000 inhabitants. Its capital is Mostar). In the mid-700 AD there was an infiltration of Serbs into the Bosnian-Greek population. In the 10th century it attained separate status, called *Hum*, and was ruled by governors. The Hungarian king András II (Andrew) took

possession of it in 1197 from the Bosnian potentate Kulin. The Bulgarians recaptured it in 1382. In the 14th century it became part of a Serbo-Bulgarian-Greek state, but by 1362 it again came under Hungarian rule. The present name dates from 1440. Although occupied by Austria-Hungary in 1878, it remained under Turkish influence until 1908. Later the Austro-Hungarian Monarchy absorbed ca. 12,000 km<sup>2</sup> of Herzegovina. It became part of the Serbian kingdom after the dissolution of the Monarchy. With other regions it became involved in the Balkan War in 1992. After much bloodshed and suffering, the Dayton Peace Accord of November 1995, created the Republic of Bosnia-Herzegovina. – B: 1078, 1020, T: 7677.

**Herzl, Theodor** (Tivadar) (Benjamin Ze'ev Herzl) (Pest, 2 May, 1860 - Erlach, Switzerland, 3 July, 1904) – Founder of the Zionist Movement. He was educated in the spirit of the German-Jewish “Enlightenment”. The family moved to Vienna in 1878 after the death of his sister. He received a Ph.D. in law in 1884, and worked for a short while in the law courts in Vienna and Salzburg. Within a year, he left law and devoted himself to writing. In 1891 he became Paris correspondent for the liberal *New Free Press* (*Neue Freie Presse*) in Vienna. In Paris he witnessed the rise of anti-Semitism, which resulted from the court martial of Alfred Dreyfus, a Jewish army officer. Herzl gradually became convinced that the only solution to the Jewish problem was the mass exodus of Jews from their places of residence. Originally he wrote that it didn't matter where Jews went. He eventually felt that a national home in Palestine was the answer. He published a pamphlet on the Jewish State in 1896, and Jewish reaction to his plan was mixed. Many Jews rejected it as too extreme, although there were those who responded with enthusiasm and asked him to head what was to become the *Zionist Movement*. He succeeded in convening the first Zionist Congress in Basle, Switzerland, August 29-31, 1897. The Congress adopted the Basle Program and established the World Zionist Organization to help create the economic foundation for the proposed Jewish state. Herzl was elected president of the organization and chaired the first six Zionist congresses. He spent much of his time in his remaining years meeting with world leaders, both Jewish and non-Jewish, trying to enlist financial and political support for his dream of a Jewish state. His works include *The Ghetto*, drama (1884); *The Jewish State* (*Der Judenstaat*) (1896), and *Old New Land* (*Altneuland*) (1902). He died in 1904 before his dreams were realized. In 1949, his remains were transferred to a mountain in western Jerusalem, which became Mount Herzl and is today a major military cemetery. – B: 1031, 1377, T: 1377.

**Hess, András** (Andrew) (1473 is the only date of his activity) – Printer, probably of German origin. During the 1460s he lived in Rome and worked as a manuscript copier at the St Eusebius Monastery and learned the printing trade. In 1472, during the reign of King Mátyás I (Matthias Corvinus, 1458-1490) at the invitation of László (Ladislás) Karai, Vice-Chancellor and Provost of Buda, he moved to Buda, where he set up the first printing press in Hungary. The font types he used in Buda were the ones he brought with him from St Eusebius Monastery's Lauer press. In 1473, on the evening before Pentecost, with the support of László Karai he released his first publication, the *Chronica Hungarorum* (*Budai Krónika*). He used the same font types on the following publications: *De legendis poetis*, by St Basil, and *Apologia Socratis*, by Xenophon, both condensed and arranged by Leonardus Brunus Aretinus. Hess' printing establishment closed down soon after, probably due to his death. – B: 0883, 1257, T: 7617.→**Buda Chronicle**.

**Hetényi, Varga Károly** (Charles) (Hosszúhetény, 7 October 1932 - Pécs, 2 January 2002) – Writer, researcher. He studied in Hosszúhetény, Pécsvárad, and at the Jesuit Pius High School. After graduation he continued his studies between 1951 and 1956 at the Institute of Pedagogy, and received his teacher's qualification in Hungarian and German languages. Despite having a tuberculosis-infected lung removed in 1959, he managed to have an active and successful life. Besides teaching, he wrote short articles and translated religious books. Inge Scholl's book, *White Rose* (describing the life of young people who paid with their lives for daring to resist Hitler's tyranny) made a great impression on him because he often heard accusations that the Church was pro-fascist. Scholl's book and a visit to the concentration camp of Buchenwald exhibiting the photos of numerous priests persecuted by the Nazis for their faith were decisive for his life and life-work. He decided to search for and collect all the documents about those Hungarian priests who were persecuted. He concluded that those who wanted to destroy the Church started by persecuting priests. In his research he found that the Communists were doing the same as the Nazis. He therefore extended his research and titled his collections and the five volumes published *Priests and the Religious in the Shadow of the Arrow Cross and the Red Star (Papok és Szerzetesek a Nyilaskereszt és a Vörös csillag árnyékában, I,II,III); Priestly Fates, vols. i,ii,iii, (Papi Sorsok, I,II,III,)*, and *Monks (Szerzetesek)*. He visited libraries, archives, searched for collections, newspaper reports, and traveled to find witnesses; before he died, he had documented 2,010 priests and religious people who suffered persecutions for their Church. During all this time he was accompanied and helped by his wife Borbála, who was also his nurse since 1959. Hetényi was recipient of several awards; one of them is the Petőfi Award for the Freedom of the Press. – B&T: 7643.

**Hétfalú** – (now Sarte Sate, Transylvania, *Erdély*, in Romania) – Combined name for seven regional villages, occupying a valley east of the city of Brassó (now Braşov) in the area of the Barcaság region. The Hungarian names of these villages are: Bácsfalú, Csernátfalú, Hosszúfalú, Pürkerec, Tatrang, Türkös and Zajzon. The populations of these villages were settled there to defend the mountain passes of Bodza, Ósánc, Tömös and Töröcsvár of the Carpathian Mountains. The Romanian authorities united four villages: Bácsfalú, Csernátfalú, Tatrang and Zajzon into the town of Sacele with 25,000 residents. The population of this area is still mainly ethnic Hungarian with minor Romanian additions. – B: 1078, 1134, 1336, 1020, T: 7656.

**Hetumoger**→‘Seven Hungarians’

**Hevenesi, Gábor** (Gabriel) (1656-1717) – Jesuit historian, cartographer, representative of Baroque-style Jesuit devotional literature. In his moralistic, contemplative writings he made use of the devices of fine prose. Hevenesi compiled a representative biographical collection of Hungarian saints. He initiated the compilation of Hungarian Church history based on factual source material. In 1689 he prepared the first atlas of Hungary, the *Atlas Parvus Hungariae*. – B: 1153, T: 7617.

**Hevesi, Sándor** (Alexander) (Nagykanizsa, 3 May 1873 - Budapest, 8 September 1939) – Stage manager, writer, theater historian, translator of literary works. His secondary studies were in his hometown; then he read Law and Philosophy at the University of Budapest. He wrote critiques on theater performances and theoretical writings on the theater, which appeared in the Capital City journals. Between 1892 and 1906, he was a

contributor to the *Hungarian Review* (*Magyar Szemle*). In 1901 he became stage manager of the National Theater (*Nemzeti Színház*), where he worked from 1912 till 1933, being its manager in the last ten years. From then on till his death, he was Stage Manager of the Magyar Theater (*Magyar Színház*). Between 1927 and 1932, he taught dramaturgy at the Academy of Dramatic Arts, Budapest. He was a member, later Director of the Thalia Society (*Thália Társaság*). He is highly regarded as the pioneer of modern stage-managing in Hungary. He was the stage manager for some 280 plays, including Madách's *The Tragedy of Man* (*Az ember tragédiája*); Shakespeare's *Antony and Cleopatra* and *Richard III*; Mozart's *Magic Flute* (*Varázsfuvola*) and Ernő Szép's *Azra*. Dramas he stage-managed include *Father's Son* (*Apjafia*) (1912); *Prisoner of War* (*Hadifogoly*) (1917); *Emperor and Clown* (*Császár és komédiás*) (1919), and *Elzevir* (1925). Some of the books he authored are *Drama and Stage* (*Dráma és Színpad*) (1896); *Theater* (*Színház*) (1937) and *The School of Drama-writing* (*A drámaírás iskolája*) (1961). He also translated foreign dramas. The Theater and Cultural Center of Zalaegerszeg bear his name, as well as a Square in Budapest. – B: 1105, 1257, T: 7103.→**Paulay, Ede; Staud, Géza.**

**Hevesy, György** (George) (Budapest, 1 August 1885 - Freiburg, Germany, 5 July 1966) – Chemist. He completed his higher studies in Budapest, Berlin and Freiburg, where he received his Ph.D. in 1908. Thereafter, he worked in various research institutes, among others in Manchester, from 1911 to 1913. Here, he came to the realization that the radioactive D-radium could not be isolated by chemical means from the non-active G-radium and lead, but could be used as a tracer element for the metallic element lead. He developed this method together with Fr. Paneth in 1913, at the Radium Research Institute of Vienna. After 1918, he became Professor of Physics and Chemistry at Budapest University. Subsequent to 1919, he continued his research at the Theoretical Physics Institute of Copenhagen. It was there with D. Coster that he discovered the No. 72 element of the Periodic Table in 1922, which he named *Hafnium*, after the Latin name of Copenhagen. From 1926, he assumed the Chair of the Physics and Chemistry Department at Freiburg University and became the Director of its research institute. In 1926, he used fluorescent chemical analysis to study the ratios of occurrence of different elements on Earth and in the Cosmos. After National Socialism came to power in Germany, he returned to Denmark in 1935. Following the occupation of the country, he settled down in Sweden and worked at Stockholm University as Professor of Organic Chemistry in 1943. His work was significant in the use of radioactive isotopes as indicators. In the course of the research, he tried to physically isolate some isotopes; he discovered the isotope of potassium with a mass number of 41, and the radioactive isotope of phosphorus with the atomic mass number of 32. For his results over several decades, by using the radioactive indicator method in the chemical and radiation biological research, he was awarded the Nobel Prize “for the peaceful use of the atom”. The results of his research were set forth in leading Hungarian and foreign scientific journals in numerous monographs and in several independent works. Several universities awarded him an Honorary Doctorate. – B: 0883, 1105, T: 7456.→**Isotopes.**

**‘Heying’** – Refers to the repeating refrain of the minstrel song customarily sung on New Year's Eve to say goodbye to the old and usher in the New Year. A Hungarian custom in Moldavia involved the young men of the village who were the players; among them are the ‘*heyer*’ or ‘*uráló*’, who recounts the story and handles the bull, the flautist, the

whipper and the drummer, who also gathers the offerings. They usually perform at girls' houses. The story is about wheat growing, from the moment of sowing the seeds to the arrival of the new bread on the table. The refrain signals the players to flick their whips and shout "hey, hey". The most memorable musical part of the performance is when the flute and the drum play. – B: 1134, 1020, T: 3240.

**Hidas, Antal** (Anthony) (Gyula Szántó) (Gödöllő, 18 December 1899 - Budapest, 22 January 1980) – Author, poet, literary translator. For his revolutionary views and recitals of Ady's poems, he was expelled from high school. In 1920, he moved to Slovakia, where he became involved with the Communist Party. The *New Paths (Új utak)* published his first revolutionary poems, starting in 1919. In 1925, he returned to Hungary, where his first collection of poems, *On the Land of the Counter-revolution (Az ellenforradalqm földjén)*, was released. Fearing arrest, he fled to Moscow. There, he played an important role in launching the periodical *Sickle and Hammer (Sarló és kalapács)*, a yearbook. His poems were published in foreign journals. Between 1926 and 1936, he was one of the leaders of the Hungarian Revolutionary Writers and Artists Association of Moscow. Between 1929 and 1935, he was a member of the International Revolutionary Writers Council and was also the editor of the organization's periodical. Some of his poems that reached Hungary anonymously became popular songs of the revolutionary movement. He was imprisoned in 1938, released in 1944, and was allowed to return to Hungary in 1959. At home, he became a patron of Russian-Hungarian literary relationships. His works include his autobiography *Ficzek Trilogy (Ficzek trilógia)*; *Mr. Ficzek (Ficzek úr)* (1936, 1966); *Martin and his Friends (Márton és barátai)* (1959); *In Need of Other Music (Más muzsika kell)* (1963); *The Colonies Are Calling (A gyarmatok kiáltanak)* (1933); *Petőfi* (1949); *My Aunt's Garden (Néném kertje)* (1958); *We Yearn for You (Vágyódunk utánad)* (1968); *Cherry Trees (Cseresznyefák)* (1978), and *I Shall Return (Visszatérek)* (1983). In 1979, he was awarded the People's Friend Prize. He was a recipient of the Kossuth Prize in 1962. – B: 0883, 1257, T: 7667.

**Hidas, Frigyes** (Frederick) (Budapest, 25 May 1928 - ) – Composer. He was a student of János (John) Viski at the Ferenc (Franz) Liszt Academy of Music in Budapest (1951-1966). He was Musical Director of the National Theater (*Nemzeti Színház*), Budapest (1951-1966); Musical Director of the Operetta Theater (*Operett Színház*), Budapest (1974-1979). He is a highly prolific free-lance composer, who believed in tunes and harmonies in a traditional sense; he writes in an easily accessible idiom. His works include numerous pieces for wind instruments, many of them composed for famous artists. He received a number of commissions from ballet companies, the State Opera House, radio stations, universities, and various musical societies. He composed operas, such as *Woman and Truth (Az asszony és az igazság)*; *Danube-bend (Dunakanyar)* and *Bósendorfer*; also ballets, concertos, orchestral, chamber, solo and choral music, and accompanying music for theatrical works. His other compositions include *Oboe concerto* (1951); *Horn concerto* (1968); *Funeral music, Requiem for the Hungarian Army* (1973); *Merry Music, Concerto for Wind Orchestra* (1980); *Baroque Concerto* (1984); *Cedar*, ballet (1985), and *Circus Suite* (1985). He is a recipient of the Erkel Prize, twice, the Bartók-Pásztory Prize, and the title of Merited Artist. – B: 0879, 1178, T: 7456, 7103. → **Viski, János**.

**Hidas, Péter I.** (Balassagyarmat, 26 November 1934 - ) – Historian. His secondary

education started at the Berzsényi High School, Budapest, in 1945. He read Law at the Law Faculty of the University Budapest for three years, until 1956. After the Revolution of 1956, he left Hungary and emigrated via Austria to Canada. At first he was trained as a schoolteacher and began a teaching career in 1959. He worked as a teacher from 1959 to 1969 at elementary and high schools in Ontario and Quebec. He earned a B.A. in History at Sir George Williams University, Montreal (1964); M.A. in History, at McGill University, Montreal (1967); and Ph.D. in History at McGill University, Montreal (1974). He was a professor at Dawson College, Department of History and Classics, Montreal, Quebec from 1969 until his retirement in 1995. He was a part-time lecturer at Loyola College, Montreal (1969-1970), and at the University of Sherbrooke (1978-1979). In 1987 he became a Research Fellow at the Hungarian Academy of Sciences' Institute of History, Budapest. From 1994 to 1996, he was in charge of Hungarian Studies, Department of Russian and Slavic Studies at McGill University. Between 1991 and 1994, he was Director, Apple (computer) Center for Innovation at Dawson College; and in 1995 he was a part-time lecturer in the M.A. program at the University of Sherbrooke. At various times, he was Department Chairman, a member of the Board of Governors (Dawson), Editor of *East Central Europe - L'Europe du Centre-Est*; and Editor-in-Chief of *The Laws of Hungary* series. He participated at fourteen conferences and congresses presenting papers. He published some 30 printed works including *World War II – Workbook* (1986); *The First Russian Intervention in Transylvania in 1849* in *Eastern Europe, Historical Essays*, ed. H.C. Schlieper (1969); *Esterházy family, Dezső Bánffy, László Velics*, entries in the *Encyclopedia of Eastern Europe; From the Congress of Vienna to the Fall of Communism*, ed. Richard Frucht (2000), *Hidden Urbanization: The Birth of the Bourgeoisie in Mid-Nineteenth Century Hungary*, *Jews in the Hungarian Economy, 1760-1945* (1991); *Canada and the Refugees of 1956 (Kanada és az 1956-os menekültek)* in *Világosság* (October 1994); *The Jews in Hungary* (documentation, with an introduction by Peter I. Hidas (*A zsidók Magyarországon* (Hidas Peter I. Bevezetőjével), in *Mult és Jövő*, Volume 15, (2004). Some of his works are available on the Internet. – B: 1130, T: 7103.

**Hidegkuti, Nándor** (Budapest, 1 March 1922 - Budapest, 14 February 2002) – Soccer player. He was a member of the legendary “Golden Team” in the mid 20th century. His first success was in 1952, when his team won the Gold Medal at the Helsinki Olympic Games, Finland. The peak of his career was at the “Match of the Century” at Wembley Stadium, London, when the Hungarian National Team won 6:3 against England’s best, in 1953. His team won Silver Medal at the World Cup Competition in Bern, Switzerland in 1954. He played in his MTK Budapest Football Club 302 times and achieved 222 scores. His Club was three-time champion (1951, 1953 and 1958). He invented the role of center rear position. He was also an eminent coach, working in Italy, Egypt, Libya, and with the ETO Football Club of Győr – leading them to a championship in 1953. His Club, the MTK Budapest Football Club was named after him. – B: 1051, T: 7103. → **Golden Team; Bozsik, József; Budai, László; Buzánszky, Jenő; Czibor, Zoltán; Grosics, Gyula; Hidegkúti, Nándor; Kocsis, Sándor; Lantos, Mihály; Lóránt, Gyula; Puskás, Ferenc; Zakariás, József; Match of the Century.**

**Hierotheos** (c 950 AD) – Greek-Byzantine monk, Bishop of Turkia (i.e. Hungary) by appointed by heophylaktos, Patriarch of Constantinople. Hierotheos founded a bishopric at Fejérvár, renamed Gyulafehérvár (now Alba Iulia, Romania) by King László I (St

Ladislás, 1077-1095). Joannes Skylitzes narrates that around 952, Hungarian Chieftain Gyula visited Constantinople, where he was baptized, and Emperor Constantine VII (Constantinos Porphyrogenetos) lifted him from the baptismal font. He also received the honorary title *Patrikios* in Constantinople. Gyula brought Hierotheos back to Transylvania (*Erdély*, now in Romania), where he “*converted many to Christianity from barbaric pagan errors.*”

On August 21, 2000, Ferenc Mádl, president of Hungary, and Viktor Orbán prime minister received Angelo Sodano Papal Legate in the Hungarian Parliament. The Cardinal conveyed Pope II. John Paul's message to the Hungarian people on the occasion of the millennium of the Hungarian Christian State. The authorities also received Bartolomaios I, Greek Orthodox Patriarch of Constantinople [Istanbul], who presented two icons depicting St. Stephen and Hierotheos to them and emphasized the key role they had played in the conversion of Hungary. That was the reason for their recent canonisation by the Greek Orthodox Church. – B: 0942, 1078, 1230, 1020, T: 7103.→**László I (St. Ladislás), King; István I (St. Stephen), King.**

### **Higher Nobility→Upper Nobility.**

**Highwaymen, Songs of** – One type of Hungarian folk poetry of the 19th century, a continuation of the classical ballads. They portray the legendary doings of poor outlaws, the escapees of military drafting or bondage, living in marshlands and desolate places. These songs have a relaxed style and accurately portray real life. Their favorite heroes are Bandi Angyal, Imre Bogár, Marci Zöld, Vidróczki, Patkó, Rózsa Sándor, and their companions who, according to traditions, robbed strangers and the rich but always helped the poor. They were arch-typical folk heroes in their richly decorated attire riding their famous horses and always fighting their enemies. One of the famous songs, *A Vidróczki hírös nyája...* (*The famous herd of Vidróczki...*) was arranged by Zoltán Kodály for mixed choir. – B: 1150, T: 3240.→**Highwaymen, Times of; Kodály, Zoltán.**

**Highwaymen, Times of** – Following the defeat of the 1848-1849 War of Independence against Austria, the reprisal of the Imperial power against the freedom fighters followed. Naturally, it was directed toward the common people in Hungary, where the fighters came from. It resulted in widespread disorder and lawless behavior as forms of resistance. This spread throughout the land and public security suffered greatly. On 1st of April 1869, the Royal Commissioner, Count Gedeon Ráday, was charged with re-establishing order and eliminating the outlaws. He successfully accomplished his task with the capture of Sándor Rózsa and his companions. – B: 1230, 1143, T: 3240.→**Ráday, Count Gedeon Rouge; Rózsa, Sándor; Sobri, Jóska; Savanyú, Jóska; Vidróczki, Márton; Zöld Marci.**

**Hild, József** (Josph) (Pest, 12 August 1789 - Pest, 6 March 1867) – Master builder. He learned his trade first from his father, later on in Vienna and Eisenstadt (Kismarton, now in Burgenland, Austria). After his father's death he took over the business, but wanted to know more about his trade, so he went to study in Italy for three years. He spent time in Milan, Florence, Naples and Rome. After his return, he became a much sought-after master builder in Pest. He built more than 900 buildings and a few hundred of them are still standing. He followed the classical style and his buildings dominated the fast-developing city's skyline. Among his buildings are those on *Roosevelt Square*, and the

*Császárfürdő (Emperor's Bath)* in Budapest. Around 1860, his style turned to the romantic historicism. He accepted mainly private commissions and built country mansions and summer villas, e.g. Derra House, Tänzer House, Hild Villa, Budapest, and the Teleki Mansion in Gyömrő. They all represent some of the best of architectural art. His most important works were churches, such as the completion of the *Esztergom Cathedral*, which was started by János Pach; the *Cathedral of Eger*, the *Reformed Church in Cegléd*; he also designed the *St István Basilica* in Budapest. Schools bear his name. – B: 0883, 1442, T: 7663.→**Pollack, Mihály; Zitterbarth, Mátyás,**

**Hillock Tomb Culture** – One of Europe's most powerful cultures. It made its way into the Carpathian Basin at the beginning of the Late Bronze Age (1500-1200 BC). The life of the people of that age, the way it had been for centuries, ceased to exist when pastoral tribes invaded them and forced their way of life upon those local inhabitants who had managed to survive. The Hillock Tomb Culture was composed of many local groups in the Carpathian Basin, the most notable being the Pilinyi Culture in Northern Hungary. This culture, dating back to the years between 1300 and 800 BC, had a significant metallurgical industry and became independent within a short period of time. – B: 1230, T: 7676.

**Himnusz**→**National Anthem, Hungarian.**

**Hites, Kristóf, Endre O.S.B.** (Christopher, Andrew) (Csicsó, now Čičov, Slovakia, 13 August 1913 - Pannonhalma, 26 May, 1999) – Monk, teacher, patriot. In 1934 he entered the Benedictine Order. He was educated in Pannonhalma and Budapest, studying Theology, Hungarian and Latin Literature. He taught at his Order's High School in Sopron (1943-1945), then at the Benedictine Monastery at Révkomárom (now Komárno, Slovakia) (1945-1948). In the same year, for political reasons, he left Slovakia and emigrated to the USA. He was a High School teacher in Cleveland, OH, Newark, N.J., and Royal Oak, MI. He spent most of his life at Woodside, in the vicinity of San Francisco, California, where he and others founded the Woodside Priory, being its Prior from 1960 to 1975. In 1986, he was appointed priest for Hungarians living around the San Francisco Bay area. He founded a Hungarian Benedictine High School with hundreds of Hungarian students. One of his most important activities was the protection of the rights of the Hungarian minority in Czechoslovakia (in Slovakia, from 1 January 1993), who suffered injustices due to the Versailles-Trianon Peace Treaty (1920), which threw them under the oppressive authority of Czechoslovakia. His activities were at a time when Hungary, as mother country under Communist rule, was not concerned about their fate. He published articles in the weekly, *Sunday of Catholic Hungarians (Katolikus Magyarok Vasárnapja)*, published the *Under Twin Yokes (Kettős Járom Alatt)* bulletin, financially supported the journal, *Herald of Rákóczi (Rákóczi Hírnöke)*, as well as the Hungarian Boy Scout Movement in exile. He also supported the National Committee of Hungarians in Czechoslovakia (*Csehszlovákiai Magyarok Nemzeti Bizottsága*) and the Rákóczi Alliance (*Rákóczi Szövetség*), Budapest. He also promoted Hungarian and Slovakian friendship. In 1994 he returned to Hungary and lived in the Pannonhalma Monastery. He was the recipient of many medals and acknowledgements. – B: 1037, T: 7103.→**Catholic Church in Hungary; Trianon Peace Treaty; Benedictine Order in Hungary.**

**Hitler, Adolf** (Braunau, Austria, 20 April 1889 - Berlin, 30 April 1945) – German

politician; President and Chancellor of Germany. He spent his childhood in Linz and Vienna, served in World War I, was wounded and received a decoration. In 1919, he founded the Nazi (National Socialist German Workers) Party. In 1923, he attempted a coup (the “Beerhall Putsch”), which failed and he was imprisoned for 5 years. During his term in prison, he wrote his autobiography, *Mein Kampf* (My Fight). Exploiting the nationwide resentment of the Versailles Peace Treaty, he quickly rebuilt his party and led it into national prominence. In the early 1930s, his Party became the most powerful political force. By parliamentary means he became Chancellor of Germany on 30 January 1933 and, after President Hindenburg’s death, he was elected President of Germany, thus becoming a dictator (President and Chancellor in one person, proclaiming himself, *Führer*, Leader of Germany). With so much power in his hands, he soon established a one-party system of Socialism combined with Nationalism. Freedoms were suspended, minority groups, like Jews and Gypsies were severely oppressed. At the same time, the serious unemployment of the early 1930s was successfully eliminated, expressways (*Autobahnen*), and built the “people’s car” (*Volkswagen*) that was mass-produced. Rearmament of Germany soon followed, and Austria was incorporated (*Anschluss*) into his *Third Reich*, in 1938. Hungarian internal politics became increasingly influenced by right wing trends (introduction of the earlier *numerus clausus*, followed by the Jewish laws of 1938 and 1939), leading to the formation of the Arrow Cross Party (*Nyilaskeresztes Párt*), headed by Ferenc (Francis) Szálasi. Hitler tried to win over Regent Horthy, the Head of State, by arranging a lavish reception and a military parade for him in August 1938. While Czechoslovakia was dismembered by Hitler in stages, Hungary succeeded in regaining some of its lost territories (12,103 km<sup>2</sup>), with a population of 1,057,323, in 5-10 November 1938, in the Northern Hungary area of the Carpathian Basin, close to the border of truncated Hungary, as a result of the First Vienna Award of 2 November 1938 (where Ribbentrop, Hitler’s deputy, was one of the negotiators). After Hitler put an end to the existence of the state of Czechoslovakia, Hungary was able to annex its former territory of Carpatho-Ukraine as well, in March 1939, involving an area of 12,171 km<sup>2</sup>, with a population of 698,385. Hitler arbitrated in the Second Vienna Award on 30 August, 1940, when he drew an east-west line through Transylvania (part of Romania since 1920) and returned the northern 2/5 of it (43,492 km<sup>2</sup>), together with the Szeklerland to Hungary, with a population of 2,577,291 (1941), more than 1 million of which were ethnic Hungarians, uniting with their motherland. While waging war against the Soviet Union, Miklós Horthy, Regent of Hungary Hungary, engaged in secret peace negotiations with the United States and the United Kingdom. Hitler discovered this betrayal and, on 19 March 1944, German forces occupied Hungary. Hitler’s relationship with Regent Horthy grew increasingly strained during this time, especially after his radio proclamation of armistice on 15 October 1944, finally ending in Horthy’s deportation to Germany. After the relative peace in neutral Hungary in the early part of World War II, Hitler became increasingly demanding for Hungary’s substantial military participation on the Russian Front, which finally led to the disaster at the Don River Bend, where the Second Hungarian Army was almost annihilated in 1943. When Romania changed sides, suddenly turning on the German forces, their allies until then, fighting on the southern section of the Russian front, creating a sudden undefended vacuum, Hungary became rapidly involved in the War on its own territory. Hitler decided to sacrifice Budapest as a bastion of defense (51-day

Siege of Budapest), as long as possible, to hold up the advancing Soviet forces along the Budapest-Balaton line. In this way the Soviet army could not advance much beyond the western border of Hungary at the conclusion of the war. Most of the Hungarian army units continued fighting a rearguard action, together with the German forces, until the end of the war on 9 May 1945. – B: 1031, 7456, T: 7456.→**Vienna Award I; Vienna Award II; Ciano, Galeazzo; Don Bend, Battle of the; Horthy, Miklós; Szálasi, Ferenc; Budapest, Siege of.**

**Hlatky, László** (Ladislav) (Budapest, 7 March 1911 - Budapest, 9 November 1982) – Actor, comedian. He graduated from the Academy of Acting in 1931. His career began at the Podium Cabaret of László (Ladislav) Békeffy. In 1939 he performed in Debrecen; then he entered into contract with the staggione company of Aladár Ibász, which brought him to Pécs and Szeged. During the 1940s, he toured the provinces with his own company, the Country Ramblers Repertory Theater. For a brief period, he was Director of the National Theater in Pécs, and later joined the Comedy Theater (*Vígszínház*) and the People's Army Theater (*Katona Színház*). From 1955 until his death, he performed with the companies of the Comedy Stage and the Little Stage. He performed primarily in comical character roles. He and Ervin Kibédy resurrected the classical comedian cabaret pair, *Hacsek and Sajó*, where Hlatky played Sajó. He was also remarkable in the Radio Play series for children entitled *Csinn-Bumm Circus*. Although he acquired fame in comic roles, he also performed in classical and modern productions. His main roles include Demjanovics in *Two Men Under the Bed* (*Két férfi az ágy alatt*) by Dostoievsky-Szántó-Szécsén; Ács in M. Csizmarek's *We're Not Living in a Cloister* (*Nem élünk kolostorban*), and Bujkalov in Katajev's *Crazy Sunday* (*Bolond Vasárnap*). There are a number of feature films to his credit including the *State Department Store* (*Állami Áruház*); *Upwards on the Slope* (*Felfelé a lejtőn*); *The Golden Man* (*Az aranyember*), and *the Poor Rich* (*Szegény gazdagok*). – B: 0883, 1439, 1445, T: 7667.→**Kibédy, Ervin; Békeffy, László.**

**Hobble** (*Béklyó, békó*) – Equipment to fasten together the legs of a horse, to prevent it from free motion, also called leg-step. It is fastened on the two front legs. It consists of a chain and two shackles (*kelevéz*) fastened onto the pastern of the horse's foot. – B: 1134, T: 7456.→**Lance.**

**'Hodie mihi cras tibi'** (Latin) ("Today it is for me, tomorrow it is for you") – An aphorism based on a quotation from an obscure biblical text. Used by General József (Joseph) Nagysándor before his execution in Arad on 6 October 1849. – B: 1138, T: 7677.→**Arad, Martyrs of; Nagysándor, József.**

**Hódi, Sándor** (Alexander) (Nagyatód, Hungary, now Novi Kozarci, Serbia, 30 October 1943 - ) – Psychologist, writer. His higher studies were at the University of Újvidék (formerly in Yugoslavia, now Novi Sad, Serbia) (1963-1965), then at the Faculty of Arts of the University of Budapest (1967-1972). From 1975 to 1981, he worked as a labour psychologist in Ada, then as psychologist in a health center. He was Director of the Selye-Szabó's Stress, Ars et Scientia Institute (1989-1991). His fields of research were social deviances, minorities, folk-psychology and political psychology. From 1990 to 1994, he was Vice President of the Democratic Community of Hungarians in Voivodina (*Vajdasági Magyarok Demokratikus Közössége – VMDK*). Since 1991, he has been the President of the Forum of Central-European Folk-Groups. From 1992, he

was a presidium member of the World Federation of Hungarians (*Magyarok Világszövetsége – MVSZ*). His works include *Without Illusions (Illúziók nélkül)* (1985); *Long we Lived in Muteness (Sokáig éltünk némaságban)* (1991); *Disturbances of National Identity (A nemzeti identitás zavarai)* (1992); *Hungarian Autonomy (Magyar autonómia)* (1992); *In Balkan's Hell (A balkáni pokolban)* (1994); *Bombardment of Yugoslavia (Jugoszlávia bombázása)* (1999), and *Nation and Progress (Nemzet és haladás)* (2002). He is a recipient of the Üzenet Prize (1986), The Berzsenyi Prize (1998) and the Zsigmond Kemény Prize (2001). – B: 0874, 0878, 1257, T: 7103.

**Hódmezővásárhely** – Town on the Great Hungarian Plain, 10 km east of the Tisza River. The region has been inhabited since ancient times. The town was formed by the unification of four villages in the 15th century (*Hód, Vásárhely, Ábrány* and *Tarján*). The Turks occupied the town in 1551, were expelled in 1693. The town consists of extended outskirts of detached farms (more than 6000), the largest such system of farming in Hungary, engaged in horse and cattle breeding. The first artesian well was drilled here in 1882. It had 52,000 inhabitants in 1880, 60,000 in 1920, and 50.000 today. 60% are Reformed, 30% Roman Catholic. In the center of the town the statue of Lajos (Louis) Kossuth is the work of Ede Kallós. A fine public building houses two important institutions: (1) the Municipal Museum with a Neolithic Age and an ethnographic collection; and (2) the Municipal Library of 20,000 volumes. The Reformed Church maintains the over 250 year-old boys' and girls' high schools; there is a number of other specialized schools and 45 primary schools for the extended outskirts area. The town maintains a pavilion-style hospital with 450 beds, a municipal swimming pool, and 2 well equipped sports fields. The pottery and wood trade is well developed here, especially along the lines of folk-art. Poet Endre Ady called the town "Peasant Paris", due to its cultural role. – B: 1068, 1582, 7456, T: 7456. → **Kossuth, Lajos**.

**Hódosy, Imre** (Emeric) (Magyaritebbe, Hungary, now Novi Itabej, former Yugoslavia, now Serbia, 27 February 1919 - Kishegyes, now Mali Idjos, Serbia, 2 July 1996) – Bishop of the Reformed Christian Church in Yugoslavia. He completed his high school studies in Nagybecskerek (now Zrenjanin) and Theological studies in Kolozsvár (now Cluj-Napoca, Romania) (1938-1942). He was Parish Minister in Várdaróc (1942), Újvidék (Novi-Sad) (1947), Daruvár (1948), Feketehegy (Feketic) (1949), Újvidék (1949-1958), and finally in Feketehegy from 1961 to 1996. He was Bishop of the Reformed Christian Church in Yugoslavia from 1982 to 1996. He was one-time Editor of the periodical, *Reformed Life (Református Élet)*. His writings appeared at home and abroad. He was a Board member of the World Alliance of Reformed Hungarians, and of the Consultative Synod of the Hungarian Reformed Churches. He received an Honorary Doctorate from the Reformed Theological Academy, Debrecen. – B: 0910, T: 7103. → **Reformed Church in Yugoslavia**.

**Hoffgreff, György** (Georg, George) (? - Kolozsvár, now Cluj-Napoca, Romania, 1558 or early 1559) – Printer. Based on the inscription on his tombstone, his place of birth was most probably Brassó in Transylvania (now Braşov, Romania) and not Germany, as previously thought. Hoffgreff was a student at the University of Wittenberg, Germany, from the spring of 1542. Later he worked at the printing shop of von Berg and Ulrich Neuber in Nuremberg. He returned home in 1519 to establish his own printing shop. The first book to appear was his *Ritus explorandae veritatis*. Hoffgreff arrived in Kolozsvár

with several different typefaces, such as 6 antiqua, 1 cursive, 1 Greek, and at least 3 different fractur-types. He did not work alone for long, as Gáspár Heltai joined the firm as partner in 1550, after the appearance of the *Ritus*. Most probably it was Heltai who invited Hoffgreff to Kolozsvár in the first place. This was the third printing shop in Transylvania, but the first to publish also in Hungarian. It was at this time that the *Cronica* of Sebestyén Tinódi appeared, printed with musical notations. The other notable publication is the *Hoffgreff Songbook* (*Hoffgreff Énekeskönyv*), printed in 1554-1555. – B: 0883, 1031, T: 7617.→**Heltai, Gáspár; Tinódy Lantos, Sebestyén.**

**Hoffmann, Dezső** (Desider) (Hofman, Dezo Desider) (Selmecebánya, now Banska Stiavnica, Slovakia 1912 - 1986) – Photographer. He began his career as a clapper boy at the A-B Studios in Prague. He joined 20th Century Fox in Paris and was sent to photograph Mussolini's invasion of Ethiopia. He covered the 1936 Berlin Olympics and witnessed the Spanish Civil War, working alongside Ernest Hemingway and fellow-Hungarian Robert Capa for the International Brigade Press Corps in Barcelona. Hoffmann was one of the first photojournalists to send images back from the front. He emigrated to England in 1940, and covered almost all the European military theaters during World War II. After the War he photographed show business personalities, such as Charlie Chaplin, Marilyn Monroe, Frank Sinatra, Louis Armstrong and Marlene Dietrich. In 1955 he joined the *Record Mirror*, a weekly music paper. He had the opportunity to first photograph the Beatles in 1962. Through his personal and professional relationship with the Beatles, he gained access to many rising stars such as The Rolling Stones, Jimi Hendrix, Eric Clapton and the Yardbirds, David Bowie and Rod Stewart. He has taken more pictures of the Beatles than any other photographer. Pearce Marchbank published the book, *With the Beatles: The Historic Photographs of Dezo Hoffman*. The entire library of his wartime photos is in the Imperial War Museum in London. – B: 1279, T: 7103.→**Capa, Robert.**

**Hoffmann, Ferenc** (Francis) (Kunmadaras, 1877 - Victoria, BC, Canada, 29 October 1958) – Minister of the United Church of Canada. He graduated from the Keszthely College of Agriculture, became the manager of the state show-farm of Kolozsvár (now Cluj-Napoca, Romania), and also obtained a Ph.D. in Law. He became a professor at the College of Agriculture of Kassa (now Košice, Slovakia). After having completed his military service with the Hussars, he studied in Switzerland, Germany and Holland. He visited the United States and Canada. During World War I, he was a prisoner of war in Russia. Later he was condemned to death for protesting against recruiting prisoners of war into the Red Army, but he was able to escape via Vladivostok and, eventually, arrived in Vancouver, BC, Canada. He completed his Theological studies at St Andrews Theological College, Saskatoon, and was ordained in 1923. He assumed the spiritual care of Hungarian immigrants scattered on the Canadian Prairies, by offering spiritual, social and agricultural counseling in Wakaw, Mistatin, Saskatoon, Rothermere, and 18 other Hungarian settlements, regardless of denominational affiliation, in a 500-mile territory. He was pastor, teacher and business counselor, at times acting as best man at weddings. This former Hussar traveled on horseback even when he was in his sixties, wearing a Cumanian style suit, with wide-sleeved shirt and a high fur cap, and he was called: “the mounted priest”. The inter-denominational character of his service is evidenced in the Church of Rothermere, built in 1931-1932 by his parishioners, where both the cross and the star crown its steeple. A Greek Catholic master sculpted the altar from a quarry, and a

Hungarian Calvinist carved the pulpit, while the prayer stools were created by still another Hungarian Catholic. The British and Hungarian flags were donated by Lord Rothermere of Great Britain and by Mrs. Hoffmann respectively. – B: 1211, T: 7677.→**Rothermere, Lord.**

**Hofi, Géza** (Hoffmann) (Budapest, 2 July 1936 - Budapest 10 April 2002) – Actor, comedian. He was born into a working-class family and was educated in Budapest. He applied for admission to the Academy of Dramatic Art three times but was refused. He worked at a porcelain factory for five years and attended the Acting School of Kálmán (Coloman) Rózsahegyi, where he met József (Joseph) Sas and István (Stephen) Sztankay, later his colleagues and friends. In the factory, he joined the theatrical circle led by András (Andrew) Jászai. In 1960, theatrical director József (Joseph) Szendrő offered him a contract with the Csokonai Theater (*Csokonai Színház*) of Debrecen in 1960. His parodizing talent soon became obvious and, in 1963, he finally decided to move back to Budapest and, under the stage name of Hofi, was now allowed to perform at first in the countryside, later also in Budapest. The breakthrough came on New Year's Eve, with his brilliant song-contest parody, on the Hungarian Radio. He soon became famous in Budapest and in the county as well. He worked with the Microscope Theater (*Mikroszkóp Színház*) from 1969, where he stayed until 1982. In 1983 he moved to the Madách Chamber Theater (*Madách Kamara Színház*) where he performed his own scripts and dramaturgy. His show, *Hofélia*, was played more than 500 times, and his new show, *The Wage of Provision (Élelem bére)*, was played some 1500 times. His performances were released on LP records several times; many of them have sold hundreds of thousands of copies. He recorded a song with János (John) Koós, called *Compromizing Cats (Megalkuvó macskák)*, which was a smash hit; it was also made into an animated film. He toured countries abroad and overseas, including Australia, where he was a great success. With his humor, parodies and outspoken style, his performances were popular. He was closely watched because of his criticisms of the political régime. He continued to play after the political change in 1989, but his health deteriorated. He was one of the most famous Hungarian comedians, if not the best ever. He had a strong influence on Hungarian cabaret. He became a national legend. He was awarded a number of prizes, among them the Mari Jászai Prize (1970, 1973), the Merited Artist title (1977), the Outstanding Artist title (1988), the Déryné Prize (1995), the Officer Cross of Merit of the Republic of Hungary (1996), the Kossuth Prize (1998) and the Pro Urbe Prize of Budapest (2002). There is a bronze statue of him in front of the Microscope Theater, popularly referred as the *Hofi-statue*. – B: 1031, 1445, 1765, T: 7103.→**Rózsahegyi, Kálmán; Szendrő, József; Sas, József; Sztankay, István; Koós, János.**

**Högyes, Endre** (Andrew) (Hajdúszoboszló, 30 November 1847 - Budapest, 8 September 1906) – Physician. He received his Medical Degree in 1870 from the University of Pest; in 1874 he worked in experimental pathology. From 1875, he taught at the University of Kolozsvár (now Cluj-Napoca, Romania) and from 1883 until his death, at the University of Budapest. In his three-volume work, published by the Hungarian Academy of Sciences between 1881 and 1885, he was first to describe the balance reflex and its reactions to stimulus. He is also credited with devising modifications to Pasteur's rabies vaccination, still in use today. His research interests were varied: he studied blood circulation in the renal membrane and cortex, the effects of alkaloids on body-temperature changes, the role of renal glomeruli and tubules in urine production. He was among the first to begin

systematic bacteriological investigations in Hungary (cholera, 1873; anthrax, 1882; rabies, 1886). In 1890 he founded the Pasteur Institute and Hospital in Hungary. He held various directorial positions in national professional organizations. From 1886 until his death, he was Editor of the *Medical Weekly (Orvosi Hetilap)*. He was one of the most prominent Hungarian medical researchers. His main works include *Aspects of Renal Circulation (A vese vérkeringési viszonylatai)* (1873); *Neuro-mechanisms of Associated Eye Movements* vols. i, ii, iii. (*Az asszociált szemmozgások idegmechanizmusáról, I, II, III*) (1880-1885); *The Experimental Basis of Pasteur's Anti-rabies Vaccination (Die experimentelle Basis der antirabischen Schutzimpfungen Pasteur's)* (1888), and *On Curing Rabies (A veszettség gyógyításáról)* (1889), (winner of the Hungarian Academy of Sciences Award). He was a member of the Hungarian Academy of Sciences. In 1961, the Medical Science Council established the Endre Hőgyes Medal in his honor, awarded yearly for significant original and independent scientific research. A Street bears his name in Budapest. – B: 0883, 1031, T: 7667.

**Hojnovszkij Saber** – A sword recovered from the grave of a Kiev nobleman, interred around 1000 AD. This exquisite sword, similar to “Attila’s sword: is stored in the Vienna Treasury. It is a masterpiece of Hungarian goldsmith art. – B: 1230, 1020, T: 3233.

**Holics Faience** – Faience from the Holics estate in County Nyitra (now Nitra, Slovakia), in historical Upper Hungary, close to the Moravian border. It was bought from the Czobor family in 1736, by Queen and Empress Maria Theresa’s consort, Francis I (1708-1765), Duke of Lorraine, Grand Duke of Tuscany, from 1745 Emperor of the Holy Roman Empire. In 1743 he founded a factory on the estate, which produced excellent faience works and decorative pieces and also Wedgwood-type ceramic-ware between 1746 and 1827. The potters and painters came from Tuscany, especially from Gastelli and Alsace-Lorraine, (the former dominions of Francis before his marriage) and also from the neighboring Haban settlements. They designed shapes and motives that closely followed the Baroque style of late Italian and French faience products. The resulting quality of the Holics (Hollyc) output was so high, it was soon in great demand by the wealthy all over Central Europe. Its decorative ceramic ware, painted or transfer-printed, was highly appreciated. Around 1800, the English Wedgwood factory’s and its continental imitators’ less expensive and more durable ceramic ware pushed most faience factories into decline and bankruptcy. The Holics factory was in continuous operation from 1743 to 1827. Despite the claim that Holics was the property of Austria and was not part of Hungary, there is a Haban jug with the name of Maria Czobor, apparently a Hungarian, dated 1670, displayed in Budapest, confirming her connection with the Haban potters. – B: 7654, 7655, T: 7654.

**Holiday of the Constitution** – Starting in 1949, the Hungarian Government proclaimed the 20th of August, St István’s Day (St Stephen’s Day), the day of the New Constitution and the Holiday of the New Bread. It was repealed on the order of the new Democratic Government in 1989, and the original St István’s (St Stephen’s) Day was restored. – B: 1230, 1138, T: 7668.

**Holland, Hungarians in→Hungarians in the Netherlands.**

**Hollókő Nature Reserve** – A nature reserve in the Palóc region, near the Slovakian border in Upper Hungary. The Hungarian National Nature Preservation Office established the 141-hectare nature reserve in 1977. It includes the old village of Hollókő.

It is a “living museum” village. It has preserved the warm, people-friendly atmosphere of the diminishing village-life in the modern world. The church and the old village date back to 1342, and the village houses to 1782. There is a castle on top of the neighboring hill. The Kacsics family built the pentagonal tower in the middle of the 13th century. A legend is connected to the name of the Kacsics family. Apparently a member of the family, András (Andrew), kidnapped the daughter of the neighbor nobleman and had her locked into a room in the castle. The nanny of the girl, who was a witch, called for the devil’s sons to help. They turned into ravens and carried the stones of the castle away. That is where the name of Hollókő (Ravenstone) might derive from. The castle offers a panoramic view of the slopes of the Cserhát. The UNESCO included Hollókő in its World Cultural Heritage list in 1987. – B: 1340, 1527, 1020, T: 7656, 7103.

**Hollós, Ilona** (Helen) (Budapest, 1920-1998) – Actress, dancer-singer. She studied Voice at the Ferenc (Franz) Liszt Academy of Music in Budapest, and studied under Anna Medek. In 1925 and 1926 she was a member of the Inner City Theater (*Belvárosi Színház*), and the Renaissance Theater (*Renaissance Színház*). Between 1927 and 1929 she worked at the Magyar Theater (*Magyar Színház*), and, in 1929-1930 she was again with the Inner City Theater, Budapest. In 1930 she appeared at the New Theater (*Új Színház*), and the New Stage (*Új Színpad*), as well as at the Chamber Theater (*Kamara Színház*) in Budapest. In 1951 she was at the Chamber Varieté (*Kamara Varieté*). Her roles include Ophelia in Shakespeare’s *Hamlet*; Soucy in Romain Rolland’s *The Game of Love and Death* (*A szerelem és halál játéka*), and Germaine in Verneuil’s *Monsieur Lamberthier* (*Lamberthier úr*). In 1944 she made her début as a dance-singer with the Holéczy Ensemble. Prior to 1960s, Ilona Hollós was the most popular dance-singer in the country. After the 1960s, she retired from the stage but her songs remained on the radio programs. Her favorite songs include *Time at a standstill* (*Megáll az idő*), *I too need somebody* (*Valaki kell nekem is*), *Two times two is sometimes five* (*Kétszer kettő néha öt*), a duet with László (Ladislav) Kazal in the feature film, *State Department Store* (*Állami Áruház*). – B: 1445, 1031, T: 7103. → **Medek, Anna; Kazal, László.**

**Hollósi, Gergely** (Gregory) (16th century) – Missionary. He was probably a Pauline monk who worked among Indians settled in the mountainous region, in present day Arizona and New Mexico, USA. Although he joined the entourage of the Spanish conqueror, Coronado, he was not after material gain from the aboriginals but for spiritual service to them. He settled among the Zuni Indians, lived there for forty years and converted them to Christianity. A legend narrates that, after praying, soldiers, with the intention of harassing Indians, fell into the abyss from a rope bridge. The Zunis gather every year on the anniversary of Brother Gergely’s death, at a cross carved out of the rocks with the following Spanish inscription on it: “*Here rests Gergely Hollósi, everyman’s brother, who brought light to those who lived in darkness*”. – B: 1288, 1020, T: 7103. → **Pauline Order in Hungary.**

**Hollósy, Simon** (Máramarossziget, now Sighetu Marmatiei, Romania, 1857 - Técső, now Tyachiv, Ukraine, 1918) – Painter, founder of the Art School of Nagybánya (now Baia Mare, Romania). He studied in Munich and opened his famous art school there in 1886, which became the center for foreign artists. Later, he moved his school to Nagybánya and became its principal. His disciples, István (Stephen) Réti (1872-1945), Károly (Grancis) Ferenczy (1862-1917), János (John) Thoma (1870-1938), and Béla Iványi-

Grünwald (1867-1942) became the co-founders of the Nagybánya School of Art and of the art colony. Later, he left Nagybánya for Técső. His work included scenes of rural life, portraits and book illustrations. Some of his works are *Laughing Girl (Nevető lány)* (1883); *Dreaming (Álmodozás)* (1886); *Castle Huszt (Huszt vára)* (1896); *The Outbreak of Zrinyi (Zrinyi kirohanása)* (1896); *Autumn (Ősz)* (1897); *Flag-bearer (Zászlóvivő)* (1899); *After the Harvest (Aratás után)* (1908); *Farmyard with Cart (Parasztudvar szekérrrel)* (1912), and *Self Portrait (Önarckép)* (1916). He was influential in the education of many young artists. – B: 0872, 1409, T: 7103. → **Nagybánya Artist Colony; Ferenczy, Károly; Iványi-Grünwald, Béla; Thorma, János, Réti, István.**

**Holocsy, István** (Stephen) (Illésháza, now Nový Život, Slovakia, 18 February 1950 – Komárom, 27 July 1996) – Actor. His education started in Illésháza, continued in Tonkháza, and completed high school in Pozsony (now Bratislava, Slovakia) in 1967. From 1968 to 1969, he studied at the Theater Department of the School of Arts. He obtained a diploma in Theatrical Art at the Academy of Dramatic Art, Budapest, (1969-1973), and from 1973 to 1975, he was an actor at the Hungarian Regional Theater, Komárno, Slovakia (*Magyar Területi Színház – MATE SZ*) and, from 1976, its Artistic Director. From 1980 he was a member of the Czechoslovak Communist Party. He was a member of the Slovakia Dramatic Art Association from 1977 until 1989. His roles include Ádám in Madách's *The Tragedy of Man (Az ember tragédiája)* (1973), MATE SZ diploma role; Iago in Shakespeare's *Othello* (1975), and Petur bán in J. Katona's *Bánk bán* (1988). From 1968 he was the permanent radio-play personality in the Hungarian department of Radio Pozsony; where he also worked as an announcer. He directed György Batta's *Pumpkin Lantern (Töklámpás)* (1980). He was the editor, manager and performer of programs, e.g. *I Believe in Man (Hiszek az emberben)*, a literary program from the poems of Hungarian and Slovakian poets. He was a recipient the Elizabeth Prize (1991), for the Open Europe Prize of S. Márai Foundation (posthumous, 1997), and the Pro Cultura Hungarica Memorial Plaque (1998). – B: 1083, 1890, T: 7456.

**Holography** – An interferometric photography method, which produces a three dimensional image without an optical lens. Dénes (Dennis) Gábor discovered holography and published its theoretical fundamentals in 1947. The holographic image is made on a light-sensitive plate by the reflected light from an object, which is illuminated by one beam of a split coherent light (laser) and by the unmodulated reference beam reflected by a mirror. The interference pattern of the two beams produces the image. When the image on the plate is illuminated by a laser beam, a three dimensional, virtual picture is produced in front of the projector. Holography is widely applied in science and industry. In the field of interferometry, it is used to compare the conditions of objects in different times simultaneously. It is also used to produce holograms, an advanced form of photography that allows an image to be recorded in three dimensions, and also for data storage, shape recognition and in microscopy. Dénes Gábor received the Nobel Prize in Physics in 1971. – B: 1138, 1153, 1031, T: 7662. → **Gábor, Dénes.**

**Holy Alliance and Hungary** – The Alliance that was concluded on 26 September 1815, after the second and final defeat of Emperor Napoleon, between the Austrian Emperor Franz I, the Russian Czar Alexander I, and the Prussian King Frederick William III. The ultimate aims of the Alliance were: to govern peoples in the principles of Christian love and justice, and to preserve the monarchic system. The idea came from the Czar, but

Metternich worked out the system. Against Hungary, the Holy Alliance was invoked by Ferenc József (Francis Joseph) the Austrian Emperor in May 1849 when, in a letter to Czar Nicholas I of Russia, he asked for military assistance to defeat the Hungarian War of Independence against Austria (1848-1849). A final agreement was reached on the details of Russian help in Warsaw on 21 May and, on 15 June 1849, in the spirit of the Holy Alliance, an army of 200,000 Russian soldiers invaded Hungary and the War of Independence was lost. – B: 1078, 1230, 1138, T: 7665.→**Freedom Fight of 1848-1849.**

**Holy Crown, Hungarian** – The most important part of the Hungarian coronation regalia

and the most controversial one because of its debatable origin and age, whether the present one is St. Stephen's Crown, or a later substitute. The present Holy Crown consists of two parts, originating in different places and at different times. (1) The upper part is the *Corona Latina*, composed of two bent cross-bands with enameled plates, in a delicate setting, topped with gems. At the meeting point of the plates is the enthroned Christ; on the four wings, placed one upon the other, are two standing apostle's images, shown with inscriptions. The cross, placed there

later, perforates the picture of Christ on the top. This upper hoop crown is believed (only on the evidence of a legend, the Hartvik Legend) to have been sent by Pope Sylvester II, at the coronation of King István I (St Stephen, 997-1038), on Christmas of 1000. István was later canonized, together with the title of "Apostolic Majesty". This *Latin Crown* has a style and goldsmith technique typical of the 10th century. It has Latin inscriptions on it, hence its name. According to József (Joseph) Deer's detailed, 1966 study of the Holy Crown, the upper part, the *Corona Latina*, could not be older than the 13th century. (2) The lower part is the circular *Corona Graeca* (Greek or Byzantine Crown), in the form of a band made of Byzantine enameled sheets, with pearled frame on the upper and lower ends, and showing a series of partly enameled plates, with the portraits of Archangels Gabriel and Michael, St George, St. Demetrius, St. Cosma, St Damian and the Hungarian King Géza I (1074-1077) with Greek inscriptions. The higher placed back plate represents Greek Emperor Michael Dukas. It was assembled in Hungary from parts of a female tiara or coronet sent by the Byzantine Emperor Michael Ducas VII (1071-1078) to King Géza I in 1075. The two parts of the crown were joined together to form a single crown, on the order of King Kálmán (Coloman) the Bibliophile (1095-1116). The present crown has a diameter (not being fully circular) varying from about 20 to 21 cm, and weighs 1056 grams. It became known as St Stephen's Crown (*Stephanskrona*), the symbol of Hungarian nationhood.

*Holy Crown Doctrine:* Nationwide respect toward the Crown created the Holy Crown Doctrine. It was conceptualized by István (Stephen) Werbőczy in his collection of Hungarian laws, called *Tripartitum* (1514-1517). According to this, the source of power in Hungary is the Holy Crown and not the actual King. The Holy Crown is the "body" of the nation; its members are the estates: prelates, nobles and the ruler. Excluded from this

power were the peasants, serfs and the town dwellers. The title donation of nobles and estates was not the right of the King but that of the Crown. Associated countries, such as Croatia, Dalmatia, Slavonia and Transylvania (*Erdély*) are the lands of the Holy Crown. The doctrine was in effect until the end of the Kingdom of Hungary in 1918. Almost every king in Hungarian history was crowned with the Holy Crown, in the traditional capital, Székesfehérvár, where the Crown and the regalia were guarded. The nation only recognized the King as their legal, constitutional ruler, when he was crowned with St Stephen's Crown or its substitute, which is now regarded as the Holy Crown.

The Doctrine was in effect until the end of the Kingdom of Hungary in 1918, though, during the rule of the Regent, Admiral Miklós Horthy (1920-1945), Hungary was actually functioning as a "kingdom without a king". The Crown was kept and guarded in the Royal Palace of Buda; near the end of World War II, in a steel-lined chest, the Crown and the other regalia were transported to the West by the faithful guards, so that they would not fall into the hands of the occupying Soviet forces and the subsequent Communist regime. The chest was buried at Mattsee in Southern Bavaria, but eventually it was handed over to the American military authorities and taken to the US Treasury, where it was kept in the vaults of Fort Knox for over 30 years. The Carter administration decided to return the Crown and the other regalia to Hungary in 1977, during János (John) Kádár's prime ministership: on 7 January 1978, the US secretary of State, Cyrus Vance, formally handed over the Crown in the main hall of the Parliament Building in Budapest. For a few years, the Crown was on display in the National Museum in Budapest. In more recent years, the highly respected Crown has been displayed in the Parliament Building. For the top part of the heraldic arms of the free and democratic Republic of Hungary, (since 23 October 1989), the image of the Holy Crown was adopted again, following centuries of constitutional legal practice. – B: 1231, 0942, 1373, 1020, T: 7669, 7103. →**Coronation, Insignia of; Tripartitum; Werbőczy, István; Horthy, Miklós; Magass, Miklós; Crown, Doctrine of the Holy Crown; Holy Crown of Hungary, return of; Kádár, János; Halász, József.**

**Holy Crown of Hungary, return of the** – The Vatican took the initiative to have the Holy Crown of Hungary and the coronation regalia returned to where it had been for a thousand years, as the symbol of Hungary's statehood and Christianity. Sometime in the late 1960s, a Hungarian Roman Catholic clergyman Rev. Miklós (Nicolas) Magass, as emissary, met with his American colleagues in the Vatican, to organize the return of the Holy Crown. Almost simultaneously, in America, the Baptist pastors Dr. Mihály Almási and Dr. Sándor Haraszti, the interpreter and colleague of the Baptist Evangelist Billy Graham, worked for the return of the Crown. Billy Graham reminded Jimmy Carter, then President of the USA and a Baptist himself, about the case of the Holy Crown of Hungary, how fervently the Hungarian people would like to have it returned from the treasury vaults of Fort Knox in the USA, and how the Communist Hungarian Government would appreciate getting a preferred commercial status with the USA. As a result of the negotiations by the above five men, President Carter did take the necessary steps to have the Holy Crown returned to Hungary, and gave the highest duty concession to Hungary as he had promised to Billy Graham. His decision was also influenced by the protests from Hungarian exiles in the United States, opposed to the Communist Government in Hungary and, at the same time, it was a mark of improving relations with Hungary. He empowered the Secretary of State, Cyrus Vance, to organize and carry out

the necessary steps to return these invaluable relics (the Crown and the Coronation Regalia) to Hungary. On 7 January 1978, Cyrus Vance, in the Hungarian Parliament of Budapest, ceremonially handed over the Holy Crown and the Regalia to the President of the Parliament, Antal Apró, in the presence of the US ambassador, Philip Kaiser and the US delegation, in the form of a festive occasion, when a speech was delivered by Cyrus Vance, replied by Antal Apró.

The precious cargo, with the American delegation arrived in a Boeing 707 after nightfall, at Budapest's Ferihegy Airport. The American delegation included Senator Adlai E. Stevenson, Albert Szent-Györgyi, Nobel Prize scientist, US Ambassador Albert W. Sherer in Hungary, Philip M. Kaiser, the Ambassador in the US, a number of congressmen, Catholic priest, George Higgins, representing the Catholic Church of the USA, and Rabbi Arthur Schneier. To receive the American delegation at the airport, the Hungarian delegation included János (Johna) Péter, Vice-President of the Parliament, Frigyes (Frederick) Puja, Foreign Minister, János (John) Szentágothai, President, and Ferenc (Francis) Márta Secretary of the Hungarian Academy of Sciences, Cardinal Archbishop László (Ladislás) Lékai, Primate of Hungary, Tibor Bartha, Bishop of the Reformed Church, Zoltán Káldi, Lutheran Bishop, and the eminent writer Gyula (Julius) Illyés. The delegations walked past a saluting military parade and a brassband. Under the dome of the Parliament's vaulted central hall the Hungarian and the American national anthems were intoned instrumentally, followed by the formal handing-over ceremony and the speeches by Cyrus Vance and Antal Apró. The President of Hungary, Pál (Paul) Losonczi, welcomed Cyrus Vance and the American delegation. Afterwards, a ceremonial banquet was held in honor of the American guests. The Hungarian newspapers of 6 and 7 January 1978, presented the news on their front pages: the central paper of the Communist Party, *Népszabadság*, as well as all the other papers: the *Magyar Nemzet* and *Esti Hirlap*. For 22 years the Holy Crown and the Coronation Regalia were displayed in the National Museum. In 2000, the millecentenary of the foundation of Hungary as Christian kingdom, the Holy Crown and the Coronation Regalia were transferred to the Central Hall of the Parliament Building for permanent display. – B: 1949, 7456, T: 7456.→**Holy Crown, Hungarian; Magass, Miklós; Haraszti, Sándor; Pézrt, János; Lékai, László, Bartha, Tibor; Káldy, Zoltán; Szent-Györgyi, Albert; Szentágothai, János; Illyés, Gyula; Losonczi, Pál.**

**Holy Right Abbey** – The Abbey is situated in Transylvania (*Erdély*, now in Romania). Its name came from the “Holy Right Hand” (*Szent Jobb*) relic, the preserved right hand of King St István I (St Stephen, 997-1038), discovered in 1083 in the monastery at the village of Berekis by the River Berettyó. In honor of the discovery, King St László I (St Ladislás, 1077-1095), after a pilgrimage to the monastery on 30 August 1084, commissioned Álmos, Prince of *Erdély*, that a monastery formerly built of wood be replaced by one built of stone. Then, the village was renamed “Holy Right” (*Szent Jobb*) (now Saniob, Romania). The 1471 seal of the Abbey displays an arm bearing the Latin inscription: “*Abbatia Beatae Mariae virginis de S. Dexterā S. Stephani Regis Hungariae seu sent Jobb*” (“*Holy Virgin's Abbey named after the Holy Right of St Stephen, King of Hungary*”). The Abbey was a place of registry until King Lajos I (Louis the Great, 1342-1382). By the middle of the 15th century the relic was transferred to Székesfehérvár. – B: 1078, 1231, T: 7103.→**Holy Right Hand; István I, King.**

**Holy Right Hand** (*Szent Jobb*) – The fully preserved right hand of Hungarian King István I (St Stephen, 997-1038), treasured as the most sacred religious relic of Hungary. According to the István Legends, King István I was buried in Our Lady (*Nagyboldogasszony*) Basilica in Székesfehérvár, founded by him. An unknown author wrote a concise account of the King's funeral about 1109. King István I was canonized in 1083, during the life of this anonymous author. He also wrote the Minor Legend on St. István, the state-building king. The body of the King was removed from its ornate sarcophagus, placed in a stone casket and hidden under the floor of the church in 1060. This was necessary, due to the uncertain conditions, fights for the throne, and the rebellion of non-Christians after his death. When King László I (St. Ladislav, 1077-1095), ordered the exhumation of the remains of King István I on 20 August 1083, for the celebration of his canonization, the king's right arm, the hand together with the king's royal ring on its finger was missing. Mercur of the Katapan clan, the treasurer of the Basilica, was held responsible by King László for the disappearances and was removed from office.

Within a year the Holy Right Arm was found in a monastery belonging to Mercur's clan in Berekis village in County Bihar, along the Berettyó River. Mercur gave a legend-like explanation for the discovery of the relic. King László I was so happy to see the soundly preserved arm that he ordered the construction of the Abbey of the Holy Arm in 1080. He also ordered the construction of an ornate relic holder for the entire right arm, in which it was kept for centuries.

After the Personal Union of Hungary and Poland in 1370, King Lajos I (Louis the Great, 1342-1382), ordered the removal of the upper arm of the Holy Right and sent it to Poland. It was kept in Lemberg (Lvov) by the Franciscan monks. The Polish king, John Kazimir, ordered the construction of a precious golden holder, a reliquary, for the relic. King Zsigmond (Sigismund of Luxemburg, 1387-1437), ordered the separation of the lower arm from the hand and gave it to the Austrian Habsburg Prince Albert V, as a present and as a symbolic confirmation of the Personal Union created between Hungary and Germany in 1411. Further, it commemorated Zsigmond's election to the throne as a German monarch. The present also sealed the marriage between Zsigmond's daughter, Erzsébet (Elizabeth) and Habsburg Albert in 1421. Thus, the Right Hand of St. István was moved to the Church's treasury in Vienna in 1420, which also contained the inventory of St. Stephen the martyr. The hand of St. István's right lower arm was kept in Hungary in Székesfehérvár from 1433 right up to the capture of Buda by the Turks in 1541. During the Turkish occupation, Christian merchants purchased the relic from the Turks and took it to Ragusa (now Dubrovnik, Croatia) and gave it to the Dominican monks for safekeeping, where it remained for over 200 years, unknown to the Hungarians. In 1590, the Dominicans commissioned the construction of a silver relic holder for the Holy Right and the relic was listed in their 1618 inventory. Empress Maria Theresa bought the relic from the Dominicans in 1720, and gave it to the provost of the Budavár Parish for safekeeping. In 1771, she transferred the Holy Right to the Mary Ward's Nunnery (*Angolkisasszonyok*) in Buda. The anniversary of St. István's canonization was officially celebrated on 20 August 1860. The celebration turned into a nationwide feeling of pious duty toward the first great king, István I. In 1862, the Hungarian bishops ordered an exceptionally valuable holder or receptacle for the holy relic, designed by József (Joseph) Lippert, the architect of Cardinal János (John) Simor

was crafted in Vienna by the Brose Goldsmith Company. A plate with an acanthus rim covers the wrist and the palm and the fingers are secured to a purple velvet pillow with pearl-decorated brackets. The entire hand rests in a crystal cylinder, which can be handled as an independent unit. The glass cylinder housing the relic is a richly decorated silver reliquary. Enamel inlays decorate the relic-receptacle (“relic-house”), which has the ornamentation style of Neo-Gothic medieval chapels. The “relic-house” stands on winged dragon legs. Ten gold-plated, kneeling angels adore the relic on the lower segment of the housing. At the corner posts of the walls, the figurines of eight Hungarian saints are located in paired niches. A small tower supports the gold plated silver statue of St. Stephen on the center of the gabled roof.

The reverence of this relic deepened after the 1867 Compromise between Austria and Hungary. From 1881, the safekeeping of the Holy Right became the responsibility of the Archbishopric of Esztergom. 20th August was decreed as a national holiday by the Hungarian Government in 1891. Since that date, a Holy Right procession is held in the Buda Castle area with the participation of lay and religious leaders of the country to honor the great king’s memory.

The year 1938 was officially declared as “St. Stephen Year” in Hungary. A special “golden train”, including a Pullman car with glass walls, housing the Holy Right relic mounted on a pedestal, flanked by guards of honor, traveled to all parts of Hungary between the 1st June and the 20th of August. It also traveled to Transylvania (*Erdély*, now in Romania) in 1941. Toward the end of World War II, these relics, together with the Coronation Insignia were shipped to Germany, to avoid capture by the Soviet Army, and it fell into USA possession. Upon the request by Hungarian Primate, József (Joseph) Mindszenty, the special Ambassador to Hungary, Arthur Schoenfeld, returned the relic to Béla Zsedényi, Chairman of the Provisional National Assembly of Hungary on 19 August 1945. The relic was returned to the Catholic Church in Hungary on 20 August of the same year. This day, the first 20 August after the War, was celebrated in the presence of the Holy Right. The relic was carried in a procession from the Franciscan Church to the Basilica, through the ruined streets of Budapest. Because Buda Castle was in ruins, the relic was kept in the church of the Mary Ward’s Order (*Angolkisasszonyok*) in Váci Street. On 20 August 1946, Cardinal József Mindszenty led the procession from the Basilica to Heros’ Square. After 1946, during the Rákosi regime, the procession was restricted to the vicinity of the Basilica and was completely forbidden during Kádár’s regime, after 1956. In 1951, the Holy Right was given to the parish priest of the St. István Basilica for safekeeping. The St. Lipót Chapel, created within the Basilica to honor the relic, was renamed as the Holy Right (*Szent Jobb*) Chapel in 1983. From the 1980s, the public reverence of the relic flourished again. In 1988, on the 950th anniversary of the death of King István I (St. Stephen), the relic was carried to all Hungarian bishoprics and to Máriapócs and Pannonhalma. On 20 August 1989, the first procession after the 40 years’ enforced absence, was conducted on the streets around the Basilica and on Bajcsy-Zsilinsky Street with the participation of several thousand people. – B: 1078, 1230 1153, 1374, T: 7662. → **Catholic Church in Hungary; István I, King; Holy Right Hand.**

**Hóman, Bálint** (Valentine) (Budapest, 29 December 1885 - Vác, 2 June 1951) – Historian, politician. He pursued his studies in Budapest and received his doctorate in 1908. After positions of short duration, he became Head, then Director of the Manuscript

and Archival Department of the National Széchényi Library; and later became Director-General of the Hungarian National Museum. In 1916, he was appointed University Lecturer and, between 1925 and 1931, a full Professor of Medieval Hungarian History. In 1932, he became State Minister of Religion and Public Education and, during the same year took his seat as Member of the Lower House of Parliament. He published important treatises on the following topics: the history of coinage in Hungary; town settlements during the Árpád era, and the Hun tradition. He wrote important studies on the history of Hungarian civilization as well. Hóman conducted significant pioneering research into the origins of the *Szeklers* of Transylvania, on the historical basis of the Hun-Hungarian legend and on Anonymus' *Gesta Hungarorum*. However, his magnum opus is the *Hungarian History*, vols i-v (*Magyar Történet, I-V*), co-authored with Gyula Szekfű, published between 1928 and 1933. Hóman moved to the West at the end of World War II. After the War, the Americans surrendered him to the Hungarian authorities. Consequently, in 1946, the People's Tribunal sentenced him to life imprisonment as a war criminal for sympathizing and collaborating with the Hungarian right-wing Szálasi-regime of 1944. He spent the rest of his life in solitary confinement. His health deteriorated and he died in the Vác prison. They buried him in the prison cemetery. The new democratic government of Hungary honored him with a state funeral at the Reformed cemetery of Tass on October 13, 2001. He was reburied in the crypt of his relative Kálmán (Coloman) Darányi, former Minister of Hungary. His view on Hungarian history is regarded as authoritative to this day. His full political and legal rehabilitation is yet to come. – B: 1078, 1150, 1257, T: 7617.→**Szekfű, Gyula; Darányi, Kálmán; Anonymus.**

**Homeland Settlement in the Carpathian Basin** – The ultimate aim of any migrating tribe or nation is to settle in a suitable territory and establish a permanent homeland there. The history of the great nations is full of rich collection of epics, recording the heroic events in the conquest of their eventual homeland. Understandably they have endless heroism and poetic exaggeration, which make the actual historic facts obscure. The Hungarian national epic of their conquest of (and settlement in) the Carpathian Basin (895-900) is no exception. The early Hungarians (Magyars) presumably lived in the same area in the 6th century, according to the “double conquest” theory of Gyula (Julius) László and even a much earlier Magyar presence there in the 2nd millennium BC, according to Mario Alieni, the promoter of a Hungarian-Etruscan kinship. – B: 1078,1020, T: 3233.→**Árpád; László, Gyula; Etruscan-Hungarian Linguistic Relation; Alieni, Mario.**

**Homoki Nagy, István** (Stephen) (Mezőtúr, 2 September, 1914 - Budapest, 14 December 1979) – Hungarian naturalist, nature photographer and movie producer. He read Law at the Reformed Law Academy, Kecskemét (1932-1933), continued his law studies at Szeged and earned a Ph.D. in Law in 1937. In 1942, he was admitted to the Bar, and later became a judge. In the meantime, he was employed at Kiskunfélegyháza and Hódmezővásárhely. From 1945, he switched over to filmmaking. From 1954, he produced science-popularizing short-films. Later, he produced normal size films with his wife Zsuzsa (Susie) Zsoldos. His early film was *Masters of the Hunt of Winged Prey* (*Szárnyas Vadászmesterek*) (1974). This is a photographic essay of the life of the Hungarian falconers. In the mid 1950s, one of his successful films was *From the Flowering of the Lily-of-the-Valley to the Fall of the Autumn Leaf* (*Gyöngyvirágtól*

*Lombhullásig*) (1953), photographed in the Gemenc Nature Reserve, recapping the events in nature throughout a growing season. His other films are *Short-legged Shepherd (Kurtalábú pásztor)*; *Pals (Cimborák)*, and *Cat-adventure (Macskakaland)*. His magnificent nature films made him renowned in Hungary and abroad. He was a recipient of the Kossuth Prize (1952) and the Merited Artist title (1955). A High School bears his name in Budapest. – B: 0883, 1105, T: 7103, 7656.

**Homonna, Battle of** – On 21 November 1619 a battle took place between the army of Chief Justice of Hungary György (George) Drugeth de Homonna and the army of Prince Gábor (Gabriel) Bethlen, which was the rear-guard of the army of Prince György (George) Rákóczi I. Drugeth' Polish mercenary army defeated its smaller adversary in the battle, but he could not benefit by the victory and withdrew to Polish territory. However, the Transylvanian Army could not reach Vienna but withdrew to Pozsony (now Bratislava in Slovakia). – B: 1031, T: 7103.→**Bethlen, Prince Gábor; Rákóczi I, Prince György.**

**Homonnay, Márton** (Martin) (Hlavacsek) (Budapest, 2 February 1906 – Buenos Aires, Argentina, 15 October 1969) – Water polo player. He began swimming in races at the age of nine. In 1917, he was registered with the water-polo team of District III of Budapest. In 1923 and 1924, he was a member of the team that won the National Championship. Between 1924 and 1936, he appeared in 108 contests in the water polo selected team. In 1926 in Budapest, in 1927 in Bologna, in 1931 in Paris, and in 1934 in Magdeburg, he won European Championships. In 1924, he was fifth at the Olympics in Paris, second in Amsterdam in 1928, while in 1932, in Los Angeles and in 1936 in Berlin he was a member of the gold-medal Hungarian team. From 1933 he was captain of the youth water polo selected team. He was Secretary of the National Swimming Sports Foundation and the National Sports Swimming Pool. In 1945, he stayed in Germany and later he emigrated to South America, where he was engaged in training. His brother, Lewis, was also a water-polo player. Between 1922 and 1925 he was in the selected team twenty eight times. Márton Homonnay's wife, Katalin Szőke, was a national backstroke swimmer. Their daughter Kató Szőke was a free-style female swimming champion in two events at the Helsinki Olympics. The Communist Government under Soviet military occupation, in his absence, declared him a war criminal because of his activities near the end of the war. He was a determining member of Béla Komjádi's Golden Team. During the period from 1924 to 1936, he played on 110 occasions in the select team and appeared in four Olympic Games – B: 1768, 0883, 1031, 2111, T: 7456.→**Szőke, Kató; Argentina, Hungarians in.**

**Homoródkarácsonyfa, Inscription in Church,** (Transylvania, *Erdély*, now in Romania) – The church is of late Romanesque style. According to the inscription on the late Gothic gate, it was built in 1495. István Szőke, a Szekler university student, directed by Tibor Gerevich, unexpectedly discovered the inscription in the church at the end of July 1944, when he was inspecting ancient churches. The Hungarian runic inscription can be seen on the second story crenella of the church tower; it is carved into a sculptured protrusion. In 1945, Gyula Németh discussed the deciphering of the inscription in the linguistic periodical, *Hungarian Language (Magyar Nyelv)*. – B: 1174, 1020, T: 7669.→**Hungarian Runic Script.**

**Honorio Justa Grata** (5th century) – Daughter of the Roman Emperor Constantius III and Placidia, sister of Emperor Valentinian III. At an early age, she was given the title “August” to prevent her from entering into marriage. However, Honorio began a love

affair with Eugenius, her chamberlain. Finally, she was sent into seclusion. According to legend, in her rage, she offered her hand to Attila the Hun in 450. Henceforth, Attila demanded her hand in marriage, and power over the half of the Roman Empire. Honoria was quickly married off to an insignificant courtier and kept in captivity in Italy for the rest of her life. Attila regarded it as a *causa belli* and invaded the Empire, which led to the Battle of Catalaunum in 451. – B: 0942, 1031, T: 7103. → **Hun Battle; Attila.**

**Hont, Ferenc** (Francis) (Szeged, 4 April 1907 - Budapest, 11 March 1979) – Stage manager, director, theater esthetician. He studied to become an actor in Vienna and Berlin; later he studied theater management under Gémier in Paris (1925-1927). On returning to Hungary he was manager of the theater of Szeged during 1928 to 1937, but concurrently he worked as manager of a number of theaters in Budapest, such as New Theater (*Új Színház*), Hungarian Theater (*Magyar Színház*), Bethlen Plaza Theater (*Bethlen téri Színház*). In 1933 he founded the *Open Air Shows of Szeged*, and he managed first Madách's *The Tragedy of Man* (*Az ember tragédiája*) on the open-air stage. From 1935 to 1938 he lectured in the School of Dramatic Art of the National Actor's Association. During 1935-1937 he edited the journal *Stage* (*Színpad*) and during 1938-1939, the *Independent Stage* (*Független Színpad*). From 1937 to 1943 he managed the theatrical company *Independent Stage* (*Független Színpad*). During World War II he was on the front in forced labor camp, but fleeing across to the Soviet troops he became a prisoner of war. He returned to Hungary in June 1945. During 1945-1949 he was director of the Academy of Dramatic and Cinematic Art and also director of the Madách Theater, Budapest. In 1948-1949 he was artistic director of the State Film Company (*Állami Filmgyártó Vállalat*). In 1951-1952 he managed the Madách Theater. In 1952 he became the founding director of the National Theater Historical Museum; and when it became reorganized during 1957, he became director of Institute of Dramatic Art and President in Hungary of the International Theatrical Institute (ITI). He continued his teaching work first in the Academy of Dramatic and Cinematic Art and, later, as assistant professor at the University of Budapest. He kept a diary of his life from 1941 until his last days and he edited the works *Bulletin of Theater History* (*Színháztörténeti Értesítő*) (1953); *Great Hungarian Actors* (*Nagy Magyar Színészek*) (1957), and *History of the Hungarian Theater* (*Magyar Színháztörténet*) (1962), as well as *The World History of Theater* (*A színház világtörténete*) (1972). Numerous papers written by him have been published in various journals. His published books include *The Stage Play* (*A színjáték*) (1932); *Theater and the Working Class* (*Színház és munkásosztály*) (1935); *Developing the Imagination of the Actor* (*A színészi képzelet fejlesztése*) (1936); *The Vanished Hungarian Stage Play* (*Az eltűnt magyar színjáték*) (1940); *The Work of the Performer* (*A színjátszó munkája*) (1952); *Reality on the Stage* (*Valóság a színpadon*) (1960); *The Art of Action* (*A cselekvés művészete*) (1972), and *Little Theater Esthetics* (*Kis színházesztétika*) (1976). Hont was presented with the Kossuth Prize in 1949. – B: 0883, T: 7456. → **Buday, György.**

**Honterus, János** (Honter; family name Grass) (Brassó, now Braşov, Romania 1498 - Brassó, 23 January 1549) – Writer, Lutheran preacher, and humanist. He was the Reformer of the Saxons of Transylvania (*Erdély*, now in Romania). He first studied in Brassó then, from 1515 to 1525, at the University of Vienna; from 1525 in Krakow, and from 1532 in Basel, where he learned the printing trade, mapmaking and woodcarving. In 1534 he returned to Brassó, and in 1539 he opened his own printing shop. During 14

years he printed 31 books, mostly his own works. He was a member of the town council, founded a paper-mill, and was elected the first Lutheran pastor of Brassó in 1534. He founded a school and a library. Owing to his work, the Lutheran Reformation spread across the Saxon-land in Transylvania. His popular *Cosmography* reached several reprints abroad, and it signifies the beginning of Geography Literature in Hungary. In 1532 he printed in Basel the detailed map of Transylvania, which became the source of maps till the 18th century – B: 0883, T: 7103.→**Lázár Scribe.**

**Honthy, Hanna** (Hajnalka Huegel, Hajnalka Hajnal) (Budapest, 21 February 1893 - Budapest, 30 December 1978) – Actress, operetta *prima donna*. She studied ballet, danced on stage of the Opera House at the young age of ten, enrolled in the theater school of Szidi Rákosi in 1912, contracted to the People's Opera House (*Nép-opera*) (1917) and to the Comedy Theater (*Vígszínház*), and subsequently performed in country theaters in Pozsony (now Bratislava, Slovakia), Fiume (now Rijeka, Croatia) and Szombathely (1920). László (Ladislav) Beöthy contracted her at the UNCO theaters (a groups of four theaters under one management). She played her first great successful role in *Fifi*, at the Lujza Blaha Theater, followed by performances at the Review Theater (*Revű Színház*), Budapest. In 1925, she became a member the Operetta Theater (*Fővárosi Operett Színház*). From 1927 to 1929, she was a member of the Inner City Theater (*Belvárosi Színház*) in prose roles, later played *prima donna* roles in the Acting Circle of Buda (*Budai Színkör*). Between 1930 and 1940, she played guest roles at various theaters, including the Operetta Theater, where she performed continuously after 1949. Abroad she enjoyed successes in Leningrad (now St Petersburg, Russia), in the Ukraine, Moscow, Paris, Romania and Czechoslovakia. During her career, she played most of the operetta repertoires, representing the great classical operetta style, the traditions which she enhanced with individual elements. Her interpretations were characterized by strong technical knowledge, discipline, good taste and freshness. In later years, her acting was enriched by humorous, self-satirizing elements, as though emphasizing the old-fashioned style of expression of a passing world. Until the end of her career, she kept abreast of changes in the light musical style, reflected by her interpretation of Lady Bracknell in the musical version of Oscar Wilde's comedy *The Importance of Being Ernest* (under *Bunbury* title). Some of her more important roles were in A. J. Hervé's *Lili*; Kálmán's *The Gypsy Princess* (*Csárdáskirálynő*); V. Jacoby's *The Marriage Market* (*Leányvásár*); Sardou's *Madame Sans-Gêne* (*Szókimondó Asszonyosság*); J. Strauss' *Students of Vienna* (*Bécsi diákok*), and Offenbach's *The Grand Duchess of Gerolstein* (*A gerolsteini nagyhercegnő*). She was a recipient of the Kossuth Prize (1953), the Outstanding Artist title (1950) and the Artist of Merit title (1953). – B: 0871, 1105, 1445, T: 7684.→**Beöthy, László.**

**Honvéd** (Soldier, Homeguard) – The word *Honvéd* was applied for the first time by the reform linguist Károly (Charles) Kisfaludy (1788-1830) to the volunteer soldier, who enlisted to defend the Hungarian homeland. The prefix “*Honvéd*” preceded the officer's rank, i.e. “*Honvédtiszt*” (*Honvéd Officer*), and *Honvéd* became the name of the soldiers without rank: Privates. The best English translation of this expression is “Guard of the nation” or “National guard”. In all phases of history of the Hungarian Army, whether it was the Royal Hungarian Army, the People's Army, or the National Guard Army, preserved the word *Honvéd* for enlisted men. – B: 1153, 1020, T: 3233.→**Kisfaludy, Károly.**

**Horányi, Béla** (Budapest, 18 July 1904 - Budapest, 19 November 1986) – Physician, neurologist, psychiatrist. He studied in Budapest, then worked at the Brain Research Laboratory of the Neurological and Psychiatric Clinic. He became an honorary lecturer in 1935; later he was appointed Director of the Clinic. In 1950, he was transferred to the National Institute of Neurology and Psychiatry as Head Physician of the Department. In 1956, he received a faculty position at the newly reorganized Neuropathology Clinic of the University, from where he retired in 1975. Horányi conducted research on brain tissues in Germany and England. His main research areas were histopathology and clinical manifestations of poliomyelitis, histopathology of schizophrenia, clinical features and histology of diseases of the cerebellum, clinical aspects, pathobiology and pathology of voluntary motor actions, pathohistology and clinical manifestations of muscular diseases, and investigations of panencephalitis nodosa. He held various posts on councils of national professional organizations and was member of numerous international professional associations. He was Editor-in-Chief for the *Medical Weekly (Orvosi Hetilap)* for three years. His main works include *Neurology (Neurologia)* (1961). The Hungarian Academy of Sciences honored him as Outstanding Scientist in 1950 and, in 1952 he received an Honorary Doctorate in Medical Sciences. – B: 0883, 1160, T: 7667.

**Horka or Harka** – (1) In the tribal alliance of Hungarians, this was the name of the third highest position and rank after the *kende* and the *gyula* (in pre 975 times). After the settlement in the Carpathian Basin, *horka* was the overlord of a number of tribal leaders and the commander of the tribal armies of Northern Hungary (now in Slovakia). The best known *horka* by name was the famous Bulcsu, the son of the tribal leader or head, Töhötöm. (2) This was the title of the son of Töhötöm. They conquered the northeastern Nyírség region. From there he and two other leaders, Szabolcs and Tas, marked the Meszes Pass as the border of Hungary. According to Anonymus, the chronicler, Töhötöm defeated Gyelo, ruler of Transylvania (*Erdély*, now in Romania), whose subjects accepted him as their lord. Harka inherited his father's office; had two sons, Gyula and Zsombor. Gyula had two daughters: Karold and Saroldu; the latter became the wife of Khagan (Reigning Prince) Géza, and mother of the first King of Hungary, István I (St Stephen, 997-1038). The family's tragic end was that Zsombor's son, Gyula, with his two sons, Buja and Buknya, rebelled against István. The village of Harka in the County of Sopron and the fortress castle at Kraszna-Horka (now in Slovakia) preserved the name. – B: 0942, 1153, 1020, T: 7103.→**Anonymus**.

**Horkai, László** (Ladislav) (Szernye, now Rivne, Carpatho-Ukraine, Ukraine, 18 March 1944 - ) – Bishop of the Reformed Church in Carpatho-Ukraine. He attended High School in Bályu (1959-1962). He completed studies as a private student at the Commercial School, Munkács (now Mukacheve), and worked as a merchant clerk until 1967. He studied music at the Music School at Ungvár (now Uzhhorod, Ukraine), then worked as music teacher at Szernye (now Rivne, Ukraine) (1979-1981). He studied Theology, as a private student, under the guidance of ministers, was ordained in 1981, and became Parish Minister at Nagydobrony (now Velika Dobron, Ukraine), where he has been serving since 1981. He has been involved in Gipsy-mission for decades. He taught Religion at the High School in Nagydobrony (now Velika Dobrony, Ukraine) (1995-1998). He was Dean in 1991, then Bishop of the Hungarian Reformed Church in Carpatho-Ukraine from 1998. He resigned in 2006. – B: 0910, T: 7103.→**Reformed Church in Carpatho-Ukraine**.

**Horkay, László** (Ladislav) (Veresmart, now Rošia, in Northern Hungary, now Slovakia, 1905 - Debrecen, 19 January 1976) – Minister of the Reformed Church, theologian, philosopher, writer. He studied Theology at the Reformed Theological Academy of Sárospatak; obtained his Ph.D. in Philosophy from the University of Budapest, and also earned a Degree in Education in Hungarian and English, in 1949. During the years 1927-1929, he furthered his studies on a scholarship at the Universities of Zürich, Edinburgh, Glasgow and Tübingen. From 1932 to 1947, he was teacher of Religion in the Reformed High School of Hajdunánás, where he also was Principal from 1944. From 1947 until his retirement in 1968, he taught Religion, Hungarian and English at the Reformed High School of Debrecen. In the literature on the history of philosophy, Horkay was the first to indicate that the Hungarian reception of Kant went back to earlier times than it was thought. His works on the history of philosophy are considered reliable. His works include *Böhm and German Idealism (Böhm és a német idealizmus)* (1938); *Kant's Religious Views (Kant vallásos nézetei)* (1942), and *First Hungarian Followers of Kant (Kant első magyar követői)* (1974). – B: 0883, 1160, T: 7456. → **Böhm, Károly**.

**Horkovics Kováts, János Péter** (John Peter) (*Komjáthi-urszínyi*) (Pozsony, now Bratislava, Slovakia, 6 March 1955 - ) – Physician. He is a descendant of a noble family with a landed estate. His father was a physician; his mother was also born in Pozsony with a mixed Magyar-German ancestry. His secondary education was in Slovakia, studied Medicine at the University of Debrecen (1973-1979), where he obtained his Medical Degree. From 1979 to 1981, as his first position, he worked as gynecologist in Eger, then briefly in Heves, Pápa and Győr. He obtained a Masters Degree from the University of Budapest in 1984, and worked in the Oncology section of the Gynecological Department there. After relinquishing his Slovakian citizenship, he obtained the Hungarian one. In 1985 he moved to Germany, where he obtained a Masters Degree in Gynecology from the University of Munich, and worked there as a gynecologist for ten years. He has been living in a small Bavarian town of Dingolfing. In recent years, he has been studying early Hungarian history. He founded the Hungarian Castle Foundation (*Magyar Vár Alapítvány*), and he has been its President. He was also the founder and President of the Alliance of Hungarian Historic Families (*Magyar Történelmi Családok Szövetsége*) (2009). He is an active member of the Hungarian World Federation (*Magyarok Világszövetsége*), a member of its presidium and, since 2004, President of its German National Council. In 2010, he returned and settled in Hungary and founded and manages the *Hun TV Station*. – B: 1869, T: 7456.

**Horn, Gyula** (Julius) (Budapest, 5 July, 1932 - ) – Politician, economist. He graduated from the Don-Rostov College of Economics and Finance, Rostov, USSR, in 1954, and from the Political Academy, Budapest (1967-1970). He worked in the International Department of the Hungarian Socialist Workers' Party (*Magyar Szocialista Munkás Párt – MSZMP*) (1969-1985) and, during the period of one-party Communist rule, he was Under-Secretary and then Minister for Foreign Affairs (1985-1990). He was one of those who triggered Eastern-European political changes in 1989, by allowing safe conduct for East German refugees to reach West Germany; initiated the dismantling of the Iron Curtain on the western border of Hungary, which soon led to the demolition of the Berlin Wall and the unification of the two Germanies, finally resulting in the fall of the communist system in Eastern Europe. In anticipation of the coming political changes, the MSZMP transformed itself into the Hungarian Socialist Party (*Magyar Szocialista Párt* –

MSZP) in 1989, and he was chosen as its new president in 1990. He was Prime Minister from 1994 to 1998, and governed in a coalition with the centrist Free Democrats (*Szabad Demokrata Párt – SZDSZ*). He pursued a free market economic program, which, by attracting foreign investment, brought economic recovery. However, he lost power after the May 1998 general elections and in the Party's presidency he was replaced by László (Ladislás) Kovács. He is the author of several books on East-West relations. He is a recipient of the Károlyi Prize (1990), the Golden European Prize (1994), the Ludwig Wunsche Prize (1998) and the Understanding among Peoples Prize, Germany (1993). – B: 0876, 1031, T: 7103. → **Kovács, László.**

**Hornyik, György** (George) (Újvidék, now Novi Sad, Serbia, 16 March 1937 - ) – Writer, translator of literary works. He completed his general and secondary education in Újvidék in 1955; this was followed by higher studies at the University of Újvidék, majoring in Hungarian language and literature. In 1960 he worked briefly at the firm *Jugošped*, and from 1960 until 1979, he was journalist for foreign affairs at the daily *Hungarian Word* (*Magyar Szó*). From 1979 to 1990 he was a contributor for the Federal Translating Service, retiring in 1990. His works include *Funeral* (*Temetés*) (1966); *Cemetery Plot* (*Parcella*) (1980); *Demolition* (*Bontás*) (1987); *Mortlake* (*Morotva*) (1996), and *Among Vine-tendrils* (*Szőlőindák között*) (2004). His literary translations include D. Kostić's *The Mysterious Treasure* (*A rejtélyes kincs*) (1965); M. Najdanović's *Between Bushes and Clouds* (*Bokrok és felhők között*) (1967); F. Austin's *The Headhunter* (*A fejevadász*) (1969), and *Galleys of Omiš* (*Omiši gályák*) (1970). – B: 2108, T: 7456.

**Hornyik, Miklós** (Nicholas) (Újvidék, now Novi Sad, Serbia, 12 January 1944 - Budapest, 12 February 2012) – Critic and journalist. He completed his general and secondary education at Újvidék in 1962. He obtained his Degree in education for general (primary) school in 1964, and that for high school in 1966. He studied at the Department of Hungarian Language and Literature of the Teachers' College of the University of Újvidék, obtaining a Master's Degree in literature from the same University in 1978. From 1966 to 1968 he was contributor to the daily *Hungarian Word* (*Magyar Szó*), and worked as Editor of the paper *Illustrated Youth* (*Képes Ifjúság*) during the years 1969 and 1975. He was Editor of Újvidék Television from 1975 to 1979; Demonstrator at the Institute of Hungaryology from 1979 to 1986; a co-worker for the Center for Public Opinion Research of Újvidék Television from 1986 to 1991. Later he lived in Budapest and worked as Editor of the paper *World Federation* (*Világszövetség*) (1992-1993). From 1993 to 2000 he was a contributor to Hungarian Television, and also President and Director of TV-programs. Later he worked as an expert for the programs of the Echo TV. His works include *Irregular Diary* (*Szabálytalan napló*) (1981); *Conversation with Writers* (*Beszélgetés írókkal*) (1982); *Hungarian Cultural History in Yugoslavia* (*Jugoszláviai magyar művelődéstörténet*) (1984); *History of Southern Bácska during 1920-1929* (*A Délbácska története 1920-1929*) (1987), and *Border Violation* (*Határsértés*) (2002). – B: 2108, T: 7456.

**Horsehead** → **Lófő.**

**Horse Sacrifices** – Among Uralic and Altaic peoples, it was a common ancestral tradition to sacrifice a horse to the gods. The flesh was cut up, cooked in a big cauldron, a portion was then thrown into the fire, as an offering to the deity, and the rest was

consumed by the participants at the ceremony. This custom dates back to the most ancient times. Herodotus narrated this event concerning the Massagetas: “*They worship only one god, the Sun. To him – the fastest among the gods – the fastest mortal being, the horse, is sacrificed*”. The horse sacrifice is closely connected to the Sun cult. Two rites are known: the rite of the Spring Sun God, to whom a white horse was sacrificed; and that of the Autumn Sun God, to whom a dark one was sacrificed. Nomadic nations also sacrificed a horse after the wake. According to 12th century chronicler Anonymus, this was also customary among the ancient Hungarians, who connected the meal with the religious ceremony, which they called a sacrificial meal. During the time of migration, the relics of horse sacrifices were found in Hun, Avar and also in Magyar graves. Among pagan nations, this custom is still observed. – B: 0942, 1078, 1020, T: 7682.→**Anonymus.**

**Horthy, István de Nagybánya** (Stephen) (*Vitéz nagybányai Horthy István*) (Pula, 12 September 1904 - 20 August 1942, Alejsejevka, Soviet Union) – Deputy Regent, engineer, fighter pilot. He was Regent Miklós (Nicholas) Horthy’s eldest son. Horthy graduated as a mechanical engineer in 1928. He went to the United States for one year and worked in the Ford factory in Detroit, Michigan. Returning to Hungary, he worked in MÁVAG’s locomotive factory in the designer team He took part in the development of many great projects, such as the Locomotive 424. Between 1934 and 1938, Horthy was the Company's Director, and after 1938, he became its General Manager. In 1940, he married Countess Ilona Edelsheim-Gyulai. He confronted Nazism, and often made his criticism public. In January 1942, his father appointed him Deputy Regent, and at that time, the “small regent” enjoyed massive popularity in Hungary. Shortly thereafter, István was sent to the Eastern Front. His humanity, and his disagreement with the “Jewish Question” was well known. István Horthy died in Russia, in an unexplained airplane crash in his Héja plane. His son, Sharif István Horthy, born in Budapest in 1941, graduated in 1962 with a Degree in Physics from Oxford University. He earned a second degree in Civil Engineering at Imperial College of London in 1966. In his mid-twenties he moved to Indonesia, where he worked as a consulting engineer and ran a construction company. In his spare time he was personal assistant and interpreter to Bapak (Father) Subuh Sumohadiwidjojo, the founder of Subud, a non-denominational spiritual association. After 22 years in Indonesia, Horthy moved to the USA and then to England, where he manages the Guerrand-Hermés Foundation for Peace. Sharif lives in Lewes, East Sussex with his Javanese second wife, Tuti, with whom he is gradually translating Bapak Subuh’s works into English. – B: 1031, T: 1031, 7103.→**Horthy, Miklós; Horthy, István Mrs.**

**Horthy, István Mrs.** (née Countess Edelsheim-Gyulai, Ilona Maria Andrea Gabriella, Budapest, 14 January 1918 - ) – She spent her childhood on the family estate at Felsőelefánt, near Nyitra in Upper Hungary (*Felvidék*, now Slovakia), which was ceded to the newly created Czechoslovakia by the Dictated Peace Treaty of Trianon of 1920; at present it belongs to Slovakia (the Slovakian name of the village is Horné Lefantovce). The education of her and her three sisters was taken care of by a Hungarian, a French and a German governess. In 1940 she married the Deputy Regent, vitéz István Horthy of Nagybánya, the son of the Regent of Hungary, Miklós Horthy of Nagybánya. In 1941, a son, István was born to them. István Horthy, who served as a pilot in World War II, was killed in a plane accident in 1942 on the Russian front. During World War II, Mrs.

Horthy worked as a Red Cross sister on the Russian front. She also took part in the saving of Jews. She participated in Hungary's attempt to pull out of the war, in which she had to carry out some sensitive tasks. Later, she took part in maintaining secret radio contact with the armistice delegation sent to Moscow at the end of September 1944, and in the decoding of secret texts. She exhibited considerable poise and coolness in this risky activity. In 1944, when she was 26, she was with the Horthys when they were deported by the Germans to Bavaria. In the decades of homelessness she was the guardian of the family. She loyally accompanied and served her father- and mother-in-law in exile at Estoril in Portugal. Later she remarried. She wrote her memoirs in a two-volume novel, providing insight into the fateful period experienced by Hungary, and the Regent and his family. Her memoirs were published in Budapest under the title *Honour and Duty* (*Becsület és kötelesség*). At present she is living in London. – B: 1031, T: 7456. → **Horthy, István; Horthy Miklós.**

**Horthy, Miklós, de Nagybánya** (Kenderes, 18 June 1868 - Estoril, Portugal, 9 February

1957) – Rear Admiral, Regent of Hungary between 1920 and 1944. He was a commissioned Imperial and Royal Naval Officer in the Austro-Hungarian Monarchy, aide-de-camp to Emperor Ferenc József (Francis Joseph) and was the last Commander-in-Chief of the Imperial and Royal Navy with the rank of Rear Admiral. After the collapse of the Monarchy, in the fall of 1918, a national government was formed on 31 May 1919, in Szeged, and it appointed Horthy Minister of Defense and Commander-in-Chief of the National Army. After the fall of the short-lived Council (Soviet) Republic of Hungary, on 1 August 1919, with the National Army, he marched into Budapest on white horseback on 16 November 1919, and restored law and order in the country. With a secret vote the National

Assembly elected him Regent of Hungary on 1 March 1920.

His rule started after a lost war, Red terror, the Czech and Romanian intervention, and he endeavoured to restore the moral, economic and political life of the ravaged country. He twice thwarted the return to the throne of King Károly IV (Charles) and dissolved the white military officer-groups. He established the Knightly Order of the “*Vitéz*” (*Hero*). His foreign policy attempted to revise the harsh conditions imposed upon Hungary by the Dictated Peace Treaty of Versailles-Trianon on 4 June 1920, which dismembered historic Hungary. It ceded 2/3 of its territory and 1/3 of its ethnic Hungarian population to hostile nations, two of them newly, artificially created.

Under his reign the economic restoration of the rump country was successfully achieved. In 1926, Hungary introduced the new currency, *Pengő*, and it became one of the strongest currencies in Europe until the end of World War II. A world-renowned industry was developed, including such giants as Ganz, Weiss-Manfred, Láng, Tungsram, Hoffer, Chinoin and Richter. Industry, agriculture and commerce flourished. Public education and public health were upgraded and modernized, social problems were dealt with, and houses were built for large families (ONCSA houses). The population grew from 7.6 million in 1920 to 8.7 million in 1930 and to 9.5 million in 1940.

To achieve the revision of the unjust and harsh peace dictate of Versailles-Trianon of

1920, he at first sought the help of the western democracies for 15 years, but in vain. To reach at least a partial solution for revision, he finally aligned Hungary with Italy and Germany. During his term in office, the Vienna Awards (in 1938 and in 1940) returned to Hungary the southern part of the Northern Hungary (Upland, *Felvidék*) from Slovakia and the northern part of Transylvania from Romania, both with a Hungarian ethnic majority. The return of Subcarpathia (or Ruthenia), the Mura Interstice and part of Voivodina were initiated only after the collapse of Czechoslovakia and Yugoslavia. Hungary ultimately entered into World War II on 27 June 1941, against the Soviet Union. Before and during the War, Horthy opened the Hungarian borders to persecuted peoples such as Poles and Jews.

In 1942-1943, he attempted to establish diplomatic connections with Great Britain. He tried without success to withdraw Hungary from the War. In retaliation the Germans occupied Hungary on 19 March 1944, and kidnapped his son, Miklós Jr, (Nicholas), removed Regent Horthy from office, and later interned him in Germany. After the Armistice, he remained in the custody of the Americans, as a witness at the Nürnberg Trials, but he did not stand for trial as a war criminal, though Yugoslavia unsuccessfully demanded his handover for trial. Later, he settled in Estoril, Portugal, where he died in 1959, and was buried in the Military Cemetery of Portugal. After the collapse of the Communist System, his remains were eventually returned to Hungary and laid to final rest in the family crypt in Kenderes, on 4 September 1993. Many Hungarians regard him as the most successful Hungarian ruler in the 20th century. – B: 0883, 1288, 1153, T: 3312.→**Council (Soviet) Republic of Hungary; Trianon Peace Treaty; Kiel Meeting; Hitler, Adolf; Ciano, Geleazzo; Vienna Award I; Vienna Award II; Hungary in World War II.**

**Hortobágy** – Completely flat northeastern part of the Great Hungarian Plain (*Nagyalföld*), south and east of the River Tisza and adjacent to the City of Debrecen. Originally it belonged to the flood plain of the River Tisza, therefore it was swampy; but in the 1840s, it was drained and was converted to a mostly treeless pasture land. Since the mid 18th century, it became an outlying pasture land of the city of Debrecen and a characteristic pasturing culture has developed there. After 1945, about one quarter of this area was converted to irrigated agricultural land. Along the main drainage channels, several fish farms were established. Its central area became a National Park. – B: 1134, 1153, 1020, T: 7656.

**Hortobágy National Park** – 52,000 hectares (ha) or 128,400 acres of the Hortobágy

*Puszta* (steppe) became the first national park of Hungary on 1 January 1973. Its additional 13,500 ha (33,345 acre) perimeter is retained as a Nature Conservation Area. The National Park preserves the centuries-old indigenous pasturing culture along with its unique flora and fauna, especially bird life, so characteristic of the Hungarian steppes. The Park retains the unique gene pool of the Hungarian longhorn cattle and long-wool sheep, which regularly pastured

there for centuries. Other typical domestic animals bred here are the Hungarian horse, the water buffalo and the *vizsla* dog. The characteristic architecture of the buildings and structures, constructed here in the last centuries, is also preserved within the Park. – B: 1153, 1020, T: 7656.→**Vizsla, Hungarian Dog.**

**Horvát, István** (Stephen) (Székesfehérvár, 3 May 1784 - Pest, 16 June 1846) – Historian and linguist. He was Professor of Paleography and Diplomatics, and subsequently taught the history of Hungarian literature; he was credited with publicizing the Hungarian language relics, the training of a new generation of scholars, as well as with the admirable organization of the Széchényi Library. In spite of several nominations, he never accepted membership in the Hungarian Academy of Sciences, as he disagreed with its main principles. He produced a rich output on history, history of literature and linguistics. He was one of the pioneers of comparative linguistics and considered the Hungarian language to be one of the oldest in the world. Horváth was also productive in the field of literature. He kept alive the spiritual traditions of Miklós Révay and had a great influence on Baron József Eötvös, and Mihály Vörösmarty. At the time of low national morale he was one of the spiritual supports of the nation, and many of his writings appeared in literary journals. His main works are: *Of the Kings: Lajos the Great and Mátyás Hunyadi...* (*Nagy Lajos és Hunyadi Mátyás királyoknak...*) (1815), and *Sketches on the Most Ancient Past of the Hungarian Nation* (*Rajzolatok a magyar nemzet legrégebbi történetéből*) (1815). He left behind a rich manuscript collection. – B: 1136, 1257, T: 7617.→**Révay, Miklós; Eötvös, Baron József; Vörösmarty, Mihály.**

**Horváth, Barna** (Barnaby) (Budapest, 25 August 1896 - New York, NY, USA, 3 March 1973) – Jurist, philosopher of law. He studied Law at the University of Budapest. There he lectured in Legal Philosophy in 1926, and History of Ethics in 1927. Between 1929 and 1940, he held various academic positions at the Department of Legal Philosophy of the University of Szeged. From 1948 on, he lived in the USA. He taught Political Science, International Law and Legal Theory at the New School of Social Research in New York. He lectured in Zürich, Vienna, Berlin, Freiburg, Copenhagen and Geneva. He represented a neo-Kantian view of legal philosophy. The theory, philosophy and sociology of law were his primary interests. Among his pupils were István (Stephen) Bibó and Ferenc (Francis) Erdei. His main works are: *Introduction to Legal Science* (*Bevezetés a jogtudományba*) (1932); *Notes on Legal Philosophy* (*Jogbölcseleti jegyzetek*) (1932); *Elements of Sociology* (*A szociológia elemei*) (1938); *Investigations of Public Opinion* (*A közvélemény vizsgálata*) (1942); *Theory of English Law* (*Angol jogelmélet*) (1943), and *Problems of Legal Sociology* (*Probleme der Rechtssoziologie*) (1971). He was member of the Hungarian Academy of Sciences. – B: 0883, 1511, T: 7667.→**Bibó, István; Erdei, Ferenc.**

**Horváth, Béla** (Budapest, 25 May 1908 - Budapest, 28 November 1975) – Poet, translator of literary works, journalist. He studied on tertiary level at the Universities of Budapest and Paris; as member of Eötvös College of the University of Budapest, and he earned a Ph.D. in Philosophy and a Degree in secondary education. He worked also as a journalist for several daily papers from 1927. Between 1937 and 1944 he wrote political articles for the paper *Evening Courier* (*Esti Kurir*) and was in charge of its literary column. Between 1936 and 1939 he was Associate Editor of *Nice Word* (*Szép Szó*), and between 1935-1944 that of *Vigilia*. From 1943, with some breaks, he was a soldier,

serving in a penal company because of his political views. In the final part of the war he was taken to Germany and fell in US captivity, later he moved to Italy, and in Rome his articles appeared in Italian papers. Between 1948 and 1952 he taught history in the monastic school of the Franciscans in Genoa. From October 1952 until April 1957, he worked in the Munich editorial office of Radio Free Europe. In 1952 he began to publish in the Munich journal *Horizon (Látóhatár)*: he was one of the editors of this journal from the end of 1957 to the summer of 1958. After the split that took place in the summer of 1958 he edited until 1961 the occasionally appearing *Horizon* issues together with Imre (Emeric) Vámos. In February 1962 he returned to Hungary. For a number of years he took part as managing editor in the publishing of *Horizon* in Budapest. During his years spent in the West, he carried out significant work as a poet, critic, translator of literary creations, and as a publicist. His works include *Vineyard Hill at Noon (Szőlőhegy délben)* poems, (1929); *Everything is Motionless (Minden mozdulatlan)* poems (1931); *Our Lord Christ, the Pope, and the Poor* (discussions in Hungarian and Italian) (1947); *Poems (Versek)* (1955), and *Doomsday (Végkor)* poems (1962). – B: 0883, 1672, 7456. → **Vámos, Imre; Radio Free Europe.**

**Horváth Codex** – A Codex dated from 1551. The manuscript contains two homilies, as well as parables and maxims, allegedly from St Bernard, intended for the training of monks. The sermons are about the incarnation and the death of the Blessed Virgin Mary. Their source is the *Stellarium* of Pelbart. The parables are of a simple-minded friar. It is possible that originally the Christina-legend also belonged to the Codex. The 137 letters are stored in the National Széchényi Library in Budapest. – B: 1150, 1257, 1020, T: 7617. → **Codex Literature.**

**Horváth, Csaba** (Szolnok, 25 January 1930 - New Haven, Connecticut 13 April 2004) – Chemical engineer. His higher studies were completed in the Chemistry Department of the Polytechnic of Budapest, where he earned a Degree in 1952. After the Revolution of 1956 was crushed, he emigrated to West Germany, where he continued his studies at the University of Frankfurt, Germany, and joined the *Farbwerke Hoechst AG* there, where he performed research and developmental work on the surface chemistry of organic dyes. In 1961, he left industry to resume his studies at the University, where he earned a Ph.D. in physical Chemistry in 1963. In the same year he emigrated to the USA, and became a Research Fellow at the Massachusetts General Hospital. In 1994, he moved to Yale and served in the School of Medicine, and subsequently in the Department of Engineering and Applied Science. In S. R. Lipsky's laboratory at Yale, he built the first HPLC unit to demonstrate the feasibility and potential of HPLC for the separation of biological substances. He pioneered biochemical engineering in the fields of enzyme engineering and biochemical separation. He was a frequent speaker at international scientific gatherings and a consultant to the biotechnology industry. He was a member of a number of related editorial boards and societies. He was a member of the Academy of Sciences of New York and Connecticut; an Honorary Doctorate was conferred on him by the Budapest Polytechnic (1986). He was an external member of the Hungarian Academy of Sciences (1990). He had 7 registered patents, wrote 290 scientific articles and 7 books. He received a number of prizes and awards, among them the Zwett Prize (1979), the Alexander von Humboldt Prize (1982), the Martin Golden Medal (1994), and the Golay Prize (1998). The American Chemical Society lists him among the greatest chemists. – B: 0874, 1279, T: 7103.

**Horváth, Ernő** (Ernest) (Budapest, 11 November 1883 - Budapest, 3 January 1943) – Teacher, the pioneer of Hungarian aeronautics. He taught at high schools in Budapest. He was also a pilot and airplane designer, who designed several monoplanes and won a prize at the Budapest airplane competition in 1910, with his first 26-horsepower plane. In the beginning, he piloted his own planes but he quit flying after a serious airplane accident. He designed the first two-seater passenger monoplane in Hungary. As a good physicist and mathematician, he introduced design innovations into airplane designs, based on his own theories and calculations. He designed his most advanced planes with variable wing curvature and wing angles, giving his planes a better, all-over stability and gliding properties. During the First World War, he was Chief Engineer of the Hiero airplane factory in Graz, Austria. He was amongst the first to work on the problem of unifying the vertical and horizontal direction control of airplanes and succeeded with the invention of the control stick in 1940. He patented his innovations and had many technical publications, including his book, *Airplane Motor (A repülőmotor)* (1922). – B: 0883, 1512, T: 7662. → **Pioneers of Hungarian Aviation.**

**Horváth, Gyula** (Julius) (Budapest, 10 May 1930 - Kápolnásnyék, 30 October 2005) – Actor, comedian. His education commenced in Austria. From the age of 6 he was raised by his grandparents at Karcag. His secondary education was at the Reformed High School, Karcag. Since his parents lived in Austria, his higher education was denied by the authorities. When he tried to escape from Hungary, he was captured and imprisoned. Freed, he was a manual laborer on the railway and in the building industry in Debrecen, and a hospital clerk in Jászberény. By chance, he was admitted to the Academy of Dramatic Arts, Budapest, where he studied under Lajos (Louis) Básti, Zoltán Várkonyi, Mária Sulyok and Kálmán Nádasdy. He worked at the Army Theater (*Néphadsereg Színháza*) (1955-1956), the National Theater (*Nemzeti Színház*), Miskolc (1956-1959), the Szigligeti Theater (*Szigligeti Színház*), Szolnok (1963-1964), the Attila József Theater (*József Attila Színház*), Budapest (1964-1982), and at the Gaiety Stage (*Vídám Színpad*), from 1982. He appeared in leading roles, mainly in comedies. To his credit are more than 30 feature and TV films, among others: *Dollárpapa* (1956); *Attempt (Merénylet)* (1959); *Cantata* (International English title) (*Oldás és kötés*) (1963); *The Naked Diplomat (Meztelen diplomata)* (1963); *Princ the Soldier (Princ, a katona)* (1966); *Trip Around My Cranium (Utazás a koponyám körül)* (1970); *There Was a Family (Volt egyszer egy család)* (1972); *The Three Fats (A három kövér)* (1983) (TV); *The Fantastic Aunt (A fantasztikus nagynéni)* (1986) (TV); *Neighbors (Szomszédok)* (1987) TV Series, and *The Secret War (A titkos háború)* (2002) (TV). His book is *I Played the Comedian (Én a komédiást lejátstam)* (2005). He was a recipient, among others, of the Mari Jászai Prize (1973) and the title of Merited Artist (1987). – B: 0874, 1171, T: 7103. → **Básti, Lajos; Várkonyi, Zoltán; Sulyok, Mária; Nádasdy, Kálmán.**

**Horváth, Helena, Lament of** – A poem from 1566. It was written in Kentelki (County Szolnok-Doboka, Transylvania, *Erdély*, now in Romania). The original title is *Cantio Jucunda de Helena Horváth*. It is contained in the Csereyné-Codex written by an anonymous poet. It describes the lamentations of a young, childless widow, who considers her tragic fate to be a punishment from God and urges others to lead an honorable life. The poem obviously is not the work of Helena, but was written for her use by someone familiar with her situation and who could place herself in her position. As an example of a lyric ballad, it stands alone in the 16th century. The poem's topics

reappeared in the poetry of Bálint Balassi. – B: 0883, 1257, 1020, T: 7617.→**Balassi, Bálint.**

**Horváth, János** (John) (Margitta, now Marghita, Romania, 24 June 1878 - Budapest, 9 March 1961) – Literary historian. He received his Degree in the Hungarian-French Department of the University of Budapest (1901-1902) and he also studied on a scholarship, at the *Ecole Normale Supérieure* of Paris. From 1904, he was professor at the Eötvös College of the University of Budapest. He was one of the founders of the Literary History Society (1911). From 1923 to 1948, he held the professorial Chair of History of Literature at the University of Budapest. As the most outstanding Hungarian literary historian of the 20th century, he undertook to present Hungarian literature synthetically, and by employing the results of the positivistic style of literary history writing. Horváth also analyzed the large-scale developments in Hungarian literature. A significant part of his work is important from the language history point of view as well, with special emphasis on the development of the Hungarian literary language. Some of his main works are *The Developmental History of Hungarian Literature (A magyar irodalom fejlődéstörténete)* (1922-1923, 1976); *The Hungarian Literary Populism from Faludi to Petőfi (A magyar irodalmi népiesség Faludtól Petőfiig)* (1927, 1978); *The Beginnings of Hungarian Literary Education (A magyar irodalmi nevelés kezdetei)* (1931); *In the Sign of the Reformation (A reformáció jegyében)* (1953); *Ady and the Latest Hungarian Lyric Poetry (Ady és a legújabb magyar líra)* (1910); *Sándor Petőfi* (1922), and *Essays* (1997). He was awarded the Kossuth Prize (1948), and he was member of the Hungarian Academy of Sciences (corresponding member 1919, regular member 1931). – B: 0879, 1257, T: 7456.

**Horváth, J. Eugene (Jenő)** (Győr, Hungary, 13 May 1920 - Vancouver, BC, Canada, 3 January 2013) – Accountant. Received his secondary education in Budapest, where he also attended University. Between 1941 and 1944, he served in the military. Came to Vancouver in June of 1957 following the 1956 Hungarian Revolution. He graduated as a Certified General Accountant from the University of British Columbia in 1966, and practiced until his death. In his private life he was a well known collector of faience and Haban ceramics. With his wife, Maria Krisztinkovich; also a collector, they possessed the largest collection of the genre in Canada. He also collected old books and maps. He published extensively on these subjects. Among them are: *English Delftware* (Canadian Antiques Collector, Toronto) (1968); *The Rise and Fall of Bibliotheca Corviniana* (Amphora, the Alcuin Society, Vancouver) (1989); *The Blue and White Faience of Europe* (Canadian Society for Asian Arts and the Vancouver Museum, Vancouver) (1992); *A Canadian Collection of Hungarica. Vol. I: Books 1494-1819; Vol.II: Maps & City Views 1493-1817,* (Vancouver) (2001); J. Eugene Horvath & Maria H. Krisztinkovich: *A History of Haban Ceramics – A Private View* (Vancouver) (2005); *Hungarian and Other European Ceramics of the mid-17th to mid-19th Centuries* (Vancouver) 2011. He was member of several Societies, among them the Alcuin Society of Vancouver; the Hungarian Studies Association of Canada, where he presented papers at the Society's annual conferences for several years. He donated part of his Hungarica book collection to the Széchényi Library and the National Archives of Budapest. – B&T: 7617.→**Freedom Fight of 1956; Habans; Krisztinkovich, Mária.**

**Horváth, József** (Joseph) (*Soproni*) (Kemenesszentpéter, 2 March 1891 - Sopron, 22 April 1961) – Painter. He studied painting under Imre (Emeric) Révész and Aladár Edvi Illés and, after he earned his Degree, he went to the artistic colony of Nagybánya (now Baia Mare, Romania). He took part in World War I, and was seriously wounded. From 1922 till 1950, he was a teacher of art graphics in Sopron. He mostly painted the locals in traditional attire, also portraits, landscapes and nude compositions. After World War II, the Socialist Government did not duly acknowledge him because he did not comply with the government directives as to what and how to paint. But after his watercolor, *The Brazier*, won first prize in London, the Government was forced to recognize him and was awarded numerous prizes. The last of his exhibitions was held in the National Art Salon in 1959. He was an eminent Hungarian master of the watercolor technique. He lifted color painting to the level of oil painting. He was a recipient of the Aquarel Prize, First Class (1936) and the Grand Prize of Alliance of Applied Artists (1943). He also received the Mihály Munkácsy Prize. His grateful town named a street and an art-school after him and gave him the “Soproni” *prenome*; a Memorial Museum also bears his name in Sopron. – B: 0883, 1160, T: 7653. → **Edvi Illés, Aladár.**

**Horváth, Loránd** (Ronald) (Marosvásárhely, now Targu Mures, Romania, 11 June, 1930 - ) – Minister of the Reformed Church, poet, writer. He attended high school at the Reformed College, completed it at the Lycée of Commerce, Marosvásárhely. He studied Theology at the Protestant Theological Institute, Kolozsvár (now Cluj-Napoca, Romania). He was Minister in Maros (Mures), Torda (Turda) and Dés (Dej) congregations. He was invited for a study trip to the USA, but was not allowed to go, instead he was suspended from ministerial duties. In 1987, he moved to Canada and served in Lethbridge, Windsor and Toronto. He edited the *Word and Church (Ige és egyház)*, then the *Word and Congregation (Ige és Gyülekezet)* newspapers and was a contributor to the *Encyclopaedia Hungarica* Hungarian edition. He wrote articles for the *Reformed Review (Refomátus Szemle)*, *New Life (Új Élet)* and *Sowing and Harvesting (Vetés és Aratás)*. He also served in various radio devotional programs. His output is some 19 books. Some of them are: *Book of Jonas (Jónás könyve)* (1967); *Sundance (Naptánc)* poems (1983, 1986); *Sacred Sonnets*, ed. (*Szent Szonettek*) editor (1987, 1994); *Psalms Codex of Marosvásárhely (Marosvásárhelyi Zsoltárok Kodexe)* (1990); *Wooden Grave Headboard (Kopjafa)*, poems (1990); *From Jonah to Jesus (Jónástól Jézusig)* poems (1992), and *A-B-C (akrosticon) Psalms (A-B-C akrosztikonos Zsoltárok)* (2000, 2001). He is a recipient of the Ferenc Liszt Prize and Diploma of Merit of the Republic of Hungary. – B: 0933, 0878, T: 7103.

**Horváth, Márton** (Martin) (until 1945 Marcell Schiller) (Budapest, 8 October 1906 - Budapest, 7 June 1987) – Politician, journalist. As a university architecture student he joined the Communist Party. In 1932, he was arrested, then interned and was unable to complete his studies. From 1935-1939, and 1942-1944, he was jailed again for political reasons. In 1944, he took part in armed resistance. From January 1945 to June 1953, he was active in the Communist Party; was a Member of Parliament (1945-1957), and a member of the Presidential Council of Hungary (1949-1953). He also edited the newspaper *Free People (Szabad Nép)* (1945-1950). He played a significant role in the formation of the Stalinist cultural policy, and his series of articles, entitled, *Our Flag-bearer: Petőfi, (Lobogónk: Petőfi)* (1950), became the symbol of the then current official ideology. In the October 1956 uprising, he was on the side of Imre (Emeric) Nagy and,

after its suppression on 4 November 1956 he refused to join the Kádár Government. He became Director of the Petőfi Literary Museum (1957-1960, 1963-1966), and he was also Director of the Hunnia Film Production Company (1960-1963). – B: 0879, 0883, 0878, 1257, T: 7456.→**Nagy, Imre; Kádár János.**

**Horváth, Mihály** (Michael) (Szentés, 20 October 1809 - Karlsbad (now Karlovy Vary, Czech Republic) 19 August 1878) – Catholic Bishop, historian, politician. He studied Arts and Theology, first at Szeged, then Vác. He was ordained into priesthood in 1832. From 1844 on, he was a teacher of Hungarian Language and Literature at the *Theresianum* of Vienna. He became Parish Priest in Hatvan in 1847, and Bishop of Csanád in 1848. Under the Szemere Government, he was Minister of Religion and Education from 2 May to 11 August 1849. After the collapse of the War of Independence in 1849, he was forced into hiding in Hungary; later, he emigrated to France, then moved on to Italy and Switzerland, and finally settled in Belgium in 1856. He was sentenced to death *in absentia* by the Austrian Government and hanged in effigy. He was able to return to Hungary only after the 1867 Compromise. In 1877, he became President of the Hungarian Historical Society, and a member of the Hungarian Academy of Sciences (corresponding member 1839, regular member 1841, President 1871). His *magnum opus* was already published in a shorter form as *History of Hungary, vols. i–iii (Magyarország története I–III)* (1842-1846). His other works include *History of Industry and Commerce in Hungary in the Last Three Centuries (Az ipar és kerekelem történeten Magyarországon a három utolsó század alatt)* (1840); *History of Hungary's Fight for Independence 1848-1849, vols. i–iii (Magyarország függetlenségi harcának története 1849-1849, I–III)* (1865); *The first Century of Christianity in Hungary (A kereszténység első százada Magyarországon)* (1878); *History of Hungary, vols. i–iv. (Magyarország története I–VI)* (1860-1863,; vols. I–VIII (1871-1873), and *Twenty-five Years from the History of Hungary, 1823-1848, vols. i–iii (Huszonöt év Magyarország történetéből, I–III, 1823-1848)* (1865). His dignified style and enthusiastic patriotism, combined with objectivity and thoroughness, rank him among the greatest masters of Hungarian history writing. – B: 0879, 1257, T: 7456.

**Horváth, Teri** (Terry) (Rábatamási, 18 August 1930 - Budapest, 6 March 2009) – Actress. She finished the Academy of Dramatic Art in 1952. She contracted with the Youth Theater (*Ifjúsági Színház*) and later became an artist with the Jókai Theater (*Jókai Színház*). She was a member of the Thalia Theater (*Thália Színház*), associated with the Jókai Theater. Her roles are wide-ranging; she is noted for her interpretations of folk figures, characterized by simplicity of method. She was much in demand because of her versatile abilities. Some of her more important roles were: in Lope de Vega's *Villagers of Fuente Ovejuna (A hős falu)*; Zs. Móricz's *Be Good Unto Death (Légy jó mindhalálig)*; A. Honegger's Joan of Arc at the Stake (*Jeanne d'Arc au bûcher – Johanna a máglyán*). There are more than 12 feature films to her credit including *Smugglers (Csempészek)* (1958); *Barbarians (Barbárok)* (1966); *Festive Days (Ünnepnapok)* (1967); *At Last it's Monday (Végre Hétfő)* (1971), and *The Lamp (A lámpás)* (1972). She is a twice recipient of the Jászai Award, the title of Artist of Merit, and the Life Achievement Prize. – B: 0871, 1439, 1445, T: 7884.

**Horváth, Tibor, S.J.** (Bánhida, 28 July 1927 - ) – Jesuit priest, educator, editor, author. He graduated from the Esterházy High School of Tata in 1946. He entered the Jesuit

Order in Budapest in 1946; he was ordained in 1957. He conducted philosophical studies at the *Aloysianum*, Szeged, in 1948; the University of Innsbruck in 1949; the *Aloysianum*, Chieri, Italy, in 1949-1951; the *College Philosophique et Theologique, St. Albert*, Université de Louvain, Belgium. He earned an M.A., and L.Phil. in 1952-1954. His Theological studies were at the *Facultad Teologica*, Granada, Spain, and earned S.T.L. in 1954-1958 at the Gregorian University, Rome, and acquired his Doctoral Degree in *Sacra Theologia* in 1962. He enrolled at the University of Chicago, for post-doctoral studies in Informatic Science and Computer Science in 1971. He was Professor of Systematic Theology at the Regis College, Federated College of the University of Toronto from 1962-1997. His pastoral practices were in Germany (1951-1952, 1959-1960), and Spain (1958-1959). He was a visiting Professor of Theology at St. Paul's University, Ottawa (1967-1969). He was the founder and General Editor of *Ultimate Reality and Meaning: Interdisciplinary Studies in the Philosophy of Understanding* in 1978; founder and Director of the Institution for Encyclopedia of the Human Ideas on Ultimate Reality and Meaning, from 1970; President of the International Society for the Study of URAM (1985-1987). He was the Founder and first General Secretary of the International Society for the Encyclopedia of Church History in Hungary (1986); Consultant of the Pontifical Council for Dialogue with Non-Believers, Vatican City (1990-1991); General Editor of Essays in Church History in Hungary (1992, 1993). He was the founder and first Principal of the Gyula Fényi Jesuit High School, Miskolc, (1994-1996). He is the author of several books and articles on theology, philosophy and faith. Some of his books are *Caritas est in ratione. Die Lehre des hl. Thomas Aquinas über die Einheit der intellectiven und affektiven Begnadung des Menschen. Beiträge zur Geschichte der Philosophie und Theologie des Mittelalters (Charity is in the reason. The teaching of St. Thomas Aquinas on the unity of the intellective and affective grace of the people Contributions to the History and Theology of the Middle Ages)* (1966); *Encyclopedia of Human Ideas on Ultimate Reality and Meaning A Plan and a List of Topics for a New Encyclopedia* (1970); *Faith Under Scrutiny* (1975); *Theology of Revelation (A Kinyilatkoztatás teológiája)* (1975, 1978); *Critique of Revelation (A Kinyilatkoztatás kritikája)* (1977, 1983); *The Sacrificial Interpretation of Jesus' Achievement in the New Testament* (1979); *Eternity and Eternal Life* (1993); *Jesus Christ as Ultimate Reality and Meaning, Monographs No 2*, URAM (1994), and *Thinking About Our Faith: Love, Faith and Hope* (in preparation). He is a member of the Society of Jesus; American Philosophers; Systematic Theologians; Anthropologists; International Community Service. He is the recipient of awards, including the *Deutsche Forschungsgemeinschaft*, Germany (1966), the Canadian Federation for the Humanities, Canada, the *Pro Magnanimatate Tua*, and St Gerald's Awards in Education, Hungary (1996). – B: 1002, T: 7103. *Charity is in the reason. The teaching of St. Thomas Aquinas on the unity of the intellective and affective grace of the people*

**Horváth, Tivadar** (Theodore) (Budapest, 19 March 1920 - Leányfalu, 30 April 2003) – Actor, stage manager, singer, compère. His higher studies were at the Academy of Dramatic Arts, Budapest (1938-1942), and at the Ferenc (Franz) Liszt Academy of Music, Budapest, where he studied violin and composition (1940-1942), and at the University of Budapest in 1947, studying History of Arts. He worked, first as actor, later as stage manager at theaters in the Capital City from 1941: at Inner City Theater

(*Belvárosi Színház*), Comedy Theater (*Vígszínház*), Operetta Theater (*Operett Színház*), Budapest; and in the countryside, including Szeged and Pécs. From 1948 to 1951, he was Professor at the Academy of Dramatic Arts. He was an elegant actor and a successful stage manager. Among his major roles are: title role in Shakespeare's *Hamlet*; title role in Pirandello's *Henry IV (Enrico IV, IV. Henrik)*; La Grange in Hervay's *Lily*; Fezör in Hubay-Vas-Ránki's *Three Nights of a Love (Egy szerelem három éjszakája)*; Laboda in Heltai's *Naftalin*, and Makáts in Zágón-Nóti-Eisemann's *Hyppolit the Butler (Hyppolit a lakáj)*. His stage managements include Fényes-Harmat's *Maya*; Ábrahám's *Ball in the Savoy*; Eisemann's *No 77 Bastion Promenade (Bástya sétány 77)*, and Poiret's *La Cage aux Folles (The Cage of Crazy Women, or The Bird Cage; Örült nők ketrece)*. Among his feature film and TV film producing works are: *Déryné; Állami Áruház (State Department Store); Dollárpara (Dollar Daddy); The Tragedy of Man (Az ember tragédiája), The Beggar Student (A koldusdiák)*, and *Maya*. He was a recipient of the Mari Jászai Prize (1956), and the Merited Artist Award (1980). – B: 0874, 1439, 1445, T: 7103.

**Horváth, Zoltán** (Budapest, 25 October 1900 - Budapest, 15 November 1967) – Journalist, historian, translator of literary works. In 1919 he joined the Hungarian Social Democratic Party. In the same year, he emigrated to Austria and settled in Vienna, where he became involved with the *Light (Világosság)* group. During the 1920s, he returned home and worked as a journalist, historian, literary translator and editor. He translated, among others, works of Stefan Zweig, C.F. Mayer and E. Kästner. Between 1938 and 1941, he lived in France. From 1942, he was in Budapest and worked as an external contributor for the paper, *Voice of the People (Népszava)*. He was a member of the Social Democratic Party's national leadership. After 1945, he was a columnist for the journal *Népszava*. From 1947, he was the editor of the philosophical review, *Light (Világosság)*. As a representative of his Party he was involved in the sentencing of Béla Imrédy, one of the prime ministers during World War II. After the two workers' parties united, he became one of the leaders of the newly formed Hungarian Workers' Party (*Magyar Dolgozók Pártja – MDP*). In 1949, however, he was arrested and sentenced to imprisonment in a mock trial. He was freed in 1956. Thereafter, he retired and was active as a historian. His works include *World History Lexicon (Világtörténeti Lexikon)*, with Gy. Parragi (1942); *The Turn of the Century in Hungary: History of the Second Reform Generation, 1896-1914 (Magyar századforduló, A második reformnemzedék története 1896-1914)* (1961, also in German), and *Literature and History (Irodalom és történelem)* (1968). – B: 0883, 0878, 1257, T: 7103.

**Horváth, Zsigmond** (Sigismund) (Bori, now Bory, Slovakia, 10 November 1914 - Komárom, now Komarno, Slovakia, 17, March 1988 - burial) – Bishop of the Christian Reformed Church in Slovakia. He studied Theology at the Reformed Theological Seminary of Losonc (now Lucenec, Slovakia), and completed it in 1938. He was an assistant minister in various places (Hontgyarmat, Végfarkas, Vámosladány and Búcs) and Parish Minister in Hontgyarmat (now Hontianska Vrbica, Slovakia) (1941) then in Búcs (now Buc, Slovakia) (1949) and Dean of the South Nyitra (now Nitra) Deanery (1964-1972). He was Parish Minister in Rév-Komárom (now Komarno, Slovakia) from 1971 to 1988. He was first acting, then consecrated Bishop of the Reformed Christian Church in Slovakia (1980-1988). – B: 0941, T: 7103.

**Houdini, Harry** (Ehrich Weisz) (Budapest, 24 March 1874 - Detroit, 31 October 1926) – Escape artist. He was born into a Hungarian Jewish rabbi family, emigrated to the USA in 1878. The immigration Authority changed the name Weisz to Weiss, and later, he assumed Houdini (after the French magician, Houdin), and Harry as his stage name. He started working at street circuses in Appleton, Wisconsin, then in New York, NY. He learned all the tricks of the magicians and soon he presented himself as an escape artist; his fame grew quickly. At the turn of the century, he went to England and won over the public. After his return to America, he performed gradually more difficult shows: escaping from chains and padlocks; hanging upside down in a water filled aquarium; escaping from a straitjacket, etc. He also ventured into piloting airplanes and the silent movie. In the 1920s, his shows at the Broadway were popular attractions. He conducted a healthy lifestyle. His abdomen muscles were so strong he withstood every blow, but after one particular blow he became so ill, even surgery could not prevent him from death. – B: 1037, T: 7103.

**House Consecration** – An ancient custom; in past centuries, it was customary to consecrate new homes, buildings, or houses with a ceremony that could be repeated annually, or more frequently. King József II (Joseph, 1780-1790), banned this custom; it was however, later reintroduced. Today, usually only the buildings for church use are consecrated. – B: 0942, T: 7103.

**Hovering Wheel** – This was an early experimental type of airplane. Lajos (Louis) Martin worked it out and had it patented in 1893. According to eyewitness accounts this machine, publicly demonstrated in Kolozsvár (now Cluj-Napoca, Romania), rose to a 3 m height. – B: 0883, 1020, T: 7456→**Martin, Lajos**.

**Howard, Leslie Stainer** (Forest Hill, London, England, 3 April 1893 - Gulf of Biscay, 1 June 1943) – Actor. Leslie Howard not only came from immigrant stock, but his first language was German. His Hungarian-Jewish father, Ferdinand Steiner, Anglicised his name to Frank Stainer when he moved to London and married a barrister's daughter, Lilian Howard (née Blumberg). Though born in Forest Hill, their son initially grew up in Vienna, returning to London and to a Dulwich College education when his father joined a City stockbroking firm. At first he worked as a bank clerk; but the acting bug had already bitten, thanks to his mother's fondness for amateur dramatics, and Leslie would take on her adopted maiden name as his own. At the outbreak of World War I, he went into the army. In 1917, diagnosed as shell-shocked, he was invalided out and advised to take up acting as therapy. In a few years his name was famous on the stages of London and New York. His first major film was *Outward Bound* (1930). He acted in more than twenty feature pictures, among them, *Devotion* (1931); *For Service for Ladies* (1932); *Secrets* (1933); *The British Agent* (1934); *The Scarlet Pimpernel* (1934); *Romeo and Juliet* (1936); *Pygmalion* (1938); *Gone with the Wind* (1939), and *Spitfire* (1943). He was one of the remarkable character actors of his time and was appreciated for his intelligence and humorous characterizations. In spite of his triumphs in America, he returned periodically to England. During World War II, he helped the anti-Nazi propaganda and was involved in the English Secret Service as well. The Germans shot down his plane was over the Gulf of Biscay. – B: 1065, T: 7103.

**Huba** (9th century) – At the time of the settlement in the Carpathian Basin in the 9th century, Huba, one of the seven leaders, was the leader of the Kürt-Gyarmat Tribe.

According to Anonymus, the Chronicler, Khagan Árpád sent him and two tribal leaders, Szoard and Kadocsa against Prince Zobor of Nyitra (now Nitra, Slovakia). He was defeated after a four-day siege. Árpád allowed the vanquished to keep their land and made Huba the bailiff of Nyitra and the other forts in the region. Árpád gave him land from the River Zsitva to the woods of Törzsök. Huba is the ancestor of the Szemere clan. – B: 0883, 1133, 1020, T: 7677. → **Anonymus**.

**Hubay, Jenő** (Eugene) (Huber) (Pest, 15 September 1858 - Budapest 21 March 1937) –

Violin virtuoso, composer, pedagogue. He was a student of his father, and then of József (Joseph) Joachim in Berlin. In 1878, he won fame in the *Pas de Loup* concerts of Paris. In 1882, he was the primary violin instructor of the Brussels Conservatory of Music. Then he returned to Budapest, to take over the Violin Department of the Academy of Music. In a short period of time, he developed it into a master program, which was sought after also by foreign students. Between 1919 and 1934, he was Chief Director of the Academy of Music. In 1886, he established a string quartet with Joseph Popper, which performed until 1903. He was a virtuoso violin player, one of the greatest performers of his time. He was a leading personality in Hungarian musical life. An excellent

educator, he was the founder of the Hungarian Violin School. The Hubay School educated outstanding violinists (Jenő Gertler, Ede Zathureczky, etc). As a composer he fused the 19th century's romanticism with French musical style, e.g. in *Violinist of Cremona (Cremonai hegedűs)*; *Village Rascal (Falu rossza)*; *Lavotta's Love (Lavotta szerelme)*; *Anna Karenina*, and *The Mask (Álarc)*. A music school, a town square in Budapest, and a foundation bear his name. – B: 0883, 0942, 1031, T: 7684. → **Joachim, József; Gertler, Endre; Zathureczky Ede**.

**Hubay, Miklós** (Nicholas) (Nagyvárad, now Oradea, Romania, 3 April 1918 - Budapest, 8 May 2011) – Playwright, essayist, literary translator. He studied at the Faculty of Arts of the University of Budapest and Geneva, Switzerland. Between 1940 and 1942 he was an editorial secretary of the *Nouvelle Revue de Hongrie*, and in 1942 he was on scholarship at Geneva. In 1942 his first dramatic play was performed. Between 1945 and 1948 he was the Head of the Hungarian Information Library in Geneva; he returned to Hungary in 1948. Between 1949 and 1957, he was Professor of Drama History at the Academy of Performing Arts (*Színházművészeti Főiskola*). From 1955 to 1957, he was a dramaturgist of the National Theater (*Nemzeti Színház*), Budapest. Between 1974 and 1988, he was Professor at the University of Florence, Italy. From 1987, he was a lecturer at the Academy of Cinematic Arts (*Filmművészeti Főiskola*). From 1981 to 1986 he was President of the Association of Hungarian Writers. President of the PEN Club from 1994 to 2001. From 1985 on, he has been President of the Sándor (Alexander) Petőfi Society in Kiskőrös. In 1992 he was a founding member of the Széchenyi Literary and Cultural Academy (*Széchenyi Irodalmi és Művészeti Akadémia*). His major works include *Francois Rabelais* (1953); *Spring Mass (Tavaszi mise)* short stories (1960); *With Heroes and Without Them (Hősökkel és hősök nélkül)* dramatic works (1965); *I Carry Fire (Tűzet viszek)* dramatic works (1971); *Farewell to Miracles (Búcsú a csodáktól)* dramatic works

(1978); *The Fate of the Drama (A dráma sorsa)* essays (1983), and *Where did the Heart of the Rose Go? (Hová lett a Rózsa Lelke?)*, diary (1998). The first Hungarian Musical, *Three Nights of a Love (Egy szerelem három éjszakája)* is connected to his name (with István Vas and György Ránki). He was a recipient of the Attila József Prize (1955, 1965, 1975), the Literary Prize of the Art Foundation (1979), the Tibor Déry Prize (1988), the Kossuth Prize (1994), the Civis-Prize (1996), The Book of the Year Prize (1996), the Ernő Szép Prize (1997), the Prize of City of Rome (1997), the Middle Cross with Star of the Order of Merit of the Republic of Hungary (2003), the János Arany Prize (2004), and the Prima Prize (2005). – B: 0874, 0878, 1257, T: 7684. → **Ránki, György**.

**Hubik, István** (Stephen) (Garamkövesd, now Kamenica nad Hromon, Slovakia, 9 November 1916 - Pozsony, now Bratislava, Slovakia, 7 July 1994) – Writer, translator of literary works. His education was at the Benedictine High School of Révkomárom (now Komárno, Slovakia), completed in 1938. He obtained a Law Degree from University of Pécs (1944), he was an administrative trainee in County Esztergom (1944-1945), and from 1945-1947 he was a casual laborer. In the fall of 1949 he worked as district negotiator of the Authorizing Office, providing legal defense for minority Hungarians designated for forced resettlement elsewhere in Czechoslovakia. In this capacity he worked in Érsekújvár (now Nové Zámky), Rév-Komárom (now Komarno), Ipolyság (now Šahy) and Léva (now Levice). In 1950 he was a clerk at the Lawyers' Co-operative in Párkány (now Šturovo, Slovakia). Between 1951 and 1954 he was legal representative of the Industrial Combine of Párkány. From 1954 to 1966 he was an editor for the Slovakian Literary Book Publisher. From 1967 to 1969 he was an editor for the Tatran Book Publisher; then from 1969 he worked as an editor for the Madách Kiadó/Publisher for a number of years. In 1972, because of not being a member of the Communist Party and the emigration of his daughter, he was downgraded and, in December 1979, was pensioned off. He translated short stories and novels from the Czech and Slovak languages His literary works and translation into Hungarian began in 1954 with *Village Novel (Falusi regény)* by Martin Kukučín, followed by a large number of other translations, such as *The Loaf (A cipó)*, a short story by Mária Jančová (1958), *The Great Puszta (Nagypuszta)*, novel by Ivan Kríž (1963), *The Last Supper (Az utolsó vacsora)*, novel by Hana Belhradská (1968), *Society of Jesus (Jézustársaság)* novel by Jiří Šotola (1971), *The Valley of the Bees (A méhek völgye)*, novel by Vladimír Körner (1980), *Intellect (Értelem)*, novel by Rudolf Sloboda (1984), *Punishment (Bűnhödés)*, novel by Rudolf Sloboda (1988), *The Swan-neck Violin (A hattyúnyakú hegedű)*, short story by Július Balco (1991). He was a recipient of the Madách Prize (1973, 1978, 1988, 1990), and the High-Standard Prize of the Slovakian Literary Foundation (1966, 1970, 1987). – B: 1083, 0878, T: 7456.

**Hugonnay, Countess Vilma** (Nagy­tétény, 30 September, 1847 - Budapest, 25 March, 1922) – The first female physician in Hungary. She studied at the Girls' School in Pest. At 18, she got married and gave birth to three children. In 1872, with the permission of the family, she registered at the Medical School of the University of Zürich, where ladies were also admitted. She earned a Medical Degree in 1879, and worked in the Surgery Department of the Zürich Hospital. She returned to Hungary in 1890; however, her Degree was not recognized and, for a while, she worked as a midwife, and was involved in teaching at the National Women's Training Society and at the *Free Lycée (Szabad Liceum)*, Budapest. Her Degree was finally honored in 1897. She fought for the education

of women. One of her books, a rewriting of Anna Fischer-Dückelmann's book, entitled, *Woman as Family Doctor (A nő mint háziorvos)* (1907) was used for a long time as a handbook. This dealt with issues of maternity, child sicknesses and child-care. She was the author of *Smell is the Guardian of Health (A szaglás az egészség őre)* (1894), and *Medical Lectures for Women (Egészségtani előadások nőknek)* (1904). She was one of the early pioneers of the Women's Movement, beside her busy medical practice. – B: 0883, 1030, T: 7103.

**Human Sacrifices** – Among many nations it was customary at the funeral of outstanding leaders to sacrifice slaves. Over the grave of Attila the Hun, many slaves and servants were sacrificed. For the souls of the killed tribal leaders Bulcsu and Lehel, prisoners of war were sacrificed. Álmos, an earlier tribal leader of advanced age, was also sacrificed, for he was not allowed to enter the new country in order that the nation could successfully occupy the new land in the Carpathian Basin. Among civilized people the last remnant of human sacrifice is shown when a symbolic act is performed at the erection of a new building. – B: 1078, 1133, 1020, T: 7682.

**Hun Attire** – In the fourth century AD, Roman historian Ammianus Marcellinus wrote in his *History of Rome from Constantine to Valens*, that the clothes of the Huns were made of genuine animal leather, usually goathide. The leather fur caps were tall and pointy. Their upper body clothing had a waistline; it was close fitting and short, with a knee-length, ornamented jacket, which was open in the front and furnished with fur-lined lapels or collars. It was fastened with a clasp at the top, with a belt at the waist, decorated with gold and bronze brooches, clasps and buttons. A straight, long, wide sword and a bow were fastened to the belt on their left side with two straps, while a quiver was on their right. They wore boots without heels. The dominant weapon of the Huns was the bow and arrow, while riding on horseback. These types of composite reflex bows were widely used by the various people who were riding their horses from Mongolia to the Carpathians in the inlands of Eurasia: they were the *Schytiens*, the *Huns*, the *Avars*, the *Sarmatians*, and later the *Hungarians*. In close combat, they used short swords or daggers. In addition, they also used ropes to bind their captives. It is likely that the lariat had a handle, just as the Hungarian circular whip. Stirrups, for supporting the rider's foot, were part of the mounted cavalry's equipment. These early stirrups were made of rope or strong straps and were fitted with metal rods underneath. Some historians point to the Avars in introducing the stirrup to Western Europe through Charlamagne. The carvings on a silver cup, originating from the 4/5th century and found in Southern Russia, show the Huns with short hair, clean-shaven and narrow mustaches, their slightly loose-fitting trousers tucked into their long-legged boots. In contrast to the Parthians, they most probably made their boots from red leather. They were still being crafted in Kherson by the Sea of Azov in the middle of the 10th century. – B: 1322, 1020, T: 7676.→**Huns; Composite Bow.**

**Hun Battle** – The Battle of Catalaunum between Attila the Hun and the armies of the Roman Empire. One of the greatest battles in human history also referred to as the “battle of peoples, nations”. It took place in 451 AD, on the fields of Catalaunum, on the site of present-day Châlons sur Marne in the French *département* of Marne, about 150 km east of Paris. It was fought between (1) the Roman army under Flavius Aëtius, supplemented with the troops of various Germanic tribes, mainly the Visigoth (Western Goth) forces

led by King Theodoric I, and his son Thorismund, together with Frankish and Burgundian forces, which were called upon by the Roman Emperor Valentinianus III, asking them “to fly to the republic’s assistance, whose members they are regarded to be”; and (2) the large army of Attila the Hun strengthened with Ostrogoth (East Goth) and Gepid auxiliary forces; the Ostrogoth forces under their King Valamir formed the left flank of Attila’s army. The battle was extensive and bloody, at the cost of enormous loss of life, according to contemporary estimates 160,000 on both sides. It ended undecided. However, it was first the Visigoths under Thorismund, followed by Attila’s forces that rose from the field of the battle and set off eastward, crossing the Meuse and Rhine Rivers, moving through Thuringia to their respective homes, Attila returning via Italy to the Great Hungarian Plain. On the battlefield, Aëtius was celebrated as the victor, who successfully stopped the Hun invasion, which penetrated so deeply into Western Europe.

The *causus belli* was Valentinian’s ambitious sister Honoria, who secretly offered her hand to Attila in marriage, but Attila requested half the Western Roman Empire as a dowry, so the marriage was never realized and the dowry was refused by Valentinian, thus seriously straining Attila’s relations with the Empire. Thereupon Attila left his headquarters in Hungary, possibly with an army of half a million Hun and allied forces, sweeping through Gaul, until he reached the plains of Catalaunum. - B: 1078, 1031, T: 7103, 7456. → **Honoria Justa Grata; Hun Empires; Attila.**

**Hun Capital, Ancient, in China** – Shaanxi Province is preparing to apply for world cultural and natural heritage listing for its *Tongwancheng Town*, the world’s only ruins of an ancient Hun settlement. The ruined town will give important clues to the study of the Huns who disappeared nearly 1,000 years ago. The 1,600-year old town in ruins is in County Jingbian of northwest China’s Shaanxi Province. Tongwancheng Town, as the Capital of Daxia, established by the descendants of the Huns in the 5th century AD, was one of the most complete, grand and solid capitals ever built by an ethnic group in Chinese history, and the only Capital City of the Huns that still exists today. Tongwancheng Town is comprised of three parts: the palace section and the inner and the outer sections. The palace section is where the imperial palace was located; the inner section consisted of government offices and the dwellings of officials and royal relatives, while the outer section contained the residential area of the common people. The Huns, as a nation, have disappeared; but many Huns have survived. In the 5th century AD, Attila established his Western Hun Empire in present day Hungary. A number of Chinese scholars consider the Hungarians to be the descendants of the Huns, an opinion echoed by some Hungarian scholars and researchers. – B: 1416, T: 7617. → **Huns.**

**Hun Empires** – The first Hun Empire was founded by *Mao Tun* (207-174 BC). This was the Empire of the *Hsiung-nu* people, considered to be the ancestral Huns, though this is still waiting to be conclusively proved. This Empire, situated north of the Gobi Desert, in what is now Outer Mongolia, extended from the Gulf of Chihli to the Aral Sea. During subsequent years decline set in and, by 48 AD, the Huns submitted to Chinese overlordship. A few centuries later, the Huns, recovering their strength, split into two groups: the southern *White Huns* (Hephtalite) who remained in Central Asia, north of China, put an end to the rule of the first Tsin Dynasty and, early in the 4th century established in northern China the states of Peh Han, Hou Chau, Hia and Peh Liang; while

the northern or *Black Huns* migrated westward from the Mongolian area, attempting to retake East Turkestan in 120-124, and again in 155, without success, then continued their westward migration until they appeared in eastern Europe under the leadership of *Balamber* in the 4th century. At that time, a White Hun army of the Hephthalite tribe invaded eastern Persia (posing a threat to the Sassanian Empire), another branch penetrated into India through the northwestern passes to found the Gupta Empire. The main section of the Black Huns invaded the lower Volga region around 372, and advanced westward, pushing the Germanic Ostrogoths and Visigoths before them, thus precipitating the great wave of the migration of peoples that finally destroyed the Western Roman Empire by 476 AD.

The advancing Huns crossed the Danube and, turning south, invaded the Eastern Roman Empire, forcing Emperor Theodosius to pay tribute to them. Around 420, the area occupied by the Huns extended from the Caspian Sea to Buda on the Danube. By 434, *Attila* appeared as the Hun King; and by the middle of the 5th century, after centralizing the military leadership, he not only amassed vast amounts of gold during his conquests, but developed the Hun Empire, stretching from the Caspian Sea as far west as the Rhine River. Because of Attila's unexpected death in 454, followed by dissensions amongst his sons, the Hun Empire soon fell apart. Its remnants moved to the area between the Black Sea and the Caspian Sea, north of the Caucasus, in the form of the small pockets of the Kutrigur Huns, the Utigur Huns, the Alans and the Sabirian Huns. The White Huns were positioned east of the Aral Sea at that time. – B&T: 7456.→**Huns, White Huns; Hun Battle, Attila.**

**Hun-Hungarian Language** – According to an ancient legend, Hungarians (Magyars) are related to the Hun people, apparently both linguistically and racially. The legend states that two brothers, *Hunor* and *Magor* chased a wondrous stag, which led them to a far-away country, where they abducted and married two Princesses and settled, becoming the founding fathers of the Hun and Magyar peoples. This story has to be taken seriously, since every legend has an element of truth. According to old beliefs, also the ancestry of Prince (Khagan) Árpád, who led the Hungarians into the Carpathian Basin, shows Hun connections: he is considered to be a descendant of the royal branch of the Hun King Attila. Furthermore, the Szeklers (*Székelys*, Transylvanian Hungarians, now living in Romania, in the form of an ethnic minority of 1.5 million) regard themselves Hun descendants, survivors of the collapse of the Hun Empire, after the death of Attila in 453. Linguistic evidence would support these legends, if the words found in Armenian and Greek texts could be proven to be of Hun origin, as in the case of the following Hungarian words taken from a work by Csaba Detre about to be published, and which has been known since 1860, but so far not studied exhaustively. (The alleged “Hun” words are in italics, English equivalents in parenthesis; etymology from Loránd Benkő, ed. 1967-1976. *Historical-Etymological Dictionary of the Hungarian Language*, I-III: f-uk = ancient heritage from the Finno-Ugrian period; ugk = from the Ugrian period; urk = from the Uralic period; be = of uncertain origin; szsz = derivative; jsz-ot-cs = loanword of early Turkic origin of Chuwash character; ot = of early Turkic origin; ir = of Iranian origin; pe = of Persian origin; hau-er = onomatopoeic word; wsz = international loanword; ie = of unknown origin; tue = of Turkic origin): fej: *fé* (head; f-uk); kéz: *kezi* (hand; f-uk); orr: *ore* (nose; f-uk); száj: *szá* (mouth; ugk); vér: *veri* (blood; f-uk); talp:

*talba* (sole; be); öcs: *ecse* (younger brother; f-uk); apa: *atha* (father; szsz); vörös: *veresi* (red; szsz); sárga: *sarakh* (yellow; jsz-ot-cs); zöld: *zezild* (green; be, possibly Alan loanword); víz: *vezi* (water; urk); tó: *tava* (lake; urk); völgy: *völdi* (valley; urk); dél: *dele* (south; jsz-ot-cs); jég: *jéj* (ice; f-uk); szél: *szele* (wind; jsz-ot-cs); út: *utu* (road; urk); kapu: *kapu* (gate; ot); vár: *vara* (fortress, castle; ir); had: *hada* (army; f-uk); vásár: *vásár* (market, fair; pe); ló: *lú* (horse; uk); kutya: *kutu* (dog; hau-er); sas: *sas* (eagle; be, possibly f-uk); bika: *büka* (bull; ot); majom: *majmun* (monkey; wsz, occurs in Persian and Arabic); alma: *alma* (apple; ot); béka: *beka* (frog; probably ot); sás: *sás* (sedge; ie); árpa: *árpa* (barley; ot); kő: *kevi* (stone; f-uk); üldöz: *ildi* (chase; szsz); vendég: *vünd* (guest; ie); szám: *szan* (number; jsz-ot-cs); élet: *elve* (life; urk); ész: *esze* (mind; ot); ez: *ejsz* (this; urk); az: *ojsz* (that; urk); kicsi: *kücsü* (small, little; tue); jelszó: *jel* (watchword; f-uk); nap: *napi* (sun; be, urk?); íj: *viju* (bow; be, urk?); nyíl: *neil* (arrow; urk); balta: *balta* (ax; tue); sisak: *sisak* (helmet; ie); sátor: *saturi* (tent; ot); bor: *bor* (wine; ot). – B&T: 7456.→ **Hungarians, Origin of; Hungarian Language; Hungarians' ethnic name; Finnish - Hungarian Language Relationship; Etruscan-Hungarian Linguistic Relationship; Hungarian Language, Opinion on.**

**Hun-Hungarian Legend Cycle** – A network of legends composed of loosely connected sagas, as well as elements of legends that were recorded by historians in the Middle Ages. They deal with the relationship between the Hun and the Hungarian peoples. Their two legendary ancestors were Hunor and Magor, two brothers, and the legend recounts the story of the *Wondrous Stag* that they chased vigorously and relentlessly. Finally they ended up by the swamps of the Meotis (Sea of Azov), where they snatched brides for themselves. Legends also mention Attila, and his son Csaba of the Szeklers (probably Irnik), and the descent of Árpád from Attila. There are also references to Hun origins in Anonymus, the Chronicler. An earlier source, the *Pozsony Yearbook* (*Pozsonyi Évkönyv*) (Pozsony now Bratislava, Slovakia) also refers to *Hun origins*. Information therein is probably based on the *Ancient Gesta* (*Ősgeszta*), now lost. The chronicles of Simon Kézai and Márk Káldi make more detailed references to the Hun-Hungarian (Magyar) connection. – B: 1134, 1020, T: 7617.→**Huns, Hun Legends; Attila; Wondrous Stag; Anonymus; Kézai, Simon; Káldi, Márk.**

**Hun Legends** – Western European legends and anecdotes about the campaigns of the Huns and their King Attila. Several of them recount the devastation of Gallic and/or Italian towns by Attila's forces or their miraculous escape from it. The legends ascribe every horror of the Eurasian migration period of peoples to the person of Attila, whom they call the "Scourge of God" (*Flagellum Dei*). German legends on the other hand are quite different in tone: in these Attila is portrayed as a mighty, wise, wealthy and magnanimous ruler, who had no equal and dwarfed all other great leader personages of the period. The Hungarian Hun-legends are known only from extracts that form a part of the chronicles of Kézai and Márk, compiled in the 1320's by an unknown chronicler. – B: 1078, 1020, T: 7617.→**Huns; Attila; Kézai, Simon; Káldi, Márk.**

**Hunčík, Péter** (Péter Somos) (Ipolyság, now Šahy, Slovakia, 25 May, 1951 - ) – Physician, psychiatrist, writer. He completed the Hungarian High School of Ipolyság (now Šahy, Slovakia) (1965-1969) and he obtained an M.D. from the Faculty of Medicine, University of Pozsony (now Bratislava, Slovakia) (1976). He specialized and qualified in Psychiatry (1988). From 1981 he was a general practitioner at the Medical

Postgraduate School of Pozsony. From 1976 to 1979, he was a school physician at Érsekújvár (now Nové Zámky, Slovakia) then, between 1970 and 1988 he worked as an internal specialist, and as a district physician in the hospital of Dunaszerdahely (now Dunajská Streda, Slovakia). Since December 1989, he has been founder and editor of the paper, *Day (Nap)*. In 1990 he became counselor to the President of the Republic of Czechoslovakia in matters of human rights and minorities. From November 1989 he was a founding member of the political movement of "Independent Hungarian Initiative", and a member of the Czechoslovak and Hungarian Psychiatric Societies; also a member of the Magyar PEN Club. His research areas are: socio-psychiatry, sexology, suicide study, and bilingualism. From 1973 on he has written poems, essays, critiques, literary and medical studies, and has translated articles from the Czech and Slovak languages, which have appeared in the *New Youth (Új Ifjúság)*, in the *Literary Review (Irodalmi Szemle)*, and other periodicals. The articles include *Approximation (Megközelítés)* (1980); *Thoughts About the Mother Tongue (Gondolatok az anyanyelvről)* (1982), and *Language of Faithfulness (A hűség nyelve)* (1985). A larger work, *Man, Look Out (Ember vigyázz)*, is a literary, theatrical compilation, employing the poems of Miklós Radnóti (1977). – B: 1083, 0878, T: 7456. → **Radnóti, Miklós.**

**Hundred Magyars** (*Száz-magyarok*) – This is what the inhabitants of the farthest Hungarian villages: Dombos, Halmágy, Kobor, Nagymoha and Olthévíz in southern Transylvania (*Erdély*, now in Romania), west of Szeklerland were called. The name "Százdi" (*of a Hundred*) is a reminder of their old name. – B: 1134, 1020, T: 3240.

**Hunfalvy, János** (John) (till 1841 Hunsdorfer) (Nagyszalók now Vel'ký Slavkov, Slovakia, 9 June 1820 - Budapest, 6 December 1888) – Geographer. His higher studies were at Eperjes (now Prešov, Slovakia), where he read Law and Theology, and furthered his studies at the Universities of Berlin and Tübingen. In 1846 he taught at the Law Faculty of Késmárk (now Kežmarok, Slovakia). He participated in the War of Independence against Austria (1848-1849), and consequently was imprisoned. After he regained his freedom, he edited the periodical *Book of the Family (A Család Könyve)*, with Ákos Greguss. From 1861 on, he taught Geography, Statistics and History at the Polytechnic of Buda. In 1870, he was appointed professor at the Geography Department of the New University of Pest. He was the first Professor of Geography in Hungary, and became one of the founders of the Hungarian Geographic Society. He published the writings of László (Ladislav) Magyar on Africa, and that of János (John) Xantus on America. His works include *Universal History, vols. i-iii (Egyetemes Történelem, I-III)* (1865); *Statistical Outlines of Hungary (Magyarország viszonyainak statisztikai vázlata)* (1862); *A Short Statistics of the European States (Európa államainak rövid statisztikája)* (1868); *History of Geography (A földrajz története)* (1878), and *Universal Geography vols. i-iii (Egyetemes Földrajz I-III)* (1884, 1886, 1890). He was a member and later Director of the Hungarian Academy of Sciences (1858). – B: 0883, 1257, T: 7103. → **Magyar, László; Xantus, János.**

**Hunfalvy, Pál** (Paul) (till 1841 Hunsdorfer) (Nagyszalók, now Vel'ký Slavkov, Slovakia, 12 March 1810 - Budapest, 30 November 1891) – Linguist, ethnographer. His higher studies were at Miskolc and Késmárk (now Kežmarok, Slovakia), where he studied Philosophy, Theology and Law. From 1833 he was a private tutor. He became a lawyer in 1838, and was Professor of Law at the College of Késmárk in 1842, later its Principal. He

was a Member of Parliament in 1848-1849, and joined the Peace Party. After the fall of the War of Independence against Austria, he had to hide, but was granted amnesty in 1850. Thereafter, he was the Chief Librarian of the Hungarian National Museum and, from 1867 he was a Member of Parliament, as well as Member of the Upper House. In 1869 he went on a study trip to the Baltic States and Finland. In 1856 he launched the first Hungarian linguist paper, the *Hungarian Linguistics (Magyar Nyelvészet)*, and was one of the founding members and President of the *Hungarian Ethnographical Society (Magyar Néprajzi Társaság)*. He was a member of the Hungarian Academy of Sciences (1841). His interest in linguistics commenced in 1840. He clashed with Ármin Vámbéry, who favored the Turkic relationship of the Hungarian language, while Hunfalvy represented its Finno-Ugric relation. He also dealt with the Vogul and Ostyak languages. Later in life, he became interested in ethnography. His main works include *Finn Readers (Finn olvasmányok)* (1861); *The Vogul Land and People (A vogul föld és nép)* (1864); *The Ostyak Language (Az osztyák nyelv)* (1875); *On the Szeklers (A székelyekről)* (1880), and *Origins of the Wallachians vols.i ,ii (Az oláhok eredete, I,II)* (1894). – B: 0883, 1257, T: 7103.→**Reguly, Antal; Finnish-Hungarian Language Relation; Sajnovics, János; Budenz, Joseph; Vámbéry, Ármin.**

**Hungaria** – (1) The Latin name of Hungary. (2) The name of a part of the ancient Hun Empire in the Carpathian Basin. Orosius, the historian from the 4th century wrote: "Pannonia is a European State, now occupied by the Huns, which they call by the name Hungaria". (3) Jordanes mentioned in the 4th century: "Hungari hinc sunt noti, quia ipsis pellium murinarum venit commercium". Greek authors, such as Menander (594) and Theophylaktos Simakotta (629), applied the Ogor/Ugor name to the Avars. Tenth century chroniclers Regino of Prüm and Liutprand of Cremona used this name as Ugors/Ungroks, since they came from Ugoria. Hence, there are such names as Ungria, Ungaria, Hungaria, Ungern or Hungern. (4) According to chronicler Anonymus this name was derived from the name of Ung Castle. (5) This is also the personified symbol of Hungary, depicted as a female figure with helmet, cuirass and shield. – B: 0942, 1078, T: 7103.→**Anonymus; Hungarus.**

**Hungariae Historica Monumenta** – A series of books on the relics of Hungarian history, published by the Hungarian Academy of Sciences between 1857 and 1920. Several of its volumes are connected to literature. – B: 1151, 1020, T: 3240.

**Hungarian Academy of Sciences**→**Academy of Sciences, Hungarian.**

**Hungarian Anjou Book of Legends**, (Prince András's Book of Legends) – Compiled between 1325 and 1333, this Codex is known as the *Magyar Anjou Legendarium*. King Károly I (Charles Robert) of Hungary (1307-1341) ordered its production for his son, Prince András (Andrew), hoping that his son would one day succeed to the throne of Naples. The collection originally consisted of approximately 208 painted folios. Today, only 136 of them are known. This picture book of the Middle Ages presents the life of 59 saints, among them three Hungarian royal saints: King István I (St Stephen) (No. XLII, now lost), Prince St. Imre (No. XLIII), King László I (St Ladislav) (No. XLIV), as well as Bishop St. Gellert (No. XXXIII), complete with *lammás* (mottos appended to the texts). The miniatures reflect the style, characteristic of the Italian Bologna School of painting. The mottos point to the scribes' knowledge of both Italian and Hungarian. Most of the surviving folios of the *Legendarium* (106 in all) are in the Vatican; the rest can be found

in the libraries of New York's Morgan Library and at the Hermitage of St. Petersburg, Russia. – B: 1142, 1020, T: 7666.

**Hungarian Art, Early** – The ornamental objects of metal, horn and leather, found in the graves of the Magyar ancestors, showing a remarkable degree of artistic interest and talent. One can detect a strong Caucasian (Alan)-Iranian-Mesopotamian influence upon the basic Turkic-Ugrian motives. The graves of the Avar-Magyars of the 7th-9th centuries in present-day Hungary of the Carpathian Basin also show a high degree of decorative artistry, akin to the famous Scythian metal ornaments with Mesopotamian-Iranian inspired figure symbolism. The earliest Hungarian settlements within the Carpathian Basin were often built on the sites of Roman towns. They used stones, carved capitals of columns and other material taken from the remnants of Roman buildings. The influence of the Western Christian art style, called *Romanesque*, dominated the architecture of the first churches and castles built in the 10th century, such as the Archabbey of Pannonhalma and the royal castles of Esztergom and Székesfehérvár. The *Byzantine* influence was also considerable in ornamentation, sometimes also in style, as was the case of the first cathedral in Transylvania, the one at Gyulafehérvár (now Aiud, Romania). The best surviving examples of the later Romanesque style are the churches of Ják, Zsámbék and Lébény (of the 13th century). Some fragments of Romanesque and early Gothic fresco paintings are found in the ruins of the Esztergom castle, and in the undercrofts of some village churches. Early French-Burgundian *Gothic* reached Hungary during the reign of King Béla III (1172-1192), who married a French princess. Gothic Sculpture survived in some places after the Mongol-Tartar devastation (1241), mainly as a decorative element and relief carving. The first sculptors in the modern sense were the Kolozsvári Brothers, who made the first freestanding bronze statues around 1370. Only one of the monumental statues has survived, the equestrian statue of Saint George (in Prague). They were probably the creators of the silver “herma” of St. László, in Győr. The large number of pre-Renaissance stone sculptures, found recently during excavations in Buda Castle show a remarkably high degree of artistic taste and workmanship. They prove that Hungarian artists of the time of King Lajos I (Louis the Great, 1342-1382) possessed consummate technical mastery and originality of expression in creating true portrait-sculpture; and this in an era (long before Donatello), when sculpture was still little more than an ornamental extension of architecture. The characteristic Gothic art of *miniature painting* left fine examples in the “Illuminated Chronicle” of Miklós (Nicholas) Medgyesi (1370). Some beautiful examples of the *High Gothic* period have survived in the areas not devastated by the Turks, such as the cathedrals of Kassa (now Košice, Slovakia) (1395), Kolozsvár and Brassó (now Cluj-Napoca and Braşov, Romania respectively). The original royal castles of Visegrád and Diósgyőr, and later Buda, were built in late Gothic – early Renaissance style during the reign of the Anjou kings in the 14th century. *Late Gothic* painting flourished under Zsigmond (Sigismund of Luxembourg) in the early 15th century. Well-known Hungarian painters of this period were Tamás Kolozsvári, Jakab (Jacob) Kassai, Pál (Paul) Lócsei, and the greatest master-painter and wood carver, who only signed his work with “M.S.” Beautiful examples of decorative Gothic sculpture can be seen in the Bártfa and Kassa (now Bardejov and Košice, Slovakia respectively) churches, together with some remarkable woodcarving by some of the above mentioned artists. While most gothic structures show French influence, some churches in the west of the country were influenced by the Austrian-

German Gothic style. Woodcarvings and panel paintings have survived in many village churches, often the work of anonymous folk-artists. Hungarian goldsmiths developed the “filigree enamel” technique, creating a unique style of their own, which they used on chalices, *hermae* and book covers (Suky-chalice, 15th century). King Mátyás I (Matthias Corvinus) (1458-1490) was a lavish and knowledgeable patron of the arts. Hungary experienced the full impact of the *Renaissance* under his reign, especially after his marriage to the Italian princess Beatrice of Aragon. Many Renaissance artists worked in Matthias’ court and directed the rebuilding of Buda castle in “flamboyant” French Gothic style with Renaissance ornamentation, and also worked on the Cathedral of Our Lady (the “Coronation” or “Mátyás” church) in Buda. An increasing number of talented Hungarian artists worked under these Italian masters and gradually took over. At the same time, Hungarian artists went to Italy to develop their talent, for instance the well-known “Mihály of Pannónia”. At the height of the Renaissance in Mátyás’ later years and during the period before the battle of Mohács (1526), both the aristocracy and the common people used Renaissance inspiration in building, painting and wood paneling. Examples are found in the carvings of some Transylvanian churches and in woodcarving of the so-called “Báthori Madonna”. In industrial arts and crafts, the synthesis of Italian and Hungarian inspiration became more and more evident. The inspiration of Renaissance art spread well beyond the “flamboyant” gates of Buda Castle. It soon captured the imagination of the peasant, for whom it seemed to revive the reflection of a long-forgotten eastern exuberance of colors and shapes. In its many facets, folk art still preserves this Renaissance inspiration to the present day. During the Turkish wars, artistic activity existed only in the non-occupied areas. In the western frontier area, Italian influence prevailed (Siklós), while in the north, German-inspired Gothic coexisted with Italian Renaissance, until the arrival of the Catholic-Austrian inspired Baroque. In Transylvania, under the independent Princes, a late Hungarian Renaissance style developed, the *Transylvanian Renaissance*, a colorful synthesis of western and Hungarian urban and folk artistry. In the large cities of Transylvania (now under Romanian rule), and in the country castles and even in village architecture, the copious use of flower motives gave this style later the name, the “Flowery Transylvanian” style. The Renaissance ornamentation was enriched even more by Turkish motives, blending with Magyar folk motives into a distinctive Magyar-Transylvanian folk art. Renaissance art, born in princely castles, reached the poor villages and has lived ever since in the Magyar peasants’ hearts. Most of the great creations of these periods were destroyed by the Mongol-Tartars and the Turks. By a cruel turn of fate, the areas left untouched by these destroyers were allotted to the succession states in 1920, under the Versailles-Trianon Dictated Peace Treaty. Thus, Hungary today possesses but a few pathetic relics of the splendor of Hungarian art during the first seven centuries of the country’s existence. – B&T: 1431.→**Kolozsvári Márton and György; Kassai, Jakab; Béla III, King; Lajos I (Louis the Great), King; Zsigmond, King; Mátyás I King.**

**Hungarian Bow** (Magyar bow) – Early Hungarians (Magyars) improved on the Hun bow, a symmetric composite or reflex – re-curved bow. It was invented in Central Asia. This type of bow increased its range as well as its accuracy. Its small size and considerable power made it suitable for hunting and shooting from horseback. The arrow shot from it could reach half a mile’s distance and was lethal at about 300-400 yards, capable of piercing light body armor. The invention of the stirrup enabled them to turn

facing backwards on their horses and fire at their pursuers in either a real or feigned retreat. Early Magyar bows were made of wood, horn, sinew and fish-glue. However, this weapon could only be used in dry weather; it was kept under a leather cover against the rain. To make this type of bow required great skill and several years. Magyars were true masters of their bows. Their archery training started in childhood. – B: 1160, 1031,1020, T: 7103.→**Composite Bow.**

**Hungarian-Czechoslovak Population Exchange** – In the years after World War II, the government of the Czechoslovakian Republic decided to create an ethnically Slavic national state. However, they had 3.5 million Germans and 720,000 Hungarians on their land, so the only way this dream of a Slavic national state could be realized was to expel all the Germans and Hungarians, who were ancient settlers, to some peripheral areas of the re-created Czechoslovak state. In the *Program of Košice (Kassai Program)* the Czechoslovak President, Eduard Beneš, on 5 April 1945, declared all Hungarians and Germans, mainly living in the Sudetenland, *collective war criminals* – despite the fact that Hungary did not wage war against Czechoslovakia. Czechoslovak authorities ordered harsh punitive measures against the ethnic Hungarian inhabitants of the former Upper Hungary (*Felvidék*), the northern part of the Kingdom of Hungary covering the Carpathian Basin. Consequently, all Hungarians were stripped of their citizenship, dismissed from their jobs, their properties were confiscated, and elderly people lost their pension. At the Conference of Potsdam on 25 July 1945, the Allies Agreed upon the expulsion of the Germans. In the case of the Hungarians, they allowed only a population exchange. After prolonged discussions, a preliminary plan for a population exchange was signed in Budapest on 27 February 1946. By 15 November 1946, without a finalized agreement, the forcible deportation was started, of about 50,000 people, all from small peasant families. They were transported during winter in unheated railway wagons, from the Northern Hungary area of the Carpathian Basin to distant Sudetenland in the Czech Republic area, to abandoned German farms, to provide slave labor. In regard to the Hungarian population in southern Slovakia, the victorious powers at the Potsdam Summit Meeting in July 1945, only sanctioned a population exchange program, but did not approve of the complete removal of the Hungarian population from their ancestral area. As a result of a series of meetings, the delegates of Hungary and Czechoslovakia signed an *agreement at Pöstyén (Pieštany)* about a population exchange, on 24 May 1947. They managed to expel altogether about 120,000 ethnic Hungarians from southern Slovakia to Hungary, including 57,109 who were forcibly relocated. In the population exchange program only 37,696 Slovaks moved voluntarily from Hungary to Slovakia. Hungarians left in Slovakia 15,700 houses; the Slovaks left in Hungary 4,400 houses. The ratio of the exchange program was 10:1 in favor of Slovakia. The population exchange program virtually stalled and it was finally suspended on 12 June 1948, because there were not enough Slovakian volunteers in Hungary for this repatriation program. The last Hungarian family left southern Slovakia to be transplanted to Hungary on 5 June 1949. For the remaining Hungarian population in southern Slovakia, a systematic plan of “Slovakization” was introduced, by using oppressive and underhanded methods. The injustices of the *Beneš Decrees* came up again for discussion in 2001, since Slovakia, already a European Union member, did not renounce the oppressive and discriminating policies against the Hungarian ethnic minority. These measures are still being maintained and are effective against them. – B: 1526, T: 7456.→**Beneš Decrees; Deportations.**

**Hungarian Dances, Traditional**→Csárdás; Hajdú Dance; Körmagyar; Palotás; Verbunkos.

**Hungarian Democratic Forum**→Political Parties in Hungary.

**Hungarian Diaspora Council** (*Magyar Diaszpóra Tanács*) – founded on 17 November 2011 by the Hungarian Parliament. According to its Charter, the Government extends its responsibility, empowered by the New Basic Law (Constitution), to the whole Hungarian nation, including its Diaspora all over the world. The Diaspora Council is the common forum of Hungarians scattered around the world and their organizations; it watches over their needs and interests, and is the independent representative of the Diaspora Hungarians. The members of the Council welcomed the creation of the National Registry and they will popularize it and contribute to its work. The Charter emphasizes the responsibility of the Hungarian Nation towards its members in the Diaspora some of whom do not speak Hungarian anymore. The Diaspora Council works in close cooperation with the Hungarian Standing Conference (*Magyar Állandó Értekezlet – MÁÉRT*). – B: 1031, 7103, T: 7103.→**Political System Changes in Hungary and the Hungarians of the West; World Federation of Hungarians.**

**Hungarian Domestic Animals** – There are some characteristically Hungarian domestic animal breeds. (1) The white to light gray, so-called *Hungarian cattle* (*Bos taurus primigenius*) with large a body and long horns, its main occurrence being on the Great Hungarian Plain, spreading from there into southeastern Europe, southern Russia (Ukraine), and from there into western and central Asia. In 1940, in Hungary, not counting Transylvania, there were 2,614,000 cattle, of which the gray cattle numbered 769,000; the larger portion, 1,847,000, was formed of the Simmental breed, a rich milk-producing dairy breed. (2) Among the canine breeds, there is the *puli*, a small shepherd dog, mostly black, long-bodied, with shaggy hair and drooping ears. Another shepherd dog breed is the *komondor*, with large body and shaggy white hair. The large-bodied *kuvasz* is usually white, with drooping ears, employed either as a watchdog or a shepherd dog. The *pumi* is similar to the *puli*, but has shorter, dove gray colored hair. The *mudi*, by contrast, is short-haired with ears standing up, with some pumi characteristics, used also by shepherds. The *puli*, *komondor* and *kuvasz* accompanied the Magyars faithfully, even prior to the Carpathian settlement. The many canine types are the result of the several thousands years of domestication of the canine species, *Canis familiaris*. (3) The *domestic hen* (with its cock), including the Hungarian varieties, represents the domestication of *Gallus domesticus*, originally from the forests of India. There are three types of hen in Hungary: the white, the brown and the speckled, equally suitable for meat and egg production. Other domesticated birds include the duck for meat, and the goose (and gander) for meat, liver and feathers. – B: 7456, T: 7456.→**Gray Cattle of Hungary; Puli; Komondor; Pumi; Mudi.**

**Hungarian Folk Art** – In the broader sense, all branches of folk art (folk poetry, folk music, folk dance, decorative art, folk wear) are included under this heading. In the narrower sense, it means the artistic creation of objects. The peasants made cult objects and objects for personal use, such as furniture, woodcarvings, basketwork, ivory-carving (shepherd carvings), weaving, spinning, embroidery, sewing, etc. Rural communities made and decorated their objects themselves; this became the basis of decorative folk art. Based on the motives and colors used, three regions can be differentiated. Different

artistic movements over the ages influenced decorative folk art: Renaissance motives were assimilated (e.g., the carnation, lily and pomegranate can be seen in textiles and on the porches of houses). Baroque motives feature in decorative woodcarving, on the facades of houses and elsewhere. Secession too was an important influence on folk art in Hungary, especially on the Mohács-Mezőtúri pottery

**Handicrafts.** The peasants made objects for cultic and for personal use, such as furniture, woodcarvings, basketwork, ivory carving (shepherd carvings), weaving, spinning, embroidery, sewing, etc.

**Craftsmen.** These are people who worked outside the peasant communities and prepared objects for sale as well as for their own use. During their wanderings, the Hungarian fur-dressers, skin-dressers, weavers, blue-painters, wax-chandlers, gingerbread makers, comb-makers, stove-makers and potters expanded the traditions of their communities with several styles and decorative elements.

(1) **Transdanubia** (*Dunántúl*) lies west of the Danube. Lake Balaton and the beauty of the hills contributed to the formation of a rich folk art. Colorful folk-wear, varied woollen and cotton folkweaves and distinctive architectural forms are its hallmarks. The most varied medium for ornamentation is pottery, and the most interesting center for pottery is Csákvár. The glazed pots are medium green with carved ornaments.

*Busójárás.* This is a folk tradition in Mohács. The Sokac ethnic minority relates it to the expelling of the Turks. Others say that it is related to the carnival traditions. The masks used are made of wood and it is noteworthy that no two masks are ever identical.

*Folkweaves.* The nicest folkweaves are made in the following places: Sárköz, Alsószentmárton, Felsőszentmárton and Csányoszló. The patterns are manifold and colorful.

*Embroidery.* The nicest embroideries are made in Buzsák and Sárköz. The most important elements are roses and the basic colors are blue and red

(2) **Northern Hungary.** The “Palóc” settlements were established north and south of the River Ipoly and in the northern hilly regions (Órhalom, Rimóc, Hollókő). They have a characteristic style of embroidery; their patterns are: aster, heart and pigeon. Their colors are blue-red, light and dark blue alternating.

- *Matyó.* Mezőkövesd is the center of Matyó style. The embroideries here are simple linen embroidered with red and blue decoration. Their furrier embroidery (*kuzsu*- a short, fur-lined coat) is famous.

*Folkweaves.* The decorating technique is simple. Motives are the following: birds, pigeons, chicks, stars, babies and flowers. The colors are: white background with red, old gold, blue, red-blue and green.

*Metalwork.* Hungarian craftsmen here were known for their rustic candlesticks, wall flower-holders and lamp-holders made of iron.

(3) **Alföld (Great Plain).** The role of towns was very important in the development of folk art because the towns functioned as centers for fairs (e.g., Debrecen, Kecskemét, Szeged, Hódmezővásárhely).

- *Pottery*. Pottery is called dish handcraft in this region. The preferred basic colors of plates and dishes are white and blue with ornaments. Pottery is very important in craftwork; in Mezőtúr, pottery is called “dish handcraft”.
- *Shepherd Art*. This reached a high level in the Alföld, with decorative objects made of horn and plaited leather wears.
- *Cifraszűr* – the richly decorated mantle was the formal clothing of peasants. The decorations are the following: roses, tulips, carnations and lilies. An essential object for peasants was the water flask. It was made of wood and covered with pony-skin.
- *Embroidery*. Hair-embroidery is a typical kind of embroidery in this region (it is done on thick linen and rough, hairy, woollen thread is used.) The patterns of Kalocsa embroidery are drawn on white or light-blue textiles. Its elements are: marguerite, cornflower, field-poppy, lily, tulip and rose.
- *Wall Painting*. This is unique in Europe. The women from Kalocsa paint white walls freehand, without pre-drawing, using the same patterns as in their embroidery,

**(4) Transylvania.** (*Erdély* now in Romania; Szeklers). The thousand years old Szekler art was always part of Hungarian art. The Szeklers retained their national characteristics much longer than other ethnic minorities.

Their oldest churches were built in Marosszék about the year 1200, and in Aranyosszék in the 13th century. These early churches generally had two expanses with a semi-circular sanctuary attached to the nave. In Transylvania, churches rarely had the popular straight-wall type of sanctuary closing, such as found in Ikafalva (Icefalâu) and Nyárádszentmárton (Mitreșty). Churches, having a quatrefoil center plan, as in Gyergyószentmiklós (Gheorheni) and Székelyudvarhely (Odorheiu Secuiesc), were rare. The simple carved decorations of the smaller churches were either on the semi-circular arched entrances, as in Csíksomlyó (Sumuleu Ciuc) and Gyergyófalva (Joseni), or the distinct feature of the inwardly narrowed stone window frames as in Marosszentkirály (Sâncraiu de Mureș). From the 13th century the church interiors were richly painted. The figurative painter's favorite subject was the Legend of King St. László (St. Ladislaus, 1077-1095) depicting the Szekler military organization. These wall paintings were found in small Transylvanian churches.

The important market towns came to existence in the 14th-15th centuries, such as Marosvásárhely with its large single-nave Franciscan cathedral. The tower designs of the village churches probably originated in this cathedral tower, with its great Gothic windows and in the already rebuilt, but originally Gothic Franciscan church of Csíksomlyó. The fortress church of Sepsiszentgyörgy (Sfântu Gheorghe), the towered churches of Gyergyószentmiklós and Székelyudvarhely (demolished in the 18th century) testify to the once central characteristics of these towns.

The second wave of religious village architecture flourished in the 15th century, when the churches were expanded, often with towers on their western corner. The threat of Turkish danger prompted the construction of fortress churches, as in Csík and Háromszék. Their carved decorations reflect a refined and varied Gothic style. These churches are found all over Szeklerland, especially in Csíkdélne (Delnița), Csíkrákos (Racu), Kövend (Plăiești), Nyárádszentlászló (Sânvășii) and Zabola (Zăbala).

From the 15th century, the internal church decor became much richer. Besides the late Gothic wall paintings at Derzs (Dârjiu), Marosvásárhely (Târgu Mureș), Székelydália

(Daia), the winged altars decorated with paintings, and statues, made of painted wood, appeared, for example: in Csíksomlyó, Csíkszentimre (Sântimbru), Csíkszentlélek (Lelicieni) and the individual Gothic wooden statues such as the Madonna of Csíkménaság (Armășeni), the patron picture of Csíksomlyó and the Madonna of Szenttamás. In spite of their Saxon origin, the winged altars quickly became part of the local culture.

The stone baptisteries, with their varied dynamic folk decorations, also became popular in the Gothic era. The finest examples are found at Miklósvár (Micloșoara), Nagykászon (Plăieșii de Jos) and Nyárádszentháromság (Troita).

The influence of the Renaissance and its blend with Gothic elements was evident throughout the beginning of the 16th century. The most favoured and most beautiful genre was the painted wooden and the coffered ceilings. In the 17th and 18th centuries, these ceilings, richly decorated with flowers and geometric designs, were often the works of well-known village artists. Such is the case of Felsőboldogfalva (Felicieni) and Gyalakuta (Fântânele).

The onset of the secular art began in the 15-16th centuries. Due to the small number of aristocratic landlords among the Szeklers, initially only a handful of fortresses were built, such as Bálványosvár (Cetatea Bálványos), erected by the Apor family. The fortress of Udvarhely was built at the end of the 15th century, while the fort of Csíkszereda was constructed at the beginning of the 17th century. Szárhegy (Lăzarea), and Castle Lázár, both decorated with friezes, are the only examples of a greater scale in Transylvania. Smaller country houses were most popular in the 17-18th centuries.

The Dániel Castle in Vargyas (Vârghiș) shows some Baroque forms in its porch of three-centered arches, under a great mansard roof. The Salvator Chapel of Csíksomlyó is the earliest example of a Baroque interior. Carved Apostles decorate the wooden annular vaults of the nave. The renovated churches of old in Csík were often refurbished with Baroque altars, statues and furniture, in folk style. The churches of Csíkkozmás (Cozmeni) and Gyegyóalfalu (Joseni) are best examples of this. The Szekler art of woodcarving and wooden architecture molded and used the different historical styles to its taste. Szeklers mostly preferred the rich Renaissance forms and that preference lasted well into the 20th century. The oldest example of the richly carved Szekler gate, kept at the Museum of Ethnography of Mikháza (Călugăreni), belonged to the Franciscan Monastery, and it dates from 1673. It still has geometrical decorations, while later examples of the great or small Szekler gates are mostly decorated with traditional flower motives. – B: 1144, 1407, 1020, T: 3240, 1407, 7103. → **Folk Art.**

**Hungarian Language** – The history of the Hungarian language, as it has been developing independently from its related languages, may be divided into five phases or periods.

(1) *Proto-Hungarian phase*, with changes to consonants as p > f; interior-word t > z.

(2) *Ancestral Hungarian phase*, lasting till nearly 1000 AD. Many researcher believe that there are foreign (Bolgar and Slav) elements in Hungarian words and expressions. However, the results of the most recent Oriental research show that these elements date back to the time of the Huns, and it is more likely that they are of common origin. Not only the expressions referring to family or relatatiomnships, but also to religion,

agriculture; and words referring to everyday life can be found among the Inner Asian peoples, which indicates the probability that there is a relationship between the Magyar and Scythian-Hun peoples who lived in that territory.

Words indicating family (*apa anya, agg, öccs, nyanya*, etc. = father, mother, old man or woman, younger brother, old lady, etc), and also those indicating the social order (*tűrű-törvény; törzs; had; kóta, káta* etc) are important expressions and, in addition to these, expressions relating to healing and animal husbandry indicate a relationship to Inner Asian peoples particularly. More and more linguists are beginning to accept the view that the Hun language was the basis for the Turkic and Mongol languages, so the Hungarian words that are deemed to be Ancient Turkic origin could have a Hun origin. In many research institutes, the research of the Scythian language is being undertaken. A few example of Hun words: (Ucsiraltu, 2008) Mongol: *horda*, Hun: *ordu* (palace), Russian: *gorod* (city) etc.; Hungarian: *pecsét* (seal), Hun: *picsik*, Monol: *bicsik*, Türk: *bitig*, Slav: *pecsat*.

(3) *Old Hungarian period*, the beginnings of writing, from 973 to 1350, with fragmentary and complete written records, such as the *Funeral Oration and Prayer (Halotti beszéd és könyörgés* of c. 1192-1195); and the *Old Hungarian Maria-Lamentation (Ómagyar Mária-siralom)*, the earliest prose texts; and the first verse of the *Planctus destructionis regni Hungariae per Tartaros (Lament for the Destruction of Hungary by the Tartars*, written in 1242) displaying an amazingly advanced technique. This period involved some important phonological changes and shifts in the language (the earlier preponderance of ü-sounds replaced by ö-sounds, lengthening of the vowels of root-words, disappearance of short open vowel at the end of words – characteristic of earliest extant texts) and the developing simplification of diphthongs.

(4) *Middle-Hungarian period* (1350-1600): marks the beginnings of secular literature, which had a strong unifying effect on the Hungarian language, the writings usually recorded in codices (e.g. the *Jókai Codex* of 1430, the first extant Hungarian book; as the other early texts, it shows more diphthongs and consonant groups, compared with present Hungarian), incomplete vowel harmony and fuller formations with suffixes. Printed texts appeared from 1527, and the Middle-Hungarian written language was becoming closer to the spoken language.

(5) *Modern Hungarian period* is marked by the creation of a literary language, evolving the standard Hungarian (1600-1850 to the present) and forming the present literary language, adopting the northern Transdanubian dialect (between Lake Balaton and the Danube) as the standard, with preponderant use of e-sounds, as well as contributions from other dialects. The beginning of this period was marked by two outstanding figures, Gáspár Károli with his translation of the Bible into Hungarian for Protestants (1590), and Péter Pázmány (Rom. Cath. Cardinal and Jesuit) initiating a vast Catholic literature, including György Káldi's Catholic Bible translation of 1626. The other significant development of the modern period was the language reform of the early 19th century, adding significantly to the Hungarian vocabulary, enriching and widening the scope of expression of the Hungarian language and by developing a pleasing, stylistically refined language. The leading reformer was Ferenc Kazinczy. Archaic words were re-introduced (e.g. *hon* = fatherland, and *aggastyán* = greybeard); adoption of words and phrases from the vernacular (e.g. *bojtár* = shepherd boy; *burgonya* = potato); formation of new words by abstraction, as well as compounding, e.g. *érzelem* = feeling, emotion; *csend* = silence;

*csapadék* = precipitation; *nyomor* = privation; *jármű* = vehicle; *esernyő* = umbrella, etc. It is remarkable, however, that the phonological and morphological changes that occurred in the Hungarian language over the 800 years of its documented history, are relatively few; the earliest texts are quite comprehensible at present. Hungarian has remarkable flexibility and expressiveness and this may be attributed to some inherent characteristics. Vowel harmony is one of these, but so is the absence of grammatical gender, the division of the transitive verbs into two types of conjugation and, since it is an agglutinative language it uses suffixes extensively to indicate morphological variations: a noun can take up to 24 different case-suffixes in addition to signs for plural and possessive relation. There are 36 postpositions as well, with a similar function. In the richness and freedom of word-formation, Hungarian excels, while expressiveness, logic and conciseness are also among its strong points. Word order is extremely flexible and the stress in words falls invariably on the first syllable.

The Hungarian material and spiritual culture shows a strong similarity to that of the Inner Asian equestrian peoples and parallels can be found as far east as the Yellow River. The discovery of these parallels was begun by the early Hungarian researchers, Sándor (Alexander) Kőrösi Csoma, Gábor (Gabriel) Bálint from Szentkatolna and Aurél (Aurelius) Stein. Hungarian linguists today research the traces of the Magyars in the region of Ural Mountains, and they research primarily the linguistic elements, which their state are unknown origin, although similarities can be clearly seen among the Turkish and Mongol peoples. In the first half of the 19th century, linguists were still talking of languages of many groups of Eurasian Scythians. The Magyars probably arrived, together with the Huns in the foothills of the Caucasus, where they were known under several names and considered by many to belong among the Huns. – B: 1102, 7456, 1904, T: 7456. → **Hungarians, Origin of; Finnish-Hungarian Language Relationship; Hungarian Language; Dialects, Hungarian; Etruscan-Hungarian Linguistic Relationship; Hungarian Language, Opinion on; Bible in Hungarian. Károli, Gáspár; Pázmány Péter; Káldi, György; Kazinczy, Ferenc.**

**Hungarian Language, opinions on:**

- *Marcio Galotti*, a humanist in the court of King Mátyás (Matthias Corvinus, 1458-1490) stated with amazement: “The Hungarians may be aristocrats or peasants but they all use the same language”.
- *Polanus Amandus* (1561-1610), the famous German Reformed theologian and writer, who lived in Basel, when Albert Szenci Molnár’s “Hungarian Grammar” was published, wrote: “There were some who doubted that the unbridled Hungarian language had any rules; but you, in your outstanding work, have really disproved them”.
- *Giuseppe Mezzofanti* (1774-1849) was an Italian Cardinal, a famed linguist and hyper polyglot, who understood 58 languages and spoke, among many others, four dialects of Hungarian, and who greeted the Hungarian bailiff, in Bologna with a very spirited Hungarian speech. It was he who wrote to the Czech linguist, Ágoston Frankl in 1836: “Do you know which language is equal to Latin and Greek in its structure and rhythmic harmony? It is the Hungarian language. I am familiar with the new Hungarian poets, whose verses are completely mesmerizing. Let us watch the future, for the poetic genius will have a sudden upswing, which will prove my statement to be true. It seems as if the Hungarians themselves do not realize what a treasure is hidden in their language”.

Cardinal Mezzofanti was made an honorary member of the Hungarian Academy of Science in 1832.

- **Jakob Grimm** (1785-1836) German fairy-tale writer, the first to write a German Grammar and who helped to establish the science of folklore, stated that: “The Hungarian language is logical and its perfect structure supersedes all other languages”.

- **Sir John Bowring** (1792-1872) was a renowned English philologist, who spoke many languages, among them Hungarian. In his *Life and Work*, vol. i (1838), he wrote about the Hungarian Language: “The Hungarian language is a one-piece boulder, the storms of time did not make even a scratch on it...the originality of Hungarian language is marvelous”. He translated many Hungarian poems into English. His *Poetry of the Magyars* was preceded by a review sketch of *The Language and Literature of Hungary and Transylvania (Erdély, now in Romania)*. He wrote these lines on the Hungarian language: “The Magyar language stands afar off and alone. The study of other tongues will be found of exceedingly little use towards its right understanding. It is moulded in a form essentially its own, and its construction and composition may be safely referred to an epoch when most of the living tongues of Europe either had no existence, or no influence on the Hungarian region. The roots of the Magyar are for the most part exceedingly simple and monosyllabic, but their ramifications are numerous, consistent, and beautiful. I know of no language which presents such a variety of elementary stamina, and none which lends itself so easily and gracefully to all the modifications growing out of its simple principles”.

- **Wilhelm Schott** (1794 -1865), an outstanding Austrian scientist stated: “In the Hungarian language, there is a fresh, childish, natural view and it cannot but be suspected that there is the possibility of development hidden in it like a bud. It contains many beautiful soft consonants and its vowels are more clearly pronounced than in German. It can be used for short statements and also for powerful oratory, in short, every type of prose. It is built on matching vowel sounds, pleasing rhymes, and its richness and resounding tones are well suited for poetry. This is demonstrated in every branch of poetry”.

- **N. Erbesberg** (19th century) a world renowned professor from Vienna, stated: “The structure of the Hungarian language is such that it appears that linguists could have created it with the purpose of incorporating in it every rule, conciseness, melody and clarity; and besides all this it avoided any commonness, difficulty in pronunciation and irregularities”.

- **N. Simpson** (1848): “Letters from the Banks of the Danube”. In this series of articles, he wrote about the Hungarian language in the exciting days of March (during the 1848-49 Hungarian Revolution and War of Independence against the Habsburgs). “The Hungarian language is very poetic, rich and spirited, . . . it is full of enthusiasm and strength and is suited to all kinds of poetical work. It is strong and yet gentle and very pleasing in sound. It is melodic and its expression is clear”.

- **Grover Krantz** (1931 - 2002) was Professor of Physical Anthropology at Washington State University. His research included all aspects of human evolution. His opinion was that “the primordial Hungarian language in Hungary...preceded the beginning of the New Stone Age...among the extant languages it is the most ancient”. (Translated from Hungarian, original unavailable.)

- **George Bernard Shaw** (1856-1950). The world-renowned dramatist and Nobel Prize Laureate was not completely satisfied with the English language and he even wanted to create a new phonemic alphabet for it. In order to find a more suitable language of expression, he studied several languages, among them Hungarian, which he found the most suitable for poetic expression. In a radio interview to the Canadian CBC he expressed his high regard for it: "I frankly state that, after studying the Hungarian language for years, my conviction is that if Hungarian had been my mother tongue, my life-work could have been much more valuable. Simply because by this curious language, bulging with primeval power, can be described, with more precision, the tiny differences, the secret vibration of emotions. In the Hungarian language, instead of using prepositions, the word's ending can be altered in huge variations. This exercise is able to reflect accurately the tiniest vibration of emotions". (Translated from Hungarian, original unavailable.)

- **Edward (Ede) Teller** (1908-2003), a Hungarian born nuclear physicist, not long before his death said: "My new eminent discovery is that there is only one language and it is the Hungarian one". – B: 0881, 1257, 0396, 1513, 2059, T: 7669, 7103.→**Hungarians, Origin of; Finnish - Hungarian Language Relationship; Dialects, Hungarian; Etruscan-Hungarian Linguistic Relation; Hungarian Language; Bowring, Sir John; Teller, Ede.**

**Hungarian Legion in Italy** – A Hungarian body of troops, organized in Italy during the 1859 Austro-Italian-French War. On its establishment, Lajos Kossuth made an agreement with Napoleon III and Cavour respectively, in May 1859; it was officially established on 5 June 1859 in Genoa. Its members were the officers and *Honvéd* privates who, after the collapse of the War of Independence (1848-849), emigrated and were joined by the Hungarian military, serving in the Austrian army and who decided to escape. The Legion, under the command of the Hungarian National Directorate, composed of Lajos (Louis) Kossuth, György (George) Klapka and Count Sándor (Alexander) Teleki, was made up of 2 brigades, 5 infantry battalions and 1 cavalry detachment. The brigade commanders were the Colonels Daniel Ihász, Count Sándor Teleki and Miklós (Nicholas) Kiss. The Legion participated in the war, fighting heroically to liberate and unite Italy. After the Armistice of Villafranca in October 1859, the Legion was disbanded. Large numbers of its former members then joined the Southern-Italian campaign, led by Giuseppe Garibaldi, in 1860. General István (*Stephan*) Türr became the Chief of General Staff of the Thousand of Marsala. The victorious campaign, during which Major Lajos (Louis) Tüköry fell, finally succeeded in establishing the unification of Italy. The Hungarian Legion was reorganized on the order of Garibaldi, on 16 July 1860, with István Türr as its commander. Thereafter the Legion became a part of the Royal Italian Army, playing an important role in the fights against the mafia bandits of Southern Italy. It was disbanded in Hungary on the occasion of the Compromise of 1867– B: 1230, 1138, 1020, T: 7456.→**Kossuth, Lajos; Klapka, György; Teleki, Count Sándor; Türr, István; Ihász, Dániel; Tüköry, Lajos.**

**Hungarian Missionaries in Swaziland** – Hungarian missionaries, both Catholic and Protestant, worked in many underdeveloped parts of the world: in Asia, Latin America and Africa. In Swaziland, Southern Africa, Zoltán Boglári, a Franciscan monk, worked as a missionary (1961-1965). After the Communist regime in Hungary dissolved the

Monastic Orders in 1949, Boglári escaped to Italy. Since he had always wanted to become a missionary, he was posted to Swaziland in 1961, where he became parish priest of the Cathedral. On the staff of the Cathedral there already were three Hungarian employees, who were veterans of World War I. They worked on the estate of the Cathedral and taught agriculture to the local people. Boglári was a talented painter and sculptor, who fluently spoke the African language of the locals. Under his leadership, the Cathedral's life blossomed. He even visited and served Hungarians in and around Johannesburg and Durban, South Africa. Since he was in favor of the black majority and helped them, he soon found himself in isolation in the Stegi Monastery. Disillusioned, he traveled to Canada in 1965, left the order, got married and returned to South Africa, where, being an architect, he built churches for the black Christians, among them the Kwa-Masu Cathedral. He died in 1989. – B: 1514, 1020, T: 7103. → **Jesuits, Hungarian in Latin America; Brentán, Károly; Éder, Xavér Ferenc; Babos, Sándor; Döbrössy, Lajos; Molnár, Mária; Csákány László; Pásztor János, Pungur, Joseph.**

**Hungarian Mythology** – is known only from the sparse data of medieval chronicles and the store of folklore of legends, myths, folk tales, fairy tales, superstitions, customs, and phrases, as well as from the mythology of ethnically related peoples and archeology. Many parts of it were thought to be lost. Only some texts remained, which can be classified as myths, although Hungarian mythology was successfully recovered in the last 150 years. Its reconstruction, as completely as possible, was first carried out by the distinguished historian Arnold Ipolyi (*Magyar Mythologia / Hungarian Mythology*, 1854).

The world of ancient Hungarians was divided into three spheres: the Upper World (*Felső világ*), the home of the gods and good souls; the Middle World (*Középső világ*), the place of humans and ghostly creatures; and the Underworld (*Alsó Világ, Alvilág*), the realm of “ghosts” and the souls of dead people who were bad; and the home of Evil (*Ördög*), the creator of insects that plague humans: fleas, lice, flies etc. In the center of the world, the World Tree (*Világfa*) stood, encompassing the three levels. It's foliage was the Upper World; the Middle World was located at its trunk, and the Underworld was around its roots. In some stories, its fruit were golden apples.

**Religion:** The old Hungarian religion was a form of shamanism. The shamans were called *Táltos*. They had many duties to perform: commuting between the three spheres and curing, predicting and interpreting dreams; contacting ghosts, removing curses, mediating between human and spirits, finding lost souls, and performing animal sacrifices, including that of the White Horse. After death, the human soul left the body, which was buried on the opposite bank of the river, facing the East. The good souls reached the Other World (*Túlvilág*) to obtain eternal peace; the bad ones descended into the Underworld (*Világ, Alvilág*), where Evil (*Ördög*) and a number of Ghosts (*Szellemekek*) lived.

**Gods:** The most important divine being is *Isten* (God). He controls the world, shapes the fate of humans, observes our world from the sky, and sometimes warns us by lightning (*mennykő*). *Isten* created the world with the help of Evil (*Ördög*). Other gods include Mother God (*Istenanya*), the God of War (*Hadúr*), and so on. There is also a goddess of fertility and of the moon, *Ildikó*. The name *Boldogasszony* means “Blessed Lady”. She helped women in childbirth. After Hungarians were converted to Christianity, her figure became equivalent to the Virgin Mary. The major celestial bodies: the Sun

(*Nap*) and the Moon (*Hold*) are also located in the Upper World. The sky was thought to be a big tent held by the World Tree. There were several holes in it: they are the Stars.

**Creatures:** *Bába* was a beastly old woman, who had negative qualities; she had magical abilities, although she was not a witch; today, *bába* means midwife. *Boszorkány* was a hostile, evil, supernatural old woman, a witch. She had the ability to transform, fly and curse. A *boszorkány* corrupted the animals – for example, she spoiled the milk of the cows. To humans, she brought a sudden illness. The witches “operated” in the night, or at nightfall. *Bubus* (*Mumus*) (ghost) was a small being that lived in caves. *Fene* (ghost) was the demon of illness. Today, a saying still preserves its name: *A fene egye meg!* (Let him be eaten by the *fene!*), and is said when someone is disappointed. There were ghosts of the forests and waters, such as the Mermaid (*Sellő*), which lived in the waters and had a human upper body but a fishtail. Wind Mother (*Szélanya*) was an old woman who controlled the winds; The Dragon (*Sárkány*) was a scary beast: he was the enemy of the heroes in the tales. *Lidérc* was a mysterious creature with several different bodies, its aim was sinister. The Elves (*manók*) and the Dwarfs (*törpék*) were cunning beings, living in the woods or under the ground. Giants (*Óriások*) lived in the mountains, and they had both good and bad qualities. The favorite creatures were the Fairies (*Tündérek*), who were beautiful, young virgins. They helped humans, who sometimes could ask for three wishes from them. *Garabonciás* was a wandering magician, who could create storms. Its alternative names were: *barboncás*, *gyiák* – some of whom possessed these abilities. The *Turul* was the mythical bird in the origins of the Magyars. *Csodaszarvas* was the Miraculous Stag. *Magor*, and his brother *Hunor*, hunted this deer through the forests and the marshes of Lake Maeotis (Sea of Azov) for many days. Finally, the two brothers found the daughters of king *Dula*. *Magor*, and one of *Dula*'s daughters were considered to be the ancestors of the Magyars; *Hunor* and another daughter, the ancestors of the Huns. *Álmos* was the son of *Ügyek* and *Emese*, and was born in ca. 819. He ruled the Hungarians in *Levedia* and *Etelköz* and was the founder of the *Árpád* Dynasty. – 1031, 1068, T: 7103, 7456.→**Shaman; Táltos; Garabonciás.**

#### **Hungarian National Museum→National Museum.**

**Hungarian Pax Romana** (MPR) – A member of the International Catholic Movement for Intellectual and Cultural Affairs – ICMICA. It was founded in 1921, and newly formed in 1947. Hungary was represented by emigré Hungarian Catholic intellectuals until 1996. It is registered as a Non-Governmental Organization – NGO. It offers help to Catholics to make responsible decisions, encouraging them to work for the benefit of others, and participate in community affairs. Important are the yearly organized thematic congresses from 1991 onward. Such issues were dealt with as: *The Gospel – our Common Service Today* (*Az Evangélium – közös szolgálatunk ma*); *The Church of Dialogue* (*A párbeszéd egyháza*), and the *Hungarian Ecumenical Meeting* (*Magyar ökumenikus találkozó*). Their materials also appeared in print. – B: 1007, T: 7103.

**Hungarian Prisoners of World War II in Soviet Camps** – Hungarian prisoners of war were kept in the Soviet Union in large numbers. During World War II, more than 4 million foreign persons were taken to the Soviet Union as “prisoners of war”. After German and Japanese POWs, Hungarians constituted the third largest group. According to recent estimates, 526,000 Hungarians were in Soviet captivity. However, this figure

does not include those who, from Romanian transit camps, were taken to the Soviet Union and died during the long transition period; and probably does not include those Hungarian citizens of German nationality who were removed from Hungary. It does not even include those Hungarians who were taken from the southern part of Upper Hungary (*Felvidék*, now in Slovakia). Including them, the likely figure of Hungarian POWs in the Soviet Union is between 600,000 and 700,000. Only two-thirds can be considered real POWs, some 50,000 were actually civilians taken from the territory of Hungary, under the pretext of “collective punishment”, mostly because of the Soviet’s need for a cheap workforce to rebuild their war-torn country. In order to gather together individuals, Soviet authorities ordered them assembled for “malenkij robot” (small work), or “rubble clearing”, or “road reparation”, or “film show”, or collected those individuals whose family name ended with the letter “r,” as those were assumed to be German. A special group was the “war criminals,” judged so by Soviet courts. The number who perished in the long years of Soviet captivity amounts to one third of the total POWs.

In this way an enormous number of soldiers and even innocent civilians, men and women, were gathered up and at first kept in reception camps established in Hungary; the largest of these collecting camps was at *Kistarcsa*. The “dangerous” people, found guilty of “crimes against the state” were also kept in these camps, from where they were sent to transit camps in Romania (Foksány, Brassó, Temesvár, etc.) and finally, from there, they were transported in sealed railway wagons to the forced labor camps (*Gulags*) in Siberia, in the Soviet Union. In addition, many military personnel, who were evacuated at the end of the War to the West, were returned to Hungary after the War, fell into Soviet captivity at the Hungarian border, and were also transported to Gulag camps, having the same fate as the Soviet dissidents, Polish soldiers after 1939, and many others. After many years, only a fraction of these POWs could return to Hungary. They were warned by the Hungarian Secret Police not to speak about their experiences in the Soviet Union. Most of the prisoners of these labor camps died as a result of the hard labor, undernourishment, disease, harsh treatment and conditions. Hungary’s losses in World War II were the fourth largest in relation to its population size (after Poland, the Soviet Union and Germany).

The first Hungarian POWs (not a large number) appeared in Soviet camps in late 1941. They were captured on the Russian Front. Their number grew rapidly at the time of the great break-through at the Don River (12 January to 3 February 1943). On 3 February 1943, the number of Hungarian POWs was 32,299, while a year later at the end of 1944 the number of Hungarian POWs was 61,000, a figure, which rose to 125,263 by January 1945. Of these, 66,961 were kept on the Home Front, 55,910 in transferring and forwarding-stations, and 2,662 in special hospitals. After the conclusion of the War, the total number of the Hungarian POWs increased dramatically: in July 1945 there were 425,319. In the second half of 1945, a change occurred in the way the POW camps were managed. The POWs were transported from the vicinity of the Front to the hinterland. According to Russian archival sources, from the first consignment of POWs, 24,909 were dispatched to Hungary in June 1945, and on 10 November 1945: 234,445.

In 1948, after the Communists grasped power in Hungary, the release of POWs immediately stopped. The Rákosi regime did not care that there were still many Hungarian civilians in Soviet POW camps, who never would have qualified as POWs, let

alone soldiers. The Communist government closed the issue by announcing that only Hungarian “war criminals,” sentenced by Soviet courts, remained in the Soviet Union. In the overwhelming number of cases, this was not true. In 1953, after the death of Stalin, some 1500 Hungarian POWs were released and sent to Hungary, the rest were only freed in 1955. Hungarian rehabilitation courts confirmed that most of those, who suffered 10 years in prison camps in the Soviet Union, were innocent. By the end of 1948, still 7,506 Hungarian POWs remained in Soviet camps. The death of Stalin created a more favorable situation, owing to the amnesty ruling issued in 1953. As its consequence, 2,219 were freed, though another 12,231 still remained in Soviet camps. An investigation of the available documents shows that the maximum figure mentioned is 541,530, though this includes the figure for the interned ones as well. The Russian archival sources state that 418-420,000 was allowed to return to Hungary. The number of Hungarian POWs, who perished, is stated to be 51-55,000. Summing up the available statistics, it is evident that the total number of Hungarian military and civilian prisoners of war was about 600,000, from who 120,000 to 280,000 returned to Hungary, and 330,000 to 380,000 perished. The fate of the 150,000 Hungarian prisoners, who were native to the former Hungarian areas awarded to Czechoslovakia, Romania and Yugoslavia by the Dictated Peace Treaty of Paris (1947), is still unknown. Following the defeat of the Hungarian Revolution and Freedom Fight of 1956, thousands of young men and women were rounded up and secretly taken to the Soviet Union never to be seen again. The last known Hungarian POW in the Soviet Union, András (Andrew) Toma, was released in 2000. – B: 1031, 1828, 1078, 7456, T: 7456.→**Rákosi, Mátyás; Toma, András; Hungarian Prisoners of World War II in Western Camps.**

**Hungarian Prisoners of World War II in Western Camps** – In December of 1944, due to the rapidly advancing Soviet troops into Western Hungary, four trainloads of Hungarian military personnel was sent into Germany, among them the Jutas Training School for Non-commissioned Officers (*Jutasi Altisztképző Iskola*). It came under US military occupation in *Grafenwöhr-Westlager* at the end of April 1945. The next day the Americans transferred the prisoners to another POW camp. Whatever they were forced to leave behind – personal belongings, official documents, etc. – the US soldiers doused with gasoline and burned. During and after the war, the Allies set up close to 8000 POW camps in the British, French and US Occupational Zones; of that number few conformed to the provisions of the Geneva Convention. Of the one million POWs who were kept in these camps, 50,000 were Hungarians. In the French-occupied Zone of Germany, 7000 Hungarian soldiers were kept in POW camps. However, no state of war existed between Hungary and France; Hungarian soldiers did not fight French troupes. French and other Allied prisoners of war, who fled from German camps to Hungary during the war, were treated as guests of the State and received pay and had rather free movement outside the camps. However, the French Government did not reciprocate the gesture – to the contrary. In fact, by keeping Hungarian soldiers in these camps, France acted in contravention of the Geneva Convention. The French did not allow representatives of the International Red Cross into the camps. In some of them, where the prisoners refused to sign up for the French Foreign Legion, were deprived of their daily food rations – so were free to choose between starvation and the Legion. At the end of 1945, the Americans transferred some of the Hungarian POWs to the notorious *Maille le Camps* detention center, north of Paris, where most of the members of the Jutas School ended up.

Their daily food rations hardly reached 600-800 calories; they lived in damp barracks that lacked windows and doors, and were forced to do heavy labor. They were only set free at the beginning of 1946, when the French packed them into sealed railway cattle-cars, and sent them to Hungary. At the border they were immediately detained and sent to the Recsk detention camp. – B: 2133, 7617, T: 7617.→**Hungarian Prisoners of World War II in Soviet Camps.**

**Hungarian Relations** – In the early stages of their history, the Magyars established close connections with the Eurasian equestrian peoples, the Scythians and the Huns. In this region of the Steppes, it was customary for a tribal union or „nomad state” to be multi-ethnic, comprising of several ethnic groups. Thus, Mongolid and Europid elements, tribes speaking several different languages, all belonged together in an imperial union. The Mongol and Manchu words, found in the Hungarian language, indicate that a part of the ancestors of the Hungarians originated in Inner Asia. The modern researchers (Botalov, 2007) have proved that the Ordos Plain was the starting-point of the civilization of the Steppes, and the people living there migrated as far west as the Carpathian Basin. At the time of the Empire of the European Huns, the Magyars must have been living in the foothills of the Caucasus Mountains; and after the fall of the Hun Empire (453), they took on an individual role. Based on credible historical sources, we can determine which peoples had a close connection to the Magyars:

In the Crimean Peninsula and the foothills of the Caucasus, lived Scythians, Sarmatians, Huns and Hun-Sabirs (from here the Magyars got their Greek-Byzantine name: *Sabartoi-asfaloi*). From the second half of the 5th century, the Magyars were called Onogurs (Hunnugurs) and Ogurs. In the sources, the name Ugor was used exclusively for the Magyars; but in the 19th century, the Indo-European linguists fabricated an artificial „Ugor” people. Many similarities can be found between the Magyars and the Bolgars, for both peoples declare that they are descended from Csaba (Irnek), the third son of Attila. Two of their tribes have the same name: *Nyék* and *Kürt*, and many of their aristocratic titles are the same. There are similar elements in their material and spiritual culture, which stem from their common Hun ancestry.

Already in the 1920's, Géza Fehér noticed this close similarity. The Magyars also met with Slavs in the Eastern European plains, whom they sold as slaves. Therefore, the theory that the Magyars learned much from the Slavs cannot be supported, for the Slavs adopted elements of the culture and language of the Scythians and Sarmatians. The historical chronicles also record alliances between the Magyars and the Kazars. Some historians thought that the Magyars were subservient to the Kazars, although the historical sources do not support this theory. Byzantine Emperor Constantine VII, a.k.a. Constantinos Porphyrogenitos (913-959), wrote in his work: “The Administration of the Empire” (*De administrando imperio*), about the alliance between these two peoples, that the Kazars occupied a part of the Magyar settlements after an attack by the “Pechenegs”. This must refer to an Arab invasion sometime in the 7th and 8th centuries. (Helilov-Nyitrai, 2008) This territory must have been the Eastern Caucasus region, today's Dagastan. Later, Constantine reported that the Magyars and the Kazars fought each other for ten years. Then the Kazar kagan wanted to give his sister to Levedi, the Magyars' first Vajda, for his wife, so that they could establish a strong connection; but Levedi rejected her. From this, it can be seen that it was the Kazars who wanted to become allies of the

Magyars, who did not want this alliance.

The notes about the connection between the Magyars and the Avars are also important. Byzantine sources write that the Avars were really Huns, and that they were named after one of their leaders. Hungarian historians and archeologists believe that they spoke a Turkic language, although there is no proof of this. What is certain is that the majority of the Avars were White Huns (Hephthalites), as Gyula László and Éva Aradi have written. Defeated by the Turks, they fled from the Central Asian Empire toward the West around 550. The Magyars were in the Carpathian Basin before the Avars arrived there, because there were not only the *Székelys* (Szeklers), but also some Magyar tribes (Ungros) living there. According to some foreign historians, some Magyar tribes were already Christians in the Caucasus, belonging to the Eastern Church. Then, from the end of the 10th century, Western Christianity was spread under the influence of the intense missionary efforts of King István I. (St. Stephen). In spite of the fact that the Magyars, after their arrival in the Carpathian Basin at the end of the 9th century, encouraged close connections with the western peoples, (first Germans, then Slavs), they preserved the culture that they had brought with them from Asia.

The Magyars had close connections with the Turks, so much so that the Byzantine sources called them Turks. There are definitely many similarities between the two peoples, for they both claim the Huns to be their ancestors. Still, it cannot be proven that the Magyars learned words or elements of state organization from the Turks, because they already had a well-organized social system dating back to the middle of the 6th century. The Chinese Chronicles write that the ancestors of the Turks, under the leadership of the Asina nation, lived in the area of the present-day Chinese province of Gansu, and they were the leaders of the Northern Liang Dynasty that was of Hun origin. In the middle of the 5th century, the Juan-Juans pushed them to the west and they fled to the Altai Mountains, which the Turkish legends call Ötüken Mountains. After their settlement in the Carpathian Basin, the Magyars continued to assimilate many eastern elements. The Pechenegs and Cumanians settled among the Magyars, and some of the military leaders chose them as escorts. Some of the geographical names have preserved their memory. The Cumanians received special freedoms from Hungarian king Béla IV (1235-1270), and they have kept them until modern times. – B: 1068, 1553, 1923, 1968, 7697, T: 7690.→**Most of the persons, nations have their own entry.**

**Hungarian Runic Script** – Also known as Szekler-Hungarian runic script, as most relics were found in Transylvania (*Erdély*), also known as Szeklerland (*Székelyföld*).

Before the Hungarians converted to Christianity in the beginning of the 11th century and adopted the Latin alphabet, they had their own alphabet, called runic writing or script

Ǻ = A	Ǻ = I	Ǻ = R
Ǻ = Á	Ǻ = J	Ǻ = S
Ǻ = B	Ǻ = K	Ǻ = SZ
Ǻ = C	Ǻ = L	Ǻ = T
Ǻ = CS	Ǻ = LY	Ǻ = TY
Ǻ = D	Ǻ = M	Ǻ = U
Ǻ = E	Ǻ = N	Ǻ = Ú
Ǻ = É	Ǻ = NY	Ǻ = Ű
Ǻ = F	Ǻ = O	Ǻ = Ū
Ǻ = G	Ǻ = Ó	Ǻ = V
Ǻ = GY	Ǻ = Ő	Ǻ = Z
Ǻ = H	Ǻ = Ö	Ǻ = ZS
Ǻ = I	Ǻ = P	Ǻ = AK(?)

(*rovásírás*) that they most probably brought with them from their former homeland in the East. The letters and syllabic signs were inscribed from right to left with a so-called runic knife on a wooden stick, or carved onto stone. Some runes were also written in boustrophedon style (alternating direction right to left then left

to right). The limited writing surfaces required concise messages by using abbreviations and contractions, i.e. ligatures. The *Illuminated Chronicle* (*Képes Krónika*, c. 1360) writes as follows: "These Szekler-Scythian letters, not yet forgotten, are used not with the help of ink and paper, but by mastering the carving of incisions on sticks, they use them as carvings"...

Origins of the Hungarian runic script are still being debated. There have been different theories put forward, such as ancient Sumerian, Scythian, Hun, Avar and Turkic, of which only the Sumerian and the Turkic writings are known. In all probability, it derived from the Phoenician, as did most of the scripts. However, runes were used to write many languages including, Gothic, German, Frisian, English, Danish, Swedish, Norwegian, Icelandic, Lithuanian, Russian, also Hebrew and other Semitic tongues. Sándor (Alexander) Forrai in his book *Ancient Hungarian Runic Writing from Antiquity to the Present* (*Az ősi magyar rovásírás az ókortól napjainkig*, 1994) even demonstrated similarities between Egyptian hieroglyphs and some of the Hungarian runes.

With the adoption of Christianity, runic writing became labelled as "pagan"; it was outlawed, and all texts had to be destroyed. The majority of the runic writings of significant value perished. András Vitéz, Canon of Rozsnyó, (high-ranking Judge and Magistrate of Counties Gömör and Kishont) translated a valuable document preserved in the Szilassy family's archives:

An order elevated to statute, signed by the secret councillors of King István I (St. Stephen) (997-1038), which stated that "Domokos, Archbishop of Esztergom, ordered for future execution by the Hungarian Christian Church and upon the request of Pope Sylvester II, that the old Hungarian letterings and carvings, written from right to left, used by Hungarians, Szeklers and Cumans, as well as the Hungarian priests of the church, must cease and be replaced by Latin script. Hereby it is ordered that the clergy must be taught to use the Latin script and be forbidden the use and teaching of the pagan writing, subject to the penalty of forfeiting their clerical appointments and a fine of 20

golden coins. Further, it is ordered that all inscriptions and prayer books with pagan lettering, found in churches, be destroyed and substituted with Latin. Those who surrender old pagan writings or carvings shall be rewarded with a sum of 1 to 10 denars. The surrendered writings and carvings are to be destroyed by fire and sword, so that, with their annihilation, any remembrance or desire to restore the pagan religion be curtailed". The document is signed: "Vatican 1000 IX. Cal. oct. Die festo Jac. Ap".

As a result, only very few relics survived, mostly in Transylvania; most date from the 15th and 16th centuries. Among these the most significant are: the bone pin-case found in Szarvas in south-eastern Hungary, dating from the Avar-age (6th-8th c.). According to some linguists and historians, this is the first Hungarian written relic. However, opinions differ on its decipherment: one came up with a Hungarian reading, another with an Old Turkic one; but there is no trustworthy meaning to date. There is the runic alphabet found in Nikolsburg (now Mikulov, Czech Republic), dating from the 15th century; the alphabet of the Reformed College of Gyulafehérvár in Transylvania (now Alba Iulia, Romania) from 1655; the inscription in the Unitarian Church of Énlaka from 1680. The most extensive relic of runic writing is the calendar containing the copy of the notes of the Italian scholar, Luigi F. Marsigli (1658-1730), kept in the Library of the University of Bologna. Other relics include church inscriptions in Csíkszentmihály of 1501; the Constantinople Inscription (*Konstantinápolyi Felirat*), inscribed on the wall of the Residence of the Ambassadors by Tamás (Thomas) Kedei Székely in 1515; also the late 16th century notes taken by István Szamosközy, and the alphabet of János (John) Kájoni of 1673. Then there is the 23-piece, 8th or 9th century Nagyszentmiklós Gold Treasure (*Nagyszentmiklósi aranykincs*), found in southern Hungary in 1799, several pieces of which display runic inscriptions. However, there is no consensus on their meaning to this day.

The Latin alphabet was not satisfactorily adapted to the characteristics of the Hungarian language for a long time due to the fact that most of the writing took place in Latin. Also, the Hungarian runic writing fits the characteristics of the language: all sounds correspond to a particular character in the Hungarian alphabet. At that time, in the Latin alphabet there were no corresponding letters for the vowels: *á, é, ö, ü*; and for the double consonants: *cs, gy, ny, sz, ty, sz, zs*. As a result, runic writing continued to exist, especially among the non-clerical literates and people in lower social positions. It was still used in some parts of Transylvania (*Erdély*, now in Romania) as late as the 1850s.

Research into its origins began in the 19th century. Károly Antal (Charles Anthony) Fischer (1838-1926) conducted the first methodical research work, and published his first book on the subject under the title *Hun-Hungarian Writing and its Relics* (*Hun-Magyar írás és annak emlékei*). He also pointed out the stenography-like abbreviations (ligatures) noted in the relics. Folklore researcher and literary historian Gyula (Julius) Sebestyén (1864-1946) devoted two books to the runic writing system: *Runic and Runic Writing* (*Rovás és rovásírás*)

**Runic Script Inscription in the  
Unitarian Church of Énlaka**  
"egy az isten georgyius musnai  
diakon"

**There is one God**  
[signed] Georgyius musnai diakon

(1909) and *The Authentic Remnants of Runic Writing (A rovásírás hiteles emlékei)* (1915). He was the first to describe in its entirety the *Stick-Calendar (Botnaptár)* from the Age of Reigning Prince Árpád (9th century). He also translated from the Latin the *Rudimenta* of János (John) Telegdi.

In the 1970s, the revival of runic writing was started by the work of Sándor (Alexander) Forrai. He entrusted the continuation of his work to Gábor (Gabriel) Szakács, journalist and runic writing researcher, who organized runic writing competitions, meetings and workshops in the Carpathian Basin, whereby thousands of young people have been involved in the preservation and handing over of our ancestors' heritage. Following Transylvanian examples, he launched a movement of erecting signboards with runic characters at the borders of settlements. As a result this writing enjoys its second Renaissance. Some people use it to send "encoded" messages; the Szeklers of Transylvania carve it into their wooden entrance gates. In all cases, it is an important part of the Hungarian national heritage. B: 1136, 1175, 1068, 1177, 1231, 1251, 1336, 1789, 7456, 7617, T: 7617.→**Kájoni, János; Szamosközy, István; Telegdi, János; Sebestyén, Gyula; Forrai, Sándor; Alma-Ata, Runic Inscriptions; Rudimenta; Herdsmen's Runic Numerals; Szeklers; Szekler Gates; Szeklerland Runic Characters; Nagyszentmiklós Gold Treasure; Cerro Pelado Cave, Runic Inscriptions; Friedrich, Klára.**

**Hungarians, Early History of** – In the past 150 years, numerous theories have evolved about the ancient settlement place of the Magyars and of the origin of the ancestors of the Hungarians. Some linguists still cling to the Finno-Ugric hypothesis, which, in the 19th century, on the basis of comparative linguistics, placed the original homeland of the Magyars in the Ural Mountains. However, modern research does not support this theory. The most recent research has found that the former settlement place of the Magyars was preserved in ancient traditions and that, in the 6th century AD, these people lived in a well-organized tribal union in the foothills of the Caucasus Mountains. Prior to that, they lived in the Steppes of Central Asia, among the Scythians and Huns. (The Magyar Chronicles call the Magyars Scythians and Huns interchangeably in the above-mentioned two regions.)

The most famous Hungarian researchers, Sándor Körösi Csoma and Ármin Vámbéry discovered one of the centers of the Hungarians in the above territories. Körösi intended to search for them among the Jugars or Uighurs in the present-day Chinese territory of Xinjiang, which was at one time inhabited by Huns; but he did not succeed in reaching it. Following in their footsteps, many other researchers consider this the ancient homeland of the Magyars. Already in the 1940's, Sergej Tolstov, a Russian archeologist stated that the ancient home of the Magyars was in Choresm (today Kazakhstan) and he connected their ancestors to the Keltemira culture, which existed there in the 4th century BC. (Tolstov, 1947) Anthropologist, Tibor Tóth believed that the Magyars were related to the *Madjar* tribe that lived on the shores of the Aral Sea

The Andalusian historian Al-Bakri (1458-1490) in his *Book of Highways and of Kingdoms* stated that one area of settlement of the Magyars was Horasan. There are also facts, which indicate a connection farther away, in Central Asia, since the Magyars show strong similarities with the ancient Mongol state organization, language and folk poetry, although this research is not complete. János Fogarasi began his research of the Central

Asian region in the 19th century, and his work was continued by Bálint Gábor (Valentine Gabriel) Szentkatolnai, the founder of Mongol Studies in Hungary. A more recent line of research states that the ancestors of the Hungarians were the autochthonous people of the Carpathian Basin, who welcomed Árpád and his Magyars when they reclaimed their homeland (Cser-Darai).

From the above-mentioned facts, it can be established that the proto-Magyars, the Scythians, Sarmatians and Huns lived together in the Hun Empire in ancient times and these peoples ruled the Eurasian Steppes from the Yellow River to the Carpathian Mountains. The ancient name for the Magyars connects them to the Huns, for already they are mentioned as Hungarus, Hunugur, etc. from the 5th century on, and the name Ogur/Ugurs was used exclusively for the Magyars. From the research of Peter Király, we know that the western sources referred to the Magyars as Madjar/Muageris in the territory of the foothills of the Caucasus in the 6th century. (Helilov, Nyitrai, 2008) Byzantine Emperor Constantine VII (Constantinos Porphyrogenitos) became alarmed at the proximity of the Magyars, who must have been an unknown quantity to him, so he began to investigate their military strength and methods of fighting, their customs and their language, recording also the native names of the Magyar tribes. He stated that the ancient name of the Magyars was *Sabartoi asphaloi*, which according to a consensus of opinion meant the Sabirs, who were of Hun origin and ruled the foothills of the Caucasus Mountains, today's territory of Dagestan, in the 5th and 6th centuries. The Emperor collected all his findings about the Magyars in his famous work, *On the Administration of the Empire (De administrando imperio)*, with important details on their sojourn in Lebedia and Etelköz (*Between the Rivers*). In 948, the Emperor received two Magyar leaders, Bulcsu and Tormás, and acquired information about their customs and system of state administration. He described the Magyars as "astute, with hardy nature, lovers of pomp and prepared to defend their freedom to their last breath." From the Hungarian Chronicles we know that the ancestors of the Magyars lived by Lake Maeotis (Sea of Azov) in organized groups, an area to which they arrived from the Persian territory they called *Evilath*. The area of Maeotis was a marshy territory, east of the Sea of Azov, which extended over modern Kercs, and where the Byzantine sources place King Muageris in the middle of the 6th century. He was one of the leaders of the Hun Kingdom, whose brother was Gordas.

The Byzantine Emperor called the ancient homeland of the Magyars Levedia, from where they fled from the attacks of the "Pechenegs" and the territory into which the Kazars settled. Hungarian historians formerly identified Levedia with the Maeotis area, which is probably the modern territory of Dagestan, and was the land of the Sabirs. According to the newest historical and archeological findings, it appears probable that the Magyars arrived in the Carpathian Basin in several waves from 562 to 896. According to ancient Hungarian tradition, after the death of Attila, a part of the Huns remained in their old homeland and waited for their return.

The Székelys (Szeklers), who live in the eastern parts of the Carpathian Mountains, in Transylvania (*Erdély*, now in Romania) have preserved this legend to this day. In the 1980's, on the basis of archeological finds in Hungary, Gyula László developed the theory of multiple settlements of Magyars (*Dual Settlement*), and with this he proved the relationship between the Avars and the Magyars. (According to the Byzantine Chronicles, the Avars were also Huns, most likely White Huns. Aradi, 2005) Gyula

László contends that the first Magyar ingress into the Carpathian Basin was when they joined the Avar remnants and lived together with them mainly after 860 AD. The second ingress was led by Prince Árpád, between 896 and 900 AD, when he crossed the Carpathian passes at the head of his Magyar people, estimated to have been 500,000, consisting of seven tribes and 108 clans.

According to the historical chronicles, the reason for the migration of the Magyars into the Carpathian Basin was overpopulation; therefore, before they started out, the seven tribes made a blood-covenant pledging brotherhood. This was also a custom among the Scythians, who would allow their blood to drip into a cup; the blood was subsequently mixed with wine and drunk by both participants. The first Prince of the Hungarians was Álmos, followed by his son, Great Prince Árpád, descendants of the Great Hun King, Attila. The election of a Prince took place in the same way as that of the Inner-Asian-related Hun tribes of Xianbei, where the leaders raised the chosen leader above their heads on a shield or a round disk. The Byzantine Emperor provided the names of the seven Magyar tribes: Nyék, Megyer, Kürt-Gyarmat, Keszi, Tarján and Jenő. Among these, Kürt and Nyék were also tribal names among the Bolgars; and the name Tarján was popular among the Inner Asian peoples in the form of Tarkan or Darkan.

The Magyar armies that united in *Etelköz* entered their new homeland at the end of the 9th century, to take back the land they had inherited from Attila (as per Anonymus). According to historical facts, together with the Magyars, came three Kabar tribes that were fleeing from Kazar rule. Along the way, more tribes placed themselves under the protection of the Magyars, as we can see from the Chronicle of Anonymus. According to historical chronicles and folklore, there was no opposition to the ingress of Árpád's people, which indicates that there was an indigenous people, Magyars and peoples related to them, living in the Carpathian Basin at that time. (These people were called people of bows and arrows, according to Hun terminology.) The Magyar armies first arrived in Transylvania (Erdély), where the Székelys (Szeklers) welcomed them, and then they continued their journey westward. By about 900, they occupied not only the land between the Danube and Tisza, but also the lands beyond the Danube (Transdanubia, a.k.a. Pannonia) and they extended their rule as far as the Vienna Basin. However, in the 11th century, they gave this up.

In the 10th century, the Magyars still lived a semi-nomadic, semi-agricultural life. There was private property; but the land was owned collectively by the various clans. Their religion was animistic; they honored the dead and the spirit of their ancestors; they believed in the magic powers of their tribal leaders and their priests, the *Táltos* (Shaman). Their runic script was a Hunnic or Turkic inheritance. The Principality of the Magyars was one of the strongest states in Europe, for they initiated campaigns annually in every direction of the compass. Historians today still call the 10th century Magyar campaigns „warring raids”, although the Magyars did not always deliberately attack the western principalities, but were asked to come to the aid of one or the other in a dispute (Ebelhardt, Thankmár, Henrik etc). In the last of these campaigns, the Magyar army of mounted archers from two of the seven tribes was virtually annihilated by the forces of Otto the Great in the Battle of Lechfeld in August 955.

The Magyars raided into Europe as far as today's Spain, and several times made Byzantium pay tribute to them. There are many stories about them in the foreign and also in the Hungarian chronicles, the most famous being the story of Botond. The Swiss, on

the other hand, recorded the campaign in Sankt Gallen, and it is clear that the Magyars were very friendly according to a monk who stayed behind.

The rulers of the Árpád Dynasty governed the territory from the area between the Danube and the Tisza Rivers and, in addition, the Gyula of Transylvania possessed great power; and also Bulcsu, who bore the title of *Horka* (judge). The reign of Prince Géza brought a great change in the lives of the Magyars. In 973 he established connections with the rulers of the Eastern Franks. In contrast to the Gyula of Transylvania, he did not follow Byzantine Christianity, but rather Western Christianity, although he did not wish to make this an exclusive faith. According to a famous saying of his, he felt he was a great enough a man to worship two gods. The strong propagation of the Christian religion is linked to the name of his son, István (Stephen), who ruled as the first King of Hungary from 1000 to 1038. Besides the spreading of Christianity, István established a strong central rule in the Carpathian Basin; and the lords who resisted him (Koppány, Gyula and Ajtony etc.) were defeated with the help of the Germans, and their lands confiscated. Thus a united rule was assured in the Carpathian Basin. (Obrusánszky)

The Magyars, just as the related peoples in the Carpathian Basin, had a well-developed material and spiritual culture; they even introduced several new technologies to the European peoples. Archeologists have found traces of developed metal-works; and it is also a well known fact that they used the most modern military techniques. The harness, stirrups and saddle were all innovations that the equestrian peoples brought into Europe. The riches of the Magyars were unparalleled in Europe of the Middle Ages. They exported the preservative of that time, salt, and they developed the gold and silver mines in northern Hungary and in Transylvania. The Magyars of Árpád, before they came into the Carpathian Basin, were already a civilized group, since they had developed a system of irrigation to improve on their methods of agriculture. The Cluny monks did not attempt to convert the Magyars by teaching them agriculture, as they did the rest of Europe. (Hóman, Bálint) The characteristic churches of the Magyars were the round churches, which can be found in large numbers only in the Caucasus, and the frescoes that remain in the churches show that the Magyars were also skilled in Christian artistic elements.

***Christian era.*** This started with the adoption of Christianity, which began with the invitation of Christian monks in 973 by Prince (Khagan) Géza (Geyza, ruled 972-997). He realized the importance of joining the just evolving Western European group of nations (Hungary finding itself wedged between the two major powers: the Holy Roman Empire and Byzantium) and he attached Hungary to the western form of Christianity. To consolidate this policy, Géza sent twelve of his leading men to attend the Europe-wide meeting of nations in Emperor Otto II.'s court at Quedlinburg (in Saxony) on 23 March, 973 (Csaba Csorba, 1997). The Christianization was completed by Géza's son, King István I (later St Stephen), the first king of Hungary who ruled from 997, and was King from 1001 to 1038). The Christian era marks the beginnings of the formation of a multi-ethnic nation in the Carpathian Basin with the addition of Cumans, Petchenegs, Slavs, Germans Saxons and some Turks.

The characteristic Hungarian culture is best expressed in their folklore (legends, fairytales) and in the customs of the peasantry (who are also the mainstay of the preservation of the Hungarian language), expressed in their way of dressing (costumes), fitting out their houses, method of constructing their garden gates, in their decorative

style (griffin and tendril ornamentation), goldsmith's craft, silver sabretache plates, ceramics, their folksongs, their musical instruments, their national dances, their agricultural implements and tools, the way they organize their wedding ceremonies and feasts, their funeral and burial customs, the grave head-markers carved from wood. The basis of their social organization was the family and the clan (*nem*). Politically, the Hungarians were divided into tribes, with a tribal head (leader or prince, in old Hungarian "hadnagy"). The army was split up into regiments, companies (squadrons) and corps. It is possible to differentiate the following ethnographic regions in Historic Hungary of the Carpathian Basin, together with their various Hungarian dialects (after the ethnographer Károly Visky): (I) Transdanubia (including such characteristic areas as Csallóköz, Felsőörség, Sárköz, Somogy, Göcsej, Hetés and Ormányság). (II) Northern Hungary (*Felvidék*, now in Slovakia, including the Matyó, Palóc, Cserhát and Szilágyság). (III) The Great Hungarian Plain, including the Jazygs, Cumanians, Hajdús, areas such as Nyírség, Bodrog Interfluve, Rét and Szamos Interstice. (IV) Transylvania, including the Kalotaszeg, Mezőség and Torockó areas and the Szekler (*Székely*) and Csángó areas (the latter also east of the Carpathians).

**Population.** From Prince (Khagan) Árpád's nation of an estimated 250,000 to 500,000 Magyars, when they entered the Carpathian Basin in 896, their number grew to 4.5 million under the rule of King Mátyás I (Matthias Corvinus) in the 15th century, about equal to the population of Great Britain at that time. In 1910, the historic Kingdom of Hungary, taking up the whole Carpathian Basin, had a population of 20,886, 487, out of which the total number of Hungarians were nearly 13 million (1930 estimate). In 1920 there were 9,318, 456 in the newly truncated Hungary. This figure declined to 8,001,112 by 1930 because of emigration, whereas in the lost territories (2/3 of the Historic Kingdom), now parts of the newly created "successor states", there were 3,388,000 Hungarians: in Romania 1,800,000, in Czechoslovakia 970,000, in Yugoslavia 580,000, in Austria 55,000. After regaining some of the lost lands of the Hungarian Crown, as a result of the First Vienna Award of 1938, and the Second Vienna Award of 1940, the population of Hungary increased to 14,679,573 in 1941. In more recent times (1985) the population of Hungary has actually decreased (with an annual growth rate of -0.1%): 10,644,000 of which the Magyars amounted to 92% of the total. On 1 January 2000 the population statistics revealed a considerable decrease to 10,043,000 (Hungary Factbook 2000). – B: 7456, 1309, 1923, T: 7456, 7690.→**Most of the names have their own entry; Hungary, History of; Hungarians (Magyars), Ethnogenesis of.**

**Hungarians' Ethnic Names** – Names of ethnic groups may be divided into two categories: (1) the ethnic name that they apply to themselves, and (2), the ethnic names given to them by other ethnic groups. The sudden appearance of the Hungarians (Magyars) in Europe in the 9th century and the lack of reliable information and knowledge about their origin resulted in a variety of names given to them by authors writing in Greek, Arab, Latin, Slavic and other languages, in addition to the ethnic name applied to them by themselves.

In 457 AD, the Magyars were called Onogur, by Byzantine writer and traveler, Priskos Rhetor, and also by Agathias. In 558 AD, Theophylaktos Simokkatta called them Umgroi, Unniguroi; while around 550, Jordanes referred to them as Hunuguri. In 842, Georgios Monachos, and Leon Grammatikos knew them as Turkoi, Unnoi and Ungroi.

Byzantine Emperor Constantine VII (Konstantinos Porphyrogenitos) mentioned them as *Turkoi* or as *Sabartoi asphaloi* in 950 AD.

(1) Turk (subsequently *türkü*) is the appellation given to the Magyars in the 6th century by Agathias, Maurikios, Theophanes Bizantios and Menandros; in the 10th century, by Byzantine Emperor Leo VI (the Wise), by Arethas, and by Konstantinos Porphyrogenitos; also by some Arab sources in the 11th century, such as Ibn Hayyan and al-Bakri. All this shows that, in Europe, the Magyars were considered to be Turkic people.

(2) Onogur (“ten horses, i.e. ten tribes”) is the origin of the ethnic appellations Onogur, Ungri, Ungar, Hungri, and Hungarus. The Catalan friar, Paulus Orosius, as early as 417 AD, writes in his work thus: “Pannonia is a country in Europe which has been occupied recently by the Huns, who themselves refer to their land as Hungaria”. In Sankt Gallen (731-736), the Magyars’ name appears in the form Ungarus; in Lipting (761) as Hungar(us); and in Wiesenburg (797-809) as Hungarus, Hungarorum. In the 862, *Annales Bertiniani* the name Ungri appears.

(3) The *Madjar* ethnic name was used by Ibn Rusta around 930 and by Gardizi in 1050-1053. The Turkic Khazars also applied the ethnic name Madjar to the Magyars (Hungarians).

(4) Magyar: ethnic appellation referring to themselves in their own sources which appears in the 6th century as Muageris, who was a Hunnic king in the settlement called Madjar (Madzsar) in Crimea (in today’s Dagestan). A number of authors equate Magyar with the name of the Megyer tribe.

(5) Scythian is the ethnic name for the Magyars used by Byzantine sources, but European authors also use Scythian for Huns, Avars, Bulgars, Petchenegs, Uzes, Cumanians, and even the Mongols themselves. The Hungarian version of Scythian, *Szittyá*, first appeared in a decree of King András (Andrew, 1060), referring to the ancient Scythian faith of the Magyars (*see* Obrusánszky).

(6) Hun is the ethnic name for the Magyars in the Byzantine sources from the 10th century on.

(7) Avar is the name belonging to several Central Asian peoples in addition to the Magyars. A good example is what Byzantine Emperor Leo VI (the Wise) writes: “The Scythians, that is the Avars...”

There are differing theories about the position of the ancestral home of the Magyars, where they were fused into a homogeneous ethnic group from diverse component parts: some place it in Central Asia, some in Levedia, on the shore of Lake Maeotis (the Sea of Azov, in present-day Ukraine), some place it north of the Caucasus Mountains, which is called *Dentumogeria*; but new scientific research shows close genetic connections between the *Magijars* of Kazakhstan and the Magyars in the Carpathian Basin. The royal notary of King Béla III, Anonymus, calls the Magyars *Hetumoger* (*Hétmagyar*: people of seven tribes). – B: 1328, 7456, T: 7456, 7690. → **Anonymus**.

**Hungarians, Ethnogenesis of** – The oldest facts about the origins of the Magyars can be found in the historical chronicles written for the Hungarian kings (the Chronicle of Simon Kézai, the Illuminated Chronicle, the Chronicle of Thuróczy etc.). Besides these, it is important for researchers to pay attention to the work of Anonymus, entitled: *Gesta Hungarorum*, which relates the events of the arrival of Prince Árpád and the Magyar

tribes in the Carpathian Basin, and the division of the state. The works of the Archbishop of Esztergom, Miklós Oláh, in the 16th century, can be counted as a creditable source (*Hungaria, Athila*). Furthermore, the collection of legal customs by Supreme Justice István Werbőczy, in a book entitled: *Hármaskönyv (Tripartitum)* was one of the most influential works of the Hungarian aristocracy, right up until the Reform Age. All of these sources connect the origin of the Magyars with the Scythians. It is important to note that they all state that the Magyars came from Scythia, that is, that they originated from the land of the Scythians, but their leaders were the descendants of the Hun King, Attila. Álmos and his son, Árpád, were the descendants of Csaba (Irník), the third son of the great Hun King. In other words, there are not two lines of descent, the Scythian and the Hun, but the sources state that the Scythian element is basic in the Hungarian people and added to that is an important Hun element.

The historical chronicles consider the ancient father of the Magyars to be Nimrud, who, after the tumbling of the Tower of Babel, went to the Persian province of Evliath (in the Iranian part of Azerbaijan). The Great Hunter had several sons; but two were his true descendants, Hunor and Magor. These young men did not remain at the home of their father, but during a hunt, in which they pursued a Wondrous Stag, they arrived in the moors of Lake Maeotis (Sea of Azov), married the daughters of king Belar, and settled there.

Anonymus wrote about a homeland, similar to that in Kézai's Chronicle, and he called the territory where the Magyars were living in the Maeotis region, *Dentumoger* (meaning seven Magyars). Byzantine Emperor Constantine VII (Constantinos Porphyrogenitos, 913-959) called this territory Levédia. According to the chronicles, the Magyars multiplied in this land and, when it became overpopulated, they searched for a new homeland. Their ultimate goal was to find and repossess the lands of King Attila, because they had learned from their ancestors that the Carpathian Basin was at one time Hun territory. The majority of the people they found in the Carpathian Basin accepted the Magyars and, in this way, they took back their ancient land almost without a struggle. The research into the origins of the Magyars began early in the 13th century, when the Dominican brothers first heard from the Cumanians, living in Moldavia, about the Magyars that had remained in the East. Many of them set out in search of the Magyars; and two monks, Otto and Julianus, actually met them. On the basis of today's research, it can be assumed that the Magyars lived not only in the Caucasus, but small groups of them traveled with the Bulgars to Bulgaria in the Volga region, where Julianus met them.

Later, in the court of King Mátyás I (Matthias Corvinus, 1458-1490), there lived historians who seriously studied the antique sources; and from them they deduced that there were two Scythian peoples: the Asian and European Scythians. From the Middle Ages until today, Hungarians have been traveling to the East to research the origins of the Magyars. With the aid of the various branches of science, the following facts have come to light. Archeologists have discovered that the horse-burials of the Magyars have their counterpart as far east as the surroundings of Beijing (Peking) in China. (Érdy, 2001) The Hungarian art of embroidery can be traced back to Inner Asia, to the Altai Mountains, where there are amazing similarities. (Érdy) The folk poetry of the Magyars can be traced to the Yellow River. There is a close connection linguistically between the Hungarians, the Asian Turks and the Mongols, which might indicate that the ancestors of

the Magyars came from that part of the world, although their tribal union did not take place until they reached the West.

The ethnic (racial) difference between the Finns and the Hungarians was well demonstrated in the 1980s by a Japanese biologist, Dr. Hideo Matsumoto of the Osaka Institute, who specialized in blood group differentiation and carried out research in this field. On basis of representative blood samples from various parts of Hungary obtained from the Hungarian Academy of Sciences, his results showed that the ethnically Turkic Hungarian people, though speaking a Finno-Ugrian language with later Turkic admixture, show no relation to the Finn people, who racially are more related to the Baltic and Scandinavian peoples, even though speaking also a Finno-Ugrian language; therefore, Professor Matsumoto has concluded that there is no racial relationship between the Finns and the Hungarians.

While there is no reliable information for the evolution of Hungarian ethnogenesis in the period between 500 BC and 500 AD, for the development after 500 AD there are sufficient data. For example, for the history of the Huns and Avars, there is the so-called “dual conquest” theory of the Carpathian Basin: settlement of the Magyars there at two different times. According to the working hypothesis of Professor Gyula László: first they moved into the Carpathian Basin after 670 AD as the “Griffin-Tendril people”, while the Avar Empire was dominant there between 568 and 803. The second entry during 896-900 was under the leadership of Khagan (Prince) Árpád, when the bulk of the Magyars moved into the Carpathian Basin, absorbing the remaining Avar population. During the subsequent centuries the Magyar population became reinforced by some ethnic fragments, like the Cumans and Petchenegs, and in more recent centuries assimilating Turkic, Slavic and Germanic vocabulary and racial characteristics.

The Hungarian population, when they entered the Carpathian Basin during the years 896-900, was estimated to be 500,000 at the most – although there emerged contrary opinions of late, this number considered to be too high. In the 15th century their population grew to 4.5 million during the reign of King Mátyás I (Matthias Corvinus, 1458 – 1490), about the same as the population of Great Britain at that time. Then followed centuries of devastation caused by the 150 years of Ottoman Turkish occupation, from which the population only started to recover in the early part of the 19th century. The census of 1910 in the historic Kingdom of Hungary, covering the entire Carpathian Basin, had a population of 20,886,487, of which nearly 13 million were Magyars. In 1920, the population of truncated Hungary was 9,318,456 and this figure shrank to 8,001,112 by 1930, mainly due to emigration. In the lost territories (2/3 of the historic Kingdom of Hungary), now parts of the “successor states”, there were altogether 3,405,000 ethnic Hungarians: 1,800,000 in Romania, 970,000 in Czechoslovakia, 580,000 in Yugoslavia and 55,000 in Austria. With the recovery of some of the lost territories as a result of the First Vienna Award of 1938 and the Second Vienna Award of 1940, the population of Hungary increased to 14,679,573 in 1941.

In more recent times (1985) the population of Hungary developed a negative annual growth rate of –0.1% of the total 10,644,000 the Magyars amounted to 92% of the population. At the turn of the millennium, the number of Hungarians is as follows:

(1) Estimates in the separated territories (detached in 1920 and again in 1947): in the Southern Hungary (*Délvidék*, now Croatia, Slovenia and Serbia) 380,000; in Transylvania (*Erdély*, now part of Romania) 2,000,000; in the Upper Hungary (*Felvidék*,

now Slovakia) 600,000; in Sub-Carpathia (*Ruthenia*, now part of the Ukraine) 183,000, in Western Hungary (Burgenland, Austria) 5,000. In total: 3,168,000.

(2) The number of Hungarians in the Western European countries, in the Americas and in the Trans-Oceanic countries is: Argentina 40,000; Australia/New Zealand 50,000; Austria 39,000; Belgium 14,000; Brazil 70,000; Canada 270,000; Denmark 2,000; France 15,000; Germany 50,000; Great Britain 15,000; Holland 10,000; Italy 10,000; Israel 200,000; Norway 5,000; Sweden 20,000; Switzerland 15,000; United States of America 1,540,000; the smaller countries of South America 5,000; other countries in Europe 10,000. In diaspora the total is 2,350,000.

(3) Based on the 2001 census and on cautious estimates, in 2003 the number of Hungarians is as follows: in Hungary 10,152,000; in the separated territories 3,168,000; in the diaspora 2,350,000; in total 15,670,000. Hungarians were living on the globe at the beginning of the 21st century. – B: 7456, 3240, 1104, 1309, 1068, 1079, 1923, T: 7456, 7690.→**Dispersed Hungarians; Avars; Huns; Double Conquest (of the Carpathian Basin); László, Gyula; Hungarians' Ethnic Names; Freedom Fights; Trianon Peace Treaty; Paris Peace Treaty.**

**Hungarian Studies Association of Canada** – An academic organization created in 1984 to promote cultural and educational activities and research related to Hungarian studies, to stimulate public awareness of Hungarian culture, history and current affairs, with an emphasis on the Canadian context; to sponsor and support publications, conferences and meetings of scholarly and general interest, to maintain contact with academic and community groups having complementary interests. The yearly meeting of the Association coincides with the annual Congress of the Social Sciences and Humanities held at different Canadian universities. It has a quarterly newsletter for the membership. The Lectures and Papers in Hungarian Studies and the Hungarian Studies Review are regular publications of the Association. While the first one deals with conference papers, the Review is an interdisciplinary journal devoted to the publication of articles and book reviews relating to Hungary and Hungarians. Since its introduction in 1974, the review has been a forum for the scholarly discussion of issues in Hungarian history, politics and cultural affairs. – B: 3240, T: 3240.→**Galántha, Judit; Bisztray, György; Dreiszger, Nándor F.**

**Hungarian Tádé** (Thadaeus Ungarus) (12th century) – One of the most ancient book copiers in Hungary. He finished copying one of Ptolemaious Pheludensis' book in 1175. – B:1078, T: 3240.

**Hungarian Truth and Life Party**→**Political Parties in Hungary.**

**Hungarian Voice of Canada** – A daily Hungarian language broadcast on shortwave. Set up by the Canadian Broadcasting Corporation's International Service, later called Radio

Canada International. It began broadcasting in the wake of the Hungarian Uprising and Revolution on 12 November 1956. Within weeks a full-fledged Hungarian Service was inaugurated with its own 15 minute daily broadcast, increased to 30 minutes in the fall of 1976, which lasted until 1991, when it was terminated. The daily line-ups were about political happenings, people's lives, struggle, sorrow and happiness, as integral part of the political, cultural and religious fabric of Canada. When it was already 30 minutes long, the program was divided into three blocks, 10 minutes each, covering political events and magazine type items. Also sports-related news and reports were regularly broadcast in Hungarian, and bilingual interviews with Canadian artists, musicians and politicians. The program always featured some music as well. All major events, such as Canada's centennial year festivities, Expo 67, the 1976 Olympic Games in Montreal, or the Commonwealth games in Winnipeg and Edmonton and the first cross-country visit to Canada by Pope John-Paul II were fully covered. Cardinal Mindszenty's visit to Canada was also reported in detail. Some of the production of RCI's Hungarian Service were deposited in Hungarian, French and Canadian archives. It gave assistance and documentation to visiting Hungarian artists, journalists, radio and TV producers and regularly contributed information and live programs to the CBC. The end of communism in 1989 led to the dismantling of the Hungarian Voice of Canada after 35 years. – B: 3240; T: 3240.→**Galantha, Judit.**

**Hungarian Weapons** – In his work “Taktika”, Leo VI (the Wise, 886-912) Byzantine Emperor mentions amongst the weapons of the Magyars (Hungarians) the bow, the pike and the sword. On basis of archeological finds we know that to these must also be added the hatchet and the axe. The oldest amongst them is the bow: in the Eurasian mounted communities it was the primary weapon throughout human history; its construction needed great skill and its use needed great proficiency. The lightweight pike was already used by the Avars, while the Hungarian light cavalry was still using it beyond the 15th century. The sword of the Magyars of the Carpathian Conquest times was a lightweight, curved cavalry sword. The Onogurs were using both the straight double-edged sword and the short sword called *tusa*. Protective hand-guards for the sword-hilts appeared from the end of the 17th century: these especially characterize the Hussar swords of the period between the *Kuruc* insurrection (led by Prince Rákóczi II) and the War of Independence of 1848-1849; the use of this type of sword spread to Western Europe almost simultaneously. The hatchet and the axe were used by the Magyars from the earliest times; then from the 16 century the hatchet and the small, long-helved axe (*fokos*) came into use. The mace (“war hammer”) goes back in its use to earlier times than the second half of the 10th century and it was not only a weapon, but also an emblem for the army commander. The shield of the early Hungarians was also used only by dignitaries. – B: 0883, 1020, 1078, T: 7456.→**Mace; Pike; Bow, the Composite; Sword; Avars.**

**Hungarian-Yugoslav Eternal Friendship Treaty** – This was a result of Hungary's attempt to attain cooperation with Yugoslavia in 1940, in order to counteract the increasing pre-war German pressure. Prime Minister Count Pál (Paul) Teleki envisaged the two countries, joined later on by Poland, forming a neutral bloc in Central Europe and thus sparing these countries from the horrors of war. On 12 December 1940, in Belgrade, Hungary and Yugoslavia signed an “Eternal Friendship Treaty”, which was not ratified by Yugoslavia. On March 25 1941, Yugoslavia joined the German-Italian-Japan Tripartite Agreement. Two days later, a coup d'état, led by Air Force General Simonic,

replaced the pro-German Yugoslav government with a pro-English government, which withdrew from the ratified Tripartite Pact and nullified the never ratified Hungarian-Yugoslav Agreement. On April 1 1941, the meeting of the Supreme National Defense Council accepted the recommendation of Prime Minister Count Pál (Paul) Teleki that Hungary would move if Yugoslavia were to fall apart as a state, if the Hungarian minority in Yugoslavia were in danger and if, in consequence to the German attack, the areas populated by Hungarians were to become a “no-man’s land”. On April 8, Germany attacked Yugoslavia, which dissolved, with Croatia becoming an independent state again. Hungary joined in the maneuver and repossessed the Bácska (Backa) area, the Baranya Triangle, and the Mura River region. With it, half a million ethnic Hungarians were reunited with their mother-county, torn from it by the Versailles-Trianon Peace Treaty in 1920. However, the Paris Peace Treaty forced them back again under Yugoslav rule, in 1947. – B: 1134, 1288, 1020, T: 7665. → **Teleki, Count Pál.**

**Hungarica** – Collective name for all literary or pictorial mementoes of Hungarian subjects published in Hungarian or in a foreign language. They can be in the form of a manuscript, printed matter (book, newspaper, periodical, pamphlet, program, advertisement) map, music score, record, photograph or film. – B: 1078, 1153, T: 7669.

**Hungarica Monumenta** – A series of volumes of Hungarian historical sources translated and published in Hungarian by the Hungarian Helicon Society (Helikon). They include János Turóczi’s Hungarian Chronicle (1957), Bonfini’s King Mátyás I (Matthias Corvinus) (1959), Márk Kálti’s Illuminated Chronicle (1959), the Chronicle of János Küküllei and the Nameless Minorite (1960), György Szerémi’s Decay of Hungary (1961), Miklós Istvánffy’s Of the History of Hungarians (1962), István Szamosközy’s Transylvanian History (1963). – B: 1150, 1020, T: 3240, 7665. → **Turóczi, János; Decade of Mourning; Galley Slavery; Szamosközy, István; Bonfini, Antonio; Kálti, Márk; Istvánffy, Miklós; Szerémi, György.**

**Hungarology** (Hungaristics, Science of Hungarian studies) – The appellation for a combination of disciplines dealing with Hungarian language, history of literature, fine arts, music, culture, civilization and history on an international level. The term was created by Róbert Gragger around 1920 when, outside Hungary, he filled the first chair in this field, lecturing on Hungarian Language and Literature at the University of Berlin, from 1917; he was also the first Director of the Hungarian Institute and the Collegium Hungaricum there. In a narrower sense, he used it only outside Hungary, but in a wider sense also for Hungary itself. In the development of the concept of Hungarology, the eminent anthropologist, Lajos (Louis) Bartucz, and the literary historian, Sándor (Alexander) Eckhardt, played a significant role. The eminent writer, László (Ladislav) Németh, defined it, not so much as an academic system, but rather as an individual sense of history of ideas, studying the characteristic aspects of Hungarian culture, combined with a European orientation. The university lectures by Zolt Beöthy and Frigyes (Frederick) Riedl had an initiating influence on the clarification of the basic ideas. A journal entitled: *Hungarologia*, was launched in 1935, edited by Gyula (Julius) Ortutay. Hungarology regards the component disciplines, not as separate, isolated studies, but brings them together into a conceptual and intellectual whole, incorporating the results of the Hungarian character and the effect of the Hungarian landscape. After World War II, the Communist regime, under Soviet military occupation, rejected Hungarology as a form

of study for three decades; but, in the 1990s, the need for such a combination of disciplines became apparent, its exact definition being dependent on the penchant of a particular scholar, active in a particular research institute. Such institutes were set up, e.g. at the University of Budapest, under the title of Institute of Hungarian Studies in 1939; Transylvanian Science Institute at the University of Kolozsvár (now Cluj Napoca, Romania) in 1940, when Northern Transylvania was returned to Hungary by the Second Vienna Award; also the Institute of Hungarology, established at Újvidék (now Novi Sad, Serbia) in 1969. An International Hungarian Philological Society was established in 1977. – B: 1068, 1961, 7456, T: 7456.→**Eckhardt, Sándor; Németh, László; Beöthy Zsolt; Ortutay, Gyula; Riedl, Frigyes.**

**Hungarus** – According to Anonymus, the 13th century Chronicler, this name is derived from the fort (*vár*) of Hung (Ung) i.e. Ungvár (now Uzhhorod, Ukraine), where the seven Hungarian tribal leaders rested for a while after they had entered the Carpathian Basin in 895, for which they were named the Hungvárian leaders, i.e. Hungvárius. However, this name was known in the 6th century: the Hungars were mentioned by Jordanes and the name Onogur appears in the works of Priscos Rhetor in the 5th century. The Byzantine authors also used this name in the 9th century. The western writers called the Magyars Avars; but Regino used the Ungri name from which the name(s) Ungria, Ungaria, Hungaria were derived. Other sources derive the name of Hungaria from the related and once mighty Huns. In the 9-10th centuries, Magyars raided Western Europe and westerners wrongly believed that the dreaded Huns had returned, and so they called the Magyars Hungarians. – B: 0942, 1078, 1020, T: 7103.→Hungaria; Hungarians' Ethnic Names.→**Anonymus.**

**Hungary, History of** – Hungary, as an administratively organized state along western European lines has been in existence since Reigning Prince (Khagan) Géza decided to join the western, Christian states of Europe, at the time of the meeting of Christian European nations at Quedlinburg in 973 A.D. to which he sent an embassy of twelve leading men. The Hungarian State became fully established by his son, István I (St Stephen), who became the first King of Hungary.

#### ***The Árpád Dynasty (1000-1301)***

King István I (St Stephen, 1001-1038). His earlier heathen name was Vajk, and he ruled from 997, after his father's death, first as a reigning prince. He became King in 1000, when Pope Sylvester II sent him a crown. In Esztergom, at the new seat of power established by his father, he had himself crowned with it as King of Hungary, according to tradition, on Christmas Day, 1000, at the age of about 26. Late in 996, he married Princess Gisella of Bavaria (probably betrothed to him on his father's, Géza's wishes). He, the great-great-grandson of Reigning Prince Árpád, was facing a difficult and dangerous situation initially, because according to ancestral Hungarian custom for succession, the tribal elder should have taken over the power on Géza's death, not Géza's son. He was Koppány, probably his uncle. In 998, from Somogyvár, south of Lake Balaton, Koppány proceeded with a considerable force that he had mustered up for himself, and near Veszprém, north of the Lake, he attacked King István's forces, which were supplemented with some armored Bavarian knights. István won the battle and Koppány fell on the battlefield. István had his body cut up into four parts and each part

was sent to a major town of the realm (Esztergom, Veszprém, Győr, and Prince Gyula's center in Transylvania) as a deterrent to any possible rivals for the leadership. In 1002, István's Christian uncle, Gyula of Transylvania, rose up against him but he was crushed. Finally, Ajtony (Ochtum) had to be dealt with. As Prince of the area between the Maros River and the Lower Danube, he tried to block the supply of salt shipped down the River Maros toward the center of the Kingdom. István sent one of his military leaders, Csanád, against him and at Oroszlámos (now Banatska-Arandelovo in Serbia), Ajtony was also defeated and killed. After this, István already had so much power in his hands that he became the undisputed ruler of Hungary.

He went about establishing a fully Christian monarchy, based on the Carolingian model. By his own decisions, he passed laws for his subjects, listening only to the opinions of his Royal Council, consisting of leading secular and lay officials. His laws seriously punished stealing, perjury and violence. Of great significance was his law introducing private property, because this led to the breaking up of the clans living on commonly owned land. István accumulated enormous royal properties (*patrimonium*), also on the Franconian pattern. These large estates were subdivided into smaller units and, for each of these, he established one *földvár*, or earth-fortress, which became the center of the administrative counties (*megye*, pl. *megyék*) of his realm, about 45 of them at the time, and each of them under a royal official, an *Ispán*, or *Várispán* (fortress-governor, head official of a county), later becoming *fő-* (head) *Ispán*, also representing the King's authority in the county, administering its unfree population, as well as collecting the taxes for the national revenue (both central and local). All the royal officials were appointed by István, because the nobles could not be trusted. He appropriated two-thirds of all the lands belonging to the clans, which became the estates of the Royal Crown; the people living in these estates became the servants of the castles. The *Nádorispán* headed these large royal estates. István had silver coins minted along the lines of western currencies. From his codified laws, two books are preserved. With equally great energy, he worked on the enormous and important task of Christianizing his people, including all his subjects. He invited a great number of missionaries, mainly Benedictine monks, from the West. In his laws, he made it obligatory for every group of 10 villages to erect a church and provide for its upkeep. Strict laws provided for Sunday as a free day from work, keeping the fasts and ensuring regular churchgoing. He made every seventh day a market day (*Vásárnap*), which later became the Hungarian word *Vasárnap*, meaning Sunday. The pope empowered him to organize the Christian Hungarian church with two archbishoprics, ten bishoprics and some abbeys; these were given rich endowments and privileges. The Abbey of Pannonhalma became the chief religious center in Hungary. István corresponded with Abbot Odilo of the famous French Benedictine Monastery in Cluny, France, to ask him for relics for churches in Hungary. István was also successful in his external politics. He curbed the expansion by the Polish Prince Boleslav Chabry into the northwestern part of the northern Hungary area (mainly in County Trencsén; now Trencin in Slovakia), soon forcing the Polish prince out from this area altogether. In face of the aspiration by Emperor Konrad to reduce Hungary to feudal vassalage, István strongly defended the independence of the young Hungarian State. He defeated Konrad's invading army and forced him to forgo the area between the Lajta and Fischa Rivers. He hoped, that his only son and successor, Imre (Emeric) would continue his reforming, state-administrative work. He (or his Abbot Gerhard) wrote the

famous *Intelmek* (Book of Exhortations) to his son. However, Crown-Prince Imre was killed under suspicious circumstances, on 2 September 1031, at an age unknown. István had to face a serious successor problem as a result. The next in line for the throne, Vászoly (Vazul), could not be trusted because of his attachment to heathen beliefs. Therefore István decided to appoint Péter Orseolo of Venice (1010-1046 or 1059), his nephew, as his successor. When Vászoly's followers wanted to kill him, he had Vászoly blinded, thus making him unsuitable to reign. Vászoly three sons, András (Andrew), Béla and Levente escaped, and lived in Kiev. St István died in Esztergom on 20 August 1038, and he was buried in the Basilica, founded by him in Székesfehérvár, southwest of Buda. Pope Gregory VII canonized him, together with his son Imre, in 1083. His miraculously preserved (mummified) right hand is in the St István (Stephen) Basilica, Budapest, kept as a national relic. The St István Basilica in Budapest is named after him, and an equestrian statue of him can be seen on the Buda Hill. St István is regarded as the Founder and Apostle of Hungary. The realm, including the ancillary lands he built up during his long reign, was named after him as the "Lands of the Crown of St István".

*The first period of internal struggles for power* followed. The disorders, caused by these royal disputes after St István's death, did much harm to Hungary, lasting nearly 40 years and costing even its independence. Later, several more periods of disputes and weak rulers followed. St István's designated successor, Péter Orseolo (ruled 1038-1041 and 1044-1046), followed his predecessor's policies, but his foreign origin and court worked against him: court revolution broke out, led by the Palatine Sámuel, Aba István's brother-in-law of Khabar extraction. Péter was expelled in 1041. He fled to Emperor Henry III. The "national" King Sámuel Aba was on the throne barely 3 years when, in 1044, Péter returned helped by Henry III.'s army, defeating Sámuel Aba at Ménfő, and then murdering him. In 1045, at Székesfehérvár, Péter swore allegiance to the Emperor and rendered homage to him, becoming his vassal, thus sacrificing Hungary's independence. The populace turned against him and another rebellion broke out, led by Vata in 1046, and now Peter was killed, together with his German knights and priests. The insurgents recalled the Princes András and Béla of the House of Árpád from exile in Poland. King András I (Endre, Andrew, one of Vazul's sons), reigned from 1047 to 1060, reestablished King István's (St Stephen) Christian rule and policies; but he had conflicts with the Emperor as well as his brother Béla, who was to succeed him on the throne. With Polish help, Béla defeated András, who was injured while fleeing from him and died at Zirc. King Béla I (1061-1063) tried to continue the policy of independence from the Holy Roman Empire; but died, while preparing a military campaign against Henry IV. Then more conflicts broke out between Béla's sons, Géza and László; the birth of András's son Salamon, further complicated the conflict. King Salamon, the son of King András I, reigned (1063-1074) with the help of the two princes, Géza and László, the sons of Béla I. He successfully fought the Cumanians (*Kunok*), who were annihilated at Cserhalom (Kerléshegy) in 1068. With the two princes, he also defeated the Greeks (Byzantium) in 1071, pursuing them across the Danube and Belgrade, as far south as Nis, in the following year. However, the cooperation between Salamon and the two princes ended, when the latter opposed Salamon, decisively defeating him in 1074. Salamon recognized László (Ladislás) as King of Hungary, although Salamon allied with the Petchenegs (Besenyők), attacked Hungary, already ruled by László at the time. László defeated the Petchenegs and Salamon was probably killed during this battle in 1087.

**King László I (St Ladislas) (1077-1095).** Under him the dynastic jealousies ceased. In 1091, he successfully added Croatia and Slavonia to the Hungarian Crown. He defeated the Cumanians several times. The ensuing period of peace allowed Hungary to fully extend its frontiers to the crest of the Carpathian Mountains in the north and also to Transylvania (*Erdély*, now in Romania). The Magyar population increasingly moved into the northern areas and the Transylvanian valleys, extending its ethnic borders within the Carpathian Basin. King László's sister, Ilona was married to the King of Croatia. After his death, in difficult times, King László, the closest living relative of the Croatian ruling dynasty, has proclaimed his claim to the Croatian throne, and Ilona has declared support for him. In 1091, Hungarian troops entered Croatia, and it was incorporated into Hungary for 800 years. The further development of the western Christian Church was King László's achievement. He founded a Bishopric in Zágráb (now Zagreb in Croatia) and built a cathedral in Nagyvárad (now Oradea in Romania) in the east. It was also St. László, who paved the way for the canonization of St. István and St. Imre. At the Council of Szabolcs (10 km northeast of Tokaj), he enacted stringent laws for raising ecclesiastical living standards in the Church and in religious life generally. With his bravery, nobleness, chivalry and strong faith he lived as the ideal king in the soul of the Hungarian people. Legends developed around his character and he was canonized by Pope Celestine III. He was one of the greatest kings of Hungary.

**King Kálmán (Coloman) 'the Booklover' or 'Beauclerc' (1095-1116),** elder son of King Géza I, was known for his love of science. King László I (St Ladislas) chose him as his successor. So the peaceful consolidation of the new state, the Kingdom of Hungary, could continue, as it had begun under King István I (St Stephen), interrupted by the era of internecine royal disputes and now resumed under his Kálmán's predecessor, King László I. He showed wise statesmanship in respecting the municipal self-government of certain towns, which was originally granted by King István I. As a lawgiver, King Kálmán relaxed the severe laws introduced by King László I. With one famous statement in his codified law-book, he stood alone in contemporary Europe: *De strigis quae non sunt nulla quaestio fiat.* (Let there be no question of witches, who do not exist). He was an enlightened ruler and showed his abilities in external politics as well, by successfully annexing the Dalmatian towns in 1105, and extending the Kingdom of Hungary to the Adriatic Sea. He was also capable of cruelty, like all medieval rulers of Europe. To ensure that his own son, István, would follow him on the throne, he had his younger brother Álmos and his infant son Béla blinded, because Álmos was aspiring for the throne with his constant rebelliousness. He tried to preserve the peace of his realm against the undisciplined advance guard of the Crusaders (of the First Crusade), passing through Hungary, but he received cordially the orderly forces of Gottfried de Bouillon and even assisted him.

*A second period of internal struggles for power, extension of the hegemony over the Dalmatian coast.* István II (Stephen, 1116-1131) soon launched a war against Venice in 1117, but with little lasting success. Moreover, his struggles along the western frontier of the realm against the Bohemians and the Austrian principalities, did not achieve anything, and his intervention in the disputes of the Russian princes did not lead anywhere. Defeating his domestic adversaries, who were contemplating toppling him, he found the young Prince Béla in hiding and named him heir to the throne, also acquiring a wife for him, the Serbian Ilona (Helena).

**King Béla II (the Blind) (1131-1141)**, through his wife and father-in-law, Uros, the Serbian grand Zhupan, he added a province south of the Sava River to his kingdom. Hence he was named also the King of Rama. Boris, the son of Kálmán's fallen second wife, Euphemia, disturbed the kingdom's peace, whereupon Béla the Blind convoked a meeting at Arad in 1132, and had sixty eight barons, suspected of siding with Boris, cut down. Significant social and economic changes were occurring at this time, which included the disappearance of the clan system; dissatisfaction growing in the new leading classes, (*Ispáns* and other officials), leading to their drive to acquire landed estates, controlled by them only; the privileged position of the serfs (compared to servants), who could still serve as auxiliary troops, supporting an independent kingship and opposing foreign feudal vassalage. The minting of coins, since St István's times, was so successful that they were counterfeited in a number of European countries. In addition to the use of coins, the standard value was represented also by horses and cattle.

**King Géza II (1141-1161)** ruled unchallenged by other claimants to the throne. He was the son of Béla the Blind. It was during his reign that on his invitation, Saxons (*szászok*) settled in Transylvania (*Erdély*, now in Romania) and the Second Crusade marched through Hungary. In 1146, he defeated the Austrian Prince Jasomirgott. He intervened with military force, in the interest of his relatives in Russia, as well as in Byzantium against Emperor Manuel, who maintained that "according to the law, the succession should go to the deceased king's brothers", ruling briefly as "anti-kings":

**King László II (Ladislás) (1162-1163) and King István IV (Stephen) (1163-1165)**. They were defeated by István III (Stephen, 1162-1172), whereupon Manuel offered peace with the condition to send his brother to Constantinople, where he would arrange a marriage between his daughter and Béla, who would be his successor.

**King Béla III (1173-1196)**, István III's brother. During his reign, there were no rivals to the throne. He conducted a campaign into the Balkans and, for a while, occupied the Morava valley, as far as Sofia; he reunited the Dalmatian coast and Syrmia with Hungary, taking them from Byzantium in 1180, and tried to occupy Halic in Galicia for his son András (Andrew). Under him, Hungary became a major European power and among the richest (with the rich gold-mines in the northern and Transylvanian mountains, now in Slovakia and in Romania). His court lived in luxury, especially his first wife, Anne de Chatillon, daughter of Renaud de Chatillon of Antioch, as well as the second, Margaret Capet, sister of King Philipp August II of France. They exerted a French influence on the Hungarian upper class of the time and many young people went to Paris for their higher education. Béla himself was puritanical and sober, but introduced Byzantine ceremonies and official style in his court and encouraged the development of towns.

*Third period of internal struggle for power.* This consisted of the short reign of King Imre (Emeric) (1196-1204), the elder son of Béla III and Agnes Chatillon of France. He spent his reign in continuous disputes with his younger brother, András (Andrew). In 1203, on the banks of the Drava River, there was a near military encounter between the two brothers, when unarmed King Imre (Emeric) went over to András's camp and, simply by his imposing kingly appearance, held everybody present spell-bound. He locked his younger brother into the fortress of Keve and a little later he entrusted to him his own infant son, László III. However, the infant died the next year. Imre took Zara from Venice, with the help of the Fourth Crusade. Under the influence of his French mother and Spanish wife, Constance of Aragon, King Imre became a knightly and

religious ruler; he sided with the Papal party in Bohemia and turned with great animosity against the heretic Bogumils of Bosnia. He assumed the title of King of Serbia and Bulgaria in addition to being King of Hungary and Croatia.

**King András II (Endre, Andrew) (1205-1235).** During his long rule, there were some new social, political and constitutional developments in Hungary. The free nobles were decreasing in numbers relative to the unfree population, mainly engaged in agriculture, after the old, communal clan lands gradually disappeared. St István's extensive crown lands were reduced in size through reckless donations. The land was mainly held in the form of large estates; their owners became the masters of the unfree population, the nobles thus becoming a landed ruling class. The largest estates formed the magnate class. The non-nobles were still regarded a "subject" class, though the town burghers, the Saxon settlers and the Szekler (Székely) Hungarians of Transylvania (now in Romania) were protected by special charters and enjoyed personal freedom. During the same period, politically the Hungarian realm remained an absolutist patrimonial kingship. András, through his extravagant, lavish living and ineffective rule, evoked a near revolt, led by his own son, the future Béla IV, culminating in 1222, when he was forced to issue the renowned Golden Bull (*Bulla Aurea*), the basic charter of national liberties, limiting royal power, especially in granting donations and endowments, banning acts of tyranny, and to all the other points to which he and future kings of Hungary had to swear. The rights of the lesser nobles, old and new (*servientes regis*), were affirmed against the crown, as well as against the magnates. Refusal to obey the King's unlawful commands was legalized. András wasted away much of the royal revenue through his extravagant life-style, also that of his wife, Queen Gertrude of Meran, who was murdered in 1213, (featured in József Katona's drama *Bánk bán*) and by irresponsibly large land grants to his supporters. His father, Béla III, left a large treasure to him for financing a crusade; but András squandered it on his quarrel with his older brother, King Imre. His conducting of the Fifth (his "own") Crusade, on borrowed money from Venice, which was unsuccessful, (he failed to take Mount Tabor and had to give away Zára [Zadar] to Venice in place of repayment), only increased the dissatisfaction and upheaval in the realm. He complained to Pope Honorius III in 1218, about the sorry state of the treasury in Hungary upon his return from the Holy Land. Because of the deterioration of the royal finances, András leased out the national revenue to Izmaelites (Bulgarian Muslims) and Jews. In the general social unrest, Pope Gregory IX mediated a second Golden Bull (1231), which excluded the Jews and Izmaelites from the management of the royal finances and András was obliged to empower the Archbishop of Esztergom to place himself, the country and the officers of the treasury under an interdict, if he did not mend his ways. At nearly 60, the father of St. Elizabeth of Hungary, he had to appeal to Pope Gregory IX for absolution. In 1235, Brother Julianus, a Dominican friar, set out with three brethren to find Magna Hungaria, the land of the Hungarians left behind, somewhere north of the Caucasus (Bashkiria). Julianus eventually reached them and he could understand them. He returned to Hungary with the good news; but because of the approaching Mongol-Tartars, he set out in 1237 to return, and persuade them to join the Hungarians in the Carpathian Basin. He only reached Suzdal, where he learned that the Mongol-Tartars had already swept away the peoples in the Volga region. Julianus failed to save these eastern relatives.

**King Béla IV (1235-1270).** In 1235 Batu Khan sent a threatening letter to King Béla,

calling on him to surrender. In the first few years of his reign, Béla IV instituted a whole series of measures to re-establish royal authority and restore the royal finances, reclaimed the royal lands, irresponsibly given away by his father, King András II (Endre), and enforced the Golden Bull (1222). He also took revenge on the perpetrators of his mother's, Gertrude's, assassination, committed without the knowledge of his father. On hearing about the approaching peril of advancing Mongol-Tartar forces under Batu Khan towards Europe, he invited the Cumanians (*Kunok*) east of the Carpathians to settle on Hungary's Great Plain. Thus, the seven Cumanian tribes (about 100,000 people according to B. Hóman, 1936) not only increased the population of his realm, but also secured a people familiar with nomadic warfare. Early in 1241, the Mongol-Tartar "Golden Horde" did arrive through the Carpathian passes and, in 1241, at the Battle at Muhi, on the banks of the Sajó River, they inflicted a devastating defeat on the assembled Hungarian forces of about 65,000 men-in-arms. The Mongol-Tartars overran the country, causing a terrible devastation. Only some fortified castles, forests in the mountains and the impenetrable swamps on the Great Plain escaped their ravages. Hungary lost about half of its population: about 60% on the Great Plain (*Nagy Alföld*) (in some parts 100%), 20% in Transdanubia (*Dunántúl*); only parts of the Upper Hungary (*Felvidék*, now in Slovakia) and parts of Transylvania (*Erdély*, now in Romania) fared better. However, there occurred an incident with the Cumanians. Many distrusted them, because some Cumanian troops fought along with the Mongol-Tartar Army, and their leader, Kötöny, was even killed. Now the Cumanians left the country for the Balkans causing great devastation. Returning from Dalmatia, where he had taken refuge, King Béla IV set out to rebuild his ravaged realm. He became the "second founder" of the kingdom. He had a network of fortresses built, reorganized the army, brought in new settlers to repopulate the Carpathian Basin, and towns were developed. He was forced to give some magnates a free hand on their own estates and, not surprisingly, some magnate families almost got out of control (the families of Csák, Kőszegi, Aba and Borsa in particular). King Béla IV invited and resettled the Cumanians in Hungary. To ensure their loyalty, Béla had to arrange a marriage between his son, the later István V, and a Cumanian princess, the half-pagan Elizabeth. István V (Stephen) ruled only for two years (1270-1272), but even earlier, in 1265, he had become so powerful, having been made the junior king of the eastern half of Hungary by his father, that he led an armed force against his own father, whom he defeated at Isaszeg. His short reign was taken up by endless fights against the Czech King, Ottokar.

The ethnic map of Hungary in the Carpathian Basin, as early as in the 11th century, reveals its multi-ethnic tendency (well shown by the ethnic map of I. Kniezsa and L. Glaser, 1938). The late 13th century shows this tendency developing even further. Hungarians reached their greatest extent, despite the ravages of the Mongol-Tartar invasion. Bringing in settlers contributed a great deal to this multi-ethnicity: Saxons into Transylvania, Rhineland-Germans into the eastern part of the northern Hungary (Szepesség), the ancestors of the Slovaks into the western part of Northern Hungary and infiltration of the Wlachs (called Romanians since the 19<sup>th</sup> century) into Transylvania, meant that every part of the Carpathian Basin became settled by some ethnic group or another: a colorful patchwork quilt of people. Some French, Italians and Walloons also settled in this "paradise" of Europe. The resulting thousand-year evolution was well shown on the ethnic map of the Carpathian Basin, just before World War I, as it

was constructed by the eminent geographer, Professor Count Pál (Paul) Teleki.

**King László IV (*Ladislav the Cumanian*)** (1272-1290), the son of István V (Stephen). With an army of 15,000, he marched against the Czech King Ottokar, to help out Emperor Rudolf of Habsburg, and won the Battle of Dürnkrut (1278). However, at that time complete anarchy reigned; neither the favorite Cumanians, nor the lords of the land obeyed the law. On the intervention of the Pope, the King summoned a Diet held in Tétény, where he forced the Cumanians to settle permanently. However, he failed to enforce it; consequently, the papal legate excommunicated him and his councilors, whereupon László attacked the Cumanians with armed force and crushed them at Hódtava in 1279. László still did not mend his ways, always camping among his Cumanians, which led to his demise. The Cumanians, hired by the barons, killed the young king, and the Németújvár family, in the west of the realm, invited András III (Endre, Andrew), the grandson of András II, brought up abroad, to ascend the throne.

**King András III (*Endre, Andrew*)** (1290-1301). As the last male member of the House of Árpád, early in his reign he held two Diets to work out legislative ways to combat further deprecation in the realm, although he could not break the power of the oligarchs. He decided to destroy the castles of the oligarchs, whereupon they, together with the Kőszegi family, rose in revolt. András tried to turn the oligarchs against each other; but they started to line up claimants to the throne against him. He changed his Palatines (*Nádor*) seven times. His most reliable followers were the lesser nobility. Royal power became increasingly nominal. András died in the middle of his preparations to subdue Máté Csák by military force. Since he did not beget a son, with his passing, the male side of the House of Árpád died out.

**Interregnum No.1 (1301-1310)**. Nine years of uncertainty followed, combined with anarchy and intrigues to secure the throne. During this time strong oligarchs emerged, ruling over parts of the kingdom without a king. In the western half of the land were Máté (Matthew) Csák, Henrik (Henry) Kőszegi, and Ugrin Csák; in the north-east, Amadé Aba, Kopasz (Bald) Borsa and Miklós (Nicholas) Pók; in Transylvania, László (Ladislav) Kán, ruling as independent powers over their respective areas (Bálint Hóman, 1936). The royal estate policy was swept away and the emergence of a peasant-landowner system developed toward the end of the 13th century, and their former subservience came to an end. The peasantry now became known as “villains” (*jobbágy*; L. Makkai, 1994).

Prematurely, two under-age male heirs apparent were elected and crowned as King by small factions. One in 1300, in the person of Károly (Charles) Robert of the House of Anjou, while András III (Endre, Andrew) was still alive; the other in 1301, in the person of László (Ladislav, formerly Vencel), son of the Czech king, Vencel II. In May 1303, Pope Boniface VIII forbade the Czech king and his son to use the title of King of Hungary and the right to use this title was given to Károly Robert, on pain of excommunication for the entire nation and also bringing to heel the Hungarian Franciscan, Dominican and Pauline Orders, for siding with the anti-Anjou faction. One after the other, all the oligarchs, as well as Prince Rudolf of Austria and Albert of Habsburg filed behind Károly Robert. After two months of internal wars affecting Bohemia, Poland and Hungary, and after the death of Vencel II, László (Vencel) renounced his claim to the Hungarian throne in October 1305. However, he assigned his rights to the Bavarian Prince Otto, handing over the coronation regalia to him. The oligarchs and two of the prelates supported Otto, the Bavarian grandson of Béla IV and,

in 1305 at Székesfehérvár, he was crowned King of Hungary with the Holy Crown. This in turn did not please Pope Clement V, who forbade Otto to use the royal title and power. By 1307, the situation of the Anjou party became increasingly strong, especially after the treachery of the Transylvanian oligarch, László Kán, setting a trap for Otto and imprisoning him. Suddenly, the various claimants disappeared, leaving Károly Robert as the only candidate for the Hungarian throne. He was even crowned earlier, in 1300, for the first time. The majority of Hungarian people were happy with Károly Robert as their King. He was by now aged 19, but his untroubled reign was still not secured. Cardinal Gentile, the Papal Legate, had the task of fully winning over the three imperious oligarchs, László Kán, Henrik Kőszegi and the palatine, Máté Csák. Pope Clement V sent Fra Gentile to Hungary to secure and finalize Károly Robert's (Charles Robert) kingship, and the cardinal arrived in Zagreb in September, 1308. With his firm, but tactful conduct he succeeded in winning over the majority of the prelates, clergy and monastics, and at the same time coming to terms with the most imperious and dangerous oligarch, persuading them to recognize Károly Robert as the King. Gentile decided to convoke a mixed council in Pest, where he made a compromise with the lords and nobles about the question of succession or election. Károly Robert was proclaimed King and, on 15 June 1309, he was crowned King of Hungary a second time, not with the Holy Crown, but with a newly prepared, splendidly decorated one. However, the Magyars were still dissatisfied. Cardinal Gentile seriously threatened László Kán, the obstinate oligarch of Transylvania, who finally returned the ancient regalia and the Holy Crown, with which Károly Róbert was crowned for the third time on St Stephen's day, 1310, by Tamás, the Archbishop of Esztergom, in Székesfehérvár (B. Hóman, 1936).

### **Angevin Kings from the House of Anjou.**

***Károly Robert (Charles Robert) (1310-1342).*** The first foreign king in Hungarian history. Károly Robert had no foreign throne and grew up a true Hungarian. He proved himself a capable ruler, who was 22 by the time of his third coronation. In his first years, he set out to crush the most rebellious oligarchs (*kiskirályok*, kinglets) and succeeded in winning over the others. The rest of his reign was no longer questioned and there was lasting internal peace. He set up his court at Temesvár (now Timișoara in Romania), at least for the time being, far from the power centers of the oligarchs, and it was there that he started to organize his first army, which developed into his efficient militia system (*Banderium*). The landed gentry, who had suffered most from the despotic oligarchs and the landowning nobility, from various parts of the realm flocked in hosts to his service, especially from the Great Plain. The Cumanians also joined to him willingly. To overcome the resistance of the oligarchs, he used the policy of *divide et impera* (divide and rule) among them. Gentile was forced to place the oligarch, Máté (Matthew) Csák, under interdict because of his attack on the King and the Church, divesting him of his office as Lord Chief Treasurer. Károly Robert appointed his own trusted men to a series of high offices. By late 1311, all the barons were in his camp, except Máté Csák and László (Ladislás) Kán. One of his chief endeavors was to recover the royal estates wherever possible; another main aim of his was to restore order everywhere. In 1330, Károly survived an assassination attempt by Felicián Zách in the presence of his entire family, Queen Elizabeth and his five sons. He also created a new financial system, had

valuable gold florins (*forints*) minted, promoted the Hungarian mining industry, and introduced a permanent taxation system. All these policies of Károly paved the way for his successor's, Louis the Great's, active external politics. He improved the juridical system in his realm. His great prestige in Central European countries is best shown the way he organized a "summit meeting", held in his capital, Visegrád (north of Budapest) in 1335, when he was 47. Gathered in his sumptuous Gothic palace on the banks of the Danube, surrounded by a citadel and riverside fortifications, were the Polish and Bohemian kings, heads of several principalities, and a delegation from the Teutonic Knights. They discussed far-reaching agreements, especially in the economic sphere, mapping out new roads and extending mutual advantages to one another. The Visegrád meeting of nations was Charles' greatest diplomatic feat (I. Lázár, 1989). He drove the Austrian and Czech marauders out of the western part of his realm, at the same time maintaining friendly relations not only with Poland, but also with Bohemia and Austria. He developed congenial relations with Bosnia in the south; but he lost Dalmatia to Venice, other areas to Serbia, also to the newly emerging Wallachia (now Romania). Basaraba, the Vlach voivode of Wallachia, pretending to render homage to Károly, treacherously set a trap for him and his troops in a deep gorge of the Southern Carpathians. The king only narrowly escaped death, thanks to the self-sacrifice of one of his leading men, Dezső Hédervári, who exchanged his suit of armour and weapons with his king. So Károly's attempts at expansion met only with moderate success.

***Louis the Great (Nagy, Lajos) (1342-1382).*** Louis is best known for his long series of victorious military expeditions into the surrounding parts of Europe, and combining this with further raising of the living standards, internal order and cultural level, shaping Hungary into a major power. Early in his reign, he led two campaigns against Naples (1347 and 1350) to take revenge on Queen Johanna for the murder of his younger brother, András (Endre, Andrew). On both occasions, Lajos occupied the Neapolitan Kingdom. For the ownership of Dalmatia, he led three campaigns against Venice, one of the leading powers at the time, forcing Venice to forgo the Adriatic coastline of Dalmatia and, in the Peace of Torino of 1381, was bound to pay 7,000 gold in tax annually to Hungary. His Balkan campaigns won him a substantial part of the peninsula. The Serbian and Bosnian principalities were forced into submission and the Voivode of Wallachia (the original region of Romanians) was forced to recognize the Hungarian overlordship. During these Balkan campaigns he also conquered Bodon and founded the Bulgarian Banate. In 1363, he won a victory over the Ottoman Turks. Not only did he serve Hungarian interests with these conquests, but he also helped the Roman Church by hindering the spread of the Bogumil heretic doctrines. On several occasions, he helped out the Poles against the Lithuanians and the Tartars. When, in 1370, the Polish King Kazimir died, the Polish throne was taken by Lajos and, in this personal union the two countries formed the largest power in East Central Europe. His peaceful internal development of Hungary helped to develop the internal strength of Poland as well. To further strengthen the defense capabilities of the realm, he extended the efficiency and strength of his army by the militia system; by promulgating the law of entailment, the tithe to the Church and the statute of the ninth (of the peasant's produce given to the lord) enacted in 1351, he secured the financial requirements for national defense. In the interest of the development of industry and commerce, he promoted the town burghers by providing them with various privileges, giving staple rights to some towns. In 1367,

Lajos founded the first University in Hungary, at Pécs. He had no son, so, before his death, he had his elder daughter, Mária (Mary), recognized as queen by the Hungarian Estates. During his reign, the Kingdom of Hungary reached its greatest extent: from the Adriatic Sea in the west, to the Black Sea in the east, and in the north reaching well beyond the Northern Carpathians, having a common border with the Teutonic Knights in historic East Prussia. All these territorial gains served his personal glory. Huge sums of money were wasted on all his conquests, instead of using it for the improvement of the social life of his common subjects. Both Angevin kings were basically enlightened despots and not born bureaucrats; they introduced elements of feudalism mainly in the military system: a banderium for each lord.

***Interregnum No. 2 (1382-1387) – Succession struggles.*** Although Lajos designated his elder daughter Maria (Mary), betrothed to Zsigmond (Sigismund of Luxembourg) to follow him on the throne, the lords of the realm were not glad at all, since they found the succession along a female line an anomaly. To make things worse, Mary's rule was challenged by Charles Durazzo, King of Naples, and his adherents. He was supported by many of the lords and nobles. He landed in Dalmatia to assert his claim and he was crowned King of Hungary as Károly II (Charles), late in 1385, after forcing the Queen and her mother (Lajos' consort, Queen Elizabeth) to acquiesce to his rule. A period of civil strife followed. Károly II was assassinated by agents of Queen Mary and her mother, just 39 days after his coronation; however, the two queens were taken captive. The Palatine, Miklós Garai, was killed; and only a few months later, the Queen Mother Elizabeth was strangled by Garai's men. Since Károly II was deceased and Mary had been captured by some lords in the south of the country, in this troubled period, the Estates considered that it was the right time for Zsigmond to be recognized as King of Hungary. A number of lords, "acting in the name of the Holy Crown and in the interests of the kingdom", offered the Crown to the Margrave Sigismund, whose wife was Mary, Lajos' elder daughter, and he himself, the son of the Holy Roman Emperor Charles IV (J. Bak in P. Sugar, ed., 1994). After freeing his wife, Zsigmond had himself crowned as his wife's, Mary's consort in 1387. They ruled together for eight years and, after Mary's death in 1395, he ruled alone until his own death in 1437.

***Zsigmond (Sigismund of Luxembourg), King of Hungary 1387-1437;*** succeeded to the title of King Sigismund of the Romans in 1410; succeeded to the title of Duc de Luxembourg in 1419; succeeded to the title of King Sigismund of Bohemia in 1419. He was crowned Holy Roman Emperor in 1433. From 1379 (aged 11), Zsigmond lived in the Court of the Hungarian King Lajos I (Louis the Great), and was crowned King of Hungary in 1387. He was the cleverest ruler of his age and an outstanding diplomat, but no military leader and no manager of his realm's finances. In Hungary, his reign marks a downhill slide in the shadow of the previous two strong rulers. His foreign court, his prodigality and his autocratic rule made him unpopular and the Hungarian Estates soon turned away from him; Kont and his men staged an uprising in 1393, which he quelled; and all this happened in these times of an approaching threat for all Europe. The first incursion by the Ottoman Turks occurred in 1389. As a result, seven years later, Zsigmond conducted a veritable crusade of his own, with considerable western help. He started to lay siege to the fortress of Nicopolis (now in Bulgaria), but Sultan Bajazid's forces, hurriedly sent there to relieve the siege, inflicted a heavy defeat on Zsigmond's army on 28 September, 1396. This was the first major clash between Western

Christianity and the Islamic Ottoman Empire. His extravagance and despotic rule led to a new working procedure in statecraft: the principle that the consent of all the privileged classes present in the Diet was necessary for the grant of any required subsidy or additional tax. In later times, it was followed by any legislation in Parliament. The frequent and prolonged absences, as a result of being Holy Roman Emperor at the same time, created a peculiarly Hungarian institution of the Palatine, who represented the King during his absences and also acted as intermediary between the King and the nation. The neglect of the interests and businesses of the realm went so far, that in 1401 dissatisfied lords captured him and locked him up in the castle of Visegrád and later in the castle of Siklós. He was only allowed out after half a year and only after his promise to change for the better. He did not learn a lesson from his imprisonment. He put all his energies into acquiring the Czech crown, while his Hungarian crown was again in danger: László (Ladislav) (Hungarian) King of Naples, appeared as a claimant to the throne, and he could only be driven out with difficulty by Zsigmond's men. Since László was supported both by the Pope and by the Hungarian episcopacy, in 1404 he forbade the announcement of any kind of Papal Bull or Papal Letter (*Jus placeti regii*). On 31 May 1433, he was crowned in Rome, Holy Roman Emperor, by Pope Eugene IV, but his high office was not much help for Hungary, because his problems and troubles abroad took him away from his duties in Hungary. In 1412 Zsigmond decided to get Dalmatia back from Venice and he could only get the required finance by pawning 13 towns of the Szepes area of the Northern Hungary, (now in Slovakia) for 80,000 forints to Poland. From 1414 to 1418, he was working to heal the Western Church schism, but since, at the Council of Constance, he did not prevent the burning of John Hus, in turn the Czechs invaded Zsigmond's countries, including Hungary, causing a great deal of devastation in the whole of the northern area. In 1428 he led another military campaign against the Ottoman Turks, laid siege to Galambóc (Goluba) south of the Danube, but he was again defeated. Under the effect of the Turkish menace, in 1435, he strengthened Hungary's national defense. In the last year of his 50-year long reign, in 1437, a large-scale serf (*jobbágy*) uprising broke out in Transylvania.

**King Albert (Albrecht) (1437-1439).** He was the first King of Hungary from the House of Habsburg. In 1422 he married Zsigmond's and Borbala Cillei's daughter, Elizabeth. After Zsigmond's death, the Hungarian Estates proclaimed him King. Because of his lengthy absences, dissatisfaction broke out and the 1439 Diet of May emphasized toward him his wife's right of succession, limited the King's right to appoint a Palatine, and relaxed the nobility's obligations for national defense. Hearing about an approaching Turkish attack, Albert assembled an army, went against them and warded off their advance, so they were unable to ravage the country as in previous years; however, he could not save the Castle of Szendrő (northeast of Rudabánya); dysentery broke out in his camp, he himself died at Neszmély on the way to Vienna, in 1439.

**King Ulászló I (Wladislaw of Poland's Jagellonian line) (1424-1444).** As grandson of King Lajos I (Louis the Great), he was elected King, in opposition to the infant László (Ladislav) V, by the gentry and a section of the Estates. He entered the realm in 1440. Despite the intrigues of László V's mother, who fled to Emperor Frederick III, pawned the crown and, with the money thus obtained, she organized mercenaries, their leadership given to the Czech Giskra (Jiskra) who, with these troops, occupied and ravaged the entire Upper Hungary (*Felvidék*, now Slovakia). Ulászló got the kingship of Hungary,

mainly with the generous support of the famous military leader, John Hunyadi, who successfully defended the realm. Hunyadi scored several victories over the Ottoman Turks and, during the long campaign of 1444 he penetrated into Serbia and Bulgaria, whereupon the Turkish sultan asked for peace (the Peace of Szeged). This was broken by Ulászló, who was urged by Pope Eugene IV and other influential westerners to resume military action against the Turks. He did launch a new campaign in the Balkans against the Turks, coming to a major clash with Sultan Murad's forces at Varna, on the Black Sea coast, on 10 November 1444. Ulászló lost the battle and fell, together with Cardinal Cesarini; Hunyadi barely escaped with his life (J. Bak in: P.F. Sugar ed., 1994).

**János (John) Hunyadi (1385-1456).** He was Regent and military leader of the kingdom, and had two famous sons: László and Mátyás (Matthias Corvinus). He was appointed Regent by the Estates, and guardian of the young László V (Ladislav), who ruled as King from 1453 till 1457, collaterally during Hunyadi's regency. Having seen the weak state of the kingdom, the Turkish Sultan Murad II, since Zsigmond's death, prepared a major assault on Hungary. But the great general, John Hunyadi stood in his way to achieve his grand plan, which included the capture of Vienna as well. Hunyadi kept up the defense of Hungary for some 15 years, in the face of more and more difficulties: jealous magnates' intrigues against him, harassment by the Czech condottiere Jan Giskra in the northern part of Hungary, and the encroachment on the western strip of the kingdom by Emperor Frederick III. However, the general populace in Hungary was devoted to Hunyadi, regarding him as their idol. When the selfishness and materialism of the lords led to the splitting up of the kingdom into seven autonomous areas, Hunyadi, as Regent, united them again in one realm, under his command. His crowning achievement came on 21 July 1456, the recapture Belgrade (Nándorfehérvár), the important town and fort south of the Danube, from Turkish occupation. He fought at the helm of his troops like a lion and one of his knights, Titus Dugovics, on top of the turret of the fort, snatched the Turkish flag from the hands of a Turk, dragging him down with himself to the depths, both of them dying. Hunyadi contracted a fever and died days afterwards, bringing about a brief interregnum (of two years) in the history of Hungary.

**Interregnum No. 3 (1456-1458).** Hunyadi's elder son László, was treacherously assassinated in Buda in 1457, out of jealousy, by Ulrich Cillei because of the popularity of the Hunyadi men. At the same time, Ulrich Cillei had John Hunyadi's younger son, Mátyás, imprisoned in Prague. Albert of Habsburg's son, László V (Posthumus), under the adverse influence of his uncle, Ulrich Cillei, suddenly died in Prague in 1457, to where he had fled, fearing revenge from Hunyadi's men. The whole Hungarian people: lords, nobles and commoners were becoming increasingly tired of years of foreign rulers and internal dissensions. The situation came to a head, when Erzsébet (Elizabeth) Szilágyi, the mother of John Hunyadi's younger son Mátyás, succeeded, by financially and militarily helping the quest, in extracting Mátyás from imprisonment by Ulrich Cillei, (who himself was cut down by László V.'s men earlier). On 24 January 1458, a great assembly of nobles gathered on the frozen Danube at Buda and declared him King, crowning him soon afterward amid nationwide rejoicing. The people of Hungary at last had a national king again.

**King Mátyás I (Matthias Corvinus) (1458-1490),** called "Corvinus", because his crest illustrates a raven. During the 32 years of Mátyás' rule, starting at age 18, Hungary again became a leading power in Europe. He proved to be the most popular king in

Hungarian history. His court developed into one of the centers of Renaissance in Europe. The population of Hungary in the Carpathian Basin reached 3.5 million, the same as the population of contemporary England. Out of 3.5 million, 75-80% were Hungarians, from the foot of the High Tatra in the north, to the Lower Danube in the south, from the Austrian border to the eastern corner of Transylvania. With his excellent military abilities, Mátyás soon established a standing army of mercenary soldiers, his famous and feared “Black Army” (*Fekete Sereg*). With his strong royal power, backed by the devotion of the nation, he broke the independent regional rule of the magnates. Garai, Ujlaki and his own uncle, Mihály (Michael) Szilágyi offered the crown to Emperor Frederick III; but Mátyás went with his army against them, defeated them, and Frederick was forced, by the Peace of Wiener Neustadt (1460), to hand over the Holy Crown for a ransom. It is then, that he had himself crowned ceremoniously. Soon, with all his force he turned against the Czech Hussites, who kept the whole of Northern Hungary occupied, seized their robber strongholds, and their leader Giskra was forced to pay homage. In 1468, Mátyás made war against the Czech king Podiebrad; he was crowned King of Bohemia in Brünn (Brno), but the war was dragged out over a decade, because Podiebrad allied himself with Poland. Finally the Czech and Polish kings personally asked Mátyás for an armistice. At the Peace of Olmütz (1478) Mátyás annexed Moravia, Silesia and Lausitz, and was recognized as the King of Bohemia. Before the end of this long war, he also went to war against Frederic III and annexed Austria, including Vienna (which he entered in 1485), and also conquered Steiermark in 1479. At the same time, he kept the Ottoman Turks at bay with successful battles in the south: Sabac (1476), Verbas (1479); he scored his greatest victory at the battle at Kenyérmező on the banks of the Maros River, near Szászváros (now Oraştie in Romania) on 13 October 1479, where his troops were led by Pál (Paul) Kinizsi and István (Stephen) Báthori. After all these battles, he made peace with Sultan Bayazid in 1483.

All these vigorous and complex foreign political activities were made possible by Mátyás’ complete reorganization of the internal order and structure of his kingdom. Being a brilliant administrator, he instituted large-scale financial reforms, which rendered it possible for him to wage all the wars. He listened to and considered his council’s opinions. He convoked the Diet regularly. At the Diet of 1486, he introduced reforms also in the administration of justice, enforcing justice with an even hand and introducing new legislative procedures. He considerably increased the sphere of authority of the counties, which were established back in St István’s reign; and also regulated in detail the rights and tasks of the Palatine. His secretaries formed his real instruments of government, who were picked by him, were relatively young and even of humble origin. His much-increased taxation did not seem to have detracted from his widespread popularity. He was heavy-handed, especially to the magnates. To the common people, he was their protector, especially towards the imperious barons.

In addition to his mercenary standing army of 30,000 men, he kept the royal banderium for use against internal enemies and troublesome neighbours, as well as the *militia portalis*. The standing army consisted largely of heavy cavalry with a rather large proportion of infantry; artillery and engineer corps was also included. There was a flotilla for use on the Danube on occasion.

He was devoted to the trends of Renaissance art and literature. He cordially received their representatives at his Court. He himself was interested in various disciplines of

science and arts, and liked to read the works of Greek and Latin authors. His devotion to culture is best proven by his creation of the famous Corvina Library (*Bibliotheca Corviniana*), unique for that age in Europe, consisting of 170 extant codices, 154 Latin manuscripts and 8 bundles of incunabula. To the University of Pozsony (now Bratislava, Slovakia), which he founded, he invited well-known scholars from abroad. It was during his reign that the first Hungarian book-printing workshop was established in Buda in 1473, earlier than in Austria, Spain or England.

He died, probably poisoned, in Vienna in 1490, without a son. His first wife, Katalin Podiebrad, died early and the marriage by his second wife, Princess Beatrix of Naples, had no offspring. He wanted to make his illegitimate son, János (John) Corvin his heir, but he failed to succeed in this.

### **House of Jagello of Poland (1490 – 1526).**

**King Ulászló II (Wladislas ) (1490-1516).** Hungary was plunged from a position of leading power in Europe into a state of national decay during the reign of Ulászló II. The strength and resistance of the kingdom was almost exhausted by the rivalry of the magnates and the gentry for power, the chaotic financial conditions and the peasant uprising of 1514. The magnates, just recovering from a heavy-handed ruler like King Mátyás (Matthias Corvinus), wanted a weak king and they succeeded in this: they secured Ulászló II, the King of Bohemia, who was a notorious yes-man. Ulászló was the grandson of King Albert (Albrecht) of Hungary and he had been warring with King Mátyás for years because of the Hussites. Emperor Maximilian I took back his lost provinces, though his “Holy Roman Empire” also failed, both as an empire and as a German nation. The magnates dissolved the Black Army of mercenaries, neglected the kingdom’s fortresses, especially those in the south, facing the danger from the expansionist Ottoman Turkish Empire. Ulászló was the helpless puppet of the magnates, selfishly fighting for more and more power. Before he was crowned King of Hungary, he promised that he would cancel Mátyás’ reforms and indeed, nearly all were cancelled and innovations, especially the one gold-forint tax; the various high positions and those of Church dignitaries would only be filled upon the advice of the lords and prelates; and all the decisions they made, he would carry out. He recognized the succession of Maximilian’s male descendants for the Hungarian throne, by an agreement involving mutual intermarriages between the two ruling Houses. This agreement was made over the heads of the Hungarians. At the same time, the Diet in 1505 passed a resolution never again to accept a foreign king.

**Zápolya, János (John, Szapolyai) (1487-1540),** Voivode of Transylvania, already appeared as the candidate of the “national party”. The peasants were grievously oppressed, resulting in a large-scale peasant revolt in 1514, led by the Szekler officer György (George) Dózsa. They rose against the nobility high and low. Masses of peasants and towns people (disillusioned ever since the Diet of 1495) were streaming over the Great Plain from Pest to Temesvár. Lőrinc (Lawrence) Mészáros, a parson from Cegléd, was their fiery orator. The movement became increasingly a war of liberation from the rule of the magnates. They were threatening the nobility with extermination. The worked-up masses demanded the distribution of land, murdered owners of large estates and prelates (e.g. the treasurer István Telegdi, Bishop Miklós Csáky), and castles were set on

fire. The uprising was put down with brutality led by Zápolya. Dózsa's execution was an unspeakable horror. He was seated on a red-hot iron throne, with a glowing iron crown on his head. The position of the peasantry substantially worsened in the Diet of 1514, which sentenced them to 'perpetual servitude', binding them irrevocably to the soil (*glebe adstricti*), increasing their dues and obligations. In the very same year a distinguished lawyer, István (Stephen) Werbőczy wrote the *Tripartitum*, a statute book code of law, probably commissioned by the king, which included these repressive measures, set down rigidly and firmly for centuries. When Ulászló II died, his nine-year old son Lajos was proclaimed King of Hungary, as Lajos II (Louis).

**King Lajos II (Louis) (1516-1526).** In the Diet of 1516, Lajos was declared an adult, a Royal Council was assigned to to him, and he became the King of Bohemia and Hungary in one person. He was reared amidst frivolous entertainments, so he did not take his kingly duties seriously. He married Maria Habsburg, the granddaughter of Emperor Maximilian. Lajos was incapable of ruling over a country. The realm was in anarchy and it was the scene of bitter struggles between the nobility and the gentry. The finances of the state revealed miserable conditions and financial abuses, with senior officers of the Royal Court unscrupulously putting official moneys into their own pockets, plunging the Court and the realm into ruin. The king had to borrow money to drink a glass of wine, and lived on meat bought on credit. At the Diet of September 1524, the gentry openly raised an outcry against the magnates of the land, while the great constitutional lawyer, István (Stephen) Werbőczy, made a long list of all the losses Hungary had suffered since the death of King Mátyás (1490). Under these conditions, it is not surprising that the Ottoman Turkish threat became increasingly serious. In 1521, the new sultan, Suleiman the Magnificent, attacked and took Belgrade, Zimony and Sabac, which formed the southern defense line of Hungary. Pressing further north, in 1526, he took Pétervárad and Eszék. There were urgent calls for the reestablishment of a standing army, but no magnate was prepared to foot the bill. In the 1525 Diets of Rákos and Hatvan, there were many voices urging the King and his Government to remedy the situation. The young King could not save the realm without money and an army. He called the nation to arms, but the men were only straggling to the king's banners. Finally, 25,000 assembled and the King put the Archbishop of Kalocsa, Pál (Paul) Tomori at the head of the army. Listening to the general feeling, the Commander-in-Chief with his small forces, mainly foreign mercenaries, one-third the size of the Sultan's army, threw himself against the Turks with some initial results on the fields of Mohács, on 29 August 1526. The battle lasted two and a half hours, and the Hungarian Army was annihilated. Most of the Army, including lay and Church dignitaries, fell, together with the King, who drowned in the Csele Creek. With him the Hungarian branch of the Jagellonian House died out. The Kingdom of Hungary's fate was sealed.

**Hungary split up into three parts and the age of national struggles began (1526 – 1711).**

**Age of Ottoman-Turkish occupation of the center of the realm (1526-1686).** The Kingdom of Hungary was in extreme peril after the crushing defeat at the Battle of Mohács, wedged between the calculating, but nominal Holy Roman Empire in the west, and the expanding Ottoman Empire, under a brilliant young Sultan, in the southeast.

Sultan Suleiman did not believe that he had already defeated Hungary. He supposed that the defeated army at Mohács must have been only the Hungarian vanguard. He moved up with his army along the Danube as far as Buda, but then he withdrew south of the Sava-Danube line. After the defeat at Mohács, the Hungarian gentry elected a national king: János (John) Szapolyai (or Zápolya), the Voivode of Transylvania, crowned with the Holy Crown at Székesfehérvár.

**King János I (John) János Szapolyai (or Zápolya) (1526-1540).** The Hungarian nobility and the magnates placed Ferdinand I (1526-1564), Charles V's younger brother, on the throne to obtain the support of the already powerful House of Habsburgs against the Turks. Ferdinand defeated King János's army at Tokaj. Thus the Kingdom of Hungary split into three parts. The areas ruled by the two kings and, between them, the central area occupied by the Ottoman Turks. During the 15-year vacuum period (between 1526 and 1541), Suleiman made several attempts to capture Vienna, without success. In 1527, a year after the Hungarian defeat, Suleiman, with his army, reappeared on the fields of Mohács and ordered János Zápolya, who had an army of about 40,000 men in the eastern part of the realm, to pay homage to him by kissing his hand. In 1529, the Turkish Janissary forces seized the fortified castle of Buda from Ferdinand I.'s forces by a cunning ruse and handed Buda over to King János, together with the Holy Crown, which Suleiman had obtained in the meantime. During this vacuum period in the Carpathian Basin, and for some time after, the Fuggers, a German merchant and banker family, entered into contracts for the right to work the silver and copper mines Upper Hungary (the present Slovakia), swinging from one king to another, depending on the political situation. Later, the two kings came to a compromise, recognizing each other's kingdom, which led to the Peace of Nagyvárád (now Oradea in Romania) in 1538, and declared that, after János's death, the eastern part of Hungary would pass to Ferdinand of Habsburg, who ruled over the western part, with the middle part under Ottoman Turkish occupation. Shortly afterwards, John married Princess Isabella of Poland and, in 1540, his son was born, János Zsigmond (John Sigismund), just before János died and before he had made arrangements for his son to inherit the Hungarian Kingdom. Suleiman, having taken Buda in 1541, securely in charge over the middle part of Hungary, now sent the infant and his mother to govern the eastern parts, though it was Frater György (Padre George) (1482-1551), who governed during János Zsigmond's minority. From 1556 until his death János Zsigmond was ruling personally over Transylvania and other eastern parts of Hungary.

In the meantime, from 1521, Ferdinand I (1526-1564) became the ruler of the Habsburg hereditary provinces, and married Princess Anna, the daughter of the Hungarian king, Ulászló II (Wadislav). He was unable to obtain the whole kingdom for himself, even by military force, after Suleiman took Buda and helped King János I to rule in the east, thus finalizing the division of a Hungary in three parts. Ferdinand could only rule over the western strip and Upper Hungary part (*Felvidék*, now Slovakia). Especially earlier in his reign, he adopted an understanding attitude toward his Hungarian subjects. In 1527, he instituted a Council of governors-general for the administration of the land and, in 1528, he instituted the Royal Treasury to handle the finances, all centrally directed from Vienna. From 1556 he was also Holy Roman Emperor and, before he died in 1564, he had his son, Miksa (Maximilian) crowned as King of Hungary in 1563, ruling

till 1576.

**King János II (John) (János Zsigmond; John Sigismund) (1559-1571)** had lengthy struggles with Maximilian for the possession of Partium, the eastern strip of the Great Plain (Alföld), west of Transylvania (now in Romania). He did a lot for the strengthening of the Hungarians' position in Transylvania, though he made serfs of the Szekler commoners, and he had to suppress the Szekler (Transylvanian Hungarian) uprising in 1562. He introduced the Hungarian language for the enactments of the legislature. How successful János Zsigmond was in his external politics is best shown by the fact that, at the Peace of Adrianople of 1568, the Turkish Sultan Selim II recognized the independence of Transylvania; and in the Treaty of Speyer (1529), Maximilian recognized him as the Prince of Transylvania (but not as King of Hungary) and relinquished Partium to him.

**The three parts of Hungary lived three entirely separate lives, especially from 1550 on.**

(1) The western and northern parts, belonging to the Habsburgs, became a border region to the hereditary provinces. The Hungarian population in this third had the task of defending the unstable borderline, dotted with a long chain of border fortresses, facing the Ottoman Turkish central part. For a century and a half this military frontier experienced the "wars of the border fortresses" as they were known, carried on by such valiant men as István (Stephen) Dobó, in the defense of Eger in 1552; György (George) Szondy fell as the captain defending the castle of Drégely in 1552; István (Stephen) Losonczy, captain of the Temesvár fortress, fell in its defense, decapitated, in 1552; Miklós (Nicholas) Zrinyi fell in the defense of Szigetvár while making a last-ditch burst from the fortress on 8 September 1566, where the besieging Suleiman the Magnificent himself died suddenly in his tent. During this time of wars, the independence of Hungary was ever more diminishing. Matters of defense, finance and external affairs were directed from the Habsburg Court in Vienna. The Hungarians were getting increasingly dissatisfied with the Habsburg rule, feeling exploited as mere subject people. Vienna regarded them as truculent rebels. After Maximilian's rule, Rudolf (1576-1608) made things even worse with his dislike of the Hungarians. He neglected his royal duties and created chaotic conditions. The religious upheaval caused by the Reformation movement further complicated the situation. The Magyars converted to Calvinism, the German settlers in Hungary became Lutherans. The Counter-Reformation of the Roman Catholic Church, with its leading figure, Cardinal Péter Pázmány, appeared only in the early part of the 17th century.

(2) The middle part of Hungary, under Ottoman Turkish occupation and rule, was worst hit. Its population on the Great Hungarian Plain, especially in the villages, was depopulated to a large extent; only the market towns fared better, to which the population of the smaller settlements withdrew for protection as much as possible. These were surrounded by vast uninhabited tracts of land, the result of fleeing populations. The Turks cut down large numbers and kidnapped thousands of Hungarian children to be raised in Janissary schools and to be trained for the Turkish army. The Great Plain in the middle of the Carpathian Basin, without the protection of the Carpathian Mountain Chain, was fully exposed in the south to invading Ottoman Turks, or later, to the aggressive settlement of hosts of northward-migrating Serbs, fleeing from Turkish occupation. The declining and

in some areas fully wiped out Hungarian populations would later be replaced by these Serbian masses, as well as with German settlers, Croatians and infiltrating Wlachs (now called Romanians) from the southern and eastern outskirts of the Carpathian Mountains. All these repopulating schemes of the devastated areas significantly altered the ethnic composition of the Great Plain, Transylvania, and the southern parts of Hungary. The economic life was increasingly retrograde and the culture of the Kingdom fell back by centuries. At least acknowledgement must be given to the Turkish administration of the central part of Hungary. It was oppression, but it was sensible and well managed; it did not cripple the remnant population of the region. Militarily and politically, the middle part of Hungary, conquered by the Ottoman Turks, suffered not only a series of defeats; there were also uplifting victories. After the heroic feat of Zrinyi at Szigetvár in 1566, with the Sultan Suleiman dead, his army withdrawing and followed by a weaker Sultan, Selim II (1566-1574), the Turkish rule started to wane, especially after the naval defeat at Lepanto, off Greece, on 7 October 1571, ending the myth of Turkish naval invincibility. It looked almost as if the Turks could be driven out with the joint forces of Habsburg Hungary, with assistance from abroad and Transylvania, at the time under the strong leadership of István (Stephen) Báthory.

(3) The eastern part of the realm, made up of the Partium and Transylvania (Partium and Erdély, now in Romania) spent the age of the trisection of Hungary in a state of semi-independence. National liberties and traditions were preserved, but mostly under Ottoman Turkish suzerainty, dependent on the “Sublime Porte” of the Turkish Sultan, who also tried to avoid interfering. The fate of Transylvania depended largely on the strength or weakness of its Princes. It was well run, with good conditions; under the strong leaderships of Princes István (Stephen) Báthory, István (Stephen) Bocskay, Gábor (Gabriel) Bethlen and György (George) Rákóczi I. However, there was misery under selfish and careless princes, like Zsigmond (Sigismund) Báthory, Gábor (Gabriel) Báthory and György (George) Rákóczi II. During the age of the partition of Hungary, Transylvania, as a principality, developed its own constitutional system, based on (1) political representation of the three so-called “nations”: the Hungarian nobles, the Szekler Hungarians, and the Saxon settlers; and (2) on religious freedom and equality among the four “received” Christian denominations (*recepta religio*), the Roman Catholic, the Calvinist, the Lutheran and the Unitarian. The religious freedom was enacted by the Diet of Torda in 1568, the first in the world. Even before the disastrous defeat for Hungary at Mohács in 1526, the Protestant doctrines won wide acceptance, Calvinism becoming dominant among the Hungarian population of Transylvania, while the Germans and some of the Slovak ethnic pockets adopted the Lutheran form of Christianity. This religious division inevitably brought a great deal of political upheaval for Transylvania. The humanism and Renaissance, spreading into the 16th century, also affected Hungarian culture, despite the Turkish occupation and the division into three parts. Renaissance taste was manifested in carved doors, window frames and tombstones, in the design of the fortified castles, such as those at Komárom, Érsekújvár, Pozsony (now Komarno, Nové Zámky, Bratislava in Slovakia), Győr and Eger in the northwest region, and also in Transylvania, in fortresses such as Várad (Nagyvárad), Szamosújvár and Fogaras (now Oradea, Gherla and Fagaras in Romania). Sárvár was famous for its printing press, established in 1537, where the first book in Hungarian was published in 1541. It was the New Testament in János Sylvester’s translation. During the 16th century, about 850

books and other publications were put out by the twenty printeries of Hungary. Protestantism spread in Hungarian towns, followed by the estates of magnates and nobles, because they employed Protestant preachers. Their arguments were convincing to the congregations and their keep and ceremonial requirements were relatively cheap. Many members of the popular Franciscan Order supported the Reformation, followed by many converts; the first Hungarian reformer, the “Hungarian Luther”, Mátyás (Matthias) Dévai Bíró, was himself a Franciscan earlier in his life. Péter Melius Juhász, Bishop of Debrecen, a popular Calvinist leader in the 1560s, held heated theological debates with Ferenc (Francis) Dávid of Kolozsvár (now Cluj-Napoca, Romania). Dávid spread Unitarianism and he was also the protégé of János Zsigmond. There were a few years of relative quiet in the Carpathian Basin, including the beneficial rule of the great general, István Báthory (1571-1586), who was also Prince of Transylvania and King of Poland. This combination of the two countries under his rule enabled Báthory to be an equal opponent to the Habsburg Maximilian and to defend Transylvania.

War broke out again in 1591. During the “Fifteen Years’ War”, King Rudolf’s Imperial Army entered and occupied Transylvania and Upper Hungary, allowing its commander, Georg Basta, to act with such extreme cruelty toward Hungarian Protestant nobility that István (Stephen) Bocskay (1557-1606), formerly a Habsburg supporter, started a revolt. He speedily assembled an army out of the Hajdús (*Hajdús* or heyducks were herdsmen and peasant escapees from villages devastated by the Turks, or from oppressive landlords’ estates), and drove out Basta and the Wlach Mihály (Michael) Vitéz (Michael the Brave), the Prince of Wallachia and Moldavia (the original Roman regions), who for little over one year was also the Prince of Transylvania, ruling as a barbaric tyrant. Rudolf had him assassinated on 19 August 1601. In the Peace of Vienna on 23 June 1606, which Bocskay concluded with King Rudolf, he became Prince of an enlarged Transylvania including the eastern part of Upper Hungary with Kassa (now Kosice in Slovakia). He also guaranteed the rights of the Protestants in Hungary. On 11 November 1606, Bocskay mediated the Peace of Zsitvatorok between King Rudolf and Sultan Mohammed III, keeping the territorial status quo and freeing King Rudolf of his tribute to the Sultan. A new era began after these two treaties. The Ottoman Turkish power was declining again, leading to the slackening of their rule in the central part of Hungary. In their place in the Carpathian Basin, Transylvania entered with a welcome period of prosperity, the so-called Golden Age (1613-1629) under Prince Gábor (Gabriel) Bethlen, the most outstanding Prince of Transylvania. He ruled with a firm hand, and he succeeded in putting the finances of Transylvania in order. He introduced higher taxation, revived the mining industry, raised his subjects’ living standard, all the while waging wars, developing large-scale exporting through the Adriatic Sea, and founding the Academy of Gyulafehérvár (now Alba Iulia, Romania). He invited distinguished scholars to it and financially helped those students who went abroad for further studies. He had his setbacks too, like the Peace of Nikolsburg of 1621, in which he had to sign a disadvantageous pact with Emperor Ferdinand II. He could not gain much either in 1626, when he sided with the Protestants in the battle at the Dessau bridgehead, where Wallenstein, allied with the Catholic League, defeated Mansfeld’s forces.

**Péter Pázmány (1570-1637)**, Cardinal, Archbishop of Esztergom, was the leading figure for the Counter-Reformation movement of the Roman Catholic Church, initiated at the Council of Trent (1545-1563). The University of Nagyszombat (now Trnava, in

Slovakia) was founded by him, initially with faculties of Theology and Arts, and he was the founder of the Catholic Seminary (Pazmaneum) in Vienna. He founded a college and book printery in Pozsony (now Bratislava, Slovakia), while at Érsekújvár (now Nové Zámky, Slovakia) and Körmöcbánya (now Kremnica, Slovakia), he founded Franciscan convents. Pázmány conducted enormous literary activity in the areas of theology, canon law, arts and jurisprudence; he wrote the first printed Hungarian Catholic prayerbook (*Imádságos Könyv*, 1606); and wrote the Life of St Ignatius (1609) in Hungarian, and translated Thomas à Kempis' *The Imitation of Christ*, in 1604. Pázmány took giant steps in the development of Hungarian prose writing. These cultural and religious movements and activities went on during the times of the Princes István (Stephen) Bocskay and Gábor (Gabriel) Bethlen in Transylvania, while the Ottoman Turks ruled in the middle part of Hungary, and Kings Rudolf and Ferdinand II ruled in the western part. The persecution of the Protestants by the Catholic Habsburg rulers led to several uprisings and clashes, both, in the west and in the east. The uprisings, led by István Bocskay and Gábor Bethlen, and by György (George) Rákóczi I, also did not bring much improvement for the conditions of the Protestants, despite a religious Peace of Linz on 16 December 1645, which was concluded with King Ferdinand III. In 9 points it secured religious freedom for the Protestants and the return of churches illegally seized from them. There was increasing discontent also amongst Hungarians in the western parts under Habsburg rule.

***Thököly's War of Independence (1678 - 1683, 1886 - 1691.*** – In 1663, the Ottoman Turkish forces attacked with renewed vigor; but, on 1 August 1664, near Szentgotthárd, the Austrian forces, led by General Montecuccoli decisively defeated the Turkish army of Ahmed Köprili. The infamous Peace of Vasvár in 1664, concluded by Leopold I, sacrificed the interests of the nation and resulted in the conspiracy of the malcontents, organized by the Palatine, Ferenc (Francis) Wesselényi; but it was nipped in the bud in 1671. The young King Lipót I (Leopold, 1654-1705), with his ambitious plan to create a Central European major power centered on the Danube valley and centrally ruled, now openly switched to absolutism and put a regent with full powers at the head of the Hungarian state. This sparked off a new armed uprising in 1678, under the leadership of Count Imre Thököly (1657-1705) whose “Kuruc” (anti-Habsburg) army occupied the entire northern part of Hungary as far west as Pozsony (now Bratislava, Slovakia). Thököly allied himself also with the Ottoman Turks, who started to lay siege to Vienna in 1683, but they suffered defeat. The pursuing imperial forces recaptured the Hungarian castles, one after the other, in Upper Hungary. In 1686, they took Buda as well. The Turks were forced to yield the northern part of the Great Plain and, by 1688, they held only Szigetvár, Kanizsa, Gyula and Temesvár. In 1687, the Imperial Habsburg forces occupied also all of Transylvania and, with Leopold's “diploma” (*Diploma Leopoldinum*) the whole of Transylvania came under his rule in 1691. The Imperial Army led by Jenő (Eugene) Savoyai, gained a clear victory over the Turkish Army at Zenta in 1697. In the resulting Peace of Karlóca in 1699, Hungary was freed from Turkish occupation after 150 years.

***National struggles, absolutism, Rákóczi's War of Independence (1686 – 1711).*** The absolutism of the Viennese Court continued to weigh heavily on Hungary. After the liberation of their country, out of gratitude, at the Diet of 1687 the nation renounced its right for free election of a king in favour of the male line of the House of Habsburg; it

also renounced the clause of resistance to a sovereign, contained in the Golden Bull (1222). However, the nation did not gain the good will of the Court with these generous concessions. The Habsburg Emperor was the victor, not Hungary. The Imperial generals in charge of the country regarded the area as a conquered province, practiced extortion among the population, and both the retreating Turkish army units and the advancing “liberators” ravaged the countryside equally cruelly and especially persecuted the Hungarians.

Under these circumstances, almost the entire nation rose up in arms in 1703, especially the peasantry, armed with straightened-out scythes and axes, at best with rifles, under the leadership of Prince Ferenc (Francis) Rákóczi II, who was a talented organizer, with enormous landed property, the largest in all Hungary. In the early stages of the War of Liberation the ‘kuruc’ (anti-Habsburg) armies ousted the imperial forces from almost all Hungary. In the 1704 Diet, Rákóczi was elected “Reigning Prince”. At the Diet of Ónod, from 31 May to 22 June 1707, the Hungarian estates declared the House of Habsburg, at that time represented by Emperor Joseph I (József), dethroned, in the presence of Prince Rákóczi, and set up an aristocratic republic. The momentous decision of dethronement was enacted by the Diet during its three tempestuous weeks. Several more years of bitter fighting ensued, more and more Estates went over to the Habsburg side (they were called the “Labanc”), and Prince Rákóczi’s forces suffered severe defeats in 1710 and again in 1711, because the Habsburg side, with its experienced Imperial Army, had the numerical superiority. Finally, the kuruc leader, Sándor (Alexander) Károlyi, was forced to lay down his arms in the Peace of Szatmár (Szatmárnémeti, now Satu Mare, Romania). It was signed by Sándor Károlyi, the delegate of Prince Ferenc Rákóczi and the King’s representative, Count János (John) Pálffy, the Commander of the Imperial forces in Hungary, on 29 April 1711.

***The new Emperor, Károly III (Charles) (1711-1740)***, promised an amnesty and the restoration of constitutional and religious freedom in Hungary. He would let the Prince keep his property with the provision, that within three weeks, he take an oath of allegiance (fealty). Prince Rákóczi refused to accept the Peace Treaty and fled to Poland, then to France, and eventually to Turkey, where he lived in exile in Rodosto (Rhaedestos, now Tekirdak) until his death in 1735. The King also promised to convoke a Diet in the near future, for redressing the grievances. The Peace Treaty was announced on 1 May, the same day that the anti-Habsburg *Kuruc* armies laid down their arms on the Nagymajtény flats. The Diet did take place in 1712, which set up a permanent defense force and the regular taxation.

### **Absolutism of the 18th and early 19th centuries.**

During King Károly (Charles) III’s nearly thirty-year reign, the public administration and the judicature of Hungary were reorganized. In 1718 he returned the area of the historic County Temes to Hungary, the last remaining area under Turkish occupation. It was liberated after several years of fighting with Turkish troops (1716-1718). The Hungarian nation expressed its gratitude to the well-meaning monarch in the Diet of 1722-1723, by accepting the succession along the female line in the Habsburg House, in the form of a family statute, the *Pragmatica Sanctio*, which was constitutionally enacted (Acts I., II., and III.) by the Hungarian Estates, specifying also that the force of this “sanction” applied only to the descendants of Károly III, József (Joseph) I and Lipót (Leopold) I and that in case of their death, this statute explicitly reserved the right for

Hungary to revert back to the free election of a king.

**Queen and Empress Mária Terézia (Maria Theresa) (1740-1780)** followed her father Károly III on the throne; he had no male descendant. Facing a critical situation in the Austrian War of Succession (1741-1748), she turned to the Hungarian Estates for help. Their generosity (calling out *vitam et sanguinem!* “our life and our blood” [for our Queen]) really did save Mária Terézia’s hereditary lands; only Silesia was lost. In her gratitude to Hungary, she tried to follow constitutional lines in the earlier decades of her rule. She returned the Partium, Slavonia, and the remaining part of the Temes region in the south; she also returned the 13 towns of the Szepes region of northern Hungary, pawned by King Zsigmond (Sigismund of Luxembourg) in 1412. Fiume (now Rijeka in Croatia) was also reannexed, first via the Croatian Council (1776) and, in 1779, directly adding the harbor town as an independent entity (*corpus separatum*) to the Hungarian Crown. Under the influence of the ideas of the Enlightenment, Mária Terézia took pains to lighten the tax-paying feudal tenants’ (*jobbágy*) burden. In her *Urbarium* of 1765, she precisely determined the duties and rights and secured for them the right to move freely and change residence. Realizing the great importance of education, in her *Ratio Educationis* she laid the foundation of a new, up-to-date public educational system, placing all schools under state supervision. The University of Nagyszombat (now Trnava in Slovakia), fallen into neglect, was reorganized and transferred to Buda in 1777. From the confiscated property of the Jesuits, she organized study grants. Mária Terézia founded several law-schools, also a Forestry and Mining Academy (in Selmecebánya [now Banská Stievnica in Slovakia]) and the *Theresianum* in Vienna, for the education of young Hungarians. To raise the cultural level of the Hungarian gentry she initiated the Hungarian Guards in Vienna. She was the founder of several Catholic bishoprics in the Szepes area, Rozsnyó (now Rožnava in Slovakia), Székesfehérvár, and others. In the economic field, Hungary was disadvantaged because it was an agrarian country without industry and the new tariff system forced Hungary to provide Austria with her raw produce. Despite these setbacks, harmony was established between ruler and nation. This harmony was broken by the absolutistic rule of her son, King József II (Joseph) (1780 - 1790).

The French Revolution, abolishing feudalism and absolute monarchy, posed a grave danger to the Habsburg Monarchy, precisely when an enlightened absolutistic monarch par excellence, József II (Joseph) took over from his mother. József’s absolutistic measures nearly caused open resistance in Hungary. In 1784, a bloody uprising by Wlach (now Romanian) peasants broke out in Transylvania, headed by Hora and Kloska, massacring and torturing thousands of men, women and children in Hungarian towns and villages. His centralization affected the Roman Catholic Church as well. The monastic orders had been dissolved, except the Piarists, and the English Ladies, and their properties were transferred to a religious foundation. In the interest of centralization, József combined the Hungarian and Transylvanian chanceries. The administration of all the Hungarian internal affairs was placed in the hands of the Council of the Governor General, which in turn was subordinate to the Council of State in Vienna. József made German the official language of his whole Empire for the sake of uniform public administration and the language of instruction in all the schools. He abolished the privileges of the nobility, decreed the land-survey of all his Empire, the numbering of every house and a nationwide census in 1784. State administration was placed in the

hands of officers paid by the state. Hungary, in place of the counties, was divided into 13 regions. A small group of Hungarian democrats and liberals, who considered the feudalistic social and political system outdated, was formed and led by Ignác (Ignatius) Martinovics. It was a secret freemason-like society, whom the contemporaries thought to be Jacobinites. They were referred to as the “Martinovics Conspiracy”. The Habsburg secret police discovered them; their five leading members, including Martinovics, were arrested, sentenced to capital punishment by the Royal Court in August 1794, and beheaded at the foot of the Castle Hill of Buda, on 20 May 1795.

Although, on his deathbed József II retracted most of his administrative reforms, his successor, Lipót II (Leopold, 1790-1792), had to restore the ancient Hungarian Constitution and he also had to swear to treat Hungary as an independent kingdom with its own laws and customs. Lipót II died suddenly, and his young son, Ferenc I (Francis, 1792-1835) took over. The last armed operation of the nobility occurred, when about 19,000 rioting nobles, led by the Palatine József (Joseph), joined the 20,000-strong Austrian Army in a battle against Napoleon’s French Army of 55,000 near Győr in western Hungary, on 14 June 1809. The outcome was a clear French victory, marking the end of the nobility’s cause. In reaction to the French Revolution, an even more advanced absolutism appeared. Ferenc introduced ruling without periodic Diets. After 1812, the Habsburg Court did not convoke Diets for 13 years and the realm was governed under strict police supervision, with freedom of speech prohibited. The conservative statesman, Metternich, appeared on the political stage and the period from 1815 to 1848, was called the “Age of Metternich” throughout Europe. His ambitions became neutralized by the resistance of the conservative Hungarian counties. King Ferenc I (Francis) finally convoked the Diet in 1825.

### **The Reform Period (1825-1848.)**

*The Diet of 1825* ushered in a new era, the so-called Reform Period. A Reform movement took up a whole generation. Hungary was underdeveloped, largely an agricultural country, not industrialized, left behind in the developments of Western Europe. Many reforms in various aspects of life were waiting to be carried out. Pest had to be built up again after the Danube flood of 1838, when half the buildings collapsed in the flood. Count István (Stephen) Széchenyi (1791-1860) took a leading role in the economic and cultural reform movement, whereas the current political problems were handled by Lajos (Louis) Kossuth (1802-1894). The Diets were held every three years between 1825 and 1848, under the guidance of Széchenyi and Kossuth. The Liberal Party, fighting for the reforms, won a majority in the lower ‘Tábla’ (i.e. Board, meaning the Houses of Parliament) after the liberals made some progress in the easing of the burdens of the serfs and in the attainment of the rights for the use of the Hungarian language. However, the progress was too slow. At the Diet of 1843-1844, it was declared and enacted that from then on Hungarian would be the official language of the country. Széchenyi and Kossuth usually agreed about major issues; it was only on how these issues were to be solved or achieved that they sharply disagreed. Széchenyi believed that problems could be solved by rational argument and patient negotiations, whereas Kossuth was the man of inspiration and passion, not afraid of resorting to military action on occasions.

Count Széchenyi was the towering figure of the reform period, who offered one year of the income from his estates, for speaking not in Latin, but in Hungarian, which was a

revolutionary step. He founded the Hungarian Academy of Sciences on 3 November, 1825. He pressed for a whole series of issues to be reformed and solved, most of them becoming reality in his lifetime. A permanent bridge, the famous ‘Chain Bridge’, was to be built over the Danube between Buda and Pest. The Lower Danube was to be cleared of rocks at the Iron Gate (where it cuts through the Southern Carpathian and the Balkan Mountains) to facilitate shipping transport. The marshes on the Great Plain were to be drained to extend the arable land and eliminate the mosquito plague. A National Theater was to be founded and also a National Museum for Hungary’s natural wealth (already started by his own father), a National Library was to be developed (which was to be named after his father the Széchenyi Library). Agricultural methods were to be updated, manufacturing industries and trade to be developed, in conjunction with a Stock Exchange, a National Casino, and horse racing was to be encouraged and introduced in the country. All these issues were discussed in one of his books, *Hitel* (Credit) of 1831.

**Lajos Kossuth (1802-1894)**, the famous patriot, orator, dictator for seven months and Governor-President, working for his cause as a man possessed, became the indomitable leader of Hungary in the War of Independence (1848-1849) from the Habsburg absolutistic oppression. He is considered as one of the foremost political figures of 19th century Hungary. He was a strong and popular leader. However, his adversaries described him as a man of dubious character and he even was declared a traitor at the representative meeting of 12 August 1849. In exile, he lived from age 47 till his death, first in Turkey, and later on in Turin, Italy. Early in his exile, he made successful official visits to England and to the USA, promoting the cause of freedom for Hungary. He was regarded as the oracle in Hungary’s internal struggles. He passionately opposed Ferenc Deák’s advocating of the Compromise between Hungary and Austria. However, the people looked up to him as *paterfamilias*, the father of the nation.

### **Revolution, War of Independence from the Habsburg rule, Habsburg reaction and the Compromise.**

**Revolution.** On 15 March 1848, a bloodless revolution in Buda and Pest broke out. The “Springtime of the People” was initiated by the young citizens of Hungary, following the similar revolutions in Paris in February, and in Vienna earlier in March. It was symbolized by the great poet Sándor (Alexander) Petőfi’s National Song (*Nemzeti Dal*) and the Twelve Points (*12 Pont*) the youth of Pest demanded. These revolutions broke the resistance of the Habsburg Court against the reforms. On 18 March, Count Lajos (Louis) Batthyány was appointed as Prime Minister, which empowered him to form a cabinet and, at the same time, the Palatine Archduke István (Stephen) was made the King’s plenipotentiary in Hungary. Finally, on 7 April 1848, Ferdinand V (1835-1848) appointed the first responsible Hungarian Ministry, its President (the Prime Minister) was Count Lajos Batthyány. Other members were Count István Széchenyi (public works and transport), Lajos Kossuth (finance), Ferenc Deák (judicature), Baron József Eötvös (education), among others. The most successful Diet (still held in Pozsony at this stage) in Hungarian history started in late March and ended on 11 April 1848. Its bills were drafted by Kossuth, Széchenyi, Batthyány and Deák. Its first acts, the April Laws – 31 new Laws – abolished the old feudal state of Hungary, which was based on the privileges of the nobility, thus creating a modern, constitutional Hungary, based on equality. The governing of the country was taken over by the responsible Hungarian Ministry, in place of the highest administrative seats of feudal Hungary. Peasants (serfs) were freed, the law

of entailment abolished, and Transylvania (Erdély, now in Romania), became united with Hungary *sensu stricto*, general taxation based on proportionate sharing of the burden, equality before the law, freedom of the press and equal rights for all Christian denominations. As it worked out, the April Laws were largely of symbolic value, with some imperfections too, such as the restricted Hungarian suffrage, not granting full equality for the Jews, and not absolute freedom for the press; also, the Vlachs (now Romanians) protested against the reunification of Transylvania with Hungary. The Habsburg Court reacted to all these reforms by dismissing Metternich, the Austrian Chancellor. On 16 April, the Emperor-king tried to reach a compromise with the Hungarian delegation.

By now the Pandora's box of Hungary's minorities burst open and the nationalities, making up about half of the population of the Kingdom of Hungary, started to stir. On 21 April, the Serbian leader, Metropolitan Josip Rajačić organized a National Congress, while the Saxons sent a memorandum to Ferdinand, protesting the planned unification of Transylvania with Hungary. It became clear that the carrying out and enforcing these laws in practical life had run into serious difficulties. The Habsburg Court wanted to restore the old order, as soon as the threat of revolution subsided, and made the mistake of unwisely urging the nationalities to rise against the Hungarians (attempt at *divide et impera*), who in turn were forced into self-defense. The other nationalities also started their own drive for self-determination, intensifying Hungarian nationalism. The armed struggle started on 23 March, when Emperor-King Ferdinand appointed Colonel Josip Jelačić as ban of "civil" Croatia-Slavonia, and later on made him a general in charge of the Military Border region. The constitutional problem of the Kingdom of Croatia-Slavonia emerged. The question was whether it should be given full autonomy, or treated as a subordinate state of the Hungarian Crown, with or without the same rights and privileges that Hungary had obtained from Ferdinand. The nationalities problem of Hungary proved quite intractable and continued to beset the political field in Hungary. It was made even more serious by the earlier decision to make Hungarian the language of legislation and administration even for the areas where national minorities, Slovaks, Ruthenes, Germans, Vlachs (later to be renamed as Romanians) and Serbs lived. The citizens had to learn to distinguish between the concepts of nation and state. From April to August 1848, the Habsburg Empire had no real government, no money in the treasury, confusion among its various Imperial Army units, which sometimes ended up fighting against each other, each side holding the Austrian flag. Fighting and massacres erupted amongst the numerous ethnic groups of peasants, who had been living peacefully together as neighbors for centuries, now killing each other by the thousands, especially in the ethnic patchwork-quilt of the Bánát-Temes region (Voivodina), with Hungarians, Serbians, Germans, Vlachs, Bulgarians and Slovenians living in close proximity, bringing about one of the worst ethnic conflicts in the history of the Carpathian Basin.

### ***The War of Independence from the Habsburg ruling dynasty***

The Hungarian defense forces were organized by the new Prime Minister, Lajos Batthyány in the absence of Colonel Lázár (Lazarus) Mészáros, the new Minister of Defense who, at this stage, was still with Field Marshal Radetzky's Army in Italy. The Hungarian defense consisted of the National Guards, the civilian militia, and the newly formed *Honvéds* (Defenders of the Fatherland). At first the formation of ten Honvéd

battalions was suggested on 16 May 1848. The Hungarian Parliament, on 11 July 1848, on the proposal of Kossuth, voted for 200,000 soldiers and 42 million forints for the defense of the country. When the Croat ban, Josip Jelačić, on the orders of the Habsburg Court, invaded Hungary on 11 September, with his 45,000 men, Batthyány and his Ministry resigned, leaving Kossuth in sole charge; consequently, a National Defense Committee was set up, headed by Kossuth. The improvised Hungarian Honvéd forces, led by General János (John) Móga, after continued retreat, stopped the advancing Croatian troops in the battle near Pákozd, southwest of Budapest, on 29 September 1848, driving out Jelačić's troops from Hungary. However, in the winter campaign, the Austrian Army of General Windischgrätz invaded Hungary and occupied Buda. The Hungarian Parliament had fled to Debrecen earlier. In December 1848, the King, Ferdinand I, abdicated in favour of his young nephew.

**Ferenc József (Franz Joseph) (1830-1916).** Ferdinand sanctioned the April Laws and his coronation oath bound him to observe them. From November 1848 to January 1849, was a period of near defeat for Hungary, including the defeat of Henryk Dembinski's honvéds at Kápolna on 26-27 February 1849. Ferenc József dissolved the Austrian Reichstag on 4 March, held at Kremsier in Moravia, where he proclaimed a new constitution, the so-called Stadion Constitution. The uprising by Serb troops in the Voivodina area of southern Hungary was put down by General János (John) Damjanich's forces. The Szekler, Áron (Aaron) Gábor, established a cannon factory in Transylvania. In the very successful spring campaign from the end of January to May 1849, the Hungarian *Honvéds*, led by a general of genius, Artur Görgey, seemingly emerging from nowhere, cleared most of Hungary of enemy forces, from the mountains of Northern Hungary, winning a number of victories, like the ones at Hatvan on 2 April, Tápióbicske on 4 April, Isaszeg on 6 April, and Vác on 10 April, Nagysalló (now Tekovské Luzany in Slovakia) on 19 April. Görgey's most successful and talented general was János (John) Damjanich, who started the series of Hungarian victories at Szolnok on 5 March and he played an important part in some of the others (Hatvan, Vác, Isaszeg, Nagysalló). On 22 April, the siege of Komárom was broken. Finally, the three-week siege of the Castle Hill of Buda ended on 21 May. At that stage, the Hungarian forces consisted of about 170,000 men and a small number of field guns. A pro-Habsburg Constitution abolished the concessions of the April Laws, while the Parliament at Debrecen declared the "perfidious" Habsburg House dethroned. That was Kossuth's answer to the Stadion Constitution; and Parliament elected Lajos Kossuth Governor-President on 14 April 1849. Jelačić suffered another defeat at Hegyes, southeast of Nagyvárad (now Oradea in Romania), on 14 July 1849. In his dire straits the young Ferenc József had no choice but to ask the Russian Czar, Nicholas I, for military assistance. A large Russian army, up to 180,000, invaded Hungary from the north and from the southeast, and together with the Austrian forces proceeded to run down the incomparably smaller Hungarian Army. Fragmented and scattered, with weeks of bitter rear-guard fighting, a number of Hungarian army units were forced to capitulate. Overwhelmingly large Russian forces also defeated General Bem in the Battle of Fehéregyháza, near Segesvár (now Sighișoara in Romania), in Transylvania on 31 July 1849, where Bem's adjutant, the great Hungarian poet, Sándor (Alexander) Petőfi, fell. In the meantime, General Görgey skilfully manoeuvred his army in a southeasterly direction to avoid contact with the

Austrian troops, trying to get closer to the approaching Russian Army, in which manoeuvre he succeeded. On 11 August 1849, General Görgey, with dictatorial powers from Kossuth, who had resigned, laid down his arms with his 33,906 men including 11 generals, 1,426 officers and 32,569 privates, in front of General Rüdiger, one of the generals of Field Marshal Prince Ivan Paskievich's Russian army, and deliberately not in front of the 175,000 Austrians, under General Baron Julius Haynau, a military talent, famous for his brutality in Italy, on the fields of Világos (now Şiria, in Romania), about 28 km east-northeast of Arad (now in Romania), at the foot of Baron Bohus' 14th century castle. On 12 August, Kossuth fled to Turkey and, on the way there, at Orsova he buried the Holy Crown and all the Coronation Regalia in a large crate. The surrender-document was signed in the Bohus Castle on 13 August 1849.

***Habsburg reaction, the “Bach regime”.***

Merciless reprisals by the Habsburg Court of Vienna followed the Hungarian surrender. The Austrian General Haynau, widely known as the “hyena of Brescia”, was vested with dictatorial powers, as Governor in Hungary. He had 13 Hungarian generals executed in Arad, on 6 October 1849; and, in Pest, he had Count Lajos Batthyány, the first Prime Minister of the modern, independent Hungary, executed also on 6 October, by a firing squad. Haynau's dictatorship was followed, in 1850, by the absolutistic rule of the Austrian Minister of the Interior, Alexander Bach. He went ahead, by means of a foreign civil, Austrian bureaucratic governmental apparatus, to incorporate Hungary fully into the Habsburg Empire. The area of Hungary was divided into provinces, replacing the thousand-year-old counties. Transylvania, Croatia, Slavonia and the harbor-town of Fiume (now Rijeka, Croatia) were detached from Hungary. From the southern strip of Hungary, he formed a Serbian voivodeship, the Temes Banat, and the military frontier zone. The Constitution of Hungary was suspended and the country was ruled by Imperial Patents (pátens) and Decrees. The smaller landowners had been largely ruined during the Bach regime; they streamed into the towns, becoming at best administrators and government officials; however, the money-making, capitalistic businesses were filled with German settlers and Jews. A real Magyar middle class did not yet form, not even in the Capital. However, toward the end of the 1850s, the setbacks in external politics (Magenta, Solferino in 1859) forced Emperor Ferenc József to come closer to at least a semblance of constitutional rule.

***Compromise.***

In the pseudo-constitution offered by the Emperor Ferenc József in the October Diploma, on 20 October 1860, the February patent was rejected by the Hungarian Diet, convoked in 1861. Four more years of absolutism followed. In 1866, Austria suffered a decisive defeat from the Prussians at Königgrätz. This rendered the Viennese Court even more amenable to an agreement with Hungary. Ferenc (Francis) Deák, the leading figure in these post-revolutionary times of oppression, continued to advocate moderation in the nation's wishes, although Kossuth, in exile in Turkey, was strongly against Deák's policy of moderation. Finally, in 1867, reconciliation was reached between the Habsburg ruler and the Hungarian nation. The Compromise became a reality, Deák being its chief architect. Emperor Ferenc József appointed Count Gyula (Julius) Andrassy, recommended by Deák, as Prime Minister of Hungary, who in turn formed the second

responsible Hungarian Government and the Parliament accepted the Compromise Act XII of 1867. Finally Ferenc József was crowned King of Hungary in the same year.

***The Austro-Hungarian Monarchy until 1914.***

Nearly half a century of peace and consolidation followed the Compromise, during which the country had developed more than for centuries in the past. During the term of Andrassy and successive governments, a long string of rebuilding and reforming measures were completed. Hungary was making remarkable economic progress and, after 1900, industrialization also went ahead rapidly. In 1868, a settlement with Croatia was reached in Parliament (1868 Act XXX) and also the Act for the Equality of Status and Rights for all Nationalities (Act XLIV). In the cultural sphere, the Minister of Education, Baron József (Joseph) Eötvös, introduced compulsory schooling with the minimum elementary level. The Budapest Opera House, Miklós (Nicholas) Ybl's Renaissance-style edifice was opened in 1884. Gustav Mahler was its director from 1888-1891. An Independence Party was formed, opposing the clauses of the Compromise and Deák's policy, and advocating the return to the Constitution of 1848, true to the tradition of Kossuth. It was gaining popularity, especially among the peasants of the Great Plain and Transdanubia, to such a degree that, in 1887, it entered parliament with 101 members, though it still could not form Government. After the departure of Andrassy and Deák in 1871, the issue of the Compromise reached a crisis level, which was made worse by the financial crisis. Buda and Pest and Óbuda were joined to form Budapest in 1873. The Liberal Party was formed, merged with the Deák Party, headed by the Prime Minister Kálmán (Coloman) Tisza, during the years 1875-1890, who was trying to follow the political line of the Compromise. The European agricultural depression of the 1880s even shook the economic position of the great estates of the leading aristocrats, reinforced by some Jewish capitalists. In the same period constitutional problems were at the forefront of domestic political life, while in the 1890s, the problems of church policies occupied the Parliament and the increasingly serious rural unrest culminated in a harvesters' strike in 1897 and the 1898 riot, which led to some distribution of land for the peasants, but the fate of the landless and small-holding agricultural workers was not alleviated, leading to an army of agricultural proletariat. This resulted in large-scale emigration to North America. The franchise was very restricted, preventing the masses from getting organized politically. A Hungarian National Bank did not materialize at this stage, only an Austrian-Hungarian Bank. Joint administration in Defense and Foreign Policy was causing problems. But the clauses of the Compromise had been preserved during Tisza's 15 years of government.

*Wekerle, Sándor (Alexander) Sr.* became the prime minister in 1894. He tabled the motion in Parliament for a compulsory civil marriage act, state-controlled registration of births and deaths, and the recognition of Judaism as a religion. These bills were pushed through Parliament by the subsequent Prime Minister Baron Dezső (Desider) Bánffy. It was during his term of office that, the 1896 millenary celebrations took place: Hungary was celebrating its thousand-year statehood. The Parliament Building had just been completed for the occasion. In the first decade of the 20th century, the political life was dominated by the ups and downs of constitutional issues. Kálmán (Coloman) Széll, Prime Minister from 1899 to 1904, calmed down Parliament after various crises and achieved an important commercial deal with Austria. In the 1905 elections, the Independence Party (the Party of '48), together with the 1867 opposition parties, which demanded the

military word of command and the military service in Hungarian language, defeated the Liberal Party and got into Parliament with a majority. Differences of opinion had arisen over this outcome between the Independence Party and the Emperor and King Ferenc József who, as a result, appointed a non-parliamentary caretaker government under General Baron Géza Fejérváry as Prime Minister, with a “darabont” (henchman) ministry. This move by the Emperor almost developed into open absolutism again. When this ministry proved somewhat impotent, in 1906, a coalition government was formed from the new parties in majority under Prime Minister Sándor (Alexander) Wekerle, but it was overthrown after four years. Soon afterward Count István (Stephen) Tisza formed a new 1867-Party, renamed as the National Labour Party, which won the 1911 elections. In 1912, Emperor Ferenc József appointed László (Ladislav) Lukács as Prime Minister. Nevertheless, the minority Independence Party continued its struggle. Count Tisza, as the President of the Lower House, quelled the obstructing opposition members with a strong hand, even using force by calling in the Army during a phase of parliamentary scandals, as a result of Tisza’s submission of a Defense Bill. After the downfall of the Lukács Government, the King in 1913 appointed the forceful and experienced Count István Tisza (1861-1918) as Prime Minister. From 1914 onward, Tisza played a role that influenced the whole Monarchy. The military manoeuvres in the south of the Austro-Hungarian Empire in June 1914, viewed by Crown Prince Ferenc (Francis) Ferdinand, were evidently considered extremely provocative by the neighbouring Serbians. Ferenc Ferdinand’s plan to reorganize the Monarchy along federal lines became a notorious concept to Hungarians, because it would have been incompatible with Hungary’s territorial integrity.

***Hungary in World War I (1914 – 1918).***

After the assassination of the Archduke Ferenc (Franz) Ferdinand (heir to the Crown) by Gavrilo Princip on 28 June 1914, but before the Emperor Francis Joseph made the fateful decision to declare war on Serbia, in his memorandum to the Monarch, Count István Tisza most decidedly took a stand against getting involved in a war. The assassination was not the cause of the outbreak of the war, although it might have accelerated it. The developments in European power politics brought the war about. On 26 July 1914, King Ferenc József made the historic declaration: “I have weighed everything, I have considered everything” and the first order of mobilization followed. When war was declared against Serbia, the degenerating domestic political situation in Hungary settled down overnight and the whole country stood behind István Tisza who, until then, was popular only among his close party faithful. The people of Hungary started to make sacrifices without a complaint. As the war unfolded, causes for concern were (1) The series of defeats on the Serbian Front, due to glaring blunders by the Army command; (2) the initial successes of the Russians in their steam-roller offensive in December 1914, the blockade of Przemysl, the bayonet charges at Gorlice, invasion into the northeastern Carpathians, and (3) the North-Italian and Slovene Karst region and the Isonzo River plains, where a series of twelve, bitterly fought battles took place, over more than two years, from 23 June, 1915 to 24 October, 1917. On the Karst-plateau, there was bitterly fought, bloody trench warfare during 1916. However, the general climate of opinion in Hungary was confidence in eventual victory. Early in 1915, important changes took place in the joint Government of the Monarchy. Count Leopold von Berchtold (1863-1942), Foreign Minister of Austro-Hungary, resigned on 13 January 1915, and he

was followed by Baron István (Stephen) Burián (1851-1922), a close friend of Tisza, but he was also unsuited for the arduous office. The Minister of Finance, Bilinski, also resigned, succeeded by Körber. The validity of the mandates of the Lower House in Parliament was extended. On 4 May 1915, Italy cancelled the Triple Alliance and, on 23 May, declared war on the Monarchy. The Parliament unanimously voted the various war resolutions, but the “*Treuga Dei*” was overturned later. On 21 November 1916, the King and Emperor Ferenc József died, and was succeeded by Károly (Charles) IV, who started his reign with a peace offer to the Allies; but in London and Paris this was regarded as a sign of weakness. In the spring of 1917, István Tisza was overthrown. The USA President Woodrow Wilson’s Fourteen Peace Points, on 8 January 1918, made a deep impression on the nationalities of Hungary. The Croatians, Slovaks and Romanians started to stir. Prime Minister Count Móric (Maurice) Esterházy, successor of Tisza, was soon worn out by his workload. His successor, Sándor Wekerle, reorganized his Government on 29 January 1918. In consequence of the embroilment around the secret peace offer by King Károly IV, in the “*Prince Sixtus letter*” of March 1917, the Foreign Minister Count Ottokar Czernin, the successor of Burian, was forced to resign. In April, he was followed by István (Stephen) Burián again, as Foreign Minister, until October. On the Eastern Front a peace treaty was signed between the Central Powers and the new Soviet Government, on 3 March 1918, at Brest-Litovsk. The German summer offensive on the Western Front failed, due to the appearance of the fresh American Army. By now, the resources for the war effort were declining more and more, a shortage of raw materials in every sphere of life was becoming increasingly evident, and also the living expenses had risen enormously. On 30 September 1918, Bulgaria capitulated. During the 17 October sitting of the Parliament, István Tisza declared that “we had lost the war”, causing great panic and confusion in the House. The nationalities demanded their right to self-determination. The issue of the defense of the borders of Hungary was broached, but the High Command did not carry this out. On 27 October, King Károly offered a separate peace. In the meantime, Austria broke up and the nationalities were getting organized into independent groups. After the repeated resignations of Wekerle, the King commissioned János (John) Hadik to form a government, but it was too late. On the night of 30 to 31 October, a “*National Council*”, headed by Count Mihály (Michael) Károlyi, assumed power and proclaimed the Republic. On 31 October, Count István Tisza was assassinated. On 11 November 1918, a general truce was signed by the belligerents on all fronts. However, the Károlyi Government did not concern itself with the defense of the country and let the army demobilize and evaporate, whereupon, the hostile neighbors of Hungary started to invade the undefended country, to ensure accomplished facts for the Peace Treaty negotiations. On 4 November, the bolshevistic-minded Soldiers’ Council was formed. On 13 November 1918, King Károly IV abdicated.

### ***1918 – 1920 Post-war momentous events.***

About this time, the Béla Kun group was sufficiently organized for Károlyi to hand over the power to them on 21 March 1919. This group proclaimed the Hungarian Council (Soviet) Republic (dictatorship of the proletariat), run by people’s commissars. The Bolsheviks’ rule brought suffering and misery to the nation, and production reached an all-time low. The counter-revolutions in the embittered countryside were bloodily suppressed. Their army initially scored considerable successes, retaking Miskolc, Kassa and Eperjes, from the occupying Czech Army, but at the behest of the Allies, they were

forced to withdraw. When their attempted attack against the invading Romanian Army, which had already occupied Transylvania, now intruding further into Hungary, ended in failure, the Hungarian Red Army disintegrated and soon Romanian troops occupied a large part of the country, including Budapest. The Serb Army had already occupied the southern part of Hungary. All these aggressions occurred in blatant disregard of the general truce, but not without the tacit approval of the Entente Powers, who wanted to create a *fait accompli* to the upcoming peace negotiations.

When the Bolsheviks realized that their rule could not be saved, they handed over the power to the Socialist government of Gyula (Julius) Peidl, and the people's commissars fled the country on 1 August 1919. However, on 7 August, with István (Stephen) Friedrich at its helm, took Peidl's cabinet prisoner and assumed power. In the meantime at Szeged, during the Bolshevik rule, a counter-revolutionary government was formed, appointing Rear Admiral Miklós (Nicholas) Horthy as Supreme Commander, who began organizing a national army. In the first days of August 1919, this national army, led by Horthy, moved across to Transdanubia. On 23 October, on a motion by the English diplomat Sir George Clerk, a concentration government was formed and, on 22 November, with Károly (Charles) Huszár at its head, took power. On 16 November 1919, the National Army, headed by the Supreme Commander, Miklós Horthy, marched into Budapest. National elections were planned; they were held on 25-26 January 1920; deputies were elected, who were to sit in a one-chamber National Assembly; where universal secret balloting was established. Under the circumstances, the throne had to remain empty but, following medieval tradition, the highest office of state in the absence of the king is occupied by a Regent. Horthy was the only possible candidate for this high position. Therefore, on 1 March 1920, Miklós Horthy was elected Regent of Hungary. 131 members of the National Assembly voted for him out of the total 141. His election as Regent was considered as a temporary measure at the time. Soon after, Károly Huszár resigned and, in his place, the leading member of the People's Party, Sándor (Alexander) Simonyi-Semadam became Prime Minister.

A catastrophe was waiting for the sorely tried nation. On 15 January 1920, the Hungarian Peace Delegation appeared for the first time in Paris to take over the peace-treaty draft. On the next day, the head of the Peace Delegation, Count Albert Apponyi, delivered his famous, impassioned speech to the sitting Peace Conference, in which he demanded the alteration of the borders and, in disputed regions, the holding of plebiscites. Count Apponyi's speech could not change anything, because the conditions were predetermined and, as he was told, any alterations would have hurt the interests of the successor states and would have destabilized the situation. The Hungarian delegation was not allowed at the peace negotiations, could only sign what could be called the Peace Dictate Treaty. On 4 June 1920, two representatives of the Hungarian Government had to sign the *fait accompli* conditions of the treaty, indeed a Peace Dictate, placed in front of them in the Great-Trianon Palace of Versailles, near Paris.

### ***1920 – 1945 Regency period of “truncated Hungary”.***

The signing of the Trianon Peace Treaty document on 4 June 1920 meant that, from the area of the Historic Kingdom of Hungary, 325,411 km<sup>2</sup> for the “truncated Hungary”. Transylvania (*Erdély*) and the *Partium* (a region between the Great Plain and Erdély) were ceded to Romania; Upper Hungary (*Felvidék*) went to the newly formed Czechoslovakia; Southern Hungary (Voivodina) and Croatia were

□ only 92, 963 km<sup>2</sup>

given to the Serb-Slovene Kingdom, soon to become Yugoslavia; and even Austria received a chunk of western Hungary (now Burgenland). From the pre-war population of 20,886,487 only 7,615,117 were left to Hungary (based on the 1910 census). In the area of the newly created “successor states”, 3.5 million Hungarians had been turned into minorities overnight, which meant property confiscation, impoverishment, oppression and persecution, tantamount to a silent, long lasting and systematic genocide. In addition to the area and population losses, Hungary was bound by the treaty agreement to various reparations and a defense force of 35,000 soldiers was allowed only for the maintenance of internal order.

The Parliament was facing the enormous task of rebuilding a truncated state, and it began its work with many difficulties. The Government could not establish the internal order overnight, and Simonyi-Semadam resigned. On 19 July 1920, Count Pál Teleki formed a new cabinet. The Act of 1920: XXXVI declared the land reform, while the Act of 1920:XXV outlined the *numerus clausus* for education on the tertiary level. Internal order already prevailed in 1921, but the finances of the state became increasingly pressing because of the devaluation of the currency. The overhaul of the state finances was undertaken by the Treasurer of the Teleki Government, Lóránt (Ronald) Hegedűs; but his far-reaching plans foundered on the internal difficulties.

It was encouraging for Hungary’s future that the town of Sopron and its environ, assigned to Austria in the Peace Treaty, could not be ceded to Austria, because Hungarian irregular troops prevented it. Finally, by plebiscite, Sopron the “gate of Hungary”, stayed within Hungary (1 January 1922), to the delight of every Hungarian (in the case of plebiscites, Austria could not veto it, as the successor states were able to do). According to Act 1922: XXIX, Sopron town was granted the appellation *civitas fidelissima* (the most faithful town) for its fidelity to Hungary and the lower part of its historic fire-watch tower was transformed into a Fidelity Gate, the artistic work of Zsigmond Kisfaludi-Strobl and Rezső Híkisch. Serious complication arose for Hungary, when the King, Károly IV (Charles), returned to Hungary on 27 March 1921, but withdrew on the advice of the Regent Miklós Horthy. His second return at the head of some troops, almost approaching Budapest on 22 October 1921, had to be checked by military force; the Government of Count István (Stephen) Bethlen, who took over the power from Teleki on 15 April 1921, was forced to deliver the King to the Allies, who sent him to the Island of Madeira, where Károly IV died the following year. Moreover, at the demand of the Allies, the Hungarian Parliament had to officially declare that the House of Habsburg had been dethroned. István Bethlen (who lost his estates in Transylvania) was drawing towards the agrarian-democratic Smallholders’ Party of István (Stephen) Nagyatádi Szabó and, with his assistance Bethlen formed the Party of Unity and was in power with this party for ten years. In the parliamentary elections of 28 May and 1 July 1922, Bethlen secured a large majority. To break the isolation of Hungary, Bethlen applied for membership in the League of Nations, which he obtained in 1923. With a loan of 250 million gold crowns from the League of Nations it was possible to restore the balance of the state finances, and at the same time the “korona” currency, which had completely lost its value, was replaced by a new currency of “Pengő”, enacted in Parliament in the Act 1925: XXXV. Since the population density became higher (89/km<sup>2</sup>  as a result of migration from the ceded areas (from the 3.5 million Hungarian ethnic minority of the successor states), Hungary could not survive merely on agriculture; industrialization had

to be increased more and more; especially the textile industry showed considerable growth, helped by the introduction of protective customs. Bethlen knew that, without the collaboration of Jewish capitalists, the national economy could not be placed on secure footing. The 1926: XXII Act established the Upper House of Parliament, replacing the old Table of Magnates, thus in future the Parliament was going to function in two chambers. Gradually, the external political situation improved, Bethlen signed the Italian-Hungarian Friendship Treaty with Mussolini in 1927, and in the same year, Lord Rothermere in the Daily Mail drew the attention of the world to the problems of Hungary in post-Trianon Peace Dictate times, thereby starting the revisionist movement. The slowly developing progress that began in 1925, stopped for a while, because world recession, brought about by the World War of 1914-1918, reached Hungary in the agricultural, commercial and financial fields, causing serious depression, and financial crisis. The state budget again started to show a deficit. In the critical times of 1931, the Bethlen Government resigned. Count Gyula (Julius) Károlyi formed a government and, with great energy, tried to restore the financial balance of the country. He succeeded in this by introducing austerity, economic measures and with opening new sources of income. Gyula Gömbös took over on 29 September 1932, and his government improved Hungary's foreign and political situation, by establishing closer connections with Austria, Italy, Germany and Poland. At the same time, he tried to place Hungary on a firmer footing, by means of introducing sweeping social reforms, based on the 95 points of the "National work-plan". Kálmán (Coloman) Darányi took over the Government on 6 October 1936. He was anti-Semitic, like Gömbös, and pro-German, and followed roughly the same work plan, as did the Governments of Béla Imrédy (13 May 1938), strongly anti-Semitic, and Count Pál Teleki (17 February, 1939), the renowned Professor of Geography, Scout leader, as well as a conservative politician. With a strong right-wing majority, the Governments of Darányi, Imrédy and Teleki passed a number of laws, among which the most important ones were the Defense Act, the law ensuring the balance of the social and economic life, and the Land Act (reform). In the fall of 1938, the Sudetenland was ceded by Czechoslovakia to Germany, automatically leading to the revision of the areas populated by the Hungarian minority. This resulted in the First Vienna Award of 2 November 1938, chaired by Foreign ministers Ciano of Italy and Ribbentrop of Germany, which returned most of the entirely Hungarian populated southern strip of southern Slovakia to Hungary, 12,103 km  with a population of 1,057,323 (1941 census). The eminent geographer, Count Pál Teleki played a leading role in the negotiations as President of the Slovakian-Hungarian delegation to work out and establish new, ethnically satisfactory, borders between the Slovakian and Hungarian-populated areas (Magyar Múlt 20: 29-29, 1993). In March 1939, when Leader and Chancellor, Hitler, ended the state-conglomeration of Czecho-Slovakia. In the vacuum thus created, the Hungarian *Honvéd* troops reoccupied what is now called Carpatho-Ukraine (Ruthenia or Subcarpathia) with a total area of 12,171 km  and a population of 698,385 (1941 census). Under these political conditions, Hungary left the League of Nations on 11 April 1939.

***Hungary in World War II (1939-1945) Soviet occupation, communist rule and after.***

At the outbreak of World War II, Hungary succeeded in remaining neutral for several years. In the parliamentary elections of 1939, the rightwing Arrow Cross Party won 42 seats. Count Pál Teleki tried to re-open relations with the Soviet Union, secretly

supported the Poles and collaborated with Italy. When the Soviet Union occupied Bessarabia (at Romania's expense) in June 1940, Teleki pressed Hungary's claims for the eastern part of Historic Hungary. This resulted in the Second Vienna Award of 30 August 1940, returning the northern (mostly Hungarian-populated) part of Transylvania to Hungary. Almost at the same time, Teleki's Government concluded a Treaty of Eternal Friendship with Yugoslavia. When in March 1941, Hitler invaded Yugoslavia and demanded Hungary's cooperation, Teleki committed suicide on 3 April 1941. His successor, László (Ladislav) Bárdossy, decided on the annexation of parts of the former southern area of Historic Hungary (Bácska, Baranya Triangle and the Mura Interfluve), after Croatia proclaimed its independence, Yugoslavia fell apart, and Yugoslav partisans committed atrocities against ethnic Hungarians. In June 1941, Bárdossy involved Hungary, allied with Germany, in a war with the Soviet Union, which contrary to expectations, got dragged out for several years. In March 1942, the Regent replaced Bárdossy with Miklós (Nicholas) Kállay who, after the Don military disaster, when, in the 2nd Hungarian army, out of 200,000, men 100,000 died, and 60,000 were taken prisoner, became increasingly anti-German and secretly pro-British, protecting the Jews in addition. Hitler lost his patience, invited Horthy to Germany, and in his absence German troops occupied Hungary on 19 March 1944. Döme (Dominic) Sztójay, a right-wing radical was installed with a pro-Nazi government. Opposition parties could not effectively work and the persecution of the Jews began, followed by their deportation to concentration camps. Until then, Hungary had been a safe haven for them; many Polish Jews fled to Hungary. The heaviest of many air raids that Budapest suffered took place on 2 June 1944, involving carpet-bombing, with the aim of destroying oil-refineries and other war industries. In July, Géza Lakatos was appointed Prime Minister, and active negotiations were begun for an armistice with the Allies. On 15 October 1944, Regent Horthy declared over the radio that Hungary had withdrawn from the War. The Germans arrested Horthy, deported him to Germany, and installed the pro-Nazi Arrow Cross Party (*Nyilas Párt*) Government, headed by Ferenc (Francis) Szálasi. By now, the Soviet forces had entered the Carpathian Basin from the south relatively easily, because of the changing of sides by Romania on 23 August 1944. Budapest was encircled and under siege from 24 December 1944 to 13 February 1945. By April 1945, the Soviet forces had reached Sopron, near the German border.

During the first months of Soviet occupation, a new government was set up under Soviet auspices on 23 December 1944, in Debreen, composed of a coalition of parties: Communists, Social Democrats, national peasants and Smallholders, all united in the "Hungarian National Independence Front", and agreed on a program of radical social reforms. An armistice was signed in Moscow on 20 January 1945. The Peace Treaty was signed in Paris on 10 February 1947 by representatives of the Hungarian Government, whose country was under occupation by Soviet armed forces. The Peace Treaty, forced upon Hungary, re-established the Trianon frontiers of 1920. On 1 February 1946, Hungary was proclaimed a Republic (later on "People's Republic"). The leader of the Smallholders' Party, Rev. Zoltán Tildy, a Presbyterian minister, was elected its first President. In 1948, President Tildy and other moderate politicians were forced to resign (or to flee abroad), Cardinal József (Joseph) Mindszenty was arrested on trumped up charges and imprisoned in 1949, because of his fiercely anti-Communist views. The "United Workers' Party" came into power under Mátyás (Matthew) Rákosi (1892-1971),

who returned from Moscow, together with other leading Hungarian Communists. He installed a hard-line Stalinistic regime, with ultra-Communist policies for decades, while Hungary remained occupied by Soviet forces. From 1950, Hungary became a dictatorship of the proletariat, indeed a “Satellite” of the Soviet Union. The nationalization of industry, small business, commerce and denominational schools was carried out, and the peasants were forced into collective farms against their will, these collectives usually running at a loss. Moreover, from 1950 on, the “five-year plans” were introduced. Hostility to these ultra-Communist policies resulted in the replacement of Rákosi in 1953 by Imre (Emeric) Nagy (1895-1958), whose liberalizing reforms included the freeing of political prisoners, relaxation of economic and political controls and the termination of compulsory agricultural collectivization. The Warsaw Pact was signed in 1955. Less than two years after his dismissal, Rákosi returned to power, only to be toppled again as a result of the anti-Stalinist demonstrations preceding the national uprising, which developed into the 1956 Revolution. Imre Nagy returned to power when the Revolution broke out on 23 October 1956, involving heroic fighting for several weeks by Hungarian youths, mainly university students and young industrial workers. Nagy secured a Soviet withdrawal, and his Coalition Government withdrew Hungary from the Warsaw Pact, tried to establish a neutral position in foreign affairs, permitted the reforming of political parties (other than the Communists) and released the Primate of Hungary, Cardinal József (Joseph) Mindszenty (1892-1975). There was fierce resistance when a fresh Soviet Army poured into Hungary on 4 November 1956, sent in by Nikita Khrushchev, while the western democracies stood idle. At this point, the Revolution turned into a Freedom Fight against Soviet occupying forces. After the crushed Revolution a severe reprisal came: the leaders of the uprising and hundreds of young freedom fighters were executed, thousands imprisoned and thousands were deported to Soviet labor camps. Imre Nagy was executed in 1958. 200,000 Hungarians emigrated to western countries. Cardinal Mindszenty found asylum in the USA Embassy in Budapest and, after several years, he was persuaded by the Pope to go into exile in Austria. The “Kádár regime” was installed under János (John) Kádár by the Soviets on 4 November 1956, and the so-called “gulash communism” was introduced, lasting for 33 years. Cautious liberalizing policies, educational reforms and decentralized economic planning made Hungary the most prosperous and least repressive of all the Soviet bloc states. There was no unemployment and nobody was hungry; but as a result of all the loans from western banks, the country ran into a debt of astronomic proportions, some \$ 20 billion US.

In 1989, the Soviet-style communistic government-system came to an end. A democratic coalition government was elected in 1990, under József (Joseph) Antall as Prime Minister, with the reintroduction of opposition parties. During his term, the Soviet occupying forces left Hungary on 16 June 1991. Antall died in office in December 1993, so the remainder of his term was filled by Péter Boross, until December 1994.

In 1994 as a result of the second free elections, the “reform communists” of the Socialist Party came into power under Gyula (Julius) Horn (1994-1998), who tried to heal the economic difficulties by introducing the so-called “Bokros Parcel”, which only worsened the situation. In 1998, a center-right coalition had won the election, with Viktor Orbán as Prime Minister. His Government’s policies turned around the economy and, with ambitious projects, they started to modernize the country. They reached out to 2.7

million ethnic Hungarians in the neighboring “successor states”; by introducing the so-called “Status Law”. These ethnic minorities were declared members of the Hungarian nation, despite the separating borders, drawn over their heads artificially by dictated peace treaties; their numbers dwindled from 3.5 million in 1920 to 2.7 million around 2000, because of all the vicissitudes they experienced in ethnic minority life. At the election of 2002, a coalition, led by the Socialist Party came into office with a slight majority, under Péter Medgyessy. After his resignation in 2004, Ferenc (Francis) Gyurcsány became the Prime Minister. His term of office ended in 2006, but was re-elected for a second term on 23, April 2006. It soon turned out that there were frauds at the election, and it became obvious after the self-revealing *Speech of Öszöd* by Gyurcsány. In protest demonstrations took place and serious street fights followed in Budapest, culminated in brutal police attack against tens of thousands of people commemorating the 50th Anniversary of the Revolution and Freedom Fight of 23 October 1956. On the one hand the radicalization of people against Gyurcsán, left-liberal administration grew; on the other hand, the final privatization and indebtedness of the country grew. The 2010 election resulted a more than 2/3 victory of the Fidesz-KDNP alliance. With it the rebuilding of the impoverished country has started. **Hungary, Recovered** – Name of the partially recovered historical Hungary, broken into six pieces by the Versailles-Trianon Peace Treaty in 1920. Between the two World Wars the Hungarian nation tried, by revisionist policy, to reach a peaceful rectification of the historical borders. The “Vienna Awards” settled in a peaceful way the Hungarian border question with the interested parties; however, it has not brought satisfactory solution for any of them. The First Vienna Award, made in 1938, returned to Hungary the southern part of the *Felvidék* (Upper Hungary, now Slovakia) populated by mostly Hungarians. At the disintegration of the Czechoslovak Republic in 1939, the Hungarians occupied the entire territory of the *Kárpátalja* (sub-Carpathia, now Ukraine). In 1940, the Second Vienna Award annexed to Hungary the *Partium* (territory east of the River Tisza) and the Hungarian populated northern part of *Erdély* (Transylvania) from Romania (now again in Romanian possession). In 1941, after Germany attacked Yugoslavia, the Hungarian troops occupied the Bácska and the Baranya territories (*Vajdaság, Voivodina*). Then, at the request of the people, they also occupied the Muraköz. The Peace Treaty of Paris (10 February, 1947) following World War II annulled the Vienna Awards, reinstating the 1 January, 1938 borders of Hungary with the additional loss of three villages on the right side of the Danube to be annexed to the reconstructed Czechoslovak Republic. However, in 1947, when the Peace Treaty in Paris had to be signed, Hungary was under Soviet occupation. – B: 1703, T: 7668.→**Trianon Peace Treaty; Vienna Award I; Vienna Award II; Csáky, Count István; Teleki, Count Pál; Horthy, Miklós; Freedom Fight of 1956.**

**Hunor and Magor Legend (Hunor and Magyar)** – According to Simon Kézai's Chronicle, two sons were born to Ménrót (Nimrod) in the Land of Evilát. While chasing a stag with their knightly companions in the Maeotis (Sea of Azov) region on the Persian border, Hunor and Magor came upon the wives and daughters of the sons of Bereka (Belár), as well as the daughters of Dulo, king of the Alans. The brothers and their companions abducted and married the women. According to the legend, the Huns and the Magyars (Hungarians) are their descendants. The ethnic background described in the legend is in accordance with contemporary ethnographic composition of the Volga and Azov regions. Some parts of the story also contain details of actual historical facts, such as the tradition of king Dulo. Anonymus also mentions the Land of Bulár, whence a large group migrated to Hungary that is to the Carpathian Basin. The Land of Belár or Bulár used to be part of the Bulgar Khanate. – B: 0942, 1153, T: 7617.→**Wondrous Stag; Kézai, Simon.**

**Huns** – A warlike, horse-riding people of uncertain ethnological (possibly Mongolian or Turkic) affinities, with a nomadic and pastoral way of life, originating from northern Central Asia. They first appeared in history between 200 and 100 BC, harassing northern China. They were called *Hsiung-nu* by the Chinese, and even when a part of the Great Wall was already built to keep them out, they still succeeded to raid across or around it. They occupied northern China from the third century AD until 581. Still later, the Huns subjugated numerous other peoples, ethnic groups, calling all of them Huns. They were people of the Asiatic steppes with a typically mounted, horse-riding social order, practicing animal herding, thus being a good example for A. Toynbee's nomadic civilization. The earliest historical description of the Huns is the one provided by Roman historian Ammianus Marcellinus, who was writing around 395 AD. They apparently followed the ancient Avesta religion, preceeding Zarathustra's reforms. Their families lived in individual tents, preferred cleanliness and splendor, their clothing was ornamented and expensive. One "camp" was made up of ten tents, ten such tents forming a "clan", and ten clans constituting a "tribe", led by the tribal leader (*primates* of Ammianus). A clan consisted approximately of 500 people and a tribe of about 5000. They possibly had an overall leader (*khagan*); but this is still an unsolved matter. They did not practice slavery, though their captives became their servants. They were organized along predominantly military lines. Divided into clans, they undertook extensive independent campaigns, living off the areas or countries they ravaged. The Huns were described as short and somewhat Mongolian in appearance. Their military superiority was due to their small, rapid horses, on which they practically lived as mounted archers, even eating and negotiating treaties on horseback. As warriors, the Huns inspired almost unparalleled fear in Europe. Their complete command of horsemanship and as amazingly accurate mounted archers, their ferocious charges and ambiguous retreats, as well as the speed of their strategic movements brought them overwhelming victories. Their tactics and habits were similar to those of the Mongols, Turkic ethnic groups, "White Huns", and also the Magyars; but their racial and linguistic relationship with these peoples is tenuous at best.

After their defeat by the Chinese, their empire broke into two parts in 51 BC. The branch that stayed in Asia were referred to as White Huns or Ephthalites, while the branch that started to move westwards towards Europe, were called Black Huns. The relationship between the two branches is uncertain. The Asian branch moved southwards,

ruling China by intermarriage with the imperial family, raiding Persia, and moved into Northern Indian territory during the 5th and 6th centuries AD. Their appearance in Europe had great historical consequences. They entered Europe from the direction of the Aral Sea about 370 AD, at first staying north of the Caspian Sea. They overran the Alani; by about 405 AD they built up an enormous empire: they moved into the Carpathian Basin, and settled on the Great Hungarian Plain, as well as on the Wallachian Plain, forming an empire that comprised present-day Ukraine, and the area north of the Caucasus Mountains, extending as far east as the Caspian Sea. They imposed their supremacy over the Ostrogoths, Visigoths, and other Germanic peoples, so by 450 AD they ruled over southern Russia, the Baltic area, Poland and Germany (north of the Alps) as far west as Holland. Under the leadership of Attila (who lived simply in a splendid palace) they attacked the Byzantine Empire in 432, when Emperor Theodosius was forced to pay tribute to them; invaded Gaul and threatened even the Roman Empire (for a while Attila was paid by the Romans as a general). However, after his untimely death in 453, his empire broke up because of the fights for succession among his sons, and also as a result of the outbreak of revolt by their subject peoples. For about the next eighty years little is known about their surviving groups. They existed around the Sea of Azov (the Kutrigur and Utigur Huns) and north of the Caspian Sea (the Sabirian Huns). After about 530, they disappeared from history and soon the Avars took over, who were considered in the West as the amalgamated remnants of the Jouan Jouan and the White Huns. Their most representative archeological relics in Europe are the bronze cauldrons, showing their connection with the Altai region of Asia. Hun graves are rare to find, since they mostly burned their dead and their burial practices are difficult to decipher. The main theme of their famous legends deals with their own history. For centuries after their disappearance, the European public opinion still called all the eastern newcomers Huns. The Magyars (Hungarians) arriving in Central Europe during the 10th century were also mistakenly identified with them, and considered them being related, giving rise to the Hun-Hungarian legends. – B: 1143, 1153, T: 3240, 7456.→**Hun Capital, Ancient, in China; Hun Empires; Hun-Hungarian Language; Hun Attire; Hun Battle; Attila; Avars; Árpád.**

**Hunyadi Archives** – A collection comprising 584 catalogued and a large number of not yet catalogued documents that were earlier in the possession of the Royal Bavarian Archives. In 1877, then again in 1888, the Hungarian National Museum began negotiating for their procurement by offering in exchange documents pertaining to Bavaria, then in the possession of the Museum. The exchange was concluded in 1895, and the Hunyadi archival material was deposited in the Hungarian National Archives. – B: 1078, 1020, T: 7617.

**Hunyadi, Emese** (Budapest, 4 March 1966 - ) – Speed skater. She achieved Austrian master title several times. Earlier she won prizes under the Hungarian flag; then she got married in Austria, and since then she competes for Austria. In 1993 she won the complete score in the European mastership competition; in 2000, winner in 1,500 m; world master in 1994 and 1999. In the 1992 Winter Olympics at Chamonix she won the bronze medal, while in the 1994 Winter Olympics at Lillehammer she earned the gold and silver medals for Austria. At the 1998 Winter Olympics (aged 32) she was flagbearer of the Austrian team at opening night. – B: 1031,1020, T: 7456.

**Hunyadi Era** – A particular period in Hungarian history, which lasted from 1446 to 1490, named after János (John) Hunyadi (1408-1456) Governor, and his son King Mátyás I (Matthias Corvinus, 1443-1490). It signifies the assumption of power by high nobility. It was the peak period of an independent national kingdom and of the Renaissance in Hungary. – B: 1078, 1020, T: 7677.→**Hunyadi Family; Hunyadi, János; Mátyás I King; Hunyadi, László.**

**Hunyadi Family** – Count József Teleki in his outstanding work “The Era of the Hunyadis in Hungary“ (*Hunyadiak kora Magyarországon*) described the origins of the Hunyadi family, which, based on documents, can be traced back to the grandfather of János Hunyadi. The first ancestor of the family was a certain Serb, who had three sons: Magos, Vajk and Radul. In 1409, Vajk Hunyadi received the estate of Hunyad for himself and his son János, as well as for his brothers, as a newly confirmed grant from King Zsigmond (Sigismund of Luxembourg) (1387-1437). The estate was already in their possession, which is confirmed by a document dating from 1378, according to which King Lajos I (Louis the Great) (1342-1382), granted the estate to János Hunyadi’s father, Vajk (Voyk). At that time Vajk was already a knight of the court of King Zsigmond’s, a brilliant position in those days. Vajk’s spouse was Erzsébet, the daughter of the noble family of Mozsina de Karánsebes. The marriage produced two daughters and two sons. The elder daughter married a man called Székely; the younger married Manzilla Argyesi. This family produced Miklós Oláh, Archbishop of Esztergom. The younger son, also called János, was governor (*bán*) of Szörény at his death in 1441. His connection to the family is inscribed on the cover of his tomb in the Gyulafehérvár Cathedral. (Gyulafehérvár, now Alba Iulia, Romania). The elder son became the “Turk-beater” János Hunyadi, Governor of Hungary. He was married to Erzsébet Szilágyi. They had two sons László Hunyadi (1431-1457), captain of Nándorfehérvár, Hungary (now Belgrade, Serbia), who was executed by King László V (Ladislav) (1453-1457). The younger son Mátyás I (Matthias Corvinus) became king of Hungary (1458-1490). The king’s both marriages were childless, thus he was left without issue after his natural son, János Corvin died in 1504. The Hunyadi coat-of-arms with the raven, according to letters of patent, was the family’s ancient coat-of-arms, already in use in the early years of János Hunyadi’s regency. – B: 1377, 1020, T: 7617.→ **Hunyadi János; Hunyadi, Mátyás; Mátyás I, King; Hunyadi, László.**
